DICTIONARY
OF
MUSIC AND MUSICIANS
VOL. IV
P—SONATINA

P. (1) abbreviation of *piano*=soft, generally in the form of the small letter italicised.

(2) Abbreviation for *Pedale*, indicating the use of the damper pedal in pianoforte music, generally in the form of the capital letter italicised.

PABST, (1) AUGUST (b. Elberfeld, May 30, 1811; d. Riga, July 21, 1885), was cantor and organist at Königsberg and afterwards director of a music school at Riga. He composed several operas produced at Königsberg and Dresden. His two sons were esteemed musicians, viz.:

(2) LOUIS (b. Königsberg, July 18, 1846) appeared in 1862 as a pianist with the Königsberg Philharmonic and toured in Germany. In 1867 he came to England and was at Liverpool for two years, whence he went to Riga, where he founded a music school. He also visited Australia and established a school at Melbourne (1887), and afterwards he went to Russia and held a professorship at Moscow (1903). He composed piano-music, songs and melodramas.

(3) PAUL (b. Königsberg, May 27, 1854; d. Moscow, June 9, 1897), a pupil of Liszt, settled at Moscow as a teacher in the Conservatoire. A prolific composer, he is remembered chiefly for his brilliant 'paraphrases' for the pianoforte of operatic music, especially that on Tchaikovsky's 'Eugene Oniegin.' (*Riemann*.)

PACCHIEROTTI (**PACCHIAROTTI**), GASPARO (b. Fabriano, near Ancona, 1744; d. Oct. 28, 1821¹), a famous singer (*evirato*).

His ancestors came from Siena, where one of them, Jacopo dal Pecchia, called Pacchierotto, studied the works of Perugino and Raffaele to such good effect that his own pictures have been sometimes taken by connoisseurs to be by the hand of the latter great master.² Driven from Siena by political troubles, the family of Pacchierotto in 1575 took refuge in Pianca-stagnaio; from whence a branch settled in Fabriano.

About 1757 Gasparo Pacchierotti was admitted into the choir of S. Mark's at Venice, where the great Bertoni was his master, according to the memoir written by the singer's adopted son, Giuseppe Cecchini Pacchierotti.³ This, however, is contradicted by Fétis, who states that it was in the choir of the cathedral at Forlì that the young singer received his first instruction, and that it was impossible that he could have sung under Bertoni, since boys were never employed at S. Mark's, where Bertoni did not become maestro di cappella till 1785, having been up to that date (from 1752) only organist. However this may be, it is certain

that the young Pacchierotti, having been prepared for the career of a sopranist, studied long and carefully before he began, at the age of 16, to sing secondary parts at Venice, Vienna and Milan.

Milan was the last place in which he sang a secondary rôle. Returning to Venice in 1769, he took the place of Guarducci, *primo musico* at the S. Benedetto, then the chief theatre in that city. Successful here, he was immediately invited by the impresario of the Opera at Palermo for the season of 1771. H.E. the Procuratore Tron, his good and generous patron, furnished Pacchierotti with recommendations, and the latter set out, taking Naples in his way. Arrived there, he was informed that the celebrated *prima donna*, De Amicis, had protested against the proposition that she should sing with him, 'a player of second parts.' The Venetian minister, to whom he was recommended, comforted him in this juncture, but only with the humiliating permission accorded to him to show his powers by singing two pieces, with full orchestra, at the San Carlo, before Lucillo, Piccinni and Caffarelli as judges. Here he was brilliantly successful, and was immediately offered his choice between the theatres of Palermo and Naples. He proudly chose the former, where even De Amicis herself was surprised into sincere and kindly admiration.

This set the seal on Pacchierotti's reputation, which never faded for twenty-five years. He remained for a time in Italy, singing at Parma, Milan, Florence and Forlì, and at Venice in 1777. After this, he sang at Milan in the carnival of 1778, then at Genoa, Lucca and Turin; but in the autumn of that year he came to London with Bertoni, and made his first appearance here with Bernasconi in the *passiccio* 'Demofonte.' Great expectations had been formed of him, not only from his continental reputation, but from the account given by Captain Brydone in his *Travels*, and from some airs sung 'in his manner' by Piozzi, 'in a style that excited great ideas of his pathetic powers.' These expectations were not disappointed; and Dr. Burney's warm but intelligent praise must be read by those who would form an idea of the truly great singer that Pacchierotti was.

After a second visit to London, where he was engaged for the season of 1782-83 at a salary of £1150, with a benefit, Pacchierotti again returned to Italy. He sang at the Tuileries in Paris on his way back again to England from Venice, where Bertoni had written fresh operas for him. Galuppi had died there in 1784, and at his funeral Pacchierotti took part in a Requiem. 'I sang very devoutly indeed.' he

¹ Cecchini.
² Published at Padua, 1844, 8vo.
³ *Istori*, tom. i. p. 308.

wrote to Burney, 'to obtain a quiet to his soul.' Pacchierotti arrived here, on his third visit, in 1790, sang at the Pantheon, and at the Festival in Westminster Abbey in 1791. At the opening of the Fenice at Venice in 1792 he took his leave of the stage, after which he settled in Padua. In 1796, however, he was compelled to appear once more to sing before General Buonaparte, who was passing through the city.

At Padua he enjoyed the society and the esteem of all the literati of the city, among whom he spent the rest of his life in a peaceful and happy manner, only interrupted by one unfortunate incident. Having imprudently lamented 'le splendide miserie della vittoria,' in a letter to Catalani, which he had entrusted to Dragonetti, who was on the point of escaping from Italy, both fugitive and letter were intercepted; and the unlucky Pacchierotti was thrown into prison, where he was detained for a month. He published, in collaboration with A. Calegari, a method entitled *Modi generali del canto premessi alle maniere parziali onde adornare o rifiorire le nude o semplici melodie o cantilene giusta il melodo di Gasp. Pacchiarotti opera di Ant. Calegari*. (Q.-L.) Not long before his death he was visited by Rossini, to whom he deplored the depraved modern taste in singing, and the growth of a noisy and rococo style, for which, doubtless, the old singer thought the Pesarese in a great degree to blame: 'Give me another Pacchierotti,' the latter replied, 'and I shall know how to write for him!' J. M.

PACCHIONI, ANTONIO MARIA (b. Modena, July 5, 1654; d. July 16, 1738), received his musical instruction from Marzio Eruleo, soprano singer at the Modena Cathedral. In composition he endeavoured to form himself on the principles of the Palestrina school. Taking priest's orders he became chaplain to the court of Modena, and afterwards vice-choirmaster. His compositions, including oratorios and other church music, remain in MS. at Modena and Bologna with the exception of two pieces received by Martini in his *Esemplare*, and one in Paolucci's *L'arte pratica di contrappunto*. In 1733 Pacchioni's name occurs in connexion with a dispute¹ which took place between Martini, then a young man, and the older Tommaso Redi of Siena as to the proper solution of a Canon of Animuccia's, which required the use of two clefs in one part to avoid ledger-lines. Martini appealed to Pacchioni and Pitoni, who both decided in his favour. J. R. M.

PACE, ANTONIO, CAVALIERE (b. circa 1544; d. Florence, 1579), composed 2 books of madrigals a 6 v.; his first printed compositions published 1577. (See Q.-L.)

PACE (PACIUS), PIETRO, described as of Loreto, was, about 1597, organist at Pesaro,

and afterwards, about 1613, organist at the Santa Casa of Loreto. His works belong to the period of transition from the polyphonic vocal style to the solo and dialogue style with instrumental accompaniment inaugurated by VADANA. As enumerated in Q.-L., they consist of nine books of motets (some books missing and others imperfectly preserved), for one to six voices, all provided with Bassus Generalis for organ, and several books of madrigals and 'Arie spirituali' for one to seven voices, partly with and partly without accompaniment. Commemorative Magnificats by Pacius a 4 (tom. i. and viii.) from Kaufmann's collection of 1600. J. R. M.

PACELLI, ASPRILIO (b. Varciano, near Narni, Umbria, c. 1570; d. Warsaw, May 4, 1623), was at first choirmaster to the German College at Rome, and afterwards for a time at the Vatican Basilica. In 1603 he accepted an invitation from the music-loving King of Poland, Sigismund III., to preside over the Royal Chapel at Warsaw, where he remained till his death. The Royal Chapel at Warsaw was then one of the best appointed in Europe, as Sigismund, fanatically anxious to re-establish the strictest Romanism in his dominions even at the cost of civil war, spared neither trouble nor expense in the engagement of the best Italian singers and musicians to restore the Roman form of worship to its former splendour. He had previously engaged Luca Marenzio² as his choirmaster at what was then the magnificent salary of 1000 ducats. To Pacelli Sigismund showed the special distinction of erecting to him a monument with but a laudatory epitaph³ in one of the chapels of the cathedral of Warsaw. Pacelli's publications are one book of psalms and motets, a 8 (Rome, 1597); one book, ditto, a 4 (1599); Sacrae cantiones, a 5-20 (Venice, 1608); one book of madrigals, a 4 (Venice, 1601). The volume of 1608 no doubt shows the brilliant style of polychoric music that was then so much in favour at Warsaw as elsewhere. The 'Promptuarium' of Schadaeus, 1611, contains ten motets of Pacelli a 6-8, and Bodenschatz's 'Florilegium,' 1621, 3 a 8. Ambros gives high praise to a motet for eight voices, 'Factum esse silentium,' in Constantini's collection, 1614. J. R. M.

PACHELBEL, (1) JOHANN (b. Nuremberg, 1653⁴; d. there, Mar. 3⁵ 1706), received his first instruction in music from Heinrich Schwemmer, and subsequently at the university of Altdorf for one year, undertaking duties as organist at the same time. In 1668 or 1669 he went to Ratisbon to the 'Gymnasium poeti-

¹ Eltner throws doubt on Marenzio ever having accepted the post, on account of the difficulty, arising from bibliographical considerations, of fixing the period of his residence in Poland. But see Haberl, *Kirchenmusikalisches Jahrbuch*, 1900, pp. 34-6.

² For the terms of this epitaph see *Kirchenmusik Jahrb.*, 1890, p. 70.

³ Baptized in the Lorenzkirche at Nuremberg, Sept. 1, 1653.

⁴ Or Mar. 6 or 7. Compare the statements of Sandberger with those of Eltner on this point.

⁵ See Banti, *Palestrina*, tom. i. note 198 on p. 120.

cum,' and in 1671 or 1672 to Vienna, where, from 1673 onwards, he was a pupil of J. Kaspar Kerl, and apparently acted as his deputy as organist for him in the Imperial chapel. (See *Q.-L.*) In 1677 he was appointed court organist at Eisenach, and in May of the following year went to Erfurt to be organist of the Predigerkirche. In 1690-92 he was court organist at Stuttgart (in the latter year he was offered an organist's place at Oxford) and in 1692-95 at Gotha, after which period he was appointed to the Sebalduskirche in Nuremberg. Pachelbel's importance in the history of music is due to the fact that he was one of the spiritual ancestors of Sebastian Bach.¹ His special line of composition was in the highly elaborate varying of chorales, four of which were comprised in his 'Musikalische Sterbens-Gedancken' (1683); the 'Erster Theil etlicher Chorale welche bey währenden Gottes Dienst zum prambuliren gebraucht werden können,' etc., appeared in 1693, 'Musikalische Ergötzen,' six suites for two violins, in 1691; and his most notable work, the 'Hexachordum Apollinis,' six sets of variations on different kinds of airs, in 1699. Many suites and other works were preserved in MS., and some were reprinted in German collections before 1901, when the *D.T.B.* contained a volume (VIII. ii.) of ninety-four fugues on the Magnificat, edited by H. Botstiber and Max Seiffert, and shortly afterwards the 'Hexachordum Apollinis' and many other things were edited by A. Sandberger in the *D.T.B.* II. i. This latter contained also specimens of the work of W. H. Pachelbel (2), and the two composers were associated again in Max Seiffert's edition of their organ works (*D.T.B.* IV. i.). The editor last mentioned contributed an interesting article, with some additional chorales, to the *Sammelbände* of the *Int. Mus. Ges.* vol. v. p. 476. Mattheson's *Ehrenpforte* contains the earliest notice of Pachelbel's life and career, and in the preface to the volume of the *D.T.B.* containing the 'Hexachordum' is an elaborate critical biography by Sandberger. His son,

(2) WILHELM HERONYMUS (*b.* Erfurt c. 1685; *d. ?* 1764²), was almost an exact contemporary of Sebastian Bach. He was his father's pupil, became organist at Wöhrd, near Nuremberg, and in 1706 was appointed to one of the churches at Nuremberg. Mattheson gives it as the S. Jakobi-kirche, but in the title of Pachelbel's single publication it is called the Sebalduskirche, and it is probable that he succeeded to his father's post there. The book is called 'Musicalisches Vergnügen bestehend in einem Preludio, Fuga und Fantasia,' etc. (for organ or harpsichord), and appeared in 1725. Besides MS. compositions in various libraries, there are, in accessible edi-

tions, a few pieces for organ or harpsichord included in the *D.T.B.* volumes above referred to. A prelude in B minor, formerly attributed to W. H. Pachelbel, is now considered to be by J. S. Bach, and was published in the *B.-G.* vol. xlii. p. 211. It is discussed by Spitta, *J. S. Bach* (orig. edn. i. 797).

PACHMANN, VLADIMIR DE (*b.* Odessa, July 27, 1848), celebrated pianist and outstanding exponent of Chopin's works.

His father was a professor in the university there, and an amateur violinist of considerable celebrity. Before taking up his residence in Russia, he had lived in Vienna, where he came in contact frequently with Beethoven, Weber and other great musicians of the time. He was his son's teacher, and ultimately sent him, at the age of 18, to the Conservatorium of Vienna, where he remained two years under Dachs. He obtained the gold medal, and returned to Russia in 1869, when he made his first appearance as a pianist, giving a series of concerts which were very successful, although the young artist was not contented with his own performances. He refused to appear again for eight years, during which time he engaged in hard study. At the end of this long period of probation he played at Leipzig, Berlin and elsewhere, but again he was his own severest critic, and after a time he once more retired for two years. Being at last satisfied with his own achievements, he gave three concerts in Vienna, and subsequently three in Paris, and was uniformly successful. On May 20, 1882, he appeared in London at one of Ganz's orchestral concerts, playing the *E♭* concerto of Beethoven, and achieving a brilliant success. Since this time he has occupied a very high position in the estimation of musicians and the public. He has played in all the principal cities of Europe and America, and when in Copenhagen received the rank of Chevalier of the illustrious order of Dannebrog. Although his individuality is too strong and too little under control to allow of his being considered a perfect player of concerted music, and in spite of many eccentricities of manner which do not diminish as time goes on, yet as a solo player, more especially of the works of Chopin, he is justly admired. *M.*

PACINI, GIOVANNI (*b.* Catania, Feb. 17, 1796; *d.* Pescaia, Dec. 6, 1867). Being the son of a celebrated tenor, he was trained to the musical profession from his childhood. He studied under Marchesi in Bologna, and afterwards, from 1808-12, was a pupil of Furlanetto in Venice.

In 1813, when only 16 years old, he wrote his first opera, 'Annetta e Lucinda,' for the theatre S. Redegonda, in Milan; and from that year until 1834 he produced at the principal theatres of Italy forty-two operas with various success. Those which met the warmest approval were 'La Sacerdotessa d' Irminsul' (Trieste,

¹ See Spitta, *J. S. Bach* (Engl. transl.), i. 107-28, etc.

² The date of death is stated in *Q.-L.* to be unknown, but Seiffert (*D.T.B.* IV. i.) gives it as 1764.

1817); 'Cesare in Egitto' (Rome, 1822); 'L' ultimo giorno di Pompei' (1825); 'Niobe' (S. Carlo, Naples, 1826); and 'Gli Arabi nelle Gallie' (Scala, Milan, 1827). In 1834, on the failure of his 'Carlo di Borgogna' at the Fenice in Venice, he went to live at Viareggio, where he opened a school of music. He had already been appointed Kapellmeister to the Empress Marie Louise, widow of Napoleon I., and had married in 1825 Adelaide Castelli, of Naples. His school, for which he also built a theatre seating 800 spectators, met with great success, and pupils flocked there from all parts of Italy. For these he wrote a *Corso teoretico-prattico di lezioni di armonia, Cenni storici sulla musica e trattato di contrappunto* (publ. 1864); a *Memoria sul migliore indirizzo degli studi musicali* had appeared in 1863, and his autobiography, *Memorie artistiche*, in 1865 (finished by Cicconetti and publ. 1872). He afterwards transferred his school to the town of Lucca.

In 1840 he produced in Naples his best opera, 'Saffo,' which met with a great and well-deserved success, notwithstanding it had been written in the short period of four weeks. In 1843 his 'Medea' was enthusiastically received in Palermo, and the Sicilians there and then went so far as to erect a statue to him by the side of that of Bellini in the Royal Villa. 'La Regina di Cipro,' given in 1846 at Turin, and 'Niccolò de' Lapi,' a posthumous opera given in Florence in 1873, are also amongst his best.

Pacini was thrice married, and by each of his wives had three children, five of whom survived him. His son, EMILIO (b. circa 1810; d. Neuilly, Dec. 2, 1898), was the librettist of 'Il Trovatore.' Giovanni was musical director of the musical school of Florence, and was a knight of half-a-dozen continental orders. In 1854 he went to Paris to superintend the representations of his 'Arabi nelle Gallie,' under the new title of 'L' ultimo de' Clodovei,' and there wrote a cantata for Napoleon III., who had applauded that same opera twenty-seven years previously in Rome.

Pacini wrote altogether ninety operas, of which several are still unpublished, and more than seventy other compositions, such as masses, oratorios and cantatas, which do not call for particular mention, if we except a beautiful quartet in C and the cantata for a Dante Centenary.

Pacini, though a successful imitator of Rossini, was still an imitator; and for that reason he can rank only among the minor masters of Italy. He tried in 'Saffo' to free himself from the yoke, but it was too late, nor was he altogether successful. He was called *il maestro delle cabalette* by his contemporaries; and the immense number of cabalettas which he wrote, their beauty and endless variety, show plainly how well he deserved that appellation. He made even his recitatives melodic, and was

accustomed to use his accompaniments for strengthening the voices, by merely making them sustain the upper part. His instrumentation is consequently very weak. All his operas were written hastily; and, as he himself avows in his letters, without much study or reflection. One of Pacini's great merits was that he devoted himself to his vocal parts; he always suited them to the capabilities of his executants, and thus ensured at least the temporary success of his works.

L. R.

PACIOTTI, PIETRO PAOLO, a Roman musician of the 16th century, of whose life all that is known is that he was in 1591 choirmaster of the Seminario Romano. Of his works there was published in 1591 a Book of Masses (which, however, on the title-page is described as a republication 'nunc denuo in lucem editus'), containing three masses and two separate Credos *a 4* and two masses *a 5*. One of the masses *a 5* entitled 'Si bona suscepimus' was republished by Proske with some prefatory words of high commendation in his 'Selectus novus misarum,' 1861. It may be remarked that the leading theme of this Mass, which recurs in all the movements, is identical with the opening theme of a motet *a 5* by Orlando Lassus, on the text 'Si bona suscepimus,' first published in 1571, but the resemblance does not extend further. Paciotti's other publications are a book of motets *a 5* (Rome, 1601) containing thirty-four numbers, and a book of madrigals *a 6* (Venice, 1582) incompletely preserved.

J. R. M.

PACIUS, see PACE, PIETRO.

PACK, CAPTAIN HENRY, a late 17th-century English song composer. Some of his songs are in Playford's 'Choice Ayres' (1675, 1679), 'The Theatre of Musio' (1685) (probably the only instance where his Christian name is given). Two of his songs are in B.M. Add. MS. 19,759, one in Add. MSS. 29,397. The song, 'Tell me, Thyrsis,' printed at the end of Dryden and Lee's 'Duke of Guise,' was very popular, and was several times reprinted.

E. v. d. s.

PACKE, SIR THOMAS, an English composer of church music of the 15th or early 16th century, some of whose work is in the British Museum (Add. MSS. 5665). This is a MS. of Henry VIII.'s time, which once belonged to Joseph Ritson; examples from it are given in his 'Ancient Songs' (1790), and some others in J. Stafford Smith's 'Musica antiqua' (1812). Packe's setting of the Te Deum (one of the very earliest on record in England) is peculiar. The words 'Te deum laudamus' are first sung by a solo voice and are immediately followed by a 5-part chorus singing the 'Te Dominum confitemur.' When the Te Deum proper begins (set to the English text but with Latin words occasionally introduced), the verses are sung by three solo voices, with the refrain 'Te Dominum confitemur' repeated by the chorus

after each verso. For the verses in the latter half, an alternative setting for solo voice is given.

Missa a 3, 'Gaudete.' B.M. Add. MSS. 5665/846.
Missa a 3, 'Rex summe.' B.M. Add. MSS. 5665/738.
 T.D. B.M. Add. MSS. 5665/956-108.

MOTETS

Gaude sancta Magdalena a 3. B.M. Add. MSS. 5665/1126.
Lumen ad revelationem a 5, 'from the Nunc Dimittis.' B.M. Add. MSS. 5665/626-636.
Secundum verbum Iosue a 5, 'from the Nunc Dimittis.' B.M. Add. MSS. 5665/626-636.

J. M.^c.

PADBRUÉ, CORNELIS THYMONS (THYMONSON), (mid-17th cent.), singing master, etc. of Harlem, composed 'Kusjes' (Little Kisses), songs a 3, 4 and 5 v. 2nd edition, 1641; 'I Sof van Jubal' (the praise of Jubal), put into Latin verse by various poets, a 4, 5 and 6 v. with basso continuo, 1643; second book, op. 4, 3-6 v. 1645; also various occasional 'symphonias,' etc. (See *Q.-L.*)

PADEREWSKI, IGNAZ JAN (b. Kuryłówka, Podolia, Poland, Nov. 6, 1860), eminent pianist and composer, was at first a pupil of Raguski at the Warsaw Conservatorium. He went on his first concert-tour in 1876-77, and was in 1879-1881 teacher of the pianoforte at the Warsaw Conservatorium. He went next to Berlin, where he studied under Urban and Wüerst, and finally to Leschetizky at Vienna in 1884. After a short time as professor in the Conservatorium of Strassburg, he went again to Leschetizky, and from 1887 onwards, from the time of his débuts in Vienna and Paris, his career has been one continued triumph.

In May 1890 he visited London and gave a series of pianoforte recitals in St. James's Hall, being previously known in England only as the composer of the popular Minuet in G. In 1891 he toured in America, gave his first concert there in Carnegie Hall, New York, on Nov. 17, undertook in all 117 concerts, and repeated his visits in 1892-93, 1895-96, 1900-01, 1901-02, 1907-08, 1913-14, 1915-16. After the tour of 1895-96 he founded the PADEREWSKI FUND (*q.v.*). In Europe he continued to play always with the utmost success, and paid periodic visits to England up to 1914. Meantime his position as a composer was established by his opera 'Manru' (3 acts), given with great success at Dresden (May 29, 1901) and at the Metropolitan Opera House, New York (Feb. 14, 1902). His symphony in B minor, played by the Boston Symphony Orchestra under Max Fiedler (Feb. 12, 1909), and in London under Richter (Nov. 9, 1909), was another important landmark in his career. It, like the earlier piano concerto, as well as several minor works, showed the strength of the composer's national enthusiasm in the handling of Polish themes and his welding of them into symphonic design.

His style of pianoforte technique was something quite new at the time of his first appearance; his tone in loud passages was often forced, but his position was secured by the

gentler qualities in his art, by exquisite gradation of tone in the softer parts, by the glittering brilliance of his execution, by the wonderful originality of his readings and the ardour of his temperament. The estimate of him as a pianist of outstanding ability who appealed to the imagination of the crowd as much by his romantic bearing and appearance (particularly the aureole of red-gold hair) as by his purely musical gifts was proved to be inadequate by the events of later years. Paderewski's patriotism was of a tougher texture than that of the artist who idealises his country in song or symphonic poem or who in a time of stress is ready to devote his gifts to raising funds for charitable purposes. He had done both. Early in the war (1914-18) he raised large sums for the Polish Victims Relief Fund by his performances in America; but as soon as the time was ripe he abandoned his artistic career, returned to Poland, headed the national party and was elected first President of the Polish Republic (1919). His personal qualities enabled him to unify contending political parties under his inspiring leadership and in a short time he accomplished an unique work in the founding of the Republic. Nothing showed his greatness of vision more completely than the fact that here too he was ready to sink personal considerations, and he relinquished office as soon as his work was done. He retired in 1920, returned to his music, and in 1923 gave recitals first in America and then in England. His renewed performance has been the subject of some criticism on the ground of his freedom of *tempo* and disregard of interpretative tradition, but it is that of a commanding personality and a great mind. His generosity in devoting the proceeds of his work to post-war charities has been conspicuous, and after a series of recitals given for the British Legion (1925) he was created Knight Commander of the British Empire.

Paderewski's compositions include the following:

- Op. 1. Deux Morceaux, Prelude and Minuet.
4. Églogue.
5. 3 Danses polonaises.
6. Introduction et Toccata.
7. Four Songs.
8. Chants du voyageur.
9. 6 Danses polonaises.
10. Album de Mai, scènes romantiques (5).
11. Variations et Fugue.
12. Tatra-Album, Polish dances and songs, for pf. 4-hands.
13. Sonata for pf. and violin.
14. 6 Humoresques de Concert (Menuet en Sol, Sarabande, Caprice genre Scarlatti, Burlesque, Intermezzo Polacco, cracovienne fantastique), pf.
15. Danse de désert, toccata, pf.
16. 4 Morceaux (Légende, Mélodie, Thème varié (in A), and Noe turne (in B flat)), pf.
17. Concerto for piano and orchestra in A minor.
18. Songs to words by Mickiewicz.
19. Fantaisie polonaise, for piano and orchestra.
20. Légende, No. 2, pf.
21. Sonata for pf. in E flat minor.
- 22.
23. Variations and Fugue for pf.
24. Symphony in B minor.
- Minuet in A.
- Opera in three acts, libretto by Alfred Nossig, 'Manru.'
- Opera libretto by Attilio Mendel, 'Sakuntala.'

The beautiful drawing of him by Burne Jones has been photographed and otherwise re-

produced. H.R.H. Princess Louise, Duchess of Argyll, and Sir L. Alma-Tadema, R.A., painted remarkable portraits of him. M.; addns. C.

BIBL.—ALFRED NORSIO, *Paderewski*; E. A. BAGUMAN, *Paderewski*; H. FINCK, *Paderewski and his Art*.

PADEREWSKI FUND, THE, was established by I. J. Paderewski by a deed of trust, dated May 15, 1900, transferring to Henry L. Higginson and William P. Blake, of Boston, as trustees, a sum of \$10,000 to be held as a permanent trust fund for the purpose of aiding musical education in the United States of America, and especially for the encouragement and support of American composers. The terms of the trust provide that once in three years the trustees shall offer prizes from the income in hand for the best compositions submitted by native-born American composers, the awards to be made by a board of judges, three or more, selected by Paderewski or the trustees. The first competition was held in 1902, when three prizes of \$500 each were awarded as follows: (1) to Henry K. Hadley for a symphony ('The Seasons'); (2) to Horatio W. Parker for a composition for chorus, solos and orchestra ('A Star Song'); (3) to Arthur Bird for a sextet for wind instruments. H. E. K.

PADILLA-Y-RAMOS, MARIANO (b. Murcia, 1842; d. Nov. 1906), a Spanish baritone singer who married Desirée ARTËT (q.v.).

He studied under Mabellini in Florence and sang in Italian opera in most European countries. His appearances in England were comparatively few. His first was on Oct. 1, 1881, when he sang the part of Hoel in 'Dinorah' with success. He played in 1886 in the short season at Her Majesty's and in the autumn with Mapleson's company in the provinces. In 1887 he was at Covent Garden. In the same year he sang at Prague in the centenary performance of 'Don Giovanni.'

PADLOCK, THE, a notable English opera, produced at Covent Garden in 1768. The libretto was written by Isaac Bickerstaffe, the author of other successful pieces of a similar kind, who founded it upon Cervantes's 'Jealous Husband.' Charles Dibdin wrote the whole of the music, and it was his first important work. He also took the character of Mungo, the black servant. Bannister, Vernon, Mrs. Dorman and Mrs. Arne were the other principals. Its original run was fifty-three nights, and the music was issued in oblong folio, with a dedication to Mrs. Garrick. In this dedication, Dibdin alludes to the rumours, then current, that the music was the work of an Italian master, which he indignantly refutes.

For a great number of years 'The Padlock' held the boards of country theatres, and Mungo's philosophic sayings were general stock quotations. F. K.

PADUA. The first musical academy at Padua was that of the 'Costanti,' founded in

1566 by the nobles of the city. It embraced, besides music, natural philosophy, ethics, oratory, poetry and languages. The first president was Francesco Portenari. But that the science of music must have been studied far earlier in the ancient Paduan university appears from the writings of Marchetto di Padova, which date between the years 1274 and 1309. Prosdocius de Beldemandis, the musical theorist, was also a native of Padua. He was Professor of Astrology there in 1422, with a stipend of forty silver ducats annually. His works on music are still preserved in the library at Padua (see Burney, *Hist.* ii. 350). Padua probably gave its name to the ancient dance Paduan, or PAVAN (q.v.). C. M. P.

PAËR, FERDINANDO (b. Parma, June 1, 1771; d. Paris, May 3, 1839), Italian opera composer, studied under Gasparo Ghiretti at Parma.

At 20 he became maestro di cappella at Venice, and there composed industriously, though leading a gay and dissolute life. His operas were not all equally successful, but they made his name known beyond Italy, and in 1798 he received an invitation to Vienna, whither he went with his wife, a singer named Riccardi, who was engaged at the Italian Opera. The most celebrated of the operas which he composed for the national theatre, and indeed his best work, was 'Camilla, ossia il Sotteraneo' (1801). In 1803 he went to Dresden as Kapellmeister, remaining, except for occasional tours and visits to Vienna and Italy, till 1806. Here he composed 'Sargino, ossia l' Allievo dell' amore' (1803), and 'Elconora, ossia l' Amore conjugale' (1804), the same subject which Beethoven has immortalised in 'Fidelio.' In 1806 Paër accompanied Napoleon to Warsaw and Posen, and in 1807 was formally installed as his maître de chapelle, and took up his abode in Paris. He composed the Bridal March for the Wedding of Napoleon with Josephine (Apr. 2, 1810). In 1812 he succeeded Spontini at the Italian Opera, to which he remained attached until 1827, in spite of many changes and disputes and of the pecuniary embarrassments which beset the theatre. He and Rossini were temporarily associated from 1824-26. During this period he produced but eight operas, including 'Agnese' (1811), and 'Le Maître de Chapelle' (1821), none of which were marked successes. In 1831 he became a member of the Académie, and in 1832 director of the king's chamber-music, as then reconstituted.

As a man Paër was not beloved; self-interest and egotism, servility to his superiors, and petty intrigues against his professional brethren, being faults commonly attributed to him. But as a composer he is one of the most important representatives of the Italian operatic school at the close of the 18th century. His invention is

flowing, his melody suave and pleasing, his form correct, and in simple compositions finished, although not developed to the fullest extent. Like all the other Italian composers of his time he had the gift of true comedy. In lyric expression he was also successful, as here his Italian love of sweet sounds stood him in good stead; but he was completely wanting in the force and depth necessary for passionate, pathetic, or heroic music, and when such was required he fell back upon common opera phrases and stock passages. This is perhaps most apparent in the operas composed after he left Italy, when his acquaintance with German music, especially that of Mozart, may have influenced his style. His treatment of the orchestra was original and remarkable, and his instrumentation very effective. The partial success only of the operas composed during his stay in Paris is easily explained; he had not sufficient means of expression to attempt French opera, and in Italian opera he could not contend with Rossini, whose genius, with its indifference to the trammels of form, and its exuberant melody, fairly captivated the public. Forty operas are enumerated in *Q.-L.* Paër also composed much for church and chamber—oratorios ('*Il santo sepolcro*,' and '*La Passione*'), masses, motets, cantatas for one and more voices; and instrumental music, a Bacchanalian symphony, etc., now of historical interest only. A. M.

PAESIELLO, GIOV. see PAISIELLO.

PAGANINI, NICCOLO (b. Genoa, Oct. 27, 1782; d. Nice, May 27, 1840), violinist, first of virtuosi.

Paganini's father, Antonio, was connected in a humble capacity with the large export shipping interests of Genoa. He was a musical enthusiast, played the mandoline with skill, and gave his son rudimentary instruction in violin-playing. The undue severity which characterised the child's earliest training undoubtedly undermined his fragile constitution. Had the future prince of violinists been endowed with less fervour for his art, the incidents of his home life might have cut short his artistic career; but, fortunately, he was imbued with a firm determination to become an artist, and his mother nourished the resolve by her frequent recital of a dream, wherein an angel had promised her that her son should become the greatest violinist in the world. Paganini swiftly exhausted the slender paternal musical knowledge, and was handed over to Servetto, a violinist in the theatre orchestra, and two years later became a pupil of Giacomo Costa, maestro di cappella of the Cathedral of St. Lorenzo. In 1793, at the age of 9, Paganini made his début at a concert given by the great singer Luigi Marchesi and the cantatrice Madame Albertinotti at the principal theatre of Genoa. He followed up this first appearance with a benefit concert, at which he was

assisted in return by the same two artists. On both occasions he played his own variations upon the French patriotic air, '*La Carmagnole*,' and roused his audience to a great degree of enthusiasm. These early successes served to strengthen his father's crafty zeal on his behalf, and caused him to accept Costa's proposition that the child should play a solo in church every Sunday. In after life Paganini attached much importance to the rigour of these weekly performances, which enforced the constant study of new works. While under Costa's tuition the boy made the acquaintance of Francesco Gnecco, a distinguished operatic composer of the day, to whom he was indebted for much valuable advice.

At length the time arrived when, in turn, Costa's teaching became inadequate, and Paganini's father decided to take his son to Alessandro Rolla, a celebrated violinist, conductor and composer then residing at Parma. The following advertisement, printed and circulated together with the play-bills of coming performances, gives a clue to the manner in which the funds were raised for the journey:

'July 25, 1795, Niccolò Paganini of Genoa, a boy already known to his country for his skill in handling the violin, having determined to study at Parma to improve his talents under the direction of the renowned Signor Rolla, but lacking the means to do so, has adopted this plan, and has taken courage to beg his compatriots to contribute towards this object, inviting them to come to this entertainment for his benefit.'

The concert proving remunerative, Antonio Paganini and his son accordingly travelled to Parma, and, upon their arrival, presented themselves at Rolla's residence. They found him ill in bed, and pending his wife's inquiry as to whether he would see them they were ushered into an adjoining room. On a table lay a violin and the composer's latest concerto. At a command from his father Niccolò took up the instrument and played the music at sight with such wonderful precision that Rolla forgot his indisposition, and, raising himself in bed, eagerly demanded the name of the professor he had just heard. '*'Tis a child*,' was the reply. But he would not believe this until Paganini was brought to him. '*I can teach you nothing*,' he is reported to have said, and advised the father to take his son to Paër, for instruction in composition. However, Rolla did teach Paganini for several months; and Paër being then in Germany the boy went to Paër's master, Ghiretti, and during six months received three lessons a week from him. He composed twenty-four fugues, unaided by any musical instrument, and devoted much labour to the study of instrumentation. This excellent knowledge of various instruments stood him in good stead some years later, when a wealthy Swedish amateur relieved Paganini's poverty by rewarding him handsomely for a set of compositions for his favourite instrument,

the bassoon. He had complained that he could find nothing difficult enough for his ambitious talent, and the great virtuoso at once cleverly supplied the need.

At the beginning of the year 1797 Paganini quitted Parma, and, accompanied by his father, made his first professional tour. He visited all the principal towns in Lombardy, and at each successive appearance enhanced his growing reputation. On his return to Genoa, he wrote his first compositions for the violin (this is not counting the lost work, which he composed at the age of 9), and filled his music with such novel technical difficulties that he was himself compelled to study certain passages with assiduity. He was now almost 14, and, looking back on a childhood of ceaseless labour, he resolved to strike for freedom. The opportunity arrived with the annual musical fête celebrated on St. Martin's day at Lucca. He entreated his father to allow him to go thither with his elder brother. The consent was at first withheld, but in the end he prevailed, and set forth upon his journey. Lucca hailed the young artist's efforts with such unanimous applause that he extended his travels to Pisa and the neighbouring towns.

At last, released from home restraint, and with but small knowledge of the world, Paganini's nature became prone to welcome every form of licence, and to mistake licence for independence. On one occasion his losses at cards reduced him to the extremity of pawning his violin. In this condition he arrived at Leghorn to fulfil an engagement, and was at his wits' end how to procure an instrument, when the kindness of a French merchant—Livron—relieved him of his difficulty, by lending him a fine Joseph Guarnerius. After the concert Paganini essayed to return the instrument to its owner, but nothing would induce the amateur to accept it. 'No,' he said; 'my hands shall never profane the violin which your fingers have touched; the instrument belongs to you.' Paganini, on a later occasion, gained another violin—a Stradivarius—from Pasini the painter for his easy accomplishment of the artist's challenge to play a certain difficult concerto at sight, but the Guarnerius was ever his most cherished possession.

At this time Paganini's career was chequered by many adventures. Art—love affairs—gambling—interrupted by long intervals of utter exhaustion, filled his life and put a severe strain upon his fragile constitution. At length an event happened which effectually cured him of his gambling propensities. A certain Prince had for some time coveted Paganini's Guarnerius violin, and, coming upon the virtuoso in great poverty, offered him 2000 francs for it. Paganini was sorely tempted to accept the offer, being inconveniently pressed by a debt of honour, but, as a last resource, resolved to risk

his only available funds—thirty francs—at the gaming-table. After reducing the original sum to the perilous amount of three francs, fortune turned in his favour, and he won 160 francs. From that day he ceased to gamble, being convinced, as he said, 'that a gamester is an object of contempt to all well-regulated minds.'

From 1801-04 Paganini resided at the Château of a lady of rank in Tuscany. During the absorption of this love affair he ceased to play in public, and devoted himself to the study of the guitar, for which he composed two sets of duets (opp. 2, 3), with violin. In after years the period of this amorous adventure was selected to give credence to sensational stories of his supposed imprisonment. Not until his arrival in Vienna in 1828 did he publicly challenge the calumny by issuing a manifesto, which was inserted in the leading Viennese journals, in Italian and German, on Apr. 10. In spite of this, his detractors continued to circulate rumours concerning his league with the devil, and similar fancies; these followed him, and were repeated about him wherever he went. In Paris in 1830 he was greatly mortified by the sight of a picture of himself which depicted him in prison. Again he wrote a full statement, which was published in the *Revue musicale*, in which he proved that the mistake was caused by the confusion of his name with a violinist called Durawoski, who had been arrested for conspiring to murder a wealthy priest.

In 1804 Paganini's love for the violin was reawakened by an acquaintance with Locatelli's studies for the violin, and his '*Arte di nuova modulazione*.' He returned to Genoa, applied himself to assiduous study, and composed his two sets (opp. 4, 5) of three quartets, for violin, viola, guitar and violoncello, as well as a set of bravura variations for violin, with guitar accompaniment. In 1805 Paganini resumed his public appearances in Italy, everywhere creating a *furor*. In March of this year Napoleon's sister—Elisa Baccocchi, Princess of Lucca and Piombo—invited him to her court, and, in spite of his vow that he would ever remain unfettered by any regular post, induced him to accept that of director of her private music. She also conferred the rank of Captain of the Royal Bodyguard upon him, so that he might be admitted to all the court functions, and made him conductor of the Opera orchestra. The emoluments granted him at the court were so scanty that inference suggests sentimental reasons for his temporary resignation of the roving life he delighted in. While at the Piombo Court an 'affair' with a lady of rank whom he dared not approach publicly induced him to write his '*Scène amoureuse*,' for two strings only. The lady was excessively touched with his performance, and 'the Princess,' says Paganini,

TARTINI

From an engraving by C. Calcimoto

PAGANINI

From a water-colour by D. Machise, R.A., in the Victoria and Albert Museum

lauded me up to the skies; and then said in her most gracious manner: "You have just performed impossibilities on two strings; would not a single string suffice for your talent?" I promised to make the attempt. The idea delighted me, and some weeks after I composed my military Sonata for the G string entitled "Napoleon," which I performed on Aug. 25, before a numerous and brilliant court audience.

Such a successful first attempt led to further developments of the original idea, until, by unremitting study, and the employment of the harmonic tones, Paganini succeeded in extending the compass of the fourth string to three octaves. In 1808 Paganini obtained his Royal mistress's permission to travel again, and, after seven years' absence, revisited Leghorn, the scene of his former triumphs. For some unaccountable reason he was at first received with coldness. He himself has humorously related how, at the first concert, owing to his having run a nail into his heel, he came limping on to the stage, at which the audience laughed. At the moment he began to play both the candles fell out of his music desk—another laugh. A string breaking after the first few bars of his solo caused more hilarity. But, when he was seen to continue steadily, and play the piece upon three strings, the sarcastic ridicule of the audience was quickly transformed into wild applause. Paganini has often been accused of purposely using frayed strings, so that their effective snapping might show up his extraordinary powers in a more sensational manner. The strong vein of charlatanism which pervaded his mighty genius probably induced him to resort to this trick. 'Paganini,' says Sir Thomas Moore in his *Memories*,

'abuses his powers; he *could* play divinely, and does so sometimes for a minute or two; but then come his tricks and surprises, his bow in convulsions, and his enharmonics like the mewlings of an expiring cat.'

About the beginning of the year 1813 Paganini severed the ties which bound him to the service of the Princess Elisa. The court had been transferred to Florence in 1809—the Princess assuming the title of Grand Duchess of Tuscany; and it was in that year that Bartolomeo executed his famous bust of the virtuoso. At Bologna, in October of the same year, he made the acquaintance of Rossini, then on his way to Milan to write his opera 'Il Turco in Italia'; and on the 29th of the same month Paganini's marvellous achievements at a concert in Milan first made him renowned beyond Italy. He grew much attached to Milan, and gave no less than thirty-seven concerts there; eleven took place alternately at La Scala and at the Teatro Caraccino; and the rest, in the beginning of the year 1814, at the Teatro Rè. In 1814, after returning to Romagna and giving some concerts there, he was prostrated for several months at Ancona by the internal malady which had first attacked

him at Turin in 1808. While in Venice in 1815 he first met Antonia Bianchi, the dancer, whose career was afterwards destined to be so closely allied with his. Writing to his friend, L. G. Gerni, the lawyer, who managed the violinist's financial affairs for him, he says,

'I was not a little enamoured of the Signora at Venice, but letters reached me with such reports about her conduct that I can no longer think of speaking to her.'

However, Paganini soon overcame his scruples, and Antonia Bianchi kept jealous guard over him for many years. Two years later (1816) he revisited Milan, anxious to hear the French violinist Lafont, who was giving concerts in that city. A certain measure of artistic rivalry sprang up between the two, and Lafont persuaded Paganini to give a concert at La Scala in conjunction with himself. Paganini placed the arrangement of the programme in the French violinist's hands. In recounting the event, Paganini has modestly remarked,

'Lafont probably surpassed me in tone, but the applause which followed my efforts convinced me that I did not suffer by comparison.'

A similar rivalry existed at a later date between the Polish violinist Lipinski and himself.

FROM VIENNA TO PARIS.—While at Rome in 1817 Paganini met the Austrian Ambassador, Count Metternich, who invited him to come to Vienna. The weak state of his health, however, proved an obstacle to his plans, and he wished for journey to the north was deferred from time to time. In 1823 a more than usually severe attack of his malady nearly killed him. In 1826 Paganini's son, Achillino, was born at Palermo, and two years later he separated from Antonia Bianchi, the mother of his child. After many years of devotion, this lady's jealous temper had become so violent that this step became necessary. He paid the Bianchi 2000 Milanese *scudi* for renouncing all rights to the child, and on Aug. 1, 1828, Bianchi left him for ever. On Mar. 29, Paganini gave his first concert in Vienna with prodigious success. All the Vienna newspapers teemed with unstinted praise of the virtuoso for two months. The public became absolutely intoxicated, a fever of admiration seized all classes of society. Hats, dresses, shawls, boots, perfumes, gloves, etc., appeared in the shop windows 'à la Paganini.' His portrait was displayed everywhere; his bust adorned the sticks of the Vienna dandies, and even dainty dishes were named after him. The Emperor conferred upon him the title of 'Virtuoso of the Court,' and the town presented him with the Gold Medal of St. Salvator. After his triumphs in the Austrian capital, Paganini started upon a tour in Germany, everywhere creating a sensation. At Cassel he gave two concerts at the theatre, which were attended with great interest by Spohr. The pure intona-

tion sustained by Paganini throughout his entire performance astonished the German violinist, but he was not altogether satisfied, being alternately charmed by his genius and disappointed by the mixture of power and childish tastelessness which he displayed. The two virtuosos dined together, and Paganini's extravagant hilarity is said to have somewhat surprised the pedantic Spohr. Three years' journeyings in Austria, Bohemia, Saxony, Poland, Bavaria, Prussia, and the Rhenish provinces, terminated in Paris, 1831, where he gave his first concert at the Opera-House on Mar. 9. Here, again, wild enthusiasm greeted him, and he remained until May.

VISIT TO ENGLAND.—In that month he travelled to England, and made his début in London at the Opera-House on Friday, June 3. His appearance in London had been looked forward to on May 21; but owing to the newspapers severely censuring the high prices demanded for admission the concert was put off until the artist yielded to the voice of the public, and definitely announced his intention of charging the accustomed prices.¹ His English reception was full of warmth,² and even more curiosity was aroused by his personality in England than in other countries. He was annoyed by the 'excessive and noisy admiration' to which he was subjected. People followed him and mobbed him, and frequently got in front of him in such a manner as to prevent his going either way. They addressed him in English, of which he knew not a single word, and even felt him to see if he were really flesh and blood. The sensation he produced in London was fully sustained during his subsequent tour in the provinces, Scotland and Ireland. Speaking of the high fees demanded by the virtuoso, *The Constitution or Cork Advertiser* (Aug. 25, 1831) remarks:

'He has been engaged by Sir George Smart at the Coronation, for which he is to receive 1000 guineas. The proprietors of Vauxhall Gardens offered him £1000 for three nights; the offer was refused, and when desired to name his terms his demand was £5000 for twelve nights.'

Paganini remained in England until June 1832. He gave a farewell³ concert at the Victoria Theatre on the 17th of that month, and returned to his native country after an absence of six years, having made net profits which, in England alone, amounted to £16,000 or £17,000. The writer well remembers an old amateur who assisted at these concerts, concerning which the following punning rhyme was current:

'Who are these who pay five guineas,
To hear this tune of Paganini's?
—Echo answers—"Pack 'o' ninnies."'

LAST YEARS.—He invested part of his

fortune in landed estates, purchasing, among other properties, the 'Villa Gajona' near Parma, where he decided to reside. Here he occupied himself with projects for the publication of his compositions. Unfortunately he set such a high price on his manuscripts that even the publisher Troupenas—who was accustomed to pay large sums to Rossini, Auber and other celebrated composers—could not come to terms with him. The winter of 1833 was passed in Paris, and it was early in Jan. 1834 that he invited Berlioz to write him a solo for his Stradivarius viola. From this request the symphony 'Harold en Italie' originated. It was performed for the first time at the Paris Conservatoire on Nov. 23, 1834, with Paganini as soloist. The following December the great artist was again in Italy, and on the 12th of that month played at the court of the Duchess of Parma, from whom he received the Imperial Order of St. George. Paganini now began to enjoy the fruits of his fortune and world-wide fame. In 1834-35 he played at rare intervals at charity concerts and for the relief of indigent artists. In 1836 he became involved in the finances of the 'Casino Paganini,' a gambling-house which was opened in Paris bearing his name. The Government refusing to grant an opening licence, the speculators were reduced to giving concerts to defray the expenses of the undertaking. The disastrous failure of the Casino cost Paganini 50,000 francs and such health as was left him. At the beginning of the year 1839 Paganini was in a dying state. Medical men advised him to remove to Marseilles, to which town he accordingly went. His wonderful energies struggled with his failing strength; he seemed to revive, and one day performed his favourite Beethoven quartet with all his old energy. The renewed vigour was, however, but fleeting; a restless yearning to return to his native town seized upon him, and he travelled thither, anticipating favourable results from the sea voyage. From Genoa he fled to Nice, where he intended to pass the winter in recruiting his health. But his hopes were vain, Nice was destined to be his last abode. His malady progressed rapidly, the voice became almost extinct, and a shocking cough racked his frail body. On the last night of his life he was unusually tranquil, and his final effort was to stretch forth his hands for the violin which had been the faithful companion of his travels. Listeners have declared that his improvisation during these last hours was the most remarkable feat of his whole life. He was 56 years of age when he died, the immediate cause of his death being a disease of the larynx. By his will, made on Apr. 27, 1837, and opened on June 1, 1840, he left his son Achillio—legitimised by process of law—a fortune estimated at two millions (£80,000 sterling). Out

² See account in the *Athenaeum*, 1831.

³ His last concert in England was at Portsmouth, Sept. 11, 1832.
W. R. G. F.

of this sum two legacies of fifty and sixty thousand francs were to be paid to Paganini's two sisters, and an annuity of 1200 francs to Antonia Bianchi. He requested that his burial should be without pomp. 'I desire that no musicians play a Requiem for me; and I bequeath my violin¹ to the city of Genoa where it may be perpetually kept.' Independently of his wealth Paganini possessed some valuable instruments—a Stradivarius, a Guarnerius of the smaller pattern, an excellent Amati, a Stradivarius viola, and a bass of the same maker.

By reason of certain superstitious rumours concerning him, and of the fact that he died without receiving the last rites of the Church, permission to inter his body in consecrated ground was withheld until five years after his death. An inquiry having then been concluded with regard to Paganini's orthodoxy, his son, the Baron Achillino, defrayed the expenses of a solemn service to the memory of his father as 'Chevalier de St. George,' in the church of Steccata, belonging to that order of chivalry, in Parma. The body was finally laid in its last resting-place in the month of May 1845, in the village church adjoining Paganini's property, the Villa Gajona, near Parma.

PERSONAL CHARACTERISTICS.—The extraordinary dexterity of his playing was sustained by his concert appearances entirely. George Harry—an *attaché* at the Hanoverian court, who acted as the virtuoso's secretary for a year—asserts that Paganini never touched his violin in private save to test or tune it. 'I have laboured enough to acquire my talent,' was the violinist's remark when questioned; 'it is time I should rest myself.' Sleep was a never-failing source of delight to him, but in eating and drinking he was extremely frugal. The state of his health required the strictest diet, and if he started on a journey early in the morning he frequently fasted nearly the whole day. Ordinarily a basin of soup or a cup of chocolate constituted his breakfast, and a cup of camomile tea his supper.

For his son Achillino he cherished a tender affection, and many anecdotes of his wonderful patience and touching devotion to the child have been preserved. To his inferiors he was contemptuous and disdainful, and he was by no means subservient to people of rank and wealth. His tall skeleton figure, waxen narrow face, enshrined in long dark hair, usually provoked some ridicule, when he first appeared upon the platform, but a few bars of his sensational playing quickly won him the profound admiration of his audience. Sir Charles Hallé, who was introduced to Paganini in Paris, describes him as 'a striking, awe-inspiring figure,' most difficult to converse with. When he wished the young pianist to

play he indicated his desire by a movement of his long hand, but otherwise sat rigid and taciturn.

Few artists have ever aroused such a fund of gossiping scandal as did Paganini. His supposed present of 20,000 francs to his friend Berlioz on Dec. 18, 1838, astonished the world, for not the least of the accusations levelled against him was that of sordid avarice. As a matter of fact, the real donor was Armand Bertin, the wealthy proprietor of the *Journal des Débats*. Berlioz was a member of his staff; he had a high regard for his talents, and was anxious to lighten his troubles. A certain delicacy of feeling suggested that such a gift would be more acceptable if offered as a tribute of admiration from one artist to another. He therefore persuaded Paganini to appear as the donor of this munificent gift. Only one or two of Bertin's friends were admitted into the secret, and Berlioz was always kept in ignorance of the true state of the matter.²

ARTISTIC ACHIEVEMENTS.—As an executant Paganini created the difficulties he performed. The disciple of no school, his concentration and perseverance alone produced the daring flights and brilliant technicalities which were destined to inaugurate the epoch of virtuosity. Before Paganini artists had not discovered the utility of harmonics. Viotti, Rode, Kreutzer, employed natural harmonics for isolated effects, but the advantages of the stopped harmonic of every tone and half-tone on the violin remained unknown. It was these sounds that Paganini developed to such a remarkable degree. He alone estimated their varied functions: (1) in extending the compass of the violin; (2) in adding charm and brilliance; (3) in the execution of high passages in double notes formerly reckoned to be impossible. The novelty of these effects, the facility with which he executed them, the sensational, though often exaggerated, expression he put into them, combined with his varied staccato and pizzicato passages, were the qualities which threw the whole of musical Europe into a paroxysm of wonder and admiration. His inventive talent also augmented his art. For instance, his diverse modes of tuning his violin had been employed in the early part of the 17th century by Biber (see BIBER; SCORDATURA), and the familiar custom of playing a melody on one string and an accompaniment upon another was developed by him into a variety of left-hand pizzicato accompaniments. But the combined pizzicato and arco runs, the chromatic slides with one finger, and the guitar effects, employed by later violinists, especially by Sarasate, were originated by Paganini. The quality of tone which he produced, even in the swiftest passages, was true and pure, but it lacked the richness so characteristic of Spohr or Baillet, and was wanting in tenderness. His excellences

¹ The Guarnerius, preserved in the Sala Rossa of the Municipal Palace at Genoa.

² See *Life and Letters of Ch. Hallé* (1896).

in fact consisted in a combination of mechanical perfection, daring originality, and striking individuality. Outside his own particular *genre* he was unsuccessful. His performance of a concerto by Kreutzer in Paris scarcely rose above mediocrity, but in his own 'Witches' Dance' ('Le Streghe'), the prayer from 'Mosé' on the G string, or the variations on 'Di tanti palpiti,' etc., which were in accordance with his own peculiar style, he never failed to arouse the enthusiasm of his audience. Paganini's care in guarding the secrets of his discoveries made him withhold the publication of his compositions, and to be excessively wary of imparting his art to others. But sometimes caprice led him to interest himself in encouraging genius, as in the cases of Camillo Sivori, to whom, at the age of six, he gave some lessons, and Catarina Calcagno, a little girl whom he instructed for a few months while in Genoa in 1804. The mantle of Paganini's greatness fell easily upon the shoulders of Sivori (*q.r.*), whose execution of Paganini's B minor Concerto never failed to arouse fervent applause, but Catarina Calcagno, after astonishing Italy with the boldness of her style at the age of 15, is lost trace of after the year 1816. While it has been admitted that Paganini's compositions and effects savoured of charlatanism, yet the revolution which he caused in the art of violin-playing, and its lasting results, entitle him to rank amongst the greatest geniuses of his age. Notwithstanding his triumphant successes in Germany (a curious testimony to this is in the fact that Schumann, Liszt and Brahms all founded remarkable pianoforte works on themes from Paganini) Spohr's example held most sway in that country, but the French and Belgian schools reveal his influence at every point.

LIST OF COMPOSITIONS PUBLISHED IN PAGANINI'S LIFETIME

Ventiquattro Caprices pour violon solo dédiés aux arts, op. 1.
 Six Sonati per violino e chitarra, op. 2.
 Sei Sonati per violino e chitarra, op. 3.
 Tre gran Quartetti a violino, viola, chitarra, e violoncello, op. 4 and 5.

POSTHUMOUS PUBLISHED COMPOSITIONS

Concerto in E, op. 6 (posthumous op. 1). The first movement was frequently performed by Wilhelm, with orchestral accompaniment.

Concerto in B minor, op. 7 (posthumous op. 2), with the celebrated Bondo à la Clochette. Orchestral accompaniment.

'Le Streghe' (Witches' Dance, on an air by Simone Mayr), op. 8 (posthumous op. 3). Set of variations upon a theme taken from Rossini's ballet, 'Il nocci di Benevento,' with orchestral accompaniment. Variations on 'God save the King,' with orchestral accompaniment, op. 9 (posthumous op. 4).

'Le Carnaval de Venise.' Burlesque variations upon the popular Italian air, without accompaniment, op. 10 (posthumous op. 5).

'Moto perpetuo.' Allegro de Concert, op. 11 (posthumous op. 6). With orchestra.

Variations upon Rossini's air, 'Non più mesta' from 'La Cenerentola,' op. 12 (posthumous op. 7). Variations upon the air 'Di tanti palpiti,' with orchestra, op. 13 (posthumous op. 8). Sixty variations in all keys upon the popular Genoese air 'Barricade,' with piano or guitar accompaniment. Written in Genoa in Feb. 1856, and dedicated to his friend M. L. G. Gerini, op. 14 (posthumous op. 9).

Schumann and Liszt have each transcribed Paganini's 'Twenty-four Caprices' for the piano, and Brahms has written twenty-eight variations upon a theme of Paganini's. The 'Witch's Dance' was arranged for piano by J. B. Cramer in 1832; for violoncello by R. E. Backlund in 1877, and for concertina and piano by R. Biagrove. Paganini's 'Moto perpetuo,' written at Nice, May 1840, was transcribed for the piano by H. Herz, London, 1840. David edited the two concertos, and Alard included excerpts from Paganini in his 'Méthode classique,' 1858. Other transcriptions have been made by W. V. Wallace, Henri Léonard, M. Hambourg, L. Auer Pauer, etc.

PAGE, JOHN (d. London, Aug. 1812), a tenor singer, was clected a lay-clerk of St. George's Chapel, Windsor, Dec. 3, 1790. He resigned the appointment Nov. 9, 1795, having for some time previously officiated as deputy at the Chapel Royal and St. Paul's. In 1800 he edited and published 'Harmonia sacra; a collection of anthems in score, selected from the most eminent masters of the 16th, 17th and 18th centuries,'¹ 3 vols. fol.; an excellent work supplementary to the collections of Boyce and Arnold. On Jan. 10, 1801, upon the resignation of Richard Bellamy, he was appointed a vicar-choral of St. Paul's. In 1804 he issued 'A Collection of Hymns by various composers, with 12 Psalm tunes and an Ode composed by Jonathan Battisbill.' Also 'Festive Harmony; a collection of the most favourite Madrigals, Elegies, and Glees, selected from the works of the most eminent composers.' In 1806 he published 'The Burial Service, Chant, Evening Service, Dirge and Anthems appointed to be performed at the funeral of Lord Nelson Jan. 9, 1806, composed by Dr. Croft, Purcell, Dr. Greene, Attwood and Handel.' In 1808 he joined William Sexton, organist of St. George's Chapel, Windsor, in the publication of a selection from Handel's Chandos Anthems, in a mutilated form.

W. H. H.

PAGIN, ANDRÉ NOËL (b. Paris 1721), violinist, favourably mentioned by Dr. Burney,² was a pupil of Tartini, having travelled to Italy in his youth with the object of studying under the great Italian. In 1750 he returned to Paris and performed at the Concert Spirituel, with a success which unfortunately was not enduring. He accepted an appointment—bearing an annual stipend of £250 a year—in the Duc de Clermont's household, and frequently took part in soirées given by musical amateurs.

Compositions.—Six Sonatas with bass (Paris, 1748), dedicated to Prince de Grénoble. The same, with harpsichord accompaniment, London, 1770. The *Adagio* of the Eighth Sonata appears under No. 139 in Cimarosa's 'École de violon,' and Sonata No. 5 is included in Alard's 'Les Maîtres classiques.'

E. H. A.

¹ The collection consisted almost entirely of late 17th and 18th century works. A full list of contents was published in previous editions of this Dictionary.

² Present State of Music in France and Italy, p. 42.

PAGLIACCI, opera in 2 acts (said to be founded on an actual incident), words and music by Ruggiero Leoncavallo. Produced Teatro del Verme, Milan, May 21, 1892; Covent Garden, May 19, 1893; New York, Grand Opera House, June 15, 1893; in English, Rouseby Opera Co., Leicester, 1893. Known in Germany as 'Bajazzi,' and in France as 'Paillasse.'

PAGLIARDI, GIOVANNI MARIA (*b.* Florence, mid-17th cent.), maestro di cappella to the Duke of Tuscany, 2nd half of 17th cent.; to the church of Gesù di Genova, Rome, c. 1663; to S. Apollinare, Rome, 1665. He composed operas, melodramas, motets, sacred songs, vocal duets, etc. (*Q.-L.*).

PAHISSA, JAIME (*b.* Barcelona, Oct. 7, 1880), Spanish composer, a pupil of MORERA, who has written operas, symphonic works and numerous pieces for PF. His opera 'La presó de Lleida' (1906), founded on a Catalan ballad, brought him fame. He followed it with 'Canigó' (1910), also on a ballad subject, 'Gala Placidia' (1913), 'La Morisca' (1919) and 'Marianela' (1922).

J. B. T.

PAINE, JOHN KNOWLES (*b.* Portland, Maine, U.S.A., Jan. 9, 1839; *d.* Cambridge, Mass., Apr. 25, 1906), American organist and composer, and for twenty years professor of music at Harvard University, received his earliest musical instruction from Hermann Kretschmar in the city of his birth.

In 1858 he went to Berlin, where for three years he studied in the Hochschule für Musik under Haupt, Wieprecht and Teschner. He had chosen the organ to be his solo instrument, and became so proficient that he gave organ concerts in several German cities before returning to his native land in 1861. Going back to the United States he gave organ concerts and taught. There was at the time no chair of music in any American university (see DEGREES IN MUSIC: AMERICAN UNIVERSITIES). On Mar. 29, 1862, Paine was appointed instructor in music at Harvard University to serve for the remainder of the year, and on June 2, 1873, assistant professor of music to serve from Sept. 1 of that year. After two years, during which time he laboured zealously to win recognition for his art in scholastic circles by giving lessons in harmony and counterpoint (music having been raised to the dignity of an elective study at Harvard in 1870-71), he was appointed full professor (Aug. 30, 1875), being the first incumbent of a chair of music in an American university. From 1862-82 he also served as college organist. He received the honorary degree of M.A. from Harvard in 1869, and that of D.Mus. from Yale in 1890. He resigned his professorship in May 1905, to take effect the following September, and died after a very brief illness. A minute on his life and services which appeared in the *Harvard University Gazette*, on

June 1, 1906, mentioned his services in the following words:

'From the beginning of his career as a teacher, he regarded it as a sacred duty to justify the recognition of music as an academic study, and to familiarise the College public with the best music. For years it was his practice to supplement his regular instruction by a series of pianoforte recitals of the works of the great masters, prefacing each work with a few well-chosen remarks about the personality of the composer and the significance of his music. These recitals, given in the evening in the lecture-room of Boylston Hall, were always well attended by students, to many of whom they furnished the first opportunity to hear classical music.'

Paine was neither a rapid nor a voluminous composer, and his significant works are all in the larger forms. A Mass in D was performed by the Singakademie in Berlin under his direction in Feb. 1867. In 1873 he attracted attention by producing, first in Portland and then in Boston (Handel and Haydn Society), an oratorio entitled 'St Peter.' A symphony in C minor followed, which Theodore THOMAS (*q.v.*) took into his repertory in 1876 as he did later another symphony in A entitled 'Spring,' op. 23 (1880), and a symphonic poem entitled 'An Island Fantasy' (1882). It was also due to the interest of Thomas that Paine composed a cantata entitled 'A Song of Promise' for the Cincinnati Festival of 1888. During the first two decades of his creative career Paine was an uncompromising exemplar of conservatism in musical composition, but liberal notions found expressions in the music to 'Oedipus Tyrannus,' especially the truly noble introduction written for a performance of Sophocles's tragedy under the auspices of Harvard University's Department of the Classics in May 1881. After the first performances at the Sanders Theatre the tragedy was given in English with Paine's music at public theatres in Boston and New York. For the Harvard Classical Club's performance of the 'Birds' of Aristophanes in 1901, Paine also wrote incidental music. For the Centennial Exposition held in Philadelphia in 1876 he made a setting of a hymn written by the poet Whittier, for the World's Columbian Exposition of 1893 a 'Columbus March and Hymn,' and for the Exposition held in St. Louis in 1904 to celebrate the Louisiana Purchase a 'Hymn of the West,' the words by Edmund Clarence Stedman. Of his other works in the larger forms mention may be made of an overture, 'As You Like It'; a symphonic poem 'The Tempest'; three cantatas, 'Phoebus Arise' (1882), 'The Realm of Fancy,' words by Keats (1882), and 'The Nativity,' words by Milton, composed for the Festival of the Handel and Haydn Society of Boston in 1883. H. E. K.

PAISIBLE (*b.* Paris, 1745; *d.* St. Petersburg, 1781), violinist, was a pupil of Gaviniès, through whose influence he became a member of the orchestra of the Concert Spirituel, and one of the musicians attached to the household of the Duchesse de Bourbon Conti. Imbued with an

enthusiastic and hopeful disposition, Paisible's youthful ambition led him to throw up these posts and travel. After visiting the principal French towns, he rambled through the Netherlands and Germany as far as St. Petersburg, where his previous triumphant successes led him to hope for an appearance before the Empress Catherine. Owing, however, to the intrigues of Antonio Lolli, who was then attached to the Imperial court, his endeavours to be heard were frustrated. Two public concerts which he gave failed to attract attention. Much disheartened he entered the service of a Russian Count, with whom he travelled to Moscow. This resource lasted but for a short time. He gave further concerts, but with discouraging results, and at length, distracted by misfortune and crippled with debts, he shot himself at St. Petersburg. His touching farewell letter left instructions that his valuable violin should be sold towards defraying his debts. Published compositions :

Two violin concertos, op. 1, Paris; six string quartets, op. 2, London; six ditto, op. 3, Paris.

E. H.-A.

PAISIBLE (PEASABLE), JAMES (d. London, 1721), resident in London in the latter part of the 17th and beginning of the 18th century, was a member of the King's Band of Music. He composed overtures and act tunes for the following pieces—'King Edward the Third,' 1691; 'Oronoko' and 'The Spanish Wives,' 1696; 'The Humours of Sir John Falstaff,' Henry IV., Part i., 1700; 'She would and she would not,' 1703; and 'Love's Stratagem.' Some of these were 'performed before Her Majesty and the new King of Spain.' He also wrote Duets for flutes, published in 'Thesaurus musicus,' 1693-1696; and Sonatas and other pieces for flutes published at Amsterdam. (See *Q.-L.*) He assisted St. Evremont in composing music for the Duchess of Mazarine's concerts at Chelsea.

Various information, including Paisible's will, has been collected by W. J. Lawrence and published in *Mus. Ant.* ii. 57 and 241; iii. 117, iv. 191.

W. H. H.

PAISIELLO (PAESIELLO), GIOVANNI (b. Taranto, May 9, 1741; d. Naples, June 5, 1816), eminent composer of the Italian school was the son of a veterinary surgeon at Taranto. At 5 years old he entered the Jesuit school at Taranto, where he attracted notice by the beauty of his voice. The elements of music were taught him by one Carlo Presta, a priest and tenor singer, and he showed such talent that his father, who had intended to educate him for the legal profession, abandoned this idea, and succeeded in obtaining admission for him in 1754 to San Onofrio, at Naples, where he received instruction from the veteran Durante, and afterwards from Cotumacci and Abos.

During his nine years of studentship, Paisiello's powers were exercised on church music, but in 1765 he indulged in the composition of a

dramatic *intermezzo*, which, performed at the little theatre of the Conservatorio, revealed where his real talent lay. The piece pleased so much that its composer was summoned to Bologna to write two comic operas, 'La Pupilla' and 'Il mondo a Rovescio'; which inaugurated a long series of successes in all the chief Italian towns. At Naples, where Paisiello finally took up his abode, he found a formidable rival in Piccinni, and later, when Piccinni had departed to Paris, in Cimarosa. The enthusiastic reception met with by his own operas, and by 'L' idolo cinese' (1767) in particular, was insufficient to set him at ease while his own supremacy was at all in danger. He seems all his life to have regarded every possible rival with jealous dislike, and on more than one occasion to have stooped to intrigue, not only to ensure his own success, but to defeat that of others.

In 1776, on the invitation of the Empress Catherine, who offered him a splendid salary, Paisiello left Naples for St. Petersburg. Among a number of operas written there must be mentioned 'Il barbiere di Siviglia' (c. 1780), one of his best works, and to which a special interest attaches from its effect on the first representation of Rossini's opera of the same name. Coldly received when performed at Rome (after Paisiello's return from Russia), it ended by obtaining so firm a hold on the affections of the Roman public that the attempt of another composer to write a new 'Barber' was regarded as sacrilege, nor would this audience at first give even a hearing to the famous work which finally consigned its predecessor to oblivion.

After eight years in St. Petersburg, Paisiello returned to Italy, stopping at Vienna on his way back, where he wrote twelve 'symphonies' for Joseph II., and an opera 'Il rè Teodoro,' (1784) containing some of his best music. 'Il Marchese di Tulipano,' written for Rome, was played in London, Jan. 21, 1786 (under Cherubini, who added six airs of his own) and enjoyed for years a European popularity. He was named, about 1784, maestro di cappella to Ferdinand IV. of Naples, and during the next thirteen years produced several of the works by which he became most widely known, notably 'I zingari in fiera' (1789), 'Nina, o la Pazza d'Amore' (1789), and 'La molinara.' In 1797, on the death of General Hoche, Paisiello wrote a Funeral March, to order, for Napoleon, then General Buonaparte, who always showed a marked predilection for this composer's music, and now gave preference to his work over one by Cherubini.

When, in 1799, the Republican government was declared at Naples, Paisiello accommodated himself to the new state of things, and was rewarded by the post of 'Director of the National Music.' At the Restoration he naturally found

himself out of favour with his old patrons, and lost his former appointment. After two years he succeeded in getting it back again, but this had hardly come about when the First Consul demanded the loan of his favourite musician from the King of Naples to organise and direct the music of his chapel. Paisiello was accordingly despatched to Paris, where Buonaparte treated him with a magnificence rivalling that of Catherine of Russia, and an amount of favour that excited frantic jealousy in the resident musicians, especially Méhul and Cherubini, who did not care for Paisiello's music, and whom he punished by bestowing on their enemies all the patronage at his disposal.

He was occupied chiefly in writing sacred compositions for the First Consul's chapel, but in 1803 he gave an opera, 'Proserpine,' which was not a success. This probably determined him next year to beg for permission to return to Naples, on the plea of his wife's ill-health. It was granted, although unwillingly, by Napoleon, who desired him before leaving to name his successor, when he surprised every one by designating Lesueur, who was then almost unknown and in destitute circumstances.

On Paisiello's return to Italy he was endowed with a considerable pension, was re-established in his old place at Naples, and was maintained in it by Joseph Buonaparte, and after him by Murat. But the favour he enjoyed under Napoleonic dynasties inevitably brought him once more into trouble when the Bourbons returned. He then lost all the pensions settled on him by the various crowned heads he had served. He retained, it is true, his salary at the Royal Chapel, but this, after the luxury he had known, was poverty. Anxiety had undermined his health, and he suffered a fresh blow in the loss of his wife, in 1815. He did not long survive her.

Paisiello composed about a hundred operas, and at least as many other works, of different kinds. Expression, within certain restricted limits, was Paisiello's strong point. All his airs are remarkable for simplicity and grace, and some have considerable charm, such as 'Nel cor più non mi sento' in the 'Molinara,' long known in England as 'Hope told a flattering tale,' and destined to survive still longer owing to the variations on it written by Beethoven. Some of his music is tinged with mild melancholy, as in 'Nina' (a favourite part of Pasta's), but it is never tragic; or with equally mild *bonhomie*, as in the 'Zingari in fiera,' but it is never genuinely comic. It has great purity of style. No *bravura* songs for *prime donne* do we find in these operas. No doubt his simple airs received embellishment at the hands of singers; we know that the custom prevailed, at that time, to such an extent as to determine Rossini to write down all his own *floriture* for himself. This may account for the degree of repetition to

be found in Paisiello's pieces. Trios, quartets, etc. enter largely into his works, and he was among the first, if not the first, to introduce concerted finales into serious opera. In his orchestration he arrives at charming effects through very simple means; it is distinguished by clearness and good taste, and by the independent parts given to the instruments.

For a complete list of Paisiello's compositions the reader is referred to *Q.-L.* Besides the operas, there are eight masses and other church pieces; fifty-one instrumental pieces. F. A. M.

PAIX, JACOB (b. Augsburg, 1556; d. there, c. 1590), son of Peter Paix, organist of St. Anne's. The family are supposed to have come originally from the French Netherlands. Jacob Paix became organist at Lauingen, where in 1583 he published an Organ Book with the title,

'Ein schön Nutz und gebräuchlich Orgel-Tabulatur. Darinnen etlich der berühmten Komponisten beste Moteten mit 12, 8, 7, 6, 5, und 4 Stimmen ausserlesen, dieselben auf all fürnemmen Fesla des ganzen Jahrs und zu dem Chormas gesetzt. Zuletzt auch allerhand der schönsten Lieder Paix' e mezzo und dantes, alle mit grossen Fesla coloriert . . .'

In this work Paix shows himself as one of the school of German colourists in organ-writing, who busied themselves in transcribing vocal pieces for the organ in a purely mechanical fashion, breaking up the melody throughout into the same monotonous figure of four notes without the slightest attempt at any variety of movement. A specimen of his manner of 'colouring' Palestrina's motet, 'O beata et gloriosa Trinitas,' may be seen in Schlecht, *Geschichte der Kirchenmusik*, Ex. 63. But the work also contains two fantasias and two French canzonas, which being free from this purely mechanical 'colouring,' have greater artistic value. One of them is given in Schlecht, Ex. 64. (See also Ritter, *Geschichte der Orgelmusik*, pp. 106-7, etc.) In his preface Paix gives some useful hints on fingering, recommending the freer use of the thumb, etc. Other works of Paix are mentioned in *Q.-L.*, among them two Missae Parodiae on motets by Mouton and Crecquillon, a 4 and 6 respectively. Paix would seem to have been the first to adopt the designation *Missa Parodia* for this class of work. In 1583 Paix is also mentioned as being organist at Augsburg. J. R. M.

PALADILHE, ÉMILE (b. Montpellier, Hérault, June 3, 1844; d. Paris, Jan. 8, 1926) entered the Conservatoire at the age of 9, under the protection of Halévy, and studied hard, carrying off the first piano prize in 1857, and the organ-prize and Prix de Rome in 1860. The cantata which won him the latter distinction, 'Le Czar Ivan IV,' he neither printed nor sent to the library of the Conservatoire, doubtless from the consciousness that it was an immature work. The specimens of his

composition received by the Institut during his stay in Italy gave a favourable idea of his powers, but on his return to Paris he had great difficulty in obtaining a libretto. At length attention was drawn to his merits, and he obtained Coppée's one-act piece, 'Le Passant,' which was produced at the Opéra-Comique, Apr. 24, 1872, and the taking song, 'La Mandolinata,' from it obtained a wide popularity. Notwithstanding the favourable reception of the music, sung by Mme. Galli-Marié and Marguerite Priola,¹ three years passed before the appearance of 'L'Amour africain' (Opéra-Comique, May 8, 1875), in two acts. The libretto of this, by Legouvé, was not approved, and the music was condemned as laboured. Nevertheless many of the numbers bear traces not only of solid musicianship, but of spontaneous and original melody.

Paladilhe's first important work was 'Suzanne' (Dec. 30, 1878), an opéra-comique in three acts. Here we find something beyond mere ingenuity in devising effects; the melodies are graceful and refined, and show an unconventionality of treatment which is both charming and piquant. It had, however, but a moderate success in spite of the merit of its first act, a delicately treated idyll, and the young composer turned his attention to the concert-room, and produced a work entitled 'Fragments symphoniques' at the Concerts Populaires, Mar. 5, 1882. It is a composition of no extraordinary merit, but some of the songs which he wrote at the time are exceedingly graceful. On Feb. 23, 1885, his 'Diana' was brought out at the Opéra-Comique, but only played four times. The libretto was considered dull and childish, and the music heavy and crude. Undismayed by this failure, Paladilhe set to work on a grand opera on Sardou's drama 'Patrie.' Legouvé, who always showed an almost paternal affection for Paladilhe, and who was anxious to make amends for the failure into which he had led the composer by his libretto of 'L'Amour africain,' obtained for him from Sardou the exclusive right of composing the music. The work was given at the Opéra, Dec. 20, 1886, and at the time was successful. It was given at Hamburg as 'Vaterland' in 1889, and at La Scala, Milan, as 'Patria,' in 1895. In Jan. 1881 he was decorated with the Légion d'Honneur. In 1892 his 'Saintes Maries de la mer,' a lyric drama, was produced at Montpellier, and he was made a member of the Institut (Académie des Beaux-Arts in 1892), in succession to Guiraud. Two masses and a symphony are among his non-dramatic compositions.

A. J.

PALADINI, GIOVANNI PAOLO, of Milan (early and mid-16th cent.), a lutenist who appears to have lived in France. He wrote a

book of 'chansons, fantaisies, pavaues, gailardes et la bataille' for lute tablature, published by Jacques Moderne at Lyons; and 1. 'livre de tablature de luth, conten. fantaisies, motetz,' etc., with instructions for the tablature of the lute, Lyons, 1560.

PALAZZOTTO - TAGLIAVIA, GIOSEFFE (16th-17th cent.); D.D. and Archdeacon of Cefalu in Sicily. He composed 2 books of madrigals 5 v. (1617, 1620), also a *Ricercare* in B. Cali's *Ricercaro* of 1605 (Q.-L.).

PALESTRINA, GIOVANNI PIERLUTGI DA (b. 1525/26; d. Rome, Feb. 2, 1594), takes the name by which he is generally known from the place of his birth, the small cathedral town of Palestrina in the Roman Campagna, one of the seven suffragan episcopal sees of the Diocese of Rome. In Latin dedications and letters the composer usually signed his name Joannes Petraloysius (or Petrus Aloysius) Praenestinus, Praeneste being the ancient classical name of the modern Palestrina. Many of his early secular compositions appeared in collections under the diminutive pet name of Giannetto. Formerly there was the greatest uncertainty as to the year of his birth, various dates being given, ranging from 1514-29. Haberl first discovered an inscription which pointed to 1526 approximately as year of birth, and late writers² have produced evidence which points to 1525.

The old tradition that Palestrina was of very humble origin is now refuted by the discovery that his parents, Sante Pierluigi and Maria Gismondi,³ occupied a fairly good social position in Palestrina as owners of houses and lands. The other tradition of his early association with the great Church of Santa Maria Maggiore in Rome is so far confirmed by the appearance of the name 'Joannes de Pelestrina' in the church archives as one of six choir boys in 1537 under the care of a chaplain and choir-master. It further appears that a certain Firmin Le Bel was appointed choir-master in 1540, which induces Casimiri to surmise that Firmin Le Bel is the real Gaudio Mel of later Roman tradition, Palestrina's master in the art of musical composition.⁴ But though Le Bel may have instilled into the youthful chorister some of the elements of musical science, it may seriously be doubted whether Palestrina continued under his tuition afterwards for instruction in composition. Another solution of the mystery surrounding the name of Gaudio Mel is possible. Firmin Le Bel hardly corresponds to the description of Palestrina's teacher given by Antimo Liberati, who, writing in the year 1685, is the only source for the name Gaudio

¹ See K. Weinmann, *Palestrinas Gehrurtstag*, 1915. Casimiri believed that he had succeeded in establishing the precise date as May 9, 1525, and published the discovery in his periodical, *Note d'Archivio*, but frankly admitted in a subsequent number that he had been deceived. See *Note d'Archivio*, June 1924.

² From A. Cametti's *Palestrina* (1920) it appears that Maria Gismondi was stepmother to the composer; Sante's first wife, Palma, dying in 1536.

⁴ Casimiri, *NUOVI documenti*, etc., p. 17.

¹ A promising singer who died young.

Mel. This teacher is described as being a Flemish musician of great talent and master of a very graceful and polished style, who opened a school of music in Rome from which proceeded many excellent musicians, and chief among them Palestrina. This description points to Arcadelt more than to any one else, and Arcadelt was a prominent member of the Sistine Chapel Choir from 1540-49. We may account for the substitution of the name Gaudio Mel by the fact that Goudimel, though never in Rome, was afterwards the editor of a volume of compositions by Arcadelt, and may thus have been confused with him by Liberati, and the transformation of the name Goudimel into Gaudio Mel is easier to be explained than that of Firmin Le Bel. We might therefore hazard the conjecture that when, as an old record says, Palestrina returned to Rome in 1540 for the study of music, it was to place himself under the tuition of a real master of musical composition like Arcadelt between that date and 1544. However this may be, there can be little doubt of the fact that the Fleming Arcadelt and the Spaniard Morales, who was also in the Sistine Chapel Choir to 1545, were Palestrina's first models in the development of his own particular style, Arcadelt standing to him in somewhat of the same relation as Pergino to Raphael, and Morales as Signorelli, or some other of that school.

On October 28, 1544, the Cathedral Chapter of his native town engaged Palestrina as organist and choirmaster, assigning him the revenues of a canonry. His duties were to play the organ on festivals, to sing daily in the choir at Mass, Vespers and Compline, and to instruct the canons as well as the boys in singing and the musical art generally. In 1547 he married Lucretia de Goris, who brought him some considerable accession of worldly means. What music Palestrina may have written at this time we have no means of knowing. Before the middle of the 16th century composers had hardly begun to publish works on their own account. Morales was one of the first to do so by his books of masses published at Rome in 1544. But musical works usually circulated in manuscript for some time before the music-printers obtained copies for publication with or without the sanction of the composers. A work which there seems good reason for taking to be one of Palestrina's earliest works is a Mass a 5, which only appeared in print as late as 1592 in a collection of 'Missae dominicales' published at Milan under the editorship of a Carmelite friar Giulio Pellini, who seems to have been an early acquaintance of the composer. This Mass is partly based on themes from the plain-song Mass 'Orbis Factor,' and in the Gloria and Credo there is the peculiarity of the alternation of Palestrina's music with

passages sung in simple plain-song, an early style of Mass composition.

On Feb. 7, 1550, the Bishop of Palestrina, Cardinal Gian Maria del Monte, was elected Pope, and assumed the name of Julius III. in memory of his former patron Julius II. At his instance Palestrina was recalled to Rome in September 1551 to become choirmaster of the Cappella Giulia, the choir in connexion with St. Peter's founded by Julius II. to be a nursery of native singers for the Sistine Chapel in the Vatican, where foreign singers had hitherto predominated. In token of gratitude for his appointment Palestrina in 1544 published his 'First Book of Masses' with a dedication to the Pope, in which with flattering allusions to the Pope's encouragement of music, he also refers to the care he himself had bestowed on the composition of these masses ('exquisitoribus rhythmis') to make them worthy of the occasion. This book contains 4 masses a 4 and one a 5. The first Mass in it is a further flattering tribute to the Pope, not only by its title, 'Ecce sacerdos magnus,' but by the use which the composer makes of the whole text as well as of the musical theme of the plain-song Antiphon, which begins with these words. Thus while in the greater part of the Mass one or other voice sings in long sustained notes of plain-song the words, 'Ecce sacerdos magnus qui in diebus suis placuit Deo et inventus est justus,' the other voices sing the ordinary words of the Mass in free, quicker counterpoint. Another feature of this Mass is the use of the devices of proportional notation in the Hosanna and Agnus. The other masses a 4 in this book are 'O regem coeli,' 'Virtute magna,' these two based on themes taken from motets beginning with these words by Andreas de Silva, a former composer to the Papal Chapel, and 'Gabriel Archangelus,' similarly based on a motet by Verdelot. This seems to show the interest Palestrina took in the works of his Flemish predecessors. The Mass a 5 is entitled 'Ad coenam agni providi,' and is based on a later Roman form of plain-song tune to the Easter Hymn beginning with these words. The tune in this form is not in accordance with older manuscripts of plain-song, and has therefore been rejected from the revised Vatican edition of the Antiphonal, but it suited Palestrina's purpose for polyphonic setting. It is given complete, note by note, in the soprano part of the *Christe Eleison* and the *Benedictus*. In the rest of the Mass two of the voices sing in canon diapente or subdiapente. It is interesting to note in the first Agnus of this Mass the first appearance of the phrase in the soprano with which the *Missae Papae Marcelli* begins the Kyrie, and there are other general resemblances of musical phrase between the two masses.

On Jan. 13, 1555, by express command of the Pope, Palestrina was admitted a member of the college of singers of the Papal Chapel. This appointment seems to have given umbrage to the other singers of the chapel, as being a contravention of a recent regulation issued by Julius himself, limiting the future number of singers to 24 and requiring that no one should be admitted without examination and approval by the whole college. But in this very regulation there was a clause reserving the right of the Pope to appoint by a *Motu Proprio* signed with his own hand. To accept this appointment Palestrina was obliged to resign his office as choirmaster of the Cappella Giulia, in which he was succeeded by the Florentine Animuccia. Meantime he was busy with the preparation for publication of his First Book of Madrigals a 4, which he intended to dedicate once more to his Papal patron. This intention was frustrated by the unexpected death of Pope Julius on Mar. 23, 1555. The book was published later in the year without any dedication, but on the title-page the composer was still able to designate himself as a singer of the Papal Chapel. There were 22 numbers, in later editions increased to 23. In these early madrigals we may notice a certain subordination of the technique of imitation to that of simple harmony in note for note counterpoint. A large number of them begin with these bursts of four-part harmony with only slight points of imitation afterwards. In this respect Palestrina follows the lines of madrigal composition laid down by Verdelot and Arcadelt. It is interesting to note in No. 11, towards the end on the words 'l'anima vi consacro,' exactly the same succession of chords as give so unearthly an impression to the opening of the famous *Stabat Mater*. Mention may also be made of one number with verses written by Palestrina himself in praise of Francesco Rosselli, one of his predecessors, as choirmaster of the Cappella Giulia from 1548-50. Baini observes that what he has been able to see of Rosselli's compositions does not merit the high eulogium which Palestrina gives to them, but it is remarkable that of two settings of the words 'Adoramus te,'¹ by Rosselli, one has been persistently attributed to Palestrina's authorship, and seems good enough to warrant this attribution.

On Apr. 9, 1555, Cardinal Marcello Cervini was elected Pope and took the title of Marcellus II. He was a devout and exemplary prelate, who announced his intention of reforming various practical abuses in church worship and discipline, and was also interested in the question of a proper church music. His death, however, only 3 weeks after his accession prevented the carrying out of any plans he may have formed. The *Missa Papæ Marcelli* is Palestrina's great

tribute to his memory, and it is just possible that Palestrina may have begun the composition of this work during his reign and at his instigation, although it was not published or known by this name till 12 years afterwards. Marcellus was succeeded in the Papal Chair by Cardinal Pietro Caraffa, who took the title of Paul IV. In the passionate zeal of the new Pope for what he conceived to be a necessary disciplinary reform in the Papal establishment he issued a *Motu Proprio* on July 30, 1555, dismissing from the service of the Sistine Chapel the three members who happened to be married men, including Palestrina, assigning them a small pension as compensation. The two others were Leonard Barré, who had served in the chapel with great distinction for 18 years, and Domenico Ferrabosco, usually considered to be the father of Alfonso Ferrabosco, who afterwards settled in England, and gave the original impetus to the cultivation of madrigal music here. The humiliation of this dismissal seems to have affected Palestrina's health for a time, and he may have felt it as a great blow, not so much perhaps from the merely financial point of view, as from its possible injury to his reputation and the loss of the distinguished patronage he may have hoped to secure in the Papal Court and its entourage for the further publication of his works.

ST. JOHN LATERAN.—From Oct. 1, 1555, he became choirmaster of the church of St. John Lateran. Although this church proudly proclaims itself the 'Mother and Head of all the churches of the city and the world,' and is the proper Cathedral church of the Bishop of Rome, it has, ever since the removal of the Papal residence to the Vatican in 1377, taken a very secondary place to the great church of St. Peter. Its choir service was not so well endowed, and it does not appear that the dignitaries connected with it gave Palestrina the least encouragement to publish his works. During the reign of Pope Paul IV., 1555-59, Palestrina published nothing on his own account; but contributions from him were sought by the editors and publishers of madrigal collections, in which his authorship was for some time concealed under the name of Gianetto. To a collection of madrigals a 4 by Cyprian da Rore, first published in 1557, there is appended 'una canzon di Gianetto' which, however, consists of 14 stanzas, paraphrasing at undue length a single sonnet of Petrarch. The whole work is in consequence somewhat heavy and monotonous, both in melody and harmony. In one of three contributed to a collection of 1558, a setting a 4 of all the stanzas of Petrarch's canzone 'Chiare fresche e dolci acque' we find on the words 'alle dolenti mie parole' another example of the same sequence of chords as in the opening of the *Stabat Mater*. In the *Secondo Libro delle Muse* a 5, published at

¹ See Froese, *Mus. div. tom. iv. pp. 307-10.*

Venice in 1559, under the fuller name, *Gian-netto da Palestrina*, there is a very expressive number 'Ogni loco mi porge dolor e 'l pianto,' in which much more use is made throughout of imitation and less of mere blocks of chords as in earlier works of the kind. In the *Terzo Libro delle Muse* of 1561 there are 8 madrigals by Palestrina which have a greater variety of interest and expression. Among them is 'Io son ferito,' which seems to have become a favourite number, with its themes used afterwards by other composers for masses and organ ricercari. Meantime, among works for the church written in those years, but not published during his lifetime, or indeed, till long afterwards, we may mention a beautiful book of the 'Lamentations' α 4 to 8, mostly for low voices, now published by F. X. Haberl as Book 2 in the complete edition of works Bd. 25. The 'Lamentations' are the Lessons for the First Nocturns of the last 3 days of Holy Week, two or three verses only of each Lesson being composed, but with the refrain at the end 'Jerusalem convertere,' etc. Another work probably of this time is a book of Magnificats α 4-6, composed on the eight tones, the alternate verses only being composed, some of them very elaborately, with various canonic devices after the old Flemish manner. This is numbered as Book 3 in the volume of Magnificats in the complete edition Bd. 27. But the work of this time by which Palestrina leapt at once into sudden fame, and began to be hailed as the first church composer of the day, is the very simple but touching setting for 2 responsive choirs of the Improperia or Reproaches in the service for Good Friday. This work secured for him the favour of the new Pope, Pius IV., who requested a copy for the use of the Sistine Chapel, where afterwards it always formed a striking feature of the Good Friday service, creating a deep impression. It was the first work of the composer copied into the great MS. choir-books of the chapel.

In 1558 Palestrina somewhat suddenly resigned his post at St. John Lateran, apparently being dissatisfied with certain conditions which the Chapter sought to impose on him. Evidently the Chapter did not appreciate their choirmaster at his true worth. On March 1, 1561, he was appointed choirmaster to the better-endowed church of Santa Maria Maggiore, otherwise known as the Basilica Liberiana. Encouraged by the request of his Improperia for the Papal Chapel, also perhaps anxious to retain and deserve his pension in connexion with it, he presented to the college of singers two motets and a Mass. The motets were *Beatus Laurentius* α 5, composed after the old manner with the plain-song antiphon as *cantus firmus* on long notes in the quintus part, with the other voices in free imitative counterpoint on the same theme; 'Estote fortes

in bello' α 6, composed differently, with free use of the plain-song antiphon as a canon between two of the voices. The Mass is that which is known as the Hexachord Mass α 6, based on the syllables 'Ut, re, mi, fa, sol, la,' and is one of the finest works of the master, in which the whole beauty of his later style is definitely manifested. Ingenuity and beauty are wonderfully blended in it. The second soprano sings nothing else throughout but the scale of six notes on varying time values, sometimes ascending, sometimes descending. The Gloria and Credo are almost entirely in note for note counterpoint, making the words to stand out with peculiar distinctness. Ambros comments on the seraphic beauty of the Crucifixus and Pleni sung by the 4 high voices. In the Sanctus advantage is taken of the opportunity which the word Sanctus affords for flowing ornamental scale passages. The Hosanna and Benedictus show other features in the treatment of the scale appropriate to the words which the music is intended to illustrate. The Second Agnus is α 7 with a close canon in subdiapente at one bar's distance between two of the voices on the ascending and descending scale. The whole work might thus be thought as a commentary in music on the ladder set between heaven and earth with angels ascending and descending. These works were copied into the great choir-books of the Sistine Chapel, and contributed to extend the composer's growing reputation. The success thus attained may have induced Palestrina in 1563 to publish his First Book of Motets α 4 dedicated to the Cardinal Bishop of Ostia, Ridolfo Pio Carpi. Its proper title is 'Motecta festorum totius anni cum communi Sanctorum quaternis vocibus.' It contains 36 numbers on texts taken from the Gradual and Antiphonal for all the chief feasts of the Church Year in order beginning with Christmas. In his dedication the composer declares the function of music in church to be the seasoning of devotion by the added delight of sweetness of song and variety of harmony, and expresses his own desire to commend religion to the ears of men by the utmost beauty of musical art. And, indeed, all or nearly all of the pieces of this book are gems of the first water.

THE COUNCIL OF TRENT.—Meanwhile, in 1562 the Council of Trent had been reassembled, and the question of church music came up for consideration, specially in connexion with the service of the Mass. Much exaggerated language has been used with regard to the state of church music before this time. One chief ground of complaint against elaborate contrapuntal music in the Mass was that the words could not be properly heard and understood. There was a considerable party of bishops in the Council who desired to banish polyphonic music altogether from the service of the Church, retaining only the unison plain-song; but others, and

especially the Spanish bishops, were eager in defence of polyphony, urging in its favour the Scriptural text 'non impediās musicam' (Ecclus. xxxii. 5, Vulg.). It was at the same time forgotten that the complaint was quite as much directed against the florid plain-song of Intros, Graduals and Offertories, and its bad execution as against the florid counterpoint on single words of the older polyphonic music; while ever since the time of Josquin composers themselves had been reforming their style of composition by simplifying their counterpoint to give greater prominence to the words, and the increased attention to expression in the motet and madrigal had encouraged this tendency. Another ground of complaint was the use of secular tunes for the designation and in the composition of masses, whereby it came about, as was alleged, that singers often indulged in the irreverent practice of singing the original unedifying words of the tunes along with the sacred words of the Mass. 'It may be doubted whether this latter practice was at all common, but, strange to say, it was not altogether unknown in the Papal Chapel.¹ The reason for the choice of these tunes as themes for Mass composition was no doubt their more melodious character, and the opportunity they afforded for greater freedom and variety of treatment than the plain-song. Apart from the use of secular tunes the combination of other sacred or quasi-sacred words with the proper words of the Mass was also objected to. This practice was more frequently indulged in by early composers, and might be considered as only carrying further the earlier mediæval practice of the insertion of texts known as Tropes and Sequences into the more florid pieces of plain-song, a practice which was only afterwards liturgically disallowed. Palestrina may be open to some blame for adopting it in his Mass 'Ecce sacerdos magnus' as a mere compliment to a Pope, but it was less reprehensible when adopted with some degree of appropriateness to special occasions, as when on a Saint's Day a motet in honour of the Saint was intertwined with the Mass, or when Palestrina in an Ave Maria Mass written for his own church of St. Mary makes a tenor voice sing the plain-song Ave Maria. The practice was more common in the motet than in the mass, and often adds some element of significance or beauty to the composition. To all these complaints of abuses in church music, the answer of the Council of Trent in its 22nd Session, Sept. 17, 1562, was couched in very general terms, namely, that from the church all music in which there was any mingling of the impure and profane should be excluded, everything that was inconsistent with the reverence due to churches as houses of prayer. In a later session of 1563,

further consideration of the subject was adjourned by the resolution to commit the carrying out in detail of this and other measures of reform to Provincial Synods, and meanwhile until such assemblies could be held, bishops with the assistance of their chapters were to take steps in the same direction in their own dioceses.

THE PAPAL COMMISSION.—In accordance with this resolution, Pius IV., in 1564, instituted a commission of eight cardinals to provide for the execution and observance of the Tridentine decrees in his own diocese of Rome, and two of their number, Cardinals Vitellozzo Vitelli and Carlo Borromeo, were specially delegated to regulate the affairs of the Papal Chapel. It is in connexion with this commission, and by the free exercise of his own imagination in bold but mistaken conjectures, that the Abbé Baini² built up the romantic tale, which has so long found acceptance in musical and other histories, of Palestrina's salvation of the cause of artistic church music by his composition of the Missa Papæ Marcelli. Various legends had long been current of the origin and purpose of this Mass. Baini took particular pains to demonstrate the unhistorical character of previous legends, but unfortunately substituted an equally unhistorical legend of his own invention. By research in the Roman Archives F. X. Haberl³ has shown the facts to be quite otherwise than as Baini represents them. Music occupied but a small part of the attention and reforming labours of the Commission. Its main object was disciplinary. The number of the singers was reduced from 37 to 24 in accordance with the older Constitutions, a pension being awarded to those dismissed. On the other hand, the pensions previously granted to Palestrina and Domenico Ferrabosco were augmented to the same amount as the pay of the actual singers; to Palestrina specially on the ground of compositions which he had already provided and would continue to provide for the use of the chapel. This is the only direct connexion of Palestrina with the Commission, so far as any records go. Baini wrongly infers that he was then created Composer to the Papal Chapel. On April 28, 1565, the diary of the chapel records that some masses were sung by the Papal singers before the two cardinals privately, in order to enable them to judge whether the words could be properly heard and understood. No mention is made of what these masses were, or what was the result, nor is there any record of consultations between the singers and the cardinals about other requirements of a proper church music, such as Baini professes to be able to report at length. But finding three masses of Palestrina associated together in a MS. Codex of the Sistine archives, one, the Marcellus Mass

¹ Cf. Haberl, *Katalog der Musikwerke im päpstlichen Archiv* (Leipzig, 1887), under the names Obrecht and Silva.

² Baini, *Memorie storico-critiche della vita e delle opere di Giovanni Pierluigi da Palestrina* (Rome, 1828), pp. 214-34.

³ Cf. Haberl, *Kirchenmusikalisches Jahrbuch* (1892), pp. 92-7.

without any title, and another with the date inscribed 1565, Baini proceeds to make the bold conjecture that Cardinal Borromeo had made a special appeal to Palestrina to compose a Mass which would save church music by satisfying the requirements of devotion as well as of art, and that Palestrina, to ensure success, had written three, the third bearing the title 'Illumina oculos meos' as if implying a special prayer of the composer for the divine assistance in his task. Examination of this Codex proves that there is no real foundation for the imaginative story of Baini. The three masses had no original association with each other, but have only been brought together by a later rebinding of the MSS. It is proved that the Mass in which the date 1565 is inscribed, is one based on Josquin's motet 'Benedicta,' and an earlier copy of it is found in Munich. The date 1565 is only that of its transcription into the Sistine choir-books, and Baini mistakenly supposes it to belong to the Marcellus Mass. But of the Marcellus Mass an older copy, too, is found in the archives of S. Maria Maggiore, in which church it may therefore be presumed to have had its first performance. The other Mass *a 6* happens to have the title 'Illumina oculos meos,' merely because its themes are taken from a motet of Andreas de Silva beginning with these words. It is also very unlikely that three masses by the same composer would have been chosen for so important a trial, on which, according to Baini, so much depended. As likely as not, one of the masses sung before the cardinals may have been by Animuccia, choirmaster of St. Peter's, who also professedly made it his aim to secure the clear enunciation of the liturgical text, and even adopted a stricter attitude than Palestrina in the avoidance of everything but plain-song themes for the composition of masses. Without producing any further shred of evidence in favour of his assertion, Baini goes on to relate that from the three masses he mentions, the cardinals singled out the Marcellus as that which fully satisfied all their requirements as a model for future Mass composition, and that it was afterwards first publicly performed in the presence of the Pope in the Sistine Chapel on a great occasion of public thanksgiving, June 19, 1565, when it met with universal approval and laudation. But neither the chapel diary nor the other authority which Baini quotes at length with regard to this Papal function give the least hint as to what Mass was sung on the occasion, so that it remains a pure conjecture on his part that it was the Marcellus Mass. His whole story must thus be dismissed into the realm of fable, and can only be regarded as a laboured attempt to account for the celebrity which the Mass afterwards obtained, a celebrity due to its merits and not to any official recognition. In any case all that the decision of the Papal

Commission could possibly amount to was a reform in the repertory of the chapel itself by the exclusion of the older works in the polyphonic style which did not correspond with the new demand for the clear enunciation of the liturgical text. It is also worth while to notice that Cardinal Borromeo in his own diocese of Milan seems to have interpreted this demand as requiring a more drastic reform in the style of church music than Palestrina or the Roman School ever adopted. At Borromeo's instigation and under his patronage Vincenzo Ruffo, choirmaster at Milan, published a book of masses claiming to be 'composte secondo la forma del Concilio Tridentino,' in which the text is set in simple note for note counterpoint with simultaneous utterance by all the voices, a style similar to that adopted in certain early English services (see SERVICE) of the Reformation period by Tallis and others.¹

MASSSES AND MADRIGALS.—In 1567 Palestrina published his Second Book of Masses, and, if Baini's story were true, it might be matter for surprise that he should dedicate it to Philip II. of Spain, and not to one or other of the dignitaries of the Papal court, and specially to the saintly Cardinal Borromeo, who according to Baini had incited him to the composition of the work which had saved church music. In his dedication Palestrina simply says that, following the counsel of grave and religious men, he had applied his utmost zeal and industry to adorn the holy sacrifice of the Mass by a new style of musical art (*novo modorum genere*). The language is hardly strong enough to warrant a supposed reference to any official approval of this new style by a Papal Commission. It is very much the same language as in the dedication of his First Book. The masses of the Second Book are indeed more concise, and comply better with all requirements of the clear enunciation of the liturgical text. There are four *a 4*: 'De Beata Virgine,' 'Inviolata,' 'Sine Nomine,' 'Ad Fugam'; two *a 5*: 'Aspice Domine,' 'Salvum me fac,' and one *a 6*: 'Missa Papae Marcelli.' The 'De Beata Virgine' is based throughout on themes from the plain-song Mass 'De Beata,' and thus has the peculiarity of its different parts being based on different Church modes. The 'Inviolata' is based on the melody of a Prose used in Advent processions. The 'Sine Nomine' has very beautiful themes which might be taken from a French chanson, which the composer has preferred not to name. Its second Agnus is *a 7* by means of a canon having three resolutions by different clefs on the same staff. 'Ad Fugam' is only written on two staves with a close canon between each pair of voices. In the Benedictus and second Agnus the canon has the device 'Trinitas in unitate.' 'Aspice Domine' takes its leading theme from a Motet

¹ Cf. Torchi, *L'arte musicale in Italia*, vol. I. pp. 193-206.

by Jachet of Mantua.¹ 'Salvum me fac' is based on a Motet which in the complete edition of Palestrina's works Haberl includes among Opera dubia in vol. xxxi., but the close resemblance between the Mass and the Motet hardly leaves room for doubt as to the authenticity of the latter. The 'Dona nobis pacem' at the end of the Mass is almost note for note the same as the conclusion of the Motet. The Marcellus Mass entirely differs from these and others by being freely composed throughout without being based on any recurring set themes taken from some other source. As originally published it was without its second Agnus *a* 7 which has a canon with two resolutions. Baini thinks to explain the omission by supposing that the composer was afterwards conscious of having temporarily lost the flow of divine inspiration by too great a desire to display his mastery of contrapuntal art. A reduced edition of the Mass *a* 4 was published at Milan in 1590, which is included in vol. xxx. of the complete edition among the Opera dubia. In 1609 Soriano arranged an edition *a* 8, and in 1619 Francesco Anerio another edition *a* 4, which was frequently reprinted.

To a collection of madrigals *a* 5 entitled 'Il desiderio,' published at Venice in 1566, Palestrina contributed 'Vestiva i colli,' one of the most delightful of his secular pieces, which from its frequent republication in other collections seems to have acquired great popularity. With an adaptation to English words it is included in Yonge's 'Musica transalpina,' 1588. On its themes Palestrina himself composed an important Mass, and in the Sistine Archives are two similar masses, one *a* 5 by Nanino, and another *a* 8 by Giovanelli. In 1605 it reappears as a motet, with the words 'Surge propera, amica mea.' It was also arranged in lute tablature, and for the cantus part to be sung by a solo voice with florid ornamental passages termed diminutions.

According to Baini, Palestrina remained quietly in the service of the Liberian Basilica up to the year 1571, but Casimiri² has recently produced documentary evidence which seems to show that he had resigned his position there some time before Apr. 1567, and in August of the same year had entered the service of Cardinal Ippolito d' Este. Baini had thought that the two positions had been all along held conjointly, but this does not seem to have been the case. In token of gratitude for benefits received from his new patron, Palestrina dedicates to him his First Book of Motets *a* 5-7. In the dedication he speaks of himself as now in his mature years verging on old age, and therefore all the more desirous to use what talent he has in the service of religion. The book contains a very large

number of his finest and best known motets, as 'O admirabile commercium,' 'O beata et gloriosa Trinitas,' 'O Domine Jesu Christe adoro te,' 'Viri Galilaei,' 'Dum compleretur,' 'Vidi turbam magnam,' etc., in which we find the characteristic combination of beautiful passages of expressive homophonic harmony with others of flowing melody in imitative counterpoint. It is the madrigal style in its perfection applied to the expression of devotional feeling. There are 24 numbers *a* 5, *a* 6, and *a* 7. The two last are wonderful pieces of musical architecture.

Palestrina was now in the full tide of publication. In 1570 appeared his Third Book of Masses, dedicated like the second to Philip II. of Spain. It contains four *a* 4, 'Spem in alium,' 'Primi toni,' 'Brevis,' 'De Feria,' two *a* 5, 'L'homme armé,' 'Repleatur os meum,' two *a* 6, 'De Beata Virgine,' 'Ut, re, mi, fa, sol, la,' 'Spem in alium' and 'Repleatur os meum' are said to be written on motets by Jachet of Mantua, but the latter is also a study in canons, being written throughout (except in the Crucifixus and Benedictus) in canons at all the intervals beginning with the octave and descending to the unison, and concluding with a double canon at the octave and fourth. It is as if he wished by the employment of canons to show how he could 'untwist all the chains that tie the hidden soul of harmony.' The Mass 'Primi toni' is in a later edition denominated 'Io mi son giovanetta,' and is probably based on a madrigal by Domenico Ferrabosco. Among the previously unpublished masses now included in vol. xxxii. of the complete edition, there is one *a* 6, which might also have the same title, as being based on very much the same themes, though differently worked out in detail. The Missa Brevis takes its themes from Goudimel's Mass 'Audi filia,' and has been one of the most frequently performed on account of its general simplicity and clearness. The 'De Feria' has also much simple beauty, but as its name implies, omits the Gloria and Credo. With the works of his Flemish predecessors Palestrina had evidently a wide acquaintance, and in the Mass 'L'homme armé,' shows his desire to rival with the older musicians on their own ground. It has always been hailed as a brilliant masterpiece in which musical learning in the application of the various devices of proportional notation is most happily blended with great beauty of melody and harmony. The quintus part has nothing else but the old tune as cantus firmus in its mixolydian or major form, mostly in long sustained notes, round which the other parts play in free or imitative counterpoint, and sometimes in homophonic harmony as the text may require. The Benedictus *a* 4 has the peculiarity of the opening phrase of the tune used in the soprano part as cantus firmus. The whole Mass may be said to be a wonderful

¹ P. Wagner in his *Geschichte der Messe*, Bd. 1, p. 448, by an oversight attributes the 'Salvum me fac' to Jachet instead of the 'Aspiece Domine.'

² Casimiri, *Nuovi documenti biografici*, pp. 78 ff.

combination of the old style of *cantus firmus* Mass with the new style of the Marcellus. There is also this little point of connexion between the two Masses that we find something like the opening phrase of the 'L'homme armé' in the Bassus I. of the Kyrie of the Marcellus Mass, and as the beginning of the canon in the second Agnus. It is also the same succession of notes with which Bach opens his Magnificat, so that it might seem as if it had specially struck the fancy of composers as appropriate to the theme of divine praise. The 'De Beata Virgine' *a* 6 is, like the earlier one *a* 4, based on the themes of the plain-song Mass of the same title, but is composed on a larger scale and with greater freedom of development. The Gloria has the interpolations in the text which were formerly used on Feasts of the Blessed Virgin, and were only struck out from the Roman Missal in the revision of 1570. In the later editions of the Mass, repetitions of the proper text were substituted.

REAPPOINTMENT AT ST. PETERS.—On the death of Giovanni Animuccia in March 1571, Palestrina was reappointed choirmaster of St. Peter's, apparently under better conditions than on his first appointment. In the same year he presented two masses to the Papal Chapel, one *a* 5, on his own splendid Christmas Motet, 'O magnum mysterium,' the other *a* 6, which has as *cantus firmus* in the first soprano part throughout (except in the Crucifixus) the plain-song melody of the hymn 'Veni Creator Spiritus,' in various rhythms and with occasional sharpening of the note before the final of the mode for the sake of the harmony. This latter Mass was only first published by Haberl in the modern complete edition. In 1572 Palestrina published his Second Book of Motets, *a* 5, 6 and 8, dedicated to William, Duke of Mantua. This prince, who was a generous patron of music and musicians, and even attempted composition himself, had already from 1568 begun a correspondence with Palestrina by commissioning from him a Mass and other works, for which he rewarded him handsomely. He sent compositions of his own for criticism and correction, and at a later time made overtures to Palestrina to enter his service, and, although this invitation was declined, friendly communications through his agents at Rome were not interrupted till his death in 1587. This Second Book of Motets contains 17 *a* 5, 8 *a* 6 and 4 *a* 8. By including two works by his brother Sylla and one each by his sons Angelo and Ridolfo, it would appear as if Palestrina wished to commend these members of his family to the notice of the Duke. Two motets in honour of St. Barbara were evidently meant for the ducal chapel at Mantua dedicated to that saint. The most striking numbers in this book are two of a penitential character, and very ex-

pressive. 'Peccantem me quotidie,' *a* 5, with modulations on the words 'conturbat me,' unusual in Palestrina, and 'Tribularersi nescirem,' *a* 6, in which he adopts from Josquin's *Miserere* the device of a 'pes ascendens et descendens' with the same theme and text as Josquin, 'Miserere mei Deus.' By way of contrast two specially bright numbers may be mentioned, 'Ascendo ad Patrem,' *a* 5, and 'Tu es Petrus,' *a* 6, on both of which Palestrina has also composed important masses.

On Oct. 7, 1571, was fought the Battle of Lepanto, in which Don John of Austria as commander-in-chief of the combined Papal, Spanish and Venetian forces, by inflicting a decisive defeat of the Turkish navy, turned back the tide of Turkish conquest in Europe. This was naturally hailed as a decisive victory of the Cross over the Crescent, and in celebration of the event Palestrina composed two madrigals *a* 5, one 'Saggio e Santo Pastor,' in honour of Pope Pius V., whose zeal had inspired this new crusade, the other, 'Le selv' avea,' in honour of Don John, the hero of the occasion. These with two others of a different character, first appeared in 'Il IV. Libro delle Muse *a* 5,' published at Venice in 1574. Of the two latter, 'Se di pianti e di stridi' has been edited with an English translation in L. Benson's 'Oriana' series. In 1575 Palestrina published his Third Book of Motets *a* 5, 6 and 8, dedicated to Alfonso II. of Este, Duke of Ferrara. Bains strangely infers from the modest language of Palestrina in this dedication that he was aware of the inferior merits of the book in comparison with the two previous, but there is little justification for his disparaging estimate. There are 18 numbers *a* 5, 9 *a* 6 and 6 *a* 8. The crown of the book for brilliant effect is no doubt those *a* 8 written in the Venetian manner for 2 responsive choirs *a* 4, especially 'Surge illuminare,' 'Hodie Christus natus' and 'Jubilate Deo.' In the Sistine Archives 'Surge illuminare' has a second part, 'Et ambulabunt,' which was printed for the first time in the 6th volume of the complete edition. Of the numbers *a* 6 may be specially mentioned 'O bone Jesu' and 'Haec dies quam fecit.' Of the numbers *a* 5 we might judge 'Congrega, Domine' and 'Domine qui conteris bella' as having been specially written for some occasion of prayers for the success of the expedition of 1571 against the Turks. 'Quid habes, Hester,' is remarkable for the semi-dramatic effect at the end of the first part on the words, 'Cur mihi non loqueris.' In 1576, in a collection entitled 'Musica XIII. autori illustri,' published by Gardano at Venice and dedicated by him to Duke Albert of Bavaria, there appeared two very remarkable madrigals by Palestrina, 'Placide l'acque' and 'Soave fia il morir,' both *a* 5, remarkable not only for their general expressiveness, but for unusual modulations such as Palestrina nowhere else

makes use of, in the one case on the words, 'ma poi cangiossi l' onda,' in the other, 'dolce il cangiar,' and evidently suggested by the words 'cangiar' and 'dolce.'

THE LITURGICAL CHANT.—We have now to touch upon a matter which has been the subject of much heated discussion, and on which there still hangs a good deal of uncertainty, namely, Palestrina's share in the revision of the liturgical chant. After the revision of the Breviary and Missal under Pius V. in 1568 and 1570, there naturally came up for consideration the question of the revision of the plain-song in the Gradual and Antiphonarium. On Oct. 25, 1577, Gregory XIII., who in 1572 had succeeded to the Papal chair on the death of Pius V., issued a Breve, entrusting the revision of the liturgical chant to Palestrina and Annibale Zoilo as members of the Papal Chapel. Their task was defined as that of 'purifying, correcting and reforming' the chant on the same principles as had been applied to the text by removing 'barbarisms, superfluities and obscurities.' The general effect was to secure the same degree of clear enunciation of the text as had come to be insisted on in figured music. The comprehensiveness of the instructions was sufficient to justify considerable alteration of the old plain-song by the suppression of the florid neumes on single syllables, and by the correction of what were considered to be faults of prosody and accent. Palestrina undertook the revision of that part of the gradual known as the 'Proprium de tempore,' while to Zoilo was allotted the 'De Sanctis.' This work occupied Palestrina's attention during the year 1578, and was well advanced towards completion, when it was suddenly abandoned, mainly it appears in consequence of strong representations made to the Pope by a Spanish musician, Don Fernando de las Infantas, in favour of the unutilized plain-song, backed up by the personal influence of Philip II. of Spain.¹ But another account alleges as the only reason of this abandonment some disputes with regard to the printing, and the disappointment of the expectations of Palestrina and Zoilo for some reward of their labours.² However the case may be, the manuscript remained and became the subject of further dispute afterwards. A certain amount of revision was left to private enterprise, without any formal official recognition, as by Guidetti's publication of the *Directorium Chori* in 1582 with a recommendation from Palestrina.

Meantime the composer had suffered severe losses in his own household. His son Angelo had died in 1576, leaving to his care two young children, who also died a few years later. There is no record of Ridolfo's death, which, however, appears to have taken place between

1578 and 1580. In the Register of St. Peter's there is the record of the death and burial of Lucretia, Palestrina's wife, July 23, 1580. There was one son remaining, of whom we hear more later. In 1581 Palestrina married again, probably for the sake of his household, taking for his second wife Virginia Dormuli, a widow possessed of some private means, which enabled him to proceed with the further publication of important works.

SPIRITUAL MADRIGALS, ETC.—Early in 1581 he had published a First Book of Spiritual Madrigals a 5, dedicated to Giacomo Buoncompagno, created Duke of Sora, being a son born to Gregory XIII., before he had taken holy orders. This book contains 26 numbers beginning with elaborate settings of the first eight stanzas of Petrarch's celebrated 'Vergini,' invocations of the Blessed Virgin under various titles, appended by Petrarch to his sonnets on the death of Madonna Laura, which Palestrina may also have thought appropriate for the expression of his own sentiments after the death of his wife. These are followed by 18 pieces on a smaller scale, but equally beautiful in their way, consisting of invocations to the Holy Spirit and the Divine Redeemer, which were probably composed for performance at the popular devotions of the Oratory of Philip Neri. Also in 1581 he dedicates to the same patron his Second Book of Motets a 4, containing 21 numbers of the finest quality, beginning with some of a penitential character as if expressive of the composer's personal desire to find in renewed penitence and devotion some consolation for the loss he had sustained, and concluding with eleven pieces for equal voices, including such miniature gems as 'Adoramus,' 'Pueri Hebraeorum,' 'Surrexit pastor bonus,' etc. In 1582 he dedicates his Fourth Book of Masses to Pope Gregory XIII. In the dedication he mentions his early determination to consecrate his whole talent to the praises of God, language which he could fairly use, even though he still continued to contribute secular madrigals to various collections at the solicitation of publishers. This dedication is one of his best, being written with the full consciousness of his own merits as a composer, and without any undue flattery of his patron. In this book the masses have originally no titles, but are simply numbered, but the thematic sources of all but two can be specified. There are four a 4 and 3 a 5. The first is based on the well-known Sequence of St. Thomas Aquinas's 'Lauda Sion,' the third on the plain-song Ascension Hymn, 'Jesu nostra redemptio,' the fourth is a 'L'homme armé' Mass with the old melody in its Doric or minor form. The four masses a 4 are all very concise and practical, with clear homophonic declamation of the text in the Gloria and Credo, but with more display of polyphonic art in the Sanctus and Agnus. The

¹ Cf. Respighi, *Nuovo studio su Giovanni Pierluigi da Palestrina*.

² *Emendatione del graduale Romano.*

³ Cf. Haberl, *Kirchenmusikalisches Jahrbuch* (1902), p. 140 ff.

three masses *a* 5 are on a larger scale, one with the title in another MS. 'Eripe me de inimiciis,' another the 'O magnum mysterium,' differing a little in its printed form from the earlier copy presented to the Papal Chapel.

It was in 1583 that Duke William of Mantua entered into the negotiations to which we have previously alluded, to induce Palestrina to enter his service, an invitation which the composer prudently declined. It would appear from the correspondence that Palestrina was more anxious to secure a good position for his son Iginio than desirous on his own account to leave Rome, and therefore asked for higher terms than the Duke was willing to meet. But there was no interruption of their friendly correspondence.

THE SONG OF SONGS.—In 1584 appeared the work which has always roused the highest admiration of musicians, the Fourth Book of Motets *a* 5, containing 29 numbers on texts from the Song of Songs. In his dedication to Pope (Gregory XIII., Palestrina expresses his regret that like others he had devoted so much of his time and talent to the composition of secular songs glorifying human earthly love, and declares his desire to atone for this mistake by now endeavouring to glorify the higher divine love, the spiritual love of Christ and the human soul as allegorically represented in the Book of Canticles. He has also thought it to be more appropriate to this subject to use a somewhat more animated style (*usus sum genere aliquanto alacriore*) than in other church compositions. By this more animated style he evidently means one more suffused with the expression of intimate personal feeling. And indeed attention has often been drawn to the glow of inward passionate feeling that pervades the work, the wonderful expression of intense spiritual longing in some numbers in the musical setting of such words as 'languet' and 'amore,' and of the rapture of satisfied delight in others. The whole work shows throughout the transfiguration of the madrigal style into a higher grace and beauty by religious idealism.

MOTETS, MADRIGALS, ETC.—In the same year Palestrina published his Fifth Book of Motets *a* 5, containing numbers of great value. This book was dedicated to Andrea Bathory, nephew of Stephen Bathory, Prince of Transylvania, and from 1575 elected King of Poland. Andrea had come to Rome in 1583 on an embassy from Poland, and in the following year was created a Cardinal of the Roman Church. From the dedication it would appear that he had sought Palestrina's acquaintance, and had several colloquies with him on the subject of music. The first number in the book is a setting of some verses which may have been written by the composer himself, laudatory of the merits of the two Bathorys

and felicitating Andrea on his elevation to the Cardinalate. The book might seem to have been put together rather hastily for presentation to the Cardinal, as its contents are in no proper order. Near the beginning but not together are three deeply impressive numbers on texts taken from the Office of the Dead, 'Paucitas dierum meorum,' 'Domine secundum actum' and 'Parce mihi Domine,' and with them may be found another penitential piece, 'Tribulationes civitatum.' Other fine numbers are of a joyful character, as 'Exultate Deo' and 'Tempus est ut revertar.' The Marian motets are as usual very fine, and the last number in the book is perhaps the most beautiful setting of the *Salve Regina* ever written. Early in 1585 Palestrina presented to the Papal Chapel three very fine masses *a* 6, 'Dum complerentur,' 'Viri Galilaei' and 'Te Deum laudamus,' the two former based on his own bright and joyous motets, the last of a more severe character corresponding with the antique severity of the plain-song themes of the hymn on which it is founded. In the same year a copy of a Mass *a* 8, written for St. Peter's, 'Confitebor tibi Domine,' based on one of his own motets, came into the hands of Giovanni Becci, a canon of Fiesole, who on his own account had it printed at Venice, dedicating it to a noble lady in a convent at Florence with a remark implying that it might usefully be partly played by instruments when there were not sufficient voices for all the parts. This would seem indeed to have been a common practice of the time.

On Apr. 10, 1585, Gregory XIII. died, and on the 24th of same month Felice Peretti was elected in his place, assuming the name of Sixtus V. To the new Pope Palestrina presented a Motet and Mass, 'Tu es Pastor ovium,' *a* 5, as suitable for the use of the Papal Chapel on the occasion of his enthronisation, with which, however, on its performance Sixtus was dissatisfied, remarking that the composer had forgotten his Marcellus Mass and the motets of the Canticles. There is no reason, however, for considering this Mass to be so inferior a work as Baini represents. He goes on to relate how Palestrina made up for this mishap and recovered the favour of Sixtus by the composition of the Mass 'Assumpta est Maria' *a* 6, which he got printed in a great hurry in time for performance on the following Feast of the Assumption on Aug. 15 at the church of S. Maria Maggiore, when it gave the utmost satisfaction. The printed copy, however, to which Baini refers bears no date, and according to Haberl cannot have been printed before 1612. But there is a MS. copy of the Mass in the Sistine archives, which is dated as the first year of the Pontificate of Sixtus, and it is from this that Baini builds up his somewhat imaginative story. The Mass indeed

based on the corresponding motet *a* 6, is, next to the Marcellus Mass, the most celebrated of all Palestrina's works of the kind. Yet it was not just the spur of worldly ambition to secure the favour of a new Pope that incited Palestrina to its composition. We might rather say, it was the ideal of heavenly grace and beauty suggested by the Feast of the Assumption which made a special appeal to the artistic nature of Palestrina, and inspired him to clothe the words of the Mass as of the motet with a corresponding grace and beauty in the form of music. As Proske has said, 'In this Mass his genius soars to the highest regions of the purest ether, and there is in it a majesty, a grace and an inspiration for which our only fitting object of comparison is Raphael's 'Sistine Madonna.' Meantime, even before the performance of these masses, we are told that Sixtus desired to appoint Palestrina as actual choirmaster of the Papal Chapel, and only desisted from his proposal in consequence of the opposition of the members of the choir. It is hardly worth while to enter into the details of this part of the story as Baini recounts them. It is difficult to understand the independent attitude which the choir were able to maintain against an absolute Pope, and the intrigues that had to be resorted to in order to gain their consent to the Pope's wishes, and at the same time why the Pope could only revenge himself by dismissing some of the members. On other occasions Baini has no difficulty in admitting that where the Pope commanded it was necessary for the choir to obey.¹ It is sufficient for us to relate that in the end the Pope contented himself with formally bestowing on Palestrina the official title of 'Composer to the Papal Chapel.' This incident, however, caused a temporary coldness on the part of the members of the choir towards Palestrina, for even when in the same year he presented to the chapel three new and very fine masses, 'Salve Regina' and 'O Sacrum convivium' *a* 5, and 'Ecce ego Ioannes' *a* 6, they remained forgotten and unused until they were transcribed into the choir-books in 1594 after the composer's death. The 'Ecce ego Ioannes,' a Mass for All Saints' Day, as its name implies, has since been recognised worthy to be bracketed with the Marcellus and the 'Assumpta est Maria' as representing the high-water mark of the Palestrina style in the composition of masses. Haberl would assign it the highest place of the three.

In 1586 appeared at Venice the Second Book of Madrigals *a* 4, dedicated to Giulio Cesare Colonna, who in 1571 had been created Prince of Palestrina. This prince is known to have been a man of learning and culture, and also as a benefactor to the town from which he

derives his title. In the dedication the composer describes himself as his 'fidelissimo vassallo,' and opens the work itself with a madrigal in his honour. As the prince is known to have died in 1581, it has been rightly surmised that this publication can only have been a reprint of a lost earlier edition. Of this book it is sufficient to say that all the madrigals contained in it are written in a much freer and more graceful style than those of the early book of 1555. Several of them afterwards appeared with English words in Yonge's 'Musica Transalpina' of 1588. Other fine madrigals of Palestrina continued to appear and reappear in such collections as 'Dolci Affetti' and 'Li amorosi ardori,' etc., notwithstanding his professed renunciation of all such work in 1584. One in 1586, 'Dido ch'giace entro quest'urna' *a* 5, is remarkable for the use of an echo effect in one of the voice-parts. Another, 'O felici ore,' was contributed to a collection, 'Corona di dodici sonetti,' in celebration of a somewhat discreditable marriage of Francesco de' Medici and the beautiful Venetian Bianca Capello! Owing to the circumstances of this marriage, Palestrina might have had more reason to 'blush and grieve' for any association with it than for any other works of the kind. But the music itself is not so unworthy of its composer as Baini represents it to be. Better work published in 1586 are his contributions to a collection, 'Diletto spirituale,' consisting of three short and simple but very beautiful settings, two *a* 3 and one *a* 4 of verses from the hymn 'Jesu dulcis memoria,' which are also provided with an arrangement for cembalo and lute, either as accompaniment or for separate performance. This arrangement may have been the work of Verovio the printer, who published other works in the same way.

LAMENTATIONS OF JEREMIAH.—In 1588 Palestrina published his 'Lamentationum Hieremiae prophetae liber primus,' dedicated to Pope Sixtus V. According to Baini, this work was undertaken at the instigation of Pope Sixtus. This makes it all the more strange that in the dedication the composer should have such occasion to make his own pitiful lament of want of means to enable him to bring out his works in the splendid large folio form which he thinks would have been more befitting for church compositions, and to excuse the appearance of this work in its smaller and less attractive form (*minutiore hac forma*). He was no doubt thinking of the splendid folio editions in which just at this time the Spanish musician Victoria was enabled to bring out similar works under the patronage of the King of Spain, and was indirectly appealing for more substantial patronage in order to further publication. This set of Lamentations *a* 4-5 is quite

¹ L'ordine fu precettivo, conveniva obbedire.

distinct from the earlier set *a* 4-8 composed for St. John Lateran, and also from another set *a* 5-6, more elaborate, composed for S. Maria Maggiore. The *Liber Primus* was thus really the third book in order of composition, and there was a fourth set *a* 5-6 probably composed later for the chapel of the Duke of Altaemps. Besides these complete books several separate Lamentations have now been published from the Sistine and other Roman archives. With the nine Lamentations *Liber Primus* also included a setting of the Canticle *Benedictus a 4* to be sung in alternate verses with the plain-song, and a *Fauxbourdon* setting of the Psalm *Miserere*. Palestrina's Lamentations have always been a subject of admiration for the deep religious pathos which pervades them.¹

HYMNS OF THE WHOLE YEAR.—Another magnificent liturgical work of the master followed in 1589, '*Hymni totius anni secundum sanctae Romanae ecclesiae consuetudinem quatuor vocibus concinendi necnon hymni religionum*.' This work, dedicated like the preceding to Sixtus V., appeared first in a splendid large folio edition, from which it would seem that the appeal for more substantial patronage had met with some response. It consists of polyphonic settings of the plain-song melodies of all the Vesper Hymns of the 'church year, together with some hymns peculiar to certain religious Orders. Only the odd verses are treated in this way, the even verses being sung to the unison plain-song. There are some exceptions, as when in the *Vexilla Regis* the composer could not forbear to add his splendid setting of the sixth verse, '*O crux ave, spes unica*.' This hymn had been sung three years before, under the composer's direction, on the occasion of the erection by Sixtus V. of the Obelisk in the Piazza of St. Peter's. The last verses of the more important hymns are set *a* 5 and 6, with the occasional use of canonic devices. Baini is eloquent in praise of Palestrina's Hymns, and rightly says that they reunite what is most beautiful and most sublime in all his other works. Incidentally it may be re-

marked that the forms of plain-song melody which Palestrina employs are such as were current in Rome in his time, and are not always the best or most correct, though they may have appealed more to his personal taste, and suited his purpose better, as in the case of the *Ad coenam agni providi*, the melody of which he has also employed for other hymns. In the revised Roman Breviary of 1631, a serious alteration of the text of the old hymns was carried out under the personal direction of Pope Urban VIII., whose fastidious classical taste was offended by what was supposed to be their faulty Latinity and incorrect prosody.² The result is now regarded as a senseless and unwarrantable 'deformation of the work of Christian antiquity,' destroying the noble simplicity and poetic beauty of the hymns. A rearrangement of Palestrina's music to the new text was entrusted to four singers of the Papal Chapel, and in 1644 this new edition was published at the Pope's expense by the Plantin-Morctus house at Antwerp. Naturally, no value whatever can be attached to it. Ten hymns (the '*hymni religionum*,' Nos. 36 to 45) were omitted and two others substituted, one with text composed by Pope Urban himself.

In 1590 Palestrina published his Fifth Book of Masses, dedicated to Duke William of Bavaria, the patron of Orlando Lassus. It contains four masses *a 4*: '*Aeterna Christi munera*,' '*Jam Christus astra ascendat*,' '*Panis quem ego dabo*,' '*Iste Confessor*'; two *a 5*: '*Nigra sum*,' '*Sicut lilium inter spinas*'; two *a 6*: '*Nasce la gioia mia*' and '*Sine nomine*.' Of these the '*Aeterna Christi munera*' and '*Iste Confessor*' have been the most frequently performed by reason of their brevity and comparative simplicity, also their general brightness of character. On the Mass, '*Panis quem ego dabo*,' founded on themes from a motet by Lupus Hellinck, Baini makes some very strange remarks. Professing to defend it against certain objections, he considers it, because included in a volume dedicated to the Duke of Bavaria, and not to the Pope or the Papal Chapel, as having been deliberately written by Palestrina more in an instrumental style than in the vocal style proper to church music, and represents Palestrina as himself admitting that he had sometimes been constrained by poverty to lower his standard of writing to this extent. If what Baini alleges were true, his defence would be more damaging than any criticism. But, first of all, he misconstrues the phrase which he quotes from the dedication of the '*Book of Hymns*.'³ Palestrina says not a word of having been constrained by poverty to lower his standard of writing church music, but only refers to having been obliged by others to devote his talents occasionally to lighter subjects,

¹ There may be reason for doubting the strict accuracy of some of Baini's statements with respect to the earlier use of the Lamentations in the Papal Chapel. He says that up to 1586 only those of Elzéar Geist of Carpentras, a former choirmaster of the chapel, had been in use. But from the list of choir-books in the archives it would seem that some by Morales and Festa had also been in use. On the alleged authority of '*Memorie a penna*,' of which no trace has ever been found, he goes on to tell us that for 1587 Sixtus V. ordained that only the first Lamentation of each of the three days in Holy Week should be sung *in concerto*, with music better adapted to the occasion than that of Geist (of which, indeed, Baini speaks too contemptuously), and that the other two lessons of each day should always be in the plain-song. Accordingly, Palestrina, he says, was induced to compose one Lamentation for 1587, which gave such satisfaction as encouraged him to publish his *Liber Primus* in 1589. It is strange, however, that the one Lamentation which gave such satisfaction in 1587 does not appear in the printed book, and that Palestrina should have substituted another. Also, though Palestrina composed all the nine lessons, it would appear from Baini's account that only three, the first of each day, were ever sung, the other six being always sung by a solo voice in plain-song. This usage, indeed, became part of the later routine of the Papal Chapel, but it may be doubted whether it dates from Sixtus V. There is this further consideration. Baini makes no mention of Victoria's Lamentations as ever having been used. But apart from Victoria's publication of his '*Officium hebdomadae sanctae*' in 1585, an earlier copy of all his nine Lamentations is found in the choir-books of the Chapel.

² Cf. Batifol, *Histoire du Breviaire Romain* (1893), pp. 262-4, also Baumer, *Geschichte des Breviers* (1896), pp. 507-10.

³ Cogor praestantissimum facultatem delictis ad res levissimas.

that is, to secular composition. Further, there is not the least foundation for the assertion that this Mass is composed in an instrumental style, and not in a proper vocal style. The occasional runs on consecutive notes that occur in it are not more frequent than in so many of his other first-rate masses. The Mass, indeed, is of a very devotional character throughout, the themes being such as lend themselves in Palestrina's hands to the expression of devotional feeling. With regard to the Mass, 'Nigra sum,' though it is said in some books to be based on the Motet beginning with these words in Palestrina's 'Book of the Canticles,' it has very little in common with that Motet, and the themes are evidently taken from some other source. So also the 'Sicut lilium' does not take its themes from the book of Canticles, but from the Motet in the book of 1569. While in 'Nasce la gioia mia' the composer plainly avows the source of his themes, he has declined to do so with the 'Sine nomine.' From the nature of the themes in the latter, we might conjecture them to be taken from a French chanson, or from some popular song other than a madrigal, which on this account he might have more hesitation in naming. But whatever be the source of the themes the Mass is a very distinguished one, noble and earnest throughout in its treatment of them. It was reprinted in 1591 as the last in a new edition of the 'First Book of Masses.'

Sixtus V. died Aug. 27, 1590, and Palestrina's *Missa pro defunctis a 5* may have been first sung as his Requiem. It has no setting of the Introit or of the Dies Irae. While its themes are suggested by the plain-song, one may notice the free use of the chromatic note in the Sanctus and Agnus. It was first printed in the reprint of the 'First Book of Masses,' 1591. In the Sistine MS. copy there is joined with it the Responsorium 'Libera,' to which Baini gives the highest praise. On Dec. 5, 1590, Niccolò Sfondrato was elected Pope, assuming the title of Gregory XIV. One of his early acts was to augment the pay of the members of the Papal Chapel, by which Palestrina also benefited. About this time he presented to the Chapel a series of important works, not, however, as Baini represents, a separate collection specially dedicated to the Pope. Among them is the justly celebrated *Stabat Mater a 8*, the exquisitely pathetic beauty of which there is no need to dilate upon; also a splendid *Magnificat a 8* with all the verses composed. Other works are four motets *a 6*, one of which, 'Tradent enim vos,' Baini specially falls foul of, representing it as an early work still tainted with what he describes as the 'flammingo squalore,' simply because it has a cantus firmus on the plain-song Antiphon, with close canon in diapente between two of the voices. It is really a scholarly work, though it has not the same brilliant character

as its companion pieces *a 6*, which are written with more of homophonic harmony. There are four other brilliant pieces *a 8*, written antiphonally for two choirs. With the exception of the *Stabat Mater* all these pieces remained unpublished until they were included in vol. 6 of the Breitkopf & Hartel Complete Edition. The *Stabat* was first published by Dr. Burney in 'La musica della settimana santa,' 1771, from a MS. copy presented to him by Santarelli, one of the singers of the Papal Chapel. Partly in token of gratitude for the increase of his stipend, Palestrina in 1591 dedicated to Pope Gregory XIV. his 'Magnificat Octotonum liber primus.' This work consists of two sets of *Magnificats a 4* on each of the eight psalm tones in order, one set with the odd verses composed, the other with the even, the intermediate verses being sung in unison to the respective tones. The *Magnificats* are remarkable for the art by which by fugal imitation and otherwise Palestrina contrives to invest the same tone in the different verses with new and surprisingly beautiful turns of melody and harmony. This book, though designated by him the first, is really the third in order of composition. An earlier book composed for St. John Lateran, now numbered as the third in the Complete Edition, consists of eight *Magnificats a 5* and 6 of a much more elaborate character, the verses being composed at greater length, and with occasional use of Canons. Another book, numbered as the second, was composed for St. Peter's, and consists of eight *a 4* and 5, of a slightly less elaborate character. The lengthy treatment of the verses is partly accounted for by the ceremony of incensation which accompanied the use of the *Magnificat* on occasions of greater solemnity. Besides these books there are two separate *Magnificats* of some value included in the Complete Edition. But those of 1591 are more concise and more adapted for practical use by their general clearness and simple beauty.

LAST WORKS.—Going back a little, it may be necessary to mention that in 1584 a Society of Roman Musicians had been formed, apparently for the purpose of raising the standard of qualification for choirmasters in the various churches of the city. At first the members of the Papal Choir took up an attitude of opposition to the Society, but afterwards a reconciliation was effected, and as if to attest this happy result, Felice Anerio, who had been appointed choirmaster to the Society, published in 1589 a collection of madrigals *a 5*, entitled 'Le Gioie' (Jewels), with contributions from the members of the Society, among whom were now included prominent members of the Papal Chapel.¹ To this collection Palestrina contributed one interesting number, 'Dunque perfido amante,'

¹ Cf. Haberl, *Kirchenmusikalisches Jahrbuch* (1891), pp. 86, 87.

which has something of a dramatic character. About this time, beside the stately form of the madrigal, there began to be cultivated by Italian musicians the slighter form of the canzonet a 3 or 4, with several verses to the same music, and sometimes with cembalo or lute accompaniment. In publications by the Roman printer, Simon Verovio, 1589 and 1591, Palestrina shows that he did not disdain to encourage this new style of composition.¹ A more important secular work was the Madrigal *a 6*, 'Quando del terzo cielo,'² contributed to the collection, 'Il trionfo di Dori,' 1592. A testimony to the commanding position which Palestrina had now attained in the world of music is afforded by the dedication to him in 1592 of a Collection of Vesper Psalms composed by the best musicians of Northern Italy, Matteo Asola, Costanzo Porta, Giovanni Croce, Leone Leoni and others. The dedication, written by Asola, is couched in terms of the highest respect and admiration. He says, 'As rivers are naturally borne to the sea as their common parent and lord, and rest in its bosom as the attainment of their own perfection, so all who profess the art of music desire to approach thee as the ocean of musical knowledge to testify their homage and veneration.' Asola was unwilling to approach the master all by himself, and therefore enlisted the aid and companionship of friends and fellow musicians that they might all as a body, not altogether to be despised, acknowledge him as the common father of all musicians.

On Jan. 30, 1592, Ippolito Aldobrandini became Pope, assuming the title of Clement VIII. During 1592 no new publication by Palestrina appeared, but about this time he found a new and generous patron in a certain Abbé Anton Baume, belonging to a wealthy family of Franche-Comté, who must have come to Rome on a visit, and made the composer's acquaintance. To him in 1593 he dedicates, as an expression of gratitude for many benefits received, his 'Offertoria totius anni,' *a 5*. This very comprehensive work was published in two parts, and consists of settings of the offertory texts of the Roman Missal for all the Sundays and chief festivals of the year in order, mostly verses from the Psalms, 68 Nos. in all, written in the master's most refined mature style, with perhaps a touch of austerity from the nature of some of the texts. A smaller publication of the same year is a Book of Litanies *a 4* for private chapels in which Rosary devotions were sung, but no copy of the original edition is known. It was reprinted in 1600, and consists of two Litanies in 5 parts each, corresponding to the five divisions of the Rosary, composed in simple homophonic harmony. Mention may

suitably here be made of eight other Litanies on a larger scale *a 5*, *6* and *8*, which have now been published from MS. sources in Vol. 26 of the Complete Edition. Towards the end of 1593 Palestrina had ready for the press his Sixth Book of Masses, dedicated to Cardinal Pietro Aldobrandini, the Pope's nephew, a pupil of the Oratory of Philip Neri, who had taken the composer into his service for domestic chamber music. Perhaps the easy book of Litanies above mentioned may have been composed for the Cardinal's household or for oratory services. The Book of Masses contains four *a 4*: 'Dies Sanctificatus,' 'In te Domine speravi,' 'Sine nomine,' 'Quam pulchra es,' and one *a 5*, 'Dilexi quoniam.' The Mass 'Sine nomine' takes its themes from a chanson, 'Je suis déshéritée,' and we may point out that the soprano part in the three Kyries put together is almost note for note identical with the soprano part of the chanson as set by Pierre Cadéac,³ and there is also a certain resemblance in the opening counterpoint. It is probable, therefore, that Palestrina took the themes direct from the chanson, rather than, as has been alleged, from a Mass with the same title by Maillard or Meolas de Marle. Palestrina's Mass is very concise after the French manner, but it is remarkable what devotional feeling he imparts to the themes by his harmonic and contrapuntal treatment of them. It is as if he gave to the love-longing of the French song a spiritual meaning. The Mass 'Dies Sanctificatus' is a brilliant work based on his own Christmas Motet; the others probably take their themes from unknown motets by other composers. The 'Dilexi quoniam' is a specially lovely work. To the second edition of this book in 1596 there was added an earlier Mass *a 6*, Ave Maria, in which one of the voices interpolates as an occasional cantus firmus the text 'Ave Maria gratia plena.'

On Jan. 1, 1594, Palestrina signed his dedication to Christina of Lorraine, Grand Duchess of Tuscany, of the last work published by himself, his 'Second Book of Madrigali Spirituali' *a 5*, sometimes acclaimed as the perfect flower of his art, remarkable alike for exquisite grace and intense spirituality. It consists of 30 settings of a series of Italian stanzas forming one long Litany, addressed with the exception of the opening and closing numbers to the Blessed Virgin. It is a sort of counterpart to the motets on the Canticles, only of a graver cast, being pitched in a more meditative and penitential key. A Seventh Book of Masses was being prepared for the press when death overtook the master on Feb. 2, 1594, in the 69th year of his age. Baini's account of the last hours of his life is pure invention as what might seem to be its fitting conclusion,

¹ The Canzonette of 1591 with cembalo and lute is now republished complete in *Chansons italiennes de la fin du XVI^e siècle*, A. Wotquenne (Paris).
² This has been edited with English words in L. Benson's *Crisana series*.

³ Cf. text and music of the chanson in *Ritorn Publications*, Bd. 23 p. 20.

but rests on no authority. We know, however, that Palestrina was buried in one of the side chapels of the old Basilica of St. Peter's, but in the erection of the gorgeous new building his remains, with those of others, were transferred to some other part of the building, and his actual resting-place is not now known. On the plate of his coffin was simply inscribed :

JOANNES PETRUS ALOYSIUS PRAENESTINUS
MUSICAE PRINCEPS.

At his funeral his own 'Libera me Domine' was probably sung, and on Feb. 14 a solemn Requiem for him was sung in St. Peter's, probably his own Missa pro defunctis.

POSTHUMOUS PUBLICATIONS. — From the diary of the Papal Chapel Bainsi quotes a notice to the effect that Pope Clement VIII. on Feb. 9, 1594, the anniversary of his coronation, declared his intention to order the publication of a complete edition of the works of Palestrina. Meantime Iginio, his only surviving son, had brought out the Seventh Book of Masses with a dedication to Pope Clement, dated Mar. 1, in which he states that his father had charged him to proceed with the publication of his remaining works, and expresses the hope that the benevolence of the Pope would enable him to carry out his father's wishes. Bainsi professes to know that owing to the generosity of his patrons of the previous year Palestrina had also left sufficient means to Iginio for further publication, and represents that by concealing this fact Iginio lost the favour of Pope Clement, who took no further interest in the matter; but all this is pure conjecture on Bainsi's part, for which he gives no authority, and it is a very poor reason to give for the Pope's cessation of interest, considering the numerous MSS. of Palestrina in the various Roman archives, over which Iginio had no control whatever. But Iginio was also implicated in another matter in which he may have incurred greater disfavour. Under the patronage of the Medici a printing press had been established at Rome, which had recently been provided with a set of new large types for the printing of plain-song, and negotiations had been entered into either with Palestrina himself before his death, or with his son Iginio afterwards, for the printing of his MS. of the Gradual. A contract was made with Iginio according to which he was to receive the exorbitant sum he had asked for on condition that the MS. obtained the official approval of the Sacred Congregation of Rites. No absolute approval was ever obtained, objection being taken that part of the work was not by Palestrina, and was full of errors. A prolonged lawsuit followed which gave satisfaction to neither party, and the MS. was set aside till after Iginio's death in 1610. In 1611 the printing project was resumed, and the work of

revision was entrusted to Felice Anerio and Soriano. It has always been a moot point whether this revision was based on the previous work of Palestrina, or was quite independent.¹ In any case it was conducted on principles of musical reform adopted by all the leading musicians of the time, which, however, were at variance with the general tradition of plain-song. As thus revised, the work was published in 1614 with some appearance of official approval, though its use was not made obligatory. It is known as the 'Editio medicaea,' but has now been officially rejected in favour of a return to earlier and purer tradition.

Leaving this embittered controversy, we may now return to the further publication of Palestrina's own works. The Seventh Book of Masses, published in 1594, contained three a 4, 'Ave Maria,' 'Sanctorum Meritis,' 'Emendemus,' and two a 5, 'Sacerdos et Pontifex,' 'Tu es pastor ovium,' all works of distinction, and with the exception of the 'Emendemus,' based on plain-song themes. The opening theme of 'Emendemus' is strikingly similar to the first phrase of 'Je suis déshéritée.' Iginio, disappointed in his expectations of support from the Vatican, took no further steps in the publication of his father's works, but in 1598 two Venetian admirers of Palestrina's music seem to have acquired from him the MSS. of masses remaining on his hands, and from 1599 to 1601 six further books of masses were published at Venice, numbered as Books 8 to 13. The eighth book contains two a 4, 'Quem dicunt homines,' 'Dum esset summus Pontifex,' two a 5, 'O admirabile commercium,' 'Memor esto,' and two a 6, 'Dum compleretur,' 'Sacerdotes Domini.' Of these, 'O admirabile commercium' and 'Dum compleretur,' based on his own beautiful motets, have been universally admired. 'Sacerdotes Domini' is remarkable for its combination of great beauty with extraordinary mastery of canonic device. The canon has the motto 'Trinitas in unitate,' and beginning in the lowest tenor is resolved by the two other tenors at the second and third respectively. It runs throughout the Mass with the usual exception of the Crucifixus and Benedictus. The Pleni of the Sanctus is only for the three voices in canon. The whole Mass is, as Bainsi says, an exquisite product of consummate art. The ninth book has two masses a 4, 'Ave Regina coelorum,' 'Veni sponsa Christi,' two a 5, 'Vestiva i colli,' 'Sine nomine,' two a 6, 'In te Domine speravi,' 'Te Deum laudamus.' The 'Sine nomine' is another specimen of an elaborate canonic mass, but not otherwise very interesting than for its conquest of difficulties. It has canons on all degrees of the scale and at various time-intervals. Bainsi and Haberl extol very highly 'In te Domine speravi,' but we might

¹ Cf. Haberl, *Kirchenmusikalisches Jahrbuch* (1902), pp. 138 ff., also Respighi, *Nuovo studio su G. P. L. da Palestrina e l'emendatione del Graduale Romano, con Appendice di documenti*.

conjecture its themes to be taken from some unknown motet rather than, as Haberl says, from the plain-song of the Ambrosian hymn. The Tenth Book of Masses was published in 1600 and contains two *a 4*, 'In illo tempore,' 'Gia fu chi m' ebbe cara,' this latter based on one of the composer's own early madrigals, two *a 5*, 'Petra sancta,' 'O Virgo simul et mater,' two *a 6*, 'Quinti toni,' 'Illumina oculos meos,' the two last particularly fine. The eleventh book has one Mass *a 4*, 'Descendit Angelus,' two *a 5*, 'Regina coeli,' 'Quando laeta sperai,' two *a 6*, 'Octavi Toni,' 'Alma Redemptoris.' The 'Octavi Toni' has in the second soprano part a Cantus Firmus of the eighth mode, which, however, might seem to be the melody of some popular song, treated freely by the introduction of occasional F and C sharp and B flat. 'Alma Redemptoris' is no doubt the finest of this set. The twelfth book appeared in 1601, and contains two *a 4*, 'Regina coeli,' 'O rex gloriae,' two *a 5*, 'Ascendo ad Patrem,' 'Qual e il più grand' amor,' two *a 6*, 'Tu es Petrus,' 'Viri Galilaei.' Of these the third, fifth and sixth, based on his own very bright motets, are the finest. The thirteenth book has the four masses *a 8*, all splendid works based on the composer's own motets, 'Laude Domini omnes gentes,' 'Hodie Christus natus est,' 'Fratres enim ego accepi,' 'Confitebor tibi.'

With the exception of the Mass 'Assumpta' in 1612 and four motets in collections of 1609 and 1614, and the Stabat Mater by Dr. Burney

1771, there was no further publication of other works by Palestrina during the 17th and 18th centuries. Repeated editions of already published works appeared for a time until towards the middle of the 17th century. From 1650 the musical world, occupied with new problems, ceased to take further interest in the old vocal style *alla Palestrina*, although the tradition was still kept up in the Sistine Chapel and other churches of Rome by a succession of minor masters. Towards the end of the 18th century a certain amount of interest in the older music, and specially that of Palestrina, was awakened by the writings of Padre Martini, Dr. Burney, and Hawkins, but it was not till well on into the 19th century that any practical steps were taken towards further publication and performance. The romantic literary movement in France and Germany stimulated the growing interest in the older Italian church music, and much was done in the MS. copying of old works by amateur collectors. Alexandre Choron in 1815 appealed for the provision of MS. copies of Palestrina's works for public libraries in France. In a collection which he published he unfortunately included as an early work of Palestrina a series of 27 Responsoria for Holy Week, which have only recently been discovered to be the work of another composer at

a later date (see INGEGNERI). In Germany, in opposition to the prevailing shallowness of the church music of the time, Anton Thibaut in his book *Über Reinheit der Tonkunst*, published 1825-26, eloquently pleaded for the study and performance of the works of Palestrina, Victoria, and others of the older school. Greater influence was exercised in the same direction by the appearance of the Abbé Baini's enthusiastic biography of Palestrina, published in 1828 (*Memorie storico-critiche*, etc.), which though inaccurate in detail, and gravely misleading on certain points, and too one-sided, yet led the way to a fuller appreciation of the special merits of Palestrina, and also later on to further critical investigation. Baini had also issued a prospectus intimating his intention to issue a complete edition of the works of the master, and in 1835 negotiations were entered into and a contract signed with the house of Breitkopf & Härtel in Leipzig, but the death of Baini in 1844, before anything had really been done by him, led to the temporary abandonment of this enterprise. Meantime in 1841-43 Alfieri in Rome had published, though very uncritically, a large collection of the works of Palestrina in seven volumes. Better work was done by Canon Proske of Ratisbon, who after laborious copying of MSS. from various Roman and other Italian libraries, published from 1853-61 his very comprehensive collection entitled 'Musica divina,' containing for practical use a large selection of the finest works of Palestrina and other composers of his epoch, many of them previously unknown.

The complete edition of Breitkopf & Härtel was begun in a tentative way by the publication in 1862-63 of the first three volumes containing the motets of 1569, 1572 and 1575, which had been prepared for the press by Theodore De Witt seven years before. The work was resumed by the publication, under the editorship of Franz Espagne of the Berlin Royal Library, in 1874 of vol. iv. containing the two books of motets *a 5* of 1584; in 1875 vol. v., containing the motets *a 4* of 1563 and 1581. Vols. vi. and vii. appeared in 1876, containing a large collection of previously unpublished motets gathered by Espagne from the various Roman libraries. Vol. viii., containing the 'Hymni totius anni' of 1589, was published in 1880. After Espagne's death Franz Commer edited vol. ix., containing the 'Offertoria' of 1593. From 1881 the editorship of the remaining works was entrusted to F. X. Haberl of Ratisbon. Vols. x.-xxii. contain the thirteen Books of Masses in order; vols. xxiii. and xxiv. 12 additional masses edited from MSS. in the Sistine and other Roman archives. Vol. xxv. consists of the 'Four Books of Lamentations.' Vol. xxvi. contains 10 litanies and 6 motets *a 12*, or for 3 choirs *a 4*, the third choir having to be filled up by M. Haller of Ratisbon, the original being

6. Twenty hymns a 4-5, and various settings of the 'Miserere' and 'Benedictus, and the Responsorium' *Libera* (the Responsoria for Holy Week are now known to be by Ingenui).
7. Two sets of *Exercitia Ricercari* a 4 (attributed to Palestrina), one entitled 'XI Exercitia sopra la scala'; the other, 'VIII sopra la tonal'.

PALLAVICINI (PALLAVICINO), CARLO

(b. Brescia¹; d. Dresden Jan. 29, 1688), composed no fewer than twenty-one operas or 'dramme per musica,' which were performed at Venice between 1666 and 1687. He lived first at Salò, and was married to Giulia Rossi, of Padua. At Padua, Mar. 21, 1672, his son Stefano Benedetto was born, who later furnished the text of more than one opera, and also wrote a *Discorso della musica*.²

Carlo Pallavicini went for a while to Venice, but from 1667-73 he was at Dresden, first as vice-Kapellmeister, then as Kapellmeister to Johann Georg II. of Saxony. Lindau³ mentions the Kapellmeister Pallavicini being one of the company at a private celebration of Mass at the French Embassy in Dresden on Apr. 6, 1673. But he appears to have returned to Venice shortly afterwards, for in the autumn of 1674 his operas, which had ceased since 1667, re-started at the theatres there. Early in 1685 Johann Georg III., the son of his former patron, invited him to return to Dresden in order to place the Italian opera on a satisfactory footing; presumably he made but flying visits there, but on Jan. 1, 1687, he was formally appointed 'Camerae ac theatrialis musicae Praefectum.'⁴ He received leave to visit Venice in September of the same year, but died very shortly after his return to Dresden, and was buried on Feb. 4, 1688, in the Kloster Marienstern.

Although there seems to be no record of Pallavicini's earlier works being performed at Dresden, two of his later operas were certainly first produced there, in 1687 and 1689. Fürstenau, comparing his music with that of Bontempi, his fellow-worker, thinks that he shows more facility in his treatment of melody

and rhythm and in his use of the limited instrumental resources at his command. As a rule only string instruments, trumpets and drums formed the orchestra for the ritornelli or short symphonies interspersed between the songs; often, as in the case of 'L' Amazzone corsara,' no mention is made in the score of the instruments required for the performance. The following list of the operas performed at Venice is taken from Bonlini's *Glorie della poesia*, Venice, c. 1732, and Galvani's *I teatri musicali di Venezia*, Milan, 1878:

1666. 'Il Demetrio,' also 'L' Aureliano,' text by Giacomo dall' Angelo, at the Teatro S. Moisè. MS. score of the former in the library of S. Marco, Venice, No. 408 (Wiel, *I codici musicali*, Venezia, 1884).
1667. 'Il tiranno umiliato dall' amore, ovvero il Merape,' text by Gio. Faustini, at the Teatro Grimani de' SS. Gio. e Paolo. MS. score at S. Marco, Venice, No. 409; and at Modena.
1678. 'Enea in Italia,' by G. F. Bussani, at SS. Gio. e Paolo. MS. score at S. Marco, Venice, Nos. 412 and 414.
1676. 'Il Galieno,' by M. Noris, at SS. Gio. e Paolo. An autograph score at the Vienna Imperial Library, No. 16,491 (Mantuan's *Cat.*). MS. score at S. Marco, Venice, No. 424; part of the score in MS at Dresden, No. 1074.
1678. 'Il Vespasiano,' by G. C. Corradi, was performed at the opening of the new Teatro Grimani di S. Gio. Grisostomo, and again in 1680. MS. scores at Modena and at Venice, No. 462.
1679. 'Il Nerone,' by G. C. Corradi, at S. Gio. Grisostomo. On Oct. 3, 1693, it was performed at the Italian Opera House in Leipzig, under the direction of N. A. Strunck. 'Le Amazzone nell' Isola Fortunata,' prologue and three acts by Piccioli. A copy of the libretto, published at Padua, is in the library of the Brussels Conservatoire; the title-page states 'da rappresentarsi in Piazza, nel nobilissimo Teatro del III. et Scelto Sig. Marco Contarini, alla Gio. S. Marco, l'anno 1679' (Wotquenne, *Cat.*). The MS. score is at S. Marco, Venice, No. 384. Act II, Scene IX., a solo with ritornelli for 'trombe e timpani' will be found in the *Wotquenne's Studien zur Gesch. der ital. Oper*, Leipzig, 1901, Bellag, p. 493.
1680. 'Mussalina,' by Piccioli, at the Teatro Venedramini di San Salvatore. MS. score at S. Marco, Venice, No. 437.
1682. 'Bassiano, ovvero il maggior impossibile,' by M. Noris, at SS. Gio. e Paolo. MS. score at Modena.
1683. 'Carlo, re di Italia,' text by G. F. Bussani, 1684. 'Licinio Imperatore,' and 'Il Ricimero, re de' Vandali,' 1685. 'Penelope la casta'; were all by M. Noris, and performed at S. Gio. Grisostomo.
1685. 'Massimo Puppieno,' by Aurelio Aureli, at SS. Gio. e Paolo.
1686. 'Amore innamorato,' by M. Noris, at S. Gio. Grisostomo.
1686. 'La Didone delirante,' by Ant. Franceschi, at SS. Gio. e Paolo. 'L' Amazzone corsara, ovvero l'Alvida, regina de' Goti,' by G. C. Corradi, at SS. Gio. e Paolo, and again in 1688. In the preface to the libretto (Venice, 1698), Corradi draws attention to 'la musica del Sig. Carlo Pallavicini, il quale si fin hora fece miracolo ne' Teatri' (Wotquenne, *Cat.*). The MS. score is in the Munich, Made Library, No. 225. The first movement of the symphony was published by A. Heuss *Die venezianische Opern-Sinfonien*, 1902: 3.
1687. 'Elmoro, re di Corinto,' text probably by Vinc. Grimani, at S. Gio. Grisostomo. Many of the airs are in MS Mus. Sch. c. 103, in the Bodleian Library.
1687. 'La Gerusalemme liberata,' by G. C. Corradi, at SS. Gio. e Paolo. It was performed at Dresden on Feb. 2, 1687; and at Hamburg in 1693, where also a German version by Fiedler, under the title of 'Armida,' was given in 1694 (Mattheson, *Der musikalische Patriot*, 1729, pp. 181-2). MS. scores at the Library of the Brussels Conservatoire, and at Dresden, p. 895a.
1689. 'Antiope,' dramas per musica, by Stefano R. Pallavicini, only partly composed by Carlo Pallavicini before his death, was completed by Nic. Adam Strunck, and performed four times at Dresden in Feb. 1689. The MS. score at Dresden

There are various compositions in manuscript; at Modena, some arie e canzoni with two violins and basso continuo from 'L' Adalinda,' Florence, 1679; three cantatas and one aria; and 'Il trionfo della castità,' an oratorio for seven voices with instruments, Modena, 1688. Burney⁵ writes:

'If Carlo Pallavicini ever had any genius, it was exhausted when he set this oratorio, which has neither invention nor learning to recommend it.'

At Munich, MS. 233, a cantata for soprano with basso continuo; at Ch. Ch., Oxford, three Fantasias a 4 e 5 voci, by 'Pallavicino'; at

Dresden, a Mass for five voices with two violins and basso continuo; Kyrie, Gloria, Dixit, Confitebor, for four voices; Laetatus sum, for bass voice with instruments (Q.-L.).

In Marco Silvani's *Canzonette per camera a voce sola*, Bologna, 1670, is 'La speranza' in three movements by Carlo Pallavicini, and in Silvani's *Raccolta di motetti*, 'Ecce filii,' a voce sola col basso continuo. c. s.

PALLAVICINI, VINCENZO (b. Brescia), was maestro di cappella at the Conservatorio degli Incurabili at Venice. The name of 'Pallavicini, Vincenzo, bresciano, del 1743,' appears among the composers of some pieces of manuscript music in the Bologna Liceo Musicale, which were the trial compositions for election to the Accademia dei Filarmonici di Bologna.¹ He composed the music to the first act of an opera buffa, 'Lo speziale' (The Apothecary), written by Goldoni, the two remaining acts being set to music by Domenico Fischietti, a Neapolitan; a manuscript score is in the library of the Brussels Conservatoire.² The opera was performed at the Teatro San Samuele, Venice, in 1755. Among the manuscript sinfonie given in the Breitkopf list for 1787 (Supplemento ii. p. 30), is one 'di Pallavicini. Accommodate per il cembalo solo.'

Succi's catalogue of the International Musical Exhibition at Bologna in 1888 includes among the autographs a letter from Pallavicini to Padre Martini, which deplores the recent death of G. A. Pertì; it is dated from Venice, Apr. 21, 1756. The eighteenth volume of Martini's correspondence, preserved in the Bologna Liceo Musicale, consists of letters from Pallavicini, to whom Martini was evidently a counsellor and friend. c. s.

PALLAVICINO, BENEDETTO (b. Cremona; d. 1612/13). His first musical work was published at Venice in 1579. A few years later he was at Mantua, and his name is found in documents in the Gonzaga Archives; in one, dated May 11, 1582, Cardinal Annibale Ippolito promises to send a sonnet to the Duke 'come prima sarà posto in musico dal Pallavicino'; in another, dated Dec. 18, 1584, Pallavicino signs himself 'musico di sua Altezza'; and in 1587 his name appears in the list of cantori.³ Giaches de Wert, maestro di cappella to the Duke of Mantua, died on May 23, 1596; Pallavicino was appointed in his place, and uses the title for the first time in the 1596 edition of his fourth book of madrigals. He must have resigned the post in 1601, and Monteverdi, his successor, in a letter dated Nov. 28, 1601, mistakenly writes of him as if he were dead.⁴ This probably led Pietro Phalesio, in reprinting the first book of madrigals for six voices in 1606, to write in the dedication of 'Benedetto

Pallavicino di felice memoria.'⁵ But Pallavicino had joined the monks of Camaldoli in Tuscany; the dedication of his seventh book of madrigals, 1604, to Francesco Gonzaga of Mantua, is signed B. P. 'monaco Camaldolese.' It is here that he mentions his twenty-two years of faithful service to the house of Gonzaga. There is some doubt as to the exact date of his death; he wrote the dedication in his eighth book of madrigals, 1611-12, but he probably died soon after, either in 1612 or 1613.

A great many books of madrigals composed by Pallavicino were published at Venice, and also at Antwerp. Burney⁶ states that the music lacks variety, both of melody and harmony, and shows no spirit of invention. A contemporary Italian⁷ verdict is not so uncompromising—

'Che non basta, che siano fatte al proposito degli instrumenti, e delle voci, ma che siano uscite da valente pratico come quella di Benedetto Palauclino, etc.

The following works were first published at the dates given, but were constantly reprinted:

'Di B. P. Cremonese, Il primo libro de madrigali a quattro voci' Venetia, 1579, obl. 4to. 'Il primo libro de madrigali a cinque voci' Venetia, 1581, obl. 4to. 'Il secondo libro,' (?) 1583 and 1606. 'Il terzo libro,' 1585. B. P. writes the dedication from Mantua, Aug. 1585. 'Il quarto libro,' 1588, reprinted in 1596 with 'Di B. P. maestro di cappella del serenissimo Sig. Duca di Mantua,' which title is used until the change to 'B. P. monaco Camaldolese' in the 1604 and later works. 'Il quinto libro,' 1593. 'Il sesto libro,' 1600. 'Il settimo libro,' 1604. 'L'ottavo libro,' 1611-12.

'Madrigali a cinque voci' Anversa, Phalesio, 1604 was a reprint of the fourth and fifth books.

'Di B. P. servitore del sereniss. Sig. Duca di Mantova e di Monferato, Il primo libro de madrigali a sei voci' Venetia, 1587.

Of his church music little is known. Two volumes passed from the church of S. Barbara, Mantua, into the library of the Milan Conservatorio musicale. 'Libro primo di messe a 4, 5 e 6 voci,' Venetia, and 'Solmi delle Laudi a 6 voci,' Venetia. There is also—

'Sacrae Dei Laudes octo et una duodecim duae vero sexdecim vocibus concinendae. Ac omnium instrumentorum genere accommodatae. Aditae etiam infimae partes pro Organo continuato.' Benedicto Pallavicino Cremon. Auctore. Venetia. B. Amadino, 1605, 4to. It contains fifteen motets, the preface is signed Ravennae XI cal. Septembris, 1605. Di Ben. P. monaco camaldolese. H. Müller, Cat. Königsberg Bibl. Pétis mentions an earlier edition, 1595-96, in four books.

The popularity of Pallavicino's madrigale is shown by the way in which they appear in collections of that time. 'Quando benigna stella,' for four voices, is in Andrea Favernage's *Harmonia celeste*, Antwerp, 1585, and from then on to 1624 there was hardly a single important collection, whether published at Venice, Nuremberg, Copenhagen, Munich, Leipzig, or at Utrecht, where Jochem van den Hove's *Florida aise cantiones*, with voice parts and lute accompaniment, was printed in 1601, that did not include some of his madrigals. In London, Nicolas Yonge's *Musica Transalpina*, 1597, had two of the madrigals for six voices.

MS. in the British Museum, in the Add. MS. 11,585, f. 22, a melody and a fugue from books 7 and 8 of madrigals; 12, 522, f. 159, 'Quando benigna stella,' from the 1579 madrigals; 15, 928-29, f. 391, 'La Bella Palevinyo' for four voices, 25,366-68, f. 129, (cantata, Bassini, and Quintus only 'trolli unkynd adieu' for five voices; 25,372-77 (date 1616), 'Love quench this heat' and 'Cruell why dost thou tie me' for six voices.

In the New York Library, a twenty-seven madrigals for six voices in a 17th-century MS. entitled 'Francis Samboock his book.' (H. Boettcher).

In Berlin Staat Bibliothek. MS. 227, dated 1624, the score of 'Cantata tuba' for eight voices. (Eltner).

In Bologna Liceo Musicale. In a 17th-century MS. score, for eight voices—Dixit, Confitebor, Batus vir, Laudate puri; for four voices—Miserere mei Deus A MR. copy by Santini of 'Cantata tuba' for eight voices, from Pallavicino's *Laudes*, 1606 (Parisini, li. 169, etc.).

In the Breslau Stadtbibliothek. 'Jubilata Deo' in MS. 19, and 'Cantata tuba' and 'Dum compleretur' in MS. 20, and in partbooks MS. 23, all for eight voices. (Bohn's Cat.).

In the Leipzig Ritzler-Akademie Bibliothek. MS. 98, four motets for eight voices; MS. 99, madrigal for six voices ('Pudici Cat.). In the Munich Hofbibliothek. MS. 218. 'Qui super thronum' (= 'Tut' er' fuoco') for five voices, and 'Omnes mortui vici' (= 'Tini mortui vici') for six voices. (Maler's Cat.).

Two examples of Pallavicino's madrigals were included by J. Torchi in his publication of old music *L'aria musicale*, 1897, vol. II. 'Dolcemente dormiva' (1623), and 'Dolce, grave e acuto' (1600), taken from the fifth book of madrigals for five voices. C. S.

PALMA, SILVESTRO (b. Ischia, 1762; d. Naples, Aug. 8, 1834), studied at the conservatoire of the Madonna di Loreto at Naples, and under Paisiello. He composed a considerable number of operas for Rome, Venice and Naples, where his last opera, 'Il geloso di se stesso,' was given in 1814. The autographs of a number of church compositions are preserved at the Milan Conservatoire (Q.-L.).

PALMER, ELIZABETH ANNIE (known as BESSIE) (b. 9 Fountain Court, Strand, Aug. 9, 1831; d. Oct. 1910), studied from 1851 to Jan. 1853 at the R.A.M. pianoforte from Jewson, harmony and counterpoint from Bannister, and singing from Cox and Crivelli. She then received private lessons from Garcia, and on Mar. 13, 1854, made her début at a concert of Alexandre Billet at the smaller St. Martin's Hall. On Dec. 20, at the larger hall, she sang in the 'Messiah' under Hullah with great success. She became a favourite contralto singer at such institutions as the Sacred Harmonic; the National Choral Society; the Popular Concerts; the Leeds Festival, 1858, where she sang at the opening of the New Town Hall in 'Eljah'; Worcester, Birmingham, and Norwich Festivals; at a State Concert, Buckingham Palace, etc. From 1870 for some years she sang in various English opera enterprises in the provinces, at the Crystal Palace, 1878, Her Majesty's Theatre, etc. From 1877-1886 she was in great request as a teacher of singing at Newcastle and elsewhere. In 1904 she published her *Musical Recollections*.

A. O.

PALMER, G. MOLYNEUX (b. Staines, Oct. 8, 1882), of Irish parents, graduated Mus.B. at Oxford, in 1901. He studied under Stanford at the R.C.M. (1906-09), and came to Ireland in 1910, acting as organist of various churches. After winning two Feis Ceoil prizes with cantatas and songs, he produced an Irish opera, 'Sruth na maíle' (Gaiety Theatre, Dublin, 1923), which was successfully revived at the Tailteann Games in August 1924. w. h. g. f.

PALMER, HENRY, an English Church composer, probably of the first half of the 17th century, some of whose work was included in the Durham choir-books made in 1664, when John Cosin was Bishop there. In the British Museum (Add. MSS. 30,478-9), are the tenor cantoris parts of these books.

One, **ROBERT PALMER**, contributed some settings to the second edition of Ravenscroft's Psalter (1633). J. M^c.

PALMGREN, SELIM (b. Björneborg, Finland, Feb. 16, 1878), pianist, conductor and composer, was educated at the Helsingfors Conservatorium from 1895-99, studying harmony and counterpoint with Martin Wegelius, and the pianoforte with Walter Petzet. He afterwards visited Germany and Italy, continuing his studies under Konrad Ansoerge, Wilhelm Beyer and Ferruccio Busoni. On his return to his native country he had grown into a brilliant pianist and a composer of considerable promise. His first appointment was that of conductor to the Finnish Students' Choral Society, which proved an excellent opportunity to gain practical experience, and a fruitful incentive to compose a number of choral works. From 1909-12 he was conductor of the Musical Society of Åbo.

Palmgren's first opera, 'Daniel Hjort,' was produced at Helsingfors and Åbo in 1910, while his second work for the stage, the libretto of which is based on Chamisso's 'Peter Schlemihl,' has not yet been performed. In 1912 he threw up his official appointments, devoting himself exclusively to the career of composer and pianist. He undertook several extensive European tours, on some of which he was accompanied by his wife, the well-known Finnish singer, Maikki Järnefelt. During the European War Palmgren lived in Copenhagen. In 1920-1921 he toured the U.S.A. In 1923 he became teacher of composition at the Eastman School of Music, Rochester, N.Y.

Apart from the operas, some choral works and a number of songs, Palmgren has written almost exclusively for the piano. There are two concertos for that instrument, entitled 'Metamorphoses' and 'The River,' but the bulk of his music consists of small pieces, some published singly, others in sets ('Finnish Lyric Pieces,' 'Light and Shade,' etc.).

The work of Selim Palmgren is distinguished by technical mastery of pianistic writing, a remarkable faculty for suggesting definite and widely contrasting moods, and an agreeably proportionate mixture of melodic, harmonic and rhythmic invention. The construction of ample forms is not a strong point with him, and his essentially pictorial art is at its best in short characteristic or lyrical pieces. In some ways Palmgren resembles Grieg, more especially in his power to infuse into his music a strong national flavour, on which, however, he is by no means compelled to rely altogether in order to create a work of distinction. He is frequently fanciful and individual where his nationality does not betray itself.

Palmgren is related by marriage to Armas Järnefelt and Jean Sibelius. E. B.

PALOTTA MATTEO (b. Palermo c. 1689.

2. Vienna, Mar. 28, 1758), called Il Panormitano, from his birthplace Palermo, studied in the Conservatorio San Onofrio a. Naples. On his return to Palermo he passed the necessary examinations, and was ordained priest. He then devoted himself with great ardour to studies in part-writing and counterpoint, and produced a valuable work *Gregoriani cantus nucleata praxi et cognitio*, being a treatise on Guido d' Arezzo's Solmisatio, and an instruction-book in the church-tones. It has been supposed that the Emperor Charles VI. invited Palotta to Vienna as Kapellmeister, but Palotta himself applied to the Emperor in 1733, asking for the post of composer of a *cappella* music. The then court-Kapellmeister warmly recommended him, and he was appointed one of the court-composers with a salary of 400 florins, on Feb. 25, 1733, was dismissed in 1741, and reinstated in 1749. The libraries of the court-chapel and the Gesellschaft der Musikfreunde possess a number of his masses in four to eight parts, motets, etc. (see *Q.-L.*), all written in a pure and elevated church style, the parts moving easily and naturally in spite of their elaborate counterpoint. In many points they recall Caldara. One special feature in Palotta's music is the free development of the chief subject, and the skilful way in which he combines it with the counter-subjects. C. F. F.

PAMINGER (PAMINGER), LEONHARD (b. Aschau or Aschach, Bavaria, Mar. 29, 1495; d. May 3, 1567). According to Gerber he received his earlier instruction at the Convent of St. Nicolas at Passau. He afterwards studied at Vienna, but in 1516 returned to Passau to hold some scholastic post at St. Nicolas, where he is last mentioned as having been secretary.

He became an adherent of the Lutheran reformation, and is known as the author of a few German hymns and controversial tracts. But in spite of this his chief musical work consists of a vast collection of Latin motets for four to six and more voices, providing for the requirements of the whole ecclesiastical year. The first volume of this work gives his portrait with the date of his death. The work itself was published by his sons, the first two parts in 1573 (Gerlach, Nuremberg), the third in 1576, and the fourth in 1580. The fourth part contains psalms both with simple falsebordon harmonies of the plain-song tones, and also more elaborately treated, along with some additional motets. In all the parts there are some contributions by his three sons Balthasar, Sophonias and Sigismund. In this work Proske says:

'The liturgy of the whole Church year is most exhaustively treated, and the harmonisation of the Psalms carried out with a completeness not to be found in any similar work.'

He also gives Paminger the credit of being one of the greatest contrapuntists of his time, and says that all his works show the fervently pious

master who was thoroughly penetrated by the devotional spirit of the words which he set to music.¹ Proske has reprinted from this work a comparatively simple and somewhat sombre setting of the Pater Noster, based on the plain-song melody. Compositions by Paminger also appear in the Collections of Ott, 1537-44, and Montanus, 1553-59. The 'Tricinia' of Montanus, 1559, contain twelve settings a 3 of German hymns. Ott's Liederbuch, 1544 (reprinted by Eitner & Kade), has a very expressive setting of 'Ach Gott straf mich nicht im Zorn dein' a 4, the tenor melody of which seems also to be of Paminger's own invention, since it is nowhere else to be found, and it is also reckoned as one of the best of the time. Forster concludes his great Lieder collection, 1556, with a remarkable piece by Paminger, 'Ach Gott wem soll ich's klagen,' which, without pauses, is to be sung a 5, but with pauses a 10. A curious epitaph on Paminger in German verse, which was set to music for four voices by his son Sophonias, is given in Wackernagel's *Das deutsche Kirchenlied*, Bd. iv. No. 154.

J. R. M.

PAMMELIA, the first collection of Canons, Rounds and Catches published in this country. It was issued in 1609, under the editorship of Thomas Ravenscroft, with the title of:

'Pammelia. Mvaelcks Miscellanie, Or, Mixed Varietie of Pleasant Roundelays, and delightful Catches, of 3, 4, 5, 6, 7, 8, 9, 10, Parts in one. Never so ordinarie as musically, none so musical, as not to all very pleasing and acceptable.'

It contains 100 compositions, many of considerable antiquity, several of which are still well known and have been reprinted in modern publications, amongst them 'Heyhoe to the green wood,' 'All in to service,' 'Now kiss the cup, cousin,' 'Joan, come kiss me now,' 'There lies a pudding,' 'Jack boy, no boy' (alluded to in Shakespeare's 'Taming of the Shrew'), 'Banbury Ale,' 'Now Robin lend me thy bow' and 'Let's have a peal for John Cook's soul.' A second edition appeared in 1618. A second part was issued, also in 1609, under the title of:

'Deuteromelia. or, The Second part of Musicks melodie, or melodius Musike of Pleasant Roundelays &c. K. H. mirth, or Freemens Songs and such delightful Catches. Qui Oenero potest cenat. 'Catch that catch can.' Fr. Mel Os, est Cui melius afficit de rellis.'

This contains thirty-one compositions, viz. seven Freemen's Songs for three, and seven for four voices, and eight rounds or catches for three, and nine for four voices. Of the Freemen's Songs the following are still well known: 'As it fell on a holy day' (John Dory), 'We be soldiers three,' 'We be three poor mariners,' 'Of all the birds' and 'Who liveth so merry in all this land'; and of the catches, 'Hold thy peace, thou knave' (directed to be sung in Shakespeare's 'Twelfth Night') and 'Mault's come down.' No composers' names are given in either part. W. H. H.

PANDEAN PIPE (Fr. *flûte de Pan*; Ger. *Syrinx, Panflöte*), a simple instrument, of many

¹ See the preface to 'Musica divina,' tom. I. iv.

forms and materials, which is probably the oldest and the most widely disseminated of any. It is thought to be identical with the 'Ugab,' the first wind instrument mentioned in the Bible (Gen. iv. 21, and Psalm cl.), in the former of these passages translated 'organ,' in the latter, 'pipe.' (See ORGAN.) It was well known to the Greeks under the name of 'syrinx,' being made with from three to nine tubes,¹ but usually with seven, a number which is also mentioned by Virgil.² It is depicted in a MS. of the 11th century preserved in the National Library of Paris, and is probably the 'frestele,' 'frétel' or 'frétiau,' of the Ménétriers in the 12th and 13th centuries. It is known in China as 'Koan-tee,' with twelve tubes of bamboo; was used by the Peruvians under the name of 'huayra-puhura,' being made of cane, and also of a greenish statelite or soapstone. Of the former material is a fine specimen now in the South Kensington Museum,³ consisting of fourteen reed pipes of a brownish colour tied together with thread in two rows, so as to form a double set of seven reeds. Both sets are of almost exactly the same dimensions, and are placed side by side, the shortest measuring 3, the longest 6½ inches. One set is open at the bottom, the other closed, in consequence of which arrangement octaves are produced. The scale is pentatonic.

The soapstone instrument is even more remarkable. It measures 5½ inches high by 6½ wide, and contains eight pipes bored from the solid block, and quaintly ornamented. Four of the tubes have small lateral finger-holes, which, when closed, lower the pitch a semitone. Thus twelve notes in all can be produced. The scale is peculiar and perhaps arbitrary; or the holes may have served for certain modes, of the use of which by the Peruvians there is evidence in Garcilasso de la Vega and other historians.

A modern Roumanian specimen, containing twenty-five tubes arranged in a curve, is in the Victoria and Albert Museum; the longest pipes are over 12 inches in length.

There is an excellent and well-preserved example in a bas-relief from the Abbey of St. George de Boscherville, Normandy, of 11th century date, which is figured in Engel's excellent work above quoted.

The Pandean Pipe is theoretically a series of stopped tubes blown from the edge of the upper, and, in this case, the only orifice, as already described under FLUTE (see also PIPES, EVOLUTION AND DISTRIBUTION OF MUSICAL). One note and occasional harmonics are usually produced from each tube, the scale being diatonic, and of variable extent according to the skill and convenience of the performer. At the present day it is rarely heard except as an

accompaniment to the drama of Punch and Judy. It is enclosed in a leather or paper case which is pushed into the open waistcoat of the player, the different parts of the scale being reached by rotation of the head. The quality of the tone is reedy and peculiar, somewhat veiled from the absence of harmonics of even numbers, it being a stopped pipe, of which, however, the first harmonic on the twelfth, and not the fundamental tone, is habitually sounded. In this respect and in its quality it closely resembles the 'Harmonic flute' stop of the organ.

It had a temporary popularity in this country at the beginning of the 19th century, when itinerant parties of musicians, terming themselves Pandicans, went about the country, and gave performances. 'The lowest set of reeds (the 'septem discrimina vocum' of Virgil),' says a writer in 1821,

'is called the *contra basso* or double base; the next *fagotto*, or bassoon; the third *septyenary* is the tenor or second treble; and the fourth or highest range of pipes, the first treble; so that in the aggregate there is a complete scale of four octaves, and they can play in three or four parts. The reeds or pipes are fastened under the chin of the performer, and the lip runs from one to the other with seeming facility, without moving the instrument by manual assistance.'

A company of them was introduced at Vauxhall Gardens a few years ago, and since that they are common enough in the streets of London. It is to be observed that some of the performers, particularly the first treble, have more than seven pipes, which enables them to extend the melody beyond the *septyenary*. (*Encyclop. Londinensis*, 1821.)

A Tutor for this instrument was published in 1807, entitled *The Complete Preceptor for Davies's new invented Syrrynx (sic) or patent Pandea: Harmonica, containing tunes and military pieces in one, two, three, and four parts*. The writer states that 'by making his instrument of glass he gains many advantages over the common reed, the tone being inconceivably more brilliant and sonorous.' The scale given begins on A below the treble staff, rising by fifteen intervals to the A above the same staff. The C is indicated as the keynote, which is marked as such. The instrument appears to have been susceptible of double-tonguing like the flute.

W. H. S.

PANDORA. The Greek *πανδοῦρα*; Arabic *tanbur*, now rendered *tamboura*, is of great antiquity; and the long, straight-necked, stringed instrument with comparatively small body contrasted with the pear-shaped lute, has been handed down from the distant civilisations of Egypt and Babylon to the *pandoura* and *COLASCIONE* (*q.v.*) of Southern Europe (see PLATE XXIII. No. 4), the various *tambouras* of Bulgaria, Turkey and India, the Chinese 'san-hsien' or 'sientzē' and the Japanese 'samisen' and other Eastern descendants and representatives.

The Egyptian instrument is depicted on

¹ Theocritus, *Idyll* ix.

² 'Est milii disparibus septem compacta crotula Plectra.'

³ See *Catalogue of Instruments in South Kensington Museum*, by C. Engel, p. 66, for a woodcut of this specimen.

⁴ "'Et supra calamos uno percussere labro.'"—Lucretius. This line clearly indicates the identity of the instrument.

monuments of a great age, and in the early wall paintings (c. 1580 B.C.) there are indications of a fretted finger-board. For the supposed name of this instrument see NEFER. The ancient Greeks were acquainted with an instrument of the kind which they called *πανδοῦρα*; there is good reason to suppose it preceded the lyre, but for open-air music the latter had the better chance, and became ultimately the national Hellenic stringed instrument of the classic and Graeco-Roman periods. Julius Pollux (iv. 60), and Athenaeus (iv. 183), quote Pythagoras for the ascription of the *πανδοῦρα* to the Troglodytes of the Persian Gulf, who made it of laurel, which grew near the sea-shore. With reference to the Asiatic 'tanbur,' Al Fārābī, the greatest Arabic writer on music (d. A.D. 950), has preserved for us, in his description of the tanbur of Bagdad, an echo of the past, the characteristic note and accordances of the old 'pagan' scale, which preceded the Persian and Arabic invasions. This note, the septimal whole tone and 7-8 ratio (the equal temperament semitone 2:31), must have been the original Arabic 'wosta' or middle finger-note on the finger-board, equivalent to the index finger or Lichanos on the lyre which was the characteristic tone of the old Greek soft diatonic genus (*μαλακός*). Dr. Land (*Recherches sur l'histoire de la gamme arabe*, Leyden, 1884) saw in this scale a distortion, from the constant practice of instruments, of a natural scale, an intuition with which he credits the ancient Persians, but this mental recognition of harmonious intervals implies the conception of modern harmony in which we are educated, but in which the musicians of the ancient world, Persians, Indians or Greeks, certainly were not. Instead of this the more mechanical adaptation of the finger-board to the hand accounts for that conception of the tetrachord we find with the ancient Greeks, and can now trace to the still older civilisation of Babylon and Nineveh. Al Fārābī sees music, theoretical and practical, through Greek spectacles of that later age in which he wrote, and his tanbur of Khorassan, like his lute, is the music of Islam translated into Greek. The arithmetical reasonings of philosophers who sought to explain the musical scale could never have been, excepting in the larger intervals, the practical art of musicians; limmas and commas were evolved from a simpler diatonic system enriched to suit the finer ears of the time with small intervals; of which we have within the last hundred years the quarter tone analysis of Mechāga, a mathematician and musician of Damascus, and the third tone (Pythag. O. 680) insisted upon as the unit by Villoteau (*Description de l'Égypte*, tomes xiii et xiv, 8vo, Paris, 1823), who was one of the scientific expedition sent by Napoleon I. to Egypt, and who brought back a collection of instruments now, unhappily for the settlement of a much-debated question, no longer to be

found. The intention of Dr. Land's admirable and essential book is in the main polemic, to upset the dictum of Villoteau, since reproduced by musical historians such as Fétis, Ambros and Kiesewetter in collaboration with Hammer-Purgstall, but the battle remains undecided, as the great Arabic authorities, Al Fārābī, Casio'ddin, Abdo'lqadir and others were as obviously making their native musical material Greek, as the Japanese are trying to Europeanise their own to-day. To find the real Arabic music we must take the advice of the traveller Dr. Landberg, and penetrate among the Bedouin inhabitants of the interior.

We find in Mechāga a diatonic framework, but with neuter, not minor or major thirds; the latter, when they occur, are subordinate. The hypo or plagal mode with the minor seventh called 'Ochag, c, d, e, f, g, a, b, c, is advanced to the first place before Rāst, f, g, a, b, c, d, e, f, but that the latter was once regarded as the original is proved by the names of the notes which follow Rāst, thus 'Dou-kah,' the second, 'Sik-hah,' the third, and 'Tchār-kah,' the fourth. As in India, in the present day, it is possible that small intervals were in use for a refined expression or for grace. (See INDIAN MUSIC.) But in the pandoura or tamboura we find a diatonic scale which has much in common with the flutes or auloi of antiquity, and of Eastern music to-day. Villoteau has given magnificent engravings of tambouras after the very precise drawings of Auguste Herbin, which form part of the atlas of *La Description de l'Égypte*. Their accuracy suggested to Dr. Land the desirability of minutely measuring the finger-boards, in the absence of the instruments themselves, to compare with the results with Villoteau's text. He has given the results in millimètres sometimes carried to two places of decimals for the Bulgarian tanbur; the large Turkish, the small and large Persian, and one simply called 'd'orient.' With these he has compared calculated intervals against Villoteau's naming and the nearest Pythagorean or harmonic intervals, the result of which is, however, impaired by the influence of tension when the intervals are stopped upon the finger-board, unavoidable in producing the note, and tending always to sharpen the vibration number. This will be more perceptible as the sounds ascend from the diminished length of the string. In Dr. Land's tables no exact gradation is noticeable, although the diatonic intervals including the neuter thirds and sixths and minor seventh are not remote. But with thirds of the whole tone, to which Dr. Land has not given attention, the results very frequently come as near.

The modern Egyptian or Arabian, and the various Indo-Chinese varieties of the tamboura have no frets, but there are marks on the finger-board of the Japanese samisen that are guides to the intervals required. The small Turkish

tamboura called Ehaz, a very beautiful-looking instrument, has twenty-three frets. (See FRET.)

The first syllable of many of these names points to a common derivation from a root perhaps expressive of tension.

PANDORE (BANDORA) (Ital. Neapolitan dialect, *pandura*; Arabic, *tanbur*; Indian languages *tambura*). The English pandore is a variety of the cither with ribs shaped in incurvations and an oblique bridge. According to Praetorius (*Syntagma*) the smallest size was called Orpharion (see ORPHARION), the name a combination, according to Dr. Murray, of Orpheus with Arion; the medium size, Penorcon; and the largest, Pandore. Praetorius spells this Pandorra or Bandoer. The forms orpharion and pandora occur in *The School of Musicke*, by Thomas Robinson, London, 1603. Queen Elizabeth's Lute preserved at Helmingham in Suffolk is an instrument of this genus. It was made by John Rose in Bridewell, London, 1580; the name he gave it, 'Cymbalum Decachordum,' shows that it was intended for ten strings, which, according to Praetorius, would be tuned five notes in pairs, lute fashion. Such an instrument would be used for accompaniment only. It is called an English instrument by Praetorius in the *Syntagma* (1618), who says it had a flat back, and was like a cither strung with six and sometimes seven twisted metal strings, which were plucked with the finger. William Barley (1596), in his *New Booke of Tabliture*, has instructions for the bandora¹ in the third part. The instrument there is described and depicted as having six pairs of strings tuned in unison. (See PLATE I. No. 2.) Music for the bandora was always written in tablature, but, as in the case of the lute, there is a good deal of variety in the *accordatura* employed. The bandora was often used to maintain the bass part in consort, as in Morley's 'Consort Lessons' (1599 and 1611), Rosseter's 'Consort Lessons' (1609), and Leighton's 'Teares' (1614), but only in the last of these three has the bandora part survived. It is for a seven-stringed instrument, *Bandurrias*. (See MANDOLINE.)

A. J. H.

PANDORINA, a small lute. (PLATE XLV. Nos. 1, 2; see MANDORE.)

PANE, DOMENICO DEL (b. Rome), describes himself as having been a pupil of Antonio Maria Abbati. In 1650 he became soprano singer in the Imperial Chapel at Vienna under Ferdinand III., but in 1654 was received into the Papal Chapel at Rome, where also in 1669 he became choirmaster. When he had completed his jubilee of service in the Papal Chapel, and his voice began to fail, not wishing, as he says, to

be idle, he composed and published in 1687 a volume of masses for four to eight voices, based on favourite motets of Palestrina: 2 a 4, 'O doctor bonus,' 'Domine quando veneris'; 3 a 5, 'Stella quam viderant,' 'O beatum virum,' 'Jubilato Deo'; 1 a 6, 'Canite tuba'; 1 a 8, 'Frates ego enim.' This was his op. 5. Previous works published were *Motetti a 2-5*, op. 2 (Rome, 1675); *Sagri Concerti a 2-8*, op. 3 (1675); two Books of Madrigals a 5. In 1677 he edited Abbati's Antiphons for twelve bass and twelve tenor voices. A few other works remain in MS. in the archives of the Sistine Chapel. J. R. M.

PANIZZA, ETTORE (b. Buenos Ayres, Aug. 12, 1875), operatic conductor and composer. He studied at Milan Conservatoire, won the 1st prize for piano and composition, and made his début in Rome in 1899. He gained his experience as an orchestral conductor in Italy, and introduced there several works by Elgar. He was engaged for some years at various opera-houses in Italy and South America, during which period he composed and brought out three operas: 'Il fidanzato del mare' (Buenos Ayres, 1897); 'Medio, Eno, Latino' (a trilogy, Genoa, 1900); and 'Aurora' (Buenos Ayres, 1908). He first appeared at Covent Garden in June 1907, and conducted there for several seasons, invariably earning admiration for his musicianship and firm rhythmical beat. He directed the first performances in England of Baron F. d'Erlanger's 'Tess' in 1909, of Zandonai's 'Conchita' in 1912, of Camussi's 'La du Barry' in 1913, and Zandonai's 'Francesca da Rimini' in 1914. He also returned in 1924 and conducted some of the Italian revivals of that year. He brought out (Milan, 1913) a new edition in 3 vols. of Berlioz's *Traité de l'instrumentation*.

H. K.

PANNY, JOSEPH (b. Kohlmitzberg, Austria, Oct. 23, 1794; d. Sept. 7, 1838), violinist and composer.

After some early education from his father, who was director of the local school of music, and his maternal grandfather, Joseph Bremberger, an esteemed organist, Panny, at the age of 19, while occupying a tutor's post at Greinburg, attracted the keen interest of von Eybler, Kapellmeister to the Emperor Francis II. In 1815 Panny went to Vienna, and studied composition with Eybler. In 1824 he gave his first concert of his own compositions in Vienna, gaining a warm reception for his 'Kriegerchor.' In 1825 he met Paganini in Venice, and two years later renewed the acquaintance in Vienna, where he composed a 'scène dramatique' for the fourth string, which was performed by Paganini at his farewell concert in the Austrian capital. During 1829 and 1830 Panny toured in Germany. In 1831 he travelled to Norway

¹ In the Fleisgarve Inventory, 1608, is one item 'one bandora and a sithern with a double case.'

and conducted concerts at Bergen, and on his return to Germany in 1834 founded a school of music at Weisserling (Alsace), for the education of the children of the wealthy manufacturers of the town, who financed it. He visited Paris and London in 1835, married, and settled in Mainz in 1836, where he founded another College of Music. R. L. de Pearsall was his pupil. His death, from spinal meningitis, occurred two years later, at the age of 48. He left a widow and one child. His published compositions include: string quartets; trios; solos for violin, violoncello and clarinet; three masses; Requiem; male choruses; songs, etc.; a MS. opera 'Das Mädchen von Rügen,' and a hymn to the New Year, which was performed at Bergen, Dec. 18, 1831. Panny also left some literary MS., dealing with the history of music in Italy, Germany, France and England.

BIBL.—Baker; CLARKE, *Dict. of Fiddlers*; *Fétis*; article in Supplement to the *Gazette de Muenche*, 1838 E. H.-A.

PANOFKA, HEINRICH (b. Breslau, Oct. 2, 1807; d. Florence, Nov. 18, 1887), violinist. At the age of 17 he quitted the College of Breslau and put himself under Mayseder for the violin, and Hoffmann for composition, both at Vienna. In 1827 he gave his first concert. In 1829 he left Vienna for Munich, and thence went to Berlin. In 1831 his father died, and Panofka came into his patrimony. After some lengthened travelling he settled at Paris in 1834 as a violin-player. After a time he turned his attention to singing, and in conjunction with Bordogni founded in 1842 an Académie de Chant. In 1844 he came to London, and in 1847 (Jenny Lind's year) was engaged by Lumley as one of his assistants at Her Majesty's Theatre. The Revolution of 1848 fixed him here; he published a 'Practical Singing Tutor,' and was widely known as a teacher. In 1852 he returned to Paris, and in 1866 settled in Florence. His principal works are 'L'Art de chanter' (op. 81); 'L'Ecole de chant,' twenty-four Vocalises progressives (op. 85); *Abécédaire vocal* (2nd ed.); twelve Vocalises d'artiste (op. 86)—all published by Brandus. He translated Baillot's *Nouvelle Méthode* for the violin into German. He also published many works for violin and piano, and for violin and orchestra, but they are of slight importance.

PANORMO (1) VINCENTO TRUSAINO (b. Monreale, near Palermo, Nov. 30, 1734; d. London, 1813?). The career of this excellent violin-maker has been much obscured by the placing of false labels in his instruments, and only conjecture locates and dates his birth and death. It is presumed that he acquired a knowledge of his craft, both at Cremona and Turin, and that he went to Paris in 1750, but, failing to find a field for his efforts, returned

south as far as Marseilles. In 1772 Panormo visited England, and from 1783-89 alternated betwixt London and Paris, establishing in the latter town a business at No. 70 Rue de Chartres, with a workshop in the Rue de l'Arbre Sec. His favourite model was the large pattern Stradivarius, which he copied to perfection. The workmanship throughout his instruments is neat and well executed, the scrolls and f holes being particularly well cut. Some of his best fiddles were made out of an old maple billiard-table, which Panormo purchased whilst in Dublin. He employed several forms of printed label; the earliest bear the arms of Palermo at the right-hand side of the ticket. He was a fairly prolific maker. Panormo's eldest son (2) JOSEPH (b. London, 1773; d. circa 1825), carried on a fiddle-making business, first at New Compton Street, and later in King Street, Soho, and excelled as a violoncello-maker. His brother (3) GEORGE LEWIS (b. London, 1774; d. circa 1842), was principally a guitar-maker, but made also violins, following the Strad model, first in Oxford Street, and later in High Street, St. Giles. He is mostly esteemed as a bow-maker, in the mastery of which art he resembles Duke, whom he closely followed. Joseph Panormo's son (4) EDWARD FERDINAND, was also a violin-maker, but of little importance.

BIBL.—VON LUTENDORFF, *Die Geigen und Lautenmacher*; HERRON-ALLEY, *Violin-making as it was and is*; VIDAL, *Les Instruments à archet*, vol. I.; *Fétis*; HART, *The Violin*. E. H.-A.

PANSERON, AUGUSTE MATHIEU (b. Paris, Apr. 26, 1796; d. there, July 29, 1859), received his first instruction in music from his father, a musician, who scored many of Grétry's operas for him. He entered the Conservatoire as a child, passed successfully through the course, and after studying harmony and composition with Berton and Gossec, ended by carrying off the Grand Prix de Rome (1813). He made good use of his time in Italy, took lessons in counterpoint and fugue from the Abbé Mattei, at Bologna, and studied especially the art of singing, and the style of the old Italian masters. After travelling in Austria and Germany, and even reaching St. Petersburg, he returned to Paris and became a teacher. Shortly afterwards he was appointed 'accompagnateur' to the Opéra-Comique, a position which enabled him to produce two small one-act pieces long since forgotten. He does not appear to have possessed the necessary qualities for success on the stage, but he had a real gift of tune, and this secured great popularity for a number of French romances composed between 1825 and 1840, melodious, well written for the voice, easily remembered, and often pleasing or even more; but marred by too much pretension. His wide experience during his professorships at the Conservatoire—solfège, 1826; vocalisation, Sept. 1831; and singing, Jan. 1836—taught him the requirements of pupils, and how those

1 These places and dates are conjectural only.

requirements can best be met. His works are thus of value from an educational point of view, and we give a complete list, classified under the various heads.

1. Progressive solfeges for single voice—A, B, C musical; with continuation.
2. Progressive solfeges for several voices—Primary manual for 2 and 3 voices.
3. Do. for instrumental performers—Do. for Pianists; Do. for Violin players.
4. On the art of singing—Violin.

Panzeron also composed two masses for three treble voices, and a 'Mois de Marie,' containing motets and cantiques for one, two and three voices.

G. C.

PANTALEON (PANTALON), a very large DULCIMER (*q.v.*) invented and played upon in the early part of the 18th century by Pantaleon Hebenstreit, whose name was transferred to the instrument by Louis XIV. HEBENSTREIT (*q.v.*) quadrupled the size of the dulcimer and had it constructed as a double hackbrett with two sound-boards, each with its scale of strings—on the one side overspun catgut, on the other, wire. There were 185 strings in all, costing 100 thalers a year to keep in order. Kuhnau¹ praises this powerful chromatic instrument and its prerogative over harpsichords and clavicords in the properties it possesses of *piano* and *forte*.

The name was also given in Germany to horizontal pianofortes with the hammers striking downwards.

A. J. H.

PANTHEON, a building in Oxford Street, erected in 1770–71 from the designs of James Wyatt, at a cost of £60,000, for masquerades, concerts, balls, etc., and as 'a Winter Ranelagh.' It occupied a large space of ground, and besides the principal entrance in Oxford Street there were entrances in Poland Street and Great Marlborough Street. The interior contained a large rotunda and fourteen other rooms splendidly decorated; the niches in the rotunda being filled with white porphyry statues. The building was opened on Jan. 26, 1772. For some years it proved a formidable rival to the Italian Opera, as the proprietors always provided the best performers. In 1775 the famous Agujari was engaged, who was succeeded, a few years later, by the equally famed Giorgi, afterwards Banti. The second concert of the Commemoration of Handel was given here, May 27, 1784, the place being specially fitted up for the occasion. Later in the same year the balloon in which Lunardi had made his first successful ascent from the Artillery Ground was exhibited. The King's Theatre having been burnt down in 1788, the Pantheon was fitted up as a theatre and opened for the performance of Italian operas, Feb. 17, 1791. On Jan. 14, 1792, the theatre was destroyed by fire. In 1795 the interior of the building was reconstructed for its original purpose, and opened in April with a masquerade, but it met with little success, and

in 1812 was again converted into a theatre, and opened Feb. 17, with a strong company, principally composed of seceders from the King's Theatre, for the performance of Italian operas. The speculation, however, failed, and the theatre closed on Mar. 19. In the following year (July 23, 1813) an attempt was made to open it as an English opera-house, but information being laid against the manager and performers, at the instance of the Lord Chamberlain, for performing in an unlicensed building, and heavy penalties inflicted (although not exacted), the speculation was abandoned. Subsequent efforts to obtain a license failed, and in Oct. 1814 the whole of the scenery, dresses, properties and internal fittings were sold under a distress for rent, and the building remained dismantled and deserted for nearly twenty years. In 1834 the interior was reconstructed by Sydney Smirke, at a cost of between £30,000 and £40,000, and opened as a bazaar; part being devoted to the sale of paintings, and the back part, entered from Great Marlborough Street, fitted up as a conservatory for the sale of flowers and foreign birds. The bazaar in its turn gave way, and early in 1867 the premises were transferred to Messrs. Gilbey, the well-known wine merchants, by whom they are still occupied. During all the vicissitudes of the building Wyatt's original front in Oxford Street has remained unaltered.

W. H. H.

PANTOMIME (Gr.), 'an imitation of everything,' (1) a kind of dramatic entertainment in which the performers express themselves by gestures to the accompaniment of music, and which may be called a prose ballet. It has been in use among Oriental nations from very ancient times. The Greeks introduced pantomime into their choruses, some of the performers gesticulating, accompanied by music, whilst others sang. The Romans had entire dramatic representations consisting of dancing and gesticulation only, and some of their performers attained high excellence in the art. The wordless play with music has made only sporadic appearances in recent times; a typical example is 'L'Enfant prodigue.' (See WORMSER.) A mixture of pantomime and dancing constitutes the modern *ballet d'action*. (See BALLET-DANCING.)

(2) The first occurrence of an English equivalent to the Italian 'Commedia dell'Arte'—the ultimate origin of which is exceedingly obscure—seems to have been at Drury Lane in 1702, when 'Tavern Bilkers,' by John Weaver (the friend of Addison and Steele), was produced. It was not successful, but in 1716–17, at Lincoln's Inn Theatre, John Rich, under the name of Lun, performed the character of Harlequin in a style which extorted the admiration of those who most disapproved of the class of piece. His pantomimes were originally musical masques, usually upon some classical

¹ Matthæson's *Critical Notices*, Dec. 8, 1717.

mythological subject, between the scenes of which harlequinade scenes were introduced, the two parts having no connexion. The music for the majority of them was composed by J. E. Galliard. Their popularity compelled the managers of Drury Lane to adopt pantomimes in order to compete successfully with their rival, and they were then soon produced at other theatres also. After a time the original form was changed, and in lieu of the mythological masque, a short drama, of three or four scenes, was constructed, the invariable characters in which, under different shapes, were an old man, his pretty daughter, or ward—whom he was desirous of uniting to a wealthy but foolish suitor, but who had a poorer and favoured lover—and the old man's knavish serving-man. The girl and her lover were protected by a benevolent fairy, whilst the old man and his favourite had the assistance of a malevolent spirit. To counteract the machinations of the evil being, the fairy determined that her protégés should undergo a term of probation under different shapes, and accordingly transformed them into Harlequin and Columbine, giving to the former a magic bat to assist him in his progress. The evil spirit then transformed the old man and his servant into Pantaloon and Clown, and the wealthy suitor into the Dandy Lover, and the harlequinade began, the two lovers being pursued by the others through a variety of scenes, but always foiling them by the aid of the bat.¹ At length the fairy reappeared and declared the success of the lovers, and the piece terminated. Vocal music was largely introduced, not only in the opening, but also in the harlequinade, and the best English composers did not disdain to employ their talents in producing it. The two Arnes, Dibdin, Battishill, Linley, Shield, Attwood and others, all composed music for this class of entertainment. About 1830 the length of the opening was greatly extended, more spectacular effects introduced, and the 'transformation scene' became by degrees the climax of the whole. Original music was still composed for the pantomime, but the task of producing it was entrusted to inferior composers. Gradually the harlequinade scenes were reduced in number, the opening assumed the character of an extravaganza upon the subject of some nursery tale, and the music became a selection of the popular tunes of the day. In the early pantomimes Harlequin was the principal character, and continued so until the genius of Grimaldi placed the Clown in the most prominent position.

In pantomimes of the middle period the pantomimists who sustained the principal parts in the harlequinade invariably performed in the

opening the characters who were transformed. A consideration of the difference between the Italian Arlecchino and the English Harlequin is beyond the scope of our present purpose.

W. H. H.

(3) The entertainment now generally described as pantomime is historically descended from the above, but bears few traces of its descent. The harlequinade has vanished. The fairy-tale is retained merely as an indication that the entertainment is intended for children. The hero, called 'principal boy,' is acted by a woman; the comic character, generally principal boy's mother, is acted by a man. Beyond these conventions the pantomime is practically a *revue*, the attraction being the number of 'turns' from the variety stage incorporated into it. The music matches the 'turns.' c.

PAOLO, ARETINO (b. Arezzo, 1544), musician to the Duke of Ferrara; maestro di cappella of Arezzo Cathedral, 1558. He composed a book of 'Madrigali cromati' (1549); a book of madrigals a 5-8 v. (1558); a Passion according to St. John; a Te Deum, Magnificats and other church music; the last dated composition, Milan, 1565 (Q.-L.).

PAOLUCCI, GIUSEPPE (b. Siena, May 25, 1728; d. Apr. 26, 1776), pursued his musical studies under Padre Martini at Bologna, and like him became a Franciscan friar. After holding the position of choirmaster at a church in Venice and at Sinigaglia, he returned in 1771 to Assisi to be choirmaster of the Franciscan church there. He is chiefly known as the author of *Arte pratica di contrappunto dimostrata con esempi di varj autori e con osservazioni*. . . . Venice, 1765, a work of the same nature as Martini's treatise. J. R. M.

PAPE, JEAN-HENRI (b. Sarsted near Hanover, July 1, 1789; d. Asnières, near Paris, Feb. 2, 1875), pianoforte-maker. He went to Paris in 1811, and after visiting England his services were secured by Ignace Pleyel to organise the works of the piano factory which he had just founded. About 1818 he appears to have set up on his own account; and thenceforward, for nearly half a century, there was perhaps no year in which he did not produce something new. His active mind never rested from attempts to alter the shape, diminish the size, and radically change the framing, belying and action of the pianoforte; yet, in the result, with small influence upon the progress of its manufacture. In shape he produced table pianos, rounded and hexagonal: he made an oval piano, a piano console (very like a chiffonier), and novel oblique, vertical and horizontal forms. Like Wornum in London and Streicher in Vienna, to do away with the break of continuity between wrest-plank and sound-board in the grand piano, he repeated the old idea that had suggested itself to Marius and Schroeter, of an overstriking action—that is, the hammers de-

¹ The names Harlequin, Columbine and Pantaloon are derived from the Italian—Arlecchino, Colombina and Pantalone. Clown is known in Italy as *Facileccio*; in France as *Pierrot*, *Paillasson*, or *Pître*; in German as *Bajaz*, or *Hanswurst* (Jack-pudding).

ascending upon the strings. This is said to have been in 1826. In this action he worked the hammers from the front ends of the keys, and thus saved a foot in the length of the case, which he strengthened up to due resistance of the tension without iron barring. He lowered the sound-board, glueing the belly-bars to the upper instead of the under surface, and attached the belly-bridge by a series of sound-posts. His constant endeavour was to keep down the tension or drawing power of the strings, and to reduce the length and weight of the instrument; for, as he says (*Notice de M. H. Pape*, Benard, Paris, 1862), 'it is not progress in art to make little with much; the aim should be to make much with little.' Yet he extended compass to eight octaves, maintaining that the perception of the extremes was a question of ear-education only. He reduced the structure of his actions to the simplest mechanism possible, preferring for understriking grand pianos the simple crank escapement of Petzold, and for upright pianos that of Wornum, which he adopted in 1815, as stated in the *Notice* already referred to. His inventions of clothed key-mortices and of felt for hammers are the only important bequests makers have accepted from him, unless the cross or overstringing on different planes, devised by Pape for his table instruments, and already existing in some old clavichords, was first introduced into pianos by him. He claimed to have invented it, and in 1840 gave Tomkinson, a London maker, special permission to use it. (See *PIANOFORTE*.) He made a piano with springs instead of strings, thus doing away with tension altogether; added reed attachments, and invented a transposing piano, moving by his plan the whole instrument by means of a key while the clavier remained stationary. He also invented an ingenious saw for veneers of wood and ivory; in 1839 he venerated a piano for St. James's Palace, entirely with the latter substance. Pape received many distinctions in France, including the decoration of the Legion of Honour.

A. J. H.

PAPILLON DE LA FERTÉ, DENIS-PIERRE-JEAN (b. Châlons-sur-Marne, Feb. 18, 1727¹), became in 1777 by purchase Intendant des Menus Plaisirs to Louis XVI. and as such had the direction of the École Royale de Chant, founded by the Baron de Breteuil and of the Opéra (from 1780-90) after the Paris municipality had given up the administration of it. In 1790 he published a reply to a pamphlet by the artists of the opéra—'Mémoire justificatif des sujets de l'Académie royale de musique'—in which they demanded a reform of the administration. A learned man of high artistic disposition, he left anonymous works on mathematics, astronomy and architecture. He was

¹ Parish Register of Notre Dame, Châlons-sur-Mar.

guillotined in Paris, July 7, 1794.² His son occupied the same post after the Restoration.

PAPINI, GUIDO (b. Camagiore near Florence, Aug. 1, 1847; d. London, Oct. 3, 1912), a distinguished violinist, was a pupil of the Italian violin professor Giorgetti, and made his début at 13 years of age in Florence, in Spohr's third concerto. He was for some years leader of the Società del Quartetto in that city. In 1874 he appeared at the Musical Union, which was his principal *locale* during his annual visits to London, though he was also heard at the Crystal Palace, the Old and New Philharmonic Societies, etc. In 1876 he appeared in Paris with success at the Padeloup Concerts, also at the Bordeaux Philharmonic Concerts, which were then much in vogue. In 1893 he accepted the post of principal violin professor in Dublin at the Royal Irish Academy of Music; he instituted the Classical Concerts of the Royal Society of Music while in that city, but ill-health compelled him to resign his professorship in 1896. He returned to London, dividing his time between composition and occasional private tuition. His published compositions, besides arrangements, transcriptions, etc., comprise two concertos for violin and violoncello respectively; an excellent Violin School; 'Exercices de mécanisme pour le violon seul,' and smaller pieces, such as the 'Feuilles d'album,' Romances, Nocturnes, etc., for violin and violoncello. He published songs, trios for two violins and piano, quartet for three violins and piano, and edited the twenty-four 'Caprices de Paganini,' and other classical works.

PAQUE, (1) GUILLAUME (b. Brussels, July 24, 1825; d. Mar. 2, 1876), a well-known violoncellist. He entered the Conservatoire of his native city at an early age as De Munck's pupil, and at 15 gained the first prize. He then went to Paris and was solo violoncello at Musard's Concerts. Thence he went to Madrid as violoncellist to the Queen of Spain. In 1851 he was employed by Jullien for his English Concerts, and thenceforward London became his home. He played in the Royal Italian Opera orchestra, occasionally replaced Piatti at the Monday Popular Concerts, led the violoncellos at the new Philharmonic, and was a member of the Queen's Private Band. He played at the Philharmonic, June 18, 1860. He was buried in Brompton Cemetery. He left numerous works.

His brother, (2) **PHILIPPE J.**, was trumpeter to the Queen from 1864, and was a member of Her Majesty's Private Band.

G.

² Date verified from copy of death act.

PARADIES (PARADISI), PIETRO DOMENICO (b. Naples, 1710; d. Venice, 1792), a pupil of Porpora, and an esteemed teacher and composer, lived for many years in London. He wrote 'Alessandro in Persia' for Lucca in 1738, and 'Il decreto del fato' (serenata) for Venice in 1740. In 1747 he produced at the King's Theatre 'Fetonte,' six airs from which were published by Walsh, and frequently sung at concerts by Signora Galli. He also printed twelve 'Sonate di gravicembalo,' dedicated to the Princess Augusta (Johnson; 2nd ed. Amsterdam, 1770). Such players as Clementi and Cramer studied his works conscientiously, and he was in great request as a teacher. When Gertrude Schmeling (afterwards Mme. Mara) made her first appearance in London as a violinist of 11 Paradies was engaged as her singing-master, but her father soon found it necessary to withdraw her from his influence. An earlier pupil, and one of his best, was Cassandra Frederick, who at the age of five and a half gave a concert in the Little Haymarket Theatre (1749), playing compositions by Scarlatti and Handel. The last we hear in England of this eccentric Italian is his connexion with the elder Thomas Linley, to whom he gave instruction in harmony and thorough-bass. He returned to Italy. Ten sonatas are in the *Trésor des pianistes*, one in D is printed by Pauer in his 'Alte Meister,' and another, in A, in his 'Alte Klaviermusik'; and a Toccata is given in Breitkopf's 'Perles musicales.' The Fitzwilliam Collection at Cambridge contains much MS. music by him (including the scores of the operas 'Antico,' 'Fetonte,' 'La forza d' amore' and 'Il decreto del fato'), apparently in his autograph. C. F. P.

PARADIS, MARIE THERESE VON (b. Vienna, May 15, 1759; d. Feb. 1, 1824), daughter of Joseph Anton, an Imperial Councillor. She was a highly esteemed pianist, and Mozart wrote a concerto for her (in B \flat , Köchel, 456). She also attained to considerable skill on the organ, in singing, and in composition, and this in spite of her being blind from early childhood. The piano she studied with Richter (of Holland), and afterwards with Kozeluch, whose concertos were her favourite pieces; singing with Salieri and Righini; and composition with Friberth, and the Abbé Vogler. The Empress, her godmother, took a great interest in her, and made her a yearly allowance of 200 gulden. In 1784 she went to Paris, where she remained six months, playing before the court, and at the Concert Spirituel, with great applause. In November she went to London. Here she stayed five months, played before the King, Queen and Prince of Wales, whom she accompanied in a violoncello sonata, at the then recently founded

¹ Miss Frederick, a favourite of Handel, also played the organ in public in 1760, and sang in Handel's oratorios. She married Thomas Wynne, a land-crover in South Wales, and exercised considerable influence over the musical education of her nephew Massingill.

Professional Concerts (Hanover Square Rooms, Feb. 16, 1785), and finally at a concert of her own, conducted by Salomon, in Willis's Rooms on Mar. 8. A notice of her appeared in the *St. James's Chronicle* for Feb. 19. She next visited Brussels and the more important courts of Germany, attracting all hearers by her playing and her intellectual accomplishments. After her return to Vienna she played twice at the concerts of the Tonkünstler-Societät, and took up composition with great ardour, using a system of notation² invented for her by a friend of the family named Riedinger. Of her works, the following were produced: 'Ariadne und Bacchus,' a melodrama, played first at Laxenburg, before the Emperor Leopold (1791), and then at the national court-theatre; 'Der Schulcandidat,' a pastoral Singspiel (Leopoldstadt Theatre, 1792); 'Deutsches Monument,' a Trauer-cantate for the anniversary of the death of Louis XVI. (small Redoutensaal, Jan. 21, 1794, repeated in the Kärnthnertheater Theatre); and 'Rinaldo und Alcina,' a magic opera (Prague). She also printed a Clavier-trio, sonatas, variations (dedicated to Vogler); 12 Lieder; Bürger's 'Lenore,' etc. After her father's death she founded a music school for girls, and towards the close of her life she devoted herself exclusively to teaching singing and the pianoforte, and with great success.

C. F. P.

PARADISE AND THE PERI, the second of the four poems which form Moore's *Lalla Rookh*, has been several times set to music.

(1) 'Das Paradies und die Peri,' by Robert Schumann, for solos, chorus and orchestra (op. 50). The words were compiled by Schumann himself from the translations of Flechsig and Oelkers, with large alterations of his own; produced Leipzig, Dec. 2, 1843; in England, Philharmonic Society, June 23, 1850, having previously been heard in Dublin, Feb. 10, 1854.³

(2) A fantasia-overture, 'Paradise and the Peri' (op. 42), composed by Sterndale Bennett for the Jubilee Concert of the Philharmonic Society, July 14, 1862, and produced then.

(3) A cantata, for solos, chorus, orchestra and organ, by J. F. Barnett; the words selected from Moore. Produced Birmingham Festival, Aug. 31, 1870. G.

(4) 'La Peri,' 'poème dansé' by Paul Dukas, Paris (Châtelet) 1912.

PARAVICINI, SIGNORA (b. Turin, 1769), daughter of Isabella Gandini the singer. Viotti was her master, and her full pure tone, graceful bowing, and scholarly style gained her considerable fame as a violinist. During the Milanese festivities which celebrated the battle of Lodi, she felicitously attracted the attention of the Empress Josephine, who engaged her to teach her son Eugène Beauharnais, and took

¹ Described in detail in the *Leipzig A.M.S.*, 1810, No. 87.

² See *Musical World*, Mar. 9, 1870, p. 174. See also 'Lalla Rookh' and 'Veiled Prophet.'

her to Paris in 1797. Paravicini was most successful in the French capital, and became a leading soloist at the concerts given in the Salle de la Rue des Victoires Nationales. Unfortunately, the royal favour became less marked after a time, and finally ceased. The violinist sank into abject poverty, and, reduced to the utmost indigence, applied to the Italian residents in Paris, who eventually assisted her to return to her native country. Once arrived at Milan, her ability soon regained for her both competence and repute. Her performances of some concertos at the Italian Theatre at Lisbon in 1799 created a sensation, as did also her appearances at Leipzig, in the same year, and Dresden in 1800. She returned to Paris in 1801, and was received with enthusiasm at the Fridzeri concerts. She was at Berlin in 1802, Ludwigslust in 1805, and gave notable concerts at Munich and Vienna in 1827, but all trace of her is lost after her performance at Bologna in 1830.

E. H. A.

PARAY, PAUL M. A. CHARLES (b. Tréport, May 24, 1886), composer and conductor. He was precociously gifted, and the influence of Dallier enabled him to overcome his family's objections to a musical career for him.

He entered the Paris Conservatoire in 1905, becoming a pupil of Causade and Xavier Leroux, won the first prize for harmony in 1908, and the Prix de Rome in 1911. He was taken prisoner during the war, returning in 1918. He owed it to a happy concurrence of circumstances that he was asked to conduct, as a test, the orchestra of the Concerts Lamoureux (Feb. 1920). His success was such that he was made second conductor to Chevillard, whom he succeeded soon afterwards. He has proved himself a true master, particularly in classic repertory, to which he is particularly attached.

As a composer, his personality is less pronounced. His works, already numerous, are sincere, finely written, occasionally a little academic. The best known are the sonata for PF. and vln.; the oratorio 'Jeanne d'Arc' (Rouen, 1921); and the symphonic poem 'Adonis troublé' (1921), given at the Opéra in 1922 under the title 'Artemis troublée.'

M. P.

PARDON DE PLOËRMEL, LE, see DINORAH.

PAREPA-ROSA, EUPHROSINE (b. Edinburgh, May 7, 1836; d. Jan. 21, 1874), the daughter of Demetrius Parepa, Baron de Boyescu, a Wallachian boyard, by his marriage with the singer Elizabeth SEGUIN (d. 1870), sister to Edward SEGUIN, a well-known bass singer. On her father's death, the child, having shown great aptitude for music, was

educated by her mother and eminent masters for an artistic career. At the age of 16 Miss Parepa made a successful début on the stage as Amina, at Malta, and afterwards played at Naples, Genoa, Rome, Florence, Madrid and Lisbon. In this country she made her first appearance May 21, 1857, as Elvira in 'I Puritani' at the Royal Italian Opera, Lyceum, and played, Aug. 5, 1858, as Camilla on the revival of 'Zampa' at Covent Garden, on each occasion with fair success. During some of the seasons between 1859 and 1865 she played in English opera at Covent Garden and Her Majesty's, and created the parts of Victorine in Mellon's opera of that name (Dec. 19, 1859); the title-part of 'La Reine Topaze' of Massé, on its production in England (Dec. 26, 1860); that of Mabel in Macfarren's 'Helvellyn' (Nov. 3, 1864); playing also Arline, Satanella, and the two Zerlinas. In 1863 she was married to Captain H. de Wolfe Carvell (d. Lima, Peru, Apr. 26, 1865).

Her fine voice combined power and sweetness, good execution and extensive compass (of two octaves and a half, extending to *d''* in alt); but she obtained but moderate success in opera. On the other hand, she won almost from the first a great reputation in oratorios and in the concert-room, and was frequently engaged at the various Societies and Festivals, including the Handel Festivals of 1862 and 1865. She also sang abroad in Germany and elsewhere. At the close of 1865 she went to America for a concert tour with Carl Rosa (whom she afterwards married there in Feb. 1867) and Levy the cornet-player, returning to England the following year. After their marriage Madame Parepa-Rosa and her husband remained in America for four years, and established their famous Opera Company, in which she was principal singer, achieving great success in English and Italian opera, oratorio and concerts. On her return to England, 1871, she was prevented by illness from fulfilling an engagement at the Royal Italian Opera, Covent Garden, but played for the winter season in Italian opera at Cairo, and the next year was heard with pleasure at Covent Garden as Donna Anna and Norma, and sang at the Philharmonic 'Ah Perfido' of Beethoven. In the autumn of 1871, Madame Parepa and her husband made a third visit to America with their company. In 1872 she sang at the Niederrheinische Festival at Düsseldorf, and later at Covent Garden, as Norma and Donna Anna. In 1873 she sang in Italian at Cairo with great success; her health prevented her singing in the provincial company that had been established by her husband, but she intended to sing the part of Elsa at the projected production of an English version of 'Lohengrin' at Drury Lane in Mar. 1874. Before the scheme could be realised Madame

Parepa was seized with a severe illness, from which she died. Carl Rosa abandoned his Drury Lane season, and founded the Parepa-Rosa scholarship at the R.A.M. in his wife's memory. (See ROSA, CARL.) A. C.

PARIS. The musical life of Paris is here summarised with reference to opera, concerts and educational institutions. Special accounts of the two most famous Parisian institutions, the Opéra and the Conservatoire, appear elsewhere under the headings ACADEMIE DE MUSIQUE and CONSERVATOIRE DE MUSIQUE (q.v.).

MUSICAL THEATRES. — From the definite establishment of the Comédie-Italienne at Paris in 1660, up to 1800, there existed successively about 22 theatres or theatrical enterprises for the production of musical works, including the Opéra, Opéra-Comique and their transformations (see ACADEMIE DE MUSIQUE); some particulars of the Opéra-Comique, the theatres Lyrique, Ventadour and Italian are given below. Bare mention must suffice of the Colysée (1771), Menus-Plaisirs (1780), Théâtre de Monsieur (1789), Odéon (1797), (Théâtre-Italien), etc. From 1801 up to the first quarter of the 20th century about 30 such theatres can be counted, including: Société Olympique (Opera Buffa) (1801), Théâtre des Italiens, Théâtre-Lyrique, Bouffes-Parisiens (1855), Athénée-Musical, Lyrique-Dramatique, Eden, Nouveau-Théâtre, Moncey, Marigny, Trianon-Lyrique, Théâtre des Champs-Élysées, etc., La Petite Scène (revives old works).

THE OPÉRA-COMIQUE, a theatre for French pieces with spoken dialogue, originated in the 'spectacles de la Foire,' which were a parody of the lyrical 'tragédie.' The title of 'Opéra-Comique' dates from the execution of an agreement between the comedians and the directors of the Académie Royale de Musique in 1715. The new enterprise, thus recognised, succeeded so well as to excite the jealousy of the large theatres, and in 1745 to cause the closing of the Opéra-Comique. In 1752, however, Monet received permission to re-establish it at the Fair of St. Germain, and under his skillful management it progressed so rapidly that in 1762 the Opéra-Comique joined the Comédie-Italienne, and took possession of the room in the Rue Mauconseil, whence in 1783 it migrated to the theatre in the Rue Favart.

In 1791 a second Opéra-Comique Company established itself in the Rue Feydeau, and a fierce competition ensued, which ended in the ruin and closing of both houses in 1801. After this the two companies were amalgamated and settled at the Théâtre-Feydeau, leaving the Salle Favart to the Italian troupe. At the Feydeau this company remained till April 1829.

The following play-houses were occupied afterwards by the Opéra-Comique:

Théâtre-Ventadour, 1829-32.
Théâtre des Nouveautés, Place de la Bourse (no longer existing), 1832.
Salle Favart, 1840, its present abode.

The Salle Favart restored by Crépinet (1879), was burnt down, May 25, 1887, after which the company was transferred to the Théâtre-Sarah Bernhardt. On Dec. 7, 1898, the theatre was opened on the old site.

In competition with the 'Théâtre-Lyrique' during the 19th century, the influence of the Opéra-Comique became gradually more important, with Carvalho as director, 1876-87, 1891-97. His successors were: Paravey, Carré, Carré-Gheusi, Isola-Carré; and from Oct. 1925, Masson-Ricou-Albert Carré.

THÉÂTRE-LYRIQUE, in a general way the name given in France to a theatre intended for performances of musical dramatic works. As a special enterprise, it was inaugurated at Paris, Sept. 21, 1851, by Edmond Souvestre, followed by his brother Jules (1852-54), E. Perrin (1854-55), Pellegrin, and above all, Carvalho (1856-60, 1862-68), under whose influence the theatre attained an artistic level.¹

From 1868 the principal endeavours to revise the institution were:

Pasdeloup (1868), successor of Carvalho (at the Théâtre-Sarah Bernhardt); Théâtre de la Gaîté, Vizental, 1876-77; Théâtre-Ventadour, Eauclair, 1878; Théâtre du Château d'Eau, 1879; performances of 'Étienne Marcel' (Saint-Saëns), 'Jocelyn' (Godard), Théâtre de l'Éden, Lamoureux, 1887, 'Lohengrin', 'Samson et Dalila', 1890, Porel-Colonne, 1893; Nouveau Théâtre, Lamoureux, 1899, 'Tristan et Isolde'; Théâtre de la Renaissance, 1899-1900, 'Obéron'; Théâtre du Château d'Eau, Cortot, 1902, 'Crépule des Dieux'; 'Tristan'; Théâtre du Trianon Lyrique, since Dec. 1902 onwards.

More recently must be mentioned the following seasons:

Théâtre du Châtelet, 1907-12, 'Salomé' (Richard Strauss), 1908; Théâtre des Champs-Élysées, 1913, both under the direction of G. Astruc; Théâtre de la Gaîté, Isola, 1903-4, 1907-14; Théâtre des Arts (Théâtre des Batignolles), J. Rouché, 1912, revival of old works, Monteverdi's 'Incoronazione di Poppea,' etc.; Théâtre du Vaudeville, Gheusi, 1919-20.

THÉÂTRE-VENTADOUR² has had a long and chequered musical history. The theatre was built to replace the Salle Feydeau, and a new street being planned to run from the Rue des Petits Champs to the Rue Neuve St. Augustin, and to be called the Rue Neuve Ventadour, it was decided to place the theatre in the middle of the street and call it by the same name. The street in which the principal façade stands is now called Rue Méhul, and that at the back, Rue Monsigny. The building was erected by the architect Huvé, superintended by M. de Guerry, and cost, including site, 4,620,000 francs (£184,800), which was paid out of the Civil List. The theatre was sold to a company

¹ See A. Soubies, *Histoire du Théâtre-Lyrique, 1851-70* (1899).

² Ventadour, which has given its name to a street and a lyric theatre in Paris, is a village in the Limousin, created a duchy in 1554 in behalf of Gilbert de Loris, whose descendants have since borne the name of Loris de Ventadour. The Rue Ventadour, opened in 1640 as the Rue St. Victor, took the name it still bears in 1673. It began at No. 28 in the Avenue de l'Opéra, and ends at No. 57 in the Rue des Petits Champs.

of speculators for 2,000,000 francs (£80,000), a disastrous transaction, in keeping with much of the financial history of the Théâtre-Ventadour.

The following theatrical companies occupied the theatre:

Apr. 20, 1829-32, Opéra-Comique.
June 10, 1834-35, Théâtre-Nautique (not musical).
Jan. 30, 1838, Italian Company with Rubini, Zamboni, Lablache, etc.
Autumn 1838-41, Théâtre de la Renaissance; director, Anténor Joly.
1841-71, Théâtre des Italiens.
1871-Jan. 11, 1878, several attempts to resuscitate the Italian repertory, e.g. 'Aida' (Apr. 22), Verdi's 'Requiem' (May 30, 1876), at the Théâtre-Lyrique until 1878.
Jan. 19, 1874, the Opéra Company after the burning of Salle Le Peletier.
In 1879 the theatre was sold to a financial company and became the 'Banque d'escompte de Paris.' It is actually an auxiliary branch of the 'Banque de France.'

THÉÂTRE-ITALIEN. — The foundation of the so-called 'Théâtre-Italien' or 'Théâtre des Italiens' for the permanent performance of the Italian repertory in France can be traced back to 1570, when Italian comedians played in Paris, in the reign of Charles IX. They were followed by others, Gelosi, Comici Confidenti, Fedeli, until 1660, definite establishment of an Italian troupe with 'Scaramouche' (Dominique), who performed with Molière's company at the Palais Royal up to 1673. From then the important dates in its evolution are the following: 1723, the Italian comedians take the name of 'Comédiens du roi' and join the Opéra-Comique, Feb. 3, 1762 (see Bouffons); Jan. 21, 1789, the Théâtre de Monsieur opens at the Tuileries; May 31, 1801, the 'Opéra Buffa' at the Salle Olympique, Salle Favart, Théâtre-Louvois until 1808 (Théâtre de l'Impératrice); 1808-15, performances at the Odéon of the above company; 1815-41, performances of the 'Théâtre Royal Italien' in different playhouses, Salles Favart, Louvois, Odéon, etc.; Oct. 2, 1841-76, the Italian troupe is located at the Théâtre-Ventadour. From then the Théâtre-Italien loses its permanent character; Italian performances take place in different theatres; 1881, 17 performances by A. Patti; 1883, performances with V. Maurel, etc. In the 20th century, from 1905-1922, Italian seasons have followed one another under different directions (Sonzogno, Gunsbourg, etc.).

Altmensch des théâtres (1920), ed. by A. AYNAUD.

CONCERT SPIRITUEL (1725-91), a great musical institution of France, dating from the reign of Louis XV. The Académie Royale de Musique (the Opera House) being closed on the great religious festivals, it occurred to Anne Danican Philidor (see PHILIDOR, 5) to give concerts on these occasions in place of the prohibited performances. Having obtained the necessary permission, Philidor entered into an agreement with Francine, the impresario of the Opéra, by which he pledged himself to pay 1000 francs a year, and to perform neither French nor opera music. The first Concert Spirituel accordingly took place between 6 and 8 P.M. on Sunday in Passion Week, March 18, 1725. The programme included a suite for violin and a capriccio by Lalande, Corelli's 'Nuit de Noël' (Concerto 8, op. 6), and a 'Confitebor' and 'Cantate Domino' of Lalande, and the concert was most successful. The number of concerts in the year never exceeded twenty-four. They were held in the Salle des Suisses of the Tuileries, on the Feast of the Purification, Feb. 2; Lady Day, March 25; on certain days between Palm Sunday and Low Sunday (first Sunday after Easter); Whitsunday; Corpus Christi Sunday; on Aug. 15, Sept. 8, Nov. 1, 8; Dec. 24, 25 — those being the days on which the Opéra was closed.

In 1728 Philidor, having previously acquired the right of introducing French and opera music into the programmes, transferred his privilege to Simard, on an annual payment of 3000 francs, and the musical direction of the concerts was confided to Mouret. His followers were: Dec. 25, 1734, Thuret, with Rebel as conductor; 1741, Royer; 1749, Royer and Caperan; 1755-1762, Mondonville; 1762-71, Dauvergne, Joliveau, Caperan; 1771, Dauvergne, Berton; 1773, Gaviniés, Le Duc, Gossec; 1777, Le Gros with Berthame (1789). Political events gave a fatal blow to the undertaking, and in 1791 the Concert Spirituel ceased to exist.¹

Mouret, Rebel, Dauvergne and Berton are among the best composers and leaders of the orchestra that the Académie Royale can show in the 18th century; Gaviniés, Simon Leduc, Lahoussaye, Guénin and Berthame, who conducted the concerts during the last eighteen years of their existence, were all violin-players of very great merit.

Among the celebrated artists who appeared, it will be sufficient to mention the famous brothers Besozzi, whose duets for oboe and bassoon made a furore in 1735; the violinists

¹ The Concert Spirituel was revived in 1806, however, by the impresario of the Italian Opera House, and the sacred concerts given during Holy Week at the Opéra, the Conservatoire and elsewhere, are still known by that name.

Traversa, Jarnowick, François Lamotte, Viotti and Frederic Eck; the horn players Punto and Rodolphe; Jérôme Besozzi and Louis Lebrun (oboe); Etienne Ozi (bassoon); Michel Yost (clarinet), and many others of less repute. Among many illustrious singers we must content ourselves with mentioning Farinelli, Raff, Caffarelli, David, Mmes. Agujari, Danzi, Todi and Mara.

In 1770 the important enterprise of the CONCERT DES AMATEURS was founded by d'Ogni and Delahaye at the Hôtel Soubise. It was conducted by Gossec, and its solo violin was the famous Chevalier de St. Georges. At these concerts the symphonies of J. B. Toeschi, Van Mader, Vanhall, Stamitz and Gossec, for wind instruments, were first produced. When the association removed to the Galerie de Henri III., in the Rue Coq Héron, they adopted the title of Concert de la Loge Olympique, and their orchestra contained the best players of the day. The change took place in 1780, a year after the introduction of Haydn's symphonies into France by the violinist Fonteski. So great was the success of these compositions as to induce the directors to engage Haydn to write six symphonies specially for the society. They date from 1784-89; are in C, G minor, E♭, B♭, D and A; and were afterwards published in Paris as op. 51, under the special title of 'Répertoire de la Loge Olympique.' (See HAYDN, List of Symphonies.)

Two similar institutions, the CONCERT DE LA RUE DE CLÉRY (1789), and the CONCERT FEYDEAU (1794), may be considered as feeble imitations of the Loge Olympique. They had, however, their periods of success — according to Fétis in 1796 and 1802. Among the artists who chiefly contributed to the éclat of the performances were the violinists R. Kreutzer and Rode, Fred. Duvernoy the horn-player, and the singers Garat and Mme. Barbier-Valbonne.

THE CONCERTS FRANÇAIS, the first of which took place in 1786, had their origin in the public exercises of the pupils of the École Royale de Musique et de Déclamation; the 'exercises' were in danger of suppression, when the old pupils of the Conservatoire formed themselves into a society quite independent of the school. The first concert took place in the foyer of the Théâtre Olympique, Nov. 21, 1801, and from 1802 the series was continued in the small theatre of the Conservatoire, rue Bergère, which theatre existed until 1911. The concerts were directed successively by Marcel Duret, F. Habeneck (then aged 22 years, but already a conductor of remarkable ability), and by Gasse, all of whom had been violin pupils. Besides songs and instrumental solos a symphony of Haydn, Mozart, or Méhul, etc., was always played, as well as an overture. Some of the symphonies of Beethoven (which the professional orchestras had not then attempted) were heard there for

the first time in Paris (the C major symphony on Feb. 22, 1807). This orchestra of students won general admiration by the excellence of its performances.¹

THE CONCERTS DU CONSERVATOIRE.—The creation of the celebrated Société des Concerts du Conservatoire was due to Habeneck, and its first 'Matinée dominicale' took place on Sunday, March 9, 1828, at 2 P.M., in the theatre of the Conservatoire. This programme, which produced a very deep impression, was as follows:

- (1) Eroica Symphony, Beethoven.
- (2) Duet from 'Semiramide,' Rossini, sung by Nélia and Caroline Maillard.
- (3) Horn Solo, composed and executed by Melfred.
- (4) Concerto for violin, Rode, performed by Eugène Sauzey.
- (5) Air by Rossini, sung by Nélia Maillard.
- (6) Chorus from 'Blanche de Provence,' Cherubini.
- (7) Overture, 'Les Abencérages,' Cherubini.
- (8) Kyrie and Gloria from the 'Coronation Mass,' Cherubini.

The following table shows the direction of these famous concerts from their inception to the present day:

Conductor.	Sub-Conductor.	Date.
Habeneck	Tilmant <i>ad id</i>	Mar. 9, 1828-Apr. 10, 1848
Narcisse Girard	"	Jan. 14, 1849-Jan. 1860
Tilmant	Deldevez	1860-63
G. Haln	"	1864-Mar. 17, 1872
Deldevez	Lamoureux	May 25, 1872-77
Jules Garcin	E. Altès	1877-85
Paul Taffanel	Jules Danbé	June 2, 1885-92
Georges Marty	Ed. Nadaud	Nov. 27, 1892-1901
A. Messager	Gaubert	June 12, 1901-8
Phll. Gaubert	Tracol	1908-18
		1919 (onwards)

During 1897-98 the Société des Concerts du Conservatoire gave its concerts provisionally at the Opéra, as the Commission supérieure des Théâtres ordered the hall in the rue Bergère to be shut after the disastrous fire at the Charity bazaar. Fourteen concerts were given at the Opéra, for which the orchestra was augmented to ninety-eight performers. From the date of the resumption of the concerts in the original building (Nov. 27, 1898) the former number of performers (84) was restored; and the Commission des Théâtres ordered a certain number of seats to be removed, so that the number of concerts had to be increased to make up for the diminution in the receipts.

Minor institutions of some historic importance may be summarised as follows:

ORCHESTRAL CONCERTS

L'ATHLÉTÈSE MUSICALE, founded by Chelard in 1829 at the Hôtel de Ville, directed by Barbereau, Vidal, Gérard, 60th to 66th concert in 1837. President, Onslow.

CONCERTS HISTORIQUES, founded by Fétis (4 concerts); 1st concert, Apr. 8, 1832; 4th, Apr. 2, 1833.

From 1832 onwards: CONCERTS MUBARD (rue

¹ Constant Pierre, *Le Conservatoire National de Musique et de Déclamation* (Paris, 1900).

Vivienne); CONCERTS BESSÈLIÈRE; GYMNASSE MUSICAL, opened May 23, 1835, conductor, Tilmant *et al.*; performances of Berlioz's Harold (June); CONCERTS A. JULIEN (dance music), 1836-38; CONCERTS VALENTINO, 1837-1841; 1st concert, Oct. 15, 1837, and the first popular concert in France; CASINO PAGANINI; 1st concert, Dec. 3, 1837.

L'UNION MUSICALE, founded by Manera, pupil of Habeneck; conductors, F. David, H. Berlioz.

SOCIÉTÉ SAINTE-CÉCILE, 1840-54; conductor, Seghers. Performances of Gounod, Saint-Saëns, Reber, Mendelssohn, Schumann, etc.

SOCIÉTÉ PHILHARMONIQUE, founded by Berlioz, 1850-51.

THE SOCIÉTÉ DES JEUNES ARTISTES DU CONSERVATOIRE, founded by PASDELOUP (q.v.), 1851, transformed into Concerts Populaires de Musique Classique (Oct. 27, 1861), had a successful career until 1884, and exerted a great influence on the musical development of France.

THE SOCIÉTÉ DES CONCERTS DE CHANT CLASSIQUE, founded by D. Desullien in 1860, is still active.

SOCIÉTÉ DES COMPOSITEURS DE MUSIQUE founded by Weckerlin, 1862 (concerts of historical tendencies).

NOUVELLE SOCIÉTÉ STE. CÉCILE, by the same, 1865.

With the CONCERTS DU GRAND HOTEL founded by J. Danbé (1871-74), the modern history of orchestral concerts in Paris begins. The institutions set on foot in the later part of the 19th century may be summarised as follows:

L'HARMONIE SACRÉE, founded by Lamoureux, 1873; CONCERT NATIONAL, founded by Colonne and G. Hartmann, 1873, at the Odéon. This was transformed, Oct. 1874, to L'Association Artistique and later on to CONCERTS COLONNE (both at the Châtelet). Since 1910 the conductor has been G. Plerné. In 1897 a temporary new series of concerts was organised (see COLONNE).

NOUVEAUX CONCERTS, founded by Lamoureux in 1881, were afterwards known as CONCERTS LAMOREUX (see CHEVILLARD, LAMOREUX). These concerts were successively housed at: Château d'Eau, 1881-85, 1899-1900; Eden, 1885-87; Cirque des Champs-Élysées, 1887-98; Nouveau Théâtre, 1900-6; Théâtre Sarah Bernhardt, 1906-7; 1907 onwards, at Salle Gaveau.

Others were:

CONCERTS ÉLÉCTIQUES POPULAIRES, founded by ENG. d'Harcourt, 1892-95, resumed in 1900 as LES GRANDS ORATORIOS à L'ÉGLISE ST. KUSTACHE.

CONCERTS DE L'OPÉRA, founded by G. Marty and P. Vidal, 1895-97. Concerts de la Schola Cantorum (see SCHOLA, below).

CONCERTS SPIRITUELS DE LA SORBONNE, founded by P. de Saurières, 1898 (still active).

ASSOCIATION DES GRANDS CONCERTS CHARPENTIER (Victor), 1905 onwards.

ASSOCIATION DES CONCERTS PASDELOUP, as a continuation of the work which Pasdeloup had achieved at an earlier date as mentioned above, was founded in 1918 by Khénéd-Baton (also its conductor), and O. Sandberg. The first named with Albert Wolf was conducting this Society from 1925 onwards.

CHAMBER MUSIC AND CHORAL SOCIETIES

The first institution for the cultivation of stringed chamber music in Paris was the quartet founded by BAILLOT (q.v.), Dec. 12, 1814. It was not until the middle of the

century that societies of the kind began to be formed. The earliest were:

SOCIÉTÉ ALARD-FRANCHOMME, 1848.

SOCIÉTÉ DES DEUXIÈRES QUATUORS DE BEETHOVEN (Maurin-Chevillard), 1851.

SOCIÉTÉ DE MUSIQUE DE CHAMBRE ARMAINGAUD (E. Lalo, 2nd violin), 1856.

SEANCES POPULAIRES DE MUSIQUE DE CHAMBRE (Lamoureux), 1859.

SOCIÉTÉS: ARMINGAUD-JACQUARD; MAURIN-CHEVILLARD, 1861.

SOCIÉTÉ DES BEAUX ARTS, 1863-64, transformed into SOCIÉTÉ DE MUSIQUE DE CHAMBRE JACOBY-VULLAUME, 1864.

Institutions which have survived to later times include:

SOCIÉTÉ DANCLA, 'LA TROMPETTE', founded in 1860 by Emile Lemolne; present director, A. Bloch.

SOCIÉTÉ HAYDN-MOZART-BEETHOVEN, 1895 onwards.

SOCIÉTÉ PHILHARMONIQUE DE PARIS, 1902 onwards; present director, E. Rey.

QUARTETS: Gelooso, Loeb, Touche, Hayot, Parent, Capet, Chailley, Poulet, etc.

CONCERTS ROUGE, 1889 onwards; present conductor, L. Loloq. **CONCERTS TOUCHE**, conductor F. Touche, both of popular character.

The development of trio-societies was parallel to the preceding movement. It began (1827-1830) with the brothers Bohrer: Beethoven's trios. In Jan.-Feb. 1837 were given four performances of the same by Liszt, Urhan, Batta; 1840, by the brothers Franco Mendez, etc. In 1865, Société des Trios Anciens et Modernes, V. de la Nux (pianist), was started, and the Société Saint-Saëns-Sarasate gave one concert (Feb. 7).

From the last quarter of the 19th century up to the present time, the number of these societies has increased with the extension of the practice of chamber music; the Cortot, Casadesus trios are noteworthy.

Music for wind instruments has been cultivated by the

SOCIÉTÉ DES INSTRUMENTS À VENT, founded 1879 by P. Taffanel (flute); original members were: Boullard (oboe); Grisez, Turban (clarinet); Espaignet, Bourdeau (bassoon); Garigue, Bremond (horn); Louis Diémer (piano). Members in 1927 are Gaubert, Le Roy; L. Bas, Morel; Périer, Gras; Letellier, Henon; Violet, Pénable; L. Wurmser (piano).

SOCIÉTÉ MODERNE D'INSTRUMENTS À VENT, founded 1895, by G. Barrère (flute); L. Aubert (piano), Foucault (oboe), Vionne (clarinet), Bulteau (bassoon), Servat (horn); from 1905 directed by L. Fleury till his death. Members in 1926: the preceding, Beauduin; Garès, Gaudard, Lamorlette; Cahuzac, Delacroix; Hermans, Dherin; Entraigue, Levassere.

Similar associations are: Duxtor à vent de la Société des Concerts du Conservatoire, Double quintette de Paris, Quintette instrumental de Paris.

The cult of ancient instruments and their music is furthered by the

SOCIÉTÉ DES INSTRUMENTS ANCIENS, founded 1895 by L. Diémer with VAN WAFFELGHEM (q.v.), L. Grillet, Bleuset (not active);

SOCIÉTÉ DES INSTRUMENTS ANCIENS, founded 1901 (onwards) by H. CASADESUS (q.v.); and SOCIÉTÉ 'VIOLES ET CLAVECINS,' founded by E. Macon (active).

The following associations of artists for professional purposes, etc., deserve mention:

- SOCIÉTÉ DES AUTEURS ET COMPOSITEURS DE MUSIQUE, founded 1829.
ASSOCIATION DES ARTISTES MUSICIENS, founded by Baron Taylor, 1843.
SOCIÉTÉ DES AUTEURS, COMPOSITEURS ET ÉDITEURS DE MUSIQUE, founded 1851.
SOCIÉTÉ DES COMPOSITEURS DE MUSIQUE.
SOCIÉTÉ DE L'HISTOIRE DU THÉÂTRE.
SOCIÉTÉ DE L'HISTOIRE DE L'ART, etc.

For full list of professional and syndical associations, see *Annuaire des artistes*.

Choral music, apart from the stage and the Church, held a comparatively subordinate position in Paris until the middle of the 19th century. It was furthered by the work of CHORON (q.v.) and his follower NIEDERMAYER (q.v.) and the 'Société des Concerts de Chant Classique,' founded by BEAULIEU (q.v.). The 'Société de Musique Vocale Religieuse et Classique,' which the Prince de la Moskowa founded in 1843, marked a revival of interest in the older choral art, and the important ORPHÉON (q.v.) movement of the mid-century brought a great popular extension of interest in choral (male-voiced) singing. The principal choral societies, most of which are now active, are here summarised.

SOCIÉTÉ CHORALE D'AMATEURS GUILLOT-SAINBRIIS (now Grisot-Sainbriis), founded 1865, by A. Guillot de Sainbriis, singing professor at the Paris Conservatoire. Conductors after him were Maton, Grisot, E. Millot.

SOCIÉTÉ BOURGAULT-DUCOUDRAY, 1869-74 (?). L'HARMONIE SACRÉE (q.v.).

CHANTEURS DE SAINT-GERVAIS, founded 1892 by Charles Bordes (conductor), followed by L. Saint Requier, afterwards P. Le Flem.

SOCIÉTÉ J. S. BACH, 1904-14, founded by G. Bret, followed by LES CONCERTS SPIRITUELS DE L'ÉGLISE DE L'ÉTOILE; has now resumed its original name (same conductor).

SOCIÉTÉ HANDEL, 1909-14, founded by E. Borrel, and F. Raugel.

LA MANÉCANTERIE DES PETITS CHANTEURS À LA CROIX DE BOIS, founded 1907 by Abbé Rebuffat (Church and Gregorian music), is still active. Similar societies are: La Cantoria (at Ste. Clotilde), conductor J. Meunier; Les Chanteurs de la Sainte Chapelle.

CHORALE UNIVERSITAIRE, founded 1918 by Mlle. Bonnet (University students); conductor, H. Expert, now E. Borrel.

CHŒUR MIXTE DE PARIS, founded 1921 by M. de Basse, also conductor.

CHORALE FRANÇAISE (not active), founded 1922 by Mme. Danner; conductors, F. Raugel and E. Siohan. L'ART CHORAL, founded and conducted by the last named.

Musical societies specially concerned with modern works are:

SOCIÉTÉ NATIONALE DE MUSIQUE, a permanent institution, founded Feb. 1871, by Romain Bussine, singing professor at the Conservatoire (1880-99), and

C. Saint-Saëns; it gives performances of works, chamber and orchestral, of modern and specially of living French composers. Its first concert was given on Nov. 25, 1871. On Jan. 22, 1927, it reached its 487th concert; 8 or 9 concerts are given annually.

SOCIÉTÉ MUSICALE INDÉPENDANTS (S.M.I.), founded 1910 (onwards), under presidency of G. Fauré, with an original committee: Ravel, Caplet, Schmitt, Roger-Ducasse, etc. It has the same aims as the preceding, but more performances of foreign composers.

L'ŒUVRE INÉDITE, founded 1920, has similar aims. CERCLE MUSICAL UNIVERSITAIRE, founded 1919 (onwards) by Chabé, president Ch. Guignebert, aims at developing the taste for music amongst university students.

SOCIÉTÉ FRANÇAISE DE MUSICOLOGIE, founded 1917 (onwards), by L. de La Laurencie, took the place of the French section of the INTERNATIONAL MUSICAL SOCIETY (q.v.) (1904-14). It published the *Bulletin de la Société Française de Musicologie* (10 numbers), followed by the *Revue de Musicologie* and an annex publication of rare musical works (*Publications de la Société Française de Musicologie*). (See PERIODICALS.)

EDUCATIONAL

The CONSERVATOIRE DE MUSIQUE (q.v.) stands at the head of specialist education in the art. Before the establishment of official musical teaching in France at the end of the 18th century, education was disseminated from the organists and the 'matrises' (precentorships) in the Cathedrals and Collegiate churches. A special singing school existed at the Opéra from 1672-1807.¹ In 1784 the 'École Royale de Chant et de Déclamation' was formed, and proved to be the ancestor of the Conservatoire (founded 1795).

Choron founded the 'Institution Royale de Musique Classique et Religieuse' (1817-30), and L. Niedermeyer followed this with the 'École de Musique Religieuse et Classique' in 1853, on similar lines. The latter is now known as ÉCOLE NIEDERMAYER. It trains singers, organists, composers and church musicians, basing the system primarily on the study of the older masters (16th, 17th, 18th centuries). It has had as directors: Niedermeyer, G. Lefèvre and H. Büsser (at the present time). Amongst its students have been Gabriel Fauré, A. Messager, E. Gigout, Claude Terrasse, A. Georges, etc.

Of far wider importance, however, is the SCOLA CANTORUM, founded in 1894 by Ch. Bordes, Al. Guilmant and V. d'Indy. It had as its original purpose the study of the Gregorian tradition of plain-song, and the revival of music of the Palestrinian era with the object of raising the standard of music in French churches. Transformed into an 'École de Chant Liturgique et de Musique Religieuse' (Oct. 1896), it was transferred from the original premises (rue Stanislas) to its present dwelling, the convent of the 'Bénédictins Anglais'² (rue St. Jacques 269), as an 'École Supérieure de Musique' (1900). Under its director, Vincent d'Indy, its aim has always been to produce artists and not merely

¹ See Constant Pierre, *L'École de chant à l'Opéra* (1896). Two early provincial schools of music deserve mention, that of Lille (1748) and one at Dijon (1752-96).

² The remains of James II. of England were deposited in this convent.

virtuosi. The educational staff (three degrees), is as follows:

Superior degrees: V. d'Indy, director of studies, composition from the beginning, orchestra playing; L. de Serres, general inspector of studies, entrusted with the choral, chamber-music, lyric declamation classes; Vienne (organ), Gastoué (plain-song), Lejeune (violin), G. de Lioncourt and P. Le Flem (counterpoint), etc.

Former professors there were: Guilmant, until his death, Bordes, M. Labey, Blanche Selva, A. Sérieyx, etc.

The concerts (monthly up to 1914; 2 or 3 a year at the present time), on historical lines, have had a certain influence on public taste, and increased its interest for old music. Programmes consisted of: J. S. Bach, Rameau, Gluck, Monteverdi, also Gregorian and polyphonic music, French school, of the 17th and 18th centuries; Haydn, Beethoven, Weber; modern French works (C. Franck, V. d'Indy (Chant de la Cloche), Chausson, P. de Bréville, Fauré, Debussy, etc.).

The affiliated provincial societies have greatly helped the cause of good music; the 'Bureau d'édition' connected with the school (founded 1896) has a large catalogue of organ and sacred music (ancient and modern), Bordes's 'Anthologie des matres religieux primitifs' (not the 'Archives de l'orgue'), collections including plain-song and popular songs (Le Chant populaire) (Concerts spirituels anciens), polyphonic music XII.-XV. centuries, dramatic music, etc., pedagogic works, musical literature, etc. The 'Édition mutuelle' is concerned with the production of contemporary composers, and the 'Tablettes de la Schola' act as a regular chronicle for the institution; associations of its professors and of the Schola's older pupils have been formed in recent years.

The INSTITUT GRÉGORIEN at the Institut Catholique is directed by J. Bonnet.

REEL.—R. DE CASTERA, *Des années d'action musicale religieuse*; V. d'INDY, *Une École de musique répondant aux besoins modernes* (extracts of the *Tréisme de St. Germain* (Bureau d'édition) existing separately).

Of the many existing schools in private hands the following are the chief:

ÉCOLE NORMALE DE MUSIQUE DE PARIS, founded 1919; director, A. Mangeot. President of the administrative committee, Alfred Cortot. Committee: Widor, Charpentier, H. Rabaud, H. de.

CONSERVATOIRE RAMEAU; director, F. Delgrange.

ÉCOLE SUPÉRIEURE DE MUSIQUE ET DE DÉCLAMATION; president, Widor.

CONSERVATOIRE MUSICA (foundation, X. Leroux); directors, Mme. Héglon, G. de Launay.

ÉCOLE DE PIANO LOUIS DIÉMER; director, Armand Ferté.

ÉCOLE DE CHANT CHORAL, director, H. Radiguer, mainspring of the 'Association pour le Développement du Chant Choral,' founded by J. d'Estournelle de Constant.

CONSERVATOIRE AMÉRICAIN ('École des hautes Études Musicales'), founded 1921, by M. Fragnaud and Francis Casadesu, at the Palace of Fontainebleau. Director general of studies, Ch. M. Widor. Directors: Casadesu, Max d'Ollone, Decreus. Summer courses only are held.

Concours and prizes of the Institut de

France (Académie des Beaux Arts—6 members for musical section) are as follows:

Prix de Rome (see article).

Prix Chartier (1881): chamber music.

Prix Crescent: comic opera, opera.

Prix Monbaine: comic opera.

Prix de Saussay: opera-libretto.

Prix Rossini: (1) lyrical or sacred composition; (2) poetry intended for music-setting.

Prix Nicolo: vocal composition.

Prix: Clamageran-Jilard, Fondation Pinetti: to winner of the second Grand Prix de Rome and pupils of French Academy, Rome (Villa Medici).

Prix: Jean Reynaud, Estrade-Deiros.

Prix: Bordin, Kastner-Boursault, Houlevigue, Charles Blanc, J. J. Weiss: (musical history and criticism).

Other prizes are:

Prix de la Ville de Paris (since 1877): symphonie or choral music. Principal awardees: Th. Dubois, V. d'Indy (Le Chant de la Cloche), J. Cés.

Concours de la Société des Compositeurs de Musique: symphonic, chamber music.

Prix: de la Société des Auteurs et Compositeurs Dramatiques; de la Société de l'Histoire du Théâtre, etc.

Concours Rubinstein (International). Specially bequeathed to the Conservatoire: 41 prizes and endowments: Georges Hainl, Henri Herz, Jules Garcin, Louis Diémer, A. Guilmant, etc.

Recent prizes (1920), composition: *Prix Verley, Blumenthal*.

(See M. Daubresse, *Le Musicien dans la société moderne* (Paris, 1914).)

The courses of the University of Paris are:

(1) History of Music: Lionel Dauriac, 1896-1903; Romain Rolland, 1903-1911 (replaced 1906-7 by L. Laloy); A. Pirro, 1911 (onwards). From 1920 a special course for 'musicology' is held by the last-named (Bibliothèque Pierre Aubry).

(2) Institut Phonétique de la Sorbonne: Dr. Marage, course on physiology of word and song.

LIBRARIES.—Exclusively musical and theatrical are the Bibliothèque du Conservatoire, de l'Opéra, de l'Opéra-Comique.

There are musical sections in the Bibliothèques Nationale, St. Geneviève, de l'Arsenal, Mazarine, de l'Institut.

Paris University (Sorbonne) contains the Bibliothèque Pierre Aubry bequeathed by its possessor, occupying a special room; also the musical library of A. Guilmant, bequeathed to the University Library. (See LIBRARIES.)

M. L. P. and J. G. P., incorporating material from G. C.

PARIS, AIMÉ, see CHEVÉ.

PARISH-ALVARS, ELIAS (b. Teignmouth, Feb. 28, 1808; d. Vienna, Jan. 25, 1849), was of Hebrew descent. He studied the harp under Dizi, Labarre and Bochs, and became one of the most distinguished performers on that instrument. He was also an excellent pianist. In 1831 he visited Germany, and performed at Bremen, Hamburg and other places, with great success. In 1834 he went to Upper Italy and gave concerts at Milan. In 1836 he went to Vienna, where he remained for two years, occasionally visiting London. The years 1838-1842 were occupied by a journey to the East,

where he collected many Eastern melodies; the *Voyage d'un harpiste en Orient* contains numerous specimens. He returned to Europe and gave concerts at Leipzig in 1842, and at Berlin, Frankfurt, Dresden and Prague in 1843. In 1844 he went to Naples, where he was received with enthusiasm. In 1846 he stayed some time at Leipzig, where his association with Mendelssohn produced a sensible improvement in his style of composition. In 1847 he settled at Vienna, where he was appointed chamber musician to the Emperor. His compositions consist of concertos for harp and orchestra, and numerous fantasias for harp and piano-forte, and harp alone. He was remarkable for his assiduity in seeking for new effects from his instrument, in some of which he anticipated Thalberg's most characteristic treatment.

W. H. H.

PARISINA. (1) opera in 3 acts; libretto (founded on Byron's poem) by Romani; music by Donizetti. Produced Pergola Theatre, Florence, Mar. 18, 1833; Théâtre des Italiens, Paris, Feb. 24, 1838; Her Majesty's Theatre, June 1, 1838.

(2) 'Overture to Lord Byron's Poem of Parisina,' for orchestra, by Sterndale Bennett (op. 3), in F# minor; composed in 1835, while Bennett was a student; performed Philharmonic, June 8, 1840.

G.

PARKE (1) **JOHN** (b. London, 1745; d. there, Aug. 2, 1829), studied the oboe under Simpson, and the theory of music under Baumgarten. In 1768 he was engaged as principal oboist at the Opera, and in 1771 succeeded the celebrated Fischer as concerto-player at Vauxhall, and became principal oboist at Drury Lane. In 1776 he appeared in the same capacity in the Lenten oratorios conducted by J. C. Smith and John Stanley, and soon afterwards at Ranelagh and Marylebone Gardens. He was appointed one of the King's band of music, and in 1783 chamber musician to the Prince of Wales. He was engaged at the Concert of Antient Music, and other principal concerts, and at all the provincial festivals, until his retirement in 1815. He composed many oboe concertos for his own performance, but never published them.

(2) **MARIA HESTER**, his daughter (b. London, 1775; d. Aug. 15, 1822), was instructed by him in singing and pianoforte-playing, and made her first appearance as a singer at the Gloucester Festival in 1790, and for about seven years afterwards sang at the principal London concerts and oratorios and the provincial festivals. She afterwards became Mrs. Beardmore, and retired from the musical profession, but distinguished herself by her attainments in science, languages and literature. Her husband survived her only four months. She composed several sets of pianoforte sonatas, some songs and a set of glees.

(3) **WILLIAM THOMAS**, younger brother of John (1) (b. London, 1762; d. there, Aug. 26, 1847), began the study of music under his brother in 1770. He subsequently studied under Dance, Burney (nephew of Dr. Burney), and Baumgarten. In 1775 he was a soprano chorister at Drury Lane, and in 1776 was engaged as viola-player at Vauxhall. In 1779 he appeared at Vauxhall as an oboist, and in 1783 was employed as principal oboist at Covent Garden. He was afterwards engaged at the Ladies' and the Professional Concerts, and in 1800 was appointed principal oboist and concerto player at Vauxhall, where he continued until 1821. He extended the compass of the oboe upwards to G in alt, a third higher than former players had reached. He composed several concertos for his instrument, the overtures to 'Netley Abbey' (1794), and 'Lock and Key' (1796), and numerous songs, glees, etc., for the theatre and Vauxhall. He retired in 1825, and in 1830 published *Musical Memoirs; comprising an Account of the General State of Music in England from 1781 to 1830*, 2 vols. 8vo, an amusing work, but of very little authority.

W. H. H.

PARKER, **HORATIO WILLIAM**, Mus.D. Cantab. (b. Auburndale, Mass., near Boston, Sept. 15, 1863; d. Cedarhurst, N.Y., Dec. 18, 1919), American church musician and composer.

His parents were Charles Edward Parker, an architect, and Isabella G. Jennings, daughter of a clergyman, a lady of both musical and literary gifts, which made her the teacher of her son and also in later years collaborator with him in some of his most important compositions. The ancestry of both parents was English, the American branches having emigrated to the American colonies before the middle of the 17th century. Love for music did not awaken in the future composer until his fourteenth year. The first lessons on the pianoforte and organ were imparted by his mother, but at 15 years he began composition of his own volition, in two days setting to music the fifty poems of Kate Greenaway's 'Under the Window.' At 16 he modestly began those labours on behalf of church music which he never suspended, though called to larger duties and dignities in other fields. His early activities were spent near Boston, and thither he now went for more advanced study. Stephen A. Emery became his master in harmony, John Orth in pianoforte-playing, and George W. Chadwick in composition.

In 1881 he went to Munich and entered the Hochschule für Musik, where he soon won the affectionate interest of Rheinberger, who perfected him in organ technique and laid the foundations for the broad and fluent counterpoint which characterises his compositions. After three years of study in Munich he returned to the United States and took up his

residence in New York, where, for eight years, after a brief term of service as musical instructor in the schools of St. Paul and St. Mary in Garden City, L.I., he performed the duties of organist and choirmaster, and during a part of the time taught counterpoint in the National Conservatory of Music, which was then under the direction of Antonín Dvořák, the stimulating influence of whose presence and example was keenly felt by the industrious young musician. In 1893, when this period was drawing to a close, he won one of a series of prizes offered by the Conservatory to stimulate composition in America, with a cantata entitled 'The Dream King and his Love'; but he was already spreading his pinions for a higher and wider flight. An invitation came to him from Boston to become organist and director of the music in Trinity Church. He accepted it, but before severing his connexions with New York put into the hands of his publishers the manuscript score of a work which was destined to carry his fame far beyond his native land. This was 'Hora Novissima,' an oratorio, the words chosen from Bernard de Morlaix's *Rhythm of the Celestial Country*, for which the composer's mother provided an English translation. 'Hora Novissima' was first performed on May 3, 1893, by the Church Choral Society (see NEW YORK), under the direction of the composer. It made its way to Boston, was given at the festivals in Cincinnati and Worcester, Mass., and in 1899 was the principal novelty at the Three Choirs Festival at Worcester (England), this being the first time that an American composition had been admitted to the schemes of these historical meetings. Dr. Parker conducted many of the rehearsals as well as the performance of his work, and established personally quite as amiable relations with the choristers as his music did with the critics and public. The choir presented him with a vase of Worcester ware on his birthday, and on the following Christmas sent to his home in New Haven, Conn., U.S.A., a pedestal to support it and a suitably inscribed plate. In 1900 'Hora Novissima' was performed at the Chester Festival under his direction, and he conducted a new work, 'A Wanderer's Psalm,' at the Hereford Festival. On June 10, 1902, being again in Europe, he went to Cambridge to receive the degree of Mus.D. from the University. In September he conducted the third part of his 'Legend of St. Christopher' at the Worcester Festival, and the entire work at the Bristol Festival in October. Almost simultaneously a cantata entitled 'A Star Song,' for which he had received the award of the PADEREWSKI FUND (q.v.) in 1901, was performed at the Norwich Festival, but the composer had to hurry home to his duties at Yale University, and could not stay to conduct the new work.

In the spring of 1894 Parker was appointed professor of music in Yale University (see DEGREES IN MUSIC: AMERICAN UNIVERSITIES), which conferred the degree of M.A. upon him in token of affiliation. He retained this post until his death. He was the second incumbent of the Chair of music which had been founded by Robbins Battell, a Yale alumnus. With the appointment of Parker the chair was lifted high in dignity, and the new incumbent at once began a series of movements which soon centred the musical activities of New Haven in the University. Orchestral concerts were given under its auspices, under the direction of the professor its protection was thrown around a reorganised choral society also conducted by him, and interest in music so greatly stimulated that before the end of the first decade of Dr. Parker's professorship the city could boast of Woolsey Hall, a superb concert building with a seating capacity of over 2000, to build which a gift of \$500,000 was received by the University on the occasion of its bi-centenary in 1901. For the bi-centennial celebration of the University Parker composed a Greek Ode for chorus and orchestra, to conduct which he came home from Germany where he was spending his first Sabbatical year. A portion of the summer of 1901 was spent in the composition of a 'Concerto for Organ and Orchestra with Harp,' which in the next musical season figured on the programmes of the Boston, Chicago and New Haven symphony concerts with the composer at the organ. In the same year Parker resigned his position at Trinity Church, Boston, and accepted a similar appointment in New York, which entailed less fatiguing travel, as being nearer the scene of his week-day labours. In later years his compositions included two excursions in the field of opera. Both won valuable prizes (\$10,000); the first, 'Mona,' won that offered by the Metropolitan Opera House, New York, and was produced there, Mar. 14, 1912; the second, 'Fairyland,' won the prize offered by the National Federation of Women's Clubs and was performed at Los Angeles, July 1, 1915. Following is a list of Parker's compositions with the dates of publication. There are but few of his writings remaining in manuscript, most of them the products of his study years in Munich, where they had performance at the students' concerts in the Hochschule. As a rule the date of publication indicates the order of composition though there are exceptions.

On.

1. 'The Shepherd Boy': ch. for men's voices. 1882.
2. Five Part songs for mixed voices. (MS.) 1882
3. Psalm XXXIII., for women's voices, organ and harp. (MS.) 1883.
4. Concert Overture, in E flat. (MS.) 1883.
5. Overture, in A major. (MS.) 1883.
6. 'The Ballad of a Knight and his Daughter.' Produced in Munich in 1884, published in 1891.
7. Symphony in C minor. Performed in Munich in 1885. (MS.)
8. 'King Trojan' for ch., soli, orch. and harp. First performance in Munich in 1885; published in 1886
9. Five pieces for PP. 1887.

- Op.
 10. Three Love Songs for Tenor. 1887.
 11. Quartet for Strings, in E major. Performed in Buffalo, Detroit, Cleveland, Boston, and elsewhere. (MS.)
 12. 'Venetian' Overture, in B flat. Performed in Munich in 1884. (MS.)
 13. Scherzo for orch. in G. Performed in Munich and New York, 1884 and 1886. (MS.)
 14. 'Blow, thou Winter Wind,' male ch. 1890.
 15. Idylle (Goethe); performed in Providence. 1891.
 16. 'Normannenzug' (The Ballad of the Normans); for ch.
 17. Four Pieces for the org. 1890.
 18. The Morning and Evening Service, together with the office for the Holy Communion, in E major. 1892.
 19. Four Pieces for the PF. 1890.
 20. Four Pieces for the org. 1891.
 21. 'The Koholis'; for ch. and orch. Performed at Springfield, and published in 1891.
 22. Three Sacred Songs. 1891.
 23. Six Lyrics for the PF. 1891.
 24. Six Songs. 1891.
 25. Two Love Songs. 1891.
 26. 'Harold Usaragar'; for ch. and orch. Performed in 1891 in New York and published the same year.
 27. Two Choruses for Women's Voices. 1891.
 28. Four Pieces for the organ. 1891.
 29. Six Songs. 1892.
 30. 'Hora Novissima'; an oratorio. (See above.) 1893.
 31. 'The Dream King and his Love'; a cantata. (See above.) 1893.
 32. Five Pieces for the org. 1893.
 33. Six Choruses for men's voices. 1893.
 34. Three Songs. 1893.
 35. Suite for Viol. PF, and v-cl. (MS.)
 36. Four Pieces for the organ. 1893.
 37. 'The Holy Child'; a cantata, for Christmas. 1893.
 38. Quintet in D minor for strings. (MS.)
 39. Four Choruses for Male Voices. 1893.
 40. 'Cabal Mor of the Wine-red Hand'; for baritone and orch.
 41. Suite for viol. and orch. 1895.
 42. Ode for Commencement. 1895.
 43. 'The Legend of St. Christopher'; an oratorio. (See above.) 1895.
 44. 'Adaptant Angelorum Chori'; motet for mixed voices & cappella. Prize Composition of the Musical Art Society, New York, 1899.
 45. 'A Northern Ballad'; for orch. Performed in Boston, Chicago and New York. (MS.)
 46. Six Old English Songs. 1899.
 47. Choruses for Male Voices. 1899.
 48. Three Pieces for the PF. 1899.
 49. 'A Wanderer's Psalm.' (See above.) 1900.
 50. Three Songs. 1900.
 51. 'Hymnos andron'; Greek Ode for the Celebration of the Bi-centenary of Yale University. 1901.
 52. 'A Star Song'; for ch. solo and orch. (See above.) 1901.
 53. Concerto for orch. and orch. 1902.
 54. Symphonic Poem. for orch. (MS.)
 55. Communion Service, in B flat. 1904.
 56. Three Settings of Medieval Hymns; for solo voice. 1905.
 57. Four Songs.
 58. 'Union and Liberty'; patriotic song with orch. Sung at the Inauguration of President Roosevelt. 1905.
 59. Ode for the Dedication of the Albright Art Gallery in Buffalo. 1905.
 60. 'Crepuscule,' mezzo sop. and orch.
 61. 'The Shepherd's Vision.'
 62. Ballad. 'King Gorm the Grim,' ch. and orch.
 63. Sonata in E flat for org.
 64. Songs for high-choir.
 65-68. Nine organ pieces.
 69. The Norsemen's Raid. Male ch. and orch.
 70. Swan Songs.
 71. Opera, 'Mona,' libretto by Brian Hooker.
 72. 'Collegiate' Overture.
 73. Cantata, 'A Song of the Times.'
 74. Seven 'Greek Pastoral Scenes,' women's voices, harp, oboe and strings.
 75. Ballad, 'The Leap of 'Rouhan Beg,' male voices and orch.
 76. Songs.
 77. Opera, 'Fairland,' libretto by Brian Hooker.
 78. Books of public school music.
 79. Oratorio, 'Mona and the Grail.'
 80. Masque, 'Cupid and Psyche' (for 50th anniversary Yale Art School, 1916).
 81. Music for Yale Glee Club (Oct. 1916).
 82. Cantata, 'The Dream of Mary,' soli, ch. and orch. (Norfolk Test, 1918).
 83. Red Cross Hymn, contralto and orch.
 84. 'A.D. 1919,' sop. and ch.

H. E. K.

PARLANDO, PARLANTE, 'speaking': (1) a direction in instrumental music allowing greater freedom in rendering than *cantando* or *cantabile*, and yet referring to the same kind of expression. It is generally used in the case of a few notes or bars only, and is often expressed by the signs — placed over single notes, and by a slur together with staccato dots over a group of notes. Sometimes, however, it is used of an entire movement, as in the 6th Bagatelle from Beethoven's op. 33, which is headed 'Allegretto quasi Andante. Con una certa

espressione parlante,' and in the second of Schumann's variations on the name 'Abegg,' op. 1, where the direction 'Basso parlando' stands at the beginning and refers to the whole variation.

M.

(2) A direction in vocal music to indicate that the tone of the voice must approximate to speech.

PARMA, NICOLA (b. Mantua, latter part of 16th cent.), was at Pavia, 1592; maestro di cappella of Novara Cathedral, 1611. He composed 2 books of madrigals, and 3 books of motets (1580, 1586, 1606), the 3rd book, 8-12 v., only known to Eitner (*Q.-L.*; *Fétis*).

PARRATT, SIR WALTER (b. Huddersfield, Feb. 10, 1841; d. Windsor, Mar. 27, 1924), organist. His father, Thomas Parratt (1793-1862), was organist of the parish church of Huddersfield from 1812 to his death, and at the head of his profession. The boy displayed much precocity, and was thoroughly grounded by his father at an early age. At 7 years old he took the service in church, and at the age of 10 he played on one occasion the whole of the forty-eight preludes and fugues of Bach by heart, without notice. He thus laid the foundation of that affectionate and intimate knowledge of Bach's music which afterwards distinguished him. His predilection for the organ was no doubt grounded on his father's example and on his familiarity with Conacher's organ factory, which he haunted when very young. At any rate he was an organist from the beginning. At 11 years of age he held his first appointment at Armitage Bridge Church. After a few months he was sent to the choir school of St. Peter's Chapel, Pimlico, where he officiated as organist, and became a pupil of George Cooper; but the school was unsatisfactory, and he was recalled to Huddersfield, and was organist of St. Paul's Church there, from 1854-61. In that year he received the appointment of organist to Lord Dudley, at Witley Court, Worcestershire. Here he had time and opportunity for study, of which he availed himself. His next step was to the parish church, Wigan in 1868; in 1872, when Stainer was appointed to St. Paul's Cathedral, Parratt succeeded him at Magdalen College, Oxford, and while there he held the organistship of St. Giles's, was choirmaster of Jesus and Trinity College chapels, conductor of the Exeter College Musical Society, the Trinity College Glee Club, and college societies at Jesus and Pembroke. He also conducted the Oxford Choral Society, and was a prominent member of the University Musical Club. In 1882 he was appointed to St. George's Chapel, Windsor, *vice* Sir G. Elvey, a post which he held till his death. In 1873 he had taken the degree of Mus.B. at Oxford, and in 1883 was chosen professor of the organ in the R.C.M., as well as conductor of the choral class. He was conductor of the Madrigal Society of Windsor

and of other choral organisations there, and 'Past Grand Organist' of the Freemasons. In 1892 he received the honour of knighthood, and in 1893 was appointed 'Master of the Queen's Musick' and private organist to Her Majesty. He was also a Commander of the Victorian Order, and received the honorary degree of Mus.D. at Oxford in 1894 and at Cambridge in 1910. He succeeded Parry as Professor of Music at Oxford in 1908, resigning the office in 1918.

G., with addns.

Parratt's compositions were few and inconsiderable. They comprised music to the 'Agamemnon,' for performance at Oxford (1880) (see GREEK PLAYS, MUSIC TO), and for 'The Story of Orestes,' Prince's Hall, London, 1886, a contribution to 'Choral Songs . . . in honour of H.M. Queen Victoria' (1899), a series edited by him in imitation of the 'Triumphs of Oriana,' and a few church and organ pieces written for occasions. A man of fastidious tastes, quick wit and a caustic tongue, strong sympathies and antipathies, he made many lasting friendships and aroused some temporary enmities. He was a first-rate chess-player, and it was commonly said that he could play a fugue and direct the moves of more than one game of chess at the same time. His brain readily 'thought in parts,' a fact which made anything like smugness or untidiness in organ playing abhorrent to him. He became the champion of a style founded on accurate part-playing, clean phrasing and simple registration, and by his own example and forty years of teaching at the R.C.M. he revolutionised the performance of church organists throughout England and English-speaking countries. His devotion to Bach and to the contrapuntal interests of organ music earned him the reputation of a purist, and at one time he was regarded as the opponent of W. T. Best (q.v.), who was popularising the organ by his brilliant playing of arrangements from orchestral and other scores. The contrapuntal interests of Reger's music attracted Parratt when Reger's name was little known in England, and his inherent classicism never blinded him to new interests in the development of the art. His personal culture gained much from intimacy with Sir George Grove, with whom he travelled abroad on certain of his research expeditions. He was a valued contributor to this Dictionary and also wrote the chapter on music in Humphrey Ward's *Reign of Queen Victoria* (1887). Grove wrote of him here, 'He is a very hard worker, and the delight of his colleagues, friends and pupils,' words which remained true to the end.

O.

PARRY, SIR CHARLES HUBERT HASTINGS, Bart. (b. Bournemouth, Feb. 27, 1848; d. Knight's Croft, Rustington, Oct. 7, 1918), was the second son of Thomas Gambier Parry, of Highnam Court, near Gloucester, a highly

skilled amateur painter and patron of the arts, the inventor of a process of 'spirit fresco,' in which his own decorations of Highnam Church and parts of Ely and Worcester Cathedrals are preserved.

Hubert Parry was educated successively at Malvern, Twyford (near Winchester), Eton, and Exeter College, Oxford. We hear of his composing chants and hymn-tunes when he was about 8, but his first deep musical impression seems to have been received from Samuel Sebastian Wesley, while he was at school at Twyford. In 1861, when he went to Eton, his musical proclivities made themselves felt at once, and he became famous in the school as a baritone singer, a pianist and a composer of songs, etc. In 1867, just before leaving Eton for Oxford, he took the Mus.B. degree at the latter university, and his exercise, a setting of 'O Lord, Thou hast cast us out,' was performed at Eton, and published. At Oxford studies and sports took the first place, and music was rather neglected for a time, excepting in occasional performances, and in the founding of the Oxford University Musical Club (see LLOYD, C. H.; OXFORD). He took the B.A. degree in 1870, but before this he had taken composition lessons from Sterndale Bennett and G. A. Macfarren, besides going to Stuttgart for one long vacation to study with Henry Hugo Pierson. After leaving Oxford he was in Lloyd's for about three years, but at the end of that time music was too strong for him, and thenceforward he devoted himself exclusively to the art.

In these early years in London the friendship, counsel and instruction of Edward Dannreuther were of the utmost benefit to him, and it was at the semi-private music-meetings at Dannreuther's house in Orme Square that all Parry's chamber music was played almost as soon as it was written. The fortunate subscribers to these concerts little knew how unique was the privilege they enjoyed, for in many cases Parry's MS. works were mislaid, and, in some instances, inadvertently destroyed, in the following years. In 1877 Parry, while on a visit to Cannes, gave a series of chamber concerts there with Edoardo Guerini the violinist, and among other things his suite for the two instruments (probably the 'Partita') was played. In 1879 a private concert of Parry's works was given at the house of the Right Hon. A. J. Balfour, when in addition to some of the works already performed at Dannreuther's house, we hear of a fantasia-sonata in one movement for piano and violin, and a set of pianoforte variations on a theme of Bach; and in the same year an overture, 'Guillem de Cabestanh,' was played at the Crystal Palace. As long before as 1868 an 'Intermezzo religioso' for strings had been produced at the Gloucester Festival.

It was in 1880 that Parry's name first came before the world at large. Dannreuther played his pianoforte concerto in F sharp minor at the Crystal Palace, and in the autumn his first important choral work, the 'Scenes from Prometheus Unbound,' was given at the Gloucester Festival. It was not a success, but it is not the less interesting on that account; it undoubtedly marks an epoch in the history of English music, and the type of composition of which it was the first specimen has had great consequences in the development of our national art. The dramatic monologue of Prometheus had a new note of sincerity in it; besides the wonderful faithfulness of accentuation, in which Parry has always been unrivalled among modern composers, there is a wealth of noble melodic ideas, such as the theme of Jupiter's song, 'Pour forth heaven's wine,' and the lovely passage for unaccompanied quartet, 'Our feet now, every palm,' while the final climax, 'To an ocean of splendour,' is now realised as a prophecy of that power of culminating effect which has been so finely shown over and over again by the composer. For the following Gloucester Festival Shirley's ode, 'The Glories of our Blood and State,' was set for chorus and orchestra, and the conviction that a new composer had arisen to revive the art of choral writing gradually grew, until the fullest confirmation was given in the famous 'Blest Pair of Sirens,' first performed by the Bach Choir in 1887. After that time Parry's choral works succeeded one another at the great festivals with most welcome regularity.

His instrumental compositions, meanwhile, were a good deal longer in gaining wide recognition; the orchestral works were considered obscure, a circumstance due to their extreme conciseness and the elaborate development of the themes. The first symphony was given in 1882, the second, in F, in the following year, the third and fourth in 1889, and the fifth in B minor in 1912. As in his orchestral writing Parry always laid more stress on the substance of the ideas and development than on the manner of their presentment, it was sometimes considered that he did not excel in orchestration; but such things as the third and fourth symphonies, or the 'Characteristic Variations' (1897), must always appeal strongly to the cultivated musician.

In the choral works, from 'Blest Pair of Sirens' onwards, there is apparent the same mastery of accentuation that was noticed in his songs; besides this, the composer shows a wonderful power of handling large masses with the utmost breadth and simplicity of effect, and of using the voices of the choir in obtaining climax after climax, until an overwhelming impression is created. This is the secret of Parry's power over the musical people of his

time, and it is a power that is felt not only by the educated hearer, but even by the untrained listener. Without the smallest trace of the actual influence of Handel, there is a grandeur which is commonly called 'Handelian' about many of Parry's choruses, and in one work after another he touches a point which can only be called sublime. The more delicate side of his choral writing is beautifully shown in the various partsongs which came out in 1897, and several of these are among the most expressive and tender things in music. 'Since thou, O fondest and truest,' 'There rolls the deep,' and 'Music, when soft voices die,' have never been surpassed in pathetic quality, and in perfect command of simple resources the whole series is most remarkable. The strong vein of humour which his friends knew so well has appeared in his music on many occasions; in the music to the comedies of Aristophanes (see GREEK PLAYS, MUSIC TO), both wit and humour are strongly apparent throughout, and his way of weaving in themes from well-known works, and of imitating various styles, makes these works unique in music. In 'The Pied Piper,' too, his music fits the humorous parts of Browning's poem no less perfectly than the picturesque or narrative passages.

A large number of unison songs for children appeared from time to time during the composer's life, and one such unison song, set to words from Blake's *Milton*, obtained a great popular and even national success during and after the war under the title of 'Jerusalem.'¹ Like some other of the greatest masters of music, Parry was at his best at the end of his life. Nearly all the music of his latest years is suggested by words of a lofty seriousness, and a large proportion of his last works are religious in character. Whether or no this represents a process of spiritual development, it is certain that none of his earlier music exceeds the motets in pregnant beauty of choral writing or in sublimity of musical ideas, while his hymn-tune preludes have a deep spiritual beauty that looks straight back to Bach, though they are strongly individual and most characteristic.

In 1883 Parry was appointed Choragus of the University of Oxford, and in 1900 succeeded Sir John Stainer as Professor of Music, a post he resigned in 1908; in 1894 he was appointed Director of the Royal College of Music, in succession to Sir George Grove, a post to which he devoted his best energies right up to the time of his death (see ROYAL COLLEGE OF MUSIC). In 1898 he received the honour of knighthood; at the Coronation of King Edward VII. in 1903 he was created a baronet. In 1883 he was given the honorary degree of Mus.D. at Cambridge, and in 1884,

¹ This was sung at the Leeds Festival, 1922, with the accompaniment orchestrated for the occasion by Elgar.

the same degree at Oxford. A similar degree followed at Dublin in 1891, in which year he was appointed Examiner of Music in the London University. He received the honorary degree of D.C.L. from the University of Durham in 1894. It would be impossible to give a list of all the musical societies of which Parry was president; his geniality of disposition, remarkable powers of organisation, strong common sense, and the purity of his artistic ideals made him the most powerful influence in English music, even apart from his own creations, which mark him as the most important figure in English art since the time of Purcell.

In literary¹ work he did much that is memorable; besides some early poems in *Macmillan's Magazine* for May 1875, he wrote and arranged the words for his own 'Judith,' 'War and Peace' and 'A Vision of Life' (1907); his contributions to this Dictionary are among the most valuable things in the first edition; his *Studies of the Great Composers* (1886) is full of useful information conveyed in a terse style very different from that of the average writer on music at the time of its publication; his best work as an historian of the art is undoubtedly contained in *The Art of Music* (1893), enlarged and republished in 1896 as *The Evolution of the Art of Music, The Seventeenth Century*, vol. iii. of *The Oxford History of*

¹ An extensive manuscript with the title *Instinct and Character* was left unpublished by Parry at his death. It has not been published, but typescript copies have been deposited by the executors in the British Museum, the Bodleian and the R.C.M.

Music, and *Johann Sebastian Bach, the study of a great personality* (1909). In these the established facts of history are put in a suggestive new light, and the conclusions based on research of all kinds are full of value. His *Summary of Musical History*, a valuable textbook for students, is among Novello's music primers. His masterly *Style in Musical Art* was published in 1911, and after his death a small volume of the addresses to students with which he was accustomed to begin each term at the R.C.M. was published (Macmillan), with the title *College Addresses*.

Parry died at Knight's Croft, Rustington, Oct. 7, 1918, was cremated, and his ashes placed in the crypt of St. Paul's Cathedral after a memorable service at which his motet 'There is an old belief' (one of the 'Six Songs of Farewell,' 1916) and some of his chorale preludes for organ were performed. A memorial tablet was placed by public subscription at the west end of Gloucester Cathedral (1922). It contains verses written for the purpose by the Poet Laureate, Robert Bridges. M.

224	Five miniatures for P.F.: 1. Sleepy. 2. Little Christmas Piece (see 115). 3. Capriccio. 4. Pause. 5. Envol.	..	Curwen, 1926.

PARRY, JOHN (*d.* Ruabon, North Wales, Oct. 7, 1782), was domestic harpist to Sir Watkin Williams Wynne, of Wynnastay. One of his earliest public performances was in Dublin, where he gave a concert on Dec. 21, 1736.¹ He came and played in 1746 in London, where his playing is said to have been admired by Handel, and he also played at Cambridge before Gray, thereby inciting him to the com-

pletion of his poem, 'The Bard.' In 1742 he put forth the earliest published collection (only one part published) of Welsh melodies, under the title of 'Antient British Music of the Cambro-Britons.' He afterwards published (undated) 'A Collection of Welsh, English and Scotch Airs; also Lessons for the Harpsichord'; and, in 1781, 'Cambrian Harmony; a Collection of Antient Welsh Airs, the traditional remains of those sung by the Bards of

¹ Information from J. H. C. P.

Wales.' Though totally blind, he is reported to have been an excellent draught-player. (See WELSH MUSIC.) W. H. H.

PARRY, (1) JOHN (b. Denbigh, North Wales, Feb. 18, 1776; d. Apr. 8, 1851), received his earliest musical instruction from a dancing-master, who taught him also to play the clarinet. In 1795 he joined the band of the Denbighshire militia, and in 1797 became master of it. In 1807 he resigned his appointment, and settled in London as a teacher of the flageolet, then greatly in vogue. In 1809 he was engaged to compose songs, etc., for Vauxhall Gardens, which he continued to do for several years afterwards, and also adapted English words to a selection of Welsh melodies. He composed the music for T. Dibdin's *extravaganza*, 'Harlequin Hoax; or, A Pantomime proposed,' 1814; 'Oberon's Oath,' 1816; 'High Notions, or A Trip to Exmouth,' 1817; and adapted the music for 'Ivanhoe,' 1820; and 'Caswallon,' a tragedy, 1829. He was author as well as composer of the musical pieces, 'Fair Cheating,' 1814; 'Helpless Animals,' 1818; 'Two Wives, or, A Hint to Husbands,' 1821; and 'The Sham Prince,' 1836. He conducted the Cymmrodorion and Eisteddfodau, or Congresses of Welsh Bards, at Wrexham in 1820 and at Brecon in 1822, and in 1821 he received the degree of 'Bardd Alaw,' or Master of Song. He was one of the promoters of the Cambrian Society. He was author of *An Account of the Rise and Progress of the Harp; An Account of the Royal Musical Festival held in Westminster Abbey in 1834* (of which he had been secretary); and *ll Puntello, or, The Supporter*, containing the first rudiments of music. In June 1837 he gave a farewell concert, at which he sang his own ballad of 'Jenny Jones' (made popular by Charles Mathews the year before), accompanied on the harp by his son. From 1834-48 he was concert music critic to the *Morning Post*. He published several collections of Welsh Melodies, the most important embodying the greater part of Jones's 'Relics of the Welsh Bards,' under the title of 'The Welsh Harp' (1839-48). From 1831 to Aug. 5, 1849, he was treasurer of the Royal Society of Musicians.

His son, (2) JOHN ORLANDO (b. London, Jan. 3, 1810; d. East Molesey, Feb. 20, 1879), studied the harp under Bochesa, and in May 1825 appeared (as Master Parry) as a performer on that instrument. He also became an excellent pianist. In 1830 he sang 'Arm, Arm, ye brave,' at Franz Cramer's concert, and subsequently had much success as a baritone singer, chiefly of ballads accompanied by himself on the harp. Neukomm's once famous song, 'Napoleon's Midnight Review,' was written for him; and in 1833 he went to Italy, living for some time at Naples, and learning from Lablache, with whom he appeared as Desdemona in a burlesque of 'Othello.' At his benefit con-

cert in June 1836 he gave the first public indication in England of the possession of that extraordinary *vis comica* by which he was afterwards so remarkably distinguished, by joining Madame Malibran in Mazzinghi's duet, 'When a little farm we keep,' and introducing an admirable imitation of Harley. Later in the same year he appeared upon the stage at the St. James's Theatre in his father's 'Sham Prince,' in Hullah's 'Village Coquettes' and other pieces. In the following year he gave his 'Buffo Trio Italiano' (accompanied by himself on the pianoforte), in which he successfully imitated Grisi, Ivanoff and Lablache. In 1840 he introduced 'Wanted, a Governess' (words by George Dubourg), the success of which induced him to abandon serious, and devote himself wholly to comic singing. The songs he selected differed materially from those of the immediately preceding generation in the absence of coarseness or vulgarity, and were consequently most favourably received. They comprised, among others, 'Wanted, a Wife,' 'Berlin Wool,' 'Blue Beard,' 'Matrimony,' 'Fayre Rosamonde' and 'The London Season'; the words being mostly by Albert Smith and the music arranged by Parry himself. Many of his songs, glees, etc., were published. (See D.N.B.) In 1849 he gave up concert-singing and produced an entertainment, 'Notes, Vocal and Instrumental,' written by Albert Smith, in which he exhibited a number of large water-colour paintings executed by himself, and which was very successful. He gave similar entertainments in 1850 and 1852. In 1853 ill health compelled him to retire from public performance, and he became organist of St. Jude's, Southsea, and practised as a teacher. In 1860 he again appeared in public at the German Reed's entertainments, but in 1869 ill health again necessitated his retirement. He took final leave of the public at a performance for his benefit at the Gaiety Theatre, Feb. 7, 1877. W. H. H.

PARRY, (1) JOSEPH, Mus.D. (b. Merthyr Tydvil, May 21, 1841; d. Penarth, Feb. 17, 1903), composer, who enriched Welsh hymnody with a number of fine tunes, came of poor Welsh parents, the mother a superior woman with much music in her nature. There is a great deal of singing and brass-band-playing among the Welsh workmen, and at chapel and elsewhere the boy soon picked up enough to show that he had a real talent. At 10, however, he was forced to go to the puddling furnaces and to stop all education of any kind. In 1853 his father emigrated to the United States, and in 1854 the family followed him. After a few years Joseph returned from America, and then received some instruction in music from John Abel Jones of Merthyr and John Price of Rhymney. In 1862 he won prizes at the Llanudno Eisteddfod. He then went again to

1 See 'Aberystwyth' *English Hymnal*, No. 87.

America, and during his absence there a prize was adjudged to him at the Swansea Eisteddfod of 1863, for a harmonised hymn tune.

Its excellence roused the attention of Brinley Richards, one of the musical adjudicators of the meeting, and at his instance a fund was raised for enabling Parry to return to England and enter the R.A.M. The appeal was well responded to by Welshmen here and in the States, and in Sept. 1868 he entered the Academy and studied under Sterndale Bennett, Garcia and Steggall. He took a bronze medal in 1870 and a silver one in 1871, and an overture of his to 'The Prodigal Son' (Mab Afraidlon) was played at the Academy in 1871. He was appointed professor of music at the University College, Aberystwyth, and soon after took his Mus.B. degree at Cambridge, proceeding, in May 1878, to that of Mus.D. at the same university. In 1888 he was appointed to the musical lectureship of the University College of South Wales, Cardiff; and in 1896 at the Llandudno Eisteddfod was presented with a cheque for £600 for services rendered to Welsh music. His works include:

The oratorios, 'Emmanuel' (London, 1880), 'Saul of Tarsus' (Rhyd and Cardiff, 1892); 'The Prodigal Son' and 'Nebuchadnezzar'; 'Cantata', a cantata performed at Llandudno in 1896. His operas are 'Blodwen', produced at Aberystwyth in 1878, and at the Alexandra Palace, 'Virginia', 1883, 'Arianwen' (Cardiff, 1890); 'Sylvia' (Cardiff, 1890); 'King Arthur', completed 1897. Many choral works, an orchestral ballad (Cardiff, 1892), overtures, a string quartet, etc., are among his compositions, and he edited six vols. of Cambrian Minstrelsy.

G.; addns. *Brit. Mus. Biog.*

His son, (2) JOSEPH HAYDN (b. Pennsylvania, U.S.A., May 1864; d. Hampstead, Mar. 29, 1894), studied mainly under the parental guidance. In 1884 he gained a prize for a pianoforte sonata. In 1890 he was appointed a professor at the G.S.M.; he wrote a successful cantata for female voices, 'Gwen'; a comic opera, 'Cigarette,' was produced at Cardiff in 1892; 'Miami,' a more ambitious work, set to an adaptation of 'The Green Bushes,' came out at the Princess's Theatre, London, Oct. 16, 1893; and a third, 'Marigold Farm,' was finished but never produced. M.

PARSIFAL, a 'Bühnenweihfestspiel' (or 'dedicatory stage-play') in 3 acts; words and music by Wagner. The poem was published in 1877, and the music completed in 1879. The first performance, for subscribers, took place at Bayreuth, July 26, 1882, and the first public performance, July 30. For twenty-one years the stage representation of the work took place only at Bayreuth, but the bulk of the music was heard under Barnby at the Albert Hall, London, Nov. 10, 1884. On Dec. 24, 1903, the first complete performance outside the original theatre took place in the Metropolitan Opera House, New York; and in English, Tremont Theatre, Boston, Oct. 17, 1904. On June 20, 1905, the Wagner-Verein of Amsterdam gave a performance in that city. It was first heard on the stage in England at Covent Garden, Feb. 2, 1914; Paris, Opéra, Jan. 1, 1914; and in English, Covent Garden (Beecham), Nov. 17, 1919. M.

PARSLEY (PARSELEY, PERSLEY, PARCHEL, etc.), OSBERT (b. 1511; d. 1585), singing-man of Norwich Cathedral and composer of church music. He is referred to and quoted in Morley's *Plaine and Easie Introduction* (1597). The extracts below, taken from an inscription on his monument in the north aisle of Norwich Cathedral, give all that is known of Parsley's biography:

OSBERTO PARSELEY

Musicae Scientissimo

Et quondam Consociati

Musici posuerunt. Anno 1585.

Here lies the man whose Name in splight of Death,
Renowned lives by Blast of Golden Fame,
Whose Harmony survives his vital Breath,
Whose Skill no Fride did spot, whose Life no Blame.

.....

Whose Life in Seventy and Four Years entwain'd.

.....

Who here a Singing-man did spend his Days,
Full Fifty Years, in our Church melody.
His Memory shines bright whom thus we praise.

The British Museum contains the following arrangements of motets by Parsley: 'Spease noster' [sic], arranged for 5 viols (B.M. Add. MSS. 31,390/120); arrangements, in Italian tablature, of 3 others, 'Conserva me,' 'Multiplicati,' 'Benedicam Domino' (B.M. Add. MSS. 29,246-7). B.M. Add. MSS. 30,480-4 also contains a composition for 5 voices called 'Peralis clocke.'

SERVICES, Etc.

Short Service (T.D.: B.). PH.

J. M^c.

PARSONS, (1) ROBERT (d. Newark, Jan. 25, 1569/70), a native of Exeter, was on Oct. 17, 1563, sworn a gentleman of the Chapel Royal. He is said, but erroneously, to have been organist of Westminster Abbey. He composed some church music. A Morning, Communion and Evening Service is printed in Barnard's 'Selected Church Musick,' and a Burial Service in Low's 'Directions,' 1664. An anthem, 'Deliver me,' is contained in the Tudway Collection (Harl. MS. 7339), and an 'In Nomine' and a madrigal, 'Enforced by love and feare,' are in B.M. Add. MSS. 11,586. Various 'In Nomines,' etc., are in Add. MSS. 22,597, 29,246, 31,390, 32,377 and 30,380/84; one in the Fitzwilliam Museum at Cambridge (published in the 'Fitzwilliam Virginal Book,' ii. 135) is probably by him. Three services (the third printed in Barnard), an anthem, 'Ah, helpless wretch,' a motet, 'Anima Christi,' and pieces for viols are in Barnard's MS. collections in the R.C.M. Many of his compositions, including partbooks of 'Pandolpho,' a song from a stage play, are in the library of Christ Church, Oxford. He was drowned in the Trent at Newark. His scientific skill and feeling for curious effects of harmony make him an important figure in English music.

(2) JOHN (*d.* 1623), probably his son, was in 1616 appointed one of the parish clerks and also organist of St. Margaret's, Westminster. On Dec. 7, 1621, he was appointed organist and master of the choristers of Westminster Abbey. A score of his Burial Service, in the hand of Henry Purcell, is in the library of St. Michael's College, Tenbury (MS. 787). It is bound in black covers, and was probably the copy used by Purcell at the funeral of Charles II. at Westminster Abbey, when Parsons's service was certainly performed. The irregular barring is a noteworthy feature of this score. A MS. of his service is also at the R.C.M. Parsons was buried, Aug. 3, in the cloisters of Westminster. A quaint epitaph on him, preserved in Camden's *Remains*, is reprinted in the *D.N.B.* See also *Mus. ant.* i. 38.

W. H. H.; addns. E. H. F. and *D.N.B.*

PART. (1) The single line of music from which the instrumental or vocal performer reads, and also the music itself; so that 'he reads his part from a part' is a phrase readily understood by musicians, as indicating that nothing in the shape of a score is used by the individual referred to. (2) This sense of the word is transferred to music for keyboard instruments written in contrapuntal style. Hence a fugue for piano or organ may be described as written in 2, 3, 4 or more parts or voices. (See **PART-PLAYING**.)

(3) The division of large works, the equivalent of 'act' in theatrical music; oratorios, cantatas, etc., are divided into so many 'parts' or great sections, after any of which a pause might appropriately be made. M.; addns. c.

PARTBOOKS. The polyphonic composers of the 15th and 16th centuries usually issued their works in separate parts, and generally in separate volumes.

Of these partbooks the greater number may be divided into three distinct classes.

In the first class—that of the true representative partbook—each vocal part was transcribed or printed in a separate volume.

In the second class, the parts were indeed transcribed or printed separately—but in the form called in early times *cantus lateralis*, i.e. side by side and one above the other, in such a manner that the whole number of parts could be seen at one view on the double pages of the open book, and that all the performers could sing at once from a single copy of the work.

In the third class, the plan employed was that known in Germany as *Tafel-Musik*; the parts being arranged side-ways and upside-down so that four performers, seated at the four sides of the little table on which the open book was placed, could each read his own part the right way upwards.

The most famous, and, with one exception only, by far the most perfect and beautiful specimens of the first class are those published,

at Venice and Fossombrone, at the beginning of the 16th century, by Ottaviano dei Petrucci, the inventor of the art of printing music from movable types. Of these now exceedingly rare and costly partbooks, more than fifty volumes have been catalogued, since the time of Conrad Gesner, who, however, in his 'Pandecta' mentions some few which cannot now be identified. The perfection of their typography would have rendered them precious to collectors, even without reference to the value of the compositions, which, but for them, would have been utterly lost to us.¹ Each part is printed in a separate volume, oblong 4to, without a title-page at the beginning, but with a colophon on the last page of the bassus, recording the date and place of publication. In one instance only has the brilliance and clearness of the typography been surpassed. The British Museum possesses the unique bassus part of a collection of songs, printed by Wynkyn de Worde in 1530, which exceeds in beauty everything that has ever been produced, in the form of music-printing from movable types, from the time of its invention by Petrucci until now. The volume² is an oblong 4to, corresponding very nearly in size with those of Petrucci; but the staves are much broader, and the type larger, the perfection of both being such as could only be rivalled at the present day by the finest steel engraving. The volume contains nine songs a4, and eleven a3, by Fayrfax, Taverner, Cornyshe, Pygott, Ashwell, Cowper, Gwynneth and Jones; and at the end of the book is the first leaf of the Triplex, containing the title and index only. This, unhappily, is all that has hitherto been discovered of the work.

Petrucci's successors were as far as those of Wynkyn de Worde from approaching the excellence of the leader—and even farther. The separate parts of Palestrina's masses and the madrigals of Luca Marenzio, printed at Venice in the closing years of the 16th century, though artistic in design, and in bold and legible type, are greatly inferior in execution to the early examples; and the motets of Giovanni Croce published by Giacomo Vincenti (Venice, 1605) are very rough indeed. The nearest approach to the style of Petrucci is to be found in the earlier works printed in London by John Day; the 'Cantiones sacrae' of Tallis and Byrd, printed by Thomas Vautrollier (London, 1575); and the earlier works published by Thomas East, under the patent of William Byrd, such as Byrd's 'Psalmes, Sonets and Songes of Sadnes and Pietie' (1588) and his 'Songs of sundrie natures' (1589). But East's later productions, including the second book of Yonge's 'Musica Transalpina' (1597), and the works of the

¹ Facsimiles will be found in *Ottaviano dei Petrucci da Fossombrone* by Anton Schmid (Vienna, 1848), and *Ottaviano dei Petrucci da Fossombrone*, by Augusto Vernarecci (2nd edit. Bologna, 1892). The student may also consult Catalani, *Bibliogr. di due stampe levate da Ottav. dei Petrucci* (Milan), and the Catalogue of Ritner.

² K. 1. a. 1.

later madrigalists, are far from equalling these, and little, if at all, superior to the later Italian partbooks.

The finest partbooks of the second class, presented in *cantus lateralis*, are the magnificent MS. volumes in the archives of the Sistine Chapel; huge folios, transcribed in notes of such gigantic size that the whole choir can read from a single copy, and adorned with illuminated borders and initial letters of exquisite beauty. In these, the upper half of the left-hand page is occupied by the cantus, and the lower half by the tenor; the upper half of the right-hand page by the altus, and the lower half by the bassus. When a quintus is needed half of it is written on the left-hand page below the tenor, and the remainder (*reliquum*) below the bassus, on the right-hand page. When six parts are needed, the quintus is written below the tenor, and the sextus below the bassus. Books of this kind seem to have been less frequently used in England than in Italy; unless, indeed, the MSS. were destroyed during the Civil War.¹

The finest printed examples of this class are the large folio edition of Palestrina's 'First Book of Masses' (Roma, apud heredes Aloysii Dorici, 1572) and the still finer edition of 'Hymni totius anni' (Roma, apud Jacobum Tornerium et Bernardinum Donangelum, 1589). A very beautiful example of this kind of partbook, on a small scale, will be found in Tallis's 'Eight Tunes,' printed by John Day at the end of Archbishop Parker's metrical translation of the Psalms (London, 1567); and one not very much inferior is Thomas East's 'Whole Booke of Psalmes' (London, 1592). Ravenscroft's 'Briefe Discourse' (1614), is a very rough example; and the 'Dodecachordon' of Glareanus (Basle, 1547), though so much earlier, is scarcely more satisfactory in point of typography.

The third class of partbooks, designed to be read from the four sides of a table, was more common in England than in any other country. One of the best-known examples is that given in the closing pages of Morley's *Plaine and Easie Introduction* (London, 1597 and 1606), in which the parts are presented in a rectangular arrangement, each part facing

outwards as the book is placed open on the table.

¹ A large folio MS. of this kind, containing a Mass by Philip de Monte, was lent to the Inventions Exhibition of 1885 by Miss Mivington, and another exceedingly fine specimen, containing a Gloria & B. written by Fayrfax for his degree of Mus. D., was lent to the same exhibition from the Lambeth Palace Library.

In Dowland's 'First Booke of Songs or Ayres,' a still more complicated arrangement is dictated by the necessity for accommodating a lutenist by the side of the cantus, the part for these two performers appearing on two parallel staves on the left-hand page, while the other three voices share the right-hand page.

W. S. R.

Much of the English church music of the 16th century has only survived in MS. partbooks, for scarcely any church music of that period was printed. Large numbers of these books perished in the 17th century, partly at the hands of religious fanatics, and partly because they began to be replaced by printed books and scores. Of the sets that survive only a very small proportion are complete; isolated and incomplete voice-parts are scattered about in various libraries throughout England, while some are in private hands. The most important collections of these books apart from those in such libraries as the B.M., the Bodleian and Cambridge Univ. Lib., are at the cathedrals of Durham, York and Ely, and in the libraries of St. Michael's, Tenbury, Ch. Ch., Oxford, and Peterhouse, Cambridge.

E. H. F.

PARTE, see COLLA PARTE.

PARTHENIA. The first music for the virginals printed from engraved plates in England. The title is

¹ Parthenia or The Maydenhead of the first musicks that euer was printed for the Virginals Composed by three famous Masters William Byrd, Dr. John Bull and Orlando Gibbons Gentlemen of his Majties most illustrious Chappell. Ingraven by William Hole.

The work consists of the following twenty-one pieces, all upon six-line staves, and engraved upon copper-plates, being the first musical work so produced.

Preludium.	W. Byrd.	Gallardo; St. Thos. Wake.
Pavane; Sir W. Petre.		Pavane.
Gallardo.		Gallardo.
Preludium.		Gallardo.
Gallardo; Mrs. Mary Browne.		
Pavane; The Earl of Salisbury.		O. Gibbons.
Gallardo.		Gallardo.
Gallardo, 2 do.; Mrs. Mary Browne.		Fantasia of foure parts.
Dr. Bull.		The Lord of Salisbury his Pavin.
Preludium.		Gallardo.
Pavane; St. Thos. Wake.		The Queensse's command.
		Preludium.

It first appeared in 1611. On the title is a three-quarter-length representation of a lady playing upon the virginals. Commendatory verses by Hugh Holland and George Chapman are prefixed. It was reprinted in 1613 with a dedication to the Elector Palatine and Princess Elizabeth. Other impressions appeared in 1635, 1650, 1655, 1659 and probably 1689, the

1659 edition with a letterpress title bearing the imprint of John Playford. All these impressions were from the same plates. The work was reprinted by the Musical Antiquarian Society in 1847, under the editorship of Rimbault, with facsimiles of the title-page and a page of the music. W. H. H.

PARTHENIA INVIOLETA. A companion work to that described above; the full title is

'*Parthenia Inviolata* or Mayden-Musick for the Virginals and Base-Viol Selected out of the Compositions of the most famous in that Arte By Robert Holc And Consecrated to all true Lovers & Practitioners thereof.'

Eight lines of verse and a cut follow, and the imprint is:

* Printed at London for John Fypper, and are to be sold at his shoppe at Pauls gate next unto Cheshilde at the Crosse Keyes. *Omni privilegio.*

It is an oblong small quarto, engraved throughout on copper-plate. Collation: Title, verso blank; 'The Kinges Morisck,' 2 pp.; 'The Lordes Mask,' 1 p.; 'The Irish Dance,' 1 p.; 'New Noddie,' 2 pp.; 'Old Noddie,' 2 pp.; 'Ages youth,' 1 p.; 'The first part of the olde yeere,' 2 pp.; 'The last part of the olde yeere,' 1 p.; 'Miserere,' 2 pp.; 'Almaine,' 1 p.; Tune XI., 2 pp.; Tune XII., 1 p.; Tune XIII., 2 pp.; Tune XIII., 1 p.; 'Almaine,' 1 p.; 'Almaine,' 1 p.; Tune XVII., 1 p.; Tune XVIII., w. 2 pp.; Tune XIX., 1 p.; Tune XX., 1 p. The only known copy was bought at Dr. E. F. Rimbault's sale by Mr. Drexel, and is now in the New York Public Library. It was described in some detail in *Notes and Queries*, Dec. 11, 1869. M.

PARTIALS (Fr. *sans partiels*; Ger. *Partialtöne*, *Aliquotöne*). The members of the harmonic series (see ACOUSTICS) which form the constituents of a musical note are called the partials of the note. The constituents above the fundamental are often called the upper partials. The terms partials and harmonics are generally treated as having the same meaning, when referring to the separate tones which make up a complex note. J. W. C.

PARTICIPANT (from the Lat. *participare*, 'to share in'). One of the 'Regular Modulations' of the Ecclesiastical Modes. (See MODES, ECCLESIASTICAL, Vol. III. p. 482; MODULATIONS, REGULAR AND CONCEDED.)

PARTIMENTI, 'divisions'; exercises in florid counterpoint, written generally, but not always, on a figured bass, for the purpose of cultivating the art of accompanying or of playing at sight from a figured bass. M.

PARTITA (Ger. *Partie*). Though the Italian form of the name is the one in common use, it is said to have originated about the beginning of the 17th century with the Kunst- or Stadtpfeifers, or town musicians, and given by them to the collections of dance tunes which were played consecutively, and which afterwards were taken to form suites. Bach uses the name in two senses; first, as the equivalent of 'Suite' in the Six Partitas for Clavier; and

second, for three sets of Variations on Chorales for Organ, viz. those on 'Christ, der du bist der helle Tag' (7 Partitas, including the theme itself), on 'O Gott, du frommer Gott' (9 Partitas including the theme), and on 'Sey gegrüßet Jesu gütig' (11 Partitas or variations, exclusive of the theme itself). He also wrote three Partitas (in Suite-form) for the lute. The name has very seldom been used since Bach; the chief instance of its occurrence is in the original title of Beethoven's Octuor, 'Parthia in Es.' (See OCTET.) Parry's 'Partita' for violin and piano in D minor is a modern instance of the name. M.

PARTITION (Fr.), (Ger. *Partitur*), see SCORE.

PART-PLAYING is the art of playing polyphonic music on a keyboard instrument in such a way as to preserve the identities and characters of the several parts (see PART) by attention not only to the exact values of the notes but by phrasing in accordance with melodic contours. C.

PARTSONG (Fr. *chanson à parties*; Ger. *mehrstimmiges Lied*) is a term properly applied to any song for two or more voices in harmony with or without instrumental accompaniment.

In common use, however, Partsong has acquired a more restricted connotation in the English language, since it is distinguished from the MADRIGAL (*q.v.*) and its attendant forms by its harmonic style, and from the GLEE (*q.v.*) by the fact that it implies choral performance, i.e. more than one voice to a part, rather than a solo ensemble. It is applicable therefore to any choral piece which has the character of a harmonised song-melody. The harmonised versions of Dowland's 'First Book of Songs to the Lute' (1597) may be taken as the starting-point of the English Partsong, as a distinct style, but the special application of the term did not become prevalent until the 19th century, when such composers as J. L. Hatton and R. L. de Pearsall specialised in the type. The growth of small choral societies and male voice choirs created a demand to which Sullivan and Barnby ministered with such popular specimens as 'The long day closes' and 'Sweet and low.' A later generation—Parry, Stanford, Elgar—has enriched the type with many works of greater artistic distinction, and the increased choral technique stimulated largely by the competitive festival movement (see COMPETITIVE FESTIVALS), has now almost obliterated the restrictions of style which formerly separated the English Partsong from the larger choral piece. C.

PART-WRITING (Ger. *Stimmführung*), a term of criticism usually applied to the general disposition of the parts in a composition (see PART (1) and (2) and PART-PLAYING), having regard to their individual melodic characters as well as to their resultant effect in harmony.

Thus the part-writing may be awkward even to the verge of impossibility or dull to the point of monotony, although the resultant harmony is unimpeachable. On the other hand, perfectly written parts may be produced and multiplied at the expense of harmonic clarity and the beauty of the passage as a whole.

For educational purposes part-writing has generally been considered as a department of the study of harmony, though the cultivation of a good style of part-writing is the special purpose of contrapuntal training. (See COUNTERPOINT.)

PASCAL BRUNO, opera in 3 acts; music by J. L. Hattón. Produced Kärnthnerthor Theatre, Vienna, as 'Pasqual Bruno,' Mar. 2, 1844.

PASCHE (PASHE, PAYSHE), W., English church music composer, probably of the 15th century (what remains of his music is preserved in MSS. of the early 16th). He is mentioned by Morley among his list of 'Practicioners' of music in his *Plaine and Easie Introduction* (1597). A Mass by Pasche, 'Christus resurgens,' is in the library at Caius College, Cambridge; the tenor part of this is also at St. John's. In the Peterhouse partbooks there are two Magnificats, and a motet, 'Sancta Maria, Mater Dei,' by him.

PASDELOUP, JULES ETIENNE (b. Paris, Sept. 15, 1819; d. Fontainebleau, Aug. 13, 1887), gained the first prize of the Conservatoire for solfège in 1832, and the first for the piano in 1834. He then took lessons in harmony from Doulen, and in composition from Carafa. Though active and ambitious he might have had to wait long for an opportunity of making his powers known, had not a post in the Administration des Domaines fallen to his lot during the political changes of 1848 and enabled him to provide for his family. As Governor of the Château of St. Cloud he was not only thrown into contact with persons of influence, but had leisure at command for composition.

The general refusal of the societies in Paris to perform his orchestral works had, doubtless, much to do with his resolve to found the 'Société des Jeunes Artistes du Conservatoire,' the first concert of which he conducted on Feb. 20, 1851. Pasdeloup now found his vocation, which was neither that of a Government official nor a composer, but of an able conductor bringing forward the works of other masters, native and foreign. At the concerts of the 'Société des Jeunes Artistes' in the Salle Herz, Rue de la Victoire, he produced the symphonies of Gounod, Lefébure-Wély, Saint-Saëns, Gouvy, Demersseman and other French composers, and there Parisians heard for the first time Mozart's 'Entführung,' Meyerbeer's 'Struensee' and several of Schumann's

standard works. After two years spent in forming his young band,¹ and struggling against the indifference of the paying portion of the public, Pasdeloup resolved on a bold stroke and moved his quarters to the Cirque d'Hiver, then the Cirque Napoléon, where, on Oct. 27, 1861, he opened his Concerts Populaires, given every Sunday at the same hour as the Concerts du Conservatoire. The striking and well-deserved success of these entertainments roused universal attention and procured their conductor honours of various kinds. Baron Hausmann had already requested him to organise and conduct the concerts at the Hôtel de Ville; the Prefect of the Seine appointed him one of the two directors of the ORPHÉON (q.v.); and de Nieuwerkerke, Surintendant des Beaux-Arts, frequently called upon him to select and conduct the concerts which formed the main attraction of the soirées given by the director of the Museum of the Louvre. He also received the Legion of Honour.

An ardent admirer of Wagner, Pasdeloup made use of his short magistracy of the Théâtre-Lyrique (1868-70) to produce 'Rienzi' (Apr. 6, 1869). He undertook this office on disadvantageous terms and lost heavily by it. The Franco-German war gave a serious check to his career, but when it was over he resumed the Concerts Populaires with the aid of a Government subsidy of 25,000 francs. Elwart compiled a history of the concerts, but he does not go beyond their first start.

After a popularity of many years' duration, during which the Concerts Populaires acquired an almost universal celebrity and did much to develop musical taste in France, and to cultivate the symphonic school of music, the enterprise rapidly declined. The Sunday matinées at the theatres were formidable rivals to Pasdeloup's concerts, besides which the public taste which he had done so much to train was turning altogether in the direction of the concerts given by Colonne and Lamoureux, whose standard of performance was more careful and who succeeded better in gauging the requirements of the audience. Under these circumstances Pasdeloup, after vain efforts to reinstate himself in public favour, decided to resign, and closed the Concerts Populaires in Apr. 1884, the 23rd year of their existence. On May 31, 1884, a grand festival benefit was organised in Pasdeloup's honour at the Trocadéro, by which a sum of nearly 100,000 francs was raised; all French artists, whether composers, singers or instrumentalists, joined to contribute towards assuring a competence for the excellent man who had done so much to make the fortunes of many artists without furthering his own interests. In the winter of 1885 Pasdeloup organised concerts at Monte

¹ Recruited from the pupils of the Conservatoire.

Carlo, and afterwards founded pianoforte classes in Paris. At the conclusion of the educational course he gave paying concerts of chamber music. In Oct. 1886, after Godard had failed (in 1884) in his attempt to reconstruct the Concerts Populaires, Padeloup began a new series with the old title, giving one concert a month from Oct. 1886 to Mar. 1887, with a sacred concert on Good Friday. A. J.

PASINO, DETTO GHIZZOLO STEFANO, of Brescia; in 1642 town organist of Lonato; in 1651 maestro di cappella of Salò. He wrote masses *a 4 v.*, op. 4 (1642); motets *a 2, 3* and 4 concerted parts, op. 6 (1651); XII. sonatas for 2, 3 and 4 instruments, in one of which are imitated the cries of sundry wild animals, op. 8. It is curious to see this childish trick, which had been shown by Carlo Farina c. 1628, and later on by Paganini, treated in all seriousness. A collection of Ricercari for instruments appeared as op. 7 (*Q.-L.*; *Fétis*). E. v. d. s.

PASQUALI (PASCHALI, PASCALE), FRANCESCO (b. Cosenza, late 16th cent.), studied and lived mostly in Rome; composed three books of madrigals and several books of sacred and secular songs in 1-5 parts, between 1615-1633 (*Q.-L.*).

PASQUALI, NICOLÒ (d. Edinburgh, Oct. 13, 1757), a violinist and composer who settled in Edinburgh about 1740 until his death, with the exception of the years 1748-51, during which he lived in Dublin, producing his oratorio 'Noah' at Fishamble Street Music Hall. He was in London in 1752, and then returned to Edinburgh. He published numerous compositions, an opera called 'L' ingratitude punita,' songs in 'The Tempest,' 'Apollo and Daphne' and 'The Triumph of Hibernia,' as well as the 'Solemn Dirge in Romeo and Juliet.' Most of these are printed in the 'XII English Songs in Score,' dated 1750, and published in London. Two sets of sonatas, one for violin and bass, and one for two violins, tenor and thorough-bass, were also published in London. 'XII Overtures for French horns' were printed in Edinburgh, 'for Rob. Bremner, the assigney of Signor Pasquali'; and the book by which his name is best known, *Thoroughbass made Easy*, was published in Edinburgh in the year of his death. About three years after his death his *Art of Fingering the Harpsichord* was published in Edinburgh. M.

PASQUINI, BERNARDO (b. Massa di Valnovola, Tuscany, Dec. 8, 1637; d. Nov. 22, 1710¹), an important musician of the latter half of the 17th century. His masters were Loreto Vittori and Antonio Cesti, but the study of Palestrina's works did more for him than any instruction. While still young he came to Rome, and was appointed organist of Sta. Maria Maggiore.

Among his numerous pupils were Durante and Gasparini; the Emperor Leopold also sent young musicians to benefit by his instruction. Special mention is made of an opera, 'Dov' è amore e pietà,' produced at the Teatro Capranica in 1679, and of another in 1686, in honour of Queen Christina of Sweden. Mattheson, on visiting the opera-house in Rome, was much struck at finding Corelli playing the violin, Pasquini the harpsichord and Gattani the lute, all in the orchestra. Pasquini's music is terse, vigorous and at the same time graceful; in fact he had much in common with Handel, and exercised a certain amount of influence upon German musicians. A 'favola pastorale,' or small opera in three parts, called 'La forza d' amore' (libretto by Apolloni, a gentleman in Prince Chigi's household), is fine, and elevated in style. Copies are in the Fitzwilliam Museum at Cambridge, the Brussels Conservatoire and the Istituto Musicale at Florence. Five oratorios are mentioned in *Q.-L.*, as well as six more operas. His contributions to various collections of harpsichord music are more important; one such collection was printed at Amsterdam in 1704, and another by Walsh, probably later. Selected sonatas were published by Novello in an album of music by Pasquini and Grieco, edited by J. S. Shedlock, whose *Pianoforte Sonata* contains an interesting chapter on Pasquini. F. G., with addns.

PASSACAGLIA, PASSACAGLIO, PASSE-CAILLE, an early Italian or Spanish dance, similar in character to a CHACONNE (*q.v.*).

The name (according to Littré) is derived from the Spanish *pasar*, 'to walk,' and *calle*, 'a street,' in which case a passacaglia may mean a tune played in the streets by itinerant musicians. This derivation is confirmed by Walther's *Lexicon*, where the name is translated by 'Gassenhauer.' Other authorities have attempted to connect the word passacaglia with *gallo*, 'a cock'; thus Mendel translates it 'Hahnentrapp.' The original dance was performed by one or two dancers; it survived in France until the 18th century, and directions for dancing it may be found in Feuillet's *Chorégraphie*. But the feature which, in common with the chaconne, has elevated the passacaglia above the majority of dance forms, is the construction of the music on a GROUND BASS (*q.v.*), generally consisting of a short theme of two, four or eight bars.

This form attracted the attention of the organ and harpsichord composers of the 17th and 18th centuries, with whom the construction of elaborate passacaglias and chaconnes became a favourite exercise for contrapuntal skill. It is

¹ According to his monument in the church of S. Lorenzo in Lucina, at Rome, which also states that he was in the service of Battista, Prince Borghese. The monument is figured in Shedlock's *Pleasures of Pasquini*, as the centrepiece.

somewhat difficult to ascertain in what the difference between these two dance forms consists. Mattheson,¹ a contemporary authority, distinguishes four points: the chaconne was slower and more stately than the passacaglia; the former was always in a major key, the latter in a minor; passacaglias were never sung; and chaconnes were always on a ground bass. The above distinction of keys is not borne out by the specimens that have come down to us, and the passacaglia is, if anything, generally of a more solemn character than the chaconne. The only material difference between the two seems to be that in the chaconne the theme is kept invariably in the bass, while in the passacaglia it was used in any part, often so disguised and embroidered amid ever-varying contrapuntal devices as to become hardly recognisable. Among the most celebrated passacaglias may be mentioned those by Buxtehude, Bach (B.-G. vol. xv.), Couperin, Frescobaldi (*Toccate d'involutura*, vol. i.) and Handel (Suite VII. and the fourth sonata of 'VII Sonatas or Trios').

There are also in existence some curious 'Passagagli flebili,' by Salvatore Mazzella, in his 'Balli, Correnti, Gighe, Gavotte, Brande, e Gagliarde, con la misura giusta per ballare al stile Inglese' (Rome, 1689). W. B. S.

PASSAGE. The word 'passage' is used of music in the same general sense that it is used of literature, without any special implication of its position or relations in the formal construction of a work, but merely as a portion which can be identified through some characteristic trait or continuous idea.

Thus in modern writings on music such expressions as 'passage in first violins,' 'passage in strict counterpoint,' 'passage where the basses go gradually down through two octaves,' show that the amount or extent of music embraced by the term is purely arbitrary, and may amount to two bars or to two pages at the will of the person using the term, so long as the definition, epithet or description given with it sufficiently covers the space so as to make its identification easy and certain; short of this the word by itself conveys no meaning.

It is, however, sometimes used in a special and not altogether commendatory sense, of runs and such portions of music as are meaningless except as opportunities for display of dexterity on the part of executants, which are therefore in fact and by implication nothing more than 'passages.' In this respect literature and language are fortunate in having long ago arrived at such a pitch of development that it is hardly possible to find a counterpart except in the byways of gushing sentimental poetry or after-dinner oratory. It is possible that the musical use of the term originated in the amount of attention and labour which executants have

had, especially in former days, to apply to such portions of the works they undertook, and the common habit of speaking of practising 'passages,' growing by insensible degrees to imply practising what it is hardly worth the while of an intelligent audience to listen to, except for the sake of the technique. It is probable that this use of the word in its special sense, except for mere exercises, will become less frequent in proportion to the growth of public musical intelligence. C. H. H. P.

PASSAGGIO, 'passage.' This word is used in two senses: (1) of the passing from one key to another—hence used for all modulations; (2) of bravura ornaments introduced, either in vocal or instrumental music, whether indicated by the composer or not, in order to show off the skill of the performer. Bach uses *Passaggio* for a 'flourish' at the beginning of the Prelude to the Suite in E minor (B.-G. xlv. p. 149). M.

PASSAMEZZO (PASSEMEZZO), an old Italian dance which was probably a variety of the PAVAN. In England, where it was popular in Queen Elizabeth's time, it was sometimes known as the 'Passing Measures Pavan.'² Tabourot in his *Orchésographie* says that when the pavan was played less solemnly and more quickly, it was called a 'Passemazzo.' Hawkins says that the name is derived from 'passer, to walk, and mezzo, middle or half,' and that the dance was a diminutive of the galliard; but both these statements are probably incorrect. Praetorius (*Synlogicon*, iii. 24) says that as a galliard has five steps, and is therefore called a 'Cinquepas,' so a 'Passemazzo' has scarcely half as many steps as the latter, and is therefore called 'mezzo passo.' These derivations seem somewhat far-fetched, and it is probable that the name 'Passemazzo' (in which form it is found in the earliest authorities) is simply an abbreviation of 'Passo e mezzo,' i.e. a step and a half, which may have formed a distinctive feature of the old dance. Reissmann (*Geschichte der Musik*, ii. 22) quotes a 'Pass e mezzo antico,' from Jacob Paix's 'Ein Schön Nutz Lautentabulaturbuch,' in which periods of eight bars can be distinguished. It is written with five variations and a 'ripresa.'

Full directions for dancing the passamezzo may be found in Caroso da Sermoneta's curious works *Il Ballarino* (Venice, 1581) and *Nobiltà di dame* (ib. 1600), from which the following example is taken:

² In a MS. volume of airs and dances by Stroggers, Dowland and Reade, preserved in the Cambridge University Library, it is called 'Passemurus Pavan.' See *Twelfth Night*, Act v. Sc. 1.

At page 102 of the 'Fitzwilliam Virginal Book' there is a 'Passamezzo Pavana' by William Byrd, and at page 142 another (dated 1592) by Peter Philips; both are written in an elaborate style, and followed by a 'Galiarda Passamezzo.' See published edition, vol. i. pp. 203, 209, 299, 306.

W. B. S.

PASSARINI, FRA FRANCESCO (b. Bologna, first half of 17th cent.; d. there, 1698), Franciscan monk, maestro di cappella of S. Francesco, Bologna, 1671; and in 1672 in his own monastery. He composed oratorios, masses, psalms, motets and other church music (*Fétis*; *Q.-L.*).

PASSEPIED (English PASPEY), a dance which originated amongst the sailors of Basse Bretagne, and is said to have been first danced in Paris by street-dancers in the year 1587. It was introduced into the ballet in the time of Louis XIV., and was often included in instrumental suites and partitas; it was placed among the 'intermezzi,' or dances which strictly form no part of the SUITE (*q.v.*), but were sometimes introduced into it between the saraband and the final gigue. Bach, however, does not adhere to this rule, but in his partita in B minor places the passepied before the saraband. In character the passepied somewhat resembles the minuet, but it is played much faster, and should always begin on the last beat of the bar, although in some examples, chiefly by English composers, it begins on the first beat. It is written in 3-4 or 3-8 time, and generally consists of two, three or four parts of eight or sixteen bars each, played with two or more repeats.

In the suite the first part (or first two parts, if the passepied consists of three or four divisions) is generally in a major key, and the last part (or last two parts, if it consists of four divisions) forms a sort of trio or second passepied, and is in the minor, in which key the dance concludes. Couperin develops this still further, and has a passepied with variations. The dance became popular in England towards the beginning of the 18th century, and many examples by English composers are extant. Directions for dancing it,¹ as it was performed in the ballet by one or two dancers, will be found in Feuillet's *Chorégraphie*. (See ARBEAU.)

PASSING NOTES are in essential discordant notes which are interposed between the essential

factors of the harmonic structure of music on melodic principles. See HARMONY.

PASSION MUSIC (Lat. *cantus passionis Domini nostri Jesu Christi*; Ger. *Passionsmusik*). A musical presentation of the Gospel story of the Passion of Jesus Christ, five varieties of which can be distinguished: (1) Choral Passion; (2) Motet Passion; (3) Scenic Passion; (4) Oratorio Passion; (5) Passion Oratorio.

THE CHORAL PASSION.—Recitation of the Gospel narratives of the Passion in Holy Week is of very ancient usage. As early as the 4th century St. Matthew's (chaps. xxvi. xxvii.) was prescribed on Palm Sunday (*Dominica Passionis*); St. Luke's (chaps. xxii. xxiii.) on the following Wednesday. In addition, by the 8th and 9th century, St. Mark's (chaps. xiv. xv.) was enjoined for Tuesday in Holy Week; St. John's (chaps. xviii. xix.) for Good Friday (*dies parasceve*). It was customary then for the Deacon of the Mass, wearing the alb, to recite the prescribed Gospel at the altar, distinguishing the words of Christ from the general narrative by using the Gospel tone, *i.e.* inflexions and cadences. In the 12th century this simple ritual was superseded by one more complex and dramatic, in which the narrative was recited by three 'Deacons of the Passion,' of whom the Deacon intoned the narrative text, the Sub-deacon represented the people (*turba*) and individual characters other than Christ, while the Priest intoned the Saviour's utterances. Since the intention was vividly to impress the Passion story upon a congregation ignorant of Latin, the voices of the three clergy were contrasted, the Deacon a tenor (*media vox*), the Priest a bass (*bassa vox*), the Sub-deacon an alto (*suprema vox*). The reciting-note (*tonus currrens*, *Hauptton*) of each was the highest in the plain-song formula allotted to it.

The complete compass of the three voices was three tetrachords, an octave and a half:

Christus (*bassa vox*), Evangelist (*media vox*),

Turba (*suprema vox*).

The plain-song formulas were of the following character:

Evangelist.

Passio Domini nostri Jesu Christi secundum Mattheum.

Sol-tis post, etc. ut cru-ci-fi-ga-tur.

¹ The proper expression seems to be 'to run a Passepied.' Thus Noverre, *Lettres sur le danse*, p. 154, has the following: 'Il faut que le Passepied parte que l'accompagnement s'élève les sauts avec élégance.'

The cadences used by the Evangelist (Deacon) differed according to the *vox* that followed him, moving up to the *suprema vox* and down to the *bassa vox*. The persistence of these traditional cadences permits their illustration from Thomas Mencken's (Mancinus) Passion (1610), whose harmonised Turba, however, is not characteristic of early use:

The Saviour's cry, *Eli, Eli, lama asabthani*, invariably was sung to a more expressive formula than the severer plain-song otherwise prescribed. The early Lutheran composers adopted it; it appears alike in the Passions of Johann Walther (c. 1530) and Thomas Mencken (1610):

la-ma . a-sab-tha-ni.

Sung exclusively to plain-song or liturgical melody (hence *Choralpassion*) this type of Passion prevailed throughout the Middle Ages. But a ritual of such solemnity naturally reacted to the progressive musical apparatus. Discovering in it a high theme for musical illustration, 16th century composers either (1) harmonised the whole Gospel text as a *cappella* music (*Motettepassion*), or (2), retaining the solo plain-song for the utterances of Christ and the Evangelist, harmonised the Turba sentences (*forma scenica in certas personas distributa*).

THE MOTET PASSION.—The earliest example of this species was composed by the Dutchman Jakob Obrecht (Hobrecht) (d. 1505) for the Duke of Ferrara. Written for four voices (D.A.T.B.), it begins with the traditional *Introitus*, *Exordium*, or *Praefatio*, 'Passio Domini nostri Jesu Christi secundum Matthaeum,' and ends with the customary *Conclusio*, 'Qui passus es pro nobis miserere nobis. Amen.' Its text actually is a mosaic of the four Gospels from which subsidiary episodes are excluded, e.g. Christ's anointing, and the Institution of the Holy Supper. The work is divided into three Parts; the first ends with Christ's 'Tu dixisti' to Pilate, the second records His condemnation, the third His crucifixion and death. As was usual, the music is in the transposed Ionian mode. The following example illustrates Obrecht's treatment of the traditional plain-song as a *canto fermo*:

Obrecht writes his Turba passages in four-part harmony. Christ, Judas and Pilate usually speak in two parts, one of them, in the case of the Saviour, a bass. In this respect, and in his retention of the conventional formulas, Obrecht was essentially conservative. Printed by Georg Rhau at Wittenberg in 1538, his Passion had wide vogue and influence. Johannes Galliculus (c. 1520-50), the first German composer of a Latin Passion, Ludwig Daser (d. 1589), Vincenzo Ruffo (b. 1554), Jakob Handl (Gallus) (1550-91), Jakob Regnart (1540-1600), Bartholomäus Gesius (1555?-1613 or 1614), writing for a varying number of parts (4, 6 or 8), and with an increasing disposition to disregard the old formulas, all wrote Latin Passions of the Motet form and generally followed Obrecht's method.

It will be shown in a subsequent paragraph that Passion music found its way immediately into the Lutheran service. Here it must be remarked that in 1568 Joachim von Burck (Möller or Müller) (d. 1616) composed the earliest Motet Passion in the German vernacular, 'Die deutsche Passion, das ist, die Historia des Leidens unsers Herrn Jhesu Christi, nach dem Evangelisten S. Johanne in Figural Gesang.' In a Preface he acknowledges his debt to 'der berühmte Musicus' Obrecht; but his model was Orlando di Lasso—'Orlandum quantum possem imitarer.' The old Passion formulas are faintly reproduced and he writes his *Conclusio* to the words, 'Wir glauben, lieber Herr, mehr unsern Glauben. Amen.' In one text his Passion is followed by Gallus's Motet: 'Ecce quomodo moritur justus,' an association which survived at Leipzig into Bach's cantorate. German Motet Passions were also written by Johannes Steurlin (1576), Johann Machold (1593), and Christoph Demantius (1631).

THE SCENIC PASSION.—While Luther advocated the observance of Holy Week—'die Marterwoche lassen wir bleiben'—he preferred a single recitation of the Passion narrative by the minister, 'auf dem Predigtstuhl,' either on Palm Sunday or Good Friday, 'solches ist dem Volk mehr nütz, denn da man die Passion laut sang und die Priester giengen davon, die Laien aber verstanden es nicht.' But the tradition of the musical Passion prevailed, and before 1530 Johann Walther, Luther's coadjutor, composed

the earliest Lutheran Passion, eight years at least before Galliculus produced the first vernacular example of the Motet type.

Johann Walther's (1496-1570) setting of St. Matthew's text was probably composed 1522-1527, certainly before 1530, the date of a MS. Tenor part in the Luther Codex. It represents the earliest association of the ancient plain-song formulas with Luther's vernacular New Testament (1522), from which occasionally it differs, anticipating the reformer's subsequent revision. The Gospel text proceeds uninterruptedly between the traditional *Exordium*, 'Das Leiden unsers Herrn Jhesu Christi,' etc., and a new *Conclusio* or *Gratiarum actio*, 'Danck sey unserm Herren Jhesu Christo, der uns erlöst hat durch sein Leiden von der Helle.' The Evangelist is a tenor, in whose plain-song melody the most signal departure from tradition is the adoption of a uniform cadence to introduce the utterances of Christ (bass) and the Turba (D.A.T.B.):

The minor individual characters are allotted to an alto voice, their several utterances generally being introduced by the Evangelist's cadence:

Walther's Turba passages are in the simplest four-part *faux bourdon* harmony, of which the following example is typical:

Walther's Passion had a remarkable vogue and was widely printed and used. It appears anonymously in Gottfried Vopelius's Leipzig hymn-book (1682), and was in use there until 1721. At Nürnberg it was sung in 1806. The text is not divided into Parts. But in general use the Sermon followed the Saviour's desertion by the disciples (St. Matth. xxvi. 56; St. John xviii. 27), leaving His trial and crucifixion for Part II.; while a pause for a silent Lord's Prayer followed the words, 'Jesus yielded up the ghost' (St. Matth. xxvii. 50; St. John xix. 30). In Leipzig use Walther's setting of the St. Matthew Passion was sung at Vespers on Palm Sunday. A similar setting of St. John's narrative (also in Vopelius) was sung at the corresponding service on Good Friday.

A generation after Walther, Antonio Scandelli (1517-80) wrote (*ante* 1561) a St. John Passion for the Dresden court chapel, which unites the characteristics of the Motet and Scenic types. The Evangelist (tenor) employs the conventional plain-song. Otherwise the music is in two-part to five-part vocal harmony. Pilate's words are usually sung by three, occasionally by two, parts; Peter's, by three; the high priest's officer's (chap. xviii. 22), by two; the maid's, by three; Christ's and the high priest's servant's (chap. xviii. 26), by four. Christ's utterances alone have the richer harmony of D.A.T.B., a distinction anticipatory of the instrumental accompaniment to the Saviour's words in Bach's St. Matthew Passion. The Turba sentences throughout are in five parts (D1, D2, A.T.B.), and in dramatic force show a marked advance upon Walther's *fauz bourdons*:

Walther's and Scandelli's Passions may be accepted as types of the Scenic Passion produced by Protestant and Roman Catholic musicians in the 16th and early 17th centuries.

Notable among the composers of German texts are: Jakob Meiland (1542-77) (St. John, 1568; St. Matthew, 1570), Bartholomäus Gesius (1555?-1613 or 1614) (St. John, 1588), Thomas Mencken (1550-1620) (St. Matthew and St. John, 1610), Samuel Besler (1574-1625) (all four Evangelists, 1612), Melchior Vulpus (d. 1615) (St. Matthew, 1613), Otto Siegfried Harnisch (d. 1630) (St. John, 1621). Among the composers of Latin texts: Claude de Sermisy (d. 1562) (St. Matthew, 1534), Orlando di Lasso (d. 1594) (all four Evangelists, 1575-94), Jakob Reiner (d. 1606) (St. John, St. Matthew and St. Mark, *post* 1579), Giovanni Matteo Asola (d. 1609) (St. Matthew, St. Mark, St. Luke), Tomás Luis Victoria (d. *circa* 1613) (St. Matthew and St. John, 1585), Francisco Guerrero (1528-99) (St. Matthew and St. John), and William Byrd (1543-1623) (St. John, 1607), whose three-part Turba choruses anticipate Schütz in concise dramatic intention, e.g.:

Disc. Non hune, non hune,

Tenor. Non hune, non hune, non

Bass. Non hune, non hune, non

non hunc, sed Bar - ab-bam, sed
hunc, sed Bar - ab-bam, sed Bar - ab-bam.
hunc, sed Bar - ab-bam, sed Bar - ab-bam,
Bar - ab-bam, sed Bar - ab-bam.
sed Bar ab-bam.
sed Bar - ab-bam.

THE ORATORIO PASSION.—With Heinrich Schütz (1585–1672) the Italian style entered Germany to influence Passion music. Four Passions are attributed to him, of which only those according to St. Matthew (1661), St. Luke and St. John are authentic. So far as relates to their text they do not differ materially from those of Walther and Scandelli. They begin with the conventional *Eordium*; the Bible narrative is followed without interruption; and a *Gratiarum actio* closes the work. Excepting the Turba choruses and the Duet of the false witnesses the Passions are written for a solo voice. There are no arias and no reflective Chorals, though stanza viii. of ‘Christus der uns selig macht’ (with its melody) concludes the St. John. The Evangelist’s (tenor) recitative is written in a sort of Gregorian notation, and, though it lacks the sensitiveness of Bach’s text, is flexible and moves easily with the words; e.g. from the St. Matthew Passion:

Evangelist.

Und die Ael - testen im Volk in den Pa -

- laus des Ho - hen - priesters (der da heiss Ka - i - phas)

Christ's recitative (bass) is arioso in character. Departing from tradition, Schütz breaks the text in order to obtain dramatic effect; e.g. from the St. Matthew Passion:

Christus.

Der Geist ist wil-lig, a - ber das

Fleisch ist schwach.

The four-part choruses, vivid and dramatic, are the ancestors of Bach's; *e.g.* from the St. John Passion:

cantor there, left in MS. a St. John Passion 'à 6 cum Capella à 5,' a St. Matthew Passion 'in dialogo à 10' (1642), and a second setting of St. John's narrative, 'mit 6 Vocal- und 6 Instrumentalstimmen sampt einer vocal-capella à 5 einfaltigst pro choro remoto und dem Choro pro organo à 4 gesetzt in stylo recitativo' (i.e. oratorio) (1643). The last is remarkable especially for an elaborate orchestral scheme which distinguishes the characters by particular accompanying instruments; the Evangelist (tenor) by two fagotti (or viole da gamba) and two 'Pandoren' (an instrument of the lute family); Christ (bass) by two violins and two lutes. Into each of his three Parts also, borrowing a term used by Schütz in his *Weihnachts-Oratorium*, Selle introduces an 'Intermedium' (Intermezzo). The first, in nine parts, is a setting of Isaiah liii. 4 ff. and follows Christ's question, 'Wherefore smitest thou me?' The second, also in nine parts, on Psalm xxii. 1, follows 'We have a law, and by our law he ought to die.' The third, a Choral concerto on the melody 'O Lamm Gottes unschuldig,' for chorus and organ, concludes the work.

In the year following Selle's death, Thomas Strutius, organist in Danzig, produced (1664) a setting of St. Matthew's text, the MS. of which has not survived. Scored for strings and in four 'Acts,' the work included eight Chorals, four of which were set as arias, three as five-part choruses, and one ('Erarm dich mein, O Herre Gott') for solo, chorus, organ and viole. They began and ended the work and followed Christ's institution of the Holy Supper, Peter's denial, the death of Judas, and other incidents, the last-named being accompanied by a 'vierstimmig-belenden (tremolo) Sattenspiel.' In some of these innovations Strutius anticipated Johann Sebastiani (1622-83), who introduced (1672) into his St. Matthew Passion a number of Chorals as descant solos with strings and *continuo* accompaniment deliberately 'zur Erweckung mehrer Devotion' in the congregation. The *continuo* accompanies the Evangelist, and Christ's utterances are supported by strings, as in Bach's St. Matthew Passion. The conventional *Conclusio* is preceded by a short (17 bars) Interlude for 4 viole and *continuo*:

Sebastiani's work marks the transition of the Passion into its oratorio form. Its characteristics were repeated in the Passions of Johann Theile (1646-1724) and Johann Valentin Meder (1649-1719); and in 1721 Johann Kuhnau (1660-1722), Bach's immediate predecessor at St. Thomas', brought the oratorio form to Leipzig with his St. Mark Passion, superseding Walther's version, which for so many generations had been sung there.

THE PASSION ORATORIO.—Meanwhile, the influence of Italian art deflected Passion music from the traditions which so long had governed it. Early in the 18th century a new libretto found favour which rejected the literal Bible text, substituted a rhymed paraphrase, and insinuated lyrical stanzas of reflective commentary. Erdmann Neumeister's first cycle of cantata texts (1700) led the way. He defined a cantata as 'a fragment of Opera,' and Johann Adolf Scheibe, in the *Kritischer Musikus* of 1737, distinguished the cantata from the oratorio only in the more dramatic purpose of the latter; the oratorio from the opera only in the surroundings in which it was performed. In their Italian development, in fact, the two differed only in the topics that inspired them. The Hamburg critic, Johann Mattheson, insisted (1739) that 'An oratorio is merely a sacred opera.' Therefore, if it was inevitable that the Passion story should be treated as an oratorio of the Italian type, circumstances ordained that the experiment should be made at Hamburg, where, in 1678, Johann Adam Reinken and others established an opera-house to produce the new art form. In view of the imminent appearance of the operatic Passion, it is significant that the Hamburg Opera opened with a Biblical subject, Theile's 'Adam and Eva' whose production required the services of a *maître de ballet*! It was followed by 'Michal und David' (1679), 'Esther' (1680), 'Kain und Abel' (1689), and others.

In 1704 the Passion succumbed to the popular inclination to dramatise Biblical stories, in a setting by Reinhard Keiser (1674-1739) of Christian Friedrich Hünold-Menantes's *Der blutige und sterbende Jesus*, an 'Oratorio musicalisch gesetzt.' The libretto, rhymed throughout, contained no Chorals, and dispensed with the Biblical narrative. The author cast the work in the form of three cantatas or 'Soliloquia': the Lamentations of Mary Magdalene; the Tears of Peter; the Love-song of Zion's Daughter, a character adopted later by Brockes, Picander and Bach. Its theatrical music and the elimination of the Bible narrative invited grave displeasure and even public condemnation by one of the Hamburg clergy. It found imitators, however, in Johann Ulrich König's *Tränen unter dem Kreuze Jesu*, to which Keiser put music in 1711; Johann Georg Seebach's *Der leidende und sterbende Jesus*, published at

Gotha in 1714; Joachim Beccau's *Heilige Fastenlust, oder das Leyden und Sterben unseres Heilandes Jesu Christ* (1719); Johann Philipp Kafer's *Der leidende und sterbende Jesus* (1719); and Benjamin Neukirch's *Der weinende Petrus* (1721), in the libretto of which actually stage directions were printed to assist the listener mentally to dramatise its episodes.

BACH.—The flippant tone of these operatic texts stirred a reaction, which declared itself first in Postel's St. John Passion, set to music by Handel in 1704. 'It reinstated the Evangelist and the Bible text, though the libretto otherwise was not without blemish. In 1712 Barthold Hinrich Brockes, a member of the Hamburg Council, wrote a Passion text which avoided the more glaring indecencies of Hunold-Menantes's, and obtained remarkable popularity among composers. Brockes's Passion, *Der für die Sünden der Welt gemarterte und sterbende Jesus*, is rhymed throughout. After an opening chorus, the text begins with a versified rendering of the institution of the Holy Supper as narrated by St. Matthew xxvi. 26:

Recit.

'Als Jesus nun zu Tische sass,
Und Er das Osterlamm, das Bild von seinem Tod,
Mit seinen Jüngern ass,
Nahm Er das Brod;
Und wie Er es dem Höchsten dankend brach,
Gab Er es ihnen hin und sprach:

JESUS

Das ist mein Leib: kommt, nehmet, esset,
Damit ihr meiner nicht vergesset.'

Christ's agony on the Mount of Olives follows, and is freely treated by the librettist; the Saviour's 'Thy will be done' is parodied in a four-line stanza as an aria. The Evangelist interpolates a picture of the Saviour's distress:

'Das bange Herz fing an so stark zu klopfen,
Dass blutge Schweiss in ungezählten Tropfen
Aus seinen Adern drang.'

Judas's act of betrayal follows:

JUDAS

'Nimm, Rabbi, diesen Kuss von mir.

JESUS

Mein Freund, sag! warum kommst du hier?'

Peter denounces the betrayer in a vigorous aria and, after the Saviour's rebuke, proclaims his resolution to follow his Master:

'Hier ist Petrus ohne Schwert.
Lasst, was Jesus widerfährt,
Mir auch widerfahren.'

The scene of Peter's cowardly denial, Christ's appearance before Caiaphas, His trial by Pilate, condemnation, crucifixion and burial are told with severe compression of the Bible text, but with a wealth of lyrical commentary and pictorial detail in recitative and aria. The 'Daughter of Zion' and 'The Faithful' are prominent throughout, as in Picander's later texts, and five hymn-stanzas voice the emotion of the 'Christian Church.' If turgid and lacking in taste, the libretto, as a whole, is vivid and

pictorial. Keiser, Telemann, Mattheson, Handel, and more than twenty other composers set it within fifteen years of its appearance; Bach himself borrowed some of its lyrics for his St. John Passion.

Thus when, on the eve of his settlement at Leipzig, Bach turned to the composition of Passion music, he found it divorced from its traditions, a compound of old and new forms, ideas, materials: sacred and secular in juxtaposition, the apparatus of Italian oratorio, operatic, non-ecclesiastical, and the Bible text with congregational Chorals. It was his individual achievement to assimilate these incongruities. Accepting the Neumeister libretto for the Passion, as for the cantata, he reinstated the Bible narrative; infused a spiritual intention into the secular forms—aria and recitative—which the Passion had borrowed from the oratorio; and reconciled the Choral with its context, to knit together and elevate the whole. In a task that was beyond Handel's ability, Bach triumphed as much by the simple piety of his character as by the splendour of his technique. Simultaneously with the appearance of his St. John Passion (1723) the Hamburg operatic Passion receded to the background, disappeared from North Germany during his lifetime, and survived elsewhere only where Italian influence prevailed.

The earliest catalogue of Bach's compositions, published in 1754, four years after his death, enumerates among his unprinted works, 'Fünf Passionem, worunter eine zweychorige befindlich ist.' Forkel repeated the statement half a century later (1802). It is probable, however, that Bach composed no more than four, of which the scores of two and portions of the music of a third alone are extant. The earliest of them, the St. John Passion, was written at Cöthen and produced at Leipzig on Good Friday 1723, shortly before Bach's induction as cantor. The significance of its libretto, whose construction may be attributed to Bach himself, is in its deliberate restoration of the Bible text, the comparative lack of lyrical material, and the prominence of Choral stanzas. Of its twelve lyrical numbers only three are original, and eight of the remainder are more or less borrowed from Brockes's text. Two years later (1725) Bach's literary collaborator, Christian Friedrich Henrici (Picander), published a Passion, *Über den leidenden Jesus*, rhymed and otherwise closely modelled upon Brockes's text. The Bible narrative is stated in the same meagre outline, Chorals are almost entirely excluded, and the personality of the Saviour is but faintly sketched. It cannot have satisfied Bach; but, at the outset of his Leipzig career, he may have been willing to please his constituents with a Passion of the popular type. Four years later (1729) he produced the St. Matthew Passion, whose libretto, by Picander,

heavily had been prepared under Bach's direction. It combines the characteristics of the Oratorio Passion and Passion Oratorio: the Bible text, Chorals, and ecclesiastical atmosphere of the one, the lyrical apparatus, textual and musical, of the other, harmonised by a mind intensely alert to the dramatic significance of the story but controlled by a religious sentiment deep but critical. The work is unapproachable, a masterpiece, dramatic but essentially devotional. Two years later (1731) Picander published a St. Mark Passion which was performed on Good Friday in that year. Inferior to its predecessor, it is upon the same literary design, and Bach put it to music, part of which survives in the 'Trauer-Ode' (cf. BACH). A few years after Bach's death, Breitkopf's 1761 Catalogue attributed to him a St. Luke Passion, published as his in B.-G. Jhrgr. xlv. (2), in 1898. But, like the score of Handel's setting of Brookes's text, the MS. is only partly Bach's autograph. The work is probably of North German origin.

Bach's Passions were performed on Good Fridays at Vespers, alternately in St. Thomas' and St. Nicholas' Churches, Leipzig. Such performances dated from 1721, when for the first time a Passion of the Oratorio type—Johann Kuhnau's St. Mark Passion—was produced. Bach's St. John Passion (1723) was the second or third¹ of the series, and was sung at St. Thomas'. The prescribed ceremonial was as follows: The bells were rung at 1.15 p.m. At 1.45 Johann Böschenstein's hymn, 'da Jesus an dem Kreuze stund,' was sung. The first part of the Passion followed, and concluded with the hymn 'O Lamm Gottes unschuldig.' After the sermon, preceded by the hymn 'Herr Jesu Christ, dich zu uns wend,' the second part of the Passion was performed, followed by Jakobus Gallus's Motet, 'Ecce quomodo moritur justus.' The Passion Canto was intoned, Martin Rinkart's hymn 'Nun danket alle Gott' was sung, and the service concluded with the Blessing.

LATER PASSIONS.—Since Bach's death (1750) the Passion has been treated by composers either in cantata or oratorio form, using the latter word in its modern meaning; none has ventured to meet Bach upon his own ground. His son, C. P. E. Bach, wrote two Passions for Hamburg use (1787, 1788) (cf. BACH, C. P. E.), and his kinsman, Johann Ernst Bach (1722–77), composed a 'Passionsoratorium' (published in *D.D.T.* Bd. 48). Graun's 'Der Tod Jesu' (1755) alone has challenged the popularity of Bach's Passions in Germany. The other most important works inspired by the Passion are Haydn's 'Die

sieben Worte am Kreuze' (1785), Beethoven's 'Christus am Ölberg' (1803), Spohr's 'Des Heilands letzte Stunden' (1835), and Lorenzo Perosi's 'La Passione di Gesù Cristo, secondo San Marco' (1897). Their popularity in England requires mention of Stainer's 'Crucifixion' (1887), Lee Williams's 'Gethsemane' (1892), and Arthur Somervell's 'The Passion of Christ' (1914).

PASTA, GIUDITTA (b. Como, near Milan, 1798; d. there, Apr. 1, 1865), came of a Jewish family named Negri. She is said to have received her first instruction from the maestro di cappella at Como, Bartolomeo Lotti; but, at the age of 15, she was admitted into the Conservatoire at Milan, under Asiolio. Her voice was then heavy and strong, but unequal and very hard to manage; she never, in fact, succeeded in producing certain notes without some difficulty; and, even in the zenith of her powers, there still remained a slight veil which was not dissipated until she had sung through a few scenes of an opera.

In 1815 she left the Conservatorio; and, after trying her first theatrical steps on an amateur stage, she made her début in the theatres of Brescia, Parma and Leghorn, and later in Paris. A year later, 1816, she and her husband, Pasta, a tenor, were engaged by Ayrton, at a salary of £400 (together) for the season, for the King's Theatre. She appeared Jan. 11, 1817, in Cimarosa's 'Penelope' and other rôles without obtaining success.

The young singer, however, did not despair. Though her voice was rebellious and her style

¹ The Cuxos Root does not mention a performance in 1722, and states specifically that the first performance in St. Nicholas'—whose turn it was in 1722—took place in 1724. Bach very reluctantly bowed to authority in holding the service there in that year; he complained that the accommodation was inadequate. The evidence points to his own Passions having been always performed in St. Thomas'.

as yet quite unfinished, she had many advantages even then which promised future excellence as the reward of unremitting and laborious study. Below the middle height, her figure was, nevertheless, very well proportioned; she had a noble head with fine features, a high forehead, dark and expressive eyes, and a beautiful mouth. The dignity of her face, form and natural gestures fitted her eminently for tragedy, for which she was not wanting in the necessary fire and energy.

Having returned to Italy, she meditated seriously on the causes of her ill success, and studied for some time with Scappa. In 1819 she appeared at Venice, with marked effect; and this first success was repeated at Rome and Milan, in that year and the next. In the autumn of 1821 she first attracted the attention of the Parisian public at the 'Italiens'; but it was after singing at Verona, during the congress of 1822, that she returned to Paris, where she at length became suddenly famous, and excited the wildest enthusiasm. Her voice, a splendid soprano, extending from the low A to the highest D, even then was not absolutely free from imperfection; but the individuality of her impersonations, and the peculiar and penetrating expression of her singing, made the severest critics forget any faults of production in the sympathy and emotion she irresistibly created. She continued, however, to work, to study and to triumph over her harsh and rebellious organ by these means. 'Though but a moderate musician,' says Fétis, 'she instinctively understood that the kind of ornaments which had been introduced by Rossini could only rest a claim for novelty on their supporting harmony'; and she therefore invented the embellishments in arpeggio which were afterwards carried to a still higher pitch of excellence by Malibran. On Apr. 24, 1824, Pasta reappeared in London in 'Otello,' and had another enthusiastic success, which she followed up with 'Tancredi,' 'Romeo' and 'Semiramide.' In Aug. 1827 she sang at the Theatre Royal, Dublin, appearing nine times at 100 guineas for each performance.

She then went to Italy and played at Trieste, and at Naples, where Pacini wrote 'Niobe' for her. The Neapolitans failed to recognise her full merits, but she was better appreciated at Bologna, Milan, Vienna and Verona. At Milan, Bellini wrote for her the 'Sonnambula' (1831) and 'Norma' (1832).

From June to Sept. 1833, Pasta and Bellini were together in London, and in 1833 and 1834 she was once more at Paris, singing in 'Sonnambula' and 'Anna Bolena.' Now, for the first time, her voice seemed to have lost something of its beauty and truth; her intonation had become very uncertain, and she sang flat sometimes through the whole of an

opera. But her dramatic talent, far from being impaired, was even more remarkable than ever.

Once more in Italy, Pasta reappeared in a few of her famous rôles at some of the chief theatres, spending every summer at the beautiful villa which she had bought in 1829 near the Lake of Como, where she gave herself up to the delights of cultivating a magnificent garden.

Pasta sang again in England in 1837; but her voice was nearly gone. In 1840, though so long retired from the stage, she accepted an offer of 200,000 frs. to sing at St. Petersburg; but it would have been better for her reputation as a singer had she refused it. The same may be said of her last visit to London, in 1850, when she only appeared twice in public.

Madame Pasta was said to have had only one child, a daughter; but she had a son also, whom she mentions in a letter¹ to the Princess Belgiojoso, her 'Carissima Teresa.' She had some pupils, of whom Parodi was the most distinguished. This great singer died at her villa on the Lake of Como.

J. M.; addn. W. H. G. F.

PASTERWITZ, GEORG (b. Bierhütten, Diocese of Passau, June 7, 1730; d. Kremsmünster, Jan. 26, 1803), received his education chiefly in the Benedictine Abbey of Kremsmünster, in Upper Austria, where music was zealously cultivated. He afterwards studied at Salzburg, and had lessons in counterpoint from Johann Ernst Eberlin, Kapellmeister to the Archbishop of Salzburg. He took the monastic vows in Kremsmünster, and was ordained priest in 1755, devoting himself for a while almost exclusively to music. His chief models were Fux, Caldara and Eberlin. From 1767-82 he was Kapellmeister to the Abbey, and was also largely employed in other educational work. From 1785-96 he lived chiefly at Vienna as Agent for the Abbey, and enjoyed friendly intercourse with Haydn, Mozart, Salieri and Albrechtsberger. Several of his masses were performed at St. Stephen's and the Imperial Chapel. His works, published by himself, were all instrumental, and consist of eight Fugues, according to the order of the Church Tones, described as being either for the organ or the clavicembalo, op. 1, dedicated to the Abbé Stadler; eight Fugues, op. 2, dedicated to Salieri; eight Fugues, op. 3, dedicated to the Baron van Swieten; '300 Themata und Versetten zum präambuliren und fugiren mit orgel oder clavier,' op. 4. A Requiem Mass of his was afterwards printed at Munich, but an enormous quantity of his church music remains in MS. at Kremsmünster; also various works for the theatre. His fugues are of the light and pleasing order, rather than suited for the organ. E. von Werra has edited three in his organ book. J. B. M.

PASTICCIO, literally 'a pie,' a species of

¹ Formerly in the possession of the writer.

lyric drama composed of airs, duets and other movements, selected from different operas and grouped together, not in accordance with their original intention, but in such a manner as to provide a mixed audience with the greatest possible number of favourite airs in succession.

It is not at all necessary that the movements contained in a pasticcio should all be by the same composer.¹ During the greater part of the 18th century, when the pasticcio enjoyed its highest degree of popularity, some of the greatest masters then living patronised it openly, and apparently without any feeling of reluctance.

In early times it was a very common custom to mention the name of the librettist of an opera upon the public announcement of its performance, without that of the composer; and it seems exceedingly probable that when this was done, more than one composer was concerned, and the work was, in reality, a pasticcio. We know that Caccini contributed some of the music to Peri's 'Euridice' in the year 1600, though his name does not appear upon the title-page; and that as early as 1646 a genuine pasticcio was performed, at Naples, under the title of 'Amor non a legge,' with music by several different composers, of whose names not one has been recorded. Such cases, however, are much rarer in the 17th century than in that which followed, and serve only to show how the practice of writing these compound operas originated.

Perhaps the most notable pasticcio on record is 'Muzio Scevola,' of which, in the year 1721, Filippo Mattei composed the first act, Giovanni Maria Bononcini the second, and Handel the third. Each composer prepared a complete overture to his own share of the work; and each, of course, did his best to outshine the efforts of his rivals; yet the opera survived very few representations, notwithstanding the éclat which attended its production; and it was never afterwards revived.

In the year 1746 Gluck produced at the King's Theatre, in the Haymarket, a pasticcio, called 'Piramo e Tisbe,' in which he introduced all his own most successful airs. (See OPERA.)

The leading principle of the Pasticcio has been frequently introduced into English operas, more especially those of the older school. The 'Beggars' Opera' will occur to the reader as a notable instance of its application. But it must be remembered that in operas of this class the music is often only of an incidental character, and the objection to the system is, therefore, far less serious than in the case of Italian operas of the same, or even earlier, date. The ephemeral 'musical comedies' of our own day are generally the work of several composers or compilers, and so bear a certain analogy to the pasticcio above described.

W. S. R., rev.

¹ In 1789 a Pasticcio called 'L'Ape' was produced at Vienna, in which no less than twelve composers were represented. (F. H. Morsani in London, p. 75, note.)

PASTON, EDWARD, a 16th-century English musician, music-master of Princess (afterwards Queen) Mary, daughter of Henry VIII.; collected and (?) wrote in Italian lute tablature, several books of lute pieces, including some of his own composition (Q.-L.).

PASTORALE. (1) A dramatic composition or opera, the subject of which is generally of a legendary and pastoral character. Pastorales had their origin in Italy, where, at the time of the Renaissance, the study of the Eclogues of Theocritus and Virgil led to the stage representation of pastoral dramas such as Politian's 'Favola di Orfeo,' which was played at Mantua in 1472. The popularity of these dramatic pastorales spread from Italy to France and Spain, and eventually to Germany; but it is principally in France that they were set to music, and became of importance as precursors of the opera. In Apr. 1659 'La Pastorale en musique,' the words by the Abbé Porrin, the music by Cambert, was performed at Issy, at the house of M. de Lahaye, and proved so successful that the same authors wrote another similar work, 'Pomone,' which was played in public with great success, Mar. 19, 1671. These two pastorales are generally considered as the earliest French operas. The pastorale, owing to the weakness of its plot, was peculiarly suited for the displays of ballet and spectacle which were so much in vogue at the French court, and examples of this style of composition exist by nearly all the French composers before the Great Revolution. Lully's 'Acis et Galathée' ('Pastorale héroïque mise en musique') is perhaps one of his finest compositions. Mattheson (*Vollkommener Kapellmeister*), with his passion for classifying, divides pastorales into the very obvious categories of comic and tragic, and gives some quaint directions for treating subjects in a pastoral manner. The pastorale must not be confounded with the pastourelle, which was an irregular form of poetry popular in France in the 12th and 13th centuries.

(2) Any instrumental or vocal composition in 6-8, 9-8 or 12-8 time (whether on a drone bass or not), which assumes a pastoral character by its imitation of the simple sounds and melody of a shepherd's pipe. The Musette and the Siciliana are both 'pastoral' forms; the former is of a slower tempo, and the latter contains fewer dotted quavers. 'He shall feed his flock' and the 'Pastoral Symphony' in the 'Messiah' are both in 12-8, and so is the Pastoral Sinfonia which begins the second part of Bach's Christmas Oratorio. Other examples of this class of composition are the first movement of Bach's Pastorale for organ (B.-G. xxxviii. p. 135), and the air 'Pour Bertha moi je soupire' in Meyerbeer's 'Le Prophète.' The 'Sonnambula' was originally entitled 'dramma pastorale.'

PASTORAL OBOE, see SHEPHERD'S PIPE.

PASTORAL SYMPHONY. 'Sinfonia Pastorale, No. 6,' is the title of the published score of Beethoven's sixth symphony, in F, op. 68 (Breitkopf & Härtel, May 1826).

The autograph, in possession of the Baron van Kattondyke, of Arnheim, bears the following inscription in Beethoven's own writing:

'Sinf. 6 ta. Da Ludwig van Beethoven. Angenehme heit're Empfindungen welche bey der Ankunft auf dem Lande im Menschen erwach—Allo ma non troppo—Nicht ganz geschwind—N.B. die deutschen Überschriften schreiben sie alle in die erste Violini—Sinfonie von Ludwig van Beethoven';

or, in English:

'6th Symphony, by Luigi van Beethoven. The pleasant, cheerful feelings, which arise in man on arriving in the country—Allo ma non troppo—not too fast—N.B. [this is to the copyist] the German titles are all to be written in the first-violin part—Symphony by Ludwig van Beethoven.'

Besides the 'titles' referred to in this inscription, which are engraved in the first violin part, on the back of the title-page, Beethoven has given two indications of his intentions—(1) on the programme of the first performance, Dec. 22, 1808, and (2) on the printed score. We give the three in parallel columns:

First Violin Part.

Pastoral Sinfonie oder Erinnerungen an das Landleben (mehr Ausdruck der Empfindung als Malerei)

1. Allegro ma non molto. Erwachen heiterer Empfindung an bey der Ankunft auf dem Lande.
2. Andante con moto. Scene am Bach
3. Allegro. Lustiges Zusammensich der Landleute.
4. Allegro. Gewitter. Sturm.
5. Allegretto. Hirtengesang. Frohe und dankbare Gefühle nach dem Sturm.

Pastoral Symphony or Recollections of country life. (More expression of feeling than painting)

1. Allegro ma non molto. The awakening of cheerful feelings on arriving in the country
2. Andante con moto. Scene at the brook.
3. Allegro. Merry meeting of country folk.
4. Allegro. Thunderstorm, tempest.
5. Allegretto. Song of the shepherd. Glad and thankful feelings after the storm.

A book of sketches for the first movement, now in the British Museum, is inscribed 'Sinfonie caratteristica. Die Erinnerungen von dem Landleben'; with a note to the effect that 'the hearer is to be allowed to find out the situations for himself'—'Man überlässt dem Zuhörer sich selbst die Situationen auszufinden.'

The work was composed in the neighbourhood of Vienna, in the wooded meadows between Heiligenstadt and Grinzing, in the summer of 1808, at the same time with the Symphony in C minor. The two were each dedicated to the same two persons, Prince Lobkowitz and the Count Rasoumowsky; their opus numbers follow one another, and so closely were the two connected that at the first performance—in the Theater an der Wien, Dec. 22, 1808—their numbers were interchanged, the Pastoral being called 'No. 5' and the C minor 'No. 6.' This confusion lasted as late as 1820, as is shown by the list of performances of the Concert

Programme of Concert, Dec. 22, 1808.

Pastoral Sinfonie (No. 5) mehr Ausdruck der Empfindung als Malerei.

- 1tes Stück. Angenehme Empfindungen, welche bey der Ankunft auf dem Lande im Menschen erwachen.
- 2tes Stück. Scene am Bach.
- 3tes Stück. Lustiges Zusammensich der Landleute; fällt ein.
- 4tes Stück. Donner und Sturm; in welches einfällt.
- 5tes Stück. Wohlthätige, mit Dank an die Gottheit verbundene Gefühle nach dem Sturm.

Pastoral Symphony (No. 5) more expression of feeling than painting.

- 1st piece. The pleasant feelings aroused in the heart on arriving in the country.
- 2nd piece. Scene at the brook.
- 3rd piece. Jovial assemblage of country folk, interrupted by
- 4th piece. Thunderstorm, interrupted by
- 5th piece. Pleasurable feelings after the storm, mixed with gratitude to God.

Printed Score.

Sinfonia Pastorale, No. 6. Erwachen heiterer Empfindungen bey der Ankunft auf dem Lande. Allo ma non troppo.

- Scene am Bach. Andante molto moto.
- Lustiges Zusammensich der Landleute. Allegro.
- Gewitter. Sturm. Allegro.
- Hirtengesang. Frohe und dankbare Gefühle nach dem Sturm. Allegretto.

Sinfonia Pastorale, No. 6. The awakening of cheerful feelings on arriving in the country. Allo ma non troppo.

- Scene at the brook. Andante molto moto.
- Merry meeting of country folk. Allegro.
- Thunderstorm, tempest. Allegro.
- Song of the shepherd. Glad and thankful feelings after the storm. Allegretto.

Spirituel at Vienna, given by Hanslick (*Concertwesen in Wien*, p. 189).

The titles of the movements were curiously anticipated by KNECHT (q.v.), more than twenty years earlier, in a 'Portrait musical de la Nature.'

The symphony was first played in London at a concert given for the benefit of Mrs. Vaughan, at Hanover Square Rooms, May 27, 1811. On Apr. 14, 1817, it first appears in the programmes of the Philharmonic Society.¹ On three occasions attempts were made to turn the symphony into a stagio-piece. At Bochsa's benefit at the Haymarket (June 22, 1829); at Düsseldorf, in Feb. 1863, by the Artists' Club, 'Der Malkasten'; and at Drury Lane, Jan. 30, 1864, it was given with scenery, and in the two English performances, with action also.

G.

PATERSON & SONS, one of the most important among the Scottish music-publishers. The business was started in 1819 by Robert Paterson, Mortimer & Co., at 18 North Bridge, Edinburgh, who in the following year removed to No. 51 in the same street. In 1826 the firm

went to 43 Hanover Street, when by the advent of Peter Walker Roy it became Paterson & Roy. Under this last name it existed until the death of Roy in 1850, when Paterson's sons took share in the business, and the house traded under the name Paterson & Sons. Before 1837 the firm had removed to 27 George Street; later a dépôt was opened in Castle Street, Berners Street, London. Branches were at different times started in other parts of Scotland, at Glasgow, 1857; Perth, 1864; Ayr, 1868; Dundee, 1882; Dumfries, 1886; Paisley, 1887; Kilmarnock, 1892, and later, at Aberdeen, Oban, and other places.

The original Robert Paterson died in 1859, when his second son, Robert Roy Paterson (b. 1830; d. Dec. 3, 1903), became senior partner. The latter was a skilful performer on several instruments and did much to advance

¹ But see *Beethoven and his Nine Symphonies*, by Sir G. Grove p. 226, note.

music in Scotland (see sketch of life and portrait in *Mus. T.*, Jan. 1904).

Robert E. Stirling Paterson, grandson of the founder, succeeded to his father's position.

The firm is distinguished for its great issue of Scottish music of all kinds, which includes reprints of standard editions of Scottish songs, etc. F. K.

PATEY, JANET MONACH, *née* WHYTOCK (b. London, May 1, 1842; d. Feb. 28, 1894). Her father was a native of Glasgow. She received instruction in singing from John Wass, and made her first appearance in public at a very early age, at the Town Hall, Birmingham. She became a member of Henry Leslie's Choir, and afterwards received further instruction from Mrs. Sims Reeves and Pinsuti. In 1865 she was engaged by Lemmens for a provincial concert tour. In 1866 she was married to J. G. PATEY (2), and sang at the Worcester Festival of that year. From that time her reputation continued to increase, until in 1870, on the retirement of Madame Sainton-Dolby, she succeeded to her position as leading contralto concert-singer, and as such sang in all the principal new works. In the part of Blanche of Devan, in Macfarren's 'Lady of the Lake,' she developed an amount of dramatic power for which her admirers had not given her credit.

In 1871 she started on a concert tour in America with Edith Wynne, Cummings, Santley, and her husband, and enjoyed great success. In 1875 she sang with her usual success at the Cirque des Champs Elysées, Paris, in French, in four performances of the 'Messiah,' on the invitation of Lamoureux, and under his direction. Also on Jan. 31 of the same year she sang in English 'O rest in the Lord,' at the concert of the Conservatoire, with such effect that she was re-engaged for the next concert, Feb. 7, when she more than confirmed the previous impression. In commemoration of this the directors presented her with a medal bearing the dates of the concerts, a compliment rarely accorded by that body to any singer. On Mar. 15, 1881, when Lamoureux gave his first concert in England at St. James's Hall, she sang Godard's scena 'Aurore,' and in Berlioz's Duo Nocturne from 'Beatrice et Bénédicte' with Mme. Brunet-Lafleur, who had sung with her previously in the 'Messiah' at Paris. In 1890 and 1891 she sang on tour in Australia, and on her return appeared, Oct. 11, 1891, at the Crystal Palace. Intending to retire, she undertook a farewell tour, but it was brought to a tragic close by her sudden death. She had sung at the Albert Hall, Sheffield, the previous evening, and after singing 'The Banks of Allan Water,' in response to an encore, fainted as she left the platform, dying at her hotel next morning, without regaining consciousness. Mme. Patey possessed

'a magnificent contralto . . . produced with marvellous art . . . the real contralto, such as one admired formerly in Mesdames Pisaroni, Brambilla, and Alboni' (*L'Art Musical*). A. C.

(2) JOHN GEORGE (b. Stonehouse, Devonshire, 1835; d. Falmouth, Dec. 4, 1891), husband of the above, son of a clergyman, was educated for medicine, but abandoned it for music. His voice was a baritone; he studied at Paris and Milan, made his first appearance, Oct. 11, 1858, at Drury Lane, as Plunkett, in an English version of 'Martha,' and sang for several seasons in English opera at Covent Garden and Her Majesty's, creating parts in 'Robin Hood' (Oct. 10, 1860), 'La Reine Topaze' (Dec. 26, 1860), 'Puritan's Daughter' (Nov. 30, 1861), 'Lily of Killarney' (Feb. 8, 1862), etc. He also sang in Italian opera at the Lyceum in 1861, and was frequently heard in oratorio and concerts. He accompanied his wife on her American and Australian tours. He retired in 1888, and entered into partnership with Willis as a music-publisher. A. C.

PATÍÑO, CARLOS (17th cent.), Spanish composer, first heard of in 1632, when he received a sum of money from John IV. of Portugal. In the following year (in which another grant was made to him by John IV.) he was appointed to the Chapel Royal, as assistant director under Matias Romero. He is said to have died about 1683; but this is improbable, seeing that the Benedictus for the funeral of Philip II. (1599) is attributed to him. His works include incidental music to plays and church compositions. MSS. exist at Madrid (Bibl. Municipal, Benedictus; Bibl. Nac., 4 choruses from plays (?), 4 v.); also in Pizarro MS., M. 1262; Saragossa, Cathedral de N.S. del Pilar (villancicos for Christmas and Epiphany); Seville (Letania, 8 v.); Berlin (villancico, 3 v.). Eslava printed a Mass for 8 v. in two choirs. J. B. T.

PATON, MARY ANNE (b. Edinburgh, Oct. 1802; d. Bulcliffe Hall, Chapelthorpe, July 21, 1864), daughter of George Paton, writing-master in the High School of Edinburgh. From a very early age she manifested a capacity for music, and when little more than 4 years old learned to play the harp, piano-forte and violin. She came, indeed, of a musical family; her father was a violinist, and a great-uncle, Walter Nicoll, was instrumental in founding the Aberdeen Musical Society in 1748. In 1810 Miss Paton appeared at concerts in Edinburgh, singing, reciting and playing—among other pieces, Viotti's Concerto in G. She also published several compositions. In 1811 the family removed to London, and during the next three seasons she sang at private concerts, and annually at a public concert of her own. In 1814 she was withdrawn from public life for the purpose of completing her education. In 1820 she reappeared and sang at the Bath concerts with success, and in 1821 at various other places. On Aug. 3, 1822,

she made her first appearance on the stage at the Haymarket Theatre as Susanna in 'The Marriage of Figaro,' with decided success. On Oct. 19, 1822, she appeared at Covent Garden as Polly, and on Dec. 7 fully established herself by her impersonation of Mandane in Arne's 'Artaxerxes.' On July 23, 1824, she achieved a great success in the part of the heroine in Weber's 'Der Freischütz,' then first produced in England. In the same year she was married in Scotland to Lord William Pitt Lennox, a younger son of the 4th Duke of Richmond, but continued her professional appearances under her maiden name. On Apr. 12, 1826, on the production of Weber's 'Oberon,' she took the part of Reiza. Weber had previously written to his wife, 'Miss Paton is a singer of the very first rank, and will play Reiza divinely.' From that time she was at the head of her profession, alike in the theatre, the concert-room, and the oratorio orchestra. In June 1830 she separated from her husband, and on Feb. 26, 1831, obtained a decree of the Court of Session in Scotland dissolving the marriage. Shortly afterwards she was married to Joseph Wood, the tenor singer, and in the same year reappeared at Covent Garden and afterwards at the King's Theatre in 'La Cenerentola.' She was next engaged at Drury Lane, and appeared as Alice in an English version of Meyerbeer's 'Robert le Diable,' produced Feb. 20, 1832. In 1833 Mr. and Mrs. Wood began to reside at Woolley Moor, Yorkshire. In 1834 they paid a visit to the United States, and repeated it twice within the next few years. In Apr. 1837 Mrs. Wood reappeared in London, and continued to perform until Feb. 1843, when she became a Roman Catholic, and took up her residence in the convent by Micklegate Bar, York. The change, however, was of short duration, and in July she quitted the convent. In 1844 she was engaged at the Princess's Theatre. She soon afterwards retired from her profession, and settled with her husband at Woolley Moor. Here she took a warm interest in the Anglican service at Chapelthorpe. She composed for it, formed and trained a choir, in which she herself took the leading part. In 1854 they left Yorkshire and went abroad. In 1863 they returned to Bulcliffe Hall, in the neighbourhood of Chapelthorpe, and there Mrs. Wood died, leaving a son (b. Woolley Moor, 1838) as the only representative of her family. Mrs. Wood's voice was a pure soprano, of extensive compass (A below the staff to D or E above), powerful, sweet-toned, and brilliant. She was mistress of the florid style, and had great powers of expression. She was renowned for her beauty, both of feature and expression, inherited from her mother, Miss Crawford of Cameron Bank; and the portraits of her are numerous, including those by Sir Thos. Lawrence, Sir W. Newton, Wageman

and others. Her younger sisters were both singers; ISABELLA appeared at Drury Lane about 1825, and ELIZA at the Haymarket as Mandane in 1833.

PATROCINIUM MUSICES, see BERG, Adam.

PATRON'S FUND OF THE R.C.M. This fund (£27,000) was given in 1903 by Sir S. Ernest Palmer to the R.C.M. for the encouragement of young British musicians. It is primarily for the benefit of past and present pupils of the R.C.M., but it can be, and is, extended to any other British subject, whether educated at any of the music schools or privately. Composers and performers are given a hearing at concerts and public rehearsals, or they may receive grants towards the costs of public recitals, study abroad or musical publication. In recent years the public rehearsals have replaced the concerts. They are usually held in the concert-hall of the R.C.M., a professional orchestra being engaged—the London Symphony, New Queen's Hall and Royal Albert Hall in turn—under the general direction of Adrian Boult. Composers may be asked to conduct their own works, if they show sufficient ability. Many leading musicians of the day, especially composers, owe something to the activities of the fund, either from the actual production of a work which has become well known, or from the valuable experience of hearing their music played, an experience otherwise unobtainable.

N. C. G.

PATTA, DOM SERAFINO, a 16th-17th-century Benedictine monk of Monte Cassino, near Naples; organist at various churches, probably belonging to that monastery; composer of at least 6 books of masses, sacred songs, etc., published between 1606 and 1619 (Q.-L.).

PATERSON, ANNIE WILSON (b. Lurgan, Oct. 27, 1868), was educated at Alexandra College, Dublin, and R.I.A.M.; graduated Mus.B. and B.A., 1887, and Mus.D., 1889, Royal University of Ireland (the first woman to obtain the degree); examiner in music, R.U.I. from 1892-95. She originated the FEIS CEOL (q.v.) in 1897. She has been a lecturer on Irish Music for 30 years, and in 1924 was appointed to the chair of Irish Music at University College, Cork. After holding several organ appointments she accepted her present post of organist of Shandon Church, Cork, in 1904. Beginning with a cantata, 'Finola,' in 1888, she has essayed most forms of composition with considerable success. She is best known as the author of numerous musical books, including the *Story of Oratorio*, *Schumann (Master Musician Series)*, *Chats with Music Lovers*. She is indefatigable in disseminating Irish folk-music, of which she has made a lifelong study.

W. H. G. F.

PATTER-SONG. 'Patter' is the technical—or rather slang—name for the kind of

gabbling speech with which a cheap-jack extols his wares, or a conjuror distracts the attention of the audience while performing his tricks. It is used in music to denote a kind of song, the humour of which consists in getting the greatest number of words uttered in the shortest possible time. Instances of this form of composition are Quaver's song in Samuel Arnold's 'Enraged Musician' (1788); Haydn's 'Durch Italien, Frankreich, Preussen,' from 'Der Ritter Roland'; Grétry's syllabic duet in 'La Fausse Magie'; Dulcamara's song in Donizetti's 'L'elisir d'amore,' etc. Mozart and many other composers often introduce bits of 'patter' into buffo solos, as, for instance, the middle of 'Madamina' in 'Don Juan,' etc. This form of song has for long been popular with 'entertainers' from Albert Smith to Corney Grain, and probably owes its technical name to a song sung by Charles Mathews in 'Patter versus Clatter.' Patter-songs fill an important place in the comic operas of Sullivan. 'My Aged Employer' in Burnand's libretto to 'Cox and Box' was followed by 'My name is John Wellington Wells' in Gilbert's 'The Sorcerer,' the first of a whole series. M.

PATTI, (1) ADELINA (ADELA JUANA MARIA) (b. Madrid, Feb. 10, 1843; d. Craig-y-Nos Castle, Wales, Sept. 27, 1919), the most famous soprano singer of her day, was the youngest daughter of Salvatore Patti, an Italian singer (1800-69), by his marriage with Caterina Barilli or Barilli, née Chiesa, also well known as a singer in Italy. The family went to America, the father being for a time manager of Italian opera at New York. Having shown great aptitude as a singer, Patti received some instruction from her half-brother, Ettore Barilli. She sang at a concert in 1850 under the direction of Max Maretzek. From 8 to 12 years of age she sang at concerts under the direction of Maurice Strakosch, who had married her elder sister Amalia, but in 1855 was wisely withdrawn for some years for the purpose of further study.¹ She went on a short concert tour with Gottschalk in the West Indies, then reappeared Nov. 24, 1859, at New York, making her début on the operatic stage as Lucia, and sang other parts, in all of which she was highly successful. Patti made her début in England, May 14, 1861, at the Royal Italian Opera, as Amina in 'La Sonnambula,' and from that time became famous, confirming an extraordinary success by her performances of Lucia, Violetta, Zerlina, Martha and Rosina. She sang that autumn at the Birmingham Festival, in opera at Liverpool, Manchester, etc., and afterwards was engaged at Berlin, Brussels and Paris. From 1861 until 1884 she sang every season at Covent Garden, and in 1885 and 1887 at Her Majesty's during Mapleson's last

seasons of opera, in a repertory of about thirty parts in the operas of Mozart, Rossini, Bellini, Donizetti, Verdi, Meyerbeer and Gounod. She was more closely identified with Rosina in 'Il Barbiere' than with any other character, and Rossini rearranged a good deal of the music for her voice. Patti made an operatic tour in the provinces in 1862; sang at the Birmingham Festivals of 1861 and 1864, notably as Adah on the production of Costa's 'Naaman'; at the Handel Festivals of 1865, 1877 and 1880; at the Liverpool Festival of 1874, as well as in several brilliant provincial concert tours. She enjoyed the same unparalleled popularity on the Continent, having fulfilled engagements at Paris, Vienna, St. Petersburg, Moscow, etc., in various cities of Germany, Italy, Spain, and later in North and South America.

The new parts which she created in England are Annetta ('Crispino e la Comare'), July 14, 1866; Campana's Esmeralda, June 14, 1870; Poniatowski's Golmina, June 1, 1872; Juliet, July 11, 1867; La Catarina ('Diamans de la couronne'), July 3, 1873; Aida, June 22, 1876; Estella ('Les Bluets') of Jules Cohen (Covent Garden, under the title of 'Estella,' July 3, 1880), and Lenepveu's Velléda, July 4, 1882. In 1888 she sang Juliette in French in Paris, and in 1895 reappeared at Covent Garden at six special performances, at which she sang Rosina, Violetta, and Zerlina, the only Mozart character she played. Her perfect method and finished singing of familiar songs attracted large audiences to the Albert Hall, until the end of 1906, when she gave a farewell concert on Dec. 1, and afterwards undertook a final tour in the provinces.

She married (1) July 29, 1868, Henri, Marquis de Caux, equerry to Napoleon III., from whom she was separated in 1877 and divorced in 1885; (2) in 1886, the singer Ernest Nicolas (NICOLINI), who died in 1898; and (3) in 1899, Baron Cederstrom.

The professional retirement of the great singer was followed by an occasional public appearance on behalf of some charity in which she was interested; as, for example, at the Albert Hall in Nov. 1907, at the benefit concert given by her concert impresario, Percy Harrison; and again, a year later, at a concert organised by Father Vaughan in aid of East End children. She also took part in the 'farewells' of her old colleagues Mme. Albani and Wilhelm Ganz; her last appearance in public being on Oct. 20, 1914 (that is, in her 72nd year), at a concert given at the Albert Hall in aid of the Red Cross War Fund. Even then her voice retained a marvellous degree of freshness, and its timbre was still beautiful as it faded to silence for the last time in 'Home, sweet Home.' In 1918 her health began to give way, and she died after a short illness at the age of 75 at her Welsh home.

¹ See a letter from Maurice Strakosch in *The Times*, Sept. 26, 1884.

Craig-y-Nos Castle. The remains were temporarily deposited in London at the Kensal Green (R.C.) cemetery, and afterwards removed to a grave in the principal avenue at Père Lachaise, Paris.

The career of Adelina Patti as a public singer was the longest on record: reckoned from her first appearance in 1850 at New York, as a child of seven, to her farewell in London, it extended over a period of fifty-six years. It was, in many other respects as well, a career without parallel; for she stood alone among the operatic *prime donne* of her time, the sole inheritor of the title 'diva' which descended to her from Giulia Grisi, and in the general opinion the last of the illustrious line of great coloratura sopranos that included Catalani and Pasta. At the same time, such was her genius, such the extraordinary nature of her vocal gifts, apart from the flexibility and the haunting beauty of her organ, that among the forty-two operas in which she sang there were comprised works of every calibre and every style and, with but few exceptions, she triumphed in them all. A complete list of these forty-two operas is given below. From her girlhood in America to the time when she created the rôle of Aida at Covent Garden (1876) she had been accustomed to sing heavy as well as light parts; but it was during the years that followed the latter event that her surprising dramatic development occurred; while the irresistible fascination of her singing rendered unimpaired and incomparable to the end.

MOZART.—'Don Giovanni'
ROSSINI.—'Il Barbiere di Siviglia,' 'Mosè in Egitto,' 'La gazza ladra,' 'Otello,' 'Beniframite.'
BELLINI.—'La Sonnambula,' 'I Puritani.'
DONIZETTI.—'Lucia di Lammermoor,' 'Linda di Chamouni,' 'Don Pasquale,' 'L'elisir d'amore,' 'La figlia del reggimento.'
VERDI.—'Il Trovatore,' 'Giovanna d'Arco,' 'La Traviata,' 'Luigia Miller,' 'Ernani,' 'Rigoletto,' 'Aida.'
MEYERBEER.—'Dinorah,' 'Les Huguenots,' 'L'Étoile du nord,' 'L'Africaine.'
FLOTOW.—'Martha.'
GOUNOD.—'Faust,' 'Mireille,' 'Roméo et Juliette.'
AUBER.—'Les Diamants de la couronne,' 'Fra Diavolo.'
THOMAS.—'Hamlet.'
BIZET.—'Carmen.'
DELIBES.—'Lakmé.'
GOWEN.—'Il Guarany.'
D'IVRY.—'Les Amantes de Véronne.'
CARPENA.—'Eméralda.'
LESCREPEL.—'Vedra.'
RICCI.—'Crispino e la Comare.'
POMATOWSKI.—'Gelmira.'
COHEN.—'Estrella,' ('Les Bluettes').
PIZZI.—'Gabriella.'
FOLLOMBAIS.—'Dolorès.'

BIEL.—HERMAN KLIN, *The Reign of Patti*, authorised biography. H. K.

(2) CARLOTTA (b. Florence, 1840; d. Paris, June 27, 1889), elder sister of Adelina, was educated as a pianist under Herz, but abandoned the piano in favour of singing. She made her début in 1861 at New York as a concert-singer, and afterwards fulfilled an engagement there in Italian opera, and was successful; but soon after abandoned the stage on account of her lameness. She made her début in England, Apr. 16, 1863, at a concert at Covent Garden Theatre, attracted attention on account of her remarkable facility of execution and a compass extending to *f*'''. She obtained a position here in concerts

as an accomplished soprano *leggiero*, and was for several seasons a great attraction at promenade and other concerts. In 1872 she sang at the Philharmonic Society Mozart's florid aria, 'Nò, che sei non capace,' with great success. She made several tours in the provinces, on the Continent, and in North and South America. She married, Sept. 3, 1879, Ernst de Munk. the Belgian violoncellist. She finally settled in Paris as a teacher, and lived there till her death.

(3) CARLO, their brother (b. Madrid, 1842; d. St. Louis, U.S.A., Mar. 17, 1873), was taken to America, like his sisters, when a child, studied the violin, and at the age of 20 became leader at the New Orleans Opera-House, afterwards at New York and the Wakefield Opera-House, St. Louis, Missouri. A. C.

PATRICK, NATHANIEL (d. Worcester, Mar. 1594/95), organist and composer. It seems likely that he was the son of Dr. Gyle Patrick, who for many years was the cathedral physician and lived in the parish of St. Michael's, Worcester, where Nathaniel was buried. Nathaniel was Master of the Chorists at Worcester Cathedral from about 1590 until his death. He married, on Sept. 23, 1593, Alice (or Eleanor) Hassard. Their only child died as an infant. Patrick's will was proved at Worcester on May 25, 1595; it is printed in full, together with an interesting inventory of his goods, in Sir Ivor Atkins's *The Early Occupants of the office of Organist . . . of the Cathedral Church of . . . Worcester*. Patrick's widow married Thomas TOMKINS (q.v.), who succeeded him as organist of Worcester Cathedral.

Text of his Service in G is to be found among the early MS. partbooks in Worcester, Durham, Ely and elsewhere. It was printed in Arnold's *Cathedral Music*, but wrongly ascribed there to Richard Patrick, a lay-clerk at Westminster Abbey, c. 1616–26. It has more recently been printed under the editorship of J. E. West.

In 1597 licence was granted at the Stationers' Hall to print a work entitled:

'Songs of Sundry Natures whereof some ar Divine, some ar Madrigalles and the rest Psalmes and Rymes in Latin composed for 6 and 6. voices and one for 8. voices by Nathaniel Patrick sometime Master of the children of the Cathedrall Church c. Worcester and organist of the same.'

Patrick died two years before this, and it is pretty certain that the book was never printed. Three madrigals by this composer are in B.M. Add. MSS. 17,786-91, and another fragment is in B.M. Add. MSS. 18,936-39. E. H. F.

PAUER, (1) ERNST (b. Vienna, Dec. 21, 1826: d. May 9, 1905), pianist and eminent teacher. His father was first minister of the Lutheran church, director of the theological seminary in Vienna, and superintendent-general of the Lutheran churches of the Austrian Empire; his mother was a Streicher, of the great pianoforte-making family. He

studied the pianoforte, first under Theodor Dirzka, and then under Mozart's son, Wolfgang Amadeus, and harmony and counterpoint under Sechter. He appeared first in public in 1842; one of his compositions was published in that year. In 1845 he went to Munich to study instrumentation and dramatic composition under Franz Lachner. In Apr. 1847 he competed for and obtained the appointment of director of the musical societies at Mainz, and was employed by the publishing firm of Schott to compose operas, 'Don Riego' (1849), 'Die rothe Maske' (1850) and 'Die Braut' (1861), which were performed in Mainz and Mannheim; also some important vocal works, and overtures and entr'actes for the use of the local theatre. This appointment, in which he gained great experience, he resigned in Apr. 1851, and proceeded to London, where his performances at the Philharmonic (June 23, Hummel's A minor concerto) and the Musical Union were received with much favour. After this success he resolved to pursue his career in England, though returning for a time to Germany.

In 1852 he married Miss Andreae, of Frankfurt, a good contralto singer.

In 1861 Pauer gave a series of six performances with a view of illustrating the foundation and development of pianoforte composition and playing, in chronological series from about 1600 to modern times, elucidated and assisted by programmes containing critical and biographical notices. Similar performances, but with different programmes, were given in 1862 and 1863, and again in 1867, in Willis's and the Hanover Square Rooms. In 1862 he was selected by Austria and the Zollverein for the Musical Jury of the London International Exhibition. He was at the same time the official reporter for the Prussian Government, and his report was reproduced by some of the chief industrial journals, and was translated into various languages. For these services he received the Imperial Austrian Order of Francis Joseph, and the Prussian Order of the Crown. During the next few years Pauer played in Holland, Leipzig, Munich and Vienna, in fulfilment of special engagements, and was appointed pianist to the Imperial Austrian court in 1866.

In 1870 he began a new phase of his active career, that of lecturing upon the composers for the harpsichord and pianoforte; the form and spirit of the varieties of modern music, as the Italian, French and German; the history of the oratorio; the practice of teaching; and many cognate subjects. These lectures were given at the Royal Institution, the South Kensington Museum, and in many other important places in Great Britain and Ireland. When Cipriani Potter retired from the R.A.M., Pauer took his class, and retained it for five

years. In 1876, on the foundation of the National Training School for Music at Kensington Gore, he became the principal pianoforte professor of that institution, and in 1878 was made a member of the Board for Musical Studies at Cambridge University, and the following year an examiner. He edited many of the works of the classical and romantic composers, among them 'Alte Klavier-Musik' (Senff, Leipzig), twelve books; 'Alte Meister' (Breitkopf & Härtel, Leipzig), 40 Nos. Also 'Old English Composers for the Virginals and Harpsichord' (Augener, London); and, under the auspices of the last-named publisher, an edition of the classical composers in a cheap form, embracing and including all the great masters from Bach and Handel to Schumann, and extending, up to July 1880, to nearly thirty volumes, of admirable clearness and convenience. Besides these are arrangements for children, and educational works, including the 'New Gradus ad Parnassum', 100 studies, some of them by himself; *Primer of the Pianoforte* (Novello & Co., 1876); *Elements of the Beautiful in Music* (ditto, 1876); *Primer of Musical Forms* (ditto, 1878); and *The Pianist's Dictionary* (1895). Also some interesting arrangements of Schumann's symphonies for four hands, and of Mendelssohn's PF. concerto for two pianos. As a pianist his style was distinguished by breadth and nobility of tone, and by a sentiment in which seriousness of thought was blended with profound respect for the intention of the composer. He retired to Germany in 1896.

A. J. H.

His son, (2) MAX (b. London, Oct. 31, 1866), pianist, was a pupil of his father till 1881, when he went to Carlsruhe and studied theory with Vincenz Lachner till 1885. In that year he made a successful appearance as a pianist in London, where, except for concert tours, he remained till 1887, when he settled in Cologne as piano teacher at the Conservatorium. In 1897 he migrated to a similar post at Stuttgart, and in 1908 succeeded De Lange as director of the Stuttgart Conservatorium. He held this position till 1924, when, on Stephan Krehl's death, he was appointed director of the Leipzig Conservatorium, where his energetic personality has already made itself felt in salutary reforms for widening the basis of musical education, and in the encouragement of ear-training.

As a pianist he ranks very highly indeed. His powers of interpretation are remarkable, and his sense of style enables him to do justice to music of all kinds and dates, except perhaps that of the modern extremists, with which he is not often in sympathy. His repertory is an exceptionally large one, and his memory is so amazing that it is scarcely an exaggeration to say that he never forgets anything that he has once learned. One can play to him any bar,

and often less than a bar, taken at random out of the whole range of piano literature from Scarlatti to Brahms, and, provided he has at some time in his life learned the piece (and there is exceedingly little that he has not learned), he can without any hesitation give the exact context and play as many of the preceding or succeeding bars as one cares to ask for.

He is a most stimulating teacher and employs many ingenious devices for quickening the interest and intelligence of his pupils. One of his methods is to have two pupils sitting at different pianos, and to ask one of them to start some piece (which both must know by heart) and to break off at any bar or note of a bar, as though he were playing for 'musical chairs,' whereupon the other pupil has to take up the thread and respond in like fashion—and so on till the end of the piece. Sometimes, again, he will tell a pupil to play (by heart) the first three or four or five bars of a movement and then, with hands away from the keyboard, to play *mentally* an equal number of the following bars, and to continue these alternations till the movement is ended. It needs a very short trial to discover how precise and thorough the knowledge of a piece must be before either of these tests can be successfully surmounted. Finally, mention should be made of Pauer's admirable teaching of ensemble-playing, where he makes generous and enthusiastic use of his consummate musicianship. H. B.

PAUKEN. The German name for Kettledrums. See DRUM. v. de P.

PAUL, OSCAR (b. Freiwaldau, Silesia, Apr. 8, 1836; d. Leipzig, Apr. 18, 1898), writer on music, was educated at Górlitz, where he first learned music from Klingenberg, and at the University of Leipzig. Here he studied music with Plaidy, Richter and Hauptmann, of whose system of harmony he became a warm partisan. In 1860 he graduated Ph.D., and after spending some time in various towns of Germany, especially Cologne, settled in Leipzig in 1866. Becoming known by his private lessons in the science of music, and by his treatise on *Die absolute Harmonik der Griechen* (1866), he was made teacher of musical history, pianoforte, composition, etc., at the Conservatorium in 1869, and Professor Extraordinarius at the University in 1872. His best and most important work is his translation (the first in Germany) and elucidation of Boethius (Leipzig, Leuckart, 1872). His important *Lehrbuch der Harmonik*, first published in 1880, went into a second edition in 1894. He also edited Hauptmann's *Lehre von der Harmonik* (1868), the *Geschichte des Claviers* (1869), the *Handlexicon der Tonkunst* (1871-73) and two musical periodicals, the *Tonhalle*, and its successor, the *Musikalisches Wochenblatt*. He was for many years musical critic of the *Leipziger Tagblatt*. F. G.

PAUMANN, CONRAD (b. circa 1410; d. Munich, Jan. 24, 1473), was a native of Nuremberg. Although heavily handicapped (he was born blind), he eventually attained an honoured position as a musician and as a fine organ-player. He was adopted by Ulrich Grundherr, burgher of Nuremberg, who, recognising the child's musical gifts, had them carefully cultivated. Ulrich died in 1423, but his son Paul also took Paumann under his protection. There is a reference in Hirsch's *Lebensbeschreibungen*, Nuremberg, 1756, p. 19, to the large organ made and erected in the church of S. Sebald, Nuremberg, by Heinrich Traxdorf in 1444, at the cost of 1150 gulden: possibly Paumann was at once appointed organist; he was certainly occupying the post in 1446. He was married the same year according to a document he issued in 1446, in which he and his wife Margaret Weichserin promised never to leave Nuremberg, where they had been treated with so much kindness, without first obtaining the permission of the burghers.¹ That Paumann was a person of some mark at that time is shown by Hans Rosenplut's poem, *Spruchgedichte auf die Stadt Nurnberg*, published in 1447, in which he is eulogised as organist and as contrapuntist.

In 1450 Paumann visited various towns; some time later, in 1467, he took up his residence in Munich, as organist to Duke Albrecht III., receiving a yearly salary of eighty gulden. A visit of his to Ratisbon in 1471 is recorded, when his playing of the organ in the Benedictine monastery, on St. Jacob's Day, drew a large crowd to listen, including the Emperor Friedrich III. and many notable persons in his suite.² A manuscript volume chiefly treating of events in Ratisbon fell into the hands of A. F. Oefele,³ who quotes a long passage from it stating that Paumann excelled his contemporaries in knowledge of the organ, lute, flute and other instruments, that his fame spread over Europe, and he received many presents from the Emperor Friedrich III., the Duke of Ferrara and others. It must be remembered that practically the only contemporary organist of note was the Florentine Antonio Squarcialupi, who died in 1475.

Paumann was buried in the Frauenkirche, where a tablet was erected with the inscription:

'Anno 1473 an Sancti Pauli Bekerunges Abent ist gestorben und hie begraben, der Kunstreichist aller Instrument und der Musica Meister, Conrad Paumann Ritter, burg von Nürnberg, und blinder geboren, dem Gott Gnad.'

An Italian decoration, received from the Pope, entitled Paumann to be called 'Ritter' or knight. Viridung, in his *Musica getutsch*, 1511, attributes the invention of the lute tablature to Paumann:

'Ich höre das ayn Blind zu Nürnberg geboren und zu München begraben sei gewesen hatt meister

¹ *Jahrbücher der Mus. Wissenschaft*, II p. 76.

² *Meilenleiter*, I. 202.

³ *Barum Delcarum scriptores*, 1768, I. p. 589.

Conrat von Nürenberg gehalten, der zu seyner zeyt
 'mit ander instrumenten gelopt und gerumpt sey
 worden. Der hatt auf den kragen der fünf kore,
 und uff siblen bunde das gantz alphabet halssen
 schreiben, und als das syn mall auss ist gewesen,
 hatt er wider von vornen an dem alphabet ange-
 fangen, und die selben buchstaben alle des andern
 alphabets dupliert,' etc.

Martin Agricola, a few years later in his
Musica instrumentalis, 1532, xxix., alludes
 scoffingly to this alphabetical notation :

'Weiter hab ich mich manchmal bekümmert
 Vnd heymlich bey mir selber verwundert,
 Der Alphabetischen Tabulatur
 Wie sie doch erstmals sey komen herfur.

'Das ihre Tabelthur erfunden sey
 Ist war, so las ichs auch bleiben dabey,
 Von eim Lautenschlager blind geboren
 So han sie den rechten meister erkorn.'

And makes merry at the expense of the blind
 man trying to lead the blind¹ :

'Diewell ein blinder den andern fñret
 So werden sie beide narn gepusret.'

A few of Paumann's compositions are still
 in existence. A three-part song, to the text
 'Wiplich figur,' is in the Munich State Library,
 Mus. MS. 3232, date about 1461 ; it was pub-
 lished by Eitner in *Das deutsche Lied*, 1880, ii,
 p. 161. In the same library the 15th-century
 manuscript known as the Buxheimer Orgelbuch,
 Mus. MS. 3725, contains three organ pieces by
 Paumann, printed by Eitner in *Monatshefte*,
 1886, p. 82, and again in 1888, *Beilage*, pp.
 67-8 and 78. The most important work, the
 'Fundamentum organisandi magistri Conradi
 Paumanns ceei de Nurenberga anno 1452,'
 acquired by the Wernigerode gräfl. Bibliothek
 in 1858, is written in the German organ-table-
 ture by a Nuremberg scribe, and bound in one
 volume with the manuscript called the Locheimer
 Liederbuch. The occurrence of the organ alpha-
 betical TABLATURE (q.v.) in this manuscript is of
 even earlier date than its first appearance in print,
 in Arnold Schlick's 'Tabulaturen etlicher lobge-
 sang,' published at Mainz in 1512. The twenty-
 four pieces of simple organ music in two-part
 writing by Paumann are obviously only pre-
 liminary exercises for those learning to play the
 organ ; they are followed by a short Latin
 treatise on mensural music signed 'W. de Sa'
 (Walter de Salice) ; compositions by G. v.
 Putenheim ; a three-part song by Wilh. Ligrant,
 one by Paumgartner, and three Preludes added
 to the manuscript in 1455. The music, trans-
 cribed by F. W. Arnold shortly before his
 death, was published with his scholarly ac-
 count of the whole manuscript in Chrysander's
Jahrbücher, 1867, ii., revised and edited by
 H. Bellermann. c. s.

PAUR, EMIL (b. Czernowitz, Bukovina, Aug.
 29, 1856), was at first a pupil of his father, the
 director of a musical society ; when 8 years old
 he played the violin and piano in public, and in
 1866 entered the Vienna Conservatorium under
 Dessooff for composition, and Hellmesberger for

violin. He became a member of the court
 orchestra as violinist in 1870. His career as a
 conductor began at Cassel in 1876 ; he was next
 at Königsberg, and in 1880 was appointed first
 court Kapellmeister and conductor of the sub-
 scription concerts at Mannheim ; in 1891 he was
 made conductor at the Leipzig Stadt-theater,
 and in 1893 went to America, succeeding Nikiach
 as conductor of the Boston Symphony Orchestra.

In 1898 he was elected conductor of the New
 York Philharmonic Concerts in succession to
 Anton Seidl, and in 1899 became director of the
 National Conservatory in New York. In 1903
 he returned to Europe, and has conducted con-
 certs in Madrid as well as in Berlin. In 1900 he
 visited England, conducting German opera at
 Covent Garden, and he conducted one of the
 Queen's Hall Symphony Concerts in Nov. 1902.
 From 1904-10 he was conductor of the Pitts-
 burgh Symphony Orchestra, where his sym-
 phony 'In der Natur' was played (1909). His
 compositions also include a violin concerto and
 some chamber music. Returning to Europe he
 directed the Berlin Opera (1912-13). (*Riemann*
 and *Baker*.) M., with addns.

PAUSE (Fr. *point d'orgue* ; Ital. *fermata* ;
 which has an equivocal meaning, as it also
 signifies what we call 'pedal point'), a tem-
 porary cessation of the time of the movement,
 expressed by the sign ^ placed over a note or a
 rest. If the pause is over a note, it signifies
 that the note is to be prolonged at the pleasure
 of the performer, or conductor ; if over a rest,
 the sound, as well as the time, must stop. The
 initials G.P. (*General Pause*) are often found in
 German scores as a warning that the whole
 orchestra is silent. One special use of the pause,
 no doubt, had its origin in the practical diffi-
 culty of getting a congregation to finish each
 line of a chorale-tune together ; the organist
 must make a pause at the end of every line,
 and in order to fill up the space, interludes
 were inserted between the lines, which interludes
 became gradually more and more important,
 until, as in many of Bach's cantatas, the em-
 broidery upon the chorale-tune reaches the very
 height of sublimity. Pauses at the end of a
 movement, over a rest, or even over a silent
 bar are intended to give a short breathing-
 space before going on to the next movement.
 They are then exactly the reverse of the direc-
 tion 'attacca' (q.v.). M.

PAVAN (PAVANE, PAVIN), a slow and solemn
 dance, very popular in the 16th and 17th
 centuries. The name, derived from 'Pado-
 vana,'² points to an Italian origin, although it
 is generally said to have come from Spain,
 owing to its popularity in that country. The
 Spanish pavan, however, was a variation of the
 original dance. According to some authorities,
 the name is derived from the Latin *pavo*, owing

¹ See also Wastielewski, *Gesch. der Instrumentalmusik im XVI. Jahrh.*, 1878, p. 37.

² In the Cambridge University Library is a MS. volume of airs and dances (in Lute Tablature) by Dowland and Holborne, in which there occurs a 'Padovana de la Milanessa.'

to the fancied resemblance to a peacock's tail, caused by the robes and cloaks worn by the dancers, as they swept out in the stately figures of the dance. Several good descriptions of the pavan have come down to us. Rabelais¹ tells us that it was one of the 180 dances performed at the court of the Queen of Lanternois on the visit of Pantagruel and his companions; Tabourot, in his *Orchésographie*, says that in his time pavans were still popular, although not as much danced as formerly.² At state balls the dancers wore their long robes, caps and swords, and the music was performed by sackbuts and oboes. In masquerades, pavans were played as processional music, and were similarly used at weddings and religious ceremonies. Like all early dances, the pavan was originally sung as well as danced, and Tabourot gives the following example for four voices, accompanied throughout by the drum on one note ♩ .

Pavane à quatre parties.

* The treble sings D, the alto F.

¹ Pantagruel, Bk. v., published 1562.

² Bonard, in the Preface to his *Fassonius harmonicus Divinus* (Leipzig, 1608) after praising the sweetness and elegance of the English music of his day, makes particular mention of the Pavane, adding that the word 'Pavan' is nothing else than the Italian 'Faviana'. He also mentions that the French often call their Fassonnesee, Favanna.

Sir John Davies in his *Orchestra* (1596) has the following curious verses, in which the motions of the sun and the moon are compared to dancers of pavans and galliards:

'For that braue Sunne the Father of the Day,
Doth loue this Earth, the Mother of the Night;
And like a reuellour in rich array,
Doth dance his galliard in his lemman's sight,
Both back, and forth, and sidewales, passing light.

'Who doth not see the measures of the Moone,
Which thirteene times she daunceth euerie yeare?
And ends her paurine thirteene times as soone
As doth her brother.'

There are numerous specimens extant of pavans by instrumental composers of the 16th and 17th centuries, and in almost every case the pavan is followed by a galliard, the two thus anticipating the saraband and gigue of the later suite. Thus Morley (*Introduction*, Part 3), after speaking of Fantasies, says:

'The next in grauity and goodnes vnto this is called a pavane, a kind of staide musike, ordaind for graue dauncing, and most commonlie made of three straines, whereof euerie straine is plaid or sung twice, a straine they make to containe 8, 12 or 16 semibreues as they list, yet fewer then eight I haue not seen in any pavan. . . . After euery pavan we vsually set a galliard.'

And Butler (*Principles of Music*, 1636), speaking of the Doric mode, has the following:

'Of this sort are Pavins, invented for a slow and soft kind of Dancing, altogether in duple Proportion. Unto which are framed Galliards for more quick and nimble motion, always in triple proportion, and therefore the triple is oft called Galliard-time and the duple, Pavin-time.'

Amongst the best known of these forerunners of the Suite, we may mention John Dowland's 'Lachrymae or Seauen Teares, figured in seauen passionate Pavans with diuers other Pavans, Galliards and Almands' (1605); and Johann Gfro's 30 pavans and galliards 'nach teutscher art gesetzet' (1604). For another description of the dance see Bishop Earle's *Microcosmographie*, ed. by Bliss (Nares's *Glossary*).

The Spanish pavan, a variety of the original dance which came from Spain (where it was called the 'Grand Dance,') was of a more elaborate character than the original. Judging from the frequent occurrence of its air in the early English Lute and Virginal Books, it must have become very popular in England.³ The following is the tune which Tabourot gives for it: it is not the same as that which is found in the English books.

W. B. S.

³ In Starter's *Frische Lust Hey* (1634) it is called 'Engelsche Indresende Dans Londesteyn.'

PAVESI, STEFFANO (b. Casaleto Vaprio, near Crema, Jan. 22, 1779; d. Crema, July 28, 1850), studied at the Conservatoire dei Turchini, Naples, 1795-99; prolific composer of operas. The first, 'Avvertimento ai gelosi,' was given at the Theatre S. Moise, Venice, in 1803 (list of works in *Q.-L.*).

PAXTON, (1) STEPHEN (b. London, 1735; d. Aug. 18, 1787), a composer of vocal music, was a pupil of W. Savage, produced several graceful and elegant glees, nine of which, with two catches, are printed in Warren's Collections. The Catch Club awarded him prizes for the following glees: 'How sweet, how fresh,' 1779; 'Round the hapless Andre's urn,' 1781; 'Blest Power,' 1784; and 'Come, O come,' 1785; and for a catch, 'Ye Muses, inspire me,' 1783. He published 'A Collection of two Songs, Glees and two Catches,' and 'A Collection of Glees.' Two masses by him are printed in Webbe's Collection. He was buried in St. Pancras old churchyard.

His brother, (2) WILLIAM (b. 1737; d. 1781), was a violoncellist, who composed several sets of solos and duets for his instrument. He gained prizes from the Catch Club for two carons, 'O Lord in Thee,' 1779, and 'O Israel, trust in the Lord,' 1780. His glee, 'Breathe soft, ye winds,' was for long a favourite.

W. H. H.

PAYNE, EDWARD JOHN (b. 1844; d. Wendover, Dec. 1904), a talented amateur musician and writer upon musical subjects, and historian, known to readers of this Dictionary by his initials E. J. P. By profession a barrister-at-law, he became in 1883 Recorder of High Wycombe, his native town. Educated at High Wycombe Grammar School and Magdalen College, Oxford (1867), he took a first class in 1871 and was elected Fellow of University College in 1872. He contributed the opening chapters to the *Cambridge Modern History*. His best-known works were (1) *A History of European Colonies*; (2) *The Voyages of Elizabethan Seamen to America*; (3) *History of the New World called America*. He was one of the leaders of the movement which reintroduced the study of the old viols, and was an accomplished performer on the viola da gamba, and viole d'amour. He was first President of the Cremona Society (1889), and contributed an erudit paper on 'The Viol da Gamba' to the *Proceedings of the Musical Association* (Mar. 4, 1889). In his later years he suffered much from ill-health, and was found drowned in the Canal at Wendover, Dec. 24, 1904. (See *The Times*, Dec. 28, 1904.)

E. H.-A.

PEABODY (1) CONCERTS, given under the auspices of the Conservatory of Music of the Peabody Institute, Baltimore, Maryland. Beginning in 1865, eight concerts were given every season, each being preceded by a public rehearsal, the director of the Conservatory

officiating as conductor. The programmes have been made up of symphonies, suites, overtures, concertos and vocal solos, nearly everything presented being classic in style. Many important compositions have been performed for the first time in America in the course of these concerts. Under Asger Hamerik's direction (since 1871) especial attention has been given to the production of works by American, English and Scandinavian composers. The orchestra has generally included fifty musicians. The institution elicited the warm approbation of von Bülow (1875-76) for its exceptionally fine performances.

F. H. J.

(2) CONSERVATORY.—The Peabody Conservatory is a department of the Institute founded by George Peabody in 1857. It provides a complete musical education to some 1700 students annually, including orchestra and opera classes. (See *Amer. Supp.*)

PEACE, ALBERT LISTER, Mus.D. (b. Huddersfield, Jan. 26, 1844; d. Liverpool, Mar. 14, 1912), exhibited in his childhood precocity hardly exceeded by that of Crotch; naming with unerring accuracy individual notes and combinations of notes when sounded, before attaining his fifth year. At the age of 9 he was appointed organist of the parish church of Holmfirth, and subsequently of other churches in that neighbourhood. In 1865, at the age of 21, he removed to Glasgow, to fill the office of organist to Trinity Congregational church, and soon afterwards, along with other posts, that of organist to the University. In 1870 he graduated as Bachelor, and in 1875 as Doctor of Music in the University of Oxford. In 1879 he was appointed to Glasgow Cathedral. He became organist of St. George's Hall, Liverpool, in succession to W. T. Best, in Jan. 1897, where his brilliant executive abilities enabled him to continue the work of his predecessor of popularising music of many kinds by means of organ performance. (See BEST, W. T.) His published compositions include anthems, services and organ works, a setting of Psalm 138 for soli, chorus and orchestra; and a cantata, 'St. John the Baptist.'

J. H., rev.

PEAL, (1) a set of bells tuned to the notes of the major scale and hung (so that they can be swung) for the particular requirements of CHANGE-RINGING (*q.v.*).

(2) A succession of changes rung on such a set of bells.

W. W. S.

PEARCE (PIERS, PIARSE), EDWARD, sworn in as gentleman of the Chapel Royal, London, Mar. 16, 1588; retired in 1600 and became organist and choirmaster (Rimbault says also treasurer) of St. Paul's Cathedral. Three madrigals of his are in Ravenscroft's 'A Brief Discourse, etc.,' one song 'Heytrola' in a MS. in the R.C.M., and a song from the above madrigals in Jos. Gwilt's collection of 1815.

E. V. D. S.

PEARCE, JOSEPH, jun., ostensible author of

a useful little handbook entitled *Violins and Violin Makers* (London, 1886), traditionally supposed to have been written by Charles Reade. It contains an alphabetical list of violin-makers, short chapters on bow makers, also on the 'Amati family'; 'Stradivarius,' 'Guarnerius,' the 'Tyrolese makers,' 'Jacobus Stainer' and an excellent little essay on 'Why are certain violins of more value than others?'

E. H. A.

PEARSALL, ROBERT LUCAS (b. Clifton, Mar. 14, 1795; d. Wartensee, Aug. 5, 1856), composer, came of an old family, originally of Halesowen, Worcestershire, and then of Horsley, Staffordshire. He was privately educated for the bar, and was called in 1821, going on the western circuit for four years. At the age of 13 he wrote a cantata, 'Saul and the Witch of Endor,' which was privately printed; and in 1817 he married Miss Hobday. In 1825, being abroad for the benefit of his health, he settled at Mainz and studied music under Josef Panny, remaining there until 1829, when he returned for a year to England, staying at Willsbridge in Gloucestershire, which his mother had purchased in 1816, and which he inherited on her death in 1836.

He removed once more to Germany, where he lived at Carlsruhe for a time, diligently composing. There he wrote a little 'ballet opera,' which was never performed; some choruses from it were published by Weekes & Co. His op. 1, 'Miserere mei, Domine,' was published by Schott of Mainz about 1830; the fact that it is a 'canon perpetuus a 3 vocibus in hypodiataessaron et hypodiapason' shows that even in these early days the ingenuities of the older music had a special attraction for him. The compositions between this and an overture to *Macbeth*, with the witches' chorus, the parts of which appeared as op. 25 in 1839, do not seem to have been published (with the exception of op. 7, a *Graduale a 5*, 1835, and op. 8, an *Ave Verum a 4*, 1835), and the system of numbering his compositions seems to have been given up after this. In 1835 he published at Carlsruhe *Stray Leaves from an Idler's Commonplace-book*.¹ He moved from place to place on the Continent, studying successively at Munich with Caspar Ett, and at Vienna. In 1836 he was in England, and he made a more intimate acquaintance with the music of the English madrigal school. The BRISTOL MADRIGAL SOCIETY (q.v.), founded in 1837, contributed thereto. To this style he became so attached for the remainder of his life that he wrote all his works in madrigal style within two or three years of this time, with two exceptions. He wrote several settings of psalms (68th, 77th

and 57th), a Requiem Mass, a Pange Lingua for three female voices (published 1857); the office of Tenebrae (in the library of the Gesellschaft für Musikforschung, Berlin), two settings of Salve Regina, and other compositions for the Roman Catholic Church, which he joined at the end of his life. He also took a deep interest in Anglican Church music, and wrote a number of works for its service. A collection of his sacred compositions, edited by W. F. Trimnell, was published about 1880. In 1837 he sold his property in England, and in 1842 bought the castle of Wartensee on the Lake of Constance. Here he appended the 'de' to his name, and enjoyed intercourse with many distinguished people. He died of apoplexy, and was buried in a vault at Wartensee.

His published partsongs and madrigals number about sixty, and include a remarkable number of works which will remain as long as unaccompanied singing is practised. He understood the madrigal form thoroughly, but did not confine himself to the strict rules practised in the Elizabethan period; his works are no mere curiosities of a bastard archaeology, but living creations of art, full of fire, nobility of thought, high imagination, and splendid vocal sonority. Such things as 'Great God of Love,' 'Lay a Garland' and 'Light of my Soul' are masterpieces in a form that has seldom been successfully employed in modern times; his partsongs, 'The Hardy Norseman' and 'O who will o'er the downs so free,' are known and delighted in by every choral society in the country; and the noble choral ballad 'Sir Patrick Spens,' in ten parts, is a triumphantly successful adaptation of the partsong form to the requirements of a narrative in which eager intensity and hurry have to be depicted.

Pearsall edited a 6-part Magnificat by Lasso about 1833, and was part-editor of the old hymn-book of St. Gall, published in 1863 under the title of 'Katholisches Gesangbuch zum Gebrauch bei dem öffentlichen Gottesdienste.' He was a skilful draughtsman and had considerable literary facility; he contributed in early days to magazines in England, and made translations of *Faust* and *Wilhelm Tell*, the latter being published in 1829. He wrote many of his own words for madrigals. A great number of interesting treatises and compositions of different kinds are still in MS. at Einsiedeln, Vienna, Bristol, the R.C.M. and the British Museum.

PEARSON, HENRY HUGO, see PIERSON.

PEARSON, WILLIAM, a notable printer, who made many improvements in musical typography, and carried further Heptinstall's improvements. (See HEPTINSTALL.)

Several works of his are dated 1699, one

¹ A copy is in the possession of the Bristol Madrigal Society.

being 'Twelve New Songs' by Dr. Blow and Dr. Turner, as the title-page informs us, issued 'chiefly to encourage William Pearson's New London Character,' 1699, folio. In 1700 followed the important and excellently printed work, Blow's 'Amphion Anglicus.' Pearson's printing-office was at first in Aldersgate Street, 'next the Hare and Feathers'; but in 1700 his imprint changes to Red Cross Alley, Jewin Street. In 1724 it is 'over against Wright's Coffee House, in Aldersgate Street.' As these addresses are in close proximity, one may indicate Pearson's house and the other his printing-office. Shortly after the death of Henry Playford, c. 1706, he, with John Young, succeeded to the copyright (probably after Cullen) of such of the Playford publications as were continued. These include 'The Dancing-Master,' and Playford's 'Introduction to the Skill of Music,' Simpson's 'Compendium of Practicall Musick,' 'Orpheus Britannicus,' 'Harmonia sacra,' and Playford's 'Whole Book of Psalms,' 'The Divine Companion,' and others. He also published, in folio, Bassani's 'Harmonia festiva,' op. 8 and op. 13, the first English publication of the book, which Hawkins dates about 1726. Pearson was the principal printer and publisher of the many octavo psalm-books which were issued at this time. So far as the present writer is aware no engraved work bears his imprint. In 1736 he was succeeded by A. Pearson, who may be presumed to be either his widow or his son.

A. Pearson continued the business only for a short time, printing and publishing such works as: Tansur's 'Complete Melody or the Harmony of Sion,' 1736; 'Heaven upon the Earth,' 1738, by the same author; Green's 'Book of Psalmody,' 1738, etc. The first Wesleyan tune book, 'A Collection of Tunes as they are commonly sung at the Foundry,' 1742, also was printed by A. Pearson, and this is the latest date the present writer can find for his work. F. K.

PECCATE, DOMINIQUE (b. Mirecourt, July 15, 1810; d. there, Jan. 13, 1874), an excellent bow-maker who maintained the qualities and excellence traditional in the work of François Tourte. Son of a barber, he early forsook the paternal profession, and adopted the vocation of fiddle-maker. In 1826 François Vuillaume sent him to Paris, to his brother Jean Baptiste, under whose guidance he developed his superior gift as a maker of bows. After the death of François Lupot in 1837, Peccate left Vuillaume, and set up an independent business at Lupot's vacated workshop, 18 Rue d'Angivilliers. In 1847 he returned to Mirecourt, where he continued working until his death. He occasionally stamped his bows, but more frequently left them unmarked; a habit which has caused his bows to be confused with those of a modern French maker of the same name but spelt

'Peccatte.' Peccate's brother, called 'Peccate jeune,' also worked with J. B. Vuillaume, but his productions were much inferior to those of his brother Dominique. He died in Paris in 1856.

E. H.-A.

PECCI, (1) TOMASO (b. Siena, 1576; d. there, (?) 1606), composed, under the name of L' In-vaghito, given to him as member of the Accademia dei Filomeli, 2 books of madrigals a 5 v., 3 books of canzonets a 3 v., 1 book of church music. A MS. volume of sacred and secular compositions by him is in the Berlin Library; the MS. of 16 madrigals is at Christ Church; single numbers are in various collective volumes (Q.-L.).

(2) DESIDERIO, a 16th-17th-century composer of Siena, probably a younger brother of Tomaso, wrote 1 book of arias, op. 2, 1-3 v. (1626), 1 book of madrigals (1617) and some madrigals and sacred music in printed collective volumes and MS. (Q.-L.)

PECHAČZEK, FRANZ (b. Vienna, July 4, 1793; d. Carlsruhe, Sept. 15, 1840), violinist and composer, son of Franz Pechačzek, a Viennese conductor who wrote several operas and some thirty ballets, and who, as a composer of dance music, was the Strauss of his epoch. The precocious musical aptitude of Franz the younger was cultivated by his father at the tender age of 4, when the child began to learn the violin. At the age of 8 he played before the imperial court, and a year later, 1803, won great success at two concerts at Prague, by his performance of a concerto by Fodor, an adagio by Rode and some variations of his own composition. On his return to Vienna he resumed his studies with increased ardour, and became a pupil of Förster in composition. In 1818 he was appointed leader of the orchestra at the court of Hanover, and in 1824 and 1825 was heard, gaining success at many concerts in different German towns. In 1827 he became director of the music at the court of the Grand Duke of Baden, and appeared at a concert in Paris in 1832, but was eclipsed by the extraordinary talent of Paganini, who had taken the Parisians by storm. He still occupied his post at the Baden court in 1837. His published compositions include a concerto for violin and orchestra, some polonaises for violin and orchestra, thèmes variés, rondos, two string quartets, and duos concertants for two violins. E. H.-A.

PÊCHEURS DE PERLES, LES, opera in 3 acts, libretto by Cormon and Carré, music by Bizet. Produced Théâtre-Lyrique, Paris, Sept. 20, 1863; Covent Garden, as 'Leila,' Apr. 22, 1887, and as 'I pescatori di perle,' May 18, 1889; New York, Metropolitan Opera House, Jan. 11, 1896. M.

PECK, JAMES, a London music engraver and publisher, principally of sacred music. He was

at Westmorland Buildings, in Aldersgate Street, c. 1800, and at 47 Lombard Street in 1802-03, and here he remained for over twenty years. From this last-named address most of his publications were issued. In Dec. 1824 he had recently removed to 52 Paternoster Row. He engraved and published, both on his own behalf and on that of individual composers, great numbers of Psalmodes, and books of hymn tunes for the Wesleyan body, besides sheet-music of a secular nature. In 1850 the business had come into the hands of John Peck, at 44 Newgate Street.

F. K.

PEDAL (from *pes*, 'a foot'), certain appliances in the organ, pianoforte and harp, worked by the feet.

(1) In the organ there are keys, sounding notes, and played by the feet instead of the hands; and the **PEDAL-BOARD** is the whole breadth or range of such keys. According to R. Schlechte, pedals were invented by Ludwig van Vaelboke of Brabant, about 1306. In England pedals seem not to have been introduced until 1772, when Snetzler employed them in the German Lutheran Chapel, London. (For the evolution of the pedal-board see under **ORGAN**, Vol. III. p. 753.)

The compass almost universally adopted in England for the pedal-board extends from CCC up to tenor F, thirty notes — $2\frac{1}{2}$ octaves. Occasionally they are carried up even to G. Bach wrote twice up to F—in his Toccata in that key—once up to F \sharp , and two or three times to E. Once he wrote down to BB, for the sake of preserving a certain figure unaltered.

COMPOSITION PEDALS.—Pedals placed above the pedal-board throw out or draw in the stops in groups. When they act upon the wind and not upon the stops, they are sometimes called Combination pedals, and are practically the same as the 'Ventils' of the old German organs, and the 'pédales des Combinaisons' of the modern French builders.

SWELL PEDAL.—The treadle, usually placed to the extreme right, by which the swell shutters are opened or closed. A balanced swell pedal placed directly in front of the player is now largely adopted in new organs, the vertical shutters remaining in any position.

Other pedals, horseshoe-shaped as well as of other forms, are sometimes introduced to act upon the manual and pedal-couplers. E. J. H.

(2) In the pianoforte, the pedals are levers, usually two,¹ which are pressed either to diminish or to increase and prolong the tone of a pianoforte. That for the left foot, the *piano* pedal, acts by reducing the number of strings struck by the hammers, or softens their impact either by interposing a strip of felt, or by diminishing their length of blow. That for the right foot, the *forte* pedal, takes the dampers

out of use altogether, or allows the player, by judicious management with the foot, so as to avoid confusing the sound, to augment and prolong it by increasing what are called sympathetic vibrations, an invaluable help to the beauty of tone of the instrument. Pedals were first adapted to the harpsichord, the right to move the swell, and the left to relieve the hands from the interruption of moving stops. This 'beautiful invention,' as C. P. E. Bach calls it (*Versuch*, etc., 1762, 2ter Theil, p. 245), was attributed by him to 'our celebrated Herr Holcfeld,' but Mace, in *Musick's Monument*, enables us to claim the invention for the English harpsichord-maker, John Hayward.² The pedals were attached on either side of the stand upon which the harpsichord rested, as they were in the grand pianoforte until 1806, or even later. The name of the inventor of the lyre-shaped frame for the pedals is not forthcoming. Zumpfe's square piano (1766 and later) had stops next to the left hand of the player, to raise the dampers in two divisions.³ Stein's and other German pianos had a lever to be pressed by the knee. (See **MUTE**.)

Real *Piano* and *Forte* pedals first occur in John Broadwood's patent of Nov. 1783. The first he effected by damping the strings near the belly-bridge with a strip of soft material which he called a 'sordin' or mute; the second by taking away the dampers from the strings. Sebastian Erard, whose first English patent is dated 1794, and includes a soft-pedal effect obtained by means of a shifting beam, or rail, to support the hammers, and so lessening the striking distance, apparently adopted a principle in use in the German pianos of the 18th century, and placed the strip of cloth between the hammers and the strings, an invention which Adolphe Adam, in his Tutor for the Paris Conservatoire, called *céleste*. The Germans call it *flauto pedal*, and BÜSENDORFER of Vienna re-introduced it in grand pianofortes as a third pedal, which may be fixed by a notch when an almost dumb instrument is required for practising. The 'céleste pedal' cannot, however, rival the Æolian charm of the shifting pedal, first introduced by Stein in his 'Saitenharmonica,' the beauty of which arises from the vibrations of the unused strings which are excited from the sound-board; and as they have not been jerked by a hammer-blow, they sound with another and more ethereal timbre than those which have been struck.⁴ The piano pedal used to be controlled in its shifting by a small stop or wedge in the right-hand key-block, so that the shift could be made to either two strings or one at the discretion of the player. The latter was Stein's 'Spinetchen,' the *una corda* or *eine Saite* of Beethoven, who expressed the return to the

¹ See footnote to article **HARPSICHORD** describing an early instrument by Hayward.

² The division of the dampers in grand pianos was retained until as late as 1830, by division of the right pedal-foot.

⁴ See Hinkins's *History of the Pianoforte*, p. 42.

three strings by *Nach und nach mehrere Saiten*, *Tutte le corde*, or *Tutto il cembalo* (op. 101). The one-string shift in grand pianofortes has been for many years discarded, sharing the fate of the extra pedals that produced an imitation of a bassoon, or added a drum, a bell, etc. The use of the céleste pedal was indicated by Hummel with a special sign, thus Δ .¹

The effect of the *forte* or damper pedal is to increase the tone of the note struck by calling out the partial tones of lower notes which are equivalent to its full vibrating length or prime; the strings of higher registers becoming primes to the partials composing the note struck; in both cases by relation of measurement and by excitement from the sound-board.² The Pedal thus adds a wonderful enrichment to the tone. The modern signs for its use and disuse are respectively 'Ped.' and Φ , or a star.

A pedal (*pédale de prolongement ou tonale*; Ger. *Kunstpedal*) was introduced by Montal of Paris, a blind man, and exhibited by him in 1862 in London (see *PIANOFORTE*), to allow selected notes to vibrate while the rest are immediately damped. It has been again brought forward by Steinway and others, and its value much insisted upon. Hitherto it has not proved to be of much use in the concert-room. The *Kunstpedal* of Zachariae of Stuttgart divides the row of dampers by four cleft pedal feet into eight sections, and thus facilitates the use of the staccato.

(3) In the harp the pedals alter the pitch in two gradations of a semitone each. The mechanical contrivance for this is described in the article *HARP*. The invention of these chromatic pedals is attributed to a Bavarian, named Hochbrucker, about 1720. The gradual improvement and extended use of them culminated in 1810, in the double-action harp at that date perfected by Sebastian Erard.

A. J. H.

PEDAL-BOARD, the pedal-clavier of an organ.

PEDAL CLARINET, see *CLARINET* (5).

PEDALIER. (1) A pedal keyboard attached to a pianoforte, and acting by connexion with its mechanism upon the hammers and strings proper to it.

(2) An independent bass pianoforte so called by its inventors, Pleyel, Wolff & C^o of Paris, to be played by pedals only, and used with an ordinary pianoforte.

J. S. Bach had a harpsichord with two rows of keys and pedals, although it would be difficult to point with any degree of certainty

to works written for this, rather than for the organ. In some few pieces (the Sonata in D, B.-G. xxxvi. p. 19, and the two fugues in A, *ib.* pp. 169 and 173) single notes near the end are clearly intended to be played on the pedal. Since Bach many clavicinists and pianists have had their instruments fitted with two rows of pedals, and compositions have been specially written—as, for instance, by Schumann, who wrote several 'Studien' and 'Skizzen' (opp. 56 and 58) for the Pedal-Flügel or Pedalier Grand Pianoforte. C. V. Alkan also wrote some noble works for this instrument, which, together with some adaptations from Bach, were brought forward in 1871 by E. M. Delaborde of Paris, in his performance at the Hanover Square Rooms, upon a Pedalier Grand Piano specially constructed for him by Broadwood. Gounod wrote a concertante for pedal piano with orchestra, and a fantasia on the Russian National Hymn, for Mme. Lucie Palicot, by whom they were played at the Philharmonic Concert on Apr. 21, 1887.

A. J. H.

PEDAL NOTES. On trombones and the majority of brass wind instruments the easy practical compass begins with the second note of the harmonic series. The extension of the slide of the trombone, or a similar lengthening of the tube by means of the valves on a valve instrument, lowers the general pitch, as from c to B, A or G, but the *relative* pitch of each note compared with its new prime remains the same. The descending chromatic scale on the trombone, or on a three-valved instrument, in c, ends with F \sharp , leaving a gap between this note and C, the prime or fundamental note of the instrument. This C, however, and the notes below it to F \sharp , although rarely used, should not be regarded as forced or 'made' notes, as they are part of the natural compass of the instrument, requiring, it must be admitted, a specially slack lip. It is these prime notes, the lowest proper tones of the instrument, as obtained either from its normal length, or its length as varied by shifting slide or valves, which are known as pedal notes. In other words, a pedal note always stands for the first note or No. 1 in the harmonic series.

On trumpets and some other instruments the pedal notes are practically impossible. D. J. B.

PEDAL ORGAN, the organ belonging exclusively to the Pedal-board.

PEDAL PIANO, see *PEDALIER*.

PEDAL POINT (Fr. *point d'orgue*), is a term used to describe the sustaining of a note in one part while the other parts pass through harmonies which may or may not be normally related to the sustained note itself. The term is of great historical importance, and it is usual to reserve it for those cases in which the idiom involved is of substantial length or significance. The incidental occurrence of a

¹ This arrangement of the shifting soft pedal exists in an unaltered grand piano of John Broadwood's, dated 1798. It is thus possible that in this form it may have been an invention of that maker, or, if not his, an English invention simultaneously with Stein's.

² The partials above the prime also excite their equivalents in vibrating length, but will probably not be audible above the third or fourth. Owing to equal-temperament tuning the fifth partial could only be very feebly excited. At the seventh and eighth we arrive about the striking-place of the hammer by which those partials are obliterated.

sustained note which is common to a few consecutive chords is not necessarily sufficient to establish an accepted pedal point.

The pedal point is undoubtedly derived from the various kinds of drone found frequently in early or primitive music. Where such drones have a fixed pitch their musical function is important, if only to the extent that they sustain the chosen relations of pitch. When harmonic inferences are also involved, the drone assumes a more or less definite harmonic relation towards the various ideas that may be combined with it. This latter is the true function of a pedal point, and it is for this reason that the notes most commonly used as pedal points are those which infer most clearly a particular harmonic meaning or direction.

The evolution of instrumental music found the organ especially adapted for effects of this kind, and as the harmonic sense had by this time learnt to classify its impressions with reference to roots which were generally either stated or implied in the bass, the traditional view of a pedal point became primarily associated with the sustaining of an important bass note, after the manner of an organ pedal. Hence the alternative title : *point d'orgue*.

Harmonic logic, however, could with equal propriety accept sustained points in parts other than the lowest, and there are therefore numerous examples of both inverted and internal pedal points which have the same harmonic significance as the more common pedal points in the bass.

The most important notes in a chosen scale are by definition the tonic and dominant, and these are the notes commonly selected for the purposes of a drone. In similar fashion the harmony which finds its ultimate argument in the logic of tonality, makes the tonic and dominant its chief pivots of thought. Thus the pedal points of classical music are almost exclusively confined to the tonic and dominant of the key of the particular movement or section. That the tonic is common to chords of tonic, subdominant and relative minor, and that the dominant is common to chords of tonic, dominant and mediant, are circumstances which have naturally assisted the traditional handling of the device. And though the more fluid harmonic intuitions of later times have permitted composers to use other degrees of the scale in like fashion, the function of preserving a particular harmonic atmosphere or relation, through a sequence of incidental changes, is common to all the idioms which properly belong to the category of pedal points. It is therefore more or less axiomatic that however extreme may be the possible clashes of harmonic inference involved in the bold use of a pedal point, yet the beginning of it must be strictly connected with the harmonies which precede it, and the end of it must

similarly be consistently related to those which follow. This means, in classical terminology, that pedal points must begin and end on con-cords, or on chords which have an unequivocal context.

Some of the harmonic consequences of the

use of the pedal point have been discussed in the article on HARMONY. The preceding examples will sufficiently define the normal applications of the term.

PEDRELL, (1) FELIPE (b. Tortosa, Feb. 19, 1841; d. Barcelona, Aug. 19, 1922), Spanish composer and historian. Though the most learned musician in Spain, he was almost entirely self-taught; but the direction of his subsequent development was given him by his first master, Juan Antonio Nin y Serra, who advised him to take the themes for his exercises from the songs sung by his mother. As a choir-boy in the cathedral of his native town, Pedrell gained an intimate working knowledge of old Spanish church music; and in after life he spoke of the terror inspired in him by one of the primitive chants (with words in the vernacular) which he had to sing in a procession on Good Friday. Pedrell's earliest compositions were published in 1871, before anything of Granados or Albéniz. His first opera, 'El último Abencerraje,' dates from 1874. Soon after that, he was teacher of musical history and æsthetics at the Madrid Conservatoire, a post which he held until 1894, when bad health drove him back to Barcelona. In that year his 3-act opera 'Los Pirineos' was published (performed Barcelona, 1892; Buenos Aires, 1910); and this, and his pamphlet *Por nuestra música* (translated into French), brought him to the notice of European musicians as a Spaniard who was preaching reform on the lines of Wagner. This was a mistaken idea of what Pedrell was doing. He had taken to heart the saying of EXIMENO (q.v.) in the 18th century, that every country should build its music on the foundation of native song; and the revival of music in Spain (as in England, Hungary and elsewhere) has depended on the discovery of the genuine folk-songs of the country, as opposed to those which had falsely passed as such. To this Pedrell added that the characteristics of all music which is truly national are to be found, not only in folk-song and the instinctive music of primitive times, but also in the masterpieces of the centuries of great artistic development—a generalisation which modern research has shown to be as true of England as it is of Spain. Pedrell's compositions, though based on native traditions, are written in too serious a style for them to have been a success with the public. They interested neither the Wagnerites nor the others, and their proper understanding demanded a knowledge of musical history which few members of an audience possess. The opera 'La Celestina,' however, contains much fine music and intensely dramatic situations. 'El Comte Arnau,' though adaptable to the theatre or the concert-room, is really intended for performance in the open air, under the conditions of a Greek theatre. Besides the

chorus on the stage there is also a chorus in the orchestra; while the subject (a fine poem on a character from an old Catalan ballad) is one which readily lends itself to music, since Comte Arnau (Count Arnold), having lost his soul through carrying off Adelaide from her convent, finds it again in a song.

As a musical archaeologist Pedrell's great achievement was the publication of a reliable text of the complete works of VICTORIA. His researches threw a flood of light on the composer's last years in Madrid and only ended, during the war, with the discovery of the death-certificate, proving that the greatest of Spanish musicians lived several years longer than is generally supposed, dying on Aug. 7 or 27, 1611. His 'Hispaniæ scholæ musica sacra,' an edition of selected works of Morales, Guerrero, Victoria, G. néz Pérez and Diego Ortiz, with the complete keyboard pieces of Antonio Cabezón, is (with the exception of the vols. devoted to Cabezón) hardly as satisfactory as the edition of Victoria, though it made much fine Spanish church music available for performance. A greater achievement was the splendid catalogue of the music in the municipal library at Barcelona (the *Biblioteca de la Diputació* or *Bibl. Catalana*) Pedrell also published valuable collections of old Spanish theatre music and organ music; and contributed striking articles (e.g. on the Mystery of ELCHE) to the *Sammelbände* of the I.M.G. His folk-lore studies culminated in the 'Cancionero musical popular español,' though he was inclined to distort his texts (e.g. Salinas and the lutenists) to fit his theories. By this time he was an old and in some ways a disappointed man, with the reputation of being difficult to deal with; his printers were not as careful as they might have been. His last editorial work was concerned with an accurate and scholarly edition of the madrigals of BRUDIEU (q.v.), his collaborator being Mn. Higinio Anglés, chief of the music section of the *Bibl. de la Diputació*.

Spanish composers of the 20th century certainly owe a great debt to Pedrell, and they have not hesitated to declare themselves his pupils. This, however, is only true of FALLA, who has inherited the master's attitude to folk-lore, although his music sounds totally different. Pedrell (like Morales in the 16th century) raised the status of Spanish musicians in the opinion of the rest of Europe. By the Spanish public, however, he was unknown, and by the official world unrecognised; and he was unable to perform a task still waiting to be done—that of raising the status of music in the opinion of educated Spanish men and women. In Barcelona that status is certainly high, fostered as it has been by Pablo CASALS and the Orfeó Català, while to the majority in Spain the only serious music is folk-song. No one has recognised the importance of folk-song

more clearly than Pedrell; yet he knew that there was more in music than that. To him music also meant Victoria, an art which, independent of folk-lore or even the Church, went straight to the human consciousness as an experience of beauty, and an experience in which every one might share.

The most important compositions of Pedrell are the operas 'Los Pirineos' (1894), 'La Celestina' (1903) and 'El Comte Arnau' (published 1921). For his other works, in music and criticism, see P. G. Morales, in *A Dictionary of Modern Music*, 1924; E. Istel, in the *Musical Quarterly*, Apr. 1924; A. Reiff, *Z.M.W.* iii. 304, Feb. 1921. His place in modern Spanish music is best described in the *Revue musicale*, Feb. 1923 (reprinted Barcelona, 1923), by Manuel de Falla.

J. B. T.

(2) CARLOS (b. Minas, Uruguay, Oct. 16, 1878), nephew of the above, studied with his uncle (1898-1900) and afterward at the Schola Cantorum in Paris. He settled in Buenos Aires as inspector of music in schools, lecturer, etc. He has composed much, including an opera, 'Ardid de Amor,' given at Buenos Aires in 1917, symphonic works and songs.

PEDROTTI, CARLO (b. Verona, Nov. 12, 1817; d. there, Oct. 16, 1893), studied music in his native town under Domenico Foroni, and produced his first opera, 'Lina,' at the Teatro Filodrammatico, Verona, in 1840. To its success he owed his appointment as conductor of the Italian opera at Amsterdam, where he remained until 1845. While at Amsterdam he wrote and produced the operas 'Matilde' (1841) and 'La figlia dell' arciero' (1844). He returned to Italy in 1845 and undertook the direction of the Nuovo e Filarmonico Theatres at Verona, which he retained until 1868. During this period he produced the operas 'Romeo di Montfort' (Verona, 1845); 'Fiorina' (Verona, 1851); 'Il parrucchiere della reggenza' (Verona, 1852); 'Gelmina' (Milan, 1853); 'Genoveffa del Brabante' (Milan, 1854); 'Tutti in maschera' (Verona, 1856), which was unquestionably his masterpiece, and was performed in a French translation at the Athénée Theatre, Paris, in 1869; 'Isabella d' Aragona' (Turin, 1859); 'Mazzeppa' (Bologna, 1861); 'Guerra in quattro' (Milan, 1861); and 'Marion Dolorme' (Trieste, 1865). In 1868 Pedrotti migrated to Turin, where he had been appointed director of the Liceo Musicale and conductor at the Teatro Regio. Here he founded the 'Concerti sinfonici popolari,' which took place every week in the Teatro Vittorio Emanuele, and were the means of introducing the works of Beethoven, Wagner, and other German composers to Italian audiences. Pedrotti's latest operas were 'Il favorito' (Turin, 1870) and 'Olema la schiava' (Modena, 1872), but he found that

his vogue was past, and that the younger generation cared little for his music. The closing years of his life were devoted almost exclusively to teaching. He committed suicide by throwing himself into the Adige. At his best Pedrotti was a master of light *opera buffa*. His music was invariably bright and tuneful, and the rhythmic swing and unforced gaiety of 'Tutti in maschera' were irresistible; but he was unable to keep pace with the changing fashions of his time, and fell unavoidably into the background.

R. A. S.

PEEBLES, DAVID (d. St. Andrews, Scotland, Dec. 1579), a 16th-century musician of St. Andrews, whom Thomas Wood describes as a 'notable cunning man.' He wrote a book of psalms in parts, and, about 1530, a 5-part motet, 'si quis diligit me,' which he presented to James V.¹

PEERSON, MARTIN (b. circa 1580; d. between Dec. 26, 1650, and Jan. 17, 1650/51). By his will he bequeathed a legacy to the poor of the parish of Dunnington in the Isle of Ely, and it seems likely that this was his birthplace. He was probably born about 1580, because in the year 1604 he set Ben Jonson's words 'See O see who comes here a maying' for 'the King and Queenes entertainment at Highgate on May Day.' This composition was published in 1620 as the last number in his

¹ Private Musicks, or the First Booke of Ayres and Dialogues, Containing Songs of 4, 5 and 6 parts, of severall sorts, and being verse and chorus is fit for Voyces and Viols. And for the want of Viols, they may be performed to either the Virginal or Lute, where the proficient can play upon the Ground, or for a shift to the Base viol alone. All made and composed according to the rules of Art.

As the title indicates, the character of the music differs in many respects from the strict madrigalian style. Most of the pieces are for solo or duet and chorus, and none should properly be sung without accompaniment. 'Upon my lap my Sovereign sits' is a song of the Blessed Virgin and is for two voices and chorus; the words are those of Robert Verstegan. 'Sing, Love is blind' is much more modern in design than a madrigal. Peerson's second volume was published in 1630 under the title of:

¹ Motetts or Grave Chamber Musique. Containing Songs of five parts of severall sorts, some full, and some Verce and Chorus. But all fit for Voyces and Viols, with an Organ Part, which for want of Organs, may be performed on Virginals, Base-Lute, Bandora, or Irish Harpe. Also, a Mourning Song of six parts for the Death of the late Right Honorable Sir Fulke Grevill, Knight of the Honourable order of the Bath, Lord Brooke, Baron Brooke of Beauchamp-Court in the Countie of Warwick, and of his Maesties most honourable privie Councell, etc. Composed according to the Rules of Art.

The whole of the poems of this set, with the necessary exception of the Elegy, are taken from Fulke Greville's *Caelica* sonnets. There is a 5-part setting of the Elegy as well as the 6 part one mentioned on the title-page. Greville died in 1628. In his secular vocal music Peerson stands in an intermediate position between the madrigalists and the Restoration composers.

Peerson's instrumental music is of a very interesting character; the fantasies in B.M. Add. MSS. 17,786-92 are among the most attractive

of all the string pieces of this period. There are 6 fantasies and 7 almaines in this collection and some more are at Christ Church, Oxford (see Arkwright, *Cat.*). Four pieces by this composer are in the 'Fitzwilliam Virginal Book.' Among these 'The Primerose' has a special charm.

The merits of his church music are little known, for excepting his 3 contributions to Leighton's 'Teares or Lamentacions,' none of it was printed, and none of it has been published in modern editions.

Peerson took the degree of B.Mus. at Oxford on July 8, 1613, and shortly after this date he became master of the choristers and organist of St. Paul's Cathedral. He was buried in the chapel of St. Faith in the Cathedral.

PÈLERINS DE LA MECQUE, LES, see RENCONTRE IMPRÉVUE, LA.

PELLÉAS ET MÉLISANDE, opera in 5 acts, set to Maeterlinck's play by Debussy. Produced Opéra-Comique, Paris, Apr. 30, 1902; New York, Feb. 19, 1908; Covent Garden, May 21, 1909; in English, Denhof Opera Co., Prince of Wales's Theatre, Birmingham, Sept. 19, 1913.

Schönberg has written a symphonic poem, op. 5, on this subject, produced Berlin, 1911.

PELLEGRINI, VINCENTO (b. Pesaro, late 16th cent.), a canon at Pesaro, c. 1603; maestro di cappella at Milan Cathedral, 1611-31. He composed 2 books of masses, other church music and secular canzonets in collective volumes, also a book of canzonets in organ tablature, in the French style (Venice, 1599); and instrumental pieces in 3 and 4 parts in Lucino e Fil. Lomazzo's 'Seconda aggiunta alli Concerti,' 1617 (Q.-L.).

PENÁLOSA, FRANCISCO (15th-16th cent.), Spanish composer. He is said to have been choirmaster to Ferdinand the Catholic after 1504, and then to have been in the choir of the Cappella Giulia under Leo X., but is not mentioned by Haberl or Celani. Barbieri printed 10 compositions in his edition of the 'Cancionero de los siglos XV. y XVI.' (Madrid, 1890), in-

cluding a quodlibet, in which 5 voices sing different folk-songs, while the bass remarks *Loquebantur variis linguis*. . . . Church music by him exists in several MSS. at Barcelona (Bibl. de la Diputació; Orfeó Català), Tarragona (Cathedral) and elsewhere. A complete edition is in preparation by Mn. Higiní Anglés.

J. B. T.

PENÁLOSA, JUAN (mid-16th cent.), Spanish church-composer, elected organist of Toledo Cathedral in 1549. The motets preserved in MS. at Toledo, are probably by him, and not by Francisco, judging by the style and by the fact that one of them ('Memorare pissima oprobria') is dated 1549. Eight of these were printed by Esalava, attributed to Francisco Penálosa. The cathedral archives at Granada contain a 'Missa pro defunctis' by 'Penálosa,' probably also Juan.

J. B. T.

PENÉLOPE, lyric poem in 3 acts; words of R. Fauchois, music by Gabriel Pauré. First performed Monte Carlo, Mar. 4, 1913; Paris, Théâtre des Champs Élysées, May 10, 1913; Opéra-Comique, Apr. 11, 1922. M. L. P.

PENET, HILAIRE, described as a clerk of the Diocese of Poitiers (clericus Pictavensis), was admitted in 1514 as a singer in the Papal Chapel, and was also appointed one of the *cantores secreti* or chamber musicians to Pope Leo X.³ His compositions which are preserved are not numerous, a Mass a 4 in the choir-books of the Papal Chapel, and a few motets and other works in the collections of the time. Ambros commends his motets as good, tasteful work. J. B. M.

PENNA, LORENZO (b. Bologna, 1613; d. Oct. 20, 1693), maestro di cappella of S. Ilario, Casalo Monferrato, 1656. Shortly before 1669 he entered the Carmelite Order at Mantua, and after that he became maestro of the Carmelite church at Parma. At the same time he was Master of Theology and Doctor of the College of the Academy 'dei Filaschisi e Resoluti,' and held a similar position at Imola Cathedral. He composed masses and other church music, French Correntes in 4 parts (1673); also 2 theoretical works, one, on counterpoint and figured bass, having appeared in 5 editions as well as in a piracy by Phalèse of Antwerp (1690). E. v. d. s.

PENTATONIC SCALE. A pentatone is a scale of five notes, i.e. in which the octave is reached on the sixth note. This involves some of the notes being more than a tone apart. Similarly six-note scales are hexatones and seven-note may be called, for distinction, heptatones. No instances are found of a scale with less than five notes to the octave, and those with more than seven are rare or doubtful.

A tetrachord is the interval of a fourth with one or two, seldom more, interior notes. The

¹ Bibl. Provincial and Cathedral.
² See Haberl, *Essays*, II, p. 69.

remainder of the octave (another tetrachord and a tone) is a pentachord. The additional tone is called the disjunctive tone. A tone is obtained by ascending a fifth and descending a fourth, or *vice versa*; but the ear is cognisant of the interval long before it makes this analysis.

TONAL PENTATONIC.—The study of present-day primitive music (the only and the sufficient substitute for antiquity of record) shows certain tendencies in scale-making. The vocal scale, the first stage, proceeds downward; the instrumental, later and more precise, upward. After some first tentative efforts the tetrachord is taken as the basis. The tetrachord is filled first with one note, later with two. As this becomes familiar the compass is gradually enlarged to two tetrachords, the central note being usually the tonic. From these tendencies, which are supported by copious evidence, we may argue to an early form of scale such as

As instruments came in, with diverse pitch and compass, fragments or extensions of this came into use, and eventually the five pentatonics

became familiar, though locally one or two of them were preferred to the others.

SEMITONAL PENTATONIC.—So far we have considered pentatonics as based only on the octave and fifth and their derivatives, fourth and tone. But in some parts of the world—China, Japan and India, for instance—the major third also became audible, and this, when placed inside the fourth, gave the semitone.

Hence the tetrachord,  giving another set of five pentatonics.

HEXATONES, ETC.—As the pentatonics, either tonal or semitonal, became familiar, their tetrachords were variously constituted

 and  and variously combined

and when, in addition to this, tonal and semitonal met in one country—in India and China, and to a less degree Japan, which borrowed from China—a very great number of pentatonics were produced. A good musician would know not far short of a hundred.

Comparing the last three notes of the two scales just given we see that together they produce the tetrachord 

This combination gives us the hexatone

and we can easily devise many others—

—for instance, which is so common in modern Greek folk-song, formed from two semitonal tetrachords. The step from hexatone to heptatone is only a matter of time.

The octave very rarely exceeds eight notes (inclusive) or the tetrachord four; and from the way in which the latter was formed we see why.

'GAPPED' SCALES.—These pentatonics and hexatonics are sometimes called 'gapped' or 'transilient,' implying that a note has been left out. But it was never there. The five notes of the scale were felt as adjacent. There is no more of a gap between D and F for an ear that has never heard it filled than there is between F and G for us who are for the moment ignoring the F#. But if we continue, as we conveniently may, to call them gaps, we may notice that they always occur at the interval of a fourth (or fifth); and that is the distinguishing mark of the true pentatonic

Such a scale as  would

be a mongrel—a *τὸνός μικτός*, as the Greeks said.

The Scotch pentatonics are mostly tonal, the Irish and English also occasionally semitonal. The Arabian scales have divided the 'gap' mechanically, and obtained a three-quarter tone, and the result is there also to this day in the bagpipe, however it may have been arrived at. The theory that gapped scales were formed by taking the 5th, 6th, 7th and other harmonics needs more substantiation than it has at present received, and such scales are not pentatonic in the accepted sense of the word.

A. H. F. S.

PENTATONON (*πεντάτονον*), the Greek term for the interval known in modern music as the Augmented Sixth, which consists, in the aggregate, of five Tones; i.e. two Greater and two Lesser Tones, and one Diatonic and one Chromatic Semitone.

PEOPLE'S CHORAL UNION AND SINGING CLASSES, see NEW YORK.

PEOPLE'S CHORUS OF NEW YORK, see NEW YORK.

PEOPLE'S CONCERT SOCIETY. This Society, which exists for the purpose of popularising good music in the poorer parts of London, was founded in June 1878 by a number of enthusiastic musical amateurs. A small charge for admission is an essential feature of the plan,

The concerts are given in various centres, sometimes in co-operation with local settlements, etc. (see SOUTH PLACE SUNDAY CONCERTS), and in late years in H.M. Prisons. At the end of the 45th season, 1922-24, over 1600 concerts, orchestral and chamber, had been given. The 47th season, 1925-26, included an extension of the work through co-operation with the British Broadcasting Company. The funds of the Society are derived from the receipts from the concert and from annual subscriptions and donations. Sir Henry Hadow is chairman of the Society.

PEPUSCH, JOHN CHRISTOPHER, Mus.D. (b. Berlin, 1667; d. London, July 20, 1752), son of the minister of a Protestant congregation in Berlin, studied the theory of music under Gottlieb Klingenberg, organist at Stettin, and the practice of it under Grosse, a Saxon organist. At 14 years of age he obtained an appointment at the Prussian court. Devoting himself to the study of the ancient Greek writers, he became a deeply skilled theorist. He retained his appointment until he was thirty years old, when, being an eye-witness (according to Hawkins) of an act of savage ferocity on the part of the King (the decapitation, without trial, of an officer who had uttered some words at which the barbarous despot took offence), he determined on quitting his native land for some country where human life was not in danger of destruction by the unbridled will of an individual. He first went to Holland, where he remained for upwards of a year.

He came to England about 1700 and was engaged in the orchestra at Drury Lane. In 1707 he adapted the music of the opera 'Thomyris, Queen of Scythia,' besides composing the recitatives and some additional songs, and probably did the same for others of the Anglo-Italian operas produced about that period. And at the same time, with the assistance of Abraham de Moivre, the celebrated mathematician, he zealously pursued his study of the music of the ancients. In 1710 he took an active part in the establishment of the ACADEMY OF ANCIENT MUSIC, in which he took a deep interest throughout his life. In 1712 he was engaged by the Duke of Chandos as organist and composer to his chapel at Cannons, for which he produced several services and anthems. About 1716 he published 'Six Cantatas' (in English and Italian) and 'Six English Cantatas,' the words by John Hughes, which were received with great favour, and one of which, 'Alexis,' with violoncello obbligato, continued to be sung in public until the first half of the 19th century had nearly passed away. On July 9, 1713, he took the degree of Mus.D. at Oxford, his exer-

cise (performed July 13) being a dramatic ode on the Peace of Utrecht: the words were printed on both sides of a folio leaf. About the same time he revived the practice of solmisation by hexachords, which had been abandoned for upwards of a century. Soon afterwards he became music director at Lincoln's Inn Fields Theatre, and continued so for many years. During his engagement there he composed the music for 'Venus and Adonis,' masque, 1715; Colley Cibber's 'Myrtillo,' 1715; 'Apollo and Daphne' and 'The Death of Dido,' masques, 1716; and 'The Union of the Three Sister Arts,' masque for St. Cecilia's Day, 1723; 'The Squire of Alsatia,' 1726; besides arranging the tunes and composing overtures for 'The Beggar's Opera,' 1728, and 'The Wedding,' another ballad opera, 1729.¹ He also arranged the tunes for Gay's interdicted opera 'Polly,' 1729. (See BALLAD OPERA.)

In 1724 he was induced to join in Dr. Berkeley's scheme of a college in the Bermudas, and actually embarked, but the ship being wrecked, the undertaking was abandoned, and he returned to England. In 1718 he had married Margarita de l'Épine (see ÉPINE), the eminent singer, who brought him a fortune of £10,000. In 1730 there was published anonymously *A Treatise on Harmony, containing the chief Rules for composing in two, three and four parts*. As the rules contained in the book were those which Pepusch was in the habit of imparting to his pupils, and as they were published without the necessary musical examples, he felt compelled to adopt the work, and accordingly in 1731 published a second edition with the requisite additions, but still without his name. It was conjectured that the first edition was put forth by Viscount Paisley, afterwards Earl of Abercorn, who had been a pupil of Pepusch's; but on this point nothing is known. Corroboration of this theory is given in a copy in the British Museum containing a transcript of many of the examples in the second edition, in a hand closely resembling Lord Paisley's, and with the inscription 'aet. 44' corresponding to Lord Paisley's age in 1730. In 1737 he obtained the appointment of organist of the Charter House, where he passed the remainder of his days, devoting himself to his studies, the care of the Academy of Ancient Music, and the instruction of a few favourite pupils. His wife died early in Aug. 1746. Cooke writes under date 'Sunday, Aug. 10, 1746':

'I was at the [Surrey] Chapel in the morning, but in the afternoon went to Vauxhall with the Doctor, Mrs. Pepusch being dead.'

Pepusch lost his only child, a son, a youth of great promise, some short time before. He wrote a paper on the ancient Genera, which was read before the Royal Society, and published in the *Philosophical Transactions* for 1746, and for

¹ He arranged the music for 'Perseus and Andromeda' (Apr. 2, 1717) and 'Dido's Lament' (Dec. 1724).

which he was elected F.R.S. He was buried in the chapel of the Charter House, where a tablet was placed to his memory in 1757. Besides the compositions before named he produced odes to the memory of the Duke of Devonshire, 1707 (sung by Margarita de l'Épine and Mrs. Tofts), and for the Princess of Wales's birthday, Mar. 1, 1715-16; airs, sonatas, and concertos for various combinations of string and wind instruments, and some Latin motets. He also edited Corelli's sonatas in score. (See *Q.-L.*) In 1751 he dictated *A Short Account of the Twelve Modes of Composition and their Progression in every Octave*, never published. He bequeathed his library to John Travers and Ephraim Kelner, on whose deaths it was dispersed. A portrait of him is in the New Schools, Oxford. Another portrait, by Hudson, has been engraved. Although Pepusch was somewhat pedantic, he was profoundly skilled in musical science, and the musicians he formed (of whom it is only necessary to mention Travers, Boyce and Cooke) sufficiently attest his skill as a teacher.

W. H. H.; addn. A. H. H.

PERABO, ERNST (b. Wiesbaden, Nov. 14, 1845; d. Oct. 29, 1920), one of ten children, all followers of music. His talent showed itself very early, and at 12 years old he played Bach's 'Wohltemperirtes Clavier' by heart. In 1852 his parents took him to New York, and after a time arrangements were made through the interest of William Schaufenberg, himself a pupil of Hummel, to send him back to Germany for education. He left the United States Sept. 1, 1858, and after nearly four years with Joh. Andersen, at Eimsbüttel, near Hamburg, he entered the Leipzig Conservatorium, Oct. 22, 1862. After going successfully through the course there under Moscheles, Richter, Reinecke, etc., he returned to New York in Nov. 1865, and after some hesitation settled at Boston, where he made his first appearance at the symphony concert of the Harvard Musical Association, Apr. 19, 1866, and where he was well known and much esteemed as a teacher, a pianoforte-player, and a composer and arranger of music for that instrument. Amongst other things he played the whole of Schubert's PF. sonatas in public. His compositions embrace a scherzo, op. 2; three studies, op. 9; 'Pensées,' op. 11, containing a musical setting of Hamlet's Soliloquy (Augener & Co., London); 'Circumstances' (Tennyson's Song, op. 13); Prelude, Romance and Toccatina, op. 19; and his arrangements, ten transcriptions from Arthur Sullivan's 'Iolanthe,' op. 14, Concert-Fantasies from Beethoven's 'Fidelio,' opp. 16 and 17. He also published six sets of selections from various composers, fingered and adapted for the piano.

g.; additional information from E. P. Warren.

PERCUSSION. The treatment of a large proportion of discords is divided into three

stages—preparation, percussion and resolution. The Preparation is the sounding of a discordant note in a previous chord, percussion is the actual sounding of the discord, and resolution the particular mode of its release, or passage into concordance. In the following example, where E in the treble of the second chord is the discordant note, (a) is the preparation, (b) the percussion, and (c) the resolution. (See **PREPARATION AND RESOLUTION.**)

C. H. H. P.

PERCUSSION INSTRUMENTS. Orchestral instruments are usually grouped under the headings—string, wind and percussion. The percussion group includes in one section strained membranes such as drums and tambourines, and in another section plates and bars, whether of wood or other hard material, appearing as cymbals, triangles, steel chimes, the glockenspiel, castanets, xylophone and tubular bells.

D. J. B.

PERCY, JOHN (b. 1749; d. Jan. 24, 1797), was a composer of ballads which were in favour in the latter part of the 18th century, but which have now passed out of remembrance, with the single exception of 'Wapping Old Stairs.' He composed *Select Songs* (26) in 1795-97, which included 'Gaffer Grey' (No. 10) and 'I know a bank' (No. 17). He published eight songs, op. 1, in 1781; the Garden Scene from *Romeo and Juliet* as a duet, Apr. 2, 1785; and six ariettas, op. 5, in 1786. He was an organist and a tenor vocalist.

W. H. H.; addn. W. H. G. F.

PERDENDOSI, PERDENDO LE FORZE, 'losing strength,' a direction like 'morendo,' nearly always used at the end of a movement or section of a movement. It denotes a gradual diminuendo, and in the later modern writers, a slight rallentando as well.

M.

PEREZ, DAVIDE (DAVID PERES) (b. Naples, 1711; d. ? Lisbon, after 1780), son of Spaniard, was admitted in 1718 to the Conservatorio di Sta. Maria di Loreto, where he studied the violin under Antonio Gallo, and counterpoint under Francesco Mancini. His first opera, 'Siroë,'¹ was composed for San Carlo in 1740. At the invitation of Prince Naselli he went to Palermo, and became master of the Real Cappella Palatina. Here he remained till 1748, and produced 'Li travestimenti amorosi' (1740), 'L'eroismo di Scipione' (1741), 'Astartea,' 'Medea' and 'L'isola disabitata.' After 'La clemenza di Tito' (1749), given at San Carlo in Naples, and 'Semiramide' (1750) at the Teatro delle Dame in Rome, he composed operas for all the principal towns in Italy. In 1752 he accepted an invitation to Lisbon, where he composed 'Demofonte' for Gizziello and the tenor Raaff (Mozart's Munich

¹ The score, dated 1740, is in the Real Collegio di Naples.

(friend), the success of which was so great that the King bestowed on him the Order of Christ, and the post of maestro at the Real Cappella, with a salary of 30,000 francs. The new theatre in Lisbon was opened in 1755 with Pérez's opera 'Alessandro nelle Indie,' in which a corps of cavalry and a Macedonian phalanx appeared on the stage. Pérez procured the best Italian singers for the opera during his managership. Other operas are mentioned in *Q.-L.* In 1755 he came to London, and produced 'Ezio' with great success. Here also was published in 1774 a fine edition, with portrait, of his 'Mattutino de' Morti,' his best sacred work, though he also composed, when in Lisbon, a 'Credo' for two choirs, and other church music. An oratorio, 'Il martirio di San Bartolomeo,' was performed at Padua in 1779. His compositions can scarcely be called remarkable, and Fétis ranks him below Jommelli. In person he resembled Handel, and like him he lost his sight in old age, but worked on up to his death. Specimens of Pérez's work will be found in Vincent Novello's various publications.

In 1780 the composer resolved to return to Naples. On June 2 he embarked with his family on a Swedish ship, which was soon afterwards attacked by pirates. Pérez and his son escaped the general massacre by hiding in the hold amongst the cargo; the ship was scuttled, and ran ashore at Albufeira. The composer lost all his possessions, which were considerable. F. G.; addns. J. B. T.

PÉREZ, JUAN GINEZ, see GINES PÉREZ, Juan.

PEREZ CASAS, BARTHOLOMÉ (*b.* Lorca, Jan. 24, 1873), Spanish conductor and composer. Originally 1st clarinet, and then a military bandmaster, he became a teacher at the Madrid Conservatoire, and founded a wind-instrument society. In 1914-15 he was enabled to found the Madrid Philharmonic Orchestra, which, with the Symphony Orchestra (conducted by Fernández Arbós), provides Madrid and many other Spanish towns with symphonic music. He has produced many new works, including Vaughan Williams's 'London Symphony.' His own works include a 'Suite Murciana' for orch. and a string quartet. J. B. T.

PERFECT, used principally of INTERVALS and CADENCES; see those headings, also HARMONY and TEMPERAMENT.

PERFECT FOOL, THE, opera in one act, written and composed by Gustav Holst; produced (B.N.O.C.) Covent Garden, May 14, 1923.

PERGETTI. Probably the last castrato who ever sang in England. He made his first appearance at the Società Armonica, May 6, 1844, in an aria from 'Ciglio,' an opera of his own, and is described as 'a brilliant and expressive singer, who won a deserved encore' (*Mus. Examiner*). G.

PERGOLA, LA, see FLORENCE.

PERGOLESI (PERGOLESE), GIOVANNI BATISTA (*b.* Jesi, near Ancona, Jan. 3, 1710¹; *d.* Pozzuoli, Mar. 17, 1736), composer.

The original name of the family appears to have been Draghi, but in accordance with local custom those members of it who settled at Jesi were known as Pergolese or Pergolesi from Pergola, a town in the Marche, of which they were natives. This partly accounts for the error of Saverio Mattei, who maintained that the composer's surname was Jesi, and that he was given the name of Pergolese from his birth-place. He himself signed his name both as Pergolese and as Pergolesi; the form Pergolesi (*i.e.* dei Pergolesi) is more generally preferred in Italy, and the form Pergolese (Pergòlese) appears to have become popularised by French writers. Villarosa supposed the family of Pergolesi to have belonged to the nobility; but it is evident from a work entitled *Picenorum mathematicorum elogia* by Giuseppe Santini di Staffolo, professor at the University of Macerata (Macerata, 1779), that his father was a surveyor, and his grandfather a shoemaker. He appears to have been an only child.

Pergolesi studied music at Jesi with a local master, Francesco Santini, and had lessons on the violin from one Francesco Mondini until his 16th year (1725, when he was sent to Naples and admitted to the Conservatorio dei Poveri di Gesù Cristo, through the influence of Count Cardolo Maria Pianetti Mannelli, a nobleman of Jesi, whose services to the Austrians during the war of the Spanish Succession had earned him the protection of Charles VI. At Naples Pergolesi was placed first under Gaetano Greco and later (probably after Greco's death) under Durante. It has also been stated that he studied with Francesco Feo when Durante was summoned to Vienna. There is, however, no foundation for the story (given by Villarosa and reproduced by H. M. Schletterer) of Durante's visit to the Austrian capital. Between 1725 and 1728 he became master at the Conservatorio della Madonna di Loreto, and it was doubtless for this reason that Pergolesi became a pupil of Feo. His teacher of the violin was Domenico de Matteis. It has been stated that he showed a remarkable facility for extemporising chromatic passages on this instrument, and that his powers of composition were first made known to his teachers in this manner. The story, however, given by Villarosa with some detail and reproduced by some later writers, does not appear to have been believed by Florimo, in spite of his love of picturesque anecdote.

Pergolesi made his first public appearance as a composer with a sacred drama entitled 'La

¹ The date and place of his birth were given wrongly by many historians until the Marquis de Villarosa finally settled the question by reference to the register of his baptism, a facsimile of which is given by E. Faustini-Paulini in his life of Pergolesi (*Rassegna musicale di Milano*, Aug. 31, 1899, etc.; published in book form by Ricordi, 1900).

Conversione di San Guglielmo d' Aquitania,' performed in 1731, probably by his fellow-pupils, at the monastery of S. Agnello Maggiore. Between the acts of this was performed the comic intermezzo 'Il maestro di musica.' The success of the performance gained Pergolesi the protection of the Prince of Stigliano, a distinguished amateur, for whose marriage in 1723 Alessandro Scarlatti had composed a serenata. Through the influence of this nobleman, who was equerry to the Viceroy of Naples, aided by the patronage of the Prince of Avellino and the Duke of Maddaloni, Pergolesi was commissioned to write an opera for the court theatre, and produced 'La Sallustia' with the comic intermezzo 'Nerino e Nibbia' (sometimes known as 'Amor fa l' uomo cieco') for the winter season of 1731. The opera was successful, but the intermezzo did not please. 'Ricimero,' produced in 1732 with the intermezzo 'Il geloso schernito,' was a failure, which may perhaps be accounted for by the fact that Pergolesi composed it just after the death of his father. Discouraged by its reception, he devoted himself to other forms, and it was at this time, according to Florimo, that he wrote thirty sonatas for two violins and bass at the request of the Prince of Stigliano; twenty-four of these were printed in London. He was also commissioned by the municipality of Naples to write a Mass on the occasion of the earthquake of March 20, 1731. The Mass, which was for double choir and orchestra, was much admired, and was followed by a second of the same scale, which is said to have won the public praises of Leonardo Leo, who was present at the performance. Florimo further states that Pergolesi afterwards added a third and fourth choir to this work; but there is no trace remaining of any Mass by him for more than two choirs.

In spite of the failure of 'Ricimero' it was not long before Pergolesi returned to dramatic composition, and in Sept. 1732, he produced at the Teatro dei Fiorentini a comic opera in Neapolitan dialect, 'Lo frate nnamorato,' which, according to a contemporary (Chracas, *Diario ordinario*, 1732), met with considerable success. The following year he returned to serious opera with 'Il prigionier' (so called in the libretto, but generally known as 'Il prigionier superbo' to distinguish it from the 'Prigioniero fortunato' of A. Scarlatti), to which 'La serva padrona' furnished the intermezzi (Aug. 28, 1733). There seems no reason to suppose that the success of 'La serva padrona' was in any way extraordinary, especially as Pergolesi was already known as a composer of comic opera.

It was about this time (1733-34) that Pergolesi entered the service of the Duke of Maddaloni. After he left Jesi his father had become involved in financial difficulties. His mother died in 1727, and her dowry should

have been paid to her son, but her husband was unable to find the money, and even after the father's death in 1732 Giovanni Battista still had to negotiate with the executors until 1734. On his appointment to the service of the Duke, Pergolesi appears to have considered his affairs more settled, as he sent for his aunt, Donna Cecilia Giorgi, to keep house for him. In the spring of 1734 the Duke took him to Rome, and Ghezzi the caricaturist gives an amusing account of the performance at S. Lorenzo in Lucina of a Mass by him (that in F for five voices).

'L' Ill. Duca di Matalona e Duchessa fecero fare una Musica spaventosa in S. Lorenzo in Lucina con tutti Musici e Violini di Roma. La qual Musica fu fatta dal Mastro di Cappella chiamato Pergolesi il quale stà al servizio del Principe di Stigliano et è stato l'atto venire da Napoli a posta e fu fatta da testa ad onore di S. Giovanni Pomuceno (i.e. St. John Nepomuk). La qual Composizione è stata spi tosa e fuori dell' ordinario.'

Chracas records the departure of the Duke of Maddaloni and his suite from Rome for Naples in June 1734, and Pergolesi probably returned with his patron. It is not clear whether he was in the service of both the Duke and the Prince at the same time; perhaps he left the Prince later. On Oct. 25, 1734, his opera 'Adriano in Siria' was performed at the Teatro di S. Bartolomeo, with 'Livieta e Tracollo' as intermezzi. The intermezzi were well received, but the opera did not please. It has generally been stated that Pergolesi became maestro di cappella at the Casa Santa at Loreto in this year, but this has no foundation. The archives of the 'Holy House' do not mention Pergolesi, and other musicians held the post without any kind of interruption during his lifetime. It is possible that the tradition may have arisen from some connection of Pergolesi either with the convent of Loreto near Avellino, some sixty miles distant from Naples, or with the Conservatorio della Madonna di Loreto at Naples itself. The libretto of 'Il Flaminio,' a comic opera produced at Naples in the autumn of 1735, tells us that he was organist of the royal chapel at Naples.

On Jan. 31, 1735, the famous opera 'L' Olimpiade' was produced under Pergolesi's own direction at the Tordinona Theatre in Rome. It was badly received, and Grétry tells us that an orange was thrown at the composer's head. It is related that Egidio Romualdo Duni, whose opera 'Nerone' was produced at the same theatre on May 21, assured Pergolesi that his opera was far too good to succeed, and after the result which he had foreseen did his best to console him. It is also related that the failure of 'L' Olimpiade' hastened the death of the composer, who returned to Naples and devoted himself to sacred music. His devotion to sacred music, however, can only have been partial, as he produced the comic opera 'Il Flaminio' in the autumn at Naples (Teatro Nuovo), where it was thoroughly successful.

It is not known when he first showed symptoms of consumption. He went to Pozzuoli for his health in February 1736, as the guest of the Duke of Maddaloni, leaving his aunt in Naples, and verbally handing over to her all that he did not take to Pozzuoli; we may thus infer that he did not expect to live much longer. There is no reason to suppose that he stayed first at Torre del Greco. At Pozzuoli he is commonly supposed to have written the celebrated *Stabat Mater*, commissioned by the Confraternity of S. Luigi di Palazzo at Naples as a substitute for the setting by A. Scarlatti, which had hitherto been sung there annually on Good Friday. According to Paisiello, however, the work was written very soon after he left the Conservatorio, which he did in 1729, if Florimo is to be trusted. He was lodged in the Capuchin monastery at Pozzuoli, founded by the ancestors of the Duke of Maddaloni; and even under these circumstances his comic spirit did not desert him, as we see from the well-known 'Scherzo fatto ai Cappuccini di Pozzuoli,' a musical jest for tenor and bass voices, the humour of which is too coarse for explanation here. During his illness he was visited several times by Feo, his former teacher, to whom he is said to have expressed himself with great diffidence with regard to the value of his *Stabat Mater*. He was supposed to have been promised ten ducats for this, but whether it was paid is doubtful, as his possessions had to be sold to pay the expenses of his funeral, which amounted to eleven ducats. He was buried in the cathedral of Pozzuoli.

After his death Cecilia Giorgi returned to Jesi, and the details given above of his financial relations with her and his other relatives are made evident from a notarial act dated Jesi, Oct. 4, 1736, by which the claims of Cecilia Giorgi and her nephew's paternal uncle, Giuseppe Maria Pergolesi, to his estate were finally settled.¹ Some biographers supposed that Pergolesi died of poison, but this is doubtless due to confusion with his contemporary Leonardo Vinci, who met his death by this means in 1732. More credence may be given to the tradition that his death was hastened by the profligacy for which he was apparently notorious. A number of legends have grown up relating to his love affairs, two of which deserve mention. Florimo printed a story which he professed to have reproduced verbatim from a contemporary chronicle found among the papers of the Prince of Colobrano, by whose permission he published it. According to this document a certain Maria Spinelli, of the princely house of Caristi, was told by her three brothers that unless she chose within three days a husband who was her equal by birth, they would kill the composer Pergolesi, with whom she was in love, and who returned her affection. After

three days the lady decided to enter a nunnery instead, stipulating that Pergolesi was to conduct the Mass on the occasion of her taking the veil. She entered the convent of S. Chiara, and, dying a year later, was buried on Mar. 11, 1736, Pergolesi again conducting the Requiem for her. His own death took place little more than a year after this, and Florimo suggested that the tragic anniversary was one of the causes of it. Unfortunately for the romantic admirers of Pergolesi, the story has been shown to be devoid of foundation. Benedetto Croce pointed out (1) that no biographer previous to Florimo had made any allusion to it; (2) that the papers of the Prince of Colobrano, now in possession of the Duke of Maddaloni, contain nothing of the kind; (3) that the archives of the nunnery of S. Chiara showed that no Maria Spinelli had been a member of that community during the 18th century; and finally that, according to the statement of the Duke of Maddaloni, the story was the invention of one Carlo Coda, and had appeared in some periodical of Florimo's time.

The other legend was put forward by a certain A. Piazza, who professed to have discovered from contemporary memoirs that Pergolesi was in love with the daughter of 'Lord Bulwer, British Ambassador Extraordinary to the Court of Naples,' and that the lady's name was 'Betzi.' This story hardly requires formal refutation. Pergolesi's romantic history has formed the subjects of two operas bearing his name, one by Paolo Serrao (Naples, 1857), and the other by Stefano Ronchetti Monteviti (Milan, 1857).

An oil-painting, supposed to represent Pergolesi, is in the library of the Naples Conservatoire, to which it was presented by Florimo. There are also several lithographed and engraved portraits of him, some of which are reproduced in *Musica e musicisti*, Dec. 1905. The difficulty of finding any two which might conceivably represent the same person, makes it impossible to decide which is the most authentic. The most interesting portrait is certainly the caricature by Ghezzi in the Vatican Library (Cod. Ottob. No. 3116, p. 139), which is reproduced in the *Gazzetta musicale di Milano* for Dec. 14, 1899. The revolting hideousness of this drawing may have been due to personal animosity—Ghezzi's criticism on Pergolesi's Mass in 1734 was not that of a friend—but the artist is hardly likely to have wilfully invented a deformity of the left leg, to which he draws particular attention, and which caused the composer to walk lame. This characteristic had not been noticed by any biographer until it was pointed out by E. Faustini-Fasini.

The importance of Pergolesi as a composer has been exaggerated since his death to an extent so extraordinary that it is worth while attempting to account for the development of

¹ G. Annibaldi, *Il Pergolesi in Pozzuoli, vita intima*, Jesi, 1890.

the tradition. Paisiello¹ very sensibly remarked that he would not have been so much esteemed if he had lived longer. His death of consumption at the age of 26, just after a conspicuous failure at Rome, caused the undoubted success of his comic operas (that is, his three-act comic operas in dialect, not his little intermezzi) to be overlooked, and lent a fictitious interest to the revival of works which are in no way above the average merit of the Italian music of that period. The celebrity of Pergolesi in later times depended almost entirely on 'La serva padrona' and the Stabat Mater, to which may be added the air 'Tre giorni son che Nina,' which recent research has shown to be wrongly attributed to him. (See CIAMPI.) As far as can be traced, this enthusiasm for the two former works originated not in Italy but in Paris. 'La serva padrona' first appeared in Paris at the Hôtel de Bourgogne in 1746, obtaining a mere succès d'estime. 'La musique en a été trouvée excellente; elle est d'un auteur ultramontain, mort fort jeune' (*Mercur de France*). On its reappearance in 1752, in the repertory of the 'Bouffons Italiens,' it was received with enthusiasm, and for some reason regarded as the type of all Italian music. It is sufficient to cite the words of an anonymous satirist of the time (quoted in Geoffroy's *Cours de la littérature dramatique*):

'Lull n'est plus à l'Opéra
Le favori de Polymnie;
Baneau bientôt s'effacera
Malgré sa profonde harmonie;
Gélott n'a rien d'étonnant;
Il faut des bouffons d'Italie:
Aujourd'hui tout Français galant
Ne se montre qu'en fredonnant
Et si no, e plou et glou,
C'est à qui sera le plus fou.'

The allusion is to the words 'e si e no, e sù e giù' from the air 'Sempre in contrasti' ('Serva padrona,' Act I.). While the other operas remained in manuscript and so forgotten, the not too discriminating enthusiasm of Rousseau was perpetuated by Fétis and later historians. The Stabat Mater was also printed in Paris not long after the composer's death, and was even printed at Leipzig with German words by Klopstock as early as 1782. In Italy it has always been regarded with exaggerated veneration, and no doubt this has been enhanced by the fact that Bellini (who also died young) called it 'divino poema del dolore.' De Brosses' opinion of Pergolesi will serve as an example of contemporary criticism:

'Parmi tous ces musiciens, mon auteur d'affection est Pergolèse. Ah! le joli génie, simple et naturel. On ne peut pas écrire avec plus de facilité, de grâce et de goût. . . . Ses petits intermèdes sont charmants, si gais, si réjouissants.'

We must, however, be on our guard against

¹ Paisiello's opinions are quoted from the *Osservazioni musicali intorno a compositori napoletani, ricavate dalla conversazione col Signor Paisiello*, compiled by Agostino Gervasio. The MS. in the Bibl. de' Geronimi at Naples was printed in *Musica e musicisti*, Dec. 1905.

accepting blindly the criticism of any contemporary, and the value of De Brosses' appreciation of Pergolesi must be measured by his opinion on Handel—'Sur ce que j'ai vu de sa musique vocale, je le croirais inférieur à tous ceux que je vous ai nommés [i.e. Pergolesi, Vinci, Porpora, Sarri, etc.].' Paisiello and Padre Martini, however, were less enthusiastic, and pointed out that the Stabat Mater was written in the style of a comic opera. Paisiello is not far wrong in saying that 'His "Olimpiade," the Intermezzo "La serva padrona," a Mass, and other compositions of his that remain to us, differ in no way from the Stabat Mater, in which, moreover, there are incoherent passages; that is to say, certain verses set without sense of expression, such as the theme of the "Eia mater," which suggests the comic style.'

As a composer of sacred music, Pergolesi is no more than a clever imitator of his master Durante. His masses for double choir are effective and well written, but commonplace in their material. It should be noted that his two choirs are used separately only for antiphonal or cumulative effects on single chords, there being no attempt at polyphonic writing in more than five parts at most. The chief merit of the Stabat Mater is the sentimental charm of its melodies. Sentimental charm is indeed the chief merit of all Pergolesi's work, sacred or secular. It reaches its highest in the beautiful duet 'Se cerca, se dice' in 'L' Olimpiade,' and we can see that it was an inborn gift and not the result of long development, from the fact that the other duet in 'L' Olimpiade'—'Nei giorni tuoi felici,' which is hardly inferior to the first, was transferred unaltered from Pergolesi's first dramatic composition, 'La conversione di S. Guglielmo.' The comic opera 'Lo frate nnamorato' contains several pleasing airs, including the well-known 'Ogne pena cchiù spiatata,' as well as some genuinely humorous numbers, the best of which is an absurd parody of an aria di bravura, sung by a baritone, but demanding a compass from F below the bass stave to C in the treble, which was no doubt intended to be produced in a grotesque falsetto. There are also interesting types of popular Neapolitan songs, and a bright quintet at the end of Act II. On the whole, however, Pergolesi is inferior to Leo and Logroscino in comic opera, and indeed could only be considered a great composer in any department by critics who were entirely ignorant of the work of his predecessors and contemporaries.

CATALOGUE OF THE EXTANT WORKS OF PERGOLESI

I. OPERAS AND ORATORIOS

1. S. Guglielmo d'Aquilaria (Naples, 1731). Score—Brit. Mus., Berlin, Naples R.C.M.
2. Il maestro di musica (Naples, 1731. Score (MS.)—Berlin. Le Maître de musique (Paris, 1732). Score (MS.)—Dresden, Paris, Bibl. Nat. The engraved score, published by Boivin at Paris, is in most important libraries. This opera was also performed at Venice in 1743 as 'L' Orasio,' and at Florence in 1760 as 'La scuola alla moda.'

¹ The writer was indebted to Alfred Wotquenne for kind assistance in the preparation of this catalogue.

3. *La Sallustia* (Naples, 1731). Libretto—Rome, Bibl. Vitt. Em. Scuro—Naples R.C.M.
4. *Nerino e Nibbia* (Naples, 1731). Libretto—Rome, Bibl. Vitt. Em.
5. *Ridimero* (Naples, 1732). Score—Berlin, Brussels Cons.
6. *Il geloso scherzato* (Naples, 1732). Score—Berlin, Brussels Cons.
7. *Lo frate innamorato* (Naples, 1732). Score—Brit. Mus., Brussels Cons., Naples R.C.M.
8. *Il prigioniero superbo* (Naples, 1733). Libretto—Rome, Bibl. Vitt. Em. Scuro—Naples R.C.M.
9. *La serva padrona* (Naples, 1733). Libretto—Rome, Bibl. Vitt. Em. Scuro in all important libraries. There are many printed editions, both Italian and French (*La Servante maîtresse*).
10. *Adriano in Siria* (Naples, 1734). Score—Brit. Mus., Naples R.C.M.
11. *Tracollo* (Naples, 1734). Score in all important libraries. Performances under other titles: *Livietta e Tracollo* (reprint by G. Radiciotti, Paris); *La finta Polacca* (Rome, 1746); *La contadina settola* (Venice, 1744). Il ladro convertito per amore (Venice, 1760). Il finto pazzo, etc.
12. *L'Olimpiade* (Rome, 1735). Score—Brit. Mus., London R.C.M., Dresden, Milan Cons., Münster, Paris Cons., Vienna Hofbibl.
13. *Il Flaminio* (Naples, 1735). Libretto—Rome, Bibl. Vitt. Em. Scuro—London R.C.M., Brussels Cons., Naples R.C.M.
14. *Il transito di San Giuseppe* (7). London R.C.M., Einsiedeln, Vienna Musikfreunde.
15. *Il Toniastote* (ascribed to Pergolesi). Score—Bologna.
16. M. Schletterer's biography in the *Sammlung musikalischer Forstige* edited by Count F. von Walderssee, gives a very full account of later performances of the opera in Italy and in other countries, but is otherwise inaccurate and uncritical.

II. CANTATAS

1. *Chi non ode e chi non vede*. Brit. Mus., London R.C.M., Berlin, Brussels Cons.
2. *Clori, se mai riedi*. London R.C.M.
3. *Della città vicina di Mergellina*. Münster.
4. *Dalsigne, ah! mia Dalsigne*. Brit. Mus., Berlin, Brussels Cons., Münster.
5. *Ecco, Tirsi, quel mirto*. London R.C.M.
6. *In queste plaghe amene*. London R.C.M.
7. *Luce degli occhi miei*. Brit. Mus., London R.C.M., Berlin, Brussels Cons., Münster.
8. *Nel chiuso centro (L'Orfeo)*. Brit. Mus., Berlin, Brussels Cons., Cambridge Fitzw., Vienna Hofbibl.
9. *Quest' amor, quest' è fede*. Münster.
10. *Quest' è il piano e quest' è il rio*. Brit. Mus. (autograph ?).
11. *Rinfacciar son costretto*. London R.C.M.
12. *Io mi rido*. Serenata for two voices. London R.C.M.

PRINTED EDITIONS

Quattro cantate da camera. 1. raccolte da G. Bruno. (Napoli, 1750 (?)), four cantatas: London, Preston & Son (1750 ?)

III. SACRED MUSIC

- Mass* (Kyrie and Gloria) for ten voices (two choirs) and two orchestras, in F. Brit. Mus., Milan, Münster.
- Mass* (Kyrie and Gloria) for five voices and orchestra in C. Published at Vienna, *Conjoglio d' arti e d' industria*.
- Mass* (Kyrie and Gloria) for five voices and orchestra in D. Brit. Mus. (2 copies), Brussels Cons., Milan, Münster, etc.
- Mass* for four voices in D minor. Brit. Mus.
- Aure sacratis amoris*, motet for S. and orchestra. Brussels, Ste. Gudule.
- Confitebor*, psalm for S.B.A.T.B. and orchestra (in most libraries). De placido torrente, motet for S. and orchestra. Brussels, Ste. Gudule.
- Dies irae*, motet for S.A. and orchestra. Münster.
- Dixit Dominus* (in D), psalm for ten voices (two choirs) and orchestra. Naples R.C.M. (autograph).
- Dixit Dominus* (in B flat), psalm for S.A.T.B. and orchestra. Münster.
- Domine ad adjuvandum* (in D), motet for S.A.T.B. and orchestra. Münster.
- Domine ad adjuvandum* (in G), motet for S.B.A.T.B. and orchestra. Brit. Mus., Münster.
- Domine ad adjuvandum* (in D), motet for A.T.B. and orchestra. Brit. Mus.
- Eccle pletis signa*, motet for S. and orchestra. Milan.
- Eccle superbus hostes*, motet for S. and orchestra. Brussels, Ste. Gudule.
- In coelestibus regna*, motet for S. and orchestra. Milan.
- In hoc die tam decore*, motet for S.B.A.T.B. and orchestra. Brit. Mus., Milan.
- Laetatus sum*, psalm for S.A.T.B. and orchestra. Münster.
- Laetatus sum*, psalm for S. and orchestra. Brussels Cons.
- Laudate pueri*, psalm for S.A.T.B. and orchestra. Brussels Cons.
- Laudate pueri*, for canto solo, vocal quartet, strings and wind, the lib. of which is in the baslin Library.
- Miserere mei Deus* (in C minor), psalm for S.A.T.B. and orchestra. London R.C.M.
- Miserere mei Deus* (in C minor), psalm for S.A.T.B. and orchestra. Brit. Mus., Milan, Münster.
- Miserere mei Deus* (in G minor), psalm for S.A.T.B., unaccompanied. Brussels Cons.
- Miserere mei Deus* (in A minor) for nine voices and organ. Schwerlin.
- Ius sicut Deus noster*, motet for B. and orchestra. Brussels, Bibl. Roy.
- Salve regina* (in F minor) for S.S. and orchestra. Brussels Cons.
- Salve regina* (in A minor) for S. and orchestra. Milan.
- Salve regina* (in A minor) for S. and orchestra. Brit. Mus., London R.C.M., Brussels Cons., Milan, Schwerlin, etc.
- Salve regina* (in F minor) for S. and orchestra. Milan.
- Salve regina* (in C minor) for S.B. and orchestra. Münster.
- Stabat Mater* for S.A. and orchestra. Montecassino (autograph). MS. copies in most libraries: several printed editions.
- Tuba et tympano*, motet for S. and orchestra. Brussels, Ste. Gudule.
- A De Profundis*, mentioned by De Brosses, is no longer extant.
- Vocemille barba capucinorum*, for T.B. (schieren fatto al Cappuccini di Pozzuoli). Milan, Münster, Munich, Naples R.C.M.

IV. INSTRUMENTAL MUSIC

Sonata for violoncello and continuo. Milan, Naples R.C.M.

Concerto for violin and strings. Milan, Naples R.C.M.

Symphony in G for orchestra. Münster.

Concerto for flute in G. (Breitkopf's thematic catalogue, 1785.)

Fourteen sonatas for two violins and bass. (12mo, London, 1780 ?)

Twelve sonatas for two violins and bass. (London.)

Eight lessons for the harpsichord. (London, c. 1780 ?)

A second set of eight lessons for the harpsichord.

There are in addition many fragments of unidentified opera, including fifteen airs in Breitkopf's thematic catalogue (1765), and the incomplete autograph parts of a trio, 'Paria, che dirai vuol', at Milan.

E. J. D.

Apart from the *Stabat Mater*, 'La serva padrona', the spurious 'Tre giorni', and a certain Gloria in excelsis, all of which exist in numerous modern editions of more or less value (the first was re-instrumented by Lvov, and the last was mainly popular in an arrangement for organ solo), there are not many of Pergolesi's works accessible in modern reprints. The series of songs called 'Gemme d' antichità' contains the motet 'Sanctum et terribile', three airs from 'La conversione di San Guglielmo', a 'Salve Regina', the airs 'Euridice, dove sei' and 'Ogni pena' (the latter in many other editions); Gevaert's 'Gloires d'Italie' has airs from 'Il maestro di musica' and 'Olimpiade'; and the air 'Tremende oscura' from 'Meraspe' is in the *Oxf. Hist. Mus.* vol. iv. p. 221. Banck's 'Duetten alter Meister' contains a duet, and his 'Arion und Gesänge alterer Tonmeister' contains an air by Pergolesi, 'Se cerca, se dice'; a sonata for two violins and violoncello was published by Joseph Williams; the harpsichord suites were edited by J. Pittman, and a solo sonata in D by J. A. Fuller Maitland.

M.

PERI, Jacopo (b. Florence,¹ Aug. 20, 1561; d. Florence, Aug. 12, 1633), Florentine composer, called by his contemporaries 'Il Zazzerrino' in allusion to his long hair; a pupil of Cristoforo Malvezzi.

Malvezzi, a native of Lucca, became a canon of San Lorenzo in Florence, maestro di cappella to the Medician Grand Dukes Francesco and Fernando I. and died in Florence, 1597. Little is known of the facts of Peri's life. He became attached to the grand-ducal court of Florence and seems to have had some part in Medician diplomacy. He was appointed maestro di cappella (*Principale direttore della musica e dei musici*), a post which he held under Francesco, Fernando I. and Cosmo II. In 1618 he was created a 'Camerlengo generale.' His name is closely connected with that group of futurist poets and musicians who centred first around Giovanni Bardi dei Conti Vernio, and later around Jacopo Corsi. In this way he will have come into contact with and been influenced by much of the finest Florentine culture of his day. The intensive forces of the Renaissance, liberating men's minds, rendering acute their intellects, opening up immeasurable vistas of art and philosophy, found in the Bardi-Corsi

¹ *Riemann* has Rome of Florentine parenta.

gatherings a notable opportunity for comparison and synthetic reasoning. As far as the art of music is concerned one of the chief results of these meetings, and one with which the name of Peri is most nearly associated, is the memorable attempt that was made to restore the mode of declamation peculiar to Hellenic tragedy, an attempt which resulted at last in the discovery of modern recitative. After the declamatory foreshadowings of the madrigalists culminating in Orazio Vecchi's 'Amfiparnasso,' Vincenzo Galilei and Caccini produced the first monodic cantatas in which the new style was attempted; but their efforts were confessedly tentative, and their productions conceived upon a very small scale, fitted only for use as chamber music. Peri took a higher flight. At the instigation of Jacopo Corsi and the poet Rinuccini he attempted a regular musical drama called 'Dafne.' The libretto for this was supplied by Rinuccini, and Peri composed the music (now lost) entirely in the style which was then believed to be identical with that cultivated by the ancient Greek tragedians. Count Bardi having been summoned to Rome in 1592 to act as maestro di camera to Clement VIII., the work was privately performed in the Palazzo Corsi in the year 1597, Peri himself playing the part of Apollo. This performance was witnessed only by a select circle of Corsi's personal friends. But in the year 1600 Peri was commissioned to produce an opera for public performance on the occasion of the marriage of Henry IV. of France with Maria de' Medici. The subject chosen for this was 'Euridice.' Rinuccini again supplied the libretto, and Peri wrote the music in the same style as that he had already adopted in 'Dafne,' though, it is to be supposed, with greater freedom and vigour. The first performance took place on Feb. 9, 1600. The success of the work was all that could possibly be desired. It proved that the ideal conceived by the little band of enthusiasts was capable of satisfactory embodiment in a practical form; and that form was at once adopted as the normal type of the long-desired lyric-drama. It is true that, in the same month as the production of 'Euridice,' Emilio de Cavalieri's oratorio, 'La rappresentazione di anima e di corpo' was publicly performed in Rome with scenery, dresses and action, and that the music of this work is written in exactly the same kind of recitative as 'Euridice.' But Peri's claim to be regarded as the composer of the first opera rests not on 'Euridice' but on 'Dafne,' though that work was never produced in public; and the only ground on which that claim can be disputed is the fact that Cavalieri is known to have composed two secular pieces, called 'Il satiro' and 'La disperazione di Fileno,' both privately performed in 1590, and a third work, entitled 'Il giuoco della cieca,' performed

before the Grand Duke Ferdinand in 1595. Not a trace of either of these three works now remains to us. They are described as 'pastorals,' and may or may not have been of sufficiently large dimensions to entitle them to rank as dramas. Moreover, we cannot be quite certain that they were written in the same style as the oratorio. As the case now stands, therefore, and until we are furnished with more decisive evidence than that we now possess, Jacopo Peri stands before us as the acknowledged father of a form of art which is very nearly the greatest that it has ever entered into the mind of man even to conceive, or to bring through so many difficulties to a successful issue.

Strange to say, Peri made no attempt to follow up his wonderful success. Probably no opportunity for the production of another public performance on so extensive a scale occurred during his lifetime. But whatever may have been the cause of his retirement Peri produced no more operas. In 1608 he wrote the recitatives for Rinuccini's 'Arianna,' Monteverdi composing the arias. An opera 'Tetide,' to a libretto by Cini, was sent to Mantua in 1608, but did not appear. Peri wrote part of the opera 'La guerra d'amore,' with Grazie, Signorini and del Turco. This work saw light at Florence in 1615. Another opera, 'Adone,' written in 1620 for Mantua, was probably never performed. In 1625 Peri wrote 'La precedenza delle dame' for the Florentine court. In 1628 he wrote the part of *Clori* in Gagliano's 'Flora.'

It does not appear that 'Dafne' was ever published, though some numbers were discovered at Brussels. 'Euridice' was printed in complete form in the year of its production, under the title of 'Le musiche di Jacopo Peri, nobil fiorentino, sopra l'Euridice del Sig. Ottavio Rinuccini' etc., Firenze, 1600; and reprinted in Venice in 1608, and again at Florence in 1863, in small 8vo. Both the early editions are exceedingly rare. (See *Q.-L.*) This interesting work and the 'Varie musiche,' are believed to be the only specimens of Peri's compositions now in existence, with the exception of a 'Lamento d'Iole' for soprano solo, at Bologna. Kiesewetter reprinted three madrigals for four voices in his *Schicksale und Beschaffenheit des weltlichen Gesanges* (Leipzig, 1841).

PÉRI, LA, a danced poem, in one tableau; music by Paul Dukas. Produced Paris, Théâtre du Châtelet, Apr. 22, 1912; Opéra, Dec. 5, 1921.

M. L. P.

PÉRIER, JEAN ALEXIS (b. Paris, Feb. 2, 1869), a singer of Belgian origin, first a baritone, then a tenor, was the son of Émile Périer, a violinist at the Opéra. Périer was a pupil of Bussine and Taskin at the Conservatoire; won the first prize for singing and opéra-comique (1892); made his début at the Opéra-Comique in 'La Flûte enchantée' (Monostatos, 1892) and created the principal part in 'Phryné' (Saint-Saëns, 1893). He left this theatre after 1900, having there created the chief parts in 'Pelléas et Mélisande' (Debussy, 1902), 'L'Enfant-roi' (Bruneau, 1905), 'Miarka' (Alexandre Georges, 1905), 'Mme. Butterfly' (Puccini, 1906), 'Fortunio' (Messager), 'Le Chemineau' (X. Leroux, 1907), 'L'Heure espagnole' (Ravel, 1911), 'Le Roi Candaule' (Bruneau, 1920), etc.

During his absences from the Opéra-Comique, Périer has belonged to various Paris theatres: the Menus-plaisirs (1894); the Folies-dramatiques (1895-96), in productions of 'François-les-bas-bleus' and 'La Fiancée en loterie' (Messager); the Bouffes-parisiens (1898-1900) in Messager's 'Véronique' and Lecocq's 'La Belle au bois dormant'; the Châtelet (1903) in 'Les Aventures du Capitaine Corcoran'; the Gaité (1910) in A. Mariotte's 'Salomé'; the Nouveautés (1923) in Reynaldo Hahn's 'Ciboulette.' A notable comedian, Périer has sung since then on various comedy stages. He has published, in collaboration with Mlle. Marguerite Babaian, *Mes exercices, tirés des chansons populaires de France*. He is a chevalier of the Légion d'Honneur (1922).

PERIGOURDINE (PERIJOURDINE), a country dance which takes its name from Perigord, where it is chiefly danced. It is sometimes accompanied by singing. The following example is from the *Essai sur la musique* (Paris, 1780) of De la Borde and Roussier:

W. B. S.

PERINELLO, CARLO (b. Trieste, Feb. 13, 1877), Italian writer and composer, studied composition at first in Trieste with Wieselberger, then with Jadassohn at the Leipzig Conservatoire. Appointed teacher of composition at the Trieste Conservatoire in 1904, he resigned ten years later to hold a similar appointment at the Milan Conservatoire. He has composed a good deal of chamber music and orchestral works, but is best known for his work in connexion with the Istituto Editoriale Italiano, of which he is the 'technical director.'

Of its publications, Perinello has prepared the volumes of Caccini, Monteverdi, Peri, Paisiello, Palestrina, Porpora, Sammartini and Orazio Vecchi. A quartet in C major and a quintet for pianoforte and strings (published Schmidl, Trieste) have been favourably received in Italy and in Germany.

F. B.

PERIOD. A period is a group of bars. Simple melodies, often actually set to verse, are usually thought in terms of line and stanza, and their sections, if with accompanying words, are called 'strains,' if without, 'phrases' or 'periods,' according to their length. This may sometimes be a useful nomenclature, but in composed music the distinction becomes blurred or disappears. On the other hand, in all music just as there is a normal bar so there is a normal group of bars. This has sometimes been called a rhythm; but as another and a broader meaning has here been given to that word, it will be better to use for this group the word 'period.'

The period is usually of four bars, less often of six or three, and seldom for long together of five (Brahms, 3rd Intermezzo, op. 117). Sometimes the composer puts the dots on the i's, as Haydn did with his fermatas and G.P.'s, or Beethoven with that dramatic 'bridge' in op. 110, bar 38. The bar's rest in the first movement of the C minor symphony (114 from the end) is usually ignored; and as it stands it certainly does not make sense. Yet it is difficult to believe that it found its way into the score without the composer's intention. Is it possible that he omitted to write a similar rest eight bars later, and that the two were meant to recall the fermatas at the opening? The minim rest in the 16th bar of Mozart's second (C minor) Fantasia is a blemish, and he seems to have found it so, since he has done away with it in the reprise. It seems certain that Mozart and Franz, by filling up the 33rd bar of 'He was rejected,' defeated Handel's intention of an eloquent silence. In the first prelude of the 'Wohltemperiertes Clavier' many editors have interpolated a bar between bars 22 and 23. The MS. authority is decidedly against this; but the interpolation would also spoil the symmetry of the periods, as may be seen if the bass is written out with a different barring:

Without the extra bar the periods are of 4, 6, 8, 4, 8, 4 bars.

The less any one grouping is maintained the more rhythmically flexible the music is. Thus in Mozart's G minor quintet the minuet is in four-bar and the trio in three-bar grouping, mainly; but the actual grouping is:

Minuet:

4 2 4 3 || 4 4 4, 4 2 2 4 3 3 ||

Trio:

3 3, 3 4, 3 3 || 3 3, 2 2 2, 3 3 4, 3 3 ||

Haydn is fond of veiling the squareness of a four-bar period at any rate at the beginning of a movement, although he drops back into strict periods later on where irregularity would tend to become confusing. The first eight bars of the PF. sonata in D (No. 20) are taken as 3 + 2 + 3; and of the adagio of the sonata in F (No. 3) as $5\frac{1}{2} + 2\frac{1}{2}$. In the symphony in D (No. 3) he presents the four-bar theme of the presto under the guise of a five-bar, and in the 'clock' movement the drowsy feeling is partly due to an eight-bar theme being begun a bar too soon and dragged on a bar beyond its time into ten bars. Chopin's music, on the other hand, has so much variation of figure that he feels the necessity of keeping, as a rule, steadily to his four-bar period; the G minor Nocturne (op. 15, No. 3) is a rare exception: he has marked it *languido e rubato* as opposed to the *a tempo religioso* in strict periods which comes later.

METHODS OF RELIEF.—Thus relief from the monotony of the period is as important as the period itself. This relief is afforded mainly in three ways.

(1) Inside the phrase by interpolation and stretto. Thus, in the opening of Mozart's G minor symphony the action is delayed by an interpolation at the 13th bar and the balance restored by a stretto at the 28th.

(2) Between one phrase and another by overlap and hiatus. Hiatus is used to prolong four bars into five (Brahms, Rhapsodie No. 4, op. 119). A good instance is Mozart's D minor quartet, andante (K 421),

whereby six bars become eight. Overlap of one phrase with the next is too common to be worth an instance.

(3) In the phrase considered as a complete structure, by multiplication and division. The first seven bars of the overture to 'Figaro' may be described as a (geometrical) progression —1 + 1·2 + 1·4—and so, in the opposite sense — $\frac{1}{8} + \frac{1}{4} + \frac{1}{2} + \frac{1}{4}$ —may the last fifteen bars of the

great G pedal in the finale of Schubert's symphony in C. Both of them create an illusion of great speed.

A. H. F. S.

PERIODICALS, MUSICAL. The following summary is concerned primarily with periodicals exclusively devoted to music and published in the English, French, German or Italian languages.

ENGLAND

Musical journalism began in England with *The Quarterly Musical Magazine and Review* (1818–28), edited by R. M. Bacon, of Norwich. It was intended to contain articles of the following kind: 1. Original correspondence upon all the branches of the science, theoretical and practical; 2. Critical and impartial accounts of musical performers; 3. Reviews of musical publications; 4. Anecdotes of music and musical men; 5. Poetry, original or selected, that might appear calculated for musical adaptation; 6. A register or chronicle of musical transactions. Among the most interesting articles which appeared were—a review of Forkel's life of Bach in vol. ii.; an account of the performance at the Philharmonic of Beethoven's Fifth Symphony (vol. vii. 1825), and an extremely depreciatory criticism of Beethoven and his works (vol. ix., 1827). In vol. iii. began the publication of music in each number, which was continued till the end of the magazine in 1828.

In the meantime¹ a monthly journal, *The Harmonicon* (1823–33), had begun to appear, under the editorship of W. Ayrton. It contained ably written memoirs of eminent musicians (some of the earlier being accompanied by engraved portraits), essays, reviews of new music, correspondence, criticisms of musical performances of all kinds, foreign musical news, information on all subjects interesting to musicians, and original and selected vocal and instrumental music. *The Musical Magazine* (1835–36), a monthly, edited by C. H. Purday, met with little success.

The Musical World (1836–91) began on a new footing: its policy was not entirely to confine itself to musical matters, but to combine general interests with those of music. It was edited by Cowden Clarke; with the co-operation of an able staff of writers, amongst them Samuel Wesley, the elder, who contributed the first paper, 'A Sketch of the State of Music in England from 1778'; Dr. Gauntlett; Dr. Hodges; Egerton Webbe; Carl Klingemann; W. J. Thoms; John Parry, the elder; C. H. Purday; A. H. H. Strumppf; Lowell Mason, of Boston, U.S.A.; Collet Dobson; John Ella; and Joseph Warren. It was originally published by J. A. Novello, in small 8vo weekly, from Mar. 18, 1836, to Dec. 29, 1837, which date completed its seventh

¹ *The English Musical Gazette or Monthly Intelligence*, published by Arding & Merrett, only survived from Jan.–July 1819. It contained, however, a substantial memoir of Haydn that is still of interest.

quarterly volume. A new series began on Jan 5, 1838, in large 8vo, published by Henry Hooper. With its third series (Jan. 1842) it became 4to, a form it retained to the end of its career. It changed hands frequently till the beginning of 1854, when it was acquired by Boosey & Co., who published it till 1863, when it went to Duncan Davison & Co. *The Musical World* was edited by J. W. Davison from 1844 until his death in 1885, and few periodicals have embraced a more varied and curious mass of literature more or less directly connected with music, and in a great measure of a humorous, often Rabelaisian cast. Among the contributors after 1840 may be mentioned G. A. Macfarren—Analytical essays on Beethoven's works; on Mendelssohn's 'Antigone,' 'Œdipus,' 'Athalia,' etc.; on the 'Messiah'; on Mozart; on Day's *Theory of Harmony*; on the Leipzig Bach Society's publications, etc. Dr. Kencaley—Translations from the Italian, Danish and Icelandic, and original papers. John Oxenford—Original poetry (171 sonnets); translations from the Greek Anthology, Goethe's Venetian Epigrams, Goethe's Affinities, Aristotle, Lessing, Winkelman, etc. J. V. Bridgeman—Translations of Oulibicheff on History of Music and on 'Don Giovanni'; Hiller's Conversations with Rossini; Lenz's *Beethoven*; Lobe's *Mendelssohn*; Wagner's *Oper und Drama*, and 'Lohengrin'; Lampadius's *Mendelssohn*; Hanslick on Wagner, etc. Other contributors were E. F. Rimbault, W. Chappell, H. S. Edwards, Shirley Brooks, Joseph Bennett, and many other well-known members of the press. During its later years clever humorous caricatures by Lyall were added. In 1886 Francis Hueffer became editor, the paper at that time being published by Messrs. Mallett, of Wardour Street. In 1888 it was bought by E. F. Jacques, by whom it was edited until its demise in 1891. During the last two years of its existence it was published by Messrs. Biddellcombe, of the Strand.

In 1842 appeared two new weekly musical journals, *The Dramatic and Musical Review* (1842-52), edited and owned by the brothers Eames, one a violinist and the other organist of St. Paul's, Covent Garden; and *The Musical Examiner* (1842-44), edited by J. W. Davison, among the contributors to which were Henry Smart, G. A. Macfarren, E. J. Loder, Dion Boucicault and Albert Smith.

The Musical Times (1844-)¹ was founded by J. A. Novello in continuation of a periodical of the same name published by Mainzer. It was issued monthly and besides printed matter contained sheets of part music. The interest of the paper dates from about 1846, when Edward Holmes began writing for it. From this time

till his death in 1859 he was a constant contributor. Among his most interesting series of articles are the following—'Life of Henry Purcell' (1847), 'Curiosities of Musical History' and 'Cathedral Music and Composers' (1850), 'English Glee and Madrigal Composers' (1851), 'Mozart's Masses,' 'Haydn's Masses' (1852, etc.), 'Addenda to the life of Mozart' and 'Beethoven's Mass in C' (1858). In 1855-56 appeared translations by Sabilla Novello of Berlioz's *Soirées de l'orchestre*, and his treatise on orchestration, and a series of papers translated by her called 'Truth about Music and Musicians' (1856-57). From Dec. 1853 to Sept. 1854 several essays were contributed by Leigh Hunt. In Sept. 1863, Henry C. Lunn undertook the office of editor, contributing constantly interesting articles and criticisms on current musical topics. Among the most frequent contributors during the 19th century were G. A. Macfarren, E. F. Rimbault, W. H. Cummings, Carl Engel, E. Prout, W. A. Barrett, H. H. Statham and Joseph Bennett. From time to time series of articles of special interest have appeared, as for example, Dr. Wm. Pole's 'Story of Mozart's Requiem' (1869), Dr. Chrysander's 'Sketch of the History of Music Printing from the 15th to the 19th centuries' (1877). In 1887, on the retirement of Lunn, W. A. Barrett assumed the editorship, which he retained until his death in 1891. He was followed by E. F. Jacques, who in his turn was succeeded in 1897 by F. G. Edwards. Under Edwards's régime *The Musical Times* was much enlarged and its scope considerably widened, special attention being devoted to the illustrations, among which were published many interesting portraits of musicians and facsimiles of valuable historical documents. On his death in 1909 W. G. M'Naught took over the editorship. He was succeeded in 1918 by the present editor, Harvey Grace. *The Musical Times* is to-day the most widely read of all English musical journals.

The Tonic Sol-fa Reporter (1853-1920) was founded by John Curwen, whose lectures at Newcastle on the Tonic Sol-fa Notation were the origin of the publication. A tentative double number had already been issued in 1851. Each monthly issue contained criticisms, reports of the progress of the Sol-fa movement in different parts of England, and a series of anthems, glees, rounds, hymn tunes, etc., in the Sol-fa notation. In 1881 J. Curwen resigned the post of editor to his son, J. S. Curwen, who retained it until his death in 1916. In Jan. 1889 a new monthly issue of *The Reporter* was begun, under the title *The Musical Herald and Tonic Sol-fa Reporter*, a change intended to indicate that the paper was conducted upon catholic rather than controversial lines. Under that name it appeared until 1920,

¹ A blank space following the date of a journal's foundation indicates that it is still in progress.

when it was amalgamated with *The Musical News*.

A short-lived journal devoted to similar aims was *The Tonic Sol-fa Record* (1904-06), the official organ of the Tonic Sol-fa College.

The Musical Standard (1862-) was projected by an amateur, A. W. Hammond, who was at first both proprietor and editor. It was issued fortnightly, and professed to be unfettered by clique, and not devoted to the behests of houses in the trade. It paid special attention to the interests of church music and organists. Its earlier numbers contained, besides leading articles on topics of current interest, notices of concerts, specifications of old and new organs, extracts from ancient church registers relating to musical matters, biographical notices of the lesser masters and public performers, and reprints of old and curious works bearing on the subject of music. Among the contributors to the early numbers were W. J. Westbrook, Dr. Gauntlett, Joseph Bennett and J. Crowdy. In an early number proposals were made to establish a Musical College. This was the origin of the College of Organists. (See ROYAL COLLEGE OF ORGANISTS.) In vol. v. the paper began a weekly issue. The old series of the journal ended with vol. xiii., when Hammond sold the copyright to George Carr, and T. L. Southgate became editor. The scope of the journal was now considerably widened, and letters and notices from France, Germany, Italy and America were included. Vocal music as well as instrumental was now given weekly in the paper, among which were compositions by Sir W. Sterndale Bennett, Sir J. Goss, H. Gadsby, E. J. Hopkins, Berthold Tours, etc. In Feb. 1872 Reeves & Turner purchased the paper. Southgate retired in 1873, and was succeeded by J. Crowdy. In 1875 Bowden became the proprietor. With vol. viii. the weekly issue of music was discontinued. In May 1876 Broadhouse became editor. Among the most prominent articles that appeared under his regime may be mentioned a remarkable series, entitled 'Beethoven's Symphonies critically and sympathetically discussed,' by A. Teetgen. Turpin edited *The Musical Standard* from 1880 to 1886. He was succeeded again by Broadhouse, and in 1888 by Ernest Bergholt. In recent years it has been edited successively by E. A. Baughan and J. H. G. Baughan. It now appears fortnightly, and is published by W. Reeves.

The year 1863 brought two new weekly musical periodicals, *The Orchestra* (1863-87), and *The Choir* (1863-78). The first, published originally by Cramer, Wood & Co., and subsequently by Swift & Co., contained, besides criticisms of music in London and the provinces, correspondence from the principal musical centres of the Continent, serial 'feuilletons,' etc.

The Choir and Musical Record, published weekly by Thomas Wright, 'Choir' Office, 188 Strand, was intended to 'promote the art of church music by the publication of essays and papers advocating sound principles and directing taste.' Among the contributors were E. F. Rimbault, G. A. Macfarren, and E. J. Hopkins. Four pages of music were issued weekly. In 1879 it was incorporated in the short-lived *Saturday Musical Review* (1879, 42 nos.).

The Monthly Musical Record (1871-) was founded by Augener & Co., and first edited by Prof. E. Prout. Among the principal contributors to the earlier numbers were: W. G. Cusins, E. Dannreuther, S. Jadassohn, L. Nohl, F. Niecks, E. Pauer, C. F. Pohl and X. Scharwenka. Historical and analytical notices in a serial form have been given from time to time by Pauer, Niecks and others. In vol. ii. appeared Dannreuther's articles on 'Wagner: his Tendencies, Life and Writings.' From 1874-76 the editor was C. A. Barry; from that time until 1887 the post was held by W. A. Barrett. Admirable analyses of Schubert's masses, Schumann's symphonies, Weber's cantatas, etc., and descriptions of Urio's *Te Deum* and Stradella's *Serenata*, with reference to Handel's plagiarisms from them, all by Professor Prout, appeared in the earlier volumes. In recent years one of the most notable series of papers has been Prof. Niecks's 'Notes supplementary and corrective to the biography of Robert Schumann' (1921-23). The issue of four sheets of music with the publication began in the number for Feb. 1880. The present editor is A. Eaglefield-Hull.

'*Concordia* (1875-70), a journal of music and the sister arts,' was published by Novello, Ewer & Co., under the editorship of Joseph Bennett. The paper consisted of articles, reviews, criticisms, and London, provincial and foreign intelligence on music, poetry, the drama and the fine arts, and was published weekly. The principal contributors were Dr. W. H. Stone, Dr. Gauntlett, Rev. Maurice Davies, W. Chappell, W. H. Cummings, J. Knight, Walter Thornbury, H. H. Statham, C. K. Salaman, Clement Scott, E. Prout, H. Sutherland Edwards, H. Howe, H. C. Lunn and Joseph Bennett. The following articles of special interest appeared in this paper: *Recollections of Catalani*, Czerny, Mozart's son, Mozart's widow, Charles Neate, Schumann, Thalberg, the Philharmonic Society, the Lent Oratorios, the Shakespeare Jubilee of 1830, by C. K. Salaman; A comparison of the original and revised scores of 'Elijah,' by Joseph Bennett; *Witty French Songs of the last century*, by W. Chappell; *Helmholtz's New Musical Theories*, by W. Chappell; *London Choirs*, by Rev. Maurice Davies; 'Don Juan' and 'Faust,' by H. Sutherland Edwards; *Purcell's works*, by Dr. Rimbault; *Purcell's 'Yorkshire Feast'*

and Theatre Music, by W. H. Cummings; and a series of interesting facsimiles, letters and a song by Handel, a caricature of Handel, an autograph of J. S. Bach, and MSS. and letters of C. P. E. Bach. A weekly list of services in London churches, and a Shakespearean calendar, were also included. The publication was withdrawn in 1876, after fifty-two numbers had been published.

The Quaver (1876-85) was chiefly devoted to the exposition of the 'letter-note method' of sight-reading.

The London and Provincial Music Trades Review, now *The Music Trades Review* (1877-) appears on the 15th of each month. Besides much trade information connected with music patents, bankruptcies, etc., it has notices of concerts and other musical events, and reviews of both books and music, lists of new inventions and publications, and much miscellaneous intelligence.

Musical Opinion and Music Trade Review (1877-) is, as its name implies, an organ of the music trade. Of late years its scope has been much enlarged, and it now contains reviews and critical articles of high quality, many of which are subsequently republished in book form. A special section in each issue is devoted to the interests of the organist.

A paper more exclusively devoted to the interests of the trade is *The Piano, Organ and Music Trades Journal*, first issued as *The Pianoforte Dealers' Guide* (1882-).

The Musical Review (1883) was started by Novello & Co. with aims of a loftier kind than have often been associated with English musical periodicals. The *Review* was addressed mainly to serious musicians and to students of musical history. It contained a series of admirable articles by leading writers on music, and was conducted upon scholarly and independent lines. Unfortunately it received inadequate support from the public, and after a career of a few months ceased to appear.

The Lute (1883-99) published by Patey & Willis, made its first appearance under the editorship of Joseph Bennett. Besides the usual reviews, criticisms and miscellaneous articles it contained a musical supplement, and was the means of introducing to the world many part-songs and anthems by contemporary composers. In 1888 Bennett was succeeded in the office of editor by Lewis Thomas.

The Magazine of Music (1884-97) was founded by the Musical Reform Association, primarily for the purpose of introducing a new system of musical notation to the English public. Portraits and musical supplements were a special feature.

The British Bandsman (1887-) has appeared under various names, but in 1899 reverted to its original title. It is devoted to the interests of brass, reed and string bandsmen,

and of the musical trade generally. It appeared monthly until Mar. 1902, when it became a weekly.

The Meister (1888-95), the quarterly journal of the London branch of the Wagner Society, was founded and edited by W. Ashton Ellis. It did excellent work in spreading the knowledge of Wagner and his music at a time when there was still much prejudice to be overcome, containing as it did articles upon Wagner's works and translations from his prose writings, as well as miscellaneous information with regard to the progress of the Wagnerian movement in different parts of the world.

The Nonconformist Musical Journal (1888-1910), known from 1906-10 as *The Musical Journal*, was devoted, as its title implies, to the musical activities of the Nonconformist Churches. In 1910 it was incorporated in *The Choir*.

The Strad (1890-) is concerned almost entirely with violins and violinists. Somewhat similar in scope were: *The Fiddler* (1884-87); *The Violin Monthly Magazine* (1890-94), edited by J. M. Fleming; *The Violin Times* (1893-1907), edited by E. Polonaski and E. Heron-Allen; *Strings*, edited by J. Broadhouse (1894-95); and *The Cremona* (1906-11).

Musical News (1891-), founded under the direction of E. H. Turpin and T. L. Southgate, was designed to fill the place of the recently defunct *Musical World*. According to its prospectus it was intended to be 'the chosen expositor of academical intelligence,' and proposed to deal with 'all subjects connected with examinations and other departments of musical studentship.' In 1920 it was acquired by Curwen & Sons, and to mark its absorption of the *Musical Herald*, took the title *Musical News and Herald*. It was then edited by Edwin Evans and later for a short time by Sir R. R. Terry. It appeared weekly till 1927; since then monthly.

The Early English Musical Magazine, of which a few numbers were published in 1891, aimed at fostering a taste for antiquarian music, but unfortunately received little support, and soon expired. It contained many excellent articles, and some interesting reprints of Elizabethan music.

The scope of *The School Music Review* (1892-) is sufficiently indicated by its title. It appears monthly, and is published by Novello.

The New Quarterly Musical Review (1893-96) was founded in 1893 under the editorship of Granville Bantock. Its aims were high, and during its too brief existence it occupied a unique position in the world of culture. It represented the views of the younger school of English musicians, and the reviews and articles which appeared in it were, as a rule, of great interest, and often contained criticism of a high order of merit.

The Organist and Choirmaster (1894-1920) was, as its name implies, concerned chiefly with ecclesiastical music and the organist's profession. It was edited by Dr. E. J. Hopkins, Dr. C. W. Pearce and Dr. C. Vincent. After Apr. 1920 it was incorporated with *The Sackbut*. The last three numbers appeared under the title of *The Organist*.

The Musician, which appeared first in May 1897, and was discontinued in the following November, had a brief but not inglorious career. It was edited by Robin Grey, and employed the services of almost every writer of note connected with the profession of music in England, and of many distinguished foreign authors. Reviews, criticisms, and articles upon musical aesthetics were included in the scheme of the paper, which also presented its subscribers with several excellent illustrated supplements. A selection of the articles which had appeared in *The Musician* was published in book form, as *Studies in Music*, in 1903.

The Chord (1899-1900, 5 nos.), was a prettyly-got-up quarterly, which was intended to occupy in the world of music the position that *The Dome* occupied in the world of art and literature. It had some able writers on its staff, but its tone was unnecessarily polemical, and it failed to enlist the sympathies of the public.

Other periodicals published during the 19th century¹ were: *The Gregorian Quarterly Magazine* (1879, 4 nos.); *Musical Society* (1886-87), a monthly issued by W. Morley & Co.; *The Church Musician* (1891-95), the monthly journal of the Church Choir Guild; *The Keyboard* (1892-94); *The Minim* (1893-1902); *The Strand Musical Magazine* (1895-99); *The Amateur Orchestra* (1899, 6 nos.); *The Musical Gazette* (1899-1902), published by Joseph Williams and edited by Ernest Walker; and *The Music Student* (1899-1902), published by W. Reeves and edited successively by Pascal Needham and H. Saint George.

The first quarter of the 20th century saw the birth of a whole host of short-lived journals, including: *The Precentor* (1901-07, 29 nos.); *The Vocalist* (1902-05); *The Base Drum* (1903, 6 nos.); *The Weekly Musical Review* (1903, 10 nos.); *The Music Students' Magazine* (1903-1906, monthly, incorporated with 'The Minstrel'); *The Musician* (1905-06), published by the Vincent Music Co. and edited by T. Tapper; *The Musical Home Journal* (1905-08); *The Musical Era* (1905-10), which took the place of the old *Magazine of Music* as the official gazette of the Musical Reform Association; *Euterpe* (1909-10, 4 nos.); *The Literary and Musical Review* (1909-12, 17 nos.); *The Musical Antiquary* (1909-13), published quarterly under the editorship of G. E. P. Arkwright; *The Young Musician and the School Orchestra*

(1909-16, 43 nos.); *The Musical Observer* (1910-13, monthly); *The Musical Press* (1912-1913, 5 nos.); *The Music Review* (1912-13, 4 quarterly nos.); *The Musician* (1919-21), incorporated with 'The Music Student' after Aug. 1921; and *Fanfare* (1921), a monthly edited by Leigh Henry and devoted exclusively to contemporary music, of which 6 nos. only appeared.

Of these *The Musical Antiquary* (1909-13) was easily the most important; indeed, as a repository for the results of historical research on musical subjects it has found no successor. Among the scholars who contributed to it were G. E. P. Arkwright (its founder and editor), E. J. Dent, W. H. Grattan Flood, W. J. Lawrence, E. W. Naylor, W. Barclay Squire, R. A. Streetfield, R. R. Terry, Ernest Walker and H. E. Wooldridge.

Of the London periodicals founded since 1900 which are still in progress the following (arranged in chronological order) are the most noteworthy:

(1) *The Music Teacher* (1908-), originally entitled *The Music Student* and issued as the organ of the Home Music Study Union under the editorship of P. A. Scholes. In 1921 it absorbed *The Musician* (1919-21). With its change of title in 1922 it became the organ of the Music Teachers' Association. It is issued monthly, and is at present edited by W. R. Anderson. An important supplement, *Chamber Music*, was issued from 1913-16 under the editorship of W. W. Cobbett. A supplement for young people, *Music and Youth*, first issued in 1915 as *Youth and Music*, is still in progress.

(2) *The Choir* (1910-), which appears monthly under the editorship of J. T. Lightwood and deals chiefly, though not exclusively, with church music.

(3) *The Chesterian* (1915-), the house organ of J. & W. Chester, Ltd., edited by G. Jean-Aubry and appearing eight times yearly. It devotes special attention to contemporary music.

(4) *The Music Bulletin* (1919-), monthly, the official journal of the British Music Society, founded (as *The British Music Bulletin*), and originally edited, by A. Eaglefield-Hull.

(5) *Music and Letters* (1920-), a quarterly publication which, under the editorship of A. H. Fox-Strangways, enjoys a high reputation on account of the literary quality and authoritative character of its articles. A list of recent books on music, English and foreign, is an important feature.

(6) *The Sackbut* (1920-), which, like *The Chesterian*, deals mainly with modern music and contains frequent contributions from foreign writers. Originally edited by Philip Heseltine, it was acquired in 1921 by Curwen & Sons, and is at present edited by Ursula Greville. It appears monthly.

¹ The publications of the International Musical Society, which was founded in 1899, are noticed among the German periodicals.

(7) *The Organ* (1921-), a quarterly journal issued by the proprietors of *Musical Opinion*.

(8) *The Gramophone* (1923-), a monthly edited by Compton Mackenzie, which, in addition to its technical articles, publishes a number of contributions of general musical interest.

A complete list of provincial musical periodicals would not be very extensive, but the most important only can be mentioned here. Of those no longer current the most ambitious was *The Quarterly Musical Review* (1885-88), published at Manchester under the editorship of Henry Hiles. It contained many valuable articles on musical history and educational questions. *The Yorkshire Musician* (Leeds, 1887-89) and *The Irish Musical Monthly* (1902-1903), both met with little support. Of those still in progress the most important are *The British Musician*¹ (1926-), edited by Sidney Grew, a monthly founded by A. C. Boulton to help the work of the Birmingham Orchestra, *Y Cerdor Newydd* or *The Welsh Musical Magazine*, formerly *Y Cerdor* (1899-), and *The Scottish Musical Magazine* (1919-).

FRANCE AND BELGIUM

FRANCE.—The earliest musical periodical published in the French language² appears to have been *Sentiments d'un harmonophile sur différents ouvrages de musique* (Mar.-Apr. 1756), edited by Mourambert. It was followed by the *Journal de musique française et italienne* (1764-68), the *Journal de musique historique théorique et pratique* (1770-71), and the *Journal de musique par une Société d'amateurs* (1773-78). About this time there also appeared a number of publications such as the 'Journal de clavecin,' 'Journal de violon,' 'Journal d'ariettes,' which do not strictly come within the scope of this article, as they consisted entirely of music. Of 19th century periodicals the earliest were *La Correspondance des amateurs musiciens*, afterwards *Correspondance des professeurs et des amateurs de musique* (1802-05), edited by Cocatrix, and *Les Tablettes de Polymnie* (1810-1811), edited by Garaudé and Cambini. The first journal of real importance, however, was *La Revue musicale* (1827-80), founded by Fétis. In 1835 it joined forces with the *Gazette musicale de Paris* (itself the continuation of *La Dilettante*, 1833-35), which had been started the year before, and appeared under the title of *Revue et Gazette musicale* until 1880. Amongst its contributors were J. Janin, Berlioz, Liszt, R. Wagner, Balzac and Stephen Heller. *Le Ménestrel* (1833-), founded by Heugel, still

enjoys wide popularity. It gives a valuable summary of musical events throughout the world, and its longer articles are extremely able and scholarly. F. Clément, E. David, A. Jullien, V. Wilder, A. Pougin, and J. Tiersot may be mentioned among its contributors. *La France musicale* (1833-70) was a weekly journal, edited by Marie and Léon Escudier, which contained musical biographies and many other articles of interest. Among its contributors at different times were Castil-Blaze, G. Maurel, Farrenc, Méry, Philarrète Chasles and V. Schoelcher. Next in order came the *Revue de musique religieuse populaire et classique* (1845-48, 1854), edited by Danjou, and containing many important articles by him and by Fétis, Laurens, Morelot and other contributors, and *La Critique musicale* (1846-1847), edited by Azevedo and continued under the title of *L'Univers musicale* (1847-64). The second half of the 19th century saw the birth of a large number of musical journals of which the chief were: *La Chronique musicale* (1850-1865), edited by P. Villeblanche; *L'Orphéon* (1855-); *La Réforme musicale* (1856-70), devoted to the exposition of the Galin-Paris-Chevé system; *La Maîtrise* (1857-60, edited by J. d'Ortigue and L. Niedermeyer, and dealing exclusively with religious music; *Le Moniteur musical* (1858-), devoted to military band music; *La Paroisse* (1860-61), subsequently incorporated, together with *Le Plain Chant* (1860-61) in the *Revue de musique sacrée ancienne et moderne* (1861-70); *L'Art musical* (1860-94), which as the organ of the publishing house of Escudier took an important place in the musical world, its staff including many eminent writers, among them Seudo, Chouquet, Neukomm, Lacomme and Vizentini; *Le Monde artiste illustré* (1860-1914), which, under the editorship of Jules Ruelle, was for long the recognised authority upon dramatic and musical events in the French provinces and in Algeria; *La France chorale* (1861-67) and *L'Écho des Orphéons* (1861-), two journals devoted to choral music, the latter of which is still in progress; the *Bulletin de la Société des compositeurs de musique* (1863-70), edited by Weckerlin, and containing much antiquarian and historical matter; *L'Avenir musical* (1865-), like the earlier 'La Réforme musicale' an organ of the Méthode Galin-Paris-Chevé; *L'Instrumental* (1867-1914), a fortnightly periodical intended chiefly as a practical guide to musical societies; *La Chronique musicale* (1873-76), edited by A. Heulard, and to be distinguished from the journal of the same name which has already been mentioned; *La Renaissance musicale* (1881-83), edited by E. Hippeau; *Le Monde orphéonique* (1882-), a weekly devoted to male-voice part-singing; *La Revue wagnérienne* (1885-88), edited by E. Dujardin; the *Revue d'art dramatique et*

¹ Originally *The Midland Musician*.

² See J. G. Prod'homme, *Essai de bibliographie des périodiques musicaux en langue française* (Bulletin de la Soc. Française de Musicologie, 1918, No. 9). The present article is greatly indebted to M. Prod'homme's paper. For the period before 1750, the *Mercure de France* is of great value. See E. Deville, *Index du 'Mercure de France', 1673-1832, donnant l'indication, par ordre alphabétique, de toutes les notions, nouvelles, annonces, planches, etc. concernant les beaux-arts et l'archéologie* (Paris, 1910).

musical (1886-1914); *L'Indépendance musicale et dramatique* (1887-88); *Le Monde musical* (1889-), edited by A. Mangeot; *La Quinzaine musicale* (1894); *La Tribune de St. Gervais* (1895-1922), the official organ of the Schola Cantorum; the *Revue internationale de musique* (1898-99), edited by H. Gauthier-Villars; and *Le Courrier musical* (1899-), with its weekly supplement *La Semaine musicale*.

The list of periodicals founded in the 20th century is headed by the *Revue musicale d'histoire et de critique* (1901-), edited by J. Combarieu and L. Laloy, a paper of serious and scholarly aim, which numbered among its contributors P. Aubry, M. Emmanuel and R. Rolland. In the following year appeared *Musica* (1902-14) and *Le Courrier de l'orchestre* (1902-17). *Le Mercure musical* (1905-06), after two years of independent existence under the editorship of J. Marnold and L. Laloy, was converted into the *Bulletin français de la Section française de la Société internationale de Musique* (1906-16) and edited by J. Ecorcheville. *Le Guide de concert* (1910-) gives particulars of concert programmes and descriptions of the music performed. *L'Année musicale* (1911-13), edited by M. Brenet, J. Chantavoine, L. Laloy and L. de La Laurencie, met with little support, but it contains some full-length articles of considerable importance, in particular a comprehensive 'bibliography of musical bibliographies' by M. Brenet. *L'Écho musical* (1912-20), edited by A. Doily and P. Brunold, was amalgamated in 1920 with *La Revue musicale* (1920-). This latter periodical, which is edited by H. Prunières, is one of the most interesting of present-day musical journals. Special numbers devoted to individual composers or to particular subjects are issued from time to time. The *Revue de musicologie*, originally entitled *Bulletin de la Société Française de Musicologie* (1917-), though slight in bulk, contains many important contributions. Other recently founded periodicals are *Lyrica* (1922-), *La Revue Pleyel* (1924-), and *L'Orgue et les organistes* (1924-), edited by J. Huré.

Among French provincial periodicals may be mentioned: *Bulletin polymathique des musiciens de Bordeaux* (1802-13); the *Revue de musique ancienne et moderne* (1865), published by Nisard at Rennes; the *Angers-Revue* (1878-1890 ?); *La Semaine musicale de Lille et du département du Nord* (Lille, 1881-95); *L'Ouest artiste* (Nantes, 1885-1914); *Caecilia* (Strasbourg, 1887-); *La Revue du chant grégorien* (Grenoble, 1892-); *Saint-Cécile* (Reims, 1893-189 ?); the *Nouvelle Revue musicale de Lyon*, formerly *La Revue musicale de Lyon* (1902-); and *Angers-musical* (1910-14).

BELGIUM.—The earliest musical periodical to be founded in Belgium was the *Gazette musicale de la Belgique* (1833-34), published by

Fétis.¹ Next in order came *Le Franc Jug* (1834-39). *La Revue musicale belge* (1840-42) was the first of a succession of journals which culminated in the foundation of *Le Guide musical*. Its immediate successor was *La Belgique musicale* (1842-50). This in turn was succeeded by *Le Diapason* (1850-52), which shortly before its demise took the title of *La Chronique musicale*. This was the progenitor of *Le Guide musical* (1855-1914, 1917-18), which soon took rank as one of the most interesting and valuable musical periodicals published in the French language. It was edited successively by F. Delhasse, M. Kufferath, H. Imbert and H. de Curzon. For the last two years of its existence it was issued from Paris. All the above periodicals were published in Brussels. Belgium now once more possesses a musical journal of its own in *La Revue musicale belge*, founded in 1926 under the editorship of Paul Gilson. The provincial journals include *Caecilia* (Bruges, 1847-50 ?), edited by R. J. van Maldeghem; *Musica sacra* (Ghent, 1881-); and *La Revue grégorienne* (Tournai, 1911-).

GERMANY AND AUSTRIA

The parent of German musical periodicals, though it can hardly be called a periodical in the modern sense, was Mattheson's *Musica critica* (Hamburg, 1722). It was issued in numbers, and contained musical news as well as critical essays. It was followed by Scheibe's *Critischer Musikus* (1737-40),² Mitzler's *Musikalische Bibliothek* (1736-54), and *Musikalischer Staarstecher* (1740). Henke's *Der musikalische Patriot* (1741-42), and Marburg's numerous publications (1750-78). Hiller's *Wöchentliche Nachrichten* was perhaps the first musical periodical in the stricter sense of the word. It was published once a week at Leipzig from 1766-70. During the closing years of the 18th and the opening of the 19th century the musical activity in Germany was very remarkable, and the number of musical periodicals, most of which enjoyed but a brief period of activity, was truly extraordinary. For a complete list of these the reader is referred to *Riemann*. Only the most important can be discussed here.

At the head of them stands the *Allgemeine musikalische Zeitung* (Oct. 1798-Dec. 28, 1848), published at Leipzig by Breitkopf & Härtel, and edited successively by Rochlitz and G. W. Finck. The importance of this periodical for information on all musical matters during the first half of the 19th century will be best estimated from the concluding remarks of the publishers in the last number.

¹ This journal was founded when musical production was at its richest and best. Mozart was not long dead, Haydn was near the end, and Beethoven

¹ *L'Écho ou Journal de musique française et italienne* (Léden, 1788-86 ?) consisted entirely of music.

² An enlarged edition of the whole was published in 1748.

at the beginning of his career. To bring the works of such a period as this before the notice of connoisseurs and amateurs, to elucidate and explain them, to educate the public up to understanding them—such were the objects of the *Musikalische Zeitung*; and these objects were attained in a degree which entitles it without hesitation to a high place in the history of music. But with the lapse of time the conditions of the musical world have materially changed. There is no longer a centre either for musical production or appreciation, both being now disseminated far and wide. Under these circumstances, a general musical journal is an anachronism; local papers are better fitted to supply the various necessities of the musical world.

Nevertheless, after an interval of 15 years an attempt was made to revive the journal, under the editorship of S. Bagge, who from 1860–62 had directed a *Deutsche Musikzeitung* from Vienna, but the new series only lasted for 3 years (1863–65). The *Leipziger allgemeine musikalische Zeitung*, afterwards known simply as *Allgemeine musikalische Zeitung* (1866–82) may, however, be considered as its direct successor, although it was issued by a different firm of publishers (Rieter-Biedermann). The first numbers of the new series, which was also edited by Bagge, were interesting, on the one hand from the support given to the rising talent of Brahms, and on the other to the revival of the old classical school and the cult of Bach and Handel. Bagge was succeeded by Eitner, and he again by Chrysander. He attracted a brilliant staff, and many of the articles, such as Nottebohm's 'Beethoveniana,' would do credit to any periodical. Chrysander was succeeded in 1871 by Joseph Müller but resumed the editorship in 1876.

The Viennese *Allgemeine musikalische Zeitung* (1817–24), important for special information on music in Vienna, was edited successively by J. von Mosel (1817–18), by von Seyfried (1819–1820), and by Kanne (1821–24). It contained portraits of celebrated musicians, including Beethoven, and was notable as the first independent effort of Viennese journalism.

The *Berliner allgemeine musikalische Zeitung*, 1824–30 (Schlesinger), founded by A. B. Marx, did important service to the rapid spread of Beethoven's works in North Germany even during his lifetime, and in promoting the revival of the taste for Bach's and Handel's music in Berlin. In his farewell address Marx says:

'The usual habit of critics is to give way to the ductuating inclinations of the public, in order to insinuate a little, a very little, of the truth. This has never been my way; I have never been carried away by the fashion of the day, for I have neither formed my opinions by it, nor succumbed to its attractions, and thus I have been preserved from inconsistency. For instance, with regard to Spontini, I neither lauded his "Vestale" as the work of a great artist, nor deprecated his later compositions as the productions of a mere academical pupil, or an imbecile, like so many musicians of our day. Nor again was I so far dazzled by the novelty of Rossini's and Auber's operas, as to endorse the popular verdict upon them.'

Cæcilia (1824–48) was conducted by an association of scholars, art critics and artists,

under the editorship of Gottfried Weber, and was published by Schott. It appeared at irregular intervals and forms a series of twenty-seven volumes of four numbers each. Weber conducted it till his death in 1839, and was succeeded by Dehn, who continued editor till its discontinuance in consequence of the political troubles of 1848. Its opening prospectus declared that it was intended to be not so much a regular periodical as a collection of original articles of permanent interest, and a medium for the exchange of views and opinions on art. It contained papers on the theory of music and acoustics, on history and æsthetics, reviews and notices of music and treatises on the art, and its contributors included G. Weber himself, Kiesewetter, Krieger, A. Schmid, A. Fuchs, S. W. Dehn, Chladni, Fink, von Driberg and Rochlitz. The whole formed a valuable record of the progress of the historical and theoretical departments of music during a quarter of a century. The practical portion of the art was not so well represented. In fact, the romantic movement carried on by Schumann, Chopin and others, not only received no recognition but was treated with a certain covert hostility.

The *Neue Zeitschrift für Musik* (1834–) was founded by Robert Schumann, who relates in his *Gesammelte Schriften* how a number of musicians, who had met in Leipzig in the end of 1833 to compare ideas on the new lights Mendelssohn and Chopin, were roused to do something more for the cause of art than merely carrying on their calling as musicians. Thus arose the *Neue Zeitschrift* (Apr. 3, 1834); Hartmann the publisher was the first editor, but from 1835–44 Schumann conducted it himself. After him Oswald Lorenz took it for a short time, and was succeeded by Franz Brendel (1845–68), under whom it espoused the cause of the so-called new German school. From 1903–1906, when it was incorporated with the *Musikalisches Wochenblatt*, it was edited by A. Schering and W. Niemann. In 1910 it reappeared under its old title and under the editorship of F. Brandes, who was succeeded in 1919 by Max Unger. In May 1920 it was acquired by the Steingraber Verlag and renamed *Zeitschrift für Musik*. Its present editor is A. Heuss.

The *Allgemeine Wiener musikalische Zeitung* (1841–48), edited until 1847 by Dr. Aug. Schmidt (joint-founder of the Viennese Männergesangsverein), contained a series of articles (beginning with No. 28, 1846) by Eduard Hanslick, highly laudatory of Wagner's 'Tannhäuser'! Luib was editor in 1847–48, the last twelve months of its existence. It was replaced by the

Wiener Musikzeitung (1852–60) edited by Glöggel, jun., almost the only reliable source of information on musical affairs for that period.

The *Signale für die musikalische Welt* (1842–), a well-known musical periodical, founded

by Bartholf Senff of Leipzig, is more strictly a record of news than of criticism, though it occasionally contains original articles of great interest, letters of musicians and other documents. Its list of contributors has included F. Hiller, von Bülow, Bernsdorf, C. F. Pohl, Richard Pohl, Stockhausen, Szarvady, Marchesi, and many other of the most eminent musical writers. Though not strictly a weekly publication, 52 numbers are published yearly. It is at present edited by M. Chop.

The *Berliner musikalische Zeitung* (1844-47), the first periodical to praise Wagner's works on their production in Dresden, was started by Gaillard, and continued as the *Neue Berliner Musikzeitung* (Bote & Bock) until 1896. It contains amongst others well-known articles by von Lenz.

The *Rheinische Musikzeitung* (1850-53) and the *Niederrheinische Musikzeitung* (1853-67), both edited by Prof. L. Bischoff (inventor of the expression 'music of the future'), are important for the history of music in the Rhenish Provinces. The latter journal, in particular, gained a reputation as one of the best conducted of all the German musical papers. The Shakespearean scholar Gervinus was one of its contributors. The Rhine district is at present served by the *Rheinische Musik- und Theaterzeitung* (1900-), published at Cologne and edited successively by R. Wolff, W. Thomas San Galli and G. Tischer.

The *Écho* (1851-79), published by Schlesinger of Berlin, was conducted in 1851 and 1852 by Kossak the well-known feuilletonist, then by the publisher. In 1866 it passed into the hands of Robert Lienau (with Menzel as editor), in 1873 into those of Oppenheim (editor, Dr. Langhans), in 1874 it returned to Lienau, and finally ceased Dec. 1879. It had at one time a certain importance as an opposition paper to Wagner.

Fliegende Blätter für Musik (3 vols., 1855-57) was hardly a periodical in the strict sense, as it appeared irregularly and was written entirely by one man. The author, J. C. Lobe, the writer of the interesting 'Musikalische Briefe eines Unbekannten,' was one of the most capable critics of his day, and his paper contains many excellent full-length essays, often of a polemical character, copiously illustrated with musical examples.

The *Monatsschrift für Theater und Musik* (1855-61), edited by Joseph Klemm, went less into detail, but like its successor, the

Recensionen und Mittheilungen für Theater, Musik und bildende Kunst (1862-65), contained valuable articles by Sonnleithner on Mozart, and on music in Vienna at that date.

Tonhalle (Payne, Leipzig) was edited by Oscar Paul from Mar. 23, 1868, to the end of 1869, when it was merged in the *Musikalische Wochenblatt* (the first illustrated paper of the

kind) (Fritzsche), which soon became a demonstrative organ of the Wagner party, and at the same time a champion of Brahms. It also published Nottebohm's 'Neue Beethoveniana,' and may thus fairly be called eclectic in its views. The first ten numbers were edited by Paul, but it was then managed entirely by the publisher until 1902, when K. Kipke became the editor. From 1902-06 the 'Neue Zeitschrift für Musik' was incorporated in it. It is now published by Siegel under the editorship of L. Frankenstein. It has a very large circulation in Germany, and is distinguished for its notices of foreign music.

Monatshefte für Musikgeschichte (1869-1905), founded and edited by R. Eitner as the organ of the 'Gesellschaft für Musikforschung,' was predominantly antiquarian in character. It contained lists and bibliographies of the works of ancient composers, Hucbald, Lasso, Ockeghem, Crüger, etc., and many valuable articles. An index to the first ten years was published in 1879. Several important monographs were issued as supplementary volumes.

The *Allgemeine Musikzeitung*, originally entitled *Allgemeine deutsche Musikzeitung* (1874-) must not be confused with the *Allgemeine deutsche Musikzeitung* published by F. Nedl at Tübingen since 1923 or with the two journals entitled *Allgemeine musikalische Zeitung* (Leipzig, 1798-1882; Vienna, 1817-24) or the *Berliner allgemeine musikalische Zeitung* (1824-1830), which have been already discussed. Originally founded by F. Luckhardt in Cassel but now published in Berlin, it is a weekly whose aim, according to its subtitle, is 'the reform of present-day musical activities.' It is edited by P. Schwers.

Bayreuther Blätter (1878-) has published numerous articles of extreme interest to the musical historian, dealing chiefly with the progress of the Wagnerian movement. Many of Wagner's letters have here been published for the first time.

The *Vierteljahrsschrift für Musikwissenschaft* (1885-95) dealt with musical history in an able and scholarly manner. It was edited by F. Chrysander and P. Spitta.

The *Jahrbuch der Musikbibliothek Peters* (1895-), besides reporting on recent additions to the Library, provides each year a valuable bibliography of recent musical literature and prints a few important articles of a general character. It is at present edited by R. Schwartz.

In 1899 the Internationale Musik-Gesellschaft was founded (see INTERNATIONAL MUSICAL SOCIETY). From that date until 1914, when the war brought about its dissolution, the Society published two periodicals, the monthly *Zeitschrift* and the quarterly *Sammelbände*, the former devoted principally to current topics of interest, the latter to long articles on special

points of musical history, technique or aesthetics. A special series of monographs was also issued as a supplement. An English edition of the two periodicals was published, with a summary in English of the articles written in German.

Die Musik (1901-15, 1922-) was founded by Schuster & Loeffler of Berlin and was at first issued fortnightly. It ceased publication shortly after the outbreak of the war, but was revived as a monthly in 1922 by the Deutsche Verlags-Anstalt of Stuttgart. It contains excellent articles on musical history, aesthetics, etc., and makes a special feature of illustrations. From time to time special numbers are devoted to the lives and work of individual musicians. It has been edited from the commencement by B. Schuster.

Two of the most important German musical periodicals, the *Archiv für Musikwissenschaft* and the *Zeitschrift für Musikwissenschaft*, are of recent date, both having been founded in 1919. The *Archiv*, published quarterly by Kistner & Siegel of Leipzig and edited by J. Wolf, is the organ of the 'Fürstliches Institut für musikwissenschaftliche Forschung' at Bückeburg. The *Zeitschrift*, published monthly by Breitkopf & Hartel and edited by A. Einstein, is the organ of the 'Deutsche Musikgesellschaft,' a body formed to take the place of the German branch of the defunct International Musical Society. Both are predominantly journals for original musical research, and contain little in the way of comment on current events. The *Zeitschrift*, however, provides a very comprehensive list of recently published books on music.

Of the other general periodicals founded in the course of the present century the most notable are: *Der Merker* (1909-), a fortnightly magazine dealing with music and the theatre, published at Vienna, and at present edited by J. Bittner and D. J. Bach; *Musikblätter des Anbruch* (1919-), published by the Universal-Edition in Vienna and edited by P. Stefan, a monthly periodical dealing exclusively with modern music; and *Melos* (1920-), another monthly journal of modernist tendencies, now published by Schott of Mainz under the editorship of H. Mersmann.

Most of the above periodicals cover the whole field of music. Of the specialist journals we can only mention here a few of the numerous papers which deal exclusively with church music. They include: *Cäcilienkalender* (1876-1885), continued as *Kirchenmusikalisches Jahrbuch* (Ratisbon, 1886-1911); *Der Chorwächter* (1875-), now published at Lucerne under the editorship of F. Frey; *Der Kirchenchor* (Bregenz, 1871-), *Der katholische Kirchensänger* (Freiburg, 1887-), *Cäcilia* (Treves, 1862-), *Cäcilia* (Strassburg, 1894-), *Cäcilia* (Breslau, 1893-), *Musica sacra* (Regensburg, 1866-), *Fliegende*

Blätter für katholische Kirchenmusik, now known as *Cäcilienvereins-Organ* (1866-) and published at Paderborn, *Gregoriusblatt* (Aachen, 1876-), *Gregoriusbote* (Düsseldorf, 1884-), *Literarischer Handweiser* (Regensburg, 1893-), *Musica divina* (1913-), the organ of the 'Schola Austriaca,' *Der katholische Organist* (Düsseldorf, 1913-). The above are Catholic. The principal periodicals dealing with music in the Lutheran Church are: *Fliegende Blätter des Schlesischen Vereins zur Hebung der evangelischen Kirchenmusik* (Brieg, 1867-), *Siona* (Gutersloh, 1876-), *Halleluja* (Quedlinburg, 1879-), *Korrespondenzblatt des Evangelischen Kirchengesangvereins* (Leipzig, 1886-), *Der Kirchenchor* (Leipzig, 1890-), *Monatschrift für Gottesdienst und kirchliche Kunst* (Göttingen, 1896), and *Kirchenmusikalisches Blätter* (Nuremberg, 1920-).

ITALY

The leading Italian musical periodical, from the point of view of the student and historian, is the *Rivista musicale* (Turin), a quarterly magazine first published in 1894, edited originally by L. Torchi and at present by L. Torrefranca. It contains articles of the utmost value and interest, and is conducted throughout with singular ability and brilliant scholarship. One of the best-known periodicals dealing with more ephemeral matters is the *Gazzetta musicale* (Milan), the official organ of the house of Ricordi, first published in 1845, which for many years gave a useful conspectus of the progress of Italian opera in all parts of the world. In 1903 its format was changed from folio to octavo, its title was altered to *Musica e musicisti*, and it became little more than a trade circular. In 1906 the title was further changed to *Arset labor*, *Musica e musicisti* being retained as a subtitle. It ceased publication in 1912. The present journal of the firm is *Musica d'oggi* (1919-), which is chiefly of value for its annotated analyses of the contents of the chief musical periodicals. Among other Italian musical periodicals still in progress may be mentioned: *Il trovatore* (Milan, 1863), *Il mondo artistico* (Milan, 1866), *Gazzetta musicale di Firenze* (1877), *Palestra musicale* (Rome, 1878), *Napoli musicale* (Naples, 1878), *L'osservatore musicale* (Naples, 1879), *Archivio musicale* (Naples, 1882), *Gazzetta musicale di Torino* (1879), *Roma musicale* (1885), *La cronaca musicale* (Pesaro, 1897), *Il pianoforte* (Turin, 1920) the monthly journal of the 'Fabbrica Italiana di Pianoforte,' of special importance for modern music, *Musica italiana* (Turin, 1921), *Il pensiero musicale* (Bologna, 1921) and *La cultura musicale* (Bologna, 1922). The following are devoted to church music: *Musica sacra* (Milan, 1878), *S. Cecilia* (Turin, 1899), *Rassegna Gregoriana* (Rome, 1902), *Guido Arctinus*, the quarterly organ of the Guido d'Arezzo Society (Milan, 1885) and *La scuola Veneta di musica sacra* (1892).

OTHER EUROPEAN COUNTRIES

Of the musical periodicals published in other countries the following are likely to prove most useful to English readers: *The Bulletin de la Société 'Union Musicologique'* (The Hague, 1921-), an international review somewhat similar in scope to the journal of the old International Musical Society; the *Tijdschrift der Vereeniging voor Noordnederlands Musikgeschiedenis* (Amsterdam, 1886-); *De Musiek* (1926-), edited by Paul F. Sanders and Willem Pijper, and published by Seyffardt of Amsterdam; the *Svensk Tidskrift för Musikforskning* (Stockholm, 1919-); *Ur Nutidens Musikliv* (Stockholm, 1920-); and *Der Auftakt* (Prague, 1920-), a monthly magazine edited by E. Steinhart which is cosmopolitan in character and deals almost exclusively with contemporary music.

UNITED STATES

There are published in the United States about sixty weekly, fortnightly and monthly journals ostensibly devoted to music. The majority of them are little else than advertising mediums for music-publishing houses, their few pages of letterpress serving to carry through the mails as second-class matter the remaining pages, which are filled with music for choirs, brass bands, banjo and mandoline clubs, small dance orchestras and the like; or they are trade journals whose business it is to exploit the wares of their advertisers who manufacture musical instruments in whole or in part. Few are devoted to the art in its higher phases, and the best of these pursue pedagogical purposes. The publication of musical periodicals in America began before the expiration of the 18th century, but the first, if Andrew Law's *Musical Magazine* may be looked upon as such (it was a collection of psalm tunes which began in 1792), already exemplified the description given of the majority of latter-day publications, though without the ulterior purpose ascribed to them. The earliest American reprints of European compositions were thus accomplished. It seems probable that within the period which has elapsed since the publication of Law's magazine not less than 400 periodicals of various kinds have appeared in the United States and disappeared within an extremely short time after their birth. In 1906 there were about 250 musical magazines of all kinds on file in the library of Congress, most of them dead. The most important of these earlier publications was Dwight's *Journal of Music*, which was published in Boston under the editorship of John S. DWIGHT (*q.v.*) from 1852-81. In the first edition of this Dictionary, the journal being still in existence, Col. H. Ware, librarian of the public library of Boston, said of it:

'Mr. Dwight, though not an educated musician, was musical editor of the *Harbinger*, a periodical published at Brook Farm, and a frequent contributor of musical critiques to the daily papers of Boston, where he did good service in directing attention to what was noblest and best in music. For six years he was editor, publisher and proprietor of the journal, the publication of which was then assumed by Oliver Ditson & Co. [1858-78]. During the war it was changed from a weekly to a fortnightly paper. Its object was to advocate music and musical culture in the highest sense, and to give honest and impartial criticisms, a purpose to which it has been always steadily devoted. . . . Mr. Dwight has been sole editor up to this day, although the volumes contain valuable contributions from other pens. Among the most noticeable of these are those from A. W. Thayer, the biographer of Beethoven, who has written for it many valuable biographical and historical articles, as well as musical tales. Especially noteworthy are his articles on some of the contemporaries of Beethoven, Salleri, Gyrowetz, Gelinek, Hummel and others. Prof. Ritter and his wife, . . . W. S. B. Mathews of Chicago and C. C. Perkins of Boston have also contributed frequent and valuable articles to its columns.'

From 1879-81 the journal was published by Houghton, Mifflin & Co. Ten years after it had suspended publication, W. S. B. Mathews, mentioned by Colonel Ware as one of its contributors, made an ambitious essay in Chicago by beginning the publication of a monthly magazine called *Music*. The first number appeared in Nov. 1891, the last in Dec. 1902. In this magazine comparatively little attention was paid to current events or local criticism, but much to critical studies of a special character and to pedagogical subjects. *The American Art Journal*, which was founded by Henry C. Watson in January 1863 as *Watson's Art Journal*, for many years devoted much space to musical subjects.

A publication of the highest character, though pursuing a special aim, was *Church Music* (1905-1909), a quarterly of 144 pages, with music supplement of eight pages, founded for the purpose of forwarding the reform in music in the Roman Catholic Church as prescribed in the 'Motu Proprio' of Pope Pius X. issued on the Feast of St. Cecilia, 1903. Its principal contributors were the Benedictines of Solesmes. Amongst American contributors were the Rev. Ludwig Bonvin, S.J., of Buffalo; Harold B. Gibbs, of Covington, Ky.; the Rev. W. J. Finn, C.S.P., Catholic University at Washington; the Rev. Norman Holly, Dunwiddie Seminary, New York; George Herbert Wells, Georgetown, D.C.; the Rev. Dom. Waedenschwiler, Mt. Angel, Oregon; and the editor, the Rev. H. T. Henry, Iitt.D., Overbrook Seminary, Philadelphia. It was published by the *American Ecclesiastical Review* at Philadelphia.

The Etude (1883-), also published at Philadelphia by Theodore Presser, devoted chiefly to musical pedagogics, the publication of aids to teachers, and the betterment of standards of instruction and music, was established by Presser at Lynchburg, Va. In 1884 the place of publication was changed to Philadelphia. It has been edited successively by T. Presser

(till 1888), E. E. Ayres (1888-93), A. L. Manchester (1893-96), W. J. Baltzell (1897-1907) and J. F. Cooke (since 1907). It is published monthly and its average circulation is 200,000 copies.

Similar in purpose and scope is *The Musician* (1896-) founded by the Hatch Music Co. of Philadelphia; its first issue appeared on Jan. 1, 1896, A. L. Manchester being the editor. It remained the property of the Hatch Co. until Nov. 1904, when it was purchased by the Ditson Co. In 1918 it passed for a short time into the hands of the Henderson Publications, New York, and was then acquired by its present editor, P. Kempf. Its distinctive purpose under its first editor, T. Tapper, and his successors, has been to present in each issue some material from writers of the highest authority, and to specialise community music in two ways—in suggesting means for the encouragement of music in small communities, and means by which school and church music may become more distinct community factors than they are at present. From Nov. 1905-Sept. 1906 *The Musician* published an English edition through the Vincent Music Co., Berners Street, London. Among frequent contributors to *The Musician* have been Dr. Percy Goetschius, Henry T. Finck, Lawrence Gilman, H. E. Krohbiel of New York; Julien Tiersot, Paris; William Shakespeare, London; Arthur Bird, Berlin; Ernest Newman, London; and Isidor Philipp, Paris.

But by far the most important of the American periodicals from the point of view of musical scholarship is *The Musical Quarterly* (1915-), published by G. Schirmer of New York and edited by O. G. Sonneck. It is a serious review, cosmopolitan in character, and has published valuable contributions from most of the leading writers on music in Europe and America.

Modern Music (1923-) is a 'Quarterly Review' published by the League of Composers—managing editor, Minna Lederman. It contains short, and generally slight, essays on aspects of modern music from a great variety of contributors, both American and European.

The Choir and Choral Magazine, published by the Ditson Co. and edited by T. Tapper, is devoted to the music of schools, churches and choral societies.

The New Music Review (1904-), published by the H. W. Gray Co., New York, grew out of *The Church Music Review*, founded in Dec. 1901 by Novello, Ewer & Co., and edited by H. W. Gray and Mallinson Randall. The change was made on Nov. 1, 1904, and simultaneously its scope was enlarged to include all the interests of organists, choirmasters, choirs and choral societies. *The Review*, which is the official journal of the American Guild of

Organists, enjoys a high reputation for its able editorials and the excellence of its contributed articles.

The Choir Journal (1899-), published by the B. F. Wood Music Co., Boston, is a monthly chiefly devoted to the dissemination of the church music publications of its proprietors.

School Music, originally entitled *The School Music Monthly* (1900-), edited and published by P. C. Hayden in Kookuk, Iowa, is the only periodical in the United States devoted exclusively to the interests of music teachers in the public schools. There are now only five issues each year.

The Musical Leader and Concert Goer (1895-) is published weekly by the Musical Leader Publishing Co. in Chicago. It divides its attention chiefly between Chicago and New York.

At the head of the weekly journals which purvey current musical news is *The Musical Courier* (1880-), published by The Musical Courier Co. in New York.

Musical America (1904-), edited by John C. Freund, is published by the Musical American Co., New York.

The Musical Digest (1921-), published weekly in New York under the editorship of Pierre V. R. Key, provides a useful summary of the chief musical events throughout the world and preserves an independent character.

Amongst the larger trade publications are *The Music Trade Review*, New York (1879-); *The Musical Age* (New York, 1896-); *Presto* (Chicago, 1884-); and *The Music Trades* (New York, 1890-).

The above article, revised, with addns. by C. B. O., incorporates material from M., F. G., A. M., R. A. S. and H. E. K.

PERLE DU BRÉSIL, LA, lyrical drama in 3 acts; words by MM. St. Etienne, music by Félien David. Produced Théâtre Lyrique, Paris, Nov. 22, 1851. David afterwards added recitatives. G.

PERNE, FRANÇOIS LOUIS (b. Paris, Oct. 4, 1772; d. there, May 26, 1832), was educated in a maîtrise, and during the Revolution became a chorus-singer at the Opéra. In 1799 he exchanged into the band, where he played the double-bass. A Mass for St. Cecilia's day, performed in 1800 at St. Gervais, secured him the esteem of musicians; and in the following year he published a fugue in four parts with three subjects, which placed him amongst the foremost masters of harmony of the day. It is not, however, by his compositions that Perne's name will be preserved, but by his laborious and erudite works on some of the most obscure points in the history of music. His expenditure of time, patience and learning, in hunting up, cataloguing, copying and annotating the most important sources of information, printed and MS., on the music of the Greeks and the

Middle Ages, was almost superhuman. One instance of his devotion will suffice. After publishing his *Exposition de la Séméiographie, ou Notation musicale des Grecs* (Paris, 1815), Perne actually transcribed the complete score of Gluck's 'Iphigénie en Tauride' in Greek notation. In 1813 he was chosen to succeed Catel as professor of harmony at the Conservatoire, but his *Cours d'harmonie et d'accompagnement* was not so clear as that of his predecessor. In 1816 he became Inspector-general of the Conservatoire, and in 1819 librarian, but in 1822 retired to the country, and resided near Laon. In 1830 he removed to Laon itself, but the air was too keen for him, and he returned to Paris only to die. His last published work was the 'Chansons du Châtelain de Coucy' (Paris, 1830); but the *Revue musicale* contains many of his articles, such as *Les Manuscrits relatifs à la musique de l'Eglise Grecque*, *Josquin Deprès*, *Jérôme de Moravie* and *La Musique ancienne*. Perne left most of his notes and MSS. to the library of the Institut; and his books and annotated catalogues, bought in 1834 by Fétis, are now in the Royal Library at Brussels. His unpublished sacred works also passed into the hands of Fétis, but the library of the Conservatoire possesses the autographs of his choruses for 'Esther,' performed in 1821 by the pupils of the École Royale de Musique (Conservatoire), his 'Messe de Ste. Cécile' (1800), his Mass 'Vivat Rex' for four voices (1816), a 'Veni Creator' for three voices, and the 'Offices,' arranged in three parts with the plain-song.

G. C.; rev. M. L. P.

PEROSI, DOM LORENZO (b. Tortona, Dec. 20, 1872), son of the director of the music in the cathedral at Tortona, was early destined to the priesthood. He studied music at the Milan Conservatorio in 1892-93, and then proceeded to Ratisbon to prosecute his studies in church music under Haberl. He became maestro di cappella at Imola, but after a very short tenure of the post was given the more important position of choirmaster at St. Mark's, Venice (Apr. 1894). He was organist at Monte Cassino in 1890 and was ordained priest in 1896. Late in 1898 he was appointed musical director of the Sistine Chapel in Rome, and it is an open secret that the great improvement in the style of Italian church music, which culminated in the decree of Pope Pius X., was largely due to Perosi's influence. It was not as an influence in church music, but as a composer, that Perosi reached the ear of the general public. A trilogy of oratorios, 'The Transfiguration,' 'The Raising of Lazarus' and 'The Resurrection of Christ,' was given in Italy in 1897-99 with remarkable success, and all three were given at the London Musical Festival of May 1899. There is in them very little originality of musical

conception, but the idea of combining the austere melodic forms of the past and many of the idioms of Palestrina and Bach with the trappings of modern orchestration was regarded as a new one. The result is a singular mixture of styles. Two more oratorios, 'Moses' in 1901, and 'Leo the Great' in 1902, bring us to the most ambitious of his works, 'The Last Judgment' ('Il Giudizio Universale'), which was conducted by the composer, together with a setting of the Stabat Mater, at the Costanzi Theatre in Rome on the occasion of the Gregorian celebrations of Apr. 1904. Among earlier works of the composer are 25 masses, a Requiem Mass, a Christmas Oratorio, psalms, a Te Deum, etc., besides much organ music. A set of orchestral variations came out in 1904, and from time to time rumours were circulated concerning the production of an opera on the subject of *Romeo and Juliet*. A cantata for mezzo-soprano, chorus and orchestra, entitled 'Anima,' was announced for the winter of 1907-08, and later still the composer's attention has been given to the realisation of a grand scheme of ten symphonies, each to be dedicated to and named after one of the cities of Italy. 'Florence,' 'Rome,' 'Venice' and 'Bologna' have been finished, and the final work, 'Italy,' is to be furnished with parts for chorus. In 1909 there was performed a funeral Mass for the sixth anniversary of the death of Pope Leo XIII. A cantata, 'Dies iste,' and a new oratorio, 'In Patris memoriam,' were announced to be given during the spring of 1910, at Naples and Paris. 'Vespertina oratio' (Rome 1912) and smaller works followed.

M.

In 1917 he developed symptoms of mental breakdown, and, in Apr. 1922, had to go to a mental hospital. However, in 1923, he recuperated, and produced a revised version of his 'Resurrection of Christ,' under Molinari at the Augusteum, Rome. By the *regolamento* of Pope Pius X., on June 20, 1905, Perosi was constituted 'Perpetual Master of the Pontifical Chapel.'

W. H. G. F.

PEROTINUS (surnamed MAGNUS) (early 12th cent.), maître de chapelle of 'Beatae Mariae virginis' (afterwards rebuilt as 'Notre Dame'), Paris. He did much towards the improvement of musical notation. He was one of the chief representatives of the 12th century Parisian *Ars Antiqua*, and revised and re-edited the 'Liber organi de gradualis,' etc. of Leoninus. His compositions were used at Notre Dame down to the time of Robert de Sabilon. Some have been reproduced by Coussemaker in *L'Art harmonique*, etc., and by Wooldridge in *Oxf. Hist. Mus.*, vol. i. (Riemann; Q.-L.).

PEROTTI, (1) GIOVANNI AGOSTINO (b. Vercelli c. 1774; d. Venice, June 28, 1855), studied under his brother Giov. Domenico and under Mattei. He went as composer to the Viennese

¹ Thus *Riemann. Amer. Supp.*, gives Dec. 23, and W. H. G. F. Dec. 27.

court in 1795, and to London in 1798 to write operas. About 1800-01 he settled at Venice, where, in 1812, he became deputy maestro di cappella of St. Mark's and was definitely appointed successor of Furlanetto in 1817. He composed operas, ballets, oratorios, a considerable amount of church music and some sonatas and other pieces for pianoforte.

His brother, (2) GIOVANNI DOMENICO (*b.* VerCELLI, late 18th cent.), a pupil of Padre Martini, was maestro di cappella of Vercelli Cathedral until after 1820. He composed operas and a large number of church music works, of which but little has been preserved. E. v. d. s.

PERRIN, ÉMILE CÉSAR VICTOR (*b.* Rouen, Jan. 19, 1814; *d.* Paris, Oct. 8, 1885), was a successful manager of several of the subventioned theatres in Paris. He was first at the Opéra-Comique from 1848-57, and in 1854-55 ran that theatre jointly with the Théâtre Lyrique. In 1862 he was for a short time again manager at the same theatre, and in the same year was appointed manager of the Opéra, a post he retained until 1870. He was subsequently manager of the Théâtre Français until his death. During his management of the Opéra-Comique 'L'Étoile du nord' was brought out, and Faure, Ugalde, Galli-Marié and Carvalho made their débuts. While he was at the Opéra, 'L'Africaine,' 'Don Carlos,' 'Hamlet' and 'Faust,' were produced, as well as Delibes's ballets, 'La Source' and 'Coppélia.' Nilsson's first appearance at the Opéra took place at this time. At the Français Perrin's chief work as connected with music was the revival of 'Le Roi s'amuse' with Delibes's incidental music. A. c.

PERRIN, PIERRE (*b.* Lyons c. 1616; *d.* Paris, Apr. 25, 1675), called 'l'Abbé Perrin,' though he was neither ordained nor held a benefice. He succeeded Voiture as 'introduit des Ambassadeurs' to Gaston, Duke of Orleans, a post which brought him into relations with several great personages, including Mazarin, who became his patron, and the musician Cambert, for whom he wrote the words of 'La Pastorale,' in five acts, produced first at Issy (1659), and then at Vincennes before the king. After the deaths of Gaston d'Orléans and Mazarin, Perrin was reduced to living upon his wits; and fancied himself on the sure road to fortune when he obtained from Louis XIV. the privilege of founding an Académie de Musique (Nov. 10, 1668), and letters patent securing him the management of the theatre (June 28, 1669). (See ACADEMIE DE MUSIQUE.) Unfortunately, the management of an opera requires capital, and the Abbé Perrin was a poor poet in all senses of the word. His partners quarrelled among themselves, and in spite of the success of Cambert's 'Pomone' (Mar. 19, 1671) he was compelled to resign his privilege just as his

'Ariane' was about to be produced. The patent, revoked on Mar. 30, 1672, was transferred to Lully. Perrin's *Œuvres de poésie* (Paris, 1661, 3 vols.) contain, besides his operas, translations—of the *Æneid* amongst others—and 'Jeux de poésie sur divers insectes,' the least bad perhaps of all his verses, which even in that licentious day drew forth the rebukes of Boileau and Saint-Evremond.

G. C.

PERKINE, a French lutenist of the 17th century, who published a 'Livre de musique pour le luth' in 1680 and a collection of 'Pièces de luth en musique, avec des règles pour le toucher parfaitement' (1682), of which none bears his name.

J. G. P.

PERRY, GEORGE FREDERICK (*b.* Norwich, 1793; *d.* London, Mar. 4, 1862), was a chorister of Norwich Cathedral under Dr. Bockwith. On leaving the choir he learned to play on the violin, and in a few years became leader of the band at the theatre. Whilst resident in Norwich he produced his oratorio, 'The Death of Abel.' In 1817 he composed an overture for 'The Persian Hunters,' produced at the English Opera-House, and in 1818 a short oratorio, 'Elijah and the Priests of Baal.' In 1822 he settled in London and was appointed director of the music at the Haymarket Theatre, for which he composed the opera of 'Morning, Noon and Night' (1822), and numerous songs for introduction into various pieces. He also held the post of organist of Quebec Chapel. In 1830 he produced his oratorio, 'The Fall of Jerusalem.' On the establishment of the Sacred Harmonic Society in 1832, Perry became leader of the band, an office which he retained until the end of 1847. On the removal of Surman from the conductorship of the Society early in 1848, Perry assumed the baton until the end of the season, but not being elected conductor, he shortly afterwards resigned his leadership, and quitted the Society. On Feb. 10, 1836, he produced a sacred cantata, 'Belshazzar's Feast,' and in 1847 a short oratorio, 'Hezekiah.' In 1846 he resigned his appointment at Quebec Chapel and became organist of Trinity Church, Gray's Inn Road. He composed some anthems, including two with orchestra on the accession of Queen Victoria (1837) and the birth of the Princess Royal (1840), and additional accompaniments to several of Handel's oratorios and other pieces. He was buried in Kensal Green Cemetery. His 'Death of Abel' and 'Fall of Jerusalem' were performed by the Sacred Harmonic Society. Perry was a man of considerable ability. He was in the constant habit of doing that which in the case of Mozart is usually spoken of as a remarkable effort of memory—namely, writing out the separate

parts of a large work without first making a score. One, at least, of his oratorios was committed to paper in this way. W. H. H.

PERS, DIRK PIETERSZON (*b.* Amsterdam c. 1615; still living there in 1655), collector and editor of several books of secular and sacred songs. The latter are partly provided with popular melodies in general use at the time, lending a special interest to the works which appeared in several editions (*Q.-L.*).

PERSIA, see MUHAMMEDAN MUSIC.

PERSIANI, FANNY (*b.* Rome, Oct. 4, 1812; *d.* Passy, May 3, 1867), one of the most accomplished singers of the 19th century. She was the second daughter of Nicolo Tacchinardi, who had fitted up a little theatre for the use of his pupils at his country house, near Florence, and here, at 11 years of age, Fanny played a principal part.

In 1830 she married the composer Giuseppe Persiani (1804-69), and in 1832 made her début at Leghorn, in '*Francesca da Rimini*,' an opera by Fournier, where she replaced Madame Caradori. Her success was sufficient to lead to her subsequent engagement at Milan and Florence, then at Vienna, where she made a great impression, afterwards at Padua and at Venice. Here she played in '*Romeo e Giulietta*,' '*Il pirata*,' '*La gazza ladra*,' '*L'elisir d'amore*' and '*Tancredi*,' in the last two of which she performed with Pasta. Her success was complete. In 1834, at Naples, Donizetti wrote for her his '*Lucia di Lammermoor*,' which always remained a favourite part with her.

When she first appeared at the Opéra in Paris (in Lucia, Dec. 12, 1837) she was much admired by connoisseurs, but her talents hardly met with the recognition they deserved until after her excellent performance of the part of Carolina in the '*Matrimonio segreto*.'

Her first appearance in London (1838) was as Amina in the '*Sonnambula*,' and, although she had been preceded in the part by Malibran and Grisi, she achieved a success which increased at each performance. She was always, however, a greater favourite with artists and connoisseurs than with the public at large. This was partly due to the poverty of her stage-presence. She was exceedingly refined in appearance, but small and thin, with a long, colourless face, not unsightly, like her father, but, as Chorley puts it, 'pale, plain and anxious,' with no beauty but her profusion of fine fair hair, while in her dress she was singularly tasteless. Her voice, too, was against her rather than in her favour; it was a thin acute soprano, of great range upwards, clear and penetrating, but not full or mellow, blending ill with other voices, and always liable to rise in pitch. But the finish of her singing has been rarely equalled, probably never surpassed. As an actress she preserved sensibility, grace

and refinement, but lacked passion and animation.

From 1838 she sang alternately in London and Paris for many years. Pétis says that a sudden hoarseness, which attacked her in London in 1843, proved the beginning of a throat-complaint that ultimately forced her to quit the stage for ever. But she sang in London, in opera, in 1847, 1848 and 1849, and at the Italiens, in Paris, in Oct. 1848. In 1850 she went to Holland, and subsequently to Russia. After performing in almost all the principal countries of Europe, she, in 1858, accepted an engagement from E. T. Smith and appeared at Drury Lane in several of her old parts—Linda, Elvira in '*I Puritani*,' Zerlina in '*Don Giovanni*,' etc. In December of that year Madame Persiani took up her residence in Paris, but afterwards removed to Italy. Her portrait, by Chalon, in water-colours, was in the collection of the late Julian Marshall.

F. A. M.

PERSUIS, LUIS LUC LOISEAU DE (*b.* Metz, July 4, 1769; *d.* Paris, Dec. 20, 1819), studied under his father, one of the musical staff of the cathedral, composer of two oratorios, '*Le Passage de la mer rouge*' (1759) and '*La Conquête de Jéricho*.' The son soon became a good violinist. Having entered the orchestra of the theatre, he fell in love with an actress, and followed her to Avignon. Here he had opportunities of completing his studies, and he also read a good deal of sacred music. He appeared at the Concert Spirituel in 1787, and played in the orchestra of the Théâtre Montansier from 1790, becoming in 1793 a member of the orchestra of the Opéra. Active, ambitious and self-confident, he managed to produce his dramatic compositions, and on the foundation of the Conservatoire in 1795 succeeded in obtaining the professorship of the violin. This post he lost in 1802 on the dismissal of his friend Lesueur; but in 1804 he became chef du chant at the Opéra, and afterwards, through Lesueur's interest, was appointed conductor of the Emperor's court concerts, and (1810-15) conductor of the orchestra of the Académie. In 1814 he was appointed Inspecteur Général de la Musique. He was indeed born to command, and the first lyric stage of Paris was never better administered than during the short time (1817-19) of his management. A fortnight before his death he received the Order of St. Michel from Louis XVIII., as he had before received the Legion of Honour from Napoleon.

The following is a complete list of his dramatic works:

'*La Nuit espagnole*,' two acts (1791), '*Estelle*,' three acts (1794); '*Phanor et Angèle*,' three acts, '*Fanny Morin*,' opéra-comique in three acts, engraved, and '*Léonidas*,' three acts, with Gréville (1799); '*Le Fruit défendu*,' one act (1800), '*Marcel*,' one act (1801); '*L'Inauguration du Temple de la Victoire*,' intermède, and '*Le Triomphe de Trajan*,' three acts, both with Lesueur (1807); '*Jérusalem délivrée*,' five acts (1812) of which the score was engraved; '*Les Dieux rivaux*' (with Spontini, Berton and Kreutzer), 1816.

Besides these operas he wrote pretty music, sometimes in collaboration with R. Kreutzer, to the following ballets :

'Le Retour d'Ulysse,' three acts (1807) ; 'Nina,' two acts (1813) ; 'L'Épreuve villageoise,' two acts, and 'L'Heureux Retour,' one act (1815) ; 'Le Carnaval de Venise,' two acts (1816).

He also wrote 'La Belle dormante' with Gyrowetz. Persuis also composed several cantatas de circonstance, such as the 'Chant de victoire' (1806) and 'Chant français' (1814), and some unpublished church works now in MS. in the library of the Paris Conservatoire.

G. C.

PERTI, GIACOMO ANTONIO (b. Bologna, June 6, 1661 ; d. Apr. 10, 1756), one of the most distinguished church-composers of the 17th century. At 10 began to learn music from his uncle, Lorenzo Perti, a priest of San Petronio. Having finished his education at the Jesuit College and the university, he studied composition with Padre Petronio Franceschini. In 1680 he conducted in San Petronio a Missa Solennis of his own composition for soli, choir and orchestra. His first two operas, 'Atide' (1679) and 'Oreste' (1681), were given in Bologna ; those that followed, 'Marzio Coriolano,' libretto by Francesco Valsini (anagram of Francesco Silvani) (1683) ; 'La Rosaura' (1689) ; 'Brenno in Efeso' (1690) ; 'L'inganno scoperto' (1690) ; 'Furio Camillo' (1692) ; 'Nerone fatto Cesare' (1693) ; and 'Laodicea e Berenice' (1695), in Venice, at the theatres SS. Giovanni e Paolo and San Salvatore. 'La Flavia' was given at Bologna in 1686, and another, 'Rosinda ed Emireno,' is mentioned. He went to Venice in 1683, and in 1685 to Modena. He became maestro di cappella at San Pietro, Bologna, in 1690, and at San Petronio in 1696. His oratorio on the Passion was produced in 1685, and another, 'Abramo vincitor de' propri affetti,' was printed in Bologna in 1687, and performed under his own direction in the palace of Count Francesco Caprara.¹ Four passions and eight other oratorios are at Bologna (see Q.-L.). Fétils, followed by Mendel, speaks of his relations with the German Emperors Leopold and Carl VI., but the writer of this article has failed to discover any documentary evidence to support the assertion that he was made Kapellmeister by the Emperor Leopold, though he was made Hofrath by Carl VI. In Köchel's *Life of Fux*, the most trustworthy book on the period, no mention is to be found of Giacomo Perti in connexion with the court ; the only instance of the name being Antonio Perti, a bass singer in the Hofkapelle. It is, moreover, beyond a doubt that Perti was maestro di cappella of San Petronio in Bologna, and retained the post till his death. Gerber states that a *Te Deum* by Perti was sung under his own direction in Vienna, on the relief of

the Turkish siege in 1683, but this must be a mistake, as Perti had then not made his name, and was scarcely known beyond Bologna. He was elected a member of the Filarmonici on Mar. 13, 1681, and at the time of his death had been 'Principe' six times. Among his friends was Pope Benedict XIV., with whom he kept up a close correspondence. Another friend was Padre Martini, who states in his *Saggio di contrappunto* (ii. 142) that he held communications on musical subjects with Perti down to 1750. Besides 'Abramo,' he printed in Bologna 'Cantate morali e spirituali' (1688), and 'Messe e Salmi concertati' (1735). Abbate Santini had a fine collection of Perti's church works (four masses, three Confitebors, four Magnificats, etc.), unfortunately now dispersed. (For the list of his church works see Q.-L.) His 'Elogio' was pronounced before the Filarmonici by Dr. Masini in 1812, and printed in Bologna. There is an 'Adoramus Te' by Perti in the Fitzwilliam Museum, Cambridge, and Novello has included two fine choruses by him in his 'Sacred Music' (vol. ii.) and 'Motetts' (bk. xi.). Others are given by Choron, and in the 'Auswahl für vorzüglicher Musikwerke.'

F. G.

PES. A term for the tenor of a MOTET (q.v.), found in the famous Reading Canon 'Sumor is icumen in' (1240) and, at a slightly later date, in the Worcester MSS. The earliest Worcester MSS., however, use the term *Tenor*, which suggests that the origin of the word *Pes* is not to be sought in the west.

A. II.

PESANTE, 'heavy.' This direction indicates that the whole passage to which it refers is to be played with great firmness and in a marked manner. It differs from *marcato*, however, in that it applies to whole passages, which may be quite *legato* at the same time ; while *marcato* refers to single notes or isolated groups of notes, which would not as a rule be intended to be played smoothly.

PESCETTI, GIOVANNI BATTISTA (b. Venice, c. 1704 ; d. circa 1766), studied under Lotti, and wrote an opera, 'Nerone detronato,' for the Venetian stage in 1725, collaborating with Galuppi in 'Gli odi delusi dal sangue' in 1728, and in 'Dorinda,' 1729. He came to England probably in 1737,² as his 'Demetrio' was given in that year ; in 1738 (according to Burney), his pastoral, 'Angelica and Medoro,' was given in March and April. In the same year came out his 'Diana and Endymion,' the airs from which were printed by Walsh. In 1739 (see Chrysander's *Händel*, ii. 454) he was appointed director of Covent Garden Theatre, and of the King's Theatre in 1740. His return to Italy would seem to have taken place before 1754, when he wrote an opera with Cocchi, 'Tamerlano,' produced in Venice in that year. Eitner finds it hard to believe Burney's state-

¹ Cinelli's *24th Notata volante* Scanzie xiv.

² W. H. O. P. gives Nov. 1738.

ment that he contributed to a pasticcio, 'Ezio,' given in London in 1764-65, but the three songs which were his share in the work may have appeared before in some other connexion, or if they were written specially there was no need for him to come to England for the production. He died about 1766, as Domenico Bettoni succeeded to his post at St. Mark's in April. An oratorio, 'Gionata,' is in MS. at Padua, a 'Kyrie' and 'Gloria' at Dresden, and a set of harpsichord sonatas was published in London in 1739, some of which are in the *Treſor des pianistes* and other collections (Q.-L., etc.).

M.

PESCH (PESCHIN, PESTHIN, PÖSCHIN, PETSCHIN, PITSCHNER, etc.), GREGOR (b. Bohemia, mid-15th cent.; d. Salzburg, c. 1528). He is mentioned as organist of Salzburg Cathedral in 1526 and in 1528, when Hofhaimer was appointed his successor. He composed masses, motets, etc., and songs, spoken of by Ambros and others as very beautiful, and heralding a new era; a few have appeared in modern editions (Q.-L.; Ambros).¹

PESCHKA, MINNA (née LEUTNER) (b. Vienna, Oct. 25, 1839; d. Wiesbaden, Jan. 12, 1890), received instruction in singing from Heinrich Proch, and made her début on the stage at Breslau, in 1856, as Agatha, and afterwards played Alice, remaining there a year. She next played at Dessau up to the time of her marriage with Dr. Peschka of Vienna, in 1861. In Sept. 1863 she appeared at Vienna with great success as Margaret of Valois, Isabel, etc., and afterwards received further instruction from Mme. Bockholtz Falconi. She next appeared at Lemberg and Darmstadt, and in 1868-76 at Leipzig, the most brilliant period of her career, according to Riemann. She gained great popularity there both in opera and concerts, being equally successful both in serious and the lighter operatic parts. Mme. Peschka-Leutner visited England in 1872, sang (Mar. 20) at the Philharmonic, and at the Crystal Palace, and was well received at both concerts. In the autumn of that year she went to America, and sang at the Boston Festival with very great success. In 1877 she went to Hamburg, where she was engaged until 1883. In 1879 she reappeared at the Carola Theatre, Leipzig, for a short operatic season under Julius Hoffmann, and played with great success the title-part of Handel's 'Almira,' on the revival of that opera. In 1881 she sang again in the United States, and in 1882 reappeared at the Crystal Palace, also taking the part of Eglantine in 'Euryanthe' (Drury Lane, June 13), but the voice had become worn and destitute of charm. From 1883 until her retirement in 1887 she was engaged at Cologne, and in the latter year settled at Wiesbaden. Her voice was a soprano of great volume and extraordinary compass and agility. A. C.

¹ Prosske calls him Gregor Peschin Boemus.

PESCIOLINI, BIAGIO, of Prato in Tuscany, canon and maestro di cappella at Volterra, 1563; also, 1571-81, at Prato, where in 1599 he is only styled canon. He composed masses, motets (up to 12 parts), cantatas, etc., and 3 books of madrigals. One book of motets, masses, and a Magnificat appeared as late as 1605 (Q.-L.).

PESENTI, MARTINO (b. Venice, c. 1600; d. there, 1647-48), born blind. He composed masses, motets, arias and sacred songs, as well as a large number of madrigals, correntes, galliards, etc., for the harpsichord and other instruments. A book of posthumous works was published Mar. 15, 1648. E. v. d. s.

PESENTI, MICHELE (b. Verona, late 15th cent.). He is described as a priest in Petrucci's collection of Frottole (1504-19), where he is represented by 33 numbers. Riemann looks upon his fine 'Del lecto me levava' as probably a model for the chansons and villanelles of the 16th century (Riemann).

PENSARD, EMILE LOUIS FORTUNÉ (b. Paris, May 29, 1843; d. there, Feb. 10, 1917), was a student of the Conservatoire, where he won the first prize for harmony in 1862, and the Grand Prix de Rome in 1866. He filled the offices of harmony professor at the Conservatoire, inspector of vocal teaching in the municipal schools of Paris, director of musical training at the establishment of the Légion d'honneur at Saint-Denis. His dramatic works are as follows:

'La Cruche cassée' (Opéra-comique, 1870); 'Le Capitaine Fracasse' (three acts (Théâtre Lyrique, 1878); 'Le Char,' one act (Opéra-comique, 1878); 'Tatouin,' two acts (Opéra, 1880); 'L'Entrée au Val d'Alpes' (ballet, 1888); 'Les Folles Amoureuses' (Opéra-comique, 1891); 'Une Nuit de Noël à Amélie' (Manteille Carabin' (Bouffes, 1893); 'La Dame de la rue' (Bouffes, 1898).

He also wrote many songs, as well as orchestral and chamber music, and some compositions for the Church. G. F.

PETENERA, see SONG, subsection SPAIN (4).

PETERBOROUGH calls for mention as the home of one of the less important of the English cathedral festivals. This originated in an oratorio service held in Peterborough Cathedral in 1882. Later the festival was carried on in collaboration with LINCOLN (q.v.). The meetings were held at Peterborough in 1882, 1885, 1888, 1891, 1894, 1898 and 1901. They were conducted by Dr. Haydn Keeton, then organist of the cathedral.

PETERS, CARL FRIEDRICH, bought in 1814 the 'Bureau de Musique' of Kühnel and Hoffmeister (founded 1800) in Leipzig, and greatly improved the business. Many important works by Bach, Haydn, Beethoven, Spohr and Schumann were published by him, besides the first complete editions of the works of Haydn and Bach (the latter edited by Dehn, Roitzsch and Griepenkerl). The later members of the firm, Dr. Marx Abraham and J. Friedländer, carried on the old traditions with extraordinary energy and judgment, and the 'Peters editions' are

known throughout the world (see AUGENER). In 1894 Dr. Abraham opened a library (Musikbibliothek Peters), specially intended for the furtherance of musical study, and at his death, in 1900, bequeathed a sum of money to the town of Leipzig in order that the library should be properly maintained. Dr. Emil Vogel was the first librarian, and was succeeded by Dr. Rudolf Schwarz in 1901. (See LIBRARIES, subsection LEIPZIG.) F. G.

PETERSON-BERGER, OLOF WILHELM (b. Ullånger, Ångermanland, Feb. 27, 1867), a Swedish composer, also distinguished as a poet and musical critic, studied at the Conservatoire in Stockholm, and in Dresden, where he was taught instrumentation by Edm. Kretschmer, and the piano by H. Scholtz. He subsequently became teacher at the Dresdener Musikschule. In composition, Peterson-Berger has endeavoured to create national music, specifically Swedish, based on the folk-melody. His first scenic work, 'Sveagaldrar,' a musical comedy in four tableaux, was written to celebrate the 25-year jubilee of King Oscar II. as regent, and was produced at a gala performance at the Royal Theatre in 1897. Amongst his dramatic productions are 'Lyckan,' a saga-play; 'Ran,' a musical drama; 'Årtiljot,' which is considered both as regards libretto and music one of his foremost works. Of his orchestral works must be mentioned 'Carneval in Stockholm,' concert-intermezzo; 'Florez and Blanche,' ballad with orchestra; 'The Banner' and 'Sunnanfarl,' two symphonies. His songs have gained great popularity in Sweden.

See articles in *Swedish Musical Journal*, 1903, 1910.

G. A. S.

PETER THE SHIPWRIGHT, see CZAAR UND ZIMMERMANN.

PETREIUS, JOHANN (b. Langendorf, Franconia; d. Nuremberg, Mar. 18, 1550¹), printer and publisher of music, graduated 'Magister' at Nuremberg; in 1536 began business in that town as a printer. His earliest music publication appears to be:

¹ Musæus, id est, Artis canendi, libri duo, auctor Sebaldus Heyden. Norimbergæ apud Joh. Petreium, anno salutis 1537.

and his latest,

² 'Guter, seltsamer, und kunstreicher deutscher Gesang . . . Gedruckt zu Nürnberg, durch Jo. Petreium 1544.'

Between these two, Eitner (*Bibliographie*) gives six works in nine volumes, including a collection of fifteen masses, a volume of forty-three select motets and two volumes of 158 four-part songs.

G.

PETRELLA, ENRICO (b. Palermo, Dec. 1, 1813; d. Genoa, Apr. 7, 1877), learnt music at Naples under Zingarelli, Bellini and Ruggi. He made his first appearance at Majella in 1829, with the opera 'Il Diavolo color di rosa.' It was followed by four others, and then, after an interval, by 'Le precauzioni' (May 20, 1851,

Naples) and 'Elena di Tolosa' (1852). At La Scala he brought out 'Marco Visconti' (1854); 'L'assedio di Leyda' (1856); 'Ione' (1858); 'Il duca di Scilla' (1859); and 'Morosina' (1862). After this nearly every year produced its opera,³ but we need only mention 'Giovanni II di Napoli' (Naples, Feb. 27, 1869)—said, in some respects, to surpass 'Ione,' which up to that time was his *chef-d'œuvre*—and 'I promessi sposi' (Lecco, Oct. 2, 1869). For the latter Petrella was called before the curtain twenty-seven times in the first evening! In 1873 he produced 'Manfredo' at Rome; it was greatly applauded, and a silver crown presented to the composer. His last opera was 'Bianca Orsini,' produced at Naples, Apr. 4, 1874.

PETRI, (1) HENRI WILHELM (b. Zeyst, near Utrecht, Holland, Apr. 5, 1856; d. Dresden, Apr. 7, 1914), violinist, came of a musical family, his grandfather having been an excellent organist, and his father an accomplished performer on the oboe. He received primary violin instruction from his father, and in 1866 studied with H. S. Dahmen, a local Konzertmeister, for five years. Wilhelm III., King of Holland, sent him to study with Joachim at the royal expense. In 1876 Joachim brought him to London. Here he played frequently in public with success; made the acquaintance of Mme. Clara Schumann, who greatly admired his talent, and returned to Germany in 1877 to accept an appointment as Konzertmeister at the Ducal Chapel of Sonderhausen. In 1881 he filled a similar post at the Royal Theatre, Hanover; in 1883 became Konzertmeister at the Theatre and Gewandhaus, Leipzig; and in 1889 King Albert of Saxony assigned to him the position of first Konzertmeister to the Royal Chapel at Dresden, in succession to Lauterbach. Petri organised an excellent string quartet which toured in Holland, Switzerland, Belgium, France and Germany, and gave a series of subscription concerts in Dresden during the winter of each year. He published some violin solos and songs, and edited the concertos of Spohr, Bach, Mozart, as well as David's 'Hohe Schule' and the studies of Rode, Kreutzer and Viotti.

E. H.-A.

(2) EGON (b. Hanover, Mar. 23, 1881), son of the above, is known as a pianist of ability, and especially as a disciple of Busoni, with whom he studied in Dresden, Berlin and Weimar (see *Riemann*).

PETRIE, GEORGE (b. Dublin, 1789; d. there, Jan. 17, 1866), was originally an artist, and afterwards held several public appointments in Ireland. Musically his name is best remembered by his collection of Irish folk-songs. From his earliest youth he devoted himself to noting down the traditional songs of the Irish peasantry, and supplied Thomas Moore with several airs for the 'Irish Melodies,' and assisted

¹ According to Anton Schmid.

² Performed at the Lyceum, London, Mar. 21, 1871.

³ A chronological list is in Fourié's supplement to Fétis.

Edward Bunting. In 1855 he published, under the auspices of the Society for the Preservation and Publication of the Melodies of Ireland (founded in 1851), a large quarto volume of about 140 airs, mostly vocal, taken from the tunes he had noted. The work is full of very thorough notes on the subject of Irish music, and though very scarce is of the utmost value to the student of Irish folk-song.

After his death an attempt towards a second volume of his quarto work was made, but only forty-eight pages were printed. Later the Irish Literary Society of London issued, under the editorship of Sir C. V. Stanford, 'The Complete Petrie Collection' (Boosey, three parts), which, containing 1582 airs, comprises all the melodies Petrie left behind him in manuscript. It is needless to enlarge on the value of such a collection of airs noted in Ireland, though every one of them cannot be justly claimed as of Irish origin. (See IRISH MUSIC.) F. K.

PETROBELLI (PIETROBELLI), FRANCESCO (b. Bologna), maestro di cappella of Padua Cathedral (1651-77), composed 4 books of motets, psalms, various church music, 2 books, 'Scherzi amorosi,' a 2 and 3 v., chamber cantatas, etc., published between 1643 and 1693 (Q.-L.; Mendel).

PETRUCCHI, OTTAVIANO DEI (b. Fossombrone, near Ancona, June 18, 1486; d. May 7, 1539), an illustrious printer (see PRINTING OF MUSIC). In 1491 he was established at Venice; and on May 25, 1498, he obtained from the Seignory the sole privilege, for twenty years, of printing 'figured music' (canto figurato) and music in the tablature of the organ and lute—a privilege which he exercised there till about 1511. At that date he left the Venetian business in the hands of Amadeo Scotti and Niccolò da Raphael, and returned to Fossombrone, where, on Oct. 22, 1513, he obtained a patent from Pope Leo X. for the monopoly of music-printing in the Roman States for fifteen years. His latest work, three choral masses, in the Sistine Chapel, Rome, is dated 1523.

Petrucchi's process was a double one; he printed first the lines of the stave, and then, by a second impression, the notes upon them. In fact he discovered a method of doing by the press what the German printers of *Palnodendruck*, or pattern-printing, had done by hand. His work is beautifully executed. The 'register,' or fit, of the notes on the lines is perfect; the ink is a fine black, and the whole effect is admirable. But the process was expensive, and was soon superseded by printing in one impression, which appears to have been first successfully accomplished by Pierre Haultin in 1525.¹

Petrucchi printed no missals, service books,

or other plain-song works; but masses, motets, lamentations and frottole, all in canto figurato, or measured music, and a few works in lute-tablature. (See MUSICA MENSURATA; TABLATURE.) His first work was 'Harmonice musices odhecaton A.'—a collection of ninety-six pieces in three and four parts by Isaac, Josquin, Obrecht, Okeghem and other masters of the day, the parts printed opposite one another on the open pages of a small 4to. His activity was very great; Chrysander² gives a list of eighteen works certainly, and two probably, issued between June 12, 1501, and Nov. 28, 1504. The last work cited by Eitner (*Bibliographie*) is the 'Motetti della corona,' a collection of eighty-three motets for four, five and six voices (in separate partbooks) in four portions, the fourth portion of which was published at Fossombrone, Oct. 31, 1519. Fétis, however,³ mentions three masses, in large folio, printed for the lectern of a church, with the date 1523-25, and knocked down to an unknown buyer at a sale at Rome in 1829. These are now in the Sistine Chapel. His life and works are exhaustively treated by Anton Schmid, *Ottaviano dei Petrucci*, etc., Vienna, 1845.

In the following list of Petrucci's publications, those in the British Museum are indicated by an asterisk, and those at Assisi, Bologna, Munich, Vienna, Rome, Berlin and Paris (Conservatoire) by the letters A., B., M., V., R., Ber. and P. (See also LIBRARIES: SPAIN: Madrid and Seville).

G.; rev. W. B. S.

PETTIT, WALTER (b. London, Mar. 14, 1835; d. there, Dec. 11, 1882), violoncellist, received his musical education chiefly at the R.A.M. In 1851 he was engaged by Balfe for the orchestra of Her Majesty's Theatre, in which he remained for many years. In 1861 he succeeded Lucas as principal violoncello in the Philharmonic orchestra, and in 1876 took the place of Paque in Her Majesty's private band. T. P. P.

PETTYR (PETRE, PETER), HENRY, an English church composer of the late 15th and early 16th centuries, who, after having studied music for thirty years, took his Mus. B. degree at Oxford in 1516 (C. F. Abdy Williams, *Degrees in Music*). He was a secular chaplain, and a 3-part Mass by him (lacking the Kyrie) is in an early 16th century MS. (B.M. Add. MSS. 5665/1136). J. M.*

PETZMAYER, JOHANN (b. Vienna, 1803), the son of an innkeeper. When he was eighteen years old he obtained a common zither, and taught himself to play it with such success that his performances brought a considerable amount of custom to his father. His fame spread in higher quarters, and it was not long before he became the fashion in Vienna. He even played before the Emperor. In later life he took to the bowed zither (Streich-Zither) instead of the ordinary kind he had previously used. In 1833 he made a successful tour in Germany, and in 1837 was made Kammer-virtuos to Duke Maximilian of Bavaria. He was living in Munich in 1870. (Wurzbach's *Biographisches Lexikon*, vol. 22.) M.

PEUTERL (BEURLIN), PAUL, an early 17th-century organist and organ-builder in Styria, creator of the German Variation-Suite, by combining four dance forms into a suite with a free adherence to the subjects. He composed a book of songs, a 5 v. (1613), and 2 books of instrumental pieces 1620, 1625 (Q.-L.; Riemann).

PEUT D'ARGENT, see MARTIN PEU D'ARGENT.

PEUTINGER, CONRAD (b. Augsburg, Oct. 14, 1465; d. there, Dec. 24, 1547), a lover and supporter of church music, and a keen devotee for the welfare of literature and art. He was educated in Italy; in 1493 became secretary to the senate of Augsburg (the city of the Fuggers); in 1521, at the Diet of Worms, obtained the confirmation of the ancient privileges of the city, and others in addition. He was a great collector of antiquities, inscriptions, and MSS., and in particular was the owner of the 'Peutinger

Tables,' a map of the military roads of the Lower Roman Empire, probably dating about 225, which is one of the most precious geographical monuments of antiquity, and is now in the State Library at Vienna. His devotion to music is shown by his preface to the 'Liber selectarum Cantionum quas vulgo Mutetas appellat, sex, quinque, et quatuor vocum,' of Grimmus and Wyrsung, Augsburg, 1520, a volume containing twenty-four Latin motets by H. Izac, Josquin des Prés, Obrecht, Pierre de la Rue, Senfl and others. G.

PEVERNAGE, ANDREAS (b. Courtrai, Flanders, 1543; d. July 30, 1591¹). He held an appointment in his native town until his marriage,² June 15, 1574, and soon after (about 1577) moved to Antwerp as choirmaster in the cathedral. There he led an active life, composing, editing and giving weekly performances at his house of the best native and foreign music. He died at the age of 48, and was buried in the cathedral. Sweetius³ describes him as 'vir ad modestiam factus, et totus candidus, quae in Musico mirans, quibus cum leviusculis notis annata levitas videtur.' The same author gives the following epitaph:

M. Andrae Pevernagio
 Musico excellenti
 Hujus ecclesiae phonusco
 et Marie filio

Maria Haecht vidua et FF. M. poss.
 Obierunt Hic XXX Julii. Aetat XLVIII.
 Illa II Feb. Aetat XII. MDLXXXIX.

Four books of chansons were published in 1589-91, and a book of 'Cantiones sacrae' in 1578; five masses and a book of 'Cantiones sacrae' were published in 1602. The British Museum contains one book of chansons, and two imperfect copies of the 'Harmonia celeste,' a collection of madrigals edited by Pevernage in 1583, in which seven of his own pieces appear. In addition to these Eitner⁴ mentions sixteen detached pieces in various collections of the time. Two pieces have been printed in modern type—an ode to S. Cecilia, 'O virgo generosa,'⁵ composed for the inauguration of his house concerts,⁶ and a nine-part 'Gloria in excelsis.'⁷ (See the *Sammelbände* of the Int. Mus. Ges. for Apr.-June 1902, pp. 466-7.) J. B. S.-B.

PEYRO, JOSÉ (17th cent.), Spanish composer, author of the music to Calderón's *Jardín de Falerina* (1629), and perhaps also of the music to Lope de Vega's *Selva sin amor*. His

¹ Master A. Pevernage . . . died July 30, 1591, about half-past four in the afternoon, after five weeks' illness. (See note discovered by M. de Burbure in Antwerp Cathedral books.) Thus the last two letters of the date in the epitaph have changed places; it should stand MDLXXXIX. He died at the age of 48, which fixes the date of his birth.

² Paquot's *Histoire Littéraire des Pays-bas*, tom. 9, p. 351 (Louvain, 1787). The author gives a reference, *Franc. Romé potius*, ed. 1578, pp. 239, 240, où il y a deux Epithalames: In nuptias Andrae Pevernagio, apud Corticesness Epithalamion, et Mariae Masges viduae, 17 cal. Julii, anno 1574.

³ *Athenae Belgicae*, Antwerp, 1628 (B.M. 11,901 k). Both the year of death and the name of Pevernage's wife are probably incorrect. See notes 6 and 7.

style shows the transition from the madrigal to the operatic chorus; examples are printed by Pedrell, *Teatro lirico*. J. B. T.

PEZEL (PEZELIUS), JOHANN, a 17th-century Austrian musician who, in 1672, entered an Augustinian monastery at Prague which he left soon after, and became a Protestant. He went to Bautzen, where he became director of the waits (town musicians). Adelung states that he became afterwards cantor of the school of St. Thomas, Leipzig. He was very influential in the evolution of instrumental forms and the style of orchestral writing. Apart from a large amount of instrumental compositions, including some books of sonatas, etc., for wind instruments, he wrote also sacred vocal music, and 2 books on music (Reissmann, *Allgemeine Geschichte d. Musik*, vol. ii. p. 300; Q.-L.; Mendel).

PEZZE, ALESSANDRO (b. Milan, Aug. 11, 1835; d. May 27, 1914), an able violoncellist, received his first musical education from his father, an excellent amateur. In 1846 he entered the Milan Conservatorio after competition, receiving instruction from Merighi, also the master of Piatti. After a course of concerts in North Italy he was appointed first violoncello at La Scala. Lumley brought him to Her Majesty's Theatre in 1857, where he remained till the theatre was burnt down. He undertook various tours in the United Kingdom with Tietjens, Santley, and other well-known artists, and in 1870 accepted the post of principal violoncello at Covent Garden and (with Pettit) at the Philharmonic, but resigned three years later in order to devote himself to teaching, on being appointed to fill Piatti's place at the R.A.M. He frequently played at the Popular Concerts either in conjunction with Piatti or replacing him. Pezze formed many excellent pupils. He played upon a fine Ruggieri violoncello and, in latter years, upon the 'Mara' Stradivari.

W. W. C.

PFEIFFER, GEORGES JEAN (b. Versailles, Dec. 12, 1835; d. Paris, Feb. 14, 1908), pianist and composer. His first piano lessons were from his mother, Mme. Clara Pfeiffer, an excellent pianist of the school of Kalkbrenner. Maloden and Damcke first taught him composition. He gained a brilliant success at the Conservatoire concerts in 1862, in which year his operetta 'Capitaine Roche' was performed. His compositions include a symphony, a quintet, trios, sonatas, concertos, of which the third has been repeated several times in Paris. Also an oratorio, 'Agar'; a symphonic poem, 'Jeanne d'Arc'; an overture, 'Le Cid,' and a quantity of piano music, including some well-known studies. An important work is a one-act comic opera, 'L'Enclume,' represented in 1884 and 1885. Pfeiffer succeeded his father, Émile Pfeiffer, as a partner in the piano firm of Playel, Wolff et Cie, Paris. His great-uncle,

J. Pfeiffer, was one of the pioneers of piano-making in Paris. A. J. H.

PFITZNER, HANS (b. Moscow, May 5, 1869), the son of German parents, holds in Germany a leading position as the representative of distinctively national ideals in music. He is an eminent composer whose appeal at present is chiefly to his own countrymen.

Pfitzner's father, a violinist, became Musik-director at the Stadttheater of Frankfurt and was his son's first teacher. At 17 Pfitzner entered Hoch's Conservatorium at Frankfurt where he studied (1886-90) the pianoforte with James Kwart and composition with Ivan Knorr. On completing his course he took a teaching appointment at the Coblenz Conservatorium, and in 1893 gave at Berlin a concert of his own compositions. Minor posts as teacher and conductor occupied him until in 1897 he obtained a more important one at Stern's Conservatorium in Berlin, and in 1903 became first Kapellmeister at the Theater des Westens there. A series of subscription concerts which he conducted in 1907 with the Kaim Orchestra began his association with MUNICH (q.v.), but in the following year a post as Musikdirector at the Opera and Conservatoire of Strassburg claimed him. In 1913 the University of Strassburg presented him with the degree of D.Phil., *honoris causa*, and he continued his labours as conductor of the opera there until 1916. Meantime his compositions had made their mark in Germany, the greater part of them consisting of concerted chamber music, choral pieces and many songs which gave evidence of his affinity with the 'romantic' composers, especially Schumann. Two early music dramas, 'Der arme Heinrich' (Mainz, 1895) and 'Die Rose von Liebesgarten' (Elberfeld, 1901), had shown his quality on the stage, and the latter had been given in some half-dozen German cities as well as at Vienna under Mahler. The production of the dramatic legend, 'Palestrina,' the work of his maturity, at Munich on June 12, 1917, placed him in an altogether different category. He was his own librettist, and following the precedent set by Wagner (and adopted once by Richard Strauss in 'Feuersnot') the composer identified his hero with himself and made Palestrina's inspiration in the composition of the 'Missa Papae Marcelli' a symbol of his own spiritual condition. It is so at any rate that the work has been received, and it has been given with becoming solemnity at Stuttgart, Berlin, Vienna and other strongholds of the German tradition, and regarded by Pfitzner's admirers as a successor to 'Parsifal.'

Pfitzner's philosophy of art, his grounding in Schopenhauer and Wagner, his individual

¹ For a description of 'Palestrina' and a critical estimate of Pfitzner's work as a whole see the article 'Hans Pfitzner,' by E. J. Dent, *Music and Letters*, vol. iv. No. 2.

treatment of the latter's music dramas and his opposition to certain current tendencies in music may be studied in his numerous essays. A volume of them, *Vom musikalisches Drama* (published 1915), is representative. *Futuristengefahr* (1917) appeared as a reply to Busoni's *Ästhetik*, and *Die neue Ästhetik der musikalischen Impotenz* (1919) pursues the controversy with 'modernism.' Among Pfitzner's later musical compositions a 'romantic cantata,' with the title 'Von deutscher Seele' (1922), is outstanding. It is in the nature of a song cycle for solo voices, choir and orchestra, in which poems of Eichendorff are threaded together to illustrate ideas and aspirations which, for the composer, have a profound significance. An elaborate score in which the orchestral writing is peculiarly intricate, its acceptance depends very much on the capacity of an audience to perceive its inner meaning. It was given in New York by the Society of the Friends of Music, under Bodanzky's direction, in the autumn of 1923, and was there received with only partial sympathy. The difficulty to an audience foreign to 'the German Soul' lay in the fact that what appealed as beautiful in the music seemed too obviously reminiscent of the 19th century romantics, and what was unfamiliar seemed overstrained. It still remains to be seen, therefore, how far the high claims put forward for Pfitzner by his immediate circle can be substantiated before a larger public.

The following list of works is based on *Riemann*, from which work many biographical details in the above are taken.

STAGE WORKS

- Incidental Music to Ibsen's *Fest auf Solhøg* (1889.)
 'Der arme Heinrich,' opera, libretto by J. Grün. (Mainz, 1893.)
 'Die Rose vom Liebesgarten,' opera, libretto by Grün (Erlersfeld, 1901.)
 'Christelchen,' a Christmas play after Stack's *Weihnachtsmädchen*. (Munich, 1906; rev. 1917.)
 Music to Kleist's *Kathchen von Heilbronn* (op. 17). (Berlin, 1908.)
 'Paestrina,' opera, 3 acts, libretto by composer. (Munich, 1917.)

ORCHESTRA AND VOICES

- Scherzo, orch. (1888.)
 'Der Blumen Rache,' alto, women's ch and orch. (1888.)
 Piano concerto in E flat
 Balades, 'Herr Oluf' (op. 12), baritone and orch.
 'Die Heizenmaulen' (op. 14), bass and orch.
 Romantic cantata, 'Von deutscher Seele' (Eichendorff), soli (4), ch, orch. (1922.)
 Violin concerto (1923.)
 Songs with orch. (op. 29), etc.

CHORAL AND SONGS

- 'Columbus' (Schiller), 8 v., unaccompanied.
 Songs in the following op. Nos.: 27, 9-11, 15, 18, 19, 21, 22, 24, 26, 29, 30.

CHAMBER MUSIC

- Sonata, v'cl and PF. (op. 1.)
 Trio, strings and PF. (op. 8.)
 String quartet in D (op. 13.)
 Quintet, strings and PF. in C (op. 28.)
 Sonata, vln. and PF. in E min. (op. 27.)

PHAGOTUS (Ital. *fagotto*, *fagoto*), a reed instrument invented or, rather, evolved by Afranio Albonesi of Pavia (see AFRANIO). A careful examination of his nephew Teseco's description, together with that of a manuscript

sheet of instructions for the instrument, discovered in 1893 by Count Valdrighi amongst the state archives at Modena¹ makes it quite evident that the phagotus, whatever its name implied, was but an advanced form of bagpipe.

Its history is interesting and romantic. Afranio was residing for a time in Pannonia on the borders of the modern Serbia, and, taking the popular bagpipe of the country called 'piva,' with its double chanter and no drones, as his model, he endeavoured to extend and deepen its compass. His efforts failed, as the instrument would not stay in tune; so, when he returned to Italy, he left it behind him. In 1521, some years later, Belgrade, the capital of Serbia, was taken by Sultan Soliman and the district ravaged; but the instrument was rescued and brought as a curiosity to Italy. There it came into the hands of Afranio once more, and he, with the help of a mechanic of Ferrara named Ravilio, at length perfected it. For at a feast given at Mantua by the Duke of Ferrara in 1532 'il Rev^{do} Mess: Afranio [sic]' played a solo upon his 'fagotto' between the fifth and sixth courses.

Apparently more than one instrument of the kind was made, as the MS. Instructions mentioned above (dated 1565) were given by Teseco to a friend to whom he had also presented 'uno de suoi fagoti,' with strict injunctions, however, that he should not divulge the method of playing it to any except his own sons.

Two illustrations of the phagotus, as they appear in Teseco's work of the year 1539, are given on *PLATE LVIII*. It will be seen that the instrument took the form of the letter H, and consisted of two pillars about 22 inches in height joined together by cross-pieces, the shorter central pillar being purely ornamental. Each side pillar was divided into an upper and a lower part: the upper part was bored with two parallel cylindrical tubes united at the top, thus forming one continuous tube, pierced with holes for the fingers and keys. The lower part of each pillar contained the reed similar to that of the piva, viz. a single-beating reed of the clarinet type; but in this perfected instrument the reeds were made of thin metal like those of the regal. The left-hand pillar or tube, with a reed of silver, provided a diatonic scale of 10 notes from tenor C upwards, while the pillar fingered by the right hand was fitted with a reed of brass and also had a compass of 10 notes, from G below the bass staff to bass B₂. By cross-fingering chromatic notes could be obtained and either pillar silenced or sounded at will by a special key. From the back of the instrument, which was rested on the knees during performance, with a cord round the neck, a flexible pipe passed to a bag held under the left arm; this formed an air reservoir, being supplied with wind from bellows fastened under

¹ *Cl. Museographica Scriptorum* II., No. 2, Modena, 1895.

and actuated by the right arm, as in the Northumbrian and Irish pipes. The bellows and the reservoir are shown in one of the illustrations on the ground on either side of the instrument.

The phagotus was used by the Canon Afranio, not for 'vain and amatory melodies' but for 'divine songs and hymns.' The music could be played either in one or two parts as desired, and Tesco in his Instructions says that he had seen a phagotus with three large pillars or sets of tubes.

As for the name, Tesco in his work on the Chaldaic Language introduces the whole subject from a grammarian's point of view, 'phagotus' suggesting to him a derivation from the Greek word 'phago' (I eat), because the instrument 'devours' and fills itself with all musical notes, and having digested them gives them forth again.' Later on he seems a little doubtful as to this derivation, and suggests that the word may come from 'fagus' (a beech tree), or even from 'faunus.' As will have been noticed, however, the manuscript instructions and the programme of the feast give the name as 'fagoto' or 'fagotto.' Probably the Italian form of the word was applied to the instrument as a nickname because it looked so like 'a bundle of sticks': when latinised it became 'phagotus.' From this brief description it will be gathered that neither in shape, reed or bore had the phagotus anything in common with the bassoon; but it is quite possible that Afranio's efforts anticipated and popularised the doubling of the cylindrical tube as found in the sordani and dopponi of a little later date and in 'the short instruments called Dulceuses' of which Henry VIII. died possessed. At any rate the inventor showed what could be achieved by a more elaborate and perfected use of key mechanism.

F. W. G.

PHALÈSE. The firm of music-publishers of this name, which for upwards of a century occupied a leading position in the Netherlands, was founded by PIERRE PHALÈSE (b. Louvain, c. 1510; d. there, 1573 or 74). His family name is supposed to have been Van der Phalesien, but both he and his descendants used either the French form Phalèse or the Latin Phalesius. In the present article the French form is adopted, both for the surname and the Christian names of the various members of his family. About 1545 Pierre Phalèse the elder started publishing musical works. His earlier books were chiefly lute music, and were printed by Servaas Sassen of Diest, Jacob Betius or Bathenius, and Martin Rotarius or Raymakers (Martin Rotaire). In 1553 the imprint first occurs 'Imprimé à Louvain par Pierre Phalèse, pour luy et Martin Rotaire'; in 1554 'Imprimé à Louvain par Pierre Phalèse,' so it seems probable that about this time he started printing as well as publishing. In 1570 he is

associated with Jan Bellern (Jean Bellère) of Antwerp, though he remained at Louvain until his death. His children were (1) Hubert, subprior of the Benedictine Abbey of Afflighem; (2) Antoinette; (3) Robert; (4) Corneille and (5) PIERRE (d. Antwerp, Mar. 13, 1629).

Of these the name of CORNEILLE (or Cornelia) appears in an edition of Lasso's 'Patrocinium Musices,' issued at Louvain in 1574. In 1581 he moved to Antwerp, where he was still living in 1603. His children were (1) Robert, who was a lawyer at Antwerp in 1612; (2) Anne, who married C. van Dale and died at Antwerp in 1612; (3) Marie, married in 1608 to Pierre Willems, and (4) Corneille, baptized at Antwerp, Sept. 27, 1581. Corneille Phalèse seems at an early date to have given up the publishing business to his brother, PIERRE the younger, who at first continued his father's partnership with Bellère. Pierre was inscribed in the Guild of St. Luke at Antwerp in 1581, and on Feb. 17, 1582, was married at the cathedral to Elisabeth Wischavens, daughter of Jean Wischavens by Dymphna van Dyck of Malines. In 1582 his books were issued at the sign of the Red Lion in the Cammerstraet; in 1606 the house was sold by its owners. Phalèse's lease lasted for two years longer, but in 1608 he bought the 'Coperen Pot' in the same street and changed its sign to 'De Koning David'; this remained the seat of the business until the firm finally gave up publishing. The younger Pierre Phalèse had five children: (1) Barbara, (b. between 1583 and 1586), married in 1610 to Jean de Vos; (2) Madeleine (bapt. 1586; d. May 30, 1652); (3) Marie (bapt. 1589), married in 1615 to E. de Mayer; (4) Pierre (bapt. 1594; d. 1671) became an Augustinian monk at Antwerp; in 1662 he celebrated the jubilee of his entrance into religion; (5) Anne (bapt. 1603; d. young). Pierre the younger died at Antwerp, and was buried in his son's monastery, in the church of which his children erected a monument to his memory in 1650; his wife had predeceased him, dying in 1619.

After the death of the younger Phalèse the business was carried on by his daughters, Marie and Madeleine were inscribed in the registers of the Guild of St. Luke as 'dochters Phalèse' in 1629, and from 1630-50 the books issued by the firm bear the imprint 'Chez les Héritiers de Pierre Phalèse,' though about 1650 a few works appeared issued 'Apud Magdalenam Phalesium et cohaeredes.' Madeleine Phalèse died at the sign of King David, and was buried in the church of her brother's monastery on June 3. An interesting set of her executor's accounts is printed in Goovaert's *Typographie musicale dans les Pays-Bas* (Antwerp, 1880); they show how extensive the business was at this time. On the death of Madeleine her sister Marie de Mayer undertook the management of the firm, which she con-

THE PHAGOTUS

From the *Introductio in Chaldaeam Iniquam*, by Tesco Ambrosio, 1589

tinued until 1673 or 1674. The last work issued by the Phalæses is dated in the latter year, so it is possible that Marie de Mayer died about that time, and that with her death the business came to an end.

Six printers' marks are used by the Phalæses :

- (1) David standing, with a harp; motto, 'Laudate Dominum Psalterio et Cythara.'
- (2) David kneeling, his harp and sceptre on the ground, an angel with a sword in the sky.
- (3) St. Peter, a key in his right hand, a book in his left;
- (4) the B.V. Mary with the child Christ, crowned, in clouds;
- (5) Melpomene, crowned, holding a ring;
- (6) The B.V. Mary with the child Christ, seated, an open book in her right hand, a lily on a table to the left.

W. B. S.

PHANTASY, see FANCY (2).

PHILADELPHIA has long been remarkable among the cities of the United States for its vigorous musical life. A large number of societies for the active practice of music exist within its precincts.

The oldest of these, the MUSICAL FUND SOCIETY, was established on Feb. 29, 1820. In 1823 the society built a hall for its meetings, and about seven years later an academy was opened for musical instruction. The first edition of this Dictionary (1880) included a list of over sixty societies then existing in Philadelphia for the performance of music of one kind or another. While many of those societies are still active in 1926, and others have sprung into existence, the musical life of Philadelphia has latterly become concentrated in its orchestra, now one of the finest.

THE PHILADELPHIA ORCHESTRA, whose affairs are administered by the Philadelphia Orchestra Association, aided by committees of ladies from towns and cities contiguous to Philadelphia, was organised in 1900. The history of the Philadelphia Orchestra does not differ essentially from that of a number of the others in the United States; though the desire of the city's society element to have adequate performances of opera as a feature of the social season was largely instrumental in its formation. For a long time in the latter part of the 18th and the first decades of the 19th centuries Philadelphia was a vigorous rival of New York in operatic activity, but in the course of time supremacy went to the latter city. So long as Theodore Thomas was a factor in the orchestral music of the eastern cities, his orchestra gave concerts with greater or less regularity in Philadelphia; but the abandonment of his individual enterprises in 1891 left the music-lovers of the old Federal capital without regular concerts of high-class orchestral music. The Boston Orchestra, on its travels, supplied the want for several years, but could not satisfy the ambitions of a city properly proud of the part which it had played in the political, commercial,

social and artistic history of the country. In the season of 1894-95 there was something like an awakening of the dormant musical interests of the city. In 1895-96 a committee was formed to promote an opera season, and a season of opera in English of forty performances was given under a guarantee with Gustav Hinrichs as director. In the next season Walter Damrosch supplied local operative needs; in 1897-98 Damrosch and Ellis, and in 1898-1899 Charles Ellis alone with Damrosch as conductor and director. Thereafter, the local committee of opera guarantors made annual arrangements for opera from year to year with Maurice Grau and Heinrich Conried.

During this period of operatic interest orchestral matters were also in a ferment. While Hinrichs was director of the opera he gave orchestral concerts, and tried to develop a symphonic band out of the material which he found at hand. In the same season the Musical Fund Society created conditions which made it possible for a local concert orchestra, the Germania, to increase the number of its members and to give a series of Friday afternoon concerts under the direction of William Stoll, jun., a well-known violinist. The concerts of the Germania continued for two years, whereupon Henry Gordon Thunder, director of the Philadelphia Choral Society, took up the work and out of the same material organised a Philadelphia Orchestra; his concerts, like those of Stoll, however, were tentative in character, and served chiefly to disclose the inadequacy of the players. After five years of these praiseworthy but futile efforts a number of the most prominent men and women in social and musical circles formed the Orchestral Association. Some of the foremost workers in the new enterprise were the cultivated amateurs who had formed a 'Symphony Society of Philadelphia' in 1893, with Dr. W. W. Gilchrist as conductor; this Society gave concerts from time to time until the new orchestra, a brief forerunner of the present organisation, appeared in the field. This new orchestra gave two concerts in the spring of 1900 with Fritz Scheel as conductor. Scheel had been an assistant to von Bülow in Hamburg, and was a man of fine musical parts and splendid energy. The success of the two concerts was such as to induce the Association to send him abroad to recruit the orchestra, and make of it a first-class symphonic organisation. The first regular season of the newly recruited orchestra was given in 1900-01, and from that time till his death in February 1907, Scheel remained conductor of the band; he was succeeded in the season of 1907-08 by Karl Pohlig, who in 1912 was succeeded by Leopold Stokowski (*q.v.*). The orchestra owes its singularly perfect ensemble to the genius of Stokowski. The subscription, popular, and

children's concerts of the orchestra in Philadelphia are held in the 'Academy of Music' (not a training institution), and besides visiting other neighbouring cities the orchestra gives an annual series of concerts in New York.

H. E. K.; addns. o.

PHILÉMON ET BAUCIS, opéra-comique in 3 acts (afterwards reduced to 2); words by Barbier and Carré; music by Gounod; produced Théâtre Lyrique, Feb. 18, 1860; Covent Garden, Oct. 24, 1891; in English, Guildhall School, Dec. 18, 1893; Drury Lane (translated by Joseph Bennett), Apr. 26, 1894. g.

PHILHARMONIC CHOIR. This choir of 300 voices was formed in 1919 for the performance of works for chorus and orchestra, and such unaccompanied vocal music as requires a considerable number of singers for its adequate representation. The honorary conductor is Charles Kennedy Scott (q.v.). The choir made its first appearance at the Royal Philharmonic Society's concert of Feb. 26, 1919, in a Bach motet, Delius's 'The Song of the High Hills' and Beethoven's 'Choral' symphony. It gave its first concert at Queen's Hall on June 2, 1920. n. c. g.

PHILHARMONIC PITCH, see PITCH.

PHILHARMONIC SOCIETY. This society was founded in London in 1813 for the encouragement of orchestral and instrumental music. J. B. Cramer, P. A. Corri, and W. Dance invited various professional friends to meet them on Sunday, Jan. 24, 1813, when a plan was formed which resulted in the establishment of a society with thirty members, afterwards increased to forty—seven of whom were made directors for the management of the concerts—and an unlimited number of associates. The subscription for members was three guineas, and for associates two guineas each. Subscribers were admitted on the introduction of a member on paying four guineas, and resident families of any subscriber two guineas each.

The principal musicians in London readily joined, and gave their gratuitous services in the orchestra. The first series of eight concerts on Mondays, at irregular intervals, began on Mar. 8, 1813, at the Argyll Rooms, Regent Street—'Leader, Mr. Salomon; at the pianoforte' (in lieu of the conductor as at present), 'Mr. Clementi'—and was both financially and artistically successful.

The following is a list of the members during the first season:

J. B. Cramer, P. A. Corri, W. Dance, M. Clementi, W. Ayrton, W. Shield, J. J. Graeff, H. R. Bishop, W. Blake, J. B. Salomon, C. Neate, R. Potter, Sir Geo. T. Smart, F. Cramer, T. Attwood, J. B. Viotti, Hill, Moralt, G. E. Griffin, J. Bartleman, W. Kayvett, Louis Berger, C. Ashley, R. Cooke, F. Yaniewicz, S. Webbe, Jun., V. Novello, W. Horsley, W. Sherrington, A. Ashe.

Among the associates, of whom at the outset there were thirty-eight, are found the names of

Bridgetower, Mori, Naldi, Cipriani Potter, Spagnoletti, Samuel Wesley, and other eminent musicians.

The following have been the Hon. Treasurers of the Society:

W. Ayrton (1813-14); W. Dance (1815); M. Clementi (1816-17); R. H. Potter (1818-19); T. Attwood (1820); W. Dance (1821-32); W. Sherrington (1833-1835); W. Dance (1836-39); G. F. Anderson (1840-1876); W. C. Macfarren (1877-80); C. E. Stephens (1881-92); W. H. Cummings (1892-1915); J. Mewburn Levin (1915-18); Norman O'Neill (1918-). From 1910 onwards it has been usual to appoint also Hon. Co-Treasurers.

The Hon. Secretaries have been:

H. Dance (1813); C. J. Ashley (1813-15); W. Watts (1815-47); G. W. Budd (1847-50); G. Hogarth (1850-1864); Campbell Clarke (1864-66); S. Lucas (1866-1880); Henry Iloron (1881-84); F. Berger (1885-1910); W. Wallace (1911-12); Stanley Hawley (1913-15); Donald Baylis (1916-17); J. Mewburn Levin (1918 to the present time).

In the early days of the Society two symphonies, two concertos, two quartets or quintets for string or wind, with two or more vocal concerted pieces, constituted the evening's programme. A good idea of the popularity of the concerts in 1820 may be formed from Spohr's account in his autobiography. 'Notwithstanding the high price of admission,' he says, 'the number of subscribers is so great that many hundreds who had inscribed their names could not obtain seats.'

Until Spohr came there was no conductor as we know the term, the responsibilities being divided between the leader of the orchestra and the musician who presided at the piano with the score. These offices were held by the following:

1813-20. Leaders: Salomon, F. Cramer, Spagnoletti, Viotti, Yaniewicz, Varnai, Weichsel, Mori, Baillet, J. D. Loder, H. Smart, sen.
Pianists: J. B. Cramer, F. Ries, Griffin, Smart, Crotch, Attwood, Clementi, V. Novello, Bishop, S. Webbe, Jun., Kalkbrenner.
1821-43. Conductors: Smart, Ries, Bishop, Potter, Cramer, Clementi, Attwood, Neate, Crotch, T. Cooke, Moscheles, C. Lucas, Bennett.
Webber conducted one concert in 1826.
Mendelssohn one in 1833 and one in 1842.
Spohr one in 1843.

1844. Mendelssohn conducted 5 of the 8 concerts.
1845. Bishop was appointed for the season but could only conduct 3 concerts owing to ill-health. Moscheles conducted the rest.

1846. Costa.
1855. Wagner.
1856. Bennett.
1867. Cusins.
1884. G. Mount, Stanford, J. F. Barnett, Cowen.
1885. Sullivan.
1888. Cowen.
1893. Mackenzie.
1900. Cowen.
1908. H. J. Wood, Cowen, Ronald, Nikisch.
1908-09. Chevallard, Mancinelli, Nikisch, Wood, Ronald.
1909-10. Ronald, Mancinelli, Nikisch, Elgar, Walter.
1910-11. Chessin, Coates, Safonov, Nikisch, Elgar, Mlynarski, Beecham.
1911-12. Elgar, Ronald, Mackenzie, Nikisch, Pitt, Mengelberg, Stanford, Safonov.
1912-13. Safonov, Ronald, Mengelberg, Pitt, Cowen.
1913-14. Mengelberg, Balfour Gardiner, Safonov.
1914-15. Beecham, Safonov, Pitt.
1915-16. Beecham.
1916-17. Beecham, Ronald.
1917-18. Beecham, Ronald.

- 1918-19. Ronald, Boulton, G. Toye.
 1919-20. Coates, Toye, Boulton, C. K. Scott, Ronald.
 1920-21. Coates, Hamilton Harley.
 1921-22. Coates, Boulton, Frank Bridge.
 1922-23. Coates, Ronald, E. Goossens, Jun.
 1923-24. Coates, E. Ansermet, Ronald, Furtwängler, Goossens, Weingartner.
 1924-25. Furtwängler, Walter, Goossens, Ansermet, Weingartner, P. Klenau, Malcolm Sargent.
 1925-26. Coates, Elgar, Sargent, Rhône-Baton, P. Klenau, Ronald.
 1926-27. Wood, Walter, Arbos, Monteux, F. Bridge, Allen.

The concerts given by the Society during the earlier years of its existence were the chief means of introducing new music to England, due largely to the policy adopted of commissioning works from composers. As time went on and other organisations appeared, first performances became a less frequent feature of the programmes. The following list gives a summary of the leading events in chronological order; a † signifies 'new to England,' and a * 'composed for the Society.'

1813. Three symphonies of Beethoven (numbers not given in the programmes), 4 of Haydn, 3 of Mozart. Beethoven's septet and other chamber music.
 1814. † Eroica' symphony. Cherubini commissioned to compose a symphony, overture and vocal piece for £200. Debut of Catalani.
 1815. Cherubini appeared at two concerts; his † Anacreon' overture and a *symphony played. 3 overtures bought from Beethoven for £75.
 1816. Beethoven's †C minor symphony; Dragonetti played at these concerts for the first time. Debut of Ballot.
 1817. † Fidoletto' overture and †7th Symphony of Beethoven.
 1820. First visit of Spohr, who introduced the use of the button; from this onwards the musician described as 'at the pianoforte' was styled 'conductor.' Attwood, Smart, Ries, Potter and Welsh were so described this season.
 1821. Debut of L. Moscheles.
 1823. Beethoven's † Weihe des Hauses' overture.
 1824. Beethoven's †C minor concerto. First appearance at these concerts of Pasta and Manuel Garcia.
 1825. †* Choral' symphony; † Euryanthe' overture. Women associates first elected.
 1826. Weber conducted one concert, the programme including the 'Euryanthe' and 'Der Freischütz' overtures and Beethoven's 7th symphony.
 1827. £100 sent to Beethoven for his illness. Debut of Liszt.
 1829. First appearance of Mendelssohn, who conducted his †C minor symphony. Sontag and Malibran sang.

ARGYLE ROOMS DESTROYED BY FIRE; CONCERTS GIVEN AT KING'S THEATRE:

1830. Mendelssohn conducted 'Midsommer Night's Dream' overture. Rossini's † William Tell' overture. De Bériot played and Lablache sang.
 1831. Spohr's 'Last Judgment' selection, the first oratorio performed by the Society. Rubini sang and Hummel (first visit to England) played.
 1832. Mendelssohn's † Hebrides' overture; John Field played, Schröder-Devrient and Tamburini sang. Mendelssohn was offered £105 for a symphony, overture and vocal piece.

CONCERTS GIVEN IN HANOVER SQUARE ROOMS:

1833. Mendelssohn's †* Italian' symphony and †* Trumpet' overture. Clara Novello sang. Honorary members first elected; they included Auber, Hummel, Mendelssohn and Meyerbeer.
 1834. Mendelssohn's † Melusine' overture. Grial sang. Vieuxtemps played.
 1835. First appearance of Sterndale Bennett.
 1836. Mendelssohn's † Calm Sea overture. Thalberg and Ole Bull played. Opera directors refused to allow opera singers to appear at the concerts.
 1837. Beethoven's 'Choral' symphony revived. Bennett's † Nalades' overture.

1838. Mendelssohn's †D minor concerto.
 1839. Bennett's † Wood Nymphs' overture. Debut of Manó.
 1841. Berlioz's † Benvenuto Cellini' overture.
 1842. Mendelssohn conducted his † Scotch' symphony.
 1843. Chopin's †F minor concerto. Staudigl sang. Sivori played, Spohr played and conducted.
 1844. Beethoven's † Leonora.' No. 1, and † Ruins of Athens' overtures. Ernst, Sainton, Platiel and Joachim (13 years old) played. Mendelssohn conducted 5 concerts.
 1845. This year an attempt was made to engage a conductor for the whole season for the first time. See list of conductors.
 1846. Costa appointed conductor. Beethoven's † Mass in D; Mendelssohn's violin concerto.
 1847. Mendelssohn conducted at the fourth concert (his last visit).
 1848. Alboni and Pauline Viardot-Garcia sang.
 1849. Debut of Mlle. Néruda (9 years old).
 1851. Stockhausen sang; Bottesini and Fauer played.
 1852. Charles Hallé played.
 1853. Berlioz conducted his 'Harold in Italy' symphony; Schumann's † Overture, Scherzo and Finale' introduced.
 1854. Schumann's symphony in B flat.
 1855. Wagner appointed conductor.
 1856. Sterndale Bennett appointed conductor. Schumann's † Paradise and the Peri.' Debut of Clara Schumann. Jenny Lind sang.
 1857. Rubinstein played.
 1859. Joachim introduced his † Hungarian' violin concerto.
 1862. Jubilee season. Commemoration concert at St. James's Hall at which Bennett's †* Paradise and the Peri' overture was introduced and the soloists included Tietjens, Joachim and Santley.
 1863. A Shakespeare tercentenary concert with 'Coriolanus' and 'Merry Wives of Windsor' overtures and all the 'Midsummer Night's Dream' music of Mendelssohn.
 1865. Wagner's † Rienzi' overture.
 1867. Cusins appointed conductor. Nilsson sang.
 1868. Schumann's † Concert-stuck', op. 92; Bruch's violin concerto in G minor.

CONCERTS GIVEN IN ST. JAMES'S HALL:

1869. Analytical programmes (by G. A. Macfarren) introduced.
 1870. All the Beethoven symphonies played and a Beethoven birth centenary concert † 'Preislied' from 'Die Meistersinger.'
 1871. Schaller's bust of Beethoven presented by Frau Linzbauer to the Society. Wyon's Beethoven gold medal struck and presented, amongst others to Sterndale Bennett, Nilsson, Joachim and Santley. Gounod conducted his symphony in D.
 1873. Brahms's † Requiem. Debut of Von Bülow.
 1874. Brahms's † Serenade in A. Debut of Sarasate and Saint-Saëns.
 1875. Concert in memory of Sterndale Bennett. Brahms's † Haydn Variations. Wilhelmj played.
 1876. Prelude to † Die Meistersinger.'
 1877. Dannreuther played; Henschel sang.
 1879. Brahms's violin concerto (Joachim).
 1881. Hueffer appointed programme annotator. Berlioz's † Romeo et Juliette' (complete version); D'Albert and Sophie Menter played; Sembrich and Albani sang.
 1882. Guarantee Fund raised in view of losses incurred during the previous six seasons.
 1883. Wagner memorial concert. Sarasate introduced Bruch's † Scottish' concerto. Mackenzie's †* La Belle Dame sans merci.' Pachmann played.
 1884. Several conductors engaged for the season. Dvořák conducted his † Husitka' overture, a rhapsody and symphony in D.
 1885. Sullivan appointed conductor. Programmes annotated by Hueffer, C. E. Stephens and J. Bennett. Dvořák conducted his †D minor symphony.
 1886. Saint-Saëns conducted his †C minor symphony; Fanny Davies played and Ondrické introduced Dvořák's violin concerto.
 1888. Cowen appointed conductor. Tchaikovsky conducted his 'Serenade for strings and † Tema con variazioni'; Grieg played his pianoforte concerto and conducted his 'Two Elegiac Melodies' for

- strings; Svendsen conducted two concerts. These three composers made their first appearance in England.
1880. Joachim played Stanford's *tsuite* for violin and orchestra; Tchaikovsky conducted his *tsuite* in D and pianoforte concerto in B flat minor; Parry conducted his *†* English *†* symphony; Ysaÿe and Sapellnikoff played.
1890. Dvořák conducted his *tsymphony* in G; Borwick played.
1891. Paderewski, Joan Gerardy and Lamond played.
1892. Mozart death centenary concert.
1893. Mackenzie appointed conductor. Tchaikovsky conducted his *tsymphony* in F minor.

CONCERTS GIVEN IN QUEEN'S HALL:

1894. Tchaikovsky's *tsymphony* in B minor and *†* Fantasia for pianoforte and orchestra; Saint-Saëns conducted his *symphony* in C minor. Cesar Thomson played, Camilla Landi sang.
1895. Stanford conducted his *tsymphony* in D; Parry conducted his *tsymphony* in F (new version). Sauer played, Blapham sang.
1896. French pitch adopted. Borodin's *tsymphony* in B minor; Dvořák conducted his *tsconceto* for violoncello.
1897. This year an autumn season was given for the first time. Paderewski played Mackenzie's *†* Scottish *†* concerto; Parry conducted his *tsymphony* in E minor; Glazounov conducted his *tsymphony* in E flat (his first appearance in England). Tchaikovsky's *tsymphony* for violoncello and orchestra; Humperdinck conducted excerpts from 'Hansel und Gretel' and 'KönigsKinder'. Blanche Marchesi sang, Siloti played.

1923-24. An appeal made this season for a Trust Fund of £12,000; the income derived therefrom to guarantee the future existence of the Society. A centenary performance of Weber's 'Euryanthe' overture; Moussorgsky's 'A Night on the Lonely Mountain'; Schumann's pianoforte concerto (Freu Scharrer); Bax's 'Garden of Fand'; Beethoven's 'Pastoral' symphony, Emperor concerto (Cortot) and 'Choral' symphony; Honegger's '1^{er} Chant de joie'; Ravel's 'Daphnis et Chloé'; Liszt's 'Hunnenschlacht'; Brahms's 'Haydn' variations and 1st symphony; Elgar's 2nd symphony; a Handel concerto grosso; Vaughan Williams's 'On Wenlock Edge' (John Booth); first performance of version for orchestra; Strauss's 'Don Juan'; Rimsky-Korsakov's sinfonietta or Russian Themes; Wagner's 'Siegfried' 'Idyll' and 'Ring' excerpts; a Mozart violin concerto (Jelly d'Aranyi); Holst's 'rugal concerto'; Stravinsky's 'L'Oiseau de l'eu' (new version); Dorothy Silk sang.

1924-25. Strauss's 'Tod und Verklärung' and 'Also sprach Zarathustra'; Brahms's D minor concerto (Goodson); Beethoven's 7th and 8th symphonies; Elgar's 1st symphony; Schumann's 'Overture, Scherzo and Finale'; Bach's concerto for violin, flute and pianoforte; Delius's 'Summer Night' and 'Mass of Life'; Honegger's '1^{er} Pacific No. 231'; Debussy's 'Ibéria'; Three Nocturnes; and 'La premièr d'un faun'; Monteverdi, a sonata for small orchestra and women's voices; a Handel concerto grosso; Prokofiev's 'violin concerto (Joska Sziget); Ravel's 'Le Tombeau de Couperin'; Berlioz's 'King Lear'; Holst's 'Planets'; Vaughan Williams's 'Pastoral' symphony; Howell's pianoforte concerto (Harold Samuel); Ireland's symphonic rhapsody; Bax's 'Garden of Fand'; Berners's 'Fantasie espagnole'; Jeanne Jouve sang.

1925-26. Holst's 'First Choral Symphony' for soprano solo (Dorothy Silk), choir (Leeds Choral Union) and orchestra, given for the first time in London; with it given Beethoven's 'Choral Symphony'; a whole programme of Elgar's works included the Enigma variations, the violoncello concerto (Beatrice Harrison), 'Falkland', and 'In the South'. At this concert (Nov. 19) the gold medal of the Society was presented to Sir Edward Elgar by Sir Henry Wood in the name of the Society. Elgar's funeral march from 'Granla and Diarmid' (in mem. Queen Alexandra); Mozart's concerto in E flat (K. 268) and

Saint-Saëns's 'Fantasia havanaise,' both violin (Thibaud) and orchestra; Falla's 'El amor brujo' suite; Borodin's symphony in B minor; Rimsky-Korsakov's 'La Grande Pâque russe' overture; Roussel's 'Le Festin de l'araignée'; Vieuxtemps's 'En Kérno'; D'Indy's 'Sinfonie sur un chant montagnard'; Mozart's concerto in C minor (K. 491) (pianoforte, R. Vieux); Brahms's 'Tragic' overture; Beethoven's violin concerto (Erica Morini); C. von Frankenstein's 'Rhapsody for Orchestra'; Delius's 'Eventyr'; Bartók's dance suite; Mendelssohn's 'Ruy Blas' overture; Schumann's PF. concerto (Cortot); Mozart's symphony in G minor; Delius's 'Brigg Fair'; Franck's symphonic variations (Cortot); Chabrier's rhapsody 'España'.

1926-27. This season including the centenary of Beethoven's death, the Society secured the co-operation of the ROYAL CHORAL SOCIETY (q.v.) for a performance of the 'Missa Solennis' in D under Allen. This, the sixth concert of the season, was held (Mar. 24, 1927) at the Albert Hall. The others were at Queen's Hall as usual. Weber's 'Oberon' overture marked the centenary of that composer's death. Sibellus's 'En Suga'; Vaughan Williams's 'A London Symphony'; Falla's 'Nights in the Gardens of Spain' (pianoforte, A. Rubinstein); Ravel's 'Rapsodie espagnole'; Schumann's symphony in B flat; Prokofiev's 'Love for three Oranges'; Respighi's 'The Fountains of Rome'; Franck's 'Psyche'; Berlioz's 'Sinfonie fantastique'; Bax's 'In the Fairy Hills'; Brahms's symphony in D. Myra Hess, Pablo Casals, and Albert Sammons were engaged to play concertos and Elisabeth Schumann to sing.

For further details of the Society's transactions, including copies of seven letters from Mendelssohn to Sterndale Bennett, the reader is referred to *The Philharmonic Society of London from its foundation 1813 to its Fiftieth Year, 1862*, by George Hogarth (8vo, London, 1862), and *History of the Philharmonic Society of London, 1813-1912*, by Myles Birket Foster (London, 1912). The Society itself has published the *Documents, Letters, etc., relating to the bust of Beethoven presented to the Society by Frau Fanny Lanzbauer*, translated and arranged by Doyné C. Bell (4to, London, 1871); and, in the Programme book of Feb. 5, 1880, five hitherto unprinted letters from Mendelssohn to the Society. (See also LIBRARIES.)

PHILIBERT. See JAMBE DE FER.

PHILIDOR, a numerous family of French musicians, whose proper family name was DANICAN. The name by which they are known was (according to B. de La Borde in his *Essai sur la musique ancienne et moderne*) bestowed by Louis XIII. on MICHEL DANICAN, a native of Dauphiné, who died in Paris about 1659, as one of the King's musicians in the Grande Ecurie, which he had entered in 1651. He played the oboe, the cromorne,¹ and tromba marina, and his skill on the first-named instrument was such as to procure him the royal compliment above referred to, Philidor having been an eminent oboist of Siena. Michel did not bear the sobriquet as a surname. He left no issue, so that the actual founder of the family was (1) JEAN, probably his brother, from whom all the rest were descended. Jean had

three sons, (2) ANDRÉ 'l'aîné,' (3) JACQUES 'cadet,' and (4) ALEXANDRE. The two elder sons of Jean each became the father of four musical sons; by his first marriage with Marguerite Mouginot, André 'l'aîné' had sixteen children, the musicians being (5) ANNE, (6) MICHEL, and (7) FRANÇOIS; and by his second, with Elizabeth Le Roy, he had five more children, of whom one was the most celebrated of the family, (8) FRANÇOIS ANDRÉ.

The four musical sons of Jacques, who by his wife, Elizabeth Hanique, had twelve children, were (9) PIERRE, (10) JACQUES, (11) FRANÇOIS and (12) NICOLAS. All these are noticed below in accordance with this numbering.

(1) JEAN (b. circa 1620; d. Paris, Sept. 8, 1679) became in 1659 fifer in the Grande Ecurie, and at his death was first player of the cromorne and marine trumpet, as well as an oboist and drummer. He is said to have composed dance-music, preserved in the 25th volume of the collection due to his son André.

(2) ANDRÉ ('Philidor l'aîné') (b. circa 1647²; d. Dreux, Aug. 11, 1730), succeeded his uncle Michel as fifth player of the same instruments in the Grande Ecurie. Supposing him to have been twelve at that time, he would have been born about 1647. He married young, and the exertions necessary for the support of his numerous family were no hardship to one of his active and laborious disposition. He was a member of the Grande Ecurie, the Chambre and the Chapelle, of Louis XIV.; played the bassoon, cromorne (his two best instruments), oboe, marine trumpet and even the drum when required; and after competing, at the King's request, with Lully in writing bugle-calls, fanfares and military marches,³ composed divertissements for the court. Of these were produced, in presence of the King or the Dauphin, a comic divertissement, 'Le Canal de Versailles' (July 16, 1687), 'Le Mariage de la Couture avec la grosse Cathos' (1688), and 'La Princesse de Crète,' an opéra-ballet, the autograph of which was in his valuable collection of unpublished music. To these three works should be added 'La Mascara de du vaisseau marchand,' produced at Marly before Louis XIV., Thursday, Feb. 18, 1700, and hitherto unnoticed. The splendid collection referred to included all the dance-tunes in favour at court from the reign of Henry III. to the end of the 17th century; all the divertissements and operas of Lully and a few other composers; a selection of old airs, bugle-calls, military marches, and fanfares for the court hunting-parties; and finally all the sacred music in use at the Chapelle. André formed

¹ The date 1652 has also been given.

² Ch. Ballard published in 1685 a first book of 'Pièces de trompettes et timbales à 2, 3 et 4 parties.' This curious collection is not mentioned in any of the biographies, although the catalogue in Thoinan's study on the Philidors contains the 'Suite de dances' (1699) and the 'Pièces à deux basses de viole, basse de violon et basse' (1700).

³ Cf. Krumpholtz.

it during the time he was Librarian¹ of the King's musical library, from 1684 to his death. It was originally in the library of Versailles, and the greater part of it, fifty-seven vols., in his own hand, was transferred to the library of the Paris Conservatoire, which now, however, possesses only thirty-six, the other twenty-one having disappeared. An article by Fétis in the *Revue musicale* (Aug. 1827) drew attention to the importance of this collection, called *Collection Philidor*, and even mentioned the initials of the delinquent responsible for their loss. The contents of those which still exist are given in the *Vierteljahrsschrift*, vol. i. p. 531. A few other portions are in the Bibliothèque Nationale and the Bibliothèque de Versailles.

André retired on a pension in 1722, and died at Dreux, whither he had removed from Versailles in or about 1724. His brother,

(3) JACQUES, known as 'Philidor le Cadet' (b. Paris, May 6, 1657; d. Versailles, May 27, 1708), entered the Grande Écurie when a little over twelve as fifer, and was afterwards promoted to the oboe, cromorne and marine trumpet, succeeding his father. In 1683 he was admitted to the Chapelle, and in 1690 to the Musique de la Chambre, in which he played the bassoon. He was a favourite with Louis XIV., who gave him some land at Versailles, where he built a house, and died. He was on the best of terms with his brother, in whose collection his compositions were preserved—marches for drums and kettle-drums, airs for oboe, and dance music. The military music is still in the library at Versailles, but the rest has disappeared.

(4) ALEXANDRE, youngest of the three brothers, is known to have been a player of the favourite family instruments, the bass cromorne and marine trumpet in the royal band, 1679–1683.

(5) ANNE (b. Paris, Apr. 11, 1681; d. there, Oct. 8, 1728), before he was twenty produced at court, through the patronage of his godfather, Duke Anne de Noailles, three pastorales, 'L'Amour vainqueur' (1697), 'Diane et Endymion' (1698), and 'Danaë' (Marly, 1701), included in one of the lost volumes of the *Collection Philidor*. In 1702 he obtained the succession of his father's posts in the Grande Écurie and the Chambre, and in 1704 became oboist in the Chapelle, often playing before Louis XIV., who had a predilection for the instrument. He also composed²; but his real title to a place in the history of music is that he was the founder of the Concert Spirituel, which, however, he conducted for two years only (1725–27). (See PARIS, subsection CONCERT SPIRITUEL.) Laborde says that, after having directed the

concerts of the Duchesse du Maine, he became Surintendant de la Musique to the Prince de Conti. (See MOURET.)

(6) MICHEL (b. Versailles, Sept. 2, 1683), a godson of Michel de Lalande, played the drums in the king's band.

(7) FRANÇOIS (b. Versailles, Mar. 17, 1689; d. 1717 or 18) entered the Chapelle in 1708 as player on the bass cromorne and marine trumpet. In 1716 he became oboist in the Chambre, and bass violinist in the Grande Écurie. He seems to have died either in 1717 or the beginning of 1718, leaving some small compositions—amongst others, two books of 'Pièces pour la flûte traversière' (Ballard, 1716 and 1718).

(8) FRANÇOIS ANDRÉ DANICAN (b. Dreux, Sept. 7, 1726; d. London, Aug. 31, 1795), the most eminent of the family as a composer, and a highly distinguished chess-player. As a child he showed an extraordinary faculty for chess, which he saw played by the musicians of the Chapelle du Roi. Being a page of the Chapelle he had a right to music lessons, and learned the fundamental rules of harmony from André CAMPRA. At the close of his time as page he came to Paris, and supported himself by giving lessons and copying music. Discouraged perhaps by the difficulties of an artist's career, he gave himself up entirely to chess, and, with a natural gift for abstruse calculations, studied it to such purpose that at eighteen he was a match for the best players, and able to make a livelihood out of it. Being, however, hard pressed by his creditors, he started in 1745 on a tour abroad, going first to Amsterdam, where he pitted himself successfully against Stamma, author of *Les Stratagèmes du jeu d'échecs*. Thence he went on to Germany, and spent some time in 1748 at Aix-la-Chapelle, occupied in a work on the principles of the game. He next, on the invitation of Lord Sandwich, visited the English camp between Maastricht and Bois-le-Duc, and was well received by the Duke of Cumberland, who invited him to come to London and publish his *Analyse du jeu des échecs*. The subscriptions of the English officers encouraged him to accept the invitation, and he arrived in England, where he heard Handel's oratorios and where he eventually acquired a profitable celebrity. The first edition of his book appeared in 1749, and met with great and deserved success. It was during this first stay in London that Philidor performed the remarkable feat at the Chess Club of playing and winning three games simultaneously against first-rate players without seeing the boards.

Meantime Diderot, and his other friends, fearing that the continual strain of the pursuit for which he was forsaking his true vocation might prove too severe, recalled him to Paris in 1754. He began at once to compose his 'Motets à grand chœur,' which are influenced

¹ He was at first assistant to François Fossard 'violinist, whom he soon replaced altogether.

² Among his printed works may be specified 'Premier livre de pièces pour la flûte traversière, flûte à bec, violons et hautbois' (Paris, 1712), oblong 4to. There is also a MS. 'De Deum for four voices in the Conservatoire. See list in *Philid. surp.*

by Handel. His motet 'Lauda Jerusalem' did not procure him the place of a 'Surintendant de la Musique' to the King, at which it was aimed, but the disappointment turned his attention to dramatic music. His first opéra-comique, 'Blaise le Savetier' (1759), a brilliant success, was followed by 'L'Huître et les plaideurs' (1759); 'Le Quiproquo,' two acts, and 'Le Soldat Magicien' (1760); 'Le Jardinier et son seigneur' and 'Le Maréchal ferrant' (1761); 'Sancho Pança dans son île' (1762); 'Le Bûcheron' and 'Les Fêtes de la Paix,' intermezzo written on the conclusion of peace with England (1763); 'Le Diable à quatre' (1763); 'Le Sorcier,' two acts (1764); 'Tom Jones,' three acts (1765); 'Mélide, ou le Navi-gateur,' two acts (1766); 'Le Jardinier de Sidon,' two acts (1768); 'L'Amant déguisé' (1769); 'La Nouvelle École des femmes,' two acts (1770); 'Le Bon Fils' (1773); and 'Les Femmes vengées,' one act (1775), all given either at the Théâtre de la Foire, or at the Comédie Italienne. An 'histoire amoureuse de Pierre de Long . . .' was published in London in 1765; a copy is in the British Museum. Besides these he composed a Requiem performed in 1766 at the Oratoire, on the anniversary of Rameau's death, and produced the tragedy of 'Ernelinde,' his best work, at the Opéra (Nov. 24, 1767; reproduced in 1769 as 'Sandomir').

These successes did not cure him of his passion for chess. In 1777 he returned to London, brought out a second edition of his *Analyse*, and set to music Horace's 'Carmen seculare' with flattering success (1779).

On his next return to Paris he found Grétry and Gluck at the height of their popularity; but, nothing daunted, he re-wrote Lully's 'Persée' (words by Marmontel, after Quinault; performed at the Académie royale de musique, Oct. 27, 1780), and 'Thémistocle' (produced Académie Royale de Musique, May 23, 1786), both in three acts, 'L'Amitié au village' (1785) and 'La Belle Esclave, ou Vaucour et Zéila' (1787). 'Bélisaire,' three acts, was not given at the Opéra in 1774 as stated by Fétis, but at the Théâtre Favart (Oct. 3, 1796) a year after Philidor's death.

He received a regular pension from the Chess Club in London, and it had been his habit to spend several months of every year in England. In 1792 he obtained permission for the journey from the Comité du Salut Public, but events prevented his return to Paris, and when his family had succeeded in getting his name erased from the list of émigrés, they learned that he had just died in London.

To estimate Philidor's work rightly, the condition of the French stage at the time he began to write must be taken into consideration; he will then appear to have possessed not only greater originality, but art of a higher kind than

that of his contemporaries Duni, Monsigny and Grétry. His harmony is more varied, and the form and character of his airs new. He was the first to introduce on the stage the 'air descriptif' ('Le Maréchal'), and the unaccompanied quartet ('Tom Jones'), and to form a duet of two independent and apparently incongruous melodies. Moreover, he understood to a degree then rare the importance of the orchestra and chorus, and undoubtedly surpassed his compatriots in instrumentation. He enjoyed an almost unexampled popularity in his day, being called forward after the representation of his 'Sorcier'—the first instance of the kind in Paris. There is a fine bust of this Philidor by Pajou, and an excellent portrait by Cochin, engraved by St. Aubin in 1772.

(9) PIERRE, the eldest son of Jacques 'le cadet' (b. Paris, Aug. 22, 1681; d. Sept. 1, 1731), produced a pastoral at Versailles in 1697, was in the royal band, became flute-player of the King's private band in 1712, and violist in 1716. He left suites for the flute, issued in 1717, 1718, etc. (see list in *Fétis: Suppl.*).

(10) JACQUES (b. Sept. 7, 1686; d. Pampeluna, June 25, 1709³), succeeded his father as oboist in 1708. He was the kettle-drummer to the Duke of Orleans.

(11) FRANÇOIS (b. Jan. 21, 1695; d. Oct. 27, 1726³), was oboist of the King's chamber.

(12) NICOLAS (b. Versailles, Nov. 3, 1699; d. 1769), was oboist in the Grande Écurie, and violist in the King's private band. In 1747 he played the serpent in the latter.

PHILIPP, ISIDORE (b. Budapest, Sept. 2, 1863), studied at the Paris Conservatoire, where he gained the first prize for piano in 1883, and also received counsel from Stephen Heller, Saint-Saëns and Ritter. He played in different parts of Europe and made his first appearance at the Philharmonic Society in London in Mar. 1890. He took part regularly at the Colonne, Lamoureux and Conservatoire concerts in Paris. In 1890 he founded with Berthelier and Loeb a chamber-music organisation, and in 1896 reorganised the 'Société des instruments à vent,' giving most interesting concerts until the final dissolution of the undertaking in 1901. He published numerous educational works, arrangements (among them a wonderfully clever and effective version of the scherzo from the *Midsummer Night's Dream* music) for two pianos, as well as pianoforte pieces. He became professor of the piano at the Paris Conservatoire in 1893.

³ Bonnet gives 1766.

PHILIPPE DE VITRY (b. between 1285-1295; d. 1361), of a noble family of the Champagne. He died as bishop of Meaux. He was one of the foremost musical theoreticians of the 14th century, whose *Ars nova*, *Ars contrapunctus*, *Ars perfecta in musica* and *Liber musicalium* remained standard works for over a century. He simplified the complicated notation of the Italians. Of his compositions nothing has yet been found (Q.-L.; Riemann).

PHILIPS, PETER (d. Brussels ? 1628¹), an English composer and organist, who lived in the Netherlands at the end of the 16th and beginning of the 17th centuries.

Very little is known² of his biography beyond what can be gathered from the title-pages of his published works, in which his name is given in various Latin, French and Italian forms. Fétus says that he was born in England of Roman Catholic parents, and about 1595 went to Italy, residing for some months in Rome, but these statements cannot be verified, nor does his name occur in the records of the English College at Rome. The 'Fitzwilliam Virginal Book' contains a series of nineteen pieces by Peter Philips, many of which are dated (1580, 1582, 1592, 1593, 1595, 1602, 1603 and 1605). The first (No. lxxxv.—printed edition, i. 343) is a pavana, with the note 'the first one Philips made.' Another of the series is a 'Pavana Dolorosa,' dated 1593, with the abbreviated name 'Treg.', probably indicating that it is the composition of the elder Tregian, who was at that date imprisoned as a recusant. In a MS. now in the Berlin Library (MS. 191) there is another copy of this pavana, with the name of Philips alone as composer, while the index states that it was 'composita in prigione.'³ This probably means that Tregian wrote the pavana while he was in prison, and that it was subsequently arranged by Philips.

It is highly improbable that Philips was in England after 1590, for in 1591 there was published at Antwerp his collection of madrigals entitled 'Melodia Olympica di diversi eccellentissimi musici,' dedicated to 'Sig. Giulio Balbani,' patrono mio osservantissimo,' and dated Antwerp, Dec. 1, 1590. Other editions of the 'Melodia Olympica' appeared at Antwerp in 1594 and 1611. This work was followed in 1596 by 'Il primo libro de madrigali a sei voci,' printed at Antwerp by Phalèse, and dedicated (Antwerp, Jan. 8, 1596) to Signor Alessandro di Giunta; a second edition was issued in 1604. In 1598 he published at Phalèse's press in Antwerp a volume of eight-

part madrigals, on the title-page of which he appears for the first time as organist of the Archduke Albert and Archduchess Isabella. This work is dedicated from Antwerp on Sept. 24, 1598, to Sir William Stanley (1548-1630) the Catholic adventurer, who is described as 'Collonello d' un Regimento Inglese & Wallon mio Sig. osseruandiss.' The work was reprinted in 1599, and again in 1615. In 1603 there appeared a second book of madrigals for six voices (Antwerp, Phalèse), dedicated from Antwerp, Nov. 10, 1603, to the Archduke and Archduchess; a second edition was issued in 1615. On Mar. 9, 1610, Philips was appointed to a canonry in the collegiate church of Saint Vincent, at Soignies, vacant by the death of Claude Carlier. In 1611 he was summoned to Malines, together with several of his colleagues of the archducal chapel, in order to report on a new organ erected in the cathedral. For their services on this occasion Philips and his companions received six pots of Rhine wine, of the value of 24 livres, 15 sous. The entry of this payment in the town accounts seems to imply that Philips and his colleagues took part in the Easter services of 1611.⁴ In the same year Philips's name appears as organist at the Chapel Royal at Brussels, in receipt of '10 aunes de drap, au prix de six livres l'aune.' On Mar. 12, 1622, at the funeral of the Archduke Albert (ob. July 15, 1621), Philips walked in the procession at the head of the 'Chapelains de la Chapelle de la Cour': his portrait, which is certainly taken from life (as notified in the letterpress) is here reproduced from Jacques Franck's *Pompa funebris . . . Alberti Pii . . . veris imaginibus expressa* (Brussels, 1623). Two years later (1624) as 'Pietro Filippini' he is mentioned in a report on the restoration of the organ of the Court Chapel.

After the appearance of his six-part madrigals Philips seems to have devoted himself entirely to sacred music, and it is probable that it was in order to be qualified for the canonry of Soignies that he took holy orders. His first published collection of sacred music, the 'Cantiones sacrae,' for five voices, was published by Phalèse at Antwerp in 1612. It is dedicated to the Blessed Virgin, and in the title-page the composer's name first appears with the prefix 'R.D.' and with the title of Canon of Soignies. The five-part 'Cantiones sacrae' were followed in 1613 by a similar collection for eight voices, also published by Phalèse, and dedicated to St. Peter. A second edition of this work, with the addition of a 'Bassus Continuuus' for the organ, was brought out by Phalèse in 1625. In 1613 also appeared the first edition of 'Gemmulæ Sacrae Binis et Ternis Vocibus cum Basso Continuo ad

¹ According to an entry in the notebook of Dr. John Southcote (publ. by Catholic Record Society, vol. i. p. 135). If this is so, publications under Philips's name of 1600 and 1602 are posthumous, but there is nothing to show this on their title-pages. See *Mus. Ant.* ii. 241.

² Sebastian Wastcote's will, which mentions Philips, suggests that he had been brought up as one of the St. Paul's boys. See *Mus. Ant.* iv. 189.

³ It is printed in Fuhrmann's *Studien Gello-Deutschen* (1615).

⁴ The Balbani were a noble family of Louca, a branch of which was settled at Bruges at the end of the 16th century.

⁵ See P. Bergmann, *L'Organe des Archiducs Albert et Isabelle Peter Philips* (Gand, 1903).

Organum' (Antwerp, Phalèse), a second edition of which was issued in 1616 and a third in 1621. In 1616 Jean Veruliet of Valenciennes brought out a little volume of short motets or hymns entitled

'Les Rosignols spirituels. Lignes en duo, dont les meilleurs accords, nommément le Bas, releuēt du Seigneur Pierre Philippe, Organiste de leurs Altez Serenissimes.'

This work, of which a second edition appeared

in 1621, a third in 1631, and a fourth (without Philips's name) at Cologne in 1647, is dedicated to Charles de Pas, Abbot of St. Amand. In 1616 Philips also published with Phalèse at Antwerp his '*Deliciae sacrae binis et ternis vocibus, cum basso continuo ad organum*,' dedicated to the Archduke and Archduchess; a second edition of this work appeared in 1622. On Jan. 6, 1621, Philips exchanged his canonry

of Soignies with Jerome van der Berghe for a perpetual chaplainship in the church of Saint Germain at Tirlemont. The documents relating to this transaction are printed by P. Bergmans. In the title-page of the second edition of the '*Deliciae*' (1622) he is still entitled Canon of Soignies, but on that of his next work, a collection of Litanies of Loretto, for from four to nine voices, with Bassus Continuus for the organ (Phalèse, Antwerp, 1623), he appears as Canon of Bethune, a title he also bears in the second edition of the eight-part '*Cantiones sacrae*,' issued in 1625. But in 1628, when he issued the first part of his '*Paradisus sacris cantionibus consitus, una, duabus et tribus vocibus decantantis. Cum basso generali ad organum*' (Phalèse, Antwerp, dedication dated Brussels, Apr. 1628), he once more appears as Canon of Soignies, a title still accorded him in 1633, when the second and third parts of the '*Paradisus*' were printed by Phalèse, though on the title-page of the second (enlarged) edition of the Litanies (1630) his name appears without any title. A volume of masses was published posthumously (see the *Kirchenmusikalisches Jahrbuch*, 1899, p. 89). This is identical with a book entered in a list of the musical library of John IV., King of Portugal (1649), as No. 599: '*Missas y salmos . . . a 8 & 9 . . . obras postumas*.' After this comes a volume of '*Mottetes . . . a 8, 2 partes*,' also described as posthumous works, though it seems doubtful whether the eight-part '*Cantiones sacrae*' of 1613 be not intended. Of the masses and psalms no copy is at present known to exist. No record of his death has been found at Soignies, where the present writer has examined the records of the church and the tombstones of the canons without success.

In addition to the works which he himself published, Philips contributed to many collections of the time. Phalèse's '*Madrigali a otto voci de diversi eccellenti et famosi autori*' (Antwerp, 1596) contains two madrigals by him for eight voices; two more are in the same publisher's '*Paradiso musicale di madrigali et canzoni a cinque voci*' (Antwerp, 1596), and two English madrigals in Thomas Morley's '*Madrigals to five voyces*. Selected out of the best approved Italian Authors' (London, 1598). A Pavan and Galliard are in Morley's '*Consort Lessons*' (1599)—the Pavan is an arrangement of the 1580 Pavan¹ in the '*Fitzwilliam Virginal Book*' (No. lxxxv.); a six-part madrigal is in the '*Ghirlanda di madrigali*' (Phalèse, Antwerp, 1601), and two more in the '*Nervi d'Orfeo*' (Leyden, 1605). A Pavan and Galliard for five instruments is in the first part of Z. Füllack's '*Ausserlesene Paduanen und Galliarden*' (Hamburg, 1607), and three motets in Books II. and III. of M. Herrerius's '*Hortulus musicalis*'

¹ Another arrangement of the 1580 pavan, entitled '*Wy Engelen gret*,' is in W. Swart's '*Den Lust-Hof der nieuwe Musycke*' (Amsterdam, 1608).

(Munich, 1609), and in the same year the 1580 Pavana ('Fitzwilliam Virginal Book,' No. lxxxv.) was printed in tablature in Thomas Robinson's 'New Citharen Lessons' (London, 1609). Abraham Schadaeus also reprinted two of Philips's eight-part 'Cantiones sacrae' in his 'Promptuarium musicum' (Strassburg, 1611).

From 1605–10 Salomon de Caus was engineer to the Archduke Albert and the Archduchess Isabella at Brussels, where he was succeeded in 1612 by his assistant, Gerard Philippi, who may have been a connexion of the composer. That he was well known to de Caus is proved by the fact that the curious volume of mechanical devices which the celebrated engineer published at Frankfort in 1615, under the title of 'Les Raisons des forces mouvantes' contains part of a Fantasia by Philips (for a barrel-organ turned by water) on Alessandro Striggio's five-part madrigal 'Chi fara fed' al ciel'; the original madrigal appeared at Venice in 1566 in the second book of a collection called 'Il desiderio,' and Philips's complete setting is to be found in the 'Fitzwilliam Virginal Book' (printed edition, 1899, I. p. 312). In the same year (1615) de Caus also printed in his 'Institution harmonique' some instrumental trios by Philips, 'ou les natures de la première, troisième, & cinquiesme mode sont tres bien observées'; though the composer's name, 'Pietri Fillippi,' is only attached to the 'Trio de la première mode,' the context shows that all three are by him. In 1621 Thomas Simpson inserted a short instrumental 'aria à 4' in his 'Taffel Concert,' published at Hamburg, and in 1622 a four-part Paduana from his pen appeared in the anonymous 'Amoenitatum musicalium hortulus,' published at Leipzig. Two motets by Philips for two voices with basso continuo are in the 'Promptuarium musicum' of J. Donfrid (Strassburg, 1622), and two Christmas carols in the 1629 edition of Pevernage's 'Laudes vespertinae B. Mariae Virginis' (Phalèse, Antwerp). For a list of the libraries containing MS. compositions by Philips reference must be made to Q.-L. In many cases the MSS. are only copies of printed works, but at Königsberg (MS. 1645, No. 24) are preserved four parts of a Mass for six voices, unfortunately wanting the tenor and sextus. An account of some instrumental pieces in a MS. formerly in the Library of Count zu Lynar at Lubbenau will be found in Dr. Max Seiffert's introduction to vol. i. of the complete works of Sweelinck (1894, p. 111).

It is often very difficult to distinguish the MS. compositions of Peter Philips from those of an earlier composer—Philip van Wilder (q.v.)—who in English MSS. sometimes appears as 'Mr. Philips.' In the first volume of the new catalogue of the MS. music in the British Museum the two composers are indexed together as 'Philip de Wildroe,' owing to the fact that a metrical motet or anthem, 'Blessed art thou

that fearest God,' occurs in B.M. Add. MSS. 30,480-4 as by 'Philip de Wildroe,' in B.M. Add. MSS. 22,597 as by 'Phillips,' and in Myriell's 'Tristiae Remedium' it is ascribed to Peter Philips. The two first MSS. were clearly written early in the reign of Elizabeth, and Myriell's collection is dated 1616, so it seems probable that Myriell found the composition with the name of 'Phillips' attached and attributed it to Peter Philips, who was well known in his day, while the name of Philip van Wilder was forgotten.

Like his contemporary Bull, who was also a refugee at Antwerp in the early 17th century, Philips seems to have been personally acquainted with Sweelinck; an arrangement of the English composer's early Pavana ('Fitzwilliam Virginal Book,' i. p. 343) by the Dutch organist is printed by Dr. Seiffert in the above-mentioned volume, and the same writer refers to a contemporary record of Philips's opinion that Sweelinck was the cleverest and most talented ('constrijck') organist of his time. That Philips himself was widely appreciated in his day is proved by the number of collections in which works by him appeared. Although his life was spent abroad, he was not forgotten in England, and Peacham, in his *Complete Gentleman* (London, 1627), says of him:

'Nor must I here forget our rare Countrey-man, Peter Phillips, Organist to their *Altezza*' at Brussels, now one of the greatest Masters of Musick in Europe. He hath sent vs ouer many excellent Songs, as well *Motets* as *Madrigals*: he affecteth altogether the *Italian* vein.'

In Velvet Breughel's picture of the Five Senses (now in the Prado at Madrid) an open music-book on a spinet reproduces the title-page of Philips's six-voice madrigals, and in Ph. Brasseur's *Sydera illustrium Hannoniae scriptorum* (Mons, 1637), the following verses on him appear:

Anglus ubique audit, verum magis Angelus ille est
Sonegae Clero, songgaeque choro.
Qui velut eximos semper colit arte canorâ,
Sic melodis auctum voribus ille Petrum.
Edidit hic sacris Paradisum cantibus aptum,
Et modo sacratiss servit ubique locus.

Even Burney (who knew so little about Philips as to say that Soignies was in Germany) gives him some stinted praise. Commenting on the 'Fitzwilliam Virginal Book,' the 18th-century historian says (iii. 86):

'The first regular fugue, for the organ, upon one subject that I have seen, was composed by Peter Philips . . . and is inserted in the Virginal Book. . . . This author has manifested considerable abilities in treating a simple subject, which he has introduced no less than thirty-nine times: simple; in augmentation; and in diminution. The harmony is very full, but the modulation being chiefly confined to the keynote, and its fifth, is somewhat monotonous, and the divisions, in accompanying the subject, are now become too common and vulgar to afford pleasure, or even to be heard with patience, by fastidious judges of modern melody.'

In estimating Philips's position among English composers it is important to remember that his

whole life was passed abroad. His music exhibits none of the characteristics of his English contemporaries; as Peacham remarks, it is—at least in his madrigals and instrumental works—entirely in ‘the Italian veine.’ In his later years he seems to have been more influenced by the later Netherlandish School, and his five-part ‘Cantiones sacras’ often contain passages strongly reminiscent of Sweelinck.¹ After suffering undeserved neglect for three hundred years, attention was drawn to this set of motets by the performances of the choir of Westminster Cathedral under Terry, who had the whole set lithographed for modern use. Their revival has been one of the most interesting features of the Cathedral services, where their admirable combination of melody and dignity has won for them well-merited, if tardy recognition. In his later sacred music Philips seems to a certain extent to have abandoned the polyphonic style of his earlier works and to have adopted a modified kind of homophony, somewhat resembling that of Dering, who, like himself, was a Roman Catholic English organist settled in the Netherlands. It is to be hoped that the attention recently drawn to this very talented composer will cause more of his music to be reprinted. The following is a list of accessible reprints:

MADRIGALS

1. *Vol volete ch' io muola* (4 voc.) Hawkins, *History*, iii. 328.
2. *Amor che vuol* (4 voc.). Ed. W. B. Squire (Stanley Lucas and Weber, 1906).
3. *Dispiagiate guancie amate* (8 voc.). Ed. W. B. Squire (‘Augsch-wälthe Madrigale,’ Breitkopf & Härtel, 1906).

MOTETS

1. *O pastor aeternae* (8 voc.). (A. H. Jewell's ‘Madrigal and Motett Book,’ No. 2, 1896).
2. *Hodie Sanctus Benedictus* (5 voc.). Ed. W. B. Squire (Novello & Co., 1899).
3. *Ego sum panis vivus* (5 voc.). Ed. W. B. Squire (J. Williams, 1902).
4. *Ave Verum*.
5. *Ave Regina*.
6. *Regina coeli*.
7. *Salve Regina*.
8. *Veni Creator* (4 voc.). In C. T. Gatty's ‘*Arundel Hymns*’ (Boosey & Co., 1908).

INSTRUMENTAL

1. A shortened version of the *Fantasia on Strigello's* ‘*Chi fara fed' al ciel*,’ as printed by B. de Caux. In *Ed. Van der Straeten's Musiciens netherlandais on Italie* (1882), p. 506.
2. Another *Fantasia* on the same subject, from a MS. in the University Library at Liège. In A. E. Ritter's *Zur Geschichte des Orgelreperts* (1884), i. p. 61.
3. 21. Nineteen pieces in the ‘*Fitzwilliam Virginal Book*’ (1899), vol. i.

PHILIPS (PHELYPPES), SIR THOMAS, a 15th-century English composer. So far only 1 song of his is known, in 6 verses, from the *Fayrfax MS.* (B.M. Add. MSS. 5465).

PHILLIPS, ADELAIDE (b. Stratford-on-Avon, 1833; d. Carlsbad, Oct. 3, 1882), a contralto singer who pursued her career chiefly in America. Her father was a chemist and druggist, and her mother, who was of Welsh birth, was a teacher of dancing. The family emigrated to America in 1840, going first to Canada, and then to Boston, Mass. Adelaide was early instructed in dancing by her mother, and on Jan. 12, 1842, made her first appearance

on the stage at the Tremont Theatre, Boston, as an ‘infant prodigy.’ On Sept. 25, 1843, she began an engagement at the Boston Museum. Her vocal gifts soon attracted the attention of connoisseurs, and in 1850 she was introduced to Jenny Lind, who advised the young actress to give herself up to the study of music. A subscription list was started for the purpose of paying for her training, and she was sent to Manuel Garcia in London. On Dec. 17, 1854, she made a début at the Teatro Carcano, Milan, as Rosina. In Aug. 1855 she returned to Boston, and in October appeared at a concert in the Music Hall. She was then engaged for a series of operas of the English ballad school—‘*The Duenna*,’ ‘*The Devil's Bridge*,’ and ‘*The Cabinet*’—at the Boston Theatre. Her American début in Italian opera was at the Academy of Music, New York, Mar. 17, 1856, as Azucena in ‘*Il Trovatore*.’ Her success secured for her an engagement for five seasons. She went first to Havana, and subsequently to Paris (where she sang Azucena at Les Italiens in Oct. 1861), Madrid, Barcelona and through Hungary and Holland. Her repertory comprised all the contralto parts in the stock Italian operas. In 1879 she became identified with the Boston Ideal Opera Company, devoted to the presentation of operettas. She appeared with this company for the last time in Boston, on the Museum stage, where her early triumphs had been won, on Nov. 30, 1880. Her last appearance on any stage was at Cincinnati in Dec. 1881. In Sept. 1882, the state of her health induced her to go to Carlsbad, where she died. Her remains were carried to Boston, and subsequently buried at Marshfield, Massachusetts, where the family had long lived on a fine estate purchased by Adelaide. She left a sister, Mathilde, also a contralto of excellent reputation in America, and three brothers. F. H. J.

PHILLIPS, ARTHUR, Mus.B. (b. 1605; d. Mar. 27, 1695), became in 1622 a clerk of New College, Oxford, and was appointed organist of Bristol Cathedral, Dec. 1, 1638. On the death of Richard Nicolson in 1639 he succeeded him as organist of Magdalen College, Oxford, and professor of music in the University, and graduated Mus.B., July 9, 1640. Some time afterwards he quitted the English Church for that of Rome, and attended Queen Henrietta Maria to France as her organist. Returning to England he entered the service of a Roman Catholic gentleman of Harting in Sussex, named Caryll, as steward. He composed music in several parts for ‘*The Requiem*, or, *Liberty of an imprisoned Royalist*,’ 1641, and a poem by Dr. Pierce, entitled ‘*The Resurrection*,’ 1649. A ‘*fancy on a ground*’ is in the B.M. Add. MSS. 29,996. He describes himself in the subscription book as son of William Phillips of Winchester, gentleman.

W. H. H.

PHILLIPS, HENRY (b. Bristol, Aug. 13,

¹ As to his conjectural influence on Frescobaldi, see Van der Straeten's *Musiciens netherlandais on Italie* (1882), vol. vi.

1801; *d.* Dalston, Nov. 8, 1876), was the son of a country actor and manager, and made his first appearance in public as a singing-boy at the Harrogate Theatre about 1807. He afterwards came to London and sang in the chorus at Drury Lane and elsewhere. On the settlement of his voice as a baritone he placed himself under the tuition of Broadhurst, and was engaged in the chorus at the English Opera-House, and to sing in glees at civic dinners. He next had an engagement at Bath, where he sang in 'Messiah' with success. Returning to London he studied under Sir George Smart and appeared in the Lenten oratorios at the theatres, and at the Liverpool Musical Festival of 1823. In 1824 he was engaged at Covent Garden, and appeared as Artabanus in Arne's 'Artaxerxes,' but made little mark. In the summer of the same year he sang the music of Caspar on the production of 'Der Freischütz,' with great effect. He then made progress, was engaged at the provincial festivals, and in 1825 appointed principal bass at the Concert of Ancient Music, and from that time filled the first place at the theatre and in the concert-room. He was also a member of the choir at the chapel of the Bavarian Embassy. About 1843 he gave up his theatrical engagements and started a series of 'table entertainments,' which, notwithstanding their ill success, he persisted in giving, at intervals, until he quitted public life. In Aug. 1844 he went to America, and remained there, giving his entertainments in various places, for nearly a year. He sang again in London at the first performance of 'Maritana' (Nov. 15, 1845) and in Balfe's 'Maid of Artois' (Dec. 1847), and reappeared in opera at Covent Garden in Oct. 1848. On Feb. 25, 1863 (his powers having been for some time on the wane), he gave a farewell concert and retired. He then became a teacher of singing, at first at Birmingham, and afterwards in the vicinity of London. He composed several songs, etc., and was author of *The True Enjoyment of Angling*, 1843, and *Musical and Personal Recollections during half a century*, 1864. W. H. H.; addns. W. H. G. F.

PHILLIPS, JOHN and SARAH, music engravers, during the middle of the 18th century. Hawkins' says of them:

'But the last and greatest improver of the art of stamping music in England was one Phillips, a Welchman, who might be said to have stolen it from one Fortler, a Frenchman and a watchmaker, who stamped some of the parts of Martin's first opera, of concertos, and a few other things. This man Phillips, by repeated essays, arrived at the method of making types (punches) of all the characters used in music; with these he stamped music on pewter plates, and taught the whole art to his wife and son. In other respects he improved the practice of stamping to so great a degree that music is scarce anywhere so well printed as in England.'

The Phillips pair kept a music shop in St. Martin's Court, St. Martin's Lane, about 1750-1760, and worked much for composers who

published their own compositions; among these were Geminiani ('Art of playing the Violin,' 1751); Dr. Arne ('Thomas and Sally,' 1761); Dunn ('Six English Songs'); Edward Miller (several collections of songs); Warren's ('Collection of Catches and Glees,' 1763), etc.

During the lifetime of John Phillips, both his name and that of his wife appear attached to music, but Phillips having died, probably about 1766-68, his wife alone, shortly after this date, is found having a music shop in Bedford Court and still stamping music plates. F. K.

PHILLIPS, MONTAGUE FAWCETT (*b.* London, Nov. 13, 1885), studied at the R.A.M., and has been a successful composer of songs and slight pieces (for list see *B.M.S. Ann.* 1920). In the theatre Phillips's principal work has been 'The Rebel Maid' (Empire, 1921), a romantic light opera, the tunefulness of which appealed to a wide public. Most of his larger orchestral works remain in manuscript. A pianoforte concerto in F sharp minor and a symphonic poem 'Boadicea' were both produced by the Patrons' Fund of the R.C.M. (1908-09), and a symphony in C minor was heard at a concert of his own compositions which Phillips gave in London in 1912. An 'Heroic' overture was produced by the London Symphony Orchestra in 1915. C.

PHILLIPS, PETER, see PHILIPS.

PHILLIPS, WILLIAM LOVELL (*b.* Bristol, Dec. 26, 1816; *d.* Mar. 19, 1860), at an early age entered the cathedral choir of Bristol, and subsequently proceeded to London, where he sang as Master Phillips, the beauty of his voice attracting the approbation of Miss Stephens, afterwards Countess of Essex. He studied at the R.A.M., where he was a pupil of Cipriani Potter, and class-fellow of Sterndale Bennett, and eventually became professor of composition at that institution. From Robert Lindley he took lessons on the violoncello, and soon became a member of the orchestras of the Philharmonic, Antient Concerts, Her Majesty's, the Sacred Harmonic Society, etc., besides being regularly engaged at all the great Musical Festivals. He was at different times musical director of the Olympic and Princess's Theatres, composing the music for a variety of dramas. For many years he held the post of organist at St. Katherine's Church, Regent's Park, and at one time conducted a series of concerts at St. Martin's Hall. Music to the farce of 'Borrowing a Husband' was performed in 1844. In addition to numerous songs he composed a Symphony in F minor, performed at the concerts of the R.A.M. and of the Society of British Musicians. Just before his fatal illness he was engaged on an opera founded on a Rosicrucian story, and a cantata on a Welsh subject. He is buried in Highgate cemetery. G.

PHILP, ELIZABETH (*b.* Falmouth, 1827; *d.* London, Nov. 26, 1885), was educated at

¹ *History*, p. 802, Novello's ed.

Bristol under the care of Mary Carpenter, and taught singing by Manuel Garcia, receiving instruction in harmony and composition from Hiller at Bristol. She afterwards devoted herself to teaching singing and composition. Her first works were published in 1855, and comprised a Ballad, 'Tell me, the summer stars,' words by Edwin Arnold; also six songs from Longfellow, etc. A great number of her ballads became widely popular. Miss Philp was also the author of *How to sing an English Ballad*.

A. C.

PHILTRE, LE, opera in 2 acts; words by Scribe, music by Auber. Produced Opéra, June 20, 1831; in English—'The Love Spell'—Olympic, Oct. 27 the same year. Donizetti's 'L'Elisir d'amore' has the same subject. G.

PHINOT (FINOT), DOMINICUS, a French composer of the 16th century, of whose life absolutely nothing is known, but who has left enough good work behind him to warrant him considerable respect for his attainments as a musician. It is inferred that he was a native of or otherwise connected with Lyons, from the fact that the volumes containing his own works only were first published there. These are two Books of Motets a 5-8 (Lyons, 1547-48), and two Books of Chansons a 4 (Lyons, 1548). A Mass of his a 4, 'Si bona suscepimus,' was published separately at Paris in 1557, and a book of Psalms and Magnificats a 4 at Venice, 1555. He is largely represented in the Nuremberg and other important collections of the time from 1538 onward. From the 'Thesaurus musicus' of 1564 Commer has reprinted in his 'Collectio musicorum Batavorum,' tom. viii., ix., the Lamentation 'Incipit Oratio,' also three motets 'Sancta Trinitas,' 'Jam non dicam,' 'Tanto tempore nobiscum,' all a 8, excellent works, written in the Venetian fashion for two choirs answering one another. J. B. M.

PHIPSON, THOMAS LAMB, D.Sc., F.C.S. (b. near Birmingham, May 5, 1833; d. Putney, Feb. 22, 1908), a prominent amateur violinist and musical littérateur. His father, Samuel Ryland Phipson—who interested himself in the adoption of several scientific innovations—resided for some years in Brussels, and it was at the University there, that Dr. Phipson obtained his Doctor's degree in Science at the age of 22. Although engaged in scientific labour for over forty years, Phipson occupied his leisure in the earnest study of music, and found time to attain a proficiency as a violin virtuoso, unusual among amateurs. His published works (other than scientific treatises) comprise:

Biographies of celebrated Violinists; Bellini and the Opera of 'La Sonnambula'; Confessions of a Violinist; Voice and Violin, and two pamphlets entitled Guido Papini and Musical Sounds produced by Carbon.

BIBL.—C. J. BOUVIER, *Scientific and Literary works of Dr. Phipson: The Strand, May 1903*; *Biographie et Dictionnaire des Historiens et savants Français contemporains*; WALKER, *Biographical Dictionary* R. N. A.

PHRASE is one of the smallest among the divisions which distinguish the form of a musical work. Where there are distinct portions marked off by closes like full stops, and half closes like stops of less emphasis, the complete divisions are generally called periods, and the lesser divisions phrases. The word is not and can hardly be used with much exactness and uniformity, for sometimes a phrase may be all, as it were, contained in one breath, and sometimes subordinate divisions may be very clearly marked. (See PHRASING.)

C. H. H. P.

PHRASING. A musical composition, consists of a series of short sections of various lengths, called phrases, each more or less complete in itself; and it is upon the interdependence of these phrases, and upon their connexion with each other, that the intelligibility of music depends. The phrases are analogous to the sentences of a literary composition.

The relationship of the different phrases to each other and to the whole work forms no part of our present subject, but may be studied in the article FORM; what we have at present to do with is the proper rendering of the phrases in performance, that they may be presented to the listener in an intelligible and attractive form. The process by which this is accomplished is called phrasing, and is perhaps the most important of the various elements which go to make a good and artistic rendering of a musical composition. Rousseau¹ says of it, 'The singer who feels what he sings, and duly marks the phrases and accents, is a man of taste.' But he who can only give the values and intervals of the notes without the sense of the phrases, however accurate he may be, is a mere machine.

Just as the intelligent reading of a literary composition depends chiefly upon two things, accentuation and punctuation, so does musical phrasing depend on the relative strength of the sounds, and upon their connexion with or separation from each other. It is this close relationship of language to music which makes their union in vocal music possible and appropriate, and accordingly when music is allied to words it is necessary that the musical accents should coincide with those of the text, while the separation of the various phrases agrees with the division of the text into separate lines or sentences. In instrumental music, although the same principles underlie its construction, there is no such definite guide as that afforded by the sense of the words in a song, and the phrasing must therefore be the result of a just appreciation on the part of the performer of the general sense of the music, and of the observance of certain marks by which phrasing is indicated.

If we now consider more closely the causes

¹ *Dictionnaire de Musique.*

and consequences of a variety in the strength of the notes of a phrase, we notice in the first place the necessity for an accent on the first note of every bar, and, in certain rhythms, on other parts of the bar also. These regularly recurring accents, though an important part of phrasing, need not be dwelt on here, as they have already been fully treated in the article ACCENT; but there are certain irregular forms of accent occasionally required by the phrasing, which it is necessary to notice.

In rapid passages, when there are many notes in a bar, it is often necessary to introduce more accents than the ordinary rhythm requires, and the number and frequency of the accents will depend upon the number of changes of harmony upon which the passage is founded. Thus in the first bar of the following example, each couple of notes, after the first four, represents a new harmony, and the bar will consequently require seven accents, while the next two bars will receive the ordinary rhythmic accent on the first note of each group; and in the fourth bar, since the harmony does not change, two accents will suffice. In the example the place of the accents is shown by the asterisks.

1. MULLER, Caprice, Op. 29, No. 4.

Sometimes these extra accents have the effect of appearing to alter or add to the harmonies upon which the passage is founded, as in Ex. 2, where the additional accents demanded by the composer's method of writing in groups of two notes instead of four seem to indicate an alternation of the tonic and subdominant harmonies of C minor, whereas if the passage were played as in Ex. 3 the effect would be that of a single C minor harmony.

2. SCHUMANN, 'In der Nacht.'

On the other hand, there are cases in which the phrasing requires the omission of some of the regular accents. This occurs in quick movements, when, owing to the introduction of a

melody written in notes of great length, two or even four of the actual written bars combine and appear to the listener to form a single bar. This is the case in Ex. 4, the effect of which is precisely that of such a bar as Ex. 5, and the whole phrase of four bars will only require two accents, falling upon places corresponding to the first and third beats of Ex. 5. In the movement quoted the effect of the long bars remains in force during no less than forty-four of the actual written bars, the original 3-4 rhythm coming into use again on the entrance of the syncopated subject.

4. BEETHOVEN, Sonata, Op. 28.

5. Moderato.

As a rule, the accent of a passage follows the grouping, the first note of each group receiving the accent; whenever, therefore, the grouping of a passage consisting of notes of equal length varies, the number of accents in the bar must vary also. Thus in Ex. 6 the first bar will contain four accents, while the third requires but two.

6. BEETHOVEN, Sonata, Op. 14, No. 2.

The signs which govern the connexion or disconnexion of the sounds are the dash (') or dot (·), and the curved line indicating legato. The ordinary use of these signs has already been described (see DASH; LEGATO), and the due observance of them constitutes a most essential part of phrasing, but in addition to this the curved line is used to denote an effect of peculiar importance, called the *Slur*.

When two notes of equal length in quick or moderately quick tempo are joined together by a curved line they are said to be *slurred*, and in playing them a considerable stress is laid on the first of the two, while the second is not only weaker, but is made shorter than it is written, as though followed by a rest.

7. HAYDN, Sonata.

Written. Played.

The rule that the first of the slurred notes

receives the accent holds good even when it is in an unaccented part of the bar (Ex. 8). In such a case the slur causes a very effective displacement of accent.

8. BEETHOVEN, Concerto in C minor.

Written.

Played.

Groups of two notes of which the second is the shorter may also be slurred in the same way (Ex. 9), but when the second is the longer note it must be but slightly curtailed, though still perceptibly, and there is no displacement of accent (Ex. 10).

9. HAYDN, Sonata.

Written.

Played.

10. MENDELSSOHN, Presto Agitato.

Written.

Played.

The slur is often used in combination with staccato notes in the same group (Ex. 11). When this is the case the second of the two slurred notes must be played both weaker and shorter than the notes marked staccato.

11. BEETHOVEN, Concerto in G.

Written.

Played.

When the curved line is drawn over two notes of considerable length, or in slow tempo, it is not a slur, but merely a sign of legato (Ex. 12), and the same if it covers a group of three or more notes (Ex. 13). In these cases there is no curtailment of the last note.

12. BEETHOVEN, Horn Sonata, Op. 17.

13. MOZART, Rondo in F.

But if the curved line is so extended as to include and end upon an accented note, then an effect analogous to the slur is intended, and the last of the notes so covered must be shortened (Ex. 14). A similar effect is also sometimes indicated by varying the grouping of the notes, so that the groups do not agree with the rhythmic divisions of the bar (Ex. 15).

14. SCHUMANN, Humoresken.

15. SCHUMANN, Toccata.

The great value of definite and characteristic phrasing is perhaps nowhere so strikingly manifested as in the performance of music containing imitation. In all such music the leading part must contain some marked and easily recognizable effect, either of variety of force, as in Ex. 16, or of connexion and disconnexion, as in Ex. 17, and it is by means of the repetition of such characteristic effects in the answering part or parts that the imitation is rendered intelligible, or even perceptible, to the ordinary listener.

16. HAYDN, Sonata.

17. MOZART, Gigue.

F. T.

The foregoing article deals only with the art of phrasing on the pianoforte, and it is in some ways more important to phrase carefully on

keyed instruments than on any others. For on keyed instruments alone, with the exception of the harp and instruments of percussion, is it possible to produce a long, meaningless series of sounds without any articulation or division into rationally balanced sections. On the bowed instruments, as on the human voice and on all kinds of instruments blown with the breath, the length of the bow and the capacity of the human lungs necessitate some kind of division into 'phrases'; and the art of phrasing on these is generally spoken of as if a phrase were always synonymous with the number of notes to be played with one bow or sung with one breath. The skill which average performers on the violin attain in the direction of disguising the interval between the up-and-down strokes of the bow leads some performers to disregard phrasing in passages where it is not specially marked, such as this :

which would often be played

by careless players if their attention were not drawn to the real balance of the phrases by means of slurs, etc. The vocal phrase nearly, but not quite always, is identical with the number of notes to be sung in one breath; the most prominent exception is when in leading back into the opening phrase of a melody the singer chooses to include the first few notes of that opening phrase in the same breath as the passage in which the return is made, and then to break the natural phrase in the middle, by breathing in an unusual place. A good example is the following, from Campra's song 'Charmant Papillon,' as edited by Weckerlin :

que tes bonjours sont courtés! Charmant Pa - pil - lon etc.

M.

PHRYGIAN MODE (Lat. *modus phrygius*; *modus mysticus*), the third of the Ecclesiastical Modes. (See **MODES**, **ECCLIASTICAL**.)

PHYSHARMONICA. A little reed organ invented in Vienna in 1818 by Anton Häckel, who intended it to be placed under the keyboard of the piano, to sustain the melody. It was increased in size and importance, and by various improvements at length developed into the **HARMONIUM** (q.v.). The name is used in Germany for a free-reed stop in the organ.

A. J. H.

PIACERE, A, 'at pleasure,' is generally prefixed to a cadenza, or cadenza-like passage, in solo music, to indicate that the expressions, and the alterations whether of time or force, are left to the will of the individual performer.

In such cases the accompaniment is generally directed to be played 'colla voce,' 'with the voice,' or 'colla parte,' without regarding the strict time of the composition. 'Ad libitum' expresses the same thing.

PLACEVOLE, 'agreeable, pleasant.' This word, when used as a musical direction, indicates that the piece is to be played in a graceful way, without passion. It has nearly the same meaning as 'grazioso' or the direction 'con amabilità' used by Beethoven in the pianoforte sonata, op. 110 (first movement).

M.

PIANETTE; a very low pianino, or upright pianoforte, introduced in 1857 by Bord, of Paris. The low price and good quality of these instruments soon extended their sale to England, where they received the name 'pianette'—an impossible word in France, 'piano' being of the masculine gender. The French name, originating in Bord's establishment, is 'Bibi,' a workman's corruption of 'Bébé'—'the baby.' Pianettes have been made in London for some years by Broadwood, Cramer and others. Bord's spiral hopper-spring (*ressort à boudin*), used in pianettes, is a useful and very effective contrivance, economical of space. The name is also used, commonly though incorrectly, of the mechanical pianos of the streets of London. A. J. H.

PIANGENDO, 'wailingly,' a direction properly only used in vocal music. Its instrumental equivalent is 'dolente' or 'con dolore.'

M.

PIANISSIMO, 'very softly.' This direction, which on all ordinary occasions is expressed by *pp*, is sometimes, but not very often, written in full—as a rule, to emphasise the fact of its presence in cases where it would least be expected. Beethoven often uses the full direction simultaneously with the abbreviation, as in the 10th variation of the thirty-three on a walse by Diabelli, op. 120, in which variation may also be found an instance of one of his chief characteristics, the sudden leap from *ff* to *pp* in the 31st bar. Since Beethoven's time, the practice has become very common of using *ppp*, for what Weber in the beginning of the overture to 'Oberon' calls 'Il tutto pianissimo possibile.' It is equivalent to the direction sometimes met with 'quasi niente' ('as it nothing'). Berlioz goes so far as to use the sign *pppp*; Verdi, in his Requiem, has gone even farther, and at one point uses *ppppp*. The reticence of Mendelssohn, who says, 'I particularly dislike *ppp*,'¹ was not imitated by Tchaikovsky, whose *pppppp* in the Pathetic Symphony will be recalled.

PIANO, 'soft.' This word, expressed in general by its initial *p*, is used to denote the least degree of strength except *pianissimo*. It is used, as is the case with most other directions,

¹ Letters to Moschales, p. 95.

in full only when it is necessary to draw particular attention to its presence, or where it is unlikely that it should stand; for instance, in the finale of Beethoven's PF. sonata, op. 2, No. 1, where the second subject is labelled 'Sempre piano e dolce.' *Mezzo piano* (abbreviated *mp*) denotes a degree of force slightly louder than *piano*. Beethoven was very fond of using a 'sudden *piano*' directly after a *forte* or *fortissimo*, and the occurrence of the sudden dynamic change is one of his most easily recognised characteristics. (See FORTE.) M.

PIANOFORTE—or FORTE PIANO, as often written in the 18th century—an instrument of Italian origin. The earliest mention of the name appears in records of the family of Este, in the letters of a musical instrument maker named Paliarino, dated Good Friday, June 27 and Dec. 31, 1598, and addressed to Alfonso II., Duke of Modena (see Table of Dates at end of this article). They were found in 1879 by Count L. F. Valdrighi, custos of the Biblioteca Estense, at Modena; and the discovery was immediately announced in the Florentine musical paper, *Boccherini*. In August of that year Valdrighi published the text of the letters, with an essay, in a pamphlet entitled *Musurgiana* (Olivari, Modena, 1879). In the first letter Paliarino mentions the recovery of 'the instrument Piano e Forte, with the organ underneath'¹; in the second, 'the recovery from certain priests, with other instruments, of the Piano e Forte above mentioned and another Piano e Forte on which the late Duke Alfonso had played.'² Here are two instruments each distinctly named 'Piano e Forte' (correcting Paliarino's uncertain spelling). In the second letter the same Hippolito Cricca, detto Paliarino, as he there signs himself (or Pagliarini as he spells his name elsewhere), seizes the opportunity of his brother's visit to Venice, to ask for sundry materials to be procured there, as needful for repairs, and for building a new 'Pian e Forte'; namely, lime tree, boxwood and ebony for keys, cypress for the bolly, brass wire, German glue, etc. etc. In Paliarino's inventory of the Duke's keyed instruments, also given in Count Valdrighi's appendix to his essay, there are, including organs, fifty-two,³ but only one 'Piano e Forte,' the one with the organ beneath, as specially distinguished; the other, and perhaps more, being possibly recorded under the simple name 'instrument' ('istrumento'), which is used to describe eleven of the fifty-two. The clavicembalo or cembalo (harpsichord) and spinetta (spinet) might also

have been classed under this general designation, yet Paliarino separates them. We can come to no conclusion from these names as to what kind of instrument this Piano e Forte was. It was most likely, as suggested by Sig. Cesare Ponsicchi in the *Boccherini* (1879, No. 6), a harpsichord with a contrivance for dynamic change; but whether hammers were applied, making it a real pianoforte, we are at present unable to say. The 'gravicembalo col piano e forte' of Cristofori of Padua, a hundred years later, may not really have been the first attempt to make a hammer-harpsichord; indeed Cristofori's invention seems almost too completely successful to have been the first conception of this instrument—a dulcimer with keys.⁴

CRISTOFORI'S INVENTION.—We must now transfer our attention from Modena to Florence, and skip from 1598 to 1709, when we find Prince Ferdinand dei Medici,⁵ a lover of music, in fact an eminent musician, and deeply interested in mathematical and mechanical questions, accepting at the request of three scholars, one of whom was the Marchese Scipione Maffei, the protection of a quarterly publication intended for learned and cultivated readers, viz. the *Giornale dei letterati d'Italia*. This patronage was the result of a personal visit of Maffei to Florence, where he met with Bartolomeo Cristofori, harpsichord-maker and custodian of the Prince's musical instruments, and was shown by him four specimens of a new harpsichord with piano and forte, the invention and make of Cristofori. Of these, three were of the usual long shape; the other was different, we know not in what way, but a detailed account of Cristofori's invention, written by Scipione Maffei,⁶ appeared in the *Giornale* in 1711, with a diagram, from a rough sketch, of his hammer-action. He calls the inventor Cristofali, which form of the name was generally followed, but an autograph and the inscriptions upon the pianofortes of his make are decisive evidence in favour of the real name being Cristofori.⁷ There is no doubt about Cristofori having made these instruments under the patronage of Prince Ferdinand, who had brought him from Padua some time about 1690. (See CRISTOFORI.)

We owe a debt of gratitude to Maffei for his record of the invention, which he reproduced in the collection of his works entitled *Rime e prose*, 1719. The reprint has been the cause of a misconception of the date of the invention,

¹ 'Così io mi ritrovò l'organo di carta, et l'istrumento Piano e Forte con l'organo di sotto.'

² 'L'istezza vostra saprà che mi ritrovò del suo che lo recuperato da questi Preti l'organo di carta, l'istrumento Piano e Forte con l'organo di sotto, un altro istrumento di due registri et il Piano e Forte, quello che adoprava il Ser. Sig. Duca Alfonso come memoria.'

³ This large number, as it seems to us, was not then remarkable for a prince to have. A hundred years later Prince Ferdinand dei Medici owned at least forty. See Appendix C, p. 101, to Pulli's *Ornati storici della villa del Sermo Ferdinando dei Medici* (Florence, 1874).

⁴ The small piano of 1610 in the collection of M. Rend-Savoye of Paris (see Table at end of this article) may be a specimen. A 16th-century drawing of the key dulcimer is in the National Library of Paris (No. 7296).

⁵ Three of his instruments (two by Cristofori) were included in the Florentine Collection (see CRISTOFORI) of the Signori Kraus and exhibited by them in the Paris Exhibition of 1878.

⁶ The complete text of Maffei's article, in the original language, with an indifferent English translation, is to be found in Rimbaud's *The Pianoforte* (Cocks, London, 1860)—the fault of translation being most obvious in the technical terms.

⁷ This has been adopted in Florence on the memorial stone (see CAMEROSI, Vol. I. pp. 767-8).

through want of reference to the earlier publication, which was anonymous. An accurate German translation was made at the time by Koenig, and published in Mattheson's *Musikalische Kritik*, vol. iii. p. 340 (Hamburg, 1725). This early translation has been reprinted by Dr. Oscar Paul in his *Geschichte des Klaviers*, p. 105 (Leipzig, 1868), and may be referred to with confidence by those who know German and do not know Italian.

We reproduce the diagram of Cristofori's

FIG. 1.

a is the string; b the key-bottom; c the first lever, or key. There is a pad, d, upon the key, to raise a second lever, e, which is pivoted upon f. g is the hopper—Cristofori's *linguista mobile*—which, controlled by the springs i and l, effects the escape, or immediate drop, of the hammer from the strings after a blow has been struck, although the key is still kept down by the finger. The hopper is centred at h. m is a rack or comb on the beam, s, where the butt, s, of the hammer, a, is centred. In a state of rest the hammer is supported by a cross, or fork, p, of silk thread. On the depression of the key, e, the tail, q, of the second lever, e, draws away the damper, r, from the strings, leaving them free to vibrate.

action as the kernel of this part of our subject, the action being the equivalent to the violinist's bow; as the instrument itself is the equivalent of the violin, though stopped by a mechanical construction instead of the fingers of the player's left hand. We follow Maffei's lettering of the parts; a lettering which will be adhered to throughout.

The reader will observe the smallness of the

hammer-head and the absence of what is called a 'check,' to arrest the hammer in its rebound; and also of any control but springs over the forward movement, or escapement, of the hopper. To admit of this machinery—so much more complicated than the simple action of the harpsichord—being taken out, Cristofori inverted the tuning-pin block (technically the 'wrest-plank'), and attached the wires to the tuning-pins ('wrest-pins'), at their lower ends, as in the harp. Being obliged to use heavier strings, which exerted a greater pulling force or tension, to withstand the impact of his hammers, he found it necessary to remove the pins to which the further ends of the strings were attached (the 'hitchpins'), from their old place on the sound-board of the harpsichord, to a stiff rail of wood ('string-block') built round the angle-side and narrow end of the case. Without this alteration his instruments could not have stood in tune and would soon have collapsed.

Two pianofortes of Cristofori's make are fortunately still existing. The earlier one, dated 1720, belonged to Signora Ernesta Mocenni Martelli of Florence (now in the Metropolitan Museum, New York), and is described by Leto Puliti, with illustrations of the action, in the essay referred to above. The second, dated 1726, was in the Kraus collection at Florence; then in the Heyer museum, Cologne; and now (1926) at Leipzig (see *PLATE XL*, No. 2). It happens to be more complete than that of Signora Martelli, because the hammerheads remain in their original condition, as may be seen by comparing Fig. 1 with Fig. 2, which represents the action of the latter.

Both instruments, the 1720 and the 1726,

FIG. 2.

On further comparing the two diagrams we observe in No. 2 first the extension of the lever or key, e; the transformation of the second lever, s, into what is technically an 'underhammer,' removing the hopper, g, from direct attack upon the butt, s, a change in the wrong direction, but probably necessitated by the want of a regulating button and screw to the hopper. Other modifications will be noticed; one is a pin, k, passing through the back part of the key (replacing the piece of whalebone behind the key; see drawing of Zuppa's action, Fig. 5), a step towards the front pin, since used to steady the lateral motion. The damper, r, now lies upon the strings, dropping, wedging, between the two unions. But the great improvement upon the first action is the substitution of the check, p—Cristofori's *para-martello*, which graduates the rebound of the hammer according to the blow—for the mere support of the silk threads which formerly received it when it fell.

have the overdampers and check, the latter the mechanical completion of the action. That of 1720 has been restored by Sig. Ponsicchi, a pianoforte-maker, who has himself given, in *Il pianoforte, sua origine e sviluppo (con tavole)*, Florence, 1876, a valuable contribution to the literature of the instrument. Both pianofortes are bichord, and have white natural keys, but the compass differs, the earlier having four and a half octaves, C to F, and the later only four octaves, C to C, the old normal compass equivalent to the human voice.

Cristofori died in 1731, aged 66, and in 1730, the year before his death, his assistant, Giovanni Ferrini, made a pianoforte which has become famous through Burney's reference to it. It was bought by Elisabetta Farnese, Queen of Spain; and by her bequeathed to the singer Farinelli, who inscribed upon it in letters of gold, 'Raffaello d' Urbino,' and esteemed it more highly than any other in his collection of keyed instruments. Burney played upon it in 1771. There were other pupils or followers of Cristofori; we hear of Geronimo of Florence, and Cherardi of Padua, but an end soon came to pianoforte making in Italy; possibly, as suggested by Puliti, from the difficulty felt by clavicembalists of acquiring the touch, and which made them decry the new instrument—or from the imperfection of the means for escapement. Be this as it may, the fruits of the invention were to be gathered and garnered elsewhere; but the invention itself remains with Italy.

OTHER CLAIMANTS.—The idea suggested by the vague character of the Estense 'piano e forte,' that there were perhaps attempts to construct a hammer action before Cristofori, we find strengthened by the known fact that two men in two different countries outside Italy were endeavouring, at the very time of his success, to produce a similar invention to his. The names of Marius and Schroeter,¹ the former a French harpsichord-maker, the latter a German musician, have been put forward to claim the credit of the absolute invention on the strength of certain experiments in that direction. Marius, in February 1716, submitted, perhaps a pianoforte, and certainly four models for actions of 'clavecins à maillets,' or hammer harpsichords, the description and engravings of which were published, nineteen years later, in Nos. 172, 173 and 174 of *Machines et inventions approuvées par l'Académie Royale des Sciences, tome troisième. Depuis 1713 jusqu'en 1719. A Paris MDCXXXV*, and are to be found in *extenso* in the works of Rimbault and Puliti. Both overstriking and understriking apparatus had occurred to Marius, and his drawings included the alteration of an

¹ It is of interest to note in the set of action models seen in the Kraus exhibit of 1878, how keenly inventors were striving for perfection in the pianoforte. The following dates are indicative: Cristofori (1711), Marius (1716), Schroeter (1721), Stein (1726), Zumpe (1764).

upright harpsichord, and the addition of a register of hammers to an horizontal one—rude contrivances of which no subsequent use was or could be made. His object in introducing hammers was an economical one—to save the expense and trouble of constantly requilling the harpsichord. Schroeter must be dismissed less summarily, owing to the frequently repeated statement that he was the actual inventor of the pianoforte; reassured with a fervid advocacy in which the bias of patriotism is conspicuous, by Dr. Oscar Paul in his *Geschichte des Klaviers*, p. 82. But had Schroeter not been a man of good education and some literary power, his name would not have been remembered; it must be distinctly understood that he was a musician, not an instrument-maker; and he never made a pianoforte or had one made for him, or he would have told us so. He claimed to have devised two models of hammer-actions between 1717 and 1721, which he afterwards neglected, but years afterwards, in 1738, being vexed that his name was not connected with the rising success of the pianoforte, he addressed a letter to Mizler which was printed in the *Neu-eröffnete musikalische Bibliothek* (Leipzig, 1736–54, vol. iii. pp. 474–6). He repeated his claim, with a drawing of one of his actions (then first published), in 1763, in Marburg's *Kritische Briefe über Tonkunst* (Berlin, 1764, vol. iii. p. 85), showing, although Gottfried Silbermann had been dead ten years, and Cristofori thirty-two, the animus to which we owe these naïve and interesting communications. (See SCHROETER.) In 1715, when Schroeter was only 16 years old, being entrusted with good pupils in Dresden, he found that their study upon the expressive clavicord was thrown away when they came to show off before their friends upon so different an instrument as the inexpensive harpsichord. Shortly after this, there came to Dresden the great dulcimer virtuoso, Pantaleone HEBENSTREIT, whose performances astonished Schroeter, and at the same time convinced him that it was by hammers only that the harpsichord could be made expressive. At this time, like Marius, he could hardly have known that pianofortes had not only been invented, but had for some years been made in Italy, although the intercourse prevailing between that country and Dresden might have brought the knowledge to him. But the inferiority of Schroeter's action to Cristofori's at once exonerates him from plagiarism; and the same applies also to Marius, whose ideas were of even less value mechanically than Schroeter's.

Schroeter gives us no description of his overstriking 'Pantaleon': we may conclude that he suspected the difficulties, not to this day surmounted, of an action in which the hammers are placed above the strings. Of the understriking action, his 'Pianoforte,' he has

given us full particulars and a drawing here reproduced :

FIG. 3.

s is the string; *c* is the key; *s*, a second lever; *g*, a jack to raise the hammer; *o*, the hammer itself, clothed at the tail, *r*, to serve for a damper. The play, or space, between the jack and the hammer-shank permitted, as in the early square-piano action of Zumppe (which may have been partly derived from Schroeter's idea), the rebound, or escapement, of the hammer.

For his second drawing, a later fancy of no practical value, it is sufficient to refer to Paul or Puliti.

But no sustained tone was possible, owing to the position of the damper, which resumed its place the moment the hammer fell. The rapid repetition of a note, after the old fashion of harps, mandolines and dulcimers, would have been the only expedient to prolong it. Marius's defect was the opposite one; he had no dampers whatever. But Schroeter had the great merit of perceiving the future use of iron as a resisting power in pianofortes; he invented a *Widerstandseisen*, or resisting iron, a bar of metal here marked *z*, which was placed transversely over the wrest-plank, rested firmly upon the strings, and formed the straight bridge. We do not know to whose piano this was applied, and it can hardly have been a part of his original conception. It is more likely to have occurred to him from observation of the defects in pianofortes, as did his scheme of stringing by proceeding from one string to a note in the bass, to four strings to a note in the treble; graduated with two and three unisons of so many notes each, between.

The allusions in Schroeter's letter to an 'ingenious man at Dresden' ('ein anderer sinnreicher Mann') point to Gottfried SIBERMANN, who, in the second half of the 18th century, was generally considered to be the inventor of the pianoforte. As late as 1780 De la Borde¹ said that

*The Clavecin Pianoforte was invented about twenty years ago at Freyberg in Saxony by M. Silbermann. From Saxony the invention penetrated to London, whence we obtain nearly all those that are sold in Paris.'

It has been hitherto accepted in Germany and elsewhere that Silbermann adopted Schroeter's idea, and made it practicable; employing in fact Schroeter's action, with some improvement. Welcker von Gontershausen. Der

Clavierbau (Frankfort, 1870), says, p. 171, 'The Silbermanns always used the action invented by Schroeter.' It is right, however, to warn the inquirer who may meet with Welcker's books, that they are not, either in text or engravings, always to be depended on.

We must now revert to Koenig's translation of Maffei's account of Cristofori's invention, published at Hamburg in 1725, an invention recorded and attributed exclusively to its author in Walther's *Musikalisches Lexicon* (Leipzig, 1732). It was thus early made public in Germany, and we think we shall now be able to show that Gottfried Silbermann followed Cristofori rather than Schroeter when he began to make pianofortes. He is said² to have made two as early as 1728 (the year after Mattheson's publication of Koenig's translation), and to have shown them³ to J. S. Bach, who condemned them for the weakness of their trebles and their heavy touch. This adverse judgment so much annoyed Silbermann that for some years he made, or at least showed, no more; but ultimately he gained Bach's unlimited praise, though it does not appear that the great composer ever had a pianoforte of his own (Spitta, *Bach*, Engl. tr. ii. 46). Some time after this he seems to have made an instrument for the Prince of Schwarzburg-Rudolstadt, which Schroeter happened to see in 1753; but, before that, two had been made, admitted to be copies of it, by Lenker of Rudolstadt, and had met with great praise. We may therefore assume the success of the original. In connexion with this it is not surprising that Frederick the Great (especially when we remember that he had in his service C. P. E. Bach, who owned a most beautiful Silbermann clavichord) should have acquired and placed in the music-room in the Stadtschloss at Potsdam, a pianoforte by that maker. (See SILBERMANN.) He is indeed said to have had more,⁴ but no musical anecdote is better known than the visit of J. S. Bach, and his eldest son, to Potsdam in May 1747; his warm and almost unceremonious reception by the King, and the extempore performances which took place, in which we may be sure that the pianoforte would not be neglected.

² Adlung, *Musica mechanica*, II. 116 f

* Perhaps in 1733 or 1736, when Bach was in Dresden (see *History of the Piano-forte*, by A. J. Hippling, p. 102).

known as the Old Bach) to try his Silbermann Fortepiano. The King, who was a great lover of music, was so pleased with the instrument that he made up his mind to buy them all. He got fifteen of them, and he had them sent to his palace in Potsdam. The King had them in different corners of the palace. Recent search has failed to discover these instruments. Fifteen was a large number for Fortepianos in 1780. The King's collection was not the only one. I remember that Fortel wrote at second hand, and an eye-witness of the event, although we have the statement of an long-after-the-fact source, "Silbermann" states that the King of Prussia had one piano-forte made for him, before Bach's visit, and the pleasing him here (Stresau, 1887) Annals that they were six in number, and that one more was acquired after Silbermann's death. Burney says that only one was made for the King, and that it was destroyed by fire. I visited in 1891 the writer examined the instruments, one of which was a Silbermann piano-forte, associated with Frederick, the Great, in Potsdam, and another, associated with Frederick, the

¹ Essai sur la musique ancienne et moderne.

pianos which were sent to Paris and highly thought of. We regret that we have no further historical evidence to offer about this action, so interesting as the foundation of the celebrated 'Deutsche Mechanik' of the Viennese grand pianos.

THE SQUARE PIANO.—Johannes Zumpe¹ is introduced by Burney, in Rees's *Cyclopædia* (1819, article 'Harpisichord'), as a German who had long worked for the harpsichord-maker Shudi, and was the first to construct small pianos of the shape and size of the virginal. (See *PLATE XL*. No. 1.) He goes on to say that there was such a demand for Zumpe's square pianos that there was scarcely a house in the kingdom where a keyed instrument had ever had admission but was supplied with one of them, and there was nearly as great a call for them in France as in England. Pohlmann, another German, fabricated for those who Zumpe was unable to supply. There are instruments by

nearly all square piano actions during forty years. The writer of the article 'Pianoforte' in the fourth edition of the *Encyclopædia Briannica* (1810) claims the invention of Zumpe's action for the Rev. William MASON, composer, poet and writer on church music, and the intimate friend of the poet Gray. Born in 1724, Mason died in 1797, and was therefore, inventor or not, a witness to the introduction of the pianoforte into England, and to its development to a certain grade—that namely of pure wooden construction. The *Encyclopædia* writer cannot be considered as an authority, although in this case he may have got his information on the point direct from Mason. Apart from such conjecture we have only sure evidence that Mason was one of Zumpe's early patrons.⁴

Zumpe's or Mason's action, drawn from the instrument of 1766, is shown in Fig. 5.

Square pianos were occasionally fitted with

FIG. 5

In the key, *c*, is the dexter jack, a wire with a leather stud on the top, known by the workmen as the 'old man's head.' This raises the hammer, *e*, or the flapper, *f*, is lifted by a whalebone jack, *g*, called the 'mopstick,' placed near the end of the key, and is brought back to its place by the whalebone spring, *h*; a third piece of whalebone, *i*, projecting from the end of the key, works in a groove, and serves exactly as in the clavichord to keep the key steady, there being no front key-pin. The two balance-rail key-pins shown in the drawing belong to two keys, the natural and sharp, and indicate the different balancing desiderata in all keyboards by the different positions of the flappers. The dampers were divided into treble and bass sections, raised bodily by two drawstops when not required, there being as yet no pedal.

both these makers still existing; the oldest Zumpe piano known is dated 1766,² was formerly Sir George Smart's, and is now owned by Messrs. Broadwood. No number has been found in it; yet it can hardly be the first of Zumpe's make, since he would not have been so bold as to begin with dividing his black notes and thus have eighteen keys in the octave, as he has in this case. The late Mr. Taphouse of Oxford had one with the usual chromatic scale of thirteen in the octave, inscribed 'Johannes Zumpe, Londini, Fecit 1767, Princes Street, Hanover Square,' and with XVIII stamped on the back of the name-board.³ The action which Zumpe invented or adopted was simple and facile, having reference to the published model of Schroeter in Marburg, 1764, in its artless escapement. It became the norm for

drawers for music, and were sometimes made to look like tables: the writer has seen a table piano, in style of furniture about 1780, but which bore on a label the name and date, Zumpe, 1760.⁵ This cannot be accepted as authentic, but the action is of so much interest that it must be described, as publication may

4 Mason agrees to have first possessed a pianoforte in 1755.
Writing from Hanover to the poet Gray he says: 'Oh, Mr. Gray! I
bought at Hamburg such a pianoforte and so cheap! It is a
little out of tune, but I shall have it mended. The playing on
the pianoforte stop is played, by the clearest mechanism imaginable,
—won't you buy my Kirkman's?' (meaning his harpsichord by
the name of Kirkman, who was a friend of Gray's).
of Mrs. Mason, says: 'You will tell me what to do with your
Zumpie, which has assumed me much here. If you would have it
sent to me, I shall be content to fix it, and when the time
and place shall be chosen, I will send it to you. The time
and place shall be chosen, I will send it to you. The time
is not quite of a piece with the treble, and the higher notes are somewhat
dry and sticky. The rest discourses very eloquent music.'
The pianoforte was sent to him in 1755.
bought his Zumpie then, or if not, in the course of the ensuing year,
1768. (The correspondence of Thomas Gray and William Mason,

London, 1863, pp. 33, 34 and 351.

The article, however, by Mr. A. J. Fipkins, the writer of this article, being possessed of a very remarkable title Vienneux piano, not dated or named, but judged by the style of ornamentations to be of about the date 1760. It has single strings from B. to G. and is of the type of the *clavier à deux claviers*, and is of the type of escapement, and a curious underlapping arrangement, with double-forked flannel. There is a knee-lever on the right, which, pressing down the dampers away from the strings, produces the effect of a *clavier à deux claviers*. The left-hand side of the left-hand side is another lever, which applies a bar with flannel from above, and so mutes the tone. There are quick naturals, and a *clavier à deux claviers* on the right, and a *clavier à deux claviers* on the left. It was sold to Mr. Fipkins by Mr. Fipkins, and was the property of Mr. Fipkins.

¹ It has been suggested that Zumpé may have been an altered name from Zumpt, to suit English habits of pronunciation, as the contemporary Shudi was corrupted from Tschudi, Kirkman from Kirchman, etc.

² Fétis began his musical studies on a Zumppe square piano of 1762.

§ Mr. Williamson of Guilford had, in 1879, a square piano by Zumpe & Buntebart, dated 1769. In 1776 the firm was Zumpe & Mayer—the instruments remaining the same, almost clavichords, with hammer actions, and nearly five octaves compass. G-F.

be the means of ultimately identifying its origin. The instrument belonged to Mr. Herbert Bowman, and the diagram is from a careful drawing by Mr. Robert Maitland.

FIG. 6.

Here the pad *d* upon the key *a*, is regulated in height by a screw, and when raised lifts the jack *g*, which is attached by a leather hinge to the hammer *e*. The damper is conical; but Mr. Maitland has probably indicated it correctly. The special feature is the fact of the vicious space for an escapement, being below the jack instead of above it, as in Zumppe's 'old man's head'.

In 1759 John Christian Bach arrived in London. According to Burney, who is, however, careless about chronological sequence, the first pianoforte seen in England was made in Rome by Father Wood, an English monk. It remained unique for several years until copied by an instrument-maker named Plenius. 'After Bach's arrival,' says Burney (Rees's *Cyclopædia*, 1819, article 'Harpisichord'), 'all the harpsichord-makers in this country tried their mechanical powers on pianofortes, but the first attempts were always on the large size.' From a previous sentence we learn that Backers, a harpsichord-maker of the second rank, constructed several pianofortes, 'but the tone, with all the delicacy of Schroeter's touch, lost the spirit of the harpsichord and gained nothing in sweetness.' Now Schroeter the pianist (not he who has been already mentioned) came to London in 1772.

James Shudi Broadwood, writing in the *Gentleman's Magazine* in 1812, attributes the invention of the grand piano in 1772 to a Dutchman, Americus Backers (accurately Backers¹); and again, in his *MS. Notes and Observations* (written 1838; printed for private circulation

who got it from Italy. It is so similar in many respects to the action of Stein that it is tempting to believe it to be by him.

B. J. 28.

A, Block in the key balance rail; B is the hammer rest; C is the key rest; D is a fixed block which catches the hammer butt, causing the hammer head to strike the string when the key is depressed—a set off; e is the key; f is the hammer butt; g is the hammer head covered with leather; h is a guide to keep the hammer from shifting laterally—made of wire; i is the damper arm; j, damper head; k, damper rest (along a wire); l, hinge of damper; m, pivot of the hammer butt. Not shown in the figure is a mute, actuated by a lever moved by the knee. There are only three moving parts—key, hammer, damper.

¹ Burney, in 1773, praised Backers's pianofortes. We have seen a name-board inscribed 'Americus Backers, Inventor at Foot, Emma Street, London, 1776.'

1862) he repeats this statement about Backers, but with a later date—about 1776. This probably alludes to the pianoforte of which the name-board is referred to in footnote 1, at that time still existing. The earlier date is nearer the mark, but the 'invention' must be interpreted as meaning a new action, an improvement on that of Cristofori (which may have been transmitted through Silbermann), or rather on Cristofori's first idea, by the contrivance of the regulating button and screw which rendered his direct action certain, and was ultimately known as the 'English action'—as Backers's was always called abroad. Henry Fowler Broadwood (1811-93), in a footnote to his father's statement in the 'MS. notes,' communicates the family tradition that his grandfather, John Broadwood, with his apprentice, Robert Stodart, assisted Backers to bring this action to perfection—a word which he may use unreservedly, as more than a hundred years have passed by and the direct 'English action' has not yet been superseded. It has met all the demands of advanced technique: Chopin preferred it to any other, whether made by Pleyel in Paris or Broadwood in London. The earliest diagram of it is that attached to Robert Stodart's patent of 1777, for a combined pianoforte and harpsichord, in which we first encounter the designation 'grand' applied to a pianoforte. We give it in Fig. 7, with a diagram of Messrs. Broadwood's grand action of 1880—the dampers omitted in both cases.

The earliest public notice of a pianoforte in England is in the year 1767, when a Covent Garden playbill² chronicles its first appearance in an orchestra, under date of May 16, as an accompanying instrument. After Act 1 of the 'Beggar's Opera' the bill announces that 'Miss Brickler will sing a favourite song from "Judith," accompanied by Mr. Dibdin, on a new instrument call'd Piano Forte.' As a solo instrument it appears to have been used for the first time in London on June 2, 1768, at the Thatched House, by John Christian Bach.³ In 1770, Mr. Burney, nephew of Dr. Burney, was appointed 'to the pianoforte' at Drury Lane. We do not know what pianos they were, or of whose make. They may have been by Backers, but to have had his new action we should have to put back Broadwood's earliest date.

During the period ending with 1770, the first division to be observed in the history of the pianoforte, there had been no composition devoted to and proper to the instrument; and there could have been little or no real pianoforte-playing. The new instrument was too unimportant as compared with the harpsichord, and in its then condition presented to the touch differences too essential, and difficulties too obstinate, to permit of the perception of those

² In Messrs. Broadwood's possession.
³ Pohl's *Haydn* in London.

remarkable attributes upon which the highest style in writing and treatment was ultimately to be based. The first real pianoforte music was published in London in 1773.¹ This was the famous op. 2 of Muzio CLEMENTI (three Sonatas), composed three years before, when he was only 18 years old. In these pieces the young composer divined the technique and instrumental treatment to which the pianoforte was responsive, and there founded the true school of pianoforte-playing.

We have dwelt thus long upon London, not

FIG. 7 (1777).

FIG. 8 (1880).

The differences in the two cases are in the proportions and forms of the parts; the principle is the same in both, the only addition in the present case—and that not essentially—being a strip of felt between the butt of the hammer to assist the promptness of the checking. The difference between that of Cristofori and the present case is evident and important. The second lever or underhammer is done away with, and the jack, *g*, now acts directly in a notch of the butt, *n*. The regulating button and screw controlling the escapement are at *pp*. Simplicity and security are combined.

merely because this is an English Dictionary, but because at this epoch London held the first place in harpsichord and pianoforte making. In the decade 1765-75 there can be no doubt about the importance given to the square piano by Zumpe, and the final start given to the grand piano by Backers; soon to be the means of success to BROADWOOD and to STODART, who had helped him in his invention. The great harpsichord-makers, JACOB KIRKMAN and BURKHARD SHUDT,⁴ had at this time brought their noble instruments to the highest

1 J. C. Bach published a sonata for the Battle of Roshach, 'pour le clavier ou forte-piano,' about 1757-58, not later than the latter

² Shudi had his name properly written, Tschudi, on the Potsdam mapsichords.

point of development and excellence ; and the harpsichord was now endowed with a storehouse of noble compositions, from which the pianoforte, having as yet none of its own, had for a time to borrow. We can understand how little these eminent makers, having realised fortune and done their work in life, would care for the new instrument and its improvement. But with J. C. Bach, Schroeter and Clementi on the one side, and Backers, Stodart and Broadwood on the other, the triumph of the piano was but a question of a few years. In the most conservative institution of the country, the King's Band, the harpsichord was replaced by the pianoforte in 1795. It would appear that Backers on his deathbed desired to commit the care of his invention to his friend, John Broadwood ; but Broadwood devoted his attention to the improvement or rather the reconstruction of the square piano, which he made public in 1780,³ and patented in 1783, allowing Stodart to go on with the grand piano with which he soon made considerable reputation. Excepting as to the action, Zumpe's instrument had been merely a clavichord with a second bridge. Broadwood boldly transferred the wrest-plank with its tuning-pins to the back of the case, and straightened the keys, which had hitherto been twisted hither and thither to accommodate an imperfect scale. Besides these radical improvements he substituted a brass damper, acting under the string, for the 'mopstick-damper' which had acted above it ; and for Zumpe's treble and bass 'hand-stops,' which did away with either half of the dampers when not required, he

patented (in 1783) two pedals, the one to remove the dampers altogether, the other to produce a pianissimo or sordine, by dropping a piece of cloth upon the strings near the curved bridge on the belly. Last of all in this patent he included a double sound-board and

sound-post, which he imagined to be the 'most essential part' of his improvements (see Patent No. 1379); but neither in his hands nor those of others has this notion of resonance box and cavity, in analogy to the violin and the guitar, been brought to practical value. Having accomplished this, and being stimulated by Stodart's success, and advised by Clementi, who then played on Broadwood's instruments, as to the deficiencies of the grand piano, Broadwood began to consider seriously the charge confided to him by Backers, and resolved to improve the grand instrument. The

* Messrs. Broadwood have a Square Piano of John Broadwood's
- later with that year.

difficulty in this case being the equalisation of the tension or drawing-power of the strings, he sought the advice of scientific men, and guided by Dr. Gray of the British Museum, and Cavallo, who calculated the tension by a monochord (publishing the result in 1788), Broadwood divided the bridge upon the sound-board, that is, made a separate bridge for the bass strings, an improvement which in the absence of a patent was at once adopted by all makers. As Stodart continued to use the undivided bridge (like a harpsichord) as late as 1788,¹ Broadwood's improvement can hardly have been introduced before that time.

Meantime the Zumpe square action was not to remain unimproved. Broadwood had already in 1780 transformed the instrument, and in 1786 the action met with improvement from John Geib, a workman (probably a German), said to have been in the employ of Longman & Broderip, the predecessors of Clementi & Collard in Cheapside. He took out a patent (London, No. 1571) for a new hopper and underhammer; both modifications of Cristofori's. He regulated his hopper in two ways, by piercing the blade with the 'set-off' or regulating screw already invented by Backers, and by turning this screw down upon the key. Both expedients are still in use. Tradition says that Longman & Broderip first used a modification of this patent, known by workmen as the 'grasshopper', with whom for a long while it was unpopular for its supposed susceptibility to atmospheric changes, and consequent need of constant attention.

Mozart, with all his genius and charm of cantilena, on the importance of which he dwelt by precept no less than by example, was yet not a pianoforte-player in the sense that Clementi was; his technique, as we know from Beethoven (through Czerny's report), was that of the harpsichord, to which in his early days he had been accustomed. Saust, who heard Mozart play, told the writer that Mozart had no remarkable execution on the instrument, and that he would not have compared, as a virtuoso, with Dussek for instance. And he must have met, at first, with very imperfect instruments, such as those by Spaeth, an organ-builder of Ratisbon, mentioned in his letters. Being at Augsburg in Oct. 1777, he was introduced to the pianos of Stein, also an organ-builder and a good musician. Stein's newly contrived pianoforte escapement appears to have charmed Mozart. In a letter to his father he refers to the evenness of its touch,² saying that the action

'never blocks, and never falls to sound—as is sometimes the case with other pianos. On the other hand, it never sounds too long, and the machine pressed by the knee (to act as a forte pedal) is prompt to raise the dampers, or, on discontinuing the pressure ever so little, is as prompt to let them down upon the strings again.'

C. F. Pohl made inquiries in Vienna as to the existence of any piano by Stein. There is not one, and Streicher, the pianoforte-maker, Stein's descendant, could give no information.⁴ In the Library of the Gesellschaft der Musikfreunde, of which Pohl was custodian, there is a small pamphlet entitled *Kurze Bemerkungen über das Spielen, Stimmen und Erhalten des Fortepiano, welcher von den Geschwister Stein in Wien verfertigt werden* (the 'Geschwister Stein' rectified in ink to 'welche von Nanette Streicher geborne Stein'), Vienna, 1801, from which a small engraving of Stein's escapement is here reproduced (Fig. 9).

FIG. 9.

It will be observed that this escapement differs from Cristofori's and the English action in the fact that the axis of the hammer changes its position with the rising of the key, the hopper (*auslöser*) *g* becoming a fixture at the back of the key. From this difference a radical change of touch took place; and an extreme lightness became the characteristic of the Viennese action as developed by Andreas STREICHER, Stein's son-in-law, who, in 1794, improved and finally established the great renown of the Viennese pianofortes.⁵ The illustration of Streicher's Viennese action (Fig. 10) is from the *Atlas zum Lehrbuch des Piano-*

FIG. 10.

¹ *a* is the damper. It must not be overlooked that Stein, who had not himself invented the knee-pedal, did, in 1789, invent a shifting foot pedal, by means of which the keyboard moved, and the three unions were reduced to a single string—*Spinnfaden*, little spine, as he named this 'une corda.'

² Letter, Oct. 17, 1777.

³ There is a Stein piano at the Brussels Conservatoire, the only one known to exist.

⁴ Stein's son seems to have founded the Vienna business, as shown in the following extract from a *Musikalische Monatschrift*, edited by F. X. Glöckl (Linz, Oct. 1803, p. 99): 'The clavier instruments which have been made by Andreas Stein at Vienna are to be properly understood as Fort Piano, meaning such as respond to every possible degree of strength or softness of tone when played with more or less pressure, or rather stroke of the fingers on the keys'; and 'the action in all parts is as simple as possible and at the same time extraordinarily durable. It is original throughout, that is, entirely the invention of the deceased organ-builder and instrument-maker, Stein of Augsburg (father of the present maker), who, with the rarest love of art, has devoted the greatest part of his active life to its completion.' This communication, from C. F. Pohl, is an historical proof of the pedigree of the Viennese action.

⁵ Walton, a London maker, had shifted the hammers, leaving the keyboard stationary, two years earlier, viz. 1787. (Patent No. 18073)

¹ This Grand Piano by Stodart was made for the Prince of Wales who gave it to Mr. Weidie, in whose house (at Hammer-smith) and family it remained in 1860, a really powerful instrument. The earliest known date of a Broadwood Grand is 1781. No. 46 was made in 1786. But Abraham Kirkman was in the running with a Grand in 1780, and Messrs Broadwood own a Square by Jacobus and Abraham Kirkmann, dated 1772, on the Zumpe model, with three stops, two dampers and a sounding.

² Much more like the harpsichord in fluency than the English escapement, which Mozart did not know then, it ever.

fortebaues by Blüthner and Gretschel, Leipzig, and shows the damping as well as the escapement.

Returning to Mozart, his Concert Grand in the Mozarteum at Salzburg, shown on *PLATE LIX.*, is a small 5-octave instrument, with black natural keys and white sharps, made by Anton Walter, who became in the end Mozart's favourite maker, as Schanz was Haydn's. According to Schonfeld (*Jahrbuch der Tonkunst von Wien und Prag*, 1796) the pianos of Schanz were weaker and sweeter than those of Walter; the touch also easier, and the keyfall still less. But both Walter and Schanz were mere copyists of Stein. They made square pianos also in the 'English' form, most likely imitations of the English instruments, which at that time had a very wide market.

Paris was supplied chiefly with English pianos until Sébastien Erard made, in 1777, the first French one, a square, copied, according to Fétis, from one of English make. For some years he appears to have continued on these lines; indeed it was not till after he had been driven to London, by the French Revolution, and had gone back again—according to the same authority, in 1796—that he accomplished the making of a grand piano. His London patent for such a piano was, however, dated 1794,¹ and its action is allied to an early German action (not Schroeter's model) improved upon by Stein. Erard appears to have been early bent upon constructing a grand action for himself, but while the perfecting of the Double Action harp remained his chief problem, the century went out with the English and Viennese actions pre-eminent; the radical differences of which, and the effect of those differences on pianoforte-playing, Hummel, in his Pianoforte School, subsequently explained from his point of view. Extension of compass had now set in. (See KEYBOARD.)

We have referred to the difficulty which presented itself to Cristofori at the outset of the pianoforte, owing to the necessity of stringing with thicker wire than before, to resist the blow of the hammers, and of strengthening the case to bear the greater tension of the thicker strings, which forced him to shift the hitch-pins from the sound-board to a separate strong rail. The gap between the wrest-plank and the sound-board, through which the hammers of the grand piano rose to strike the strings, was the first to be strengthened by metal, as a material at once stronger than wood and very economical of space. This was effected by steel arches, a contrivance which has remained in universal employment, but of the author of which there is no record. There are three in Stodart's grand of 1788 previously referred to; no doubt earlier examples exist, and to know their

date is desirable. Schroeter had suggested a transverse bar across the instrument; but it is not known if the experiment was made at that time. The first real use of metal longitudinal bracing was suggested in 1799 by Joseph Smith (Patent 2345, London); it was to be under the sound-board and to replace the wooden braces, and thus provide space for the introduction of a mechanically-played tambourine! But for the patent office we might not have known of Joseph Smith's invention, as nothing came of it. The first to use iron or steel in the form of bracing or tension bars placed above the strings—a method now universally adopted—was James Shudi Broadwood, who, in 1804, having carried the compass of the grand piano up to *f'''*, found that the wrest-plank was so much weakened by this extension that the treble sank in pitch more rapidly than the rest of the instrument. Accordingly in 1808, in three grand pianos, he applied steel tension-bars above the strings to remedy the inequality. This experiment is recorded in Messrs. Broadwood's work-books of that date, and the experiment was repeated in 1818, the metal bars being then four in number in place of three. In Messrs. Broadwood's International Exhibition book, 1862, p. 29, we learn that the mode of fixing these bars was at first defective, the wood giving way to the thrust of the bars. It is certain that they did not use tension bars at this time constantly, for the grand piano which was presented to Beethoven by James and Thomas Broadwood in 1817 had no tension bars, and, moreover, only went up to *c'''* (six octaves C-C).

Sébastien Erard's patent in 1808 (No. 3170) records an ingenious step towards a successful repetition action, viz. the 'double escapement': and an improvement which afterwards proved to be of great importance, viz. the upward bearing of the bridge next the tuning-pins by substituting for the pinned wooden bridge, metal studs or agraffes drilled with holes for the passage of the strings, and separately fixed for each note. The same patent includes what is now known as the 'célcste' piano pedal, in which the hammer strikes a piece of leather (now always felt) interposed between it and the strings. (See PEDAL.)

A very important step in the enlargement and improvement of the square piano appears to have been made in France by Petzold,² who in 1806, in the Paris Exhibition of the products of National Industry, exhibited a Square piano with an extended sound-board, an improvement at first not much noticed, though afterwards developed with great success, and probably independently, by the Collards and

¹ Erard's factory at Kensington, with trees and orchard, was called the 'tuner's hospital,' being remote from London.

² Guillaume Lebrecht Petzold, born, according to Fétis, in 1784, at Lichtenbarn, Saxony, was apprenticed to Wenzky, Dresden, in 1798, and worked for Walther Vienna, from 1803 to 1808. In 1806 he joined Pfeiffer in Paris, a connexion which lasted till 1814. According to Welcker, Petzold invented the crank lever action since much used by different makers.

Broadwoods of that time. Pape introduced the lever and notch principle of the English Grand action into the square piano action in 1817.

THE UPRIGHT PIANO.—In the very first years of the 19th century an entirely new form of pianoforte was invented, the 'Upright,' with the strings descending below the keyboard. There had been upright harpsichords (see CLAVICYTHERIUM and *PLATE XIX.*) and upright grands (the latter patented by John Landreth in 1787), but these were merely horizontal instruments turned up on end, with the necessary modification of the action to adapt it to the position. The oldest upright grand piano is at Brussels. It was made by Frederici of Gera, in Saxony, in 1745. This was the very time when Silbermann was successfully reproducing the Florentine Cristofori's pianofortes at Dresden, which were horizontal grand pianos. Frederici, however, made no use of Cristofori's action. Neither did he avail himself of a model of Schroeter's, said to be at that time known in Saxony. Victor Mahillon, who discovered the Frederici instrument and transferred it to the Museum at Brussels, derived the action from the German striking clocks, and with good reasons. Frederici is also credited with the invention of the square piano, an adaptation of the clavichord, in which Zumpe followed him.

The earliest mention of an upright grand piano in Messrs. Broadwood's books occurs in 1789, when one 'in a cabinet case' was sold. It was, however, by another maker. The first upright grand piano made and sent out by this firm was to the same customer, in 1799. In 1795 William Stodart had patented an upright grand pianoforte with a new mechanism, in the form of a bookcase.¹ He gained a considerable reputation by, and sale for, this instrument. In 1800 Isaac Hawkins patented (No. 2446) a perpendicular pianoforte from 3 to 4 feet in height, descending to within a few inches of the floor, to give the instrument a more 'convenient and elegant shape than any heretofore made.' The bold step of inverting the wrest-plank or tuning-pin block, which in the upright grand was at the bottom near the keys, but in the cabinet was at the top, was due to Isaac Hawkins, as in his specification we find his wrest-plank fixed diagonally in the sides of the case, the bass end near the top, 6 feet 3 inches high, to preserve length for the bass strings, the treble end lower 4 feet 3 inches from the bottom, leaving an angular space above which might be utilised for bookshelves. His patent (taken out for his son, John Isaac Hawkins, the inventor,² who was at that time living at Philadelphia, U.S.A.) includes two other important ideas: the use of coiled strings for the

bass, and a *sostinente*, obtained by reiteration of hammers set in motion by a roller. Hawkins's piano, called a 'portable grand,' was played upon in public at the Franklin Institute, Philadelphia, in 1802. In 1802 Thomas Loud (Patent No. 2591) gave a diagonal shape to this upright piano by sloping the strings in an angular direction, portability being the 'leading intention and feature.' James Broadwood claims³ to have given a sketch for a cabinet piano in 1804 to William Southwell, who in 1807 patented (No. 3029) a damper action to the instrument there called by that name.⁴ From this tall instrument the lower upright or 'Cottage' piano followed almost immediately. Robert WORNUM 'the younger' patented (No. 3419) one diagonally strung in 1811, and in 1813 made a vertical one, naming it 'Harmonic.' In the year 1815 Ignace Pleyel, founder of the house of Pleyel, Wolff et Cie, employed Henry PAPE, an ingenious mechanician, to organise the introduction of the construction of these instruments in Paris,⁵ from which beginning arose the important manufacture of French cottage pianos. William Frederick COLLARD, who about 1800 had with Muzio Clementi taken up the business of Longman & Broderip, in 1811 essayed an oblique pianoforte (Patent No. 3481) by turning a square one 'upwards on its side.' William Southwell had patented a square thus turned up in 1798. Nearly all improvements in the pianoforte have been of slow and patient elaboration, the introduction of metal in framing, and Erard's special action being prominent examples. Wornum's excellent cottage action was no exception to this general experience, for he did not complete it till 1828 (Patent No. 5678). Camille Pleyel recognised its value, and through his introduction it became generally used in France, so that at last it was known in England as the 'French' action. But Wornum's merit as the inventor of this 'crank' action (the first idea of which is in the 'Upright Grand' of Landreth, patented 1787) needs now no vindication, and Southwell's 'sticker' action, long the favourite in England, gave way before it.

His piccolo piano, a low upright pianoforte, was introduced in 1829. The novelty consisted first in its small size, and then in the application of a new action invented by Robert Wornum and patented three years before. Though the strings were placed vertically, the height of the piccolo piano did not exceed 40 inches. The facile touch gained by the new mechanism soon attracted the attention of the musical public, and with its long-since-proved durability has made it a favourite model of action for manufacturers both here and abroad.

¹ William Southwell of Dublin patented an upright piano with six octaves on Oct. 18, 1794. *W. H. G. P.*

³ *Some Notes*, etc., p. 9.

⁴ He had patented an 'Irish damper action' in 1794, and made a cabinet piano as early as 1802. *W. H. G. P.*

⁵ Pape, *Sur les inventions*, etc.; Paris, 1845.

The 'piccolo' was finished to stand out in the room away from the wall; its original price was 36 guineas.

THE METAL FRAME.—We may now look back a hundred years, in the first half of which the pianoforte had really no independent existence as a keyed instrument; but between 1770 and 1820 we find the grand piano complete so far as its construction in wood permitted, and a constellation of remarkable players that included Clementi and Dussek, Cramer and Field, Hummel and Ries. Weber in Germany had initiated the Romantic school in pianoforte music; Kalkbrenner in Paris was forwarding technical discipline; and, above all, Beethoven, whose early eminence as a pianist has been to a large extent overshadowed by his sublime genius as a composer, was in the latter years of this epoch engaged in completing that series of masterpieces for the pianoforte that have not only enabled it to rival the orchestra in the wealth of its possessions, but have by their own immortality ensured it an existence as a musical instrument which no change of fashion can affect. The further development of technique, essential to the interpretation of Beethoven, attained perfection between 1820 and 1850, and was based upon conditions rendered possible by the introduction of iron as an essential constituent in the framing of grand pianos, and in a certain degree of that of the other kinds also. Gradation of power was the great desideratum of the player; and the possibilities of this were intimately connected with the freedom of the wrist, which had previously been disallowed, and with the discovery, made almost instinctively, that to give elasticity to the fingers they should be raised in order to descend, and not be drawn inwards as was the case with the Bach touch essential to the clavichord. (See **PIANOFORTE-PLAYING**.) This change of practice involved a blow by the hammer which the indifferent Berlin wire of that time could not stand. Thicker wire produced greater strain on the framing which the wooden cases were not strong enough to resist. The use also of two metals in the stringing, brass and iron, led to unequal changes in the tuning, and another problem, 'compensation,' received even more attention than 'resistance' had done. To solve this a young Scotch tuner, named Allen, employed at Stodart's, set himself; and soon succeeded in producing a complete and satisfactory upper framing of hollow tubes in combination with plates of iron and brass, bound together by stout wooden crossbars, the whole intended to bear the pull of the strings, and to meet, by give-and-take, the variations in the length of the wires, due to alteration of temperature. The patent (No. 4431) was taken out by William Allen and James Thom (who supplied the necessary technical knowledge of pianoforte-making); it is dated Jan. 15, 1820,

and the exclusive right to use it was acquired by Messrs. Stodart to the great advantage of their business. The accompanying diagram of a Stodart pianoforte with Allen's framing shows

the aim and completeness of this remarkable invention, from the inventor's point of view.

But tension soon asserted itself as more important than compensation, and a rigid counterpoise to it by means of metal still presented itself as the problem for solution to James Broadwood, who had, years before, initiated the idea; and we learn from Henry

Fowler Broadwood (*The Times*, May 10, 1851) that Samuel Herve, a workman employed by his father, invented in 1821 the fixed string-plate, in

FIG. 11.

that year first applied to a square piano of Broadwood's. From 1822-27 James Broadwood tried various combinations of the string-plate and iron bars, and in the latter year permanently adopted a system of solid metal bracing (Patent No. 5485). The iron bars, not having been patented, had been adopted by other makers, and in 1825 Pierre Erard had in his turn patented a means of fixing the iron bars to the wooden braces beneath the sound-board by bolts passing through holes cut in the sound-board (Patent No. 5065). He had patented a system of fixed iron bars in Paris in 1822. He could not do so in London, being barred by Stodart's (Thom and Allen's) patent. Stodart refrained¹ from opposing the Broadwoods when James Shudi Broadwood took out his patent for string-plate and bars in 1827. There is no mention of a string-plate in this patent, but a proposition is made to strengthen the case by plating it with sheet iron, which, however, came to nothing.

William Allen, who had invented Stodart's compensating framing, did not rest satisfied with his first success, but invented, and in 1831 patented (No. 6140), a cast-iron frame to combine string-plate, iron bars and wrest-plank in one casting. Wooden bars were let into the wrest-plank to receive the ordinary tuning-pins, which would not conveniently work in metal. This important invention did not find the acceptance which it deserved, and the compound metal and wood framing continued to be preferred in Europe under the idea that it was

¹ The writer had this information from Mr. Joseph Ries, who died in 1892.

beneficial to the tone. But Allen's proposal of one casting had been anticipated in America by Alpheus Babcock of Boston, Mass., who in 1825 patented a cast-iron frame for a square piano. The object of this frame, like that of Allen's first patent, was compensation. It failed, but Babcock's single casting laid the foundation of a system of construction which has been largely and successfully developed in America. Besides Allen and Babcock, who in those days of imperfect communication are hardly likely to have known of each other's attempts,¹ Conrad Meyer of Philadelphia claims to have invented the metal frame in a single casting in 1832. Whether Meyer was aware of the previous efforts of Allen and Babcock or not, he has the merit of having made a good square piano on this plan of construction in 1833. The frame of it is represented below (Fig. 12). This instrument, which the writer saw and tried at Paris in 1878, was exhibited when first made at the Franklin Institute, Philadelphia, and was sold; but Messrs. Meyer bought it back in 1867, and exhibited it in the Centennial Exhibition in 1876, and again, as mentioned, in the Universal Exhibition of Paris in 1878. Jonas CHICKERING of Boston in 1837 improved the single casting by including in it the pin-bridge and damper socket-rail, a construction which he patented in 1840. Chickering subsequently devised a complete frame for grand pianos in one casting, and exhibited two so made at the Great Exhibition of 1851. On the same occasion Lichtenthal of St. Petersburg exhibited two grand pianos 'overstrung,' that is, with the longest bass spun-strings² stretched obliquely over the longest unspun ones, a method which is now very well known and extensively adopted, but the advantages of which were formerly impaired by inequality in the scale. The invention of overstringing has had more than one claimant, amongst others the ingenious Henry Pape. We have found no earlier date for it than 1835, when Theobald BOEHM, well known in connexion with the flute, contrived an overstrung square and an overstrung cottage piano, and had them made in London by Gerock of Cornhill. In the next year, 1836, John Godwin patented (No. 7021) overstrung square and cottage pianos. Whether he acquired Boehm's invention or not, we do not know.

Great use of iron was made by Dr. Steward

¹ See Ripkin's *History of the Pianoforte*, p. 18.

² 'Spun, or over-spun, strings' are surrounded with an external coil of fine wire, to add to their weight and power of tone.

of Handsworth, near Birmingham, in a novel upright pianoforte which he called the 'Euphonicon,' and brought out in London in 1844. His patent (No. 9023), which is dated July 1841, includes a complete metal framing, and separate sound-boards, three in number. The instruments were of elegant appearance, and the long strings, in harp-like form, were exposed to view.³ Though unsuccessful, the Euphonicon should not be forgotten. There is one in the Victoria and Albert Museum, in the musical instrument collection.

To return to America. In 1853 Jonas Chickering combined the overstringing with a metal frame in one casting, in a square piano which he did not live to see completed, but which was finished by his sons. This combination was taken up by Messrs. Steinway & Sons of New York, and further improved in 1859 by the addition of an 'agraffe' (or metal stud) bridge; they then, by dividing the overstringing into two crossings, produced a double overstrung scale. In the same year this firm patented in America a grand piano with fan-shaped overstrung scale in one casting, a diagram of which will show the arrangement of ironwork and bridges (Fig. 13). This system

FIG. 12.

FIG. 13.

was adopted by some of the foremost makers in Germany.

Henry Fowler Broadwood's special concert-grand iron framing, with diagonal tension-bar and transverse suspension-bar (Fig. 14), was invented by him in 1847, and used by the firm until 1895. The barless frame⁴ was then

³ In the harp shape Dr. Steward had been anticipated by Muzard of Leuvenne. We have seen a piano so made by him in 1819.

⁴ Invented by Henry John Shudi Broadwood, son of H. F. Broadwood.

adopted by the Broadwood firm. Henry Fowler Broadwood objected to single castings, preferring a combination of cast and wrought iron, wedged up at the points of abutment, into a thoroughly solid structure. His plan gets rid of some of the iron bars, which he believed to be more or less inimical to carrying and equality of tone. The difference between this and his father's or Erard's scale is great; and it only approaches the American—which it preceded in grand pianos—in the fact that the framing is independent of the wooden structure of the instrument. A comparison of the diagram (Fig. 14) with Steinway's (Fig. 13) makes this difference obvious (the diagonal bar is lettered *u*, the suspension-bar *t*).

FIG. 14

The modern pianoforte frame¹ is made of cast iron or steel with or without an arrangement of intermediate struts. Its purpose is to take the major portion of the load due to the tension of the strings which are attached to it by hitch pins. It occupies a position overlaying the sound-board and WREST-PLANK (*q.v.*).

In its present form it developed from a flat string plate which was made of cast or wrought iron attached by screws to the wooden framework of a grand or upright piano. Formerly the string plate and the wrest-plank were the two limits of the string length, the whole of the string tension being taken up by the wooden framework or bracing of the piano, which was therefore made extremely heavy to withstand this load. In modern pianos the metal frame is arranged to bear against the wrest-plank to take the load due to the tension on the wrest-pins, whilst the strings are attached to the frame only at one end. The frame is in its

turn bolted round its edge to the wooden bracings of the pianoforte.

The object of the intermediate bars on the

FIG. 15.

frame which run directly over the strings is for extra strength. These intermediate bars

FIG. 16.

may be entirely dispensed with by careful design of the side members of the frame, as has been carried out in the Broadwood Barless

¹ Information from Mr. L. A. Broadwood.

Further improvement of the square piano, in the application of metal to resist tension, etc., followed closely upon that of the grand; and in America the square outstripped the grand by being first experimented on for the iron framing, the cross stringing, etc., which, through the talent and energy of the Meyers, Chickering and Steinways, have given a distinctive character to the American manufacture. The Americans brought their squares almost to the size and power of their grands; and with the same tendency as in Europe, to their being superseded entirely by the smaller grands and uprights.

EXPERIMENTS AND MODIFICATIONS.—Beyond the broad summary of inventions in instrument and action which we have sketched, it is impracticable in our space to go further into detail; it would, moreover, be a task of great difficulty, owing to the multiplicity of facts needing to be sifted, and the fact that a writer on this subject must always be influenced by education in taste and use. We may, however, be permitted to refer to the services of James Stewart (particularly in connexion with Messrs. Collard's pianos) and to Henry Pape of Paris, who tried more ingenious experiments in pianofortes than any other maker, although the majority of them are of doubtful utility. It is to him that we owe the use of felt for hammers (much improved, however, by H. F. Broadwood, who first substituted sheep's wool for Pape's rabbit's hair). William Stodart invented a continuous bridge for upward bearing in 1822; and the 'harmonic bar' in the treble, as a bar of alternating pressure has been called, from the peculiar timbre obtained by its use,¹ was the invention of Pierre Erard about 1838, according to Dr. Paul. The main object of this bar was to consolidate the wrest-plank in the treble, a screw tapped into the plank and drawing it upwards alternating with a screw tapped in the bar pressing it downwards. In 1843 A. BORD of Paris invented a different bar independent of the wrest-plank, which served as a bridge of upward bearing and abolished the treble wrest-plank bridge. From its simplicity and cheapness this has found favour, with some modifications, in Germany (where it is known as the *Capo tasto*, or *d' astro*, bar) and elsewhere.² There was a revival of W. F. Collard's idea, patented in 1821, of utilising the back draught of the wires, between the belly bridge and the hitch-pins, for sympathetic vibration, by means of what he called (Patent No. 4542) a 'bridge of reverberation.' This reappears, in idea, in Steinway's 'Duplex Scale'; but Blüthner of Leipzig has gone further in employing independent sympathetic strings of half length in his 'Aliquot' piano.

By this he adds the octave harmonic throughout three octaves, and thus produces something of the shifting soft pedal timbre; the *forte* or damper pedal in the ordinary pianoforte is, however, an incomparably more efficient flood-gate to these sympathetic or, more properly, Æolian reinforcements. In the 20th century we have the Emanuel MOORE Duplex Coupler, a piano with an ingenious double keyboard (the upper keyboard an octave higher than the lower one) and various other contrivances, which, however, change not only the construction but the technique of performance so fundamentally as to place it in a category by itself.

Another invention we have to mention concerns the pedals, and is due to M. Montal, a blind Parisian pianoforte-maker, who, in 1862, exhibited in London (1) a '*pédale d'expression*,' diminishing the range of the hammers instead of shifting them, an expedient now employed by American and German makers, and (2) a '*pédale de prolongement*,' a third pedal, by using which a note or notes pressed down before the pedal is applied may be prolonged after the fingers have quitted the keys.³ This pedal has been of late years reintroduced in Paris, Stuttgart and New York. Reference to PEDAL will show the radical change that took place between 1830 and 1850 in 'instrumenting' the pianoforte, giving it what we may call colour of tone, divined by Beethoven, and perfected by Chopin and Liszt. By these parallel advances in technique and instrument the masterpieces composed for the pianoforte by Beethoven have since 1850 found their fullest exposition.

Among structural changes the Gladiator sound-board should be mentioned. It was invented by Albert Schultz (late director of the piano factory of Ritnmüller & Sons of Göttingen). Here are two solid slabs of wood, with grain of opposed direction to give the required tension; with a thinning round the edge to facilitate promptness of speech. We are still feeling our way towards an accurate comprehension and statement of reinforcement and resonance.

The great extension of the modern compass acts unfavourably on the instrument and increases the inconvenience of the grand piano as an article of furniture in these days of limited space. From *A*, to *c''''*, seven octaves and a minor third, is usual. Bosendorfer of Vienna introduced an extreme compass of eight octaves (*F*, *e''''*). The classical repertory, including Schumann and Chopin, requires no more than six octaves and a fourth.

Attention, too, has been given to the touch, to make it less tiring for the pianist; especially since Anton Rubinstein (about 1886) went through the feat (for which he travelled without a note

¹ In the original application of this invention a third screw pressed under the bridge.

² The *Capo tasto* bar recalls Schroeter's 'Widerstandseisen,' but was not taken from it.

³ From the report of M. Fétis on the Paris Exhibition of 1856, it appears that the first idea of this pedal had occurred to Xavier Boisselot of Marseilles, who had shown in the 'Exposition Nationale,' 1844, a piano 'à sons continus et volants.'

of music) of seven historical concerts, played consecutively in the great music centres of Europe, and for which a light touch was indispensable, even to this stupendous player.

In the competition for power the pianoforte makers had been gradually increasing the weight of touch to be overcome by the finger, until to obtain the lightest pianissimo from middle C at the front edge of the key from 3 to 4 ounces was a not uncommon weight. The Broadwood piano used by Chopin in 1848 (for his recitals in London and Manchester), which remains unaltered, shows the resistance he required: the middle C stands at $2\frac{1}{2}$ ounces, and to that weight pianoforte-makers have returned; regarding $2\frac{1}{2}$ ounces for the front of the key of middle C, for the faintest pianissimo, as permissible: but $2\frac{1}{2}$ is preferable, owing to the difference in the weight of the hammer; the touch for the bass will always be rather heavier—the treble, rather lighter.

The balance of the black keys is adjusted to the weight of the white; but as the player attacks the key farther back, the balance is shortened, and the weight proportionately increased.

The calculation of the power expended by a pianist in a performance of what is called a recital, extending over an hour and a half of almost continuous playing, would show an astonishing aggregate.

The increase of tension, which in 1862 had been determined at most as some sixteen tons for a concert grand, has reached a record in recent years of thirty tons. The result is the gain of a *sostenuto* unknown to Beethoven or Schumann or Chopin, with an improved standing in tune in well-made instruments due to the intensified elasticity of the wire and in overstrung models the equipoise of stress conditioned by the more favourable position of the bass and treble string departments respectively.

A table of dates, down to the middle of the 19th century, will be found a useful conclusion to this article. The various experiments in detail of more recent date are too numerous for record.

1806	Piano Forte. Name of a keyed instrument at Modena.
1810	A piano of four octaves, no dampers, small hammers.
1709	Marius submitted models of pianofortes to the Academy in Paris.
1718	Schroeter submitted two models of pianoforte actions to the court at Dresden.
1726	Gotfried Silbermann, of Freiberg, showed two pianofortes to John Sebastian Bach.
1731	Cristofori died.
1738	Schroeter wrote to Mizler, claiming to have invented the pianoforte.
1739	An upright grand pianoforte invented and made by Domenico del Mela da Capriano, with a special action, not copied from Cristofori, though with some similarity in the butt, and not at all like Frederici's, which originated the 'sticker' principle.
1745	Christian Ernst Frederici, of Gera, invented upright grand.
1747	J. S. Bach played on a Silbermann pianoforte before Frederick the Great.
1753	Gotfried Silbermann died.
1753-80	Frederici, of Gera, made the first square pianoforte.

¹ Reported to A. J. Hipkins by Signor Cesare Ponchielli.

1759	John Christian Bach came to London.
1762	Date of oldest Zumppe square piano known. ³
1764	Schroeter published in Leipzig's work his claim to have invented the pianoforte.
1767	A 'new instrument called Piano Forte' announced at Covent Garden.
1768	J. C. Bach played a solo on the pianoforte in London.
1770	Musio Clementi composed pianoforte music.
1771	Backers exhibited his invention, 'original Forte Piano,' at the Theatre and House in London. ⁴
1772	The pianist J. S. Schroeter (not the organist) came to London.
1772	Backers about this time invented the English direct action.
1773	A grand piano, by Americus Backers, was at Pistoia in 1897, where it was wrongly described as dated '1713.'
1774	John Broadwood made a Zumppe model square piano. ⁴
1776	Kirkman's first record of a square piano (see Vol. III. p. 27).
1777	Mozart played on Stein's pianofortes at Augsburg.
1777	Stodart adopted the name 'grand' pianoforte.
1777	Seb. Erard made the first square piano in France.
1780	John Broadwood reconstructed the square piano.
1780	Kirkman's record of a grand piano (see Vol. III. p. 27).
1782	Mozart and Clementi played upon the pianoforte before the Emperor at Vienna.
1783	John Broadwood patented loud and soft pedals.
1786	Gelb patented the square 'grasshopper' action.
1787	John Landreth patented the 'upright' grand piano.
1787	Watson patented a soft pedal and shifting hammers.
1788	John Broadwood about this time made a new scale grand piano, dividing the curved bridge.
1789	Stein, of Augsburg, invented a soft pedal with shifting action.
1790	John Broadwood made the first piano with five and a half octaves.
1794	William Southwell invented the 'Irish' damper.
1794	Andreas Streicher perfected the Viennese grand action.
1794	John Broadwood made the first piano with six octaves.
1796	Seb. Erard made his first grand piano in Paris.
1798	Wm. Southwell patented a square piano turned up.
1800	Clementi, in partnership with Collard, began about this time to make pianos.
1800	Isaac Hawkins patented an upright pianoforte for his son Dr. John Isaac Hawkins, of Bordertown, New Jersey, U.S.A.
1802	Thomas Loud patented a diagonal upright pianoforte.
1807	William Southwell patented the cabinet pianoforte.
1808	James Broadwood first applied iron bars to a grand piano.
1808	Seb. Erard patented the upward bearing and the celeste pedal.
1811	Robert Wornum made the first cottage pianoforte.
1820	William Allen invented and brought out at Stodart's a compensating grand piano with metal tubes and plates.
1821	Seb. Erard patented his double escapement action.
1821	S. Herve invented the fixed string-plate (brought out at Broadwood's).
1822	James Broadwood adapted iron bars to the string-plate.
1824	Listz came out in Paris on an Erard grand piano.
1825	Seven octaves, C-C.
1825	Erard patented bolts to iron bars.
1825	Alphus Babcock patented in America a cast-iron frame square piano.
1826	R. Wornum patented the crank action, improved 1828.
1827	James Broadwood patented iron bars and string-plate combined in a grand piano.
1827	James Stewart patented stringing without 'eyes' to the strings (in Moser, Collard's patents).
1831	W. Allen patented in London a complete cast-iron frame piano.
1833	Conrad Meyer patented in America a cast-iron frame square piano.
1835	Boehm had overstrung pianos made in London.
1838	F. Erard introduced the 'Harmonic bar.'
1840	Jonas Chickering patented in America a cast-iron frame with damper socket (square piano).
1843	A. Bord, of Paris, invented the 'Capo tasto' bar.
1847	H. F. Broadwood invented the 'iron' grand pianoforte.
1851	Jonas Chickering exhibited in London grand pianos with frames in one casting.
1851	Lichtenthal, of St. Petersburg, exhibited in London overstrung grand pianos.
1853	Chickering & Son combined cast frame and over-stringing in a square piano.
1854	H. Wittel, of Paris, invented an iron wrist-plank with mechanical screw-pins.
1859	Steinway & Sons patented in America a cast frame overstrung grand piano, and double overstrung square piano.
1863	Montal, of Paris, exhibited in London a third pedal for prolonging sounds after the fingers have quitted the keys.

A. J. H., rev. with addns. from the author's notes supplied by E. J. H., information from Mr. L. A. Broadwood and others as mentioned in footnotes.

PIANOFORTE-PLAYING. The art of playing the pianoforte, as distinguished from the earlier instruments with keys and strings,

³ Fétis says that he began his studies on a Zumppe FF. of this date (*Report of the Grand Exhibition, 1851*).

1. PIANO (Anton Walter, c. 1780): formerly W. A. Mozart's.
 2. PIANO (J. Broadwood & Sons, 1817): formerly L. v. Beethoven's.
 3. PIANO (J. Broadwood & Sons, 1848): used by F. Chopin.
1. The Mozarteum, Salzburg. 2. National Museum, Budapest. 3. Messrs. Broadwood & Sons, Ltd., London.

consisted largely at first in the task of uniting the special characteristics of the two older instruments. On the clavichord, the notes could be varied in force and emphasis by the pressure of the finger, the parts of a fugue could be clearly differentiated, and deep expression could be conveyed. But the 'disembodied spirit,' to which its tone has often been compared, was incapable of speaking to more than two or three hearers at once, so exceedingly attenuated was the tone of the instrument; and in very staccato passages there is little of the sparkling brilliance of the harpsichord. On the harpsichord the most perfect staccato was easily obtained, and as the touch was unalterable, there was absolute evenness of tone as long as no mechanical change was made. All dynamic changes must be made, as in playing the organ, by the application of some mechanical device, never by the finger. Harpsichord players, accustomed to use the swell pedal in order to increase the sound, would naturally and readily make use of the far easier resources that were provided in the piano, with its infinitely varying degrees of tone. The possibility of getting increase of tone by pressure of the finger, a pressure that could be applied to any single note or chord, made it no longer necessary to overload the music with those ornaments by which the older composers had obtained a kind of spurious emphasis from the harpsichord. Thus the pattern of the melodies naturally became simpler, and more was left to the player in the way of bringing out the salient features of the melody. C. P. E. Bach led the readers of his *Versuch über die wahre Art das Clavier zu spielen* to aim at the cultivation of a real cantabile style, and seems to have been the first to speak of 'singing' on the keyed instrument. In his works we find innumerable instances of a melody played simultaneously with its subordinate accompaniment, a musical effect which was only possible on the harpsichord when two manuals were employed. The pianoforte soon began to acquire special ornaments of its own; in Haydn's famous variations in F minor, the arpeggio figure in the major part of the theme implies gradation of tone as an essential feature, and this is one of the earliest compositions which could not be played with any degree of success on the harpsichord. On the other hand, Mozart's fantasia in C minor includes no effect that cannot be realised on the earlier instrument, and even the earliest sonatas of Beethoven can be performed satisfactorily on the harpsichord.

In the earliest days of technique, when only the three long fingers of the hand were usually employed (see FINGERING, Vol. II. p. 236), a gliding touch was aimed at, and this gentle pressure suited the clavichord perfectly. With the development of the harpsichord it became necessary to acquire a crisper touch, for all

notes, even those played with *legato* effect, must be taken up sharply, or the quill would not be in a position to pluck its string again. Sebastian Bach's fingers are said to have 'bent over the keyboard in such a manner that they stood with their points in a downward, vertical line, each finger at every moment ready for action. In taking a finger off a key, he drew it gently inwards, only moving the end joint.' The thumb was, as it were, set at liberty, so that it was now recognised as a practical member of the hand, instead of a useless appendage, which it seems to have been considered in earlier ages. It could be used in the natural position, but it was forbidden to pass it under the other fingers unless it was absolutely necessary. At the same time, great laxity was permitted in part-playing, where the interweaving of the different voices often makes it necessary not only for the thumb, but for the other fingers, to pass over or under the rest.

In the early pianos, the cantabile touch which again seemed desirable was best obtained by a smooth progression, such as was insisted on by Emanuel Bach, who allowed the passage of the second finger over the third. Both Cramer and Clementi devoted their main attention, so far as regarded technique, to the attainment of perfect evenness in all the fingers, substituting, in fact, a living for a mechanical equality of tone. In Clementi's famous 'Gradus' there is hardly any other point striven after than complete equality of tone, combined with velocity, and the power of giving due importance to the melody as distinguished from the accompaniment. The author's boldness of invention is in structural form rather than technical innovation, and it was enough for him that the player should possess ten exactly evenly balanced fingers, and should be able to give due emphasis to prominent parts. Of course the difficulty of many of the studies is considerable, but a player, perfectly equipped in the school of Clementi, would often find himself at a loss in playing Beethoven, and would have to acquire new powers for an adequate presentation of the music of Schumann or Chopin. It was Clementi who started that system of strengthening the weak fingers of the hand by holding down some of the fingers while playing repeated notes with the others. From Kalkbrenner's merely mechanical plan of keeping down four adjacent notes while one finger is actively exercised, to some of Brahms's 51 'Übungen,' this system has never failed to commend itself to students of technique; but there is a danger in its use, for the force necessary to work the weak finger may be got by a kind of muscular reaction from the fingers that are pressing down the held notes, rather than from the weak finger itself; a far better form of the exercise is to lay the fingers in repose upon the keys, and, while the single finger is playing its repeated

notes, to watch that the other fingers never leave their keys, and never depress them.

The divergence of styles between the 'Vienna' school (that of Mozart) and that of Clementi was in part caused by the difference in the make of the pianos employed. The Viennese action had a remarkably easy mechanism, and was best suited to a rapid style and to the execution of arpeggios. The 'English' pianos preferred by Clementi—to whom many of the most important improvements in them were due—were more sonorous in tone, the hammer had a deeper fall, and it was altogether better adapted to the larger forms of music and to brilliant execution.

Neither in Cramer nor Clementi is great force required; the hand is never raised to an excessive height, or brought down upon the keys with any such power as was required in the subsequent period of technique. The use of the sustaining pedal, too, was comparatively rare with them, and they and their contemporaries were fully conscious of the loss of clearness caused by its excessive use. They, like all the older masters, were very particular as to the position of the performer's body. The old German writers, such as C. P. E. Bach, Marpurg, Türk and others, recommended the player to sit exactly in the middle of the keyboard. Dussek inclined a little to the left, because of the difficulty of giving action and power to the left hand; while Kalkbrenner, having regard to the extension of the instrument in an upward direction, took up his seat a little to the right of the middle. In the matter of the position of the hand there were many different theories, even in the earlier days; Clementi was of opinion that the upper part of the hand, from the knuckles to the wrist, should present such a surface that a piece of money might be placed there, to prove that the fingers alone were engaged in the execution. Dussek directs that the hands should lean rather towards the thumbs, so that the third and fourth fingers may not be placed too much sideways; and Hummel says they should lean rather to the outside, so as to give the thumb more liberty on the black keys when required. Kalkbrenner, again, was an advocate of playing octaves or sixths with a loose wrist, whilst Moscheles kept the forearm and wrist quite stiff, in order to gain lightness and facility. Fétis, in his introduction to the *Méthode des méthodes*, points out the danger of a tired wrist becoming so enfeebled as to cause the hand to form an angle with the arm, and thus to clog the articulations of the fingers. Hummel recommended the hand to be placed so that the thumb and little finger formed a line parallel to that of the keyboard, and stated that Mozart held his hands in this way. All these authorities agree as to the general rule that the elbows should be slightly in advance of the body, and

that from the elbow to the second joint of the fingers should be a level, horizontal line.

In regard to fingering, the masters of the first period were divided as to whether fingering should or should not be what is called 'symmetrical'; that is to say, whether a fingering adopted for a figure ascending on each degree of the scale should be repeated exactly all the way up, regardless of black notes, or whether the rule that the thumb should never be placed on black notes was to hold good. Dussek was a great stickler for this rule, which of course increases the difficulty of making certain of the repetitions, as against the freer way of putting the same fingers on the corresponding notes wherever they occur. Dussek even went so far as to direct that in certain passages where the same figure is repeated in a higher octave than that in which it started, a different fingering should be employed, instead of devising some method which should at least allow the symmetrical use of the same fingers on the same notes.

The Vienna school, with its strong tendency towards superficiality, reached its climax in Hummel, who, deriving his method from Mozart, made all kinds of technical discoveries (see Vol. II. pp. 681-2), some of which were considered hardly legitimate by the more conservative teachers of his time. His method, or 'Pianoforte School,' was in some sort the basis of that of Czerny, whose system was calculated to give the pupil the utmost velocity, smoothness and brilliance; Moscheles carried on technique to a point slightly more advanced, but both he and Hummel can be disregarded by the student of modern pianoforte-playing.

With the ever-increasing admiration for the music of Beethoven, the aims of the technical experts were turned in the direction of sonority rather than elegance or velocity of execution. He himself, with his splendid equipment as a performer, was said to have given the pianoforte a soul, and ever greater and greater were the demands he made upon the instrument. From the desire on the part of performers to excel in the public interpretation of his works, arose, beyond question, the tendency towards a merely muscular force, and, as a result, a great increase in the resisting power of the pianoforte. With him, and with the best of those that came after him, technique was regarded as means to an end, not as the end in itself. Weber, with his bold treatment of the left hand, his love of widespread chords, and Schubert, whose technique, though occasionally showing the influence of the superficial Viennese school, yet follows Beethoven in his happiest moments, each added something to the resources of the instrument, though neither made any special study of technique nor published any 'method.'

Thalberg's wonderful power of singing on the

pianoforte is historically interesting as having so much impressed Mendelssohn as to incite him to imitate it, and it is at least possible that not only the E minor prelude, where a favourite device of Thalberg's is deliberately imitated, but a great number of the 'Songs without Words' were more or less consciously influenced by Thalberg's ideal cantabile. Concerning Mendelssohn's own technique, see Vol. III. pp. 422, 423.

Before following the main stream of technical development from the requirements of Beethoven's sonatas to the achievements of Liszt and his followers, we must consider in the next place the works of Schumann and Chopin, both of whom realised, as none of their predecessors had done, the artistic value of that evanescent tone of the piano which was at first considered the chief defect of the instrument. Both turned the sustaining pedal to richer account, and got new effects from its use; and both loved a dreamy, poetical, indefinite form of melody, and a style of ornamentation to which the word 'ethereal' is suitably applied. Schumann's own experiments, made in order to obtain absolute equality of the fingers, resulted in an injury that prevented his playing in public, so that for his own technique we must depend upon his compositions and upon the playing of his illustrious wife. It is evident that her wonderful sonority of tone, the exquisite gradation of her touch, and the quiet brilliancy of her playing in ornamental passages were the practical realisation of Schumann's own ideals; and if all his little innovations in the way of technique (such as those at the close of the 'Papillons,' the end of the piece called 'Paganini,' in the 'Carnaval,' and other places) have not been accepted as part of the regular repertory of technical devices, yet enough was left to enrich the resources of the instrument very materially. Like the older players, Clara Schumann sat on a comparatively low seat, kept the forearm perfectly horizontal, and got the tone purely by pressure of the finger, not by anything that could be called a 'blow' on the key.

One peculiarity in the technique of Chopin may be usefully studied by comparing his work with that of John Field, to which in form and style it owes so much. The passages of embroidery in which both delight require, in Field's case, that perfect equality of finger at which, as we have seen, the earlier writers aimed; in Chopin, the essential weakness of the human hand is turned to beautiful account, for his passages are often devised in such a manner that the weak finger of the hands has to play the note which is to be comparatively unimportant. In the concertos and studies the natural conformation of the hand is kept before the composer's eye, and, as a consequence, his difficulties are always of a kind that is grateful to the player, however intricate they may sound.

Liszt's technique seemed to embrace every merit that was characteristic of all his predecessors, and while he proceeded mainly along the lines laid down by Chopin, he translated, one may almost say, Chopin's technique—which, like his quiet style of playing, was after all only thoroughly effective in a comparatively small room—into a language fit for the largest concert-halls. Schumann and Chopin had the quality that is called 'intimacy'; and it sometimes seems as if many of their most individual works could only be properly interpreted to a very small circle of sympathetic hearers; with Liszt everything was brilliant, showy, surprising and eminently for the public. In point of technique, he used, or allowed his pupils to use, a far higher seat than had been generally used before, so that the forearm, instead of being held horizontally, sloped down towards the hand. This gave, beyond any doubt, a great increase of force to the blow upon the keys; and in Liszt's own hands tone was never sacrificed to power, nor was it ever possible to say that he went beyond the limits of musical beauty even in the loudest passages. Still he undoubtedly did institute the methods of obtaining great tone, which afterwards were so misused by many of his pupils; he carried further the principle of turning the inherent weakness of the hand into a beauty, and if it is true of Chopin, it is ten times truer of Liszt, that his passages sound far harder than they are. He exhausted the possibilities of the keyboard in many directions, and carried to an extreme point such devices as that which is sometimes called 'blind octaves,' a device which is hardly a compliment to the musical sense of the average hearer. It can be made less objectionable than it is by nature, if care is taken to make the thumbs more prominent than the outsides of the octaves, but it must always sound rather a makeshift, and to introduce it into the works of the older composers is surely nothing short of blasphemy.

The sustaining pedal, which in the hands of Schumann and Chopin is used very often as if it were a veil enfolding their melodies in a luminous haze, is frequently used by Liszt as a means of setting the hands free for other things; and a special kind of brilliance was attained by him in rapid ornamental passages in the higher octaves of the piano, by holding the fingers almost stiffly, and not allowing them to move with much independence, and by

throwing the hand, as it were, at the passage where it begins. It was Liszt's followers, rather than himself, who formed the habit of exerting undue force in order to get all available volume of tone from the piano. If Rubenstein and Tausig, among the older men of their generation, never produced tones that were not beautiful, others injured their power of playing in a cantabile style by exerting strength in a way that was not scientifically correct. Pianoforte-makers were compelled to provide an increasing amount of resistance¹ in order to stand the attacks of the pianists of the 'seventies. In the present day the resistance of the keys has returned to nearly as small an amount as it was in 1817. This reaction is due to the general recognition of the fact that the most sonorous tone is not produced by uncontrolled violence; the laws of muscular control have been gradually realised even by musicians, and as a consequence a beautifully round tone is nowadays not an unusual possession with modern players, even in their loudest passages.

Down to the last quarter of the 19th century, as far as 1880, if not later, this tendency showed no diminution, and the concertos and show pieces of that time make it clearly manifest that the pianists relied for their effect upon producing a loud tone at any cost of quality. Even the earlier pianoforte works of Brahms, down to the date of the two rhapsodies, op. 79, and the second concerto, op. 83, show traces of this ultra-virile ideal of playing; and his contribution towards the technique of the instrument was mainly in the direction of attaining perfect independence of finger, not merely the physical independence for which the earlier men had striven, but such mental independence that one finger should be able to play three even notes against two even notes in another part of the hand, while two more parts were going on in the other hand, neither of them corresponding with either finger of the first. In his later works, from op. 116 to the end, the peculiar qualities of pianoforte tone are more carefully considered than in his earlier compositions, against which one of the commonest reproaches was that they were not suited to the pianoforte. One of the first examples of this consideration for the characteristics of the pianoforte is the intermezzo in A flat from op. 76, which would lose all its meaning and point if it were played on any other instrument. The 'evanescent' tone of the instrument is definitely required throughout, and in all the later sets of pieces there are passages which show that Brahms demanded from his interpreters something far more than

the storm and stress which appealed to him in his earlier life.

Exactly where the reaction against the school of the piano-thumpers began, it would not be easy to say; but while Mme. Schumann was alive, the quiet and truly musical style had never passed away even in Germany, where thumping had its home. The influence of men like Sgambati and Buonamici in Italy, Saint-Saëns in France, and Tchaikovsky in Russia, encouraged the quieter style of playing, and after the enormous vogue of Paderewski's style, pianists began again to devote themselves to the production of tone rather than of noise, and of muscular control rather than of mere force. A lower seat was adopted, the forearm was again held in a horizontal line, instead of slanting downwards towards the keys, and the wrist once again came into play. The technical teaching of Leschetizky, and in an even greater degree that of Deppe, went to encourage an absolute mastery of many gradations of tone, and a scientific system of tone-production.

In most of the modern schools, and in a good many of the later editions of the classics, the pedals were directed to be managed far more carefully than they had been, and in some cases an extra stave of one line was used to indicate the exact treatment of the sustaining pedal. No detail of technique is now regarded as beneath the student's notice, and while the early pieces of Scriabin foreshadowed many of the latest effects of technique, the music of Debussy and Ravel gave the pianoforte a new eloquence. Not only does the passage-writing in these composers lie easily for the hand, but new sonorities are discovered in both which have enormously increased the resources of the instrument. In the 'Cathédrale engloutie' of the former, such use is made of an acoustic phenomenon with which the name of Tartini is associated, that the hearer fancies he hears notes far below the real compass of the pianoforte; and at every turn we meet with treatment so deft that the atmosphere desired by the composer seems to be at the command even of moderately skilful players.

From time to time 'royal roads' to pianoforte-playing have been brought forward in various countries; the detailed analysis of the processes involved in the various kinds of touch, the discovery that useful practice could be contrived away from the keyboard, or with a silent keyboard allowing various touches to be employed, and even modifications of the design of the keyboard, have found their adherents; and it is possible that from each and all some benefit may be derived. The effect of the various mechanical contrivances of the pianola type has been beneficial in one way, for a merely textual accuracy, which can be far more certainly attained by the machine, is no longer an end in itself, but the student

¹ The following table of resistance is taken from grand pianos of various dates by Broadwood & Sons:

	Lowest C.	Middle C.	Highest C.
1817	21 oz.	21 oz.	11 oz.
1877	4 "	24 "	28 "
1904	3 "	24 "	2 "

knows that much more is required and that a soulless technical proficiency has no longer any appreciable market-value. It is of course impossible to foresee what will be the next stage of development of pianoforte-playing, but it may be taken for granted that no return will be made to the heavy touch of the piano in fashion in the latter part of the 19th century, and that delicacy of tone-gradation will hold an even higher place in the regard of practical musicians.

PIATTI, see CYMBALS.

PIATTI, ALFREDO CARLO (b. Bergamo, Jan. 8, 1822; d. Crocetta di Nozzo, July 18, 1901), violoncellist, was the son of Antonio Piatti (b. Bergamo, 1801), a violinist of some repute, who held the post of leader in the orchestra of his native town.

At the age of 5 Piatti began to study the instrument which was destined to make him famous, receiving instruction from his great-uncle, Zanetti, an accomplished violoncellist, and a patient teacher. After two years' study, Zanetti, considering his pupil sufficiently advanced, obtained permission for him to play in the theatre orchestra. Before the beginning of the following season, Zanetti died, and the youthful Alfredo was elected his successor in the orchestra. MAYR (*q.v.*), who was at that time the maestro di cappella, took a particular fancy to the young artist, and on one occasion, during a festival held by four orchestras in the neighbouring village of Caravaggio, singled Piatti out to play a solo, which by rights should have fallen to Merighi, an experienced artist and professor at the Milan Conservatoire. This episode piqued the elder virtuoso, and when in 1832—at the age of 10—Piatti sought to become a scholar at that institution, Merighi was the only professor who opposed his admittance. Eventually, however, Piatti was granted a five years' scholarship. At the age of 15½ he made his public début as a soloist on Sept. 21, 1837, at a Conservatoire concert. He performed a concerto of his own composition, and received as a prize the instrument upon which he played. Returning to Bergamo, Piatti resumed his post in the orchestra, played nightly at the opera, and accompanied his father to every neighbouring village where a likely opportunity for playing a solo presented itself. After a time he gave a concert at Turin; played at the Kärnthnerthor Theatre, Vienna, and, his engagement at the Bergamo Theatre coming to an end owing to a misunderstanding, gave concerts in various towns in and about Italy. At Pest he fell ill,

and having no reserve fund, was reduced to selling his violoncello. Fortunately a friend from Bergamo heard of his difficulties, and came and assisted him to return to his native town. The journey necessitated a stoppage at Munich, where Piatti made the acquaintance of Liszt. Liszt encouraged him to go to Paris, where he arrived in 1844. Here he came in contact with Habeneck, received a present of an Amati violoncello from Liszt, and composed his 'Chant religieux,' and 'Sonnambula.'

In the same year occurred Piatti's first visit to England, making his début before an English audience at the Annual Grand Morning Concert given by Mrs. Anderson at Her Majesty's Theatre on May 31, 1844. The critics ranked him at once as an artist of extraordinary excellence. It was at this same concert that (as Piatti was wont to tell the story in after years) a 'little fat boy with ruddy cheeks and a short jacket all over buttons, stepped on the platform and played the violin.' This was Joseph Joachim, whose name in after years was so closely associated with that of Piatti. On June 24 he played at the Philharmonic. After touring in the provinces, Scotland and Ireland in the autumn, with Sivori, Döhler, Lablache and Belletti, he returned to Milan. From the end of 1844 to the latter part of the year 1845 he toured in Russia with Döhler. One outcome of his visit was the composition of his 'Mazurka sentimentale' (op. 6), the 'Air Baskyr'—suggested to him by a man who occasionally played upon a bagpipe under his window at St. Petersburg—and the 'Fantaisie Russe.'

Piatti's second visit to England took place in 1846, when he made his début as a quartet-player at the benefit concert of the director of the Musical Union at Willis's Rooms; and on May 4, 1847, played at the private *matinée* given by the Beethoven Quartet Society on the occasion of Mendelssohn's last visit to England. During the autumn of 1850 Piatti frequently played solos at the National Concerts, which were held at Her Majesty's under the direction of Balfe; and at the Sacred Harmonic Society's opening concert of the season, Dec. 5, 1851, he replaced Lindley, on his retirement. On the establishment of the Popular Concerts Piatti was engaged, his long association with them beginning on Jan. 3, 1859, and ending with his retirement in 1898. Besides Piatti's active work as a soloist, he developed his powers of composition under Molique; in his own estimation his most important works were his six sonatas for violoncello and piano, which were composed for the Popular Concerts. He also wrote two concertos, and a concertino for violoncello and orchestra played at the Crystal Palace Concerts. Besides his original compositions Piatti collected and edited classical solos of past centuries.

As an artist Piatti gained an unsurpassable reputation (see VIOLONCELLO-PLAYING). His absolute command of technical difficulties, combined with his purity of tone, faultless intonation, exquisite delicacy, and perfect phrasing of cantabile passages, brought him the homage not only of the public, but also of his fellow-artists. The reverential esteem which was felt towards him in England was never more apparent than on the occasion of the 'Joachim-Piatti Jubilee,' on Mar. 22, 1894, at the Grafton Galleries, where a reception was organised by Grove and Mackenzie to celebrate the fiftieth anniversary of the English début of these virtuosi in 1844. In his own country Piatti's appearances were perforce rare owing to his popularity in England, but when—after an absence of eighteen years—he played at a concert given to raise funds to defray the expenses of a monument to Donizetti at Bergamo (Oct. 18, 1893) he was received with wild enthusiasm. The warmth of the reception was enhanced by the presentation of the grade of Commendatore in the Order of the Crown of Italy, which was conferred upon him by King Umberto. Piatti was a keen bibliophile and a remarkable connoisseur of fiddles and violoncellos. For the last twenty years of his life he resided at No. 15 Northwick Terrace, London, but after the purchase of his property—called Villa Piatti—near Cadenabbia on the Lake of Como, he retired to his Italian home after the strenuous labours of the London musical season, returning to Northwick Terrace in the autumn. The last months of his life were passed at Crocetta di Nozzo, about four miles from Bergamo, the residence of his daughter, Countess Lochis, where he died from disease of the heart.

After his death the professors and students of the Bergamo school of music kept solemn watch by the body until it was laid in its last resting-place in the private chapel of the Lochis family. The public funeral took place on July 22, and was attended by the Prefect, the Mayor, members of Parliament and representatives of the leading musical societies. Four professors played the andante from Schubert's quartet in D minor, according to Piatti's express wish, and a week later visited the Lochis chapel again, and made a compact to perform the quartet annually on the anniversary of the master's death.

Piatti's wife, Mary Ann Lucey Welsh, only daughter of Thomas Welsh, a professor of singing, only survived her husband for a few months. The marriage took place at Wolchester, near Stroud, in 1856, but the union was not a happy one and ended in separation. The only surviving daughter of the marriage became the wife of Count Lochis, who died in 1899, leaving the widowed Countess with two children, Marchesita and Alfredo, who was named after his grandfather.

PUBLISHED COMPOSITIONS

Concerto, op. 8, v'cl. and FF., Mainz, 1868; Nocturne, op. 2, v'cl. FF., Mainz, 1868; Siciliana, v'cl. and FF., Mainz, 1868; Dodici capricci per il violoncello, Berlin, 1875; Concerto, v'cl. and orchestra, Berlin, 1872; Concerto, v'cl. and orchestra, Leipzig, 1877; Fantasia romanesca, Berlin, 1885; Berceuse, for two v'cls. and FF., London, 1890; Romanza per violino; Bergamasca; Chant religieux; Souvenir d'Éms; Mazurka sentimentale, op. 6; Air Baskyr, op. 8; Fantaisie russe; Danza morena, and numerous *scage* with violoncello obbligato.

TRANSCRIPTIONS AND ARRANGEMENTS

Sel lesion per la viola d'amore (d' Attilio Ariotti) ridotti per il violoncello da Piatti; six Sonatas by Boccherini, also Sonatas of Locatelli; Veracini, and Porpora; Kummer's Violoncello Method; Ist. Sonata di Marcello; Mendelssohn's Lieder ohne Worte; Three melodies of Schubert; Variations of Christopher Simpson.

PIB GORN (PIB-CORN) (according to Stainer and Barrett's *Dictionary of Musical Terms*, from 'pib' or 'piob,' meaning pipe, and 'corn,' horn), a small instrument of the beating reed type, with cylindrical tube and expanding bell. Its use was mainly among the Welsh and other Celtic peoples. The tube was often of elder or other hollow wood, but sometimes of the shinbone of a sheep or deer, a natural horn being used for the bell. Canon F. W. Galpin gives the following description of one in his possession (see *PLATE LXXXV.* No. 4):

'My pib-corn is in total length 1 foot 8½ inches. The tube (of deer bone) is 8½ inches long with a single beating reed (as given in Daines Barrington's description). It has the scale of F major, from *f* to *f*, and it is pierced with six holes in front, and one for the thumb behind.'

(See BARRINGTON, Daines; HORNPIPE.)

D. J. B.

PIBROCH (Gaelic *Piobaireachd*, a 'pipe-tune'), a series of variations for the bagpipe, founded on a theme called the *urlar*. Pibrochs are the highest form of bagpipe music, and are often very difficult to execute properly. The variations, generally three or four in number, increase in difficulty and speed, until the composition concludes with a *creanluith*, or quick movement. Like all bagpipe music, pibrochs are written in a peculiar scale, and it is impossible to note them down correctly for any other instrument, particularly owing to the presence of an extra note between F and F♯, a peculiarity which is also found in the Alpenhorn. (See BAGPIPE; RANZ DES VACHES.) Pibrochs are generally of a warlike character, including marches and dirges; they often bear the names of various historical and legendary events. Thus 'The Raid of Kilchrist' is ascribed to Macdonald of Glengarry's piper, who composed and performed this pibroch in the year 1603, during the burning of a church with its whole congregation; and the specimen of which a portion is given below—'Fàilte Phroinnsa,' the Prince's Salute—was composed by John MacIntyre, piper to Menzies of Menzies, on the landing of the Pretender in 1716. It must not, however, be supposed that the music is always contemporary with the events which the pibrochs commemorate; for although many of them are undoubtedly of

considerable antiquity, yet the names of old pibrochs which have been lost are often transferred to new compositions. There are not many collections of Highland music, but the best are those by Patrick Macdonald (of Kilmore), Donald Macdonald and Mackay. The last collection, by Angus Mackay, containing sixty pibrochs, was published in 1838, and was followed by a collection made by William Ross, piper to Queen Victoria, issued in 1860, revised editions in 1876 and 1896. The largest collection is that of Major-General Thomson, published under the title of *Ceol Mor*, in 1900. The following is the first part of the *urlar* of a pibroch, and is interesting, as showing the 'warblers' or grace-notes in which good pipers excel. It must be remembered that the note represented by F is rather sharper in the bagpipe.

The name Pibroch is used by Mackenzie in the title of a piece for violin and orchestra.

W. B. S.; addn. W. H. G. F.

PICCHI, GIOVANNI, organist, c. 1620, at the church 'Della casa Grande,' Venice. His book 'Intavolatura di balli d'arpiordo' (1620) is one of the most interesting monuments of early Italian harpsichord music; a toccata of his is in the 'Fitzwilliam Virginal Book' (see VIRGINAL MUSIC). A book of 'Canzoni da sonar' in 2-8 parts with bass contains 16 canzones and 3 sonatas for violins, cornetti, bassoons, trombones and flutes. He wrote also some vocal church music (Q.-L.).

PICCINI, LODOVICO ALESSANDRA (b. Paris, 1779; d. there, 1850), a natural son of Joseph, son of Nicolo Piccini; distinguished himself as accompanist at first at the Théâtre Feydeau, and from 1802 at the Opéra, where he became also chorus-master, but lost his position in 1826, without a reason being given. He was a prolific composer of comic operas, ballets and melodramas, of which a long list is given by Fétis. (See also Q.-L.)

PICCINNI, NICCOLÒ (b. Bari, kingdom of Naples, Jan. 16, 1728; d. Passy, May 7, 1800), was for a considerable time the most popular of Italian operatic composers.

The son of a musician, he was at first intended by his father for the Church, but at the instance of the Bishop of Bari he was sent to the Conservatorio di San Onofrio, then presided

over by Leo. He went there at the age of 14, and was at first instructed by a *maestrino*, a kind of pupil-teacher, who by his dry dogmatic lessons and severity only succeeded in disgusting the gifted boy, who showed on his part a disposition to throw aside all control. Leo averted this by taking him for his own pupil, and Durante (who, at Leo's death, resumed his previous mastership of San Onofrio) had also an especial affection for the young student. 'The others are my pupils,' he was wont to say; 'this one is my son.'

Piccinni quitted the Conservatorio in 1754, after twelve years of study, and made his début as a composer with the opera 'Le donne dispettose,' at the Florentine theatre at Naples, in 1755. The success of this piece was remarkable, as Logroscino's comic operas had so monopolised the stage that it was difficult for any others to obtain a hearing. Equally fortunate were 'Le gelosie' and 'Il curioso del proprio danno,' both in the light comic style, while 'Zenobia' (San Carlo, 1756) and 'Alessandro nelle Indie' (Rome, 1758) not only pleased the public, but showed advance in power, the last-named opera containing an overture which was greatly admired. Piccinni married, in 1756, Vincenza Sibilla, his pupil, who, to great personal charms, united that of a beautiful and touching voice. Her husband would not allow her to appear on the stage. She was, however, an exquisite singer in private circles, and Piccinni, with a wide experience of *prime donne*, said he never heard his own airs so perfectly rendered as by her.

It was at Rome, in 1760, that he produced 'La Cecchina, ossia la buona figliuola,' perhaps the most popular *opera buffa* that ever existed, which for years had a most extraordinary vogue. It was performed on every stage in Italy, and on most stages in Europe, and everywhere was received with the same enthusiasm. At Rome it was played not only at all the principal theatres, but at the most insignificant, even that of the *Burattini*, or marionettes, and all classes of people were equally delighted with it. Fashions were all *alla Cecchina*: inns, shops, villas, wines—in fact, all things that could be named—were called after her. Nor was more weighty appreciation wanting. 'Sarà qualche ragazzo o qualche ragazzata' ('probably some boy or boy's work'), said Jommelli, importuned on his return to Italy from Stuttgart with perpetual praises of 'La Cecchina' and its author. He went, however, to hear the work performed, and his *dictum* to the amateurs who crowded round him at the end to know his opinion was 'Ascoltate la sentenza d' Jommelli: questo è inventore' ('Hear the opinion of Jommelli: this is an inventor'). It is difficult now to account for the immense preference given to 'La Cecchina' over other works of the time, although the airs it contains are lively. as

well as graceful and pleasing. In the next year another triumph was won by 'L' Olimpiade,' previously set by Leo, Pergolesi, Galuppi and Jommelli, but never so successfully as by Piccinni. Among his other improvements on existing operatic forms must be mentioned his extension of the duet, hitherto treated in a conventional, undramatic way, and the variety and importance he gave to the finale. His fame was equalled by his industry. In the year 1761 alone he wrote six operas, three serious and three comic. In 1773 a rival appeared in the person of Anfossi, sometime Piccinni's pupil, and who owed to him his first theatrical engagement. He was very far inferior to Piccinni, but his 'Incognita perseguitata' had a popular success, as had two or three weak operas that followed it. The inconstant Roman public forsook its old favourite; an opera of Piccinni's was hissed by Anfossi's partisans, and withdrawn. This so affected the composer's sensitive nature that, returning to Naples, he fell seriously ill, and was in danger for many months. On his recovery he decided not to return to Rome. In 1774 he had given at Naples a second 'Alessandro nelle Indie,' superior to the first; he now wrote an *opera buffa*, 'I viaggiatori,' which had at Naples almost the success of 'La Cecchina' at Rome.

In 1776 he yielded to invitations and powerful inducements held out to him to go to Paris, where, with his family, he arrived in December, on a promised salary of 6000 francs, with travelling expenses. He knew not a word of the French language, but Marmontel undertook to be his instructor, and to make such changes in several operas of Quinault as should adapt them for modern music. For some time he passed every morning with Piccinni, explained a scene to him, taught him to repeat it, marked by signs the quantity of each word and each syllable, and then left him to work. The next morning Piccinni sang over to him what he had composed. His first French opera, 'Roland' (produced Jan. 27, 1778), was completed after a year's labour of this kind.

He had not long begun it when the famous feud arose between his admirers and those of Gluck. This great man had brought about a revolution in French serious opera, worthy in its way to be compared to the political and social revolution which followed soon after. He had freed the tragic lyrical stage from a mass of uncouth antediluvian conventionality, and had substituted for it a new and living form of Art. Like all innovators, he had enemies, and those who had been disgusted by the uncompromising fury of his partisans ranged themselves under Piccinni's banner. A war of pamphlets and other writings raged unabated for years. It divided society; the subject was unsafe. Men met each other for the

first time with the question, almost implying a challenge, 'Sir, are you Gluckist or Piccinnist?'

Poor Piccinni, quiet and peaceable, a stranger to intrigue, kept at a distance from all the turmoil, which was such that, on the night of the first performance of 'Roland,' fears were entertained for his personal safety. To the general surprise, he was brought home in triumph to his family. The opera had had a complete success, especial enthusiasm being elicited by the pretty ballet airs—a curious fact, as Piccinni had no sympathy with dancing, and disliked having to write dance music.

He was in favour with Marie Antoinette, and gave her two singing-lessons a week at Versailles. The satisfaction of teaching so distinguished a pupil was supposed to be its own sufficient reward; at any rate he received no other payment, not even his travelling expenses.

He was appointed director of a troupe of Italian singers engaged to give performances on alternate nights at the Opéra, and in this capacity produced 'Le finte gemelle' (June 11, 1778), 'La buona figliuola' (Dec. 7, 1778), 'La buona figliuola maritata' (Apr. 15, 1779), 'Il vago disprezzato' (May 16, 1779). The idea now occurred to the principal director to get two operas on the same subject from the famous rivals, and 'Iphigénie en Tauride' was fixed on. The poetical version given to Piccinni to set was so bad, that after composing the first two acts he took it to Ginguénè, who to a great extent rewrote the book. Meanwhile the manager, violating a promise made to Piccinni to the contrary, had Gluck's 'Iphigénie' performed first, which met with the brilliant success it deserved. Piccinni in the meantime (Feb. 22, 1780) produced 'Atys,' an opera, superior to 'Roland'; some numbers of which, especially the 'Chorus of Dreams,' were for many years very popular at concerts; and 'Adèle de Ponthieu,' a lyric tragedy (Oct. 27, 1781). His 'Iphigénie' (produced Jan. 23, 1781) contained many beauties. It had small chance of succeeding after Gluck's, but was fairly well received in spite of the untoward incident which marred its second representation. No sooner had Mlle. Laguerre, the Iphigénie of the evening, appeared on the scene, than it became painfully evident that she was intoxicated. She got through the part without breaking down, but the luckless composer heard Sophie Arnould's *bon mot* going from mouth to mouth, 'C'est Iphigénie en Champagne.' The opera had, however, seventeen consecutive performances.

Gluck had left Paris in 1780, but a new rival now appeared in Sacchini, whose 'Renaud' (Feb. 28, 1783) had considerable success. 'Didon,' reckoned Piccinni's best French opera, was first produced, by command, before the court at Fontainebleau (Oct. 16, 1783), and

afterwards at the Opéra, where it kept the boards till Feb. 8, 1826—its 250th representation. At the same time the smaller works of 'Le Dormeur éveillé' and 'Le Faux Lord' were being performed by the Italian company, and were very popular. About this time a school for singing was established in Paris, of which Piccinni was appointed principal master, and which showed the results of his training in an excellent performance of 'Roland' by the pupils. But the tide of fortune seemed now to turn against him. 'Lucette' and 'Le Mensonge officieux' failed in 1786 and 1787. 'Diane et Endymion' and 'Pénélope' had met with the same fate in 1784 and 1785 respectively. He was not, however, embittered by these reverses. When Sacchini died, of vexation and disappointment, Piccinni pronounced his funeral oration, full of delicate and discriminating praise of all that was best in his works. When Gluck died, in 1787, Piccinni was anxious to found, by subscription, an annual concert in memory of the great man 'to whom,' he wrote, 'the lyrical theatre is as much indebted as is the French stage to the great Corneille.' From lack of support the proposal was not carried out.

'Clytemnestra,' a serious opera, failed to obtain a representation, and when the Revolution broke out in 1789, and he lost his pension, he returned to Naples. Here he was well received by the King, who gave him another pension. Some of his old works were performed, as well as an oratorio, 'Jonathan' (1792), and a new *opera buffa*, 'La serva onorata.' But he got into trouble owing to the marriage of one of his daughters with a young Frenchman of avowed Liberal opinions, was denounced as a Jacobin, disgraced at court, and his next opera purposely hooted down. An engagement to compose two operas at Venice gave him the opportunity of absenting himself, but when, at the end of some months, he was foolish enough to return to Naples, he was immediately placed by the first minister, Acton, in a kind of arrest, and forbidden to leave his house. There he remained, in misery and indigence, for four years. He had previously heard that all the property he had left in France was lost, that a friend for whom he had become security was bankrupt, and that all his scores had been sold to pay this man's debts. He now supported himself and beguiled the time by composing music to several Psalms, translated into Italian by Saverio Mattei. The convents and churches for which these were written became possessors of the original scores, as he was too poor to have them copied.

The treaty of peace with the French Republic brought hope for him. The ambassador, Canclaux, procured for him the means of communicating with his friends in Paris, and

David, the famous singer, got him an offer of an engagement at Venice. With some difficulty a passport was procured for him by Garet, successor to Canclaux, and Lachèze, secretary of legation, who also furnished him with the means of going, he being absolutely penniless. At Rome he was fêted by the French Fine Arts Commission, and persuaded to go direct to Paris, where he arrived on Dec. 3, 1798. The annual distribution of prizes in the Conservatoire occurred next day, and Piccinni was invited to be present. He was conducted on to the stage, and presented to the public amid deafening applause. Five thousand francs were granted him for his immediate necessities, as well as a small pension. This was, however, most irregularly paid, and when some months later his family arrived, in utter destitution, from Naples, whence they had had to fly in the wake of the French army, Piccinni found himself again in almost desperate circumstances. His troubles brought on an attack of paralysis, from which he did not recover for some months. Many melancholy MS. letters of his are extant, showing to what a miserable state he was reduced. Some are addressed to Bonaparte, praying that his pension might be paid, for the sake of the many dependent on him. Bonaparte showed him kindness, and paid him twenty-five louis for a military march. A sixth inspector's place was created for him in the Conservatoire, but he was now again prostrated by severe illness, aggravated by the treatment of surgeons who bled him recklessly. He rallied, however, and went to Passy, in the hope of recovering his strength, but fresh domestic anxieties pursued him, and he succumbed on May 7, 1800. He was buried in the common cemetery (which has since been sold), and a stone was placed over him by friends.

His place in the Conservatoire was given to Monsigny, on condition that half the salary attached to it should be paid to Mme. Piccinni during her life, she, in return, instructing four pupils of the Conservatoire in singing.

Piccinni's Paris scores are much more fully orchestrated than those of his earlier Italian works, and show in this the influence both of the French and the German spirit. He was, however, opposed to innovation. It is interesting to read, in Ginguené's life of him, his views on this question.

That he should ever have been opposed, on equal terms, to Gluck, seems now incredible. Yet by numbers of contemporaries—critical and cultivated—he was reckoned Gluck's equal, and his superior by not a few. But his art was of a kind that adapts itself to its age; Gluck's the art to which the age has, in time, to adapt itself.

A complete list of Piccinni's very numerous works is to be found in *R.M.I.* vol. viii. p. 75;

in Q.-L. the names of eighty-five operas are given, as well as three oratorios, a mass and some psalms.

Piccinni left two sons, the second of whom, LUDOVICO (b. Naples, 1766; d. Paris, July 31, 1827), learned music from his father and followed it as a career. He followed his father to Paris in 1782, and after a chequered career (he was appointed Kapellmeister at Stockholm in 1796) died in Paris. He wrote many operas, but they are dismissed by Fétis as works of no value. Certainly none of them have survived. The elder son, GIUSEPPE, is known only through his natural son, LOUIS ALEXANDRE (b. Paris, Sept. 10, 1779; d. there, Apr. 24, 1850), a composer of more than 200 pieces for the stage, as well as of twenty-five comic operas, of which a list is given by Fétis. F. A. M.

PICCIONI, GIOVANNI, of Rimini, was, in 1577, maestro di musica in the house of Desiosi of Consegliano, and afterwards, until 1602, organist at Orvieto Cathedral. In 1616 he calls himself organist and maestro di cappella of Monte Fiaschone (province of Rome). He composed masses and other church music, and a large number of madrigals, motets and canzone, a list of which appears in Q.-L.

PICCOLELLIS, GIOVANNI DI, author of a scholarly publication entitled *Liutai antichi e moderni. Note critico-biografiche* (Florence, 1885: Successori le Monnier), and a supplemental volume, *Liutai antichi e moderni. Genealogia degli Amati e dei Guarneri secondo i documenti ultimamente ritrovati negli atti e stati d'anime delle antiche parrocchie dei SS. Faustino e Giovita e di S. Donato di Cremona. Note aggiunte alla prima edizione sui liutai pubblicata in Firenzenell'anno MDCCLXXXV*. (Florence, 1886: Successori le Monnier). This work, which is a masterpiece of the finest modern Italian typography, is embellished with twenty-four exquisitely executed photogravure plates of the violins of the greatest masters. The letterpress, which is worthy of the illustrations, gives exhaustive information concerning the bow-instruments of Europe, the Brescian and Cremonese schools, together with laborious analyses and classified biographies of the Italian, French, German and English schools of violin-making. The work is one which forms a valuable addition to the literature of the violin. A discourse which was read by the author before the Florentine Academy of Music on Apr. 29, 1888, and published under title *Della autenticità e pregio di taluni strumenti ad arco*

appartenenti al R. Istituto Musicale di Firenze (Florence, 1889: Galletti e Cocci), is an interesting argument on the authorship of several bow-instruments preserved in the museum of the Conservatorio, some of which appear to be hitherto unasccribed. The remarks on varnish are interesting and pertinent, and are followed by an interesting discussion on a violin and viola attributed to Stradivarius, and a violoncello assigned to Nicola Amati.

PICCOLO, see FLUTE (2).

PICCOLOMINI, MARIETTA (b. Siena, 1834¹; d. Florence, Dec. 1899), member of the well-known Tuscan family. Being passionately fond of music she determined to become a public singer, and, in spite of opposition from her family, studied under Signora Mazzarelli and Signor Pietro Romani, both of Florence, and made her début in 1852 at La Pergola as Lucrezia Borgia; she afterwards played at Rome, Siena, Bologna, etc., and in 1855 at the Carignan Theatre, Turin, as Violetta in 'La Traviata,' on its production there, and was highly successful.

She made her début in London at Her Majesty's Theatre, May 24, 1856, in the same opera, then produced for the first time in England. She immediately became the fashion, partly on account of her charming little figure and clever, realistic acting—especially in the last act, where she introduced a consumptive cough; and partly perhaps on account of the plot of the opera, which excited much indignation and a warm newspaper controversy.² She next played Maria, in the 'Figlia,' and Norma, with fair success. Whatever might be the merits of her acting, of her singing there were many adverse opinions, notably those of Chorley. She afterwards played at the Théâtre des Italiens, Paris. Mlle. Piccolomini reappeared for the seasons of 1857 and 1858 at Her Majesty's, and added to her repertory Adina ('L'Elisir') (described by Henry Morley³ as one of her best-acted parts), Zerlina and Susanna of Mozart; Arline, in the Italian version of 'The Bohemian Girl'; Lucia, in 'Luigia Miller,' on the production of that opera, June 8, 1858; and 'La serva padrona' of Paisiello, July 5, 1858.⁴ She then went to America, and made a great success. In 1859 she played for a short time at Drury Lane with diminished effect, and for a few nights in 1860 at Her Majesty's, and took farewell of the stage, Apr. 30, as Almira, in the second performance of a new opera of that name by Campana, and in a duet from 'I martiri' with Giuglini. Soon

¹ Pough, Paloschi and Mendel give 1836 as the date.

² The original play, 'La Dame aux camélias,' was formerly forbidden on the English stage; but Mme. Modjeska played in a modified version at the Court Theatre in 1860, and later it was frequently given by Sarah Bernhardt, Eleonora Duse and others.

³ *Recollections of an Old Playgoer*.

⁴ Having sung the music previously at Benedict's annual concert June 21, at the same theatre.

after this she married the Marchese Gaetani della Fargia. She nevertheless returned to the stage for four nights in 1863, and generously gave her services in aid of the benefit organised at Drury Lane for her old manager Lumley, having travelled to England for that express purpose. A testimonial was set on foot for her in 1884, when she was reported to be in reduced circumstances (*Daily News*, Mar. 21, 1884). A. C.

PICCOLO-VIOLINO, see VIOLINO PICCOLO.

PICCO PIPE, a small and unimportant member of the family of *flûtes à bec*. It owes whatever musical significance it may possess to the efforts of a single exceptional player, an Italian peasant, who, under the name of 'Picco, the Sardinian minstrel,' appeared in London in 1856, first on Feb. 21 at Covent Garden. It is stated that this performer was able to produce from it a compass of three octaves.

It consists, as usually made, of a boxwood tube $3\frac{1}{2}$ inches long. Of this $1\frac{1}{2}$ inches are occupied by a mouthpiece, common to it and to the penny whistle, the flageolet, the *flûte à bec* and the diapason pipe of the organ. The remaining 2 inches form all the modulative apparatus required. This consists of three lateral holes; two in front, one at the back, for the thumb and two first fingers of either hand, and an expanded bell, spreading to $\frac{1}{4}$ of an inch in diameter. It is obvious that some additional device is necessary to complete even the simplest and most rudimentary diatonic scale. This is furnished by first using it as a stopped pipe; the bell being blocked, wholly or partially, by the palm of the hand, twelve semitones being so produced; then as an open pipe, giving eight consecutive notes; and lastly, by overblowing on the first harmonic of a stopped pipe (the 12th), obtaining again with a stopped bell six more semitones. Besides these, some intermediate sounds are indicated by half stopping holes, or by forcing the wind, according as the vibrations have to be slackened or accelerated.

The compass is usually twenty-six semitones, and is made to begin with *b*, rising to *c'''*. The lowest note is only to be obtained by covering the bell with the palm of the hand and closing all the holes. At *b'* the open scale begins, and at *g'* the harmonic. It is obvious that this notation is at best only approximative, and at least an octave lower than the real sounds emitted. Probably *C* is the fundamental note of the instrument, depressed somewhat by the irregular form of the sounding tube. (Compare FLUTE.) W. H. S.

PICHEL (PICHL), WENZEL (b. Bechin, Tabor, Bohemia, Sept. 25, 1741), a good violinist and prolific composer. Having received a good education, general and musical, he went to Prague to study philosophy and theology at the university, and counterpoint under Segert. Here he formed a friendship with Dittersdorf,

who engaged him as first violin in the band of the Bishop of Grosswardein. Having spent two years as Musikdirector to Count Louis von Hartig in Prague, he entered the orchestra of the court theatre at Vienna, and was sent thence, on the recommendation of the Empress, to Milan, as *compositore di musica* to the Archduke Ferdinand. He now took as much pains in perfecting himself by intercourse with Nardini as he had previously done in the case of Dittersdorf. He visited all the principal cities of Italy, and was elected a member of the Filarmonici, both of Bologna and Mantua. The occupation of Milan by the French in 1796 drove the Archduke back to Vienna, and Pichel not only accompanied him, but remained in his service till his death on Jan. 23, 1805, in spite of an offer twice renewed of the post of Imperial Kapellmeister at St. Petersburg. Pichel's industry was extraordinary, and that his compositions were popular is proved by the fact that a large part of them were published in Paris, London, Amsterdam, Berlin, Offenbach and Vienna. He sent a complete list in 1803 to Dlabacz, the Bohemian lexicographer, who inserted it in his *Allgem. hist. Künstler-Lexicon für Böhmen* (Prague, 1815). An abstract of the extraordinary catalogue is given by Fétis and Gerber. The works—nearly 700 in number—include 88 symphonies; 13 serenatas; violin concertos and solos; duets, trios, quartets and quintets for strings; concertos for various wind instruments; sonatas, etc., for PF.; 14 masses, and many church works of various kinds; 25 operas to German, Latin, French and Italian librettos; and 'Sei ariette,' words by Metastasio, op. 42 (Vienna, Eder). For Prince Esterhazy he composed 148 pieces for the baryton in several parts; and in addition to all wrote a Bohemian translation of Mozart's 'Zauberflöte.' C. F. F.

BIBL.—ROBERT KOLIKER, *Wenzel Pichls Kammermusik*. (Vienna Dissertation, 1918.)

PICK-MANGIAGALLI, RICCARDO (b. Strakonitz, July 10, 1882), composer, studied in Prague, Vienna and Milan. He has produced distinctive work, both in chamber music and opera. A number of compositions for the piano, a string quartet, and a violin sonata were written between 1904 and 1910. His first stage work, 'Salice d'Oro,' a musical fable, was produced at La Scala, Milan, in 1913, and was followed by 'Il carillon magico' (1918). Other stage works are 'Sumitra,' a monomimic legend (1917), and 'Basi e Bote' (1919-1920), lyric comedy, the libretto by Boito (see *Mus. T.*, May 1921).

PIECE (Fr. *pièce, morceau*; Ger. *Stück*; Ital. *pezzo*). This word, which in the 17th and 18th centuries was used generally for a literary composition (for examples see the criticisms in the *Spectator*, vols. 4 and 5, on 'Paradise Lost,' which is constantly spoken of as 'that sublime

piece"), and in later times for a dramatic work, has since the end of the 18th century been applied to instrumental musical compositions as a general and untechnical term. The earliest application of the word in this sense is to the component parts of a suite, which are called pieces (compare the French 'Suite de pièces'). It is not as a rule applied to movements of sonatas or symphonies, unless such movements are isolated from their surroundings, and played alone; nor is it applied to the symphonies or sonatas taken as a whole. An exception to this rule is found in the direction at the beginning of Beethoven's Sonata, op. 27, No. 2—'S. deve suonare tutto questo pezzo (the first movement) delicatissimamente e senza sordini.' It is not used of vocal music, except in the cases of portions of operas, such as finales, etc., for many voices, to which the name 'Concerted piece,' 'Pezzo concertante,' is not infrequently given. M.

PIELTAIN, DIEUDONNÉ PASCAL (b. Liège, Mar. 4, 1754; d. there, Dec. 10, 1833), pupil of Giomovichi. He appeared from 1778 until 1783 at the Concert Spirituel, Paris; in the latter year he became list violin at the Hanover Square (from 1785 the professional) concerts. In 1791 he became conductor at Vauxhall Gardens. In 1793 he toured in Germany, Russia and Poland, afterwards retiring to Liège. Burney describes his playing as neat and with precision. He composed concertos, sonatas, duets and solos for violin; also string quartets. His brother was a celebrated horn player in London, who married Miss Chenu, a noted singer (Pohl, *Mozart und Haydn in London*; Mendel; Q.-L.).

PIENO (or **PLENO**), 'full.' Examples of the use of this direction may be found in Handel's organ concerto, where 'Organo pieno' denotes that the organ part is to be played with full harmonies, as well as what is now called 'full,' i.e. with the full force of the stops. M.

PIERNÉ, HENRI CONSTANT GABRIEL (b. Metz, Aug. 16, 1863), studied at the Paris Conservatoire, winning the first medal for solfège in 1874, the first prize for piano in 1879, for organ in 1882, and for counterpoint and fugue in 1881; he gained the Prix de Rome in 1882 with his 'Edith.' He succeeded César Franck as organist of Sainte Clotilde in 1890 and held the post for eight years. In 1903 he became deputy conductor at the Concerts Colonne and replaced E. Colonne at his death in 1910. He is a member of the directing committee of studies at the Conservatoire, and since 1925 has been a member of the Académie des Beaux-Arts at the Institut. He gives regular concerts with the co-operation of the orchestra of which he is conductor.

LIST OF WORKS

DRAMATICO: 'Les Elfes' (1884); 'Pandore' (1888); 'Le Coupe enchantée,' comic opera, two acts (Royan, Casino, Aug. 24, 1888); one act (Opéra-Comique, Paris, Dec. 26, 1908); 'La Nuit de Noël

de 1870' (Concerts de l'Opéra, Dec. 8, 1895; 'Vendée,' three acts (Lyons, Grand Théâtre, Mar. 11, 1897); 'La Fille de Tabarin,' three acts (Opéra-Comique, Paris, Feb. 8, 1901); 'Cydalis et le chèvren-pied,' two acts, (Opéra, Paris, Jan. 15, 1903); 'On ne badine pas avec l'amour,' three acts (Opéra-Comique, Paris, May 30, 1910).

Amongst his former ballets and pantomimes may be mentioned: 'Pantomimes': 'Le Collier de saphirs' (Spa, Paris, 1891); 'Le Docteur Blanc' (Menus-Plaisirs, 1898); 'Salomé' (Comédie Parisienne, 1906).

BALLETS: 'Les Joyeuses Commères de Paris' (1892); 'Bouton d'or' (both at the Nouveau Théâtre, 1893).

He has composed much incidental music to: 'Isely'; 'La Princesse lointaine'; 'La Samaritaine' (Théâtre de la Renaissance, 1894, 1895, 1897); 'Yankee'; 'Ramattha' (Odéon, 1894, 1908); 'Françoise de Rimini' (Théâtre Sarah Bernhardt, 1905); 'Hamlet' (not published); also the following:

'L'An mil,' symphonic poem for orchestra with chorus (1897); 'La Croisade des enfants' (1902), musical legend, which received a prize in the competition of the Ville de Paris in 1903; 'Les Enfants de Bethléem,' a mystery, in two parts (1907), have earned him a well-deserved reputation, not only in France, but in Holland, Germany and in the United States.

He has also written numerous songs since 1879, the most recent of which are 'Six ballades françaises' (Paul Fort), 1921; organ and harp music; op. 39, 'Concertstück' for harp and orchestra (Queen's Hall, 1905).

PIANOFORTE: 'Etude de concert'; 'Humoresque'; 'Bagatelle'; 'Album pour mes petits amis' (including the 'Marche des petits soldats de plomb'; Variations (1910).

PF. AND ORCH.: 'Fantasie-ballet'; concerto in C min. (1887); 'Scherzo-caprice'; 'Poème symphonique' (1901), etc.

ORCHESTRAL: 'Oùles ouvertures symphoniques'; 'Marche solennelle,' etc.; 'Paysages franciscains' (1920).

CHAMBER MUSIC: Separate pieces for various instruments; sonata, (PF. and viol., 1900); quintet (PF. and str.), trio (PF. vla. and v'cl.); sonata for v'cl. and PF. in one part (Société Nationale de Musique, Feb. 22, 1919).

Collections and arrangements of songs: 'Voyez comme on danse'; 'Sonner les matines'; 'Gai, gai, marions-nous,' etc. (1903, 1904, 1907).

BIBL.—O. SÉZÉ, *Musiciens français d'aujourd'hui*, 2nd ed. (Paris, *Musée de France*, 1922), with list of works and extensive bibliography. M. L. P.

PIERRE, CONSTANT VICTOR DÉSIRÉ, (b. Paris, Aug. 24, 1855; d. there, Jan. 1918), first *accessit* of bassoon at the Paris Conservatoire, played the bassoon in various orchestras, and in 1900 was appointed assistant secretary at the Conservatoire. He became editor of the *Monde musical*, contributed to the *Art musical*, *Ménestrel*, *Journal musical*, etc., and was author of the following books: *Les Noëls populaires* (1886); *La Marseillaise et ses variantes* (1887); *Histoire de l'orchestre de l'Opéra de Paris* (1889); *La Facture instrumentale à l'Exposition de 1889* (1890); *Les Facteurs d'instruments de musique, les luthiers et la facture instrumentale* (1893); *Le Magasin de décors de l'Opéra 1781-1894* (1894); *L'École de chant de l'Opéra 1672-1807* (1895); *B. Sarrette et les origines du Conservatoire*, etc. (1895); *Les Anciennes Écoles de déclamation dramatique* (1895); *Notes inédites sur la musique de la Chapelle royale, 1552-1790* (1899); and *Le Conservatoire national de musique et de déclamation: documents historiques et administratifs* (1900), with a complete list of Pierre's works; *La Musique aux fêtes et cérémonies de la Révolution française*; *Musique des fêtes et cérémonies de la Révolution française*; *Les Hymnes et chansons de la Révolution française* (1901). In the year last mentioned his book on *Le Concert spirituel, 1726-1790* (1900), was crowned by the Institut. Many articles by him are in the Parisian reviews. G. F.

PIERROT AND PIERRETTE, lyrical musical drama in 2 acts; text by Walter E. Grogan, music by Holbrook. Produced His Majesty's Theatre, Nov. 11, 1909.

PIERSON (originally **PEARSON**), **HENRY** Hugo (b. Oxford, Apr. 12, 1815; d. Leipzig,

Jan. 28, 1873), was the son of the Rev. Dr. Pearson, of St. John's College, afterwards chaplain to George IV., and Dean of Salisbury. He was sent to Harrow School, where he gave proof of the possession of no common abilities, gaining the Governors' prize for Latin hexameters. From Harrow he proceeded to Trinity College, Cambridge, intending, at that time, to take a medical degree. His genius, however, developed so rapidly as to make it evident that music was his destined career. He received his first instruction from Attwood, and was also indebted to Arthur Corfe. His first musical publication was a series of six songs entitled 'Thoughts of Melody'—the words by Byron—written while an undergraduate at Cambridge.

Pearson went to Germany for the first time in 1839, and studied under C. H. Rink, Tomaschek and Reissiger. At Leipzig he had much intercourse with Mendelssohn, and during his residence in Germany also became acquainted with Meyerbeer, Spohr and Schumann. Schumann reviewed the above-mentioned six songs most favourably in the *Neue Zeitschrift für Musik*. In 1844 Pearson was elected to the Reid Professorship of Music in the University of Edinburgh, in succession to Sir Henry Bishop; but this post he very soon resigned, and returned to Germany, which from that time he virtually adopted as his country, changing his name from Henry Hugh Pearson to that given above. He had married Caroline Leonhardt, a lady distinguished by varied gifts and literary productions; and the sympathy thenceforward accorded to his genius in continental society was undoubtedly more congenial to his feelings than the slight appreciation he received from English critics.

His first important work, after an early attempt, 'Der Elfensieg' ('The Elves and the Earth King'), given at Brunn in 1845, was the opera 'Leila,' which was brought out at Hamburg with great success in Feb. 1848. From this opera may be instanced a striking song for bass voice, 'Thy heart, O man, is like the sea.' Much of his music at this time was published under the *nom de plume* of 'Edgar Mansfeldt.'

In 1852 appeared the oratorio 'Jerusalem.'¹ This, although not composed expressly for the Norwich Festival, was performed there on Sept. 23 in that year with remarkable effect. The overture, the airs 'Of the rock that begat thee' and 'O that my head were waters,' the air and chorus 'What are these,' the quintet 'Blessed are the dead,' and the chorus 'The Eternal God is thy refuge,' are some of the most interesting numbers. The success of the work was marred by a foolish attempt to pit Dr. Bexfield's 'Israel Restored' against it;

the controversy had hardly died down when the oratorio was repeated at Exeter Hall on May 18, 1853, by the Harmonic Union; it was given again in 1862, at Würzburg.

Pearson's next work was the music to the second part of Goethe's 'Faust,' composed in 1854, which added greatly to his reputation in Germany. It was repeatedly performed at Hamburg, and a selection from it, including the noble chorus 'Sound, immortal harp,' was given at the Norwich Festival of 1857. In acknowledgment of the merit of this composition, the author received the Gold Medal for Art and Science from Leopold I., King of the Belgians, who accepted the dedication of the pianoforte score. It was performed several times at Frankfort and other places on successive anniversaries of Goethe's birthday. Pearson was requested to write for the Norwich Festival of 1869, and offered a selection from a second oratorio, 'Hezekiah.' This work was never completed; but several numbers were performed on the above-named occasion in Sept. 1869. 'Contarini,' an opera in five acts, produced at Hamburg in Apr. 1872, was Pearson's last work on a large scale; another opera, 'Fenice,' was given posthumously at Dessau in 1883.

To the works already mentioned, however, must be added a very large number of songs, written at different dates, and bearing, on the whole, more than any other of his works, the stamp of his characteristic style and delicate invention. As good examples may be cited 'Deep in my soul,' 'Thekla's Lament,' and 'All my heart's thine own.' His spirited part-song 'Ye mariners of England' was constantly performed. He left a vast number of works in manuscript, including several overtures, three of which—those to 'Macbeth,' 'As you Like It' and 'Romeo and Juliet'—were performed at the Crystal Palace Concerts.

He died at Leipzig, and lies buried in the churchyard of Sonning, Berks. His death called forth remarkable tributes from the German musical press, showing the high estimation in which he was held there. A Leipzig journal published on the day after his death, after speaking of him as a 'great artist, whose strivings were ever after the noblest ends,' continues as follows:

'Holding no musical appointment, and consequently without influence; highly educated, but after the fashion of true genius, somewhat of a recluse, and withal unpractical, he did not know how to make his glorious works valued. He showed himself seldom, though his appearance was poetic and imposing; and he was such a player on both organ and pianoforte as is rarely met with.'

The above estimate of Pierson's powers, from the pen of the composer's brother, has hardly obtained general acceptance; for his comparative failure in his native land, the inordinate Mendelssohn-worship of his day has

¹ An elaborate criticism of 'Jerusalem,' from the pen of G. A. Macfarren, was published in the *Mus. T.* of Sept. 1, 1852.

been often assigned as a reason, and Pierson was one of the few who even then discerned that master's weak points. Beside this, however, there is in his more ambitious work a singular lack of continuity of style, which is more than enough to account for the lack of appreciation from which his music has suffered. See the *History of the Norwich Festivals* (1896), p. 135. H. F.

PIERSON, MARTIN, see PIERSON.

PIETEREZ, ADRIAN (b. Bruges, early 15th cent.), the earliest known organ-builder in Belgium. He built an instrument in 1455 at Delft, which is still in the new church; but it has been so often restored that nothing remains of his work. v. de P.

PIÉTON, LOYSET (LOUYS, LOUYSET) (b. Bernay, Normandy, last quarter of 15th cent.; d. after 1545). There is much confusion between him and the older Loyset Compère which has yet to be cleared up, as their life periods overlap to some extent, and eminent composers of that time were distinguished merely by their Christian names. Where, however, the designation 'de Bernais' or 'le Normand' is added it can only refer to Piéton, as Compère was a Fleming who was from his boyhood to his death attached to St. Quentin Cathedral. Although he never attains the height of the older master he occupies a very prominent position among the masters of that period. Lists of his masses, motets, psalms, etc., from collective volumes are given by Fétis, Mendel and in Q.-L., which latter must, however, be modified according to what has been said above.

E. v. d. s.

PIETOSO, 'pitiful' or 'compassionate.' As a musical direction it indicates that the passage to which it refers is to be performed in a sympathetic style, with much feeling. Although the term appears in Brossard's Dictionary, where it is defined as 'd'une manière capable d'exciter de la pitié ou de la compassion,' composers seem to prefer other terms to indicate the same intention; 'con duolo,' for example, or the more frequent if less definite 'espressivo.'

PIFFERO is really the Italian form of the English word *Pife*, and the German *Pfeife*. In the *Dizionario della musica* it is described as a small flute with six finger-holes and no keys. But the term is also commonly used to denote a rude kind of oboe, or a bagpipe with an inflated sheepskin for reservoir, common in Italy, and formerly to be seen about the streets of London, the players being termed Pifferari. (See PASTORAL SYMPHONY.)

Spohr, in his *Autobiography* (Dec. 5, 1816), quotes a tune which he says was played all over Rome at that season by Neapolitan pipers, one playing the melody on a sort of 'coarse powerful oboe,' the other the accompaniment on a bagpipe sounding like three clarinets at once. We give a few bars as a specimen.

It is a very different tune from Handel's 'Pastoral Symphony.' W. H. S.

PIGOTT (PIGGOTT), (1) FRANCIS, Mus.B. (d. May 15, 1704), appears to have been organist of St. John's College, Oxford, and was appointed, Jan. 18, 1686, organist of Magdalen College, Oxford, which office he resigned in 1687. He was chosen, May 25, 1688, first organist of the Temple Church. On Dec. 11, 1695, he was sworn organist extraordinary of the Chapel Royal, and on Mar. 24, 1697, on the death of Dr. Child, organist in ordinary. He graduated at Cambridge in 1698. He composed some anthems, now forgotten, and contributed to the 'Choice Collection of Ayres for the harpsichord, by Blow, F. Pigott, etc.' 1700. He was succeeded as organist of the Temple by his son, (2) J. PIGOTT (d. 1726), who became possessed of a large fortune on the death of his relation, Dr. John Pelling, rector of St. Anne's, Soho. (3) FRANCIS PIGOTT, jun., who held the appointment of organist at St. George's Chapel, Windsor, and Eton College, up to 1756, was probably a grandson of Francis (1). W. H. S.

PIJPER, WILLEM (b. Zeist, Sept. 8, 1894), is one of the most gifted of the younger generation of Dutch composers. His works include two symphonies, the first of which was performed by Mengelberg at Amsterdam in 1918; chamber music and songs. One of his sonatas was heard at the Salzburg meeting of the International Society for Contemporary Music in 1922. At first Pijper's compositions showed the influence of both Debussy and Mahler; now he is one of the seekers after 'atonality' R. M^o.

PILGRIME VON MEKKA, DIE, see RENCONTRE IMPRÉVUE, LA.

PILKINGTON, (1) FRANCIS (d. 1638), madrigal composer, was probably of the Lancashire family, though his parentage cannot be traced, nor is the date of his birth known.¹ His father and brother were in the service of the Earl of Derby, and Francis no doubt came to Chester through the influence of the same nobleman, as

¹ In a MS. Chester Ordinary of Arms (c. 1600), formerly belonging to Dean Cholmondeley of Chester, we find his arms: *Fleur Pilkington, erlis musice bacallari's argent a cross-pance Gules voided of the field: in the fesse point a trefoll sable for difference.*

the Stanleys were persons of great consequence in the city. He took his degree of Mus.B. from Lincoln College, Oxford, in 1595, and the Graces for his degree call him 'Pilkington,' and state that he had studied music for sixteen years, and that his exercise was to consist of a 'Choral song in six parts.'

He appears for the first time on the Chester Cathedral Treasurer's books as a singing-man or conduct—or, as Pilkington styles himself, a 'Chaunter'—at Midsummer, 1602.

Bateson was already at Chester, and must have been preparing his first book for publication, which came out in 1604. This was speedily followed, perhaps in friendly emulation, by Pilkington's first compositions;

'The First Books of Songs or Ayres of 4 parts; with Tabletures for the Lute or Orpherian, with the Violl de Gamba. Newly composed by Francis Pilkington, Bachelor of Musick, and Lutenist; and one of the Cathedral Church of Christ, in the Citty of Chester. (Folio.) London, printed by T. Bate, dwelling in Aldersgate-street, and are ther to be sold, 1605.'

It is dedicated

'To the Right Honourable William Earl of Derby, Lord Stanley, Lord Strange of Knocking, and of the Isle of Man, and Knight of The Most Noble Order of the Garter';

and in the preface Pilkington says:

'I must confess my selfe many waies obligated to your Lordship's familie, not onely, for that my Father and brother received many Graces of your Honour's noble father whom they followed, but that myself had the like of your most honourable Brother even from the first notice he chanced to take of me.'

The book contains twenty-one vocal pieces and a 'Pavin for the Lute and Bass Viol.' The whole work was reprinted, with a biographical memoir, in the OLD ENGLISH EDITION by G. E. P. Arkwright (Nos. xviii., xix. and xx.); also in ENGLISH SCHOOL OF LUTENIST SONG WRITERS (q.v.). About 1612 Pilkington became a minor canon. His ordination is not in the Bishop's Registry, but his admission to priest's orders is shown by the following extract from the baptismal entries of Holy Trinity Church, Chester: '1614. 23 Decemb. Elizabeth dau. to Rich. Knee Saylor. Baptized by Mr. Francis Pilkington curat of this church beinge made a full minister by Geo. Lloyd bushop of Chester 18 of December beinge the first child he baptized.' In 1614 he issued his second work:

'The First Set of Madrigals and Pastorals of 3, 4 and 5 parts. Newly composed by Francis Pilkington, Bachelor of Musick, and Lutenist, and one of the Cathedral Church of Christ and blessed Mary the Virgin, in Chester. [4to.] London, Printed for M. L., J. B. and T. S., the assignees of William Barley, 1614.'

It is dedicated

'To the Right Worshipfull Sir Thomas Smith, of Hough, in the County of Chester.'

Pilkington says,

'It is unworthy, yet in regard of the many and manifold favours which I have received at your hands, and your exquisite skill both in theorie and practise of that excellent art, I doe presume to send it to your patronage and protection.'

He dates the preface, with pardonable pride, 'from my own mansion in the monastery, Chester, the 25th day of September 1612.' The contents consist of six pieces for three voices, nine for four voices, and seven for five voices.

The words of No. 11, 'Have I found her?' were afterwards set by Bateson.

On the other hand, No. 21, 'When Oriana walkt to take the ayre,' is a setting of the same words as Bateson's madrigal for the 'Triumphes of Oriana'; the only difference being in the concluding lines, where the couplet—

'Thus sang the Nymphs and Shepherds of Diana:
In Heaven lives fair Oriana,'

shows that Pilkington had written this after the death of Elizabeth. (See *Eng. Madr. Sch.* vol. xxv.)

In 1614 appeared 'The Teares or Lamentations of a Sorrowfull Soule,' compiled by 'Sir William Leighton, Knight, one of His Majesty's Honourable Band of Gentleman Pensioners.' To this work Pilkington contributed a 'song' or anthem in four parts, 'Hidden O Lorde'; and another in five parts, 'High, Mighty God.' Probably Sir William Leighton was a relative of the Thomas Leighton whom Pilkington had commemorated in an elegy in his first work, 1605.

Pilkington's last work:

'The Second set of Madrigals and Pastorals of 3, 4, 5 and 6 parts: apt for Violla and Voyces. newly composed by Francis Pilkington, Bachelor of Musick, and Lutenist, and Chaunter of the Cathedral Church of Christ and blessed Mary the Virgin, in Chester.' [4to.] London, Printed by Thomas Snodham for M. L. and A. B., 1624.

It is dedicated

'To the Right Worshipfull and worthy of much honour Sir Peter Leigh of Lyme, Knight.'

(See *Eng. Madr. Sch.* vol. xxvi.)

The work consists of six madrigals for three voices, six for four voices, eight for five voices, five for six voices, a 'Fancie for the Violla' only, and 'a Pavin made for the orpharion, by the Right Honourable William, Earle of Darbie, and by him consented to be in my bookes placed.'¹ There are also two laudatory poems by William Webbe and Henry Harper. The latter (who had been a chorister and afterwards became chapter clerk) gives the following remarkable and bold estimate of British musicians, which time has fully justified:

'... and must the matchlesse excellences
Of Bird, Bull, Dowland, Morley, and the rest
Of our rare artists (who now dim the light
Of other lands) be only in Request?'

Although he hoped to 'lagge on one journey more,'² Pilkington never, so far as we know, published anything further. He became precentor in 1623, and held this office until his death. It seems probable that he was buried in his native place, for his name does not occur in the old Cathedral (St. Oswald's) register of burials. His will is not entered in the Chester Probate Court.

There is a little lute music by him in the B.M. Add. MSS. 31,392, and in the Cambridge University Library (Dd. ii. 11).

¹ This Pavin has some importance attached to it by a modern French writer who has advanced a theory that the author of the Shakespeare plays was in reality the aforesaid Earl of Derby. As Shakespeare's plays show a decided love and taste for music, Le France attributes this Pavin as evidence of the musical skill of his suggested author.

² Preface to 'The Second set of Madrigals.'

As he speaks of his 'now aged muse'¹ in 1624, it is probable that Pilkington came to Chester when fairly old, and he seems to have been married, and to have had a large family, judging from the Treasurer's books, which mention the following members of the family:

(2) ZACHARIAS. A chorister for several years, ending 1612.

(3) THOMAS,² chorister from 1612-18. In 1625 he appears again as 6th conduct. In 1627 we find him and Francis still filling their respective positions, and another.

(4) THOMAS as third chorister.

Lastly we find that at his death in 1638 Francis Pilkington's place as minor canon was filled by (5) a JOHN PILKINGTON, who had been previously appointed a conduct.

(Cathedral Treasurer's accounts and other Chester information. Memoir by G. E. P. Arkwright in *Old English Edition*.) J. C. B.

Francis Pilkington's book of Ayres is one of those the music of which was designed for performance in two ways; either by four voices unaccompanied or as solo-song with accompaniment of the lute or bass viol. Several of these songs have considerable charm, notably 'Diaphenia, like the daffdownilly,' and 'Now peep, bo-peep.' As a madrigal writer Pilkington seldom rises to great heights, although several of his madrigals are well written. By far the finest is 'O softly-singing lute,' a superb madrigal, which challenges comparison with the very best of Wilbye's work. In 'Care for thy Soul' in the second set of madrigals there are some very remarkable chromatic passages; but as the set was not published until 1624 chromatic harmonies were already losing something of their novelty.

E. H. F.

PINAFORE, H.M.S., comic opera in 2 acts; words by W. S. Gilbert, music by Sullivan. Produced Opéra-Comique, London, May 25, 1878.

G.

PINCÉ (Fr.) plucked or pinched. (1) The term is used to describe stringed instruments that are not bowed, such as the lute, mandoline, guitar, zither, as well as the harp; the *pizzicato* of the instrument of the violin family is also called 'pincé' by some writers.

(2) The French equivalent for MORDET (q.v.). See also ORNAMENTS.

M.

PINEL, the name of four French lutenists.

(1) PIERRE, who lived in 1641.

(2) GERMAIN (d. 1664), lutenist of the King's chamber in 1646, lute-master to the King (1649).

¹ Preface to 'The Second set of Madrigals.'

² It seems almost certain that this was the Thomas Pilkington mentioned by Anthony à Wood in his *Festi Oxonienses*, vol. i. p. 266. He refers to 'Francis Pilkington, of Lincoln College, Bachelor of Music,' and says: 'Some of his compositions I have seen, and I think some are extant. He was father to, or at least near of kin to, Thomas Pilkington, one of the musicians belonging sometimes to Queen Henrietta Maria; who being a most excellent artist, his memory was celebrated by many persons, particularly by Sir Aston Cockain, Baronet, who hath written [in his *Choice Poems of several sorts*, etc., London, 1686] his funeral elegy and his epitaph. The said Thomas Pilkington died at Wolverhampton, in Staffordshire, aged thirty-five, and was buried there, in the times of the rebellion or usurpation.'

He married in 1640. According to de La Lauerencie, a great number of pieces attributed to his son, François, are really by him.

(3) FRANÇOIS (d. circa 1709), son of the preceding, appears with his father and his brother, Séraphin, in the 7th entry of the 'Ballet de Psyché' (Jan. 16, 1656). Elected 'enseigneur à Sa Majesté' (1657), he succeeded Claude Tissu as 'ordinaire de la musique de la chambre du roi pour le théorbe' (1657). He resigned (Sept. 1, 1771) in favour of Laurent Dupré.

(4) SÉRAPHIN, brother of the preceding, had the 'survivance' of his father's post in 1659. After 1664 we lose trace of him.

Bibl.—MICHEL, BARRET, *R.M.F.* 1686-96; H. FROSTHAUS, *Sammlung der I.M.G.* July 1914; J. de LA LAUERENCIE, *Les Luthistes français* (in preparation, 1926).

J. G. F.

PINELLI (PENELLI), ETTORE (b. Rome, Oct. 18, 1843; d. there, Sept. 15, 1915), violinist and conductor, was a pupil of Ramaccioti in Rome and of Joachim at Hanover. His professional career was pursued chiefly in Rome, where he furthered the study of concerted chamber music. His co-operation with SCAMBATI (q.v.) in a movement which resulted in the foundation of the Liceo Musicale is described under ROME. He became violin professor at the Liceo, conducted orchestral concerts, gave oratorio performances, and composed a string quartet, an overture and other works.

PINELLO DI GHERARDI, GIOVANNI BATTISTA (b. Genoa, c. 1540; d. Prague, June 15, 1587). On the title-page of his first-known publication in 1571 he is described as belonging to a noble Genoese family (*nobile Genovese*), and as being at that time cantor in the Cathedral Church of Vicenza. In 1577 he was at Innsbruck, a musician in the service of the Archduke of Austria. He is next heard of as a member of the Imperial Chapel at Prague, from which in 1580 he was recommended by the Emperor to the Elector Augustus of Saxony, who appointed him Kapellmeister to the Electoral Chapel at Dresden, in succession to Scandelli. Various causes of friction arose between Pinello and his Dresden colleagues, so that in 1584 the Elector was obliged to dismiss him. Pinello returned to the Imperial Chapel at Prague, where he remained till his death. His first publications consist of four books of *Canzoni napolitane a 3*, but no traces remain of the first book. The others were published at Venice in 1571, 1572 and 1575. The fourth book is described as containing some pastorals and *una battaglia in lode della vittoria Christiana*, which must refer to the battle of Lepanto, 1571. His other publications consist of works especially composed for the use of the Electoral Chapel at Dresden and the Imperial Chapel at Prague, a volume of German Magnificats on the Church tones a 4 and 5, with some Bene-

dicamus (Dresden, 1583), and two books of motets (Dresden, 1584, and Prague, 1588). There is also a book of German songs *a 5* (Dresden, 1584), after the fashion of Canzoni napolitane. The collection of Bodenschatz contains a motet *a 8*, *Pater peccavi*. Yonge's 'Musica Transalpina,' 1588, has one of his madrigals with English words. J. B. M.

PINI CORSI, ANTONIO (*b. Zara, June 1859; d. Milan, Apr. 21, 1918*), Italian baritone. His powerful and flexible voice ripened early, and Pini Corsi was only 19 years old when he made his début in Cremona. He interpreted with equal distinction comic and serious parts, although in the later part of his career he sang mostly comic parts, in which rôles he was unsurpassed by any other Italian singer of his day. Verdi chose him as a member of the first cast of *Falstaff*. F. B.

PINSUTI, CIRO (*IL CAVALIERE*) (*b. Sinalunga, Siena, May 9, 1829; d. Florence, Mar. 10, 1888*), was grounded in music and the piano by his father; at 10 he played in public; at 11, being in Rome, he was made honorary member of the Accademia Filarmónica, and was taken to England by Henry Drummond, M.P., in whose house he resided until 1845, studying the pianoforte and composition under Cipriani Potter, and the violin under H. Blagrove. In 1845 he returned home, and entered the Conservatorio at Bologna, where he became the private pupil of Rossini, taking a degree there in 1847. In 1848 he went back to England and started as a teacher of singing, dividing his time between London and Newcastle. His first opera, 'Il mercante di Venezia,' was brought out at Bologna, Nov. 8, 1873; a second, 'Mattia Corvino,' at La Scala at Milan, Mar. 24, 1877; and a third, 'Margherita,' at Venice in 1882. In 1859 he composed the *Te Deum* for the annexation of Tuscany to the Italian kingdom, and was decorated with the order of SS. Maurice and Lazarus. In 1878 King Humbert further created him a knight of the Italian crown. In 1871 he represented Italy at the opening festival of the International Exhibition, and contributed a hymn to words by Lord Houghton, beginning, 'O people of this favoured land.'

From 1856 he was professor of singing at the R.A.M. In addition to a large circle of pupils of all ranks, many eminent artists have profited by his counsels, as Grisi, Bosio, Patti, Ronconi, Graziani, Mario, etc. His part-songs were for long great favourites with the singing-societies of England. The list of his published compositions embraces more than 230 songs, English and Italian, 35 duets, 14 trios, 45 part-songs and choruses and 30 PF. pieces, the *Te Deum* and the opera 'Il mercante di Venezia' already mentioned. G.

PINTO, (1) THOMAS (*b. England, 1714; d. 1783*), son of a Neapolitan of good family, at

11 years played Corelli's concertos, and led the concerts in St. Cecilia's Hall in Edinburgh. His reading at sight was marvellous; he would even turn the book upside down, and play correctly from it in that position. His great gifts inclined him to carelessness, from which he was fortunately roused by the appearance of Giardini. About 1745 he married Sibilla Gronamann, daughter of a German pastor. After 1750 he played frequently as leader and soloist in benefit concerts, at the Worcester and Hereford Festivals, at Drury Lane Theatre, and, after Giardini, at the King's Theatre. He replaced Giardini in 1757, and after his wife's death he married (in 1766) Miss CHARLOTTE BRENT (*q.v.*), the singer, who died in 1802. A speculation with regard to Marylebone Gardens, into which he had entered with Dr. Arnold, failed, and he took refuge in Scotland, and finally in Ireland. In Sept. 1773, he was appointed leader of the band of the Smock Alley Theatre, Dublin, and remained in that post until 1779; he conducted at a Rotunda Concert in 1780, and he died soon afterwards. A daughter by his first wife married a Londoner named Sanders,¹ and had a son,

(2) GEORGE FREDERIC (*b. Lambeth, Sept. 25, 1786; d. Little Chelsea, Mar. 23, 1806*), took his grandfather's name. He early showed a decided talent for music, and the education and progress of the pretty and lively boy were watched over with the greatest interest by his mother's stepmother. His first teachers were soon outstripped, and then Salomon proved a first-rate master and true friend. From 1796 to 1800 the young Pinto frequently appeared at Salomon's concerts, and afterwards under his wing at Bath, Oxford, Cambridge, Winchester, and specially in Scotland. A second and longer tour extended to Paris. Besides playing the violin, he sang with taste, and made considerable progress on the pianoforte, for which he composed, among other music, a sonata dedicated to his friend John Field. In 1805 his health, never strong, suddenly broke down, having been undermined by excesses, and he died at Little Chelsea. His remains lie in St. Margaret's, Westminster, beneath the same monument as those of his grandmother. Pinto's technique was perfect, and his tone full, powerful and touching. Three sets of canzonets were published in 1805, 1807 and 1846 respectively; three duets for two violins appeared as op. 5; three sonatas for pianoforte as op. 4; and three sonatas for PF. and violin were published in 1805.

C. F. P.; addns. W. H. G. F.

PIOCHI, CHRISTOFORO, maestro di cappella in 1623 of Amelia Cathedral, Umbria, from c. 1668 until after 1675 of Siena Cathedral. He

¹ One of his first works, the three sonatas for pianoforte, is 'to be had' . . . of Mrs. Sanders, No. 10 Bateman's Buildings, Soho Square.

composed motets, sacred songs, responsoria, ricercari, etc., also a theoretical treatise (Q.-L.).

PIOZZI, GABRIEL (d. Brynabala, Denbighshire, Mar. 1809), a Florentine of good birth, who, before 1781, had established himself in Bath as a music-master. He numbered among his pupils the daughters of Henry Thrale, the opulent brewer, and whilst engaged in instructing them won the heart of their widowed mother, whom he married in 1784, a proceeding which drew down upon the lady the wrath of Dr. Johnson, who had been for twenty years the cherished guest of Thrale and herself. After his marriage Piozzi visited Italy with his wife, and, returning to England, lived with her in uninterrupted happiness until his death. A canzonet of his composition for a soprano voice, called 'La contradizione,' is printed in the Musical Library, vol. iv. W. H. H.

PIPE AND TABOR (Fr. *galoubet et tambourin*). The pipe formerly used in this country with the tabor was of the flûte-à-bec or recorder type, but as it was held and played with one hand only (the right hand being used to strike the tabor), the usual six holes of the flute could not be fingered. Three holes only were bored, near the extremity end, two for the first and second fingers and one underneath for the thumb, and these sufficed to give a scale for an octave and five notes, for the available compass of the pipe began with the octave of its fundamental note. The proper tones, or 'harmonics' of a flute are *c'*, *c''*, *g'*, *c'''*, *e''*, *g'''*, etc., and when the first octave is abandoned, the next interval presenting itself is the fifth from *c''* to *g''*. Three holes are sufficient to give the intermediate notes, *d''*, *e'* and *f''* of the diatonic scale, and with certain cross-fingerings, chromatic notes can be obtained. The tabor was a diminutive drum, without snares, hung by a short string to the waist or left arm, and tapped with a small drumstick (see PLATE XXV. No. 2). There is a woodcut of William Kemp the actor playing pipe and tabor in his Morris dance to Norwich, and another of Tarleton, the Elizabethan jester, in the same attitude. The pipe and tabor were known in certain country districts as 'Whittle and Dub.'

In France the Galoubet is still in use in some parts of the country and is accompanied by either the Tambourin, as in Provence, an illustration of which is given under DRUM (5), or by the Tambourin de Béarn, which is not a drum, but a long sound-box having seven strings stretched along it, four being tuned to C and three to G, and struck with a stick.

D. J. B.

PIPELARE, MATHIEU (MATHÆUS) ('Pipe-, the notes *la*, *re*), a 15th-16th century Netherlandish composer of masses, motets, songs, etc., including a Mass on the favourite subject, 'L'homme armé.' He enjoyed a high

reputation in his time, and is quoted as an authority by Ornithoparchus (vol. 2, chap. 8). A list of his still extant compositions, between 1505-75, is in Q.-L.

PIPES, EVOLUTION AND DISTRIBUTION OF MUSICAL. Whether the drum, the pipe or the vibrating string has the best claim to be considered the first musical instrument must necessarily be an open question; there is, however, ample evidence to show that very early in the history of mankind the use of the musical pipe was known. Of so vast a subject a summary only can here be given, grouped according to the usual division of wind instruments under the following heads:

1. WHISTLE-PIPES, in which a thin stream of air is forced against a sharp edge, and, 'breaking' upon it, sets the air within a hollow tube or a resonating chamber in vibration. This was undoubtedly the earliest form of musical pipe, as testified by the bone whistles of the prehistoric cave-men and the records of the most ancient nations. At the first the instrument—a simple river reed or a hollow bone—was held vertically, and the breath of the performer, being directed across the open end, impinged on the opposite edge. The Arabian 'Nây' (the successor of the ancient Sebi), the modern 'Aulos' of Greece, the 'Kaval' of Bulgaria, the 'Bansee' of India, the 'Shakuhachi' of Japan, the 'Lena' of the Pueblo Indians, the ivory and reed flutes of Africa, the Maori whistles and the panpipes distributed over every continent are some existing types of this primitive form.

In the next step of its evolution a small notch is found cut on the edge of the pipe, as in the flutes of Uganda and other districts of Central Africa, and also in the Chinese Hsiao, and the Peruvian flute: the lower lip now partially covers the open end of the tube and the breath is sent more directly down the tube than across it. At length the upper end of the tube is almost entirely closed, either by the natural septum or knot of the cane, or by some prepared wax, the little notch only remaining and forming the well-known 'lip' of the whistle. In a flute used by the Indians of Arizona we can next trace a further development: the cane in this instrument is not cut off immediately above the knot, but allowed to remain as a mouthpiece, the air being directed over the septum and against the lower edge of the notch by a leaf or piece of rag tied tightly over the upper part of the orifice. Thus a primitive whistle-head of the flageolet type is produced, the performer no longer forming the embouchure with his lips, but simply blowing into the upper end of the tube. The flutes of the Kiowa and Dakota Indians are improved forms of the same type, and in the bone whistler from ancient graves in California the same result is obtained by a piece of asphaltum placed within the hollow centre just above the notch

MUSICAL INSTRUMENTS — SPAIN, c. 1270

(Library of the Escorial, Cantigas de S. Maria)

1. Oboe (*Dulzaina*).
2. Pipe and Tabor (*Flautilla y Tamboril*).
3. Flute (*Arabeles*).
4. Bladder Pipe (*Oletrillo*).
5. Bagpipe (*Cornemusa*).
6. Horn (*Buque*).
7. Herald's Trumpet (*Almofa*).

In the wooden whistles of the American Indians of the N.W. Coast the whistle-head is brought to great perfection, and the 'voicing' is quite equal to that of the European recorders and flageolots. The whistle-head, as seen in the 'flue' pipes of the organ, was certainly known to the Greeks and Romans (see article *HYDRAULUS*), and in the Western Hemisphere to the Aztecs and Incas. The resonator of the ocarina, which takes the place of the more usual tube, is prefigured in the ancient Chinese 'Hsuan,' in the grotesque instruments of the Aztec civilisation, and the globular gourd-whistles of Western Africa and Melanesia.

The transverse flute, which in its mouth-piece and embouchure still retains elements of the primitive notch, is distinctly an Asiatic instrument, though occasionally found among certain African tribes in the neighbourhood of the Cameroon and lower Congo districts, where it has been probably introduced by Europeans. An unknown antiquity is attached to the ancient Chinese *Chih*, which being closed at both ends suggests an affinity with the nose-flutes of Java and Polynesia; in fact, amongst the wild tribes in the Malay Peninsula the transverse flute and the nose-flute are the only forms known. The Indian transverse flute ('*Pillagovi*') is depicted in sculpture as early as 250 B.C., and is considered the emblem of the god Krishna, its reputed inventor. The earliest illustration of the type in Europe appears on an ivory casket of Italo-Byzantine work of the 10th century, now in the National Museum, Florence. For subsequent history see *FLUTE*.

2. *REED-PIPES*, in which the air is set in motion by the pulsations of a tongue of wood, cane, or metal or by the joint vibrations of two thin slips of the same materials, the forms now most generally in use being known as the Double Reed (see *OBOE*), the Single Reed (see *CLARINET*), and the Free Reed (see *HARMONIUM*).

Of these the double reed is probably the oldest, as it is also the simplest in construction, requiring only the bringing together by gentle pressure of the open end of a pliant stalk or hollow rush as in Chaucer's 'pipis of grene corn.' Owing to its fragile nature the reed is now usually separate from the body of the pipe, which is made of more durable material, but the American Indians of the N.W. coast construct powerful instruments of this type in one piece with thin wooden reeds. The double reed associated with a conical tube is especially characteristic of the Western Asiatic nations, as seen in the Arabian 'Zamr,' the Persian 'Zourna,' and the Indian 'Nagasara.' It is certainly not indigenous in Eastern Asia, and was probably introduced into Western Europe through the Moorish incursion of the 11th century. Used with a cylindrical tube it is found in the Japanese 'Hitschiriki,' the Chinese 'Kuantzu,' the ancient Greek 'Aulos' and

Roman 'Tibia,' and in the Arabian 'E'ragyeh,' but its use in this way survives in Europe only in certain forms of bagpipe. In Africa the double reed is unknown, except where Muhammadan influence predominates.

The single reed is formed by cutting out a thin slip or tongue in the side of the hollow tube towards the upper end, which in this case must be closed. It appears with a cylindrical tube in the primitive form in the well-known 'Arghool' and 'Zummarah' pipes of Syria and Egypt, the descendants of the 'Mam' of the old Empire. It seems to have been originally confined to the countries bordering on the Eastern Mediterranean, extending to the nations of Western Asia, as in the Indian 'Tubri' and 'Poongi' or snake-charmer's pipe, and the Persian bagpipes. It is found in the islands of the Greek archipelago, and on the northern coast of Africa; it was known also to the Romans. In Britain it appears in the old Celtic pibcorn or hornpipe, and is still used for the drones of the Scottish and Irish bagpipes; while, as the 'Chalumeau,' it proved the parent of the clarinet, and is the characteristic form of the true organ reed. Like the double reed it is not known amongst the African tribes, but it is found amongst the Indians of the N.W. coast of America, where it has been evolved from the double reed by the insertion of a rigid piece of wood to form a 'lay' between the vibrating tongues. In South America it is used with a conical tube, generally of horn, but in this case its presence is evidently due to European settlers. (See *SAXOPHONE*.)

The home of the free reed, in which the tongue, instead of beating on the body of the tube, vibrates unimpeded through a narrow slit, is Eastern Asia and the Malay Archipelago, being represented there by the 'Engkurai' of Borneo, the 'Phan' of Siam, the 'Heem' of Burmah, the 'Cheng' of China, and the 'Sho' of Japan, all of which take the form of mouth-organs with pipes of hollow cane or bamboo. It is also found associated with a simple cylindrical tube furnished with finger-holes, but its peculiar characteristics render it unsuitable for this purpose. Although it was known in Europe in the 17th century, attention was only drawn to its capabilities at the close of the 18th century in France by Amiot, a Chinese missionary, and in Russia by the organ-builder Kratzenstein. From it have originated the accordion, concertina, harmonium, and other similar instruments.

The ribbon reed, formed by the vibration of a thin piece of vegetable membrane, skin or silk against the sides of a narrow slit, has proved of little practical value, though popularly used in Europe and Asia and by the American Indians.

The retreating-reed is of greater interest; in the primitive form it is made by cutting off the hollow cane at the knot, slitting the knot or the

side of the cane, and blowing through the open end; the slit edges fly apart and set up a rapid vibration. In many parts of rural England these, as well as the other reed-pipes, are commonly made by children, but the retreating-reed has been observed in Morocco and, in a more elaborate form, amongst the American Indians of the N.W. coast. It has recently found a place in the organ amongst the new methods of tone production. (See ORGAN.)

3. PIPES WITH CUP-MOUTHPIECES, in which the column of air is set in motion by the rapid vibration of the performer's lips. This well-known principle (see HORN, TRUMPET) is in reality closely allied to the last-mentioned form, the retreating-reed; for although the usual shape of the cup-mouthpiece in Europe is circular, amongst the African tribes it is oval, and in the Chinese metal trumpet, 'Ah-tu,' approximates very nearly to the shape of the double reed, the thin edges of the lips providing the necessary vibration. In this way, too, the mediæval cornetti and clarini were played, the resulting tone closely resembling that of a reed instrument. The distribution of instruments of this type is world-wide, and they are constructed not only of metal, but of the natural horns and tusks of animals, of sea-shells, stems of large plants, branches of trees, hollow gourds, leaves, paper, earthenware, and human bones. By some primitive peoples they have been invested with sacred attributes, as the 'Juruparis' and 'Botuto' of the South American Indians, whilst amongst the African tribes they serve not only as incentives to the battle and the dance, but as a recognised system of intercommunal telegraphy. Although the principle was known to the Aztecs, its use among the North American Indians is now practically unrecognised, but in South America horns of gourd, reed and baked clay are found. Throughout the Asiatic continent the trumpet is relegated to religious, civil and ceremonial observances, and remains in a far more primitive state than the reed-pipes, flutes and strings. In Europe, as shown by the fine 'Luren' of the Bronze age which have been discovered, the principle dates back to prehistoric ages. (Cf. the classification of European forms under WIND INSTRUMENTS.)

In addition to these three great groups of musical pipes there is another peculiar form which deserves notice. In the Indian 'Nyastara' or throat trumpet the column of air is set in vibration by a thin skin or diaphragm placed over the small orifice at the end of the tube and completely closing it; this end is applied to the vibrating chords of the throat, and the note hummed by the performer is sympathetically reproduced by the diaphragm and transmitted to the trumpet. A vibrating skin is also found in the mediæval 'Onion Flute,' in several forms of African wind instruments, and on many of the Chinese flutes; but in these and similar cases

the note is formed by the player's voice or breath directed into the open hole of the tube the diaphragm merely adding a reedy timbre to the sound produced.

PIPO (PIPPO), see MATTEI, FILIPPO.

PIQUE, LOUIS FRANÇOIS (b. Roret, near Mirecourt, France, 1758; d. Charenton-Saint-Maurice, 1822), an excellent violin-maker. Reputed to have been a pupil of Saunier, a Lorraine violin- and guitar-maker, who settled in Paris in 1770, Pique became one of the best makers of his epoch. The date of his installation in the French capital is unknown, but the label in a theorbo of his fabrication in the Museum of the Paris Conservatoire reveals that he was living at the 'Rue Coquillière, au coin de la Rue Bouloy,' in 1779. Between 1787 and 1789 he made fiddles at the 'Rue Platrière, vis-à-vis l'hôtel de Bullon'; in 1791 at the 'Rue Coquillière, vis-à-vis le Roulage de France,' and between 1809 and 1815 at No. 36 Rue de Grenelle-Saint-Honoré. As a copyist of Stradivarius, Pique approached his contemporary Nicolas LUPOT (q.v.) more closely than any other French maker of his period. Owing to this fact, it has been said that many of the instruments bearing Pique's name were made by Lupot and only varnished by Pique, but the dissimilarity of their workmanship disproves the suggestion. It is more than likely that the imputation has arisen from an inevitable rivalry which probably existed between the two makers. Pique's work was somewhat unequal, but his best instruments show skilled manipulation of a high order. The qualities of the materials chosen are excellent; the backs—sometimes whole—are well selected, and the tables are of particularly fine wood. The scroll is well executed, without exaggeration, the sound-holes cut with precision, the varnish red-brown. Pique's labels were both autograph and lithograph. His instruments were highly esteemed during his lifetime, and are now valuable. Spohr, in his *Méthode de violon*, mentions Lupot and Pique as the best French makers of their time.

PIQUE DAME (QUEEN OF SPADES), opera by Tchaikovsky; libretto (after Poushkin) by Modeste Tchaikovsky; produced St. Petersburg, Dec. 19, 1890; London Opera House (Rising season), May 29, 1915.

PIRATA, IL, opera in 2 acts; text by Romani, music by Bellini. Produced Scala, Milan, Oct. 27, 1827; in Paris, Théâtre Italien, Feb. 1, 1832; in London, King's Theatre, Apr. 17, 1830. G.

PIRATES OF PENZANCE, THE, comic opera in 2 acts; words by W. S. Gilbert, music by Sullivan. Produced Fifth Avenue Theatre, New York, Dec. 31, 1879; Opéra-Comique, London, Apr. 3, 1880. G.

PIROUETTE, a perforated cap adjusted so as partly to cover the double reed of old instruments of the shawm and pommer classes, corresponding with modern oboes and bassoons. The length of the pirouette was regulated so as to allow of the projection of the proper length of the reed for vibration, and the rim or table afforded some support to the lips of the player, which was probably of value in days when reeds were hard and unmanageable. The pirouette, now unused, indicated a stage of development between the completely enclosed reed of the cromorne and bagpipe and the open reed of modern instruments, which is peculiarly sensitive, and entirely under the control of the lips of the player. D. J. B.

PIRRO, ANDRÉ (b. Saint-Dizier, Feb. 12, 1869), organist and writer on music. His father was organist of Saint-Dizier.

He studied law and letters (*Docteur ès lettres*) in 1907, and at the same time pursued a serious study of musical technique. He attended as *auditeur* the organ class of César Franck at the Conservatoire (1890), then that of Widor. When the Schola Cantorum was founded (Oct. 15, 1896) Pirro became a member of the Committee of directors and professor of history of music and organ, second to Guilmant. His musical teaching took a wider range after 1904, when he began his lectures at the École des Hautes Études Sociales, which he continued for about 10 years. In 1912 he succeeded Romain Rolland as professor of history at the Sorbonne. Since 1920, on his advice, this public course has been followed by a final course of practical musical study for students. This instruction shows the same characteristics of culture and learning which early assured favourable notice to his works. They are: *L'Orgue de J. S. Bach*, preface by Widor (1894; appeared in 1897), 'crowned' by the Institut, English ed. by Goodrich (1902); *L'esthétique de J. S. Bach and Descartes et la musique* (1907) (the thesis for his doctorate); *J. S. Bach* (1906), German transl. by B. Engelke (1910); *Dietrich Buxtehude* (1913); *Schütz* (1913), German transl. in preparation (1926) by W. Gurlitt; *Les Clavecinistes* (1925). Pirro has moreover contributed extensively to *L'Encyclopédie de la musique* (Dolagrave, Paris) (vol. ii. *Musique religieuse allemande, 1619-1750, Musique profane allemande, XVII-XVIII^{ème} siècle*).

He contributed to the *Riemann-Festschrift*,

1909 (*Remarques de quelques voyageurs sur la musique en Allemagne . . . de 1634 à 1700*); the *Archives des maîtres de l'orgue*; the *Revue musicale* (Combarieu); the *Revue musicale* (Prunières); the *Tribune de St. Gervais*; the *Cultura musicale*; the *Revue de musicologie* (Paris); the *Revue Union Musicologique* (La Haye), etc. M. P.

PISADOR, DIEGO (b. Salamanca, 1608-09; d. after 1557), Spanish lutenist, author of a *Libro de musica de vihuela*, Salamanca, 1552.¹ His father was in the household of the archbishop of Santiago (*notario de la audiencia*) and a man of property. The only information concerning his son, the lutenist, is obtained from the records of lawsuits (*vide* N. Alonso Cortés, *Bol. de la Bibl. Menéndez y Pelayo* (Santander, 1921), iii. 331). He took minor orders (1526), but did not pursue an ecclesiastical career any further. He is last heard of in 1557. The *Libro de musica de vihuela* contains settings of several old Spanish ballads (e.g. *Conde Arnaldos*), *villancicos*, madrigals to words by Garci-Lasso (the orig. voice parts in the Bibl. Medinaceli, Madrid), and also 15 transcriptions from the masses of Josquin des Prés and 17 of motets by Morales and others. The value of lute transcriptions of polyphonic music, as showing the extent to which chromatic alteration was practised in the 16th century, was pointed out by O. Chilesotti (*I.M.G. Congress Report*, Vienna, 1909, p. 128 f.).

J. B. T.

PISARI, PASQUALE (b. Rome, 1725; d. there, 1778) (called Pizari in Santini's catalogue), eminent church composer, and, according to Padre Martini, 'the Palestrina of the 18th century,' son of a mason.

A musician named Gasparino, struck by his beautiful voice as a child, urged him to devote himself to music. His voice developed afterwards into a fine bass, but he took less to singing than to composition, which he studied under Giovanni Biordi. In 1752 he was admitted into the Pope's chapel as supernumerary, and remained a member till his death. His poverty was extreme, and many, perhaps apocryphal, stories are told of his writing his compositions with ink made from charcoal and water, etc. His finest work is a 'Dixit' in sixteen real parts, written for the papal jubilee in 1775 and sung by 150 performers. A Kyrie and Gloria in forty-eight parts by Ballabene were performed on the same occasion. Burney was in Rome the same year, and speaks 'with astonishment of the learning displayed in the "Dixit." It was composed for the court of Lisbon, together with a service for every day in the year, but the payment was so long delayed that by the time it arrived Pisari had died, and his nephew, a journeyman mason,

¹ B.M.; Bibl. Nat., Paris; Bibl. Nac., Madrid; Bibl. Escorial.

² Present State, France and Italy, p. 370.

inherited it. The singers of the Pope's chapel, disappointed with Tartini's *Miserere*, requested Pisari to write one, which he did, in nine parts, but it was a comparative failure. Baini conjectures that the arduous nature of his task for the King of Portugal had exhausted his powers. For the Pope's chapel he composed several masses, psalms, motets in eight parts, two *Te Deums* in eight parts and one in four, which Baini pronounces a lastingly beautiful work. See *Q.-L.* Santini had twelve large church compositions by Pisari. *F. G.*

PISARONI, BENEDETTA ROSAMUNDA (*b.* Piacenza, Feb. 6, 1793; *d.* there, Aug. 6, 1872), an excellent contralto singer. Her instructors were Pino, Moschini and Marchesi. Her first public appearances were made at Bergamo in 1811, in the rôles of Griselda, Camilla and others, popular at that period. Her voice was then a high soprano, and her accomplishments as a singer so great that, in spite of a singularly unprepossessing appearance—her features were painfully disfigured by small-pox—she excited great admiration, and her fame spread rapidly all over Italy. A serious illness which she had at Parma, in 1813, resulted in the loss of some of her upper notes, which forced her to abandon her old soprano parts. She then applied herself to cultivating the lower register of her voice, which gained considerably in extent and volume, while the artistic resources she displayed were so great that the career by which she is remembered began in fact at this time. Some few of her notes had always a guttural, unpleasant sound, but in spite of this she was universally admitted to be the first Italian contralto. She appeared at Paris, in 1827, as Arsace in 'Semiramide.'

She herself was so sensible of her physical defects that she never accepted an engagement without first sending her portrait to the manager, that he might be prepared exactly for what he was undertaking.

After singing in 'La donna del lago' and 'L'Italiana in Algeri,' displaying eminent dramatic as well as vocal qualities, she appeared in London in 1829, but was not appreciated. For two years afterwards she sang at Cadiz, and then returned to Italy. Here she failed to find the favour shown her in past days. She retired accordingly into private life.

F. A. M.

PISCHEK, JOHANN BAPTIST (*b.* Melnick, Bohemia, Oct. 14, 1814; *d.* Stuttgart, Feb. 16, 1873), a fine baritone singer, made his début on the boards at the age of 21. In 1844 he was appointed court-singer to the King of Württemberg at Stuttgart, an appointment which he retained until his retirement, July 1, 1863. He entered on his duties May 1, 1844. At a later date he was also made 'Kammersänger.' Pischek travelled a great deal, and was known

and liked in all the principal towns of North and South Germany, especially at Frankfort, where we find him singing, both on the stage in a variety of parts and in concerts, year after year from 1840–48. In England he was a very great favourite for several years. He made his first appearance here on May 1, 1846, at a concert of Madame Caradori Allan's; sang at the Philharmonic on the following Monday, and thrice besides during the season there. He reappeared in this country in 1846, 1847 and 1849, and maintained his popularity in the concert-room and in oratorio, singing in 1849 the part of Elijah at the Birmingham Festival with great energy, passion and effect. On the stage of the German opera at Drury Lane during the same year his Don Juan was not so successful, his acting being thought exaggerated. He was heard again in 1853 at the New Philharmonic Concerts.

In voice, enunciation, feeling and style, Pischek was first-rate. His repertory was large, embracing operas and pieces of Gluck, Mozart, Méhul, Beethoven, Spohr, Weber, Donizetti, Hérold, Lachner, Kreutzer, Lindpaintner. In his latter days one of his most favourite parts was Hassan in Benedict's 'Der Alte vom Berge' ('Crusaders'); others were Hans Heiling, Ashton ('Lucia') and the Jäger in the 'Nachtlager von Granada.'

A. C.

PISENDEL, GEORG JOHANN (*b.* Karlsburg, Franconia, Transylvania, Dec. 26, 1687; *d.* Dresden, Nov. 25, 1755), an esteemed violinist. His artistic career began at the age of 9, when he became a choir-boy in the chapel of the Margrave of Ansbach, Bavaria. Corelli, who was at that time leader of the chapel orchestra, taught him the violin, while Antonio Pistocchi instructed him in the rudiments of music and harmony. So rapid was the child's progress that at the age of 15 he was nominated one of the chapel violinists. In 1709 he went to Leipzig, where he pursued his studies at the university. The King of Poland appointed him his Kapellmeister in 1712, and later he became attached to the suite of the hereditary prince of Saxony, whom he accompanied to Paris in 1714, to Berlin in 1715, to Italy during the following two years, and to Vienna in 1718. After the death of Volumni, Pissendel succeeded him as Konzertmeister at the Saxon court in 1730, and in 1731 became leader of the opera orchestra under the baton of Johann Hasse, which post he occupied until his death. As a violinist Pissendel was among the best of the early 18th-century players, and his influence in Dresden, where he established a violin school, was instrumental in raising the art of violin-playing to a high level of efficiency. (See VERACINI.) Pissendel wrote some concertos and solos for the violin, the manuscripts of which are preserved in the State Library at

Dresden. A gigue of his composition is included in Telemann's 'Musik-Meister.'

PISTOCCHI, FRANCESCO ANTONIO MAMILIANO (b. Palermo, 1659; d. Bologna, May 13, 1726). On the removal of the family to Bologna in 1661, he made such rapid progress in music that he was made a member of the Accademia dei Filarmonici before the publication of his 'Capricci puerili . . . sopra un basso d' un balletto,' a volume of pieces for harpsichord, harp, violin and other instruments, on the title-page of which it is stated that the composer was 8 years old at the date of issue, 1667. In 1670 he was a chorister at San Petronio, but must have been dismissed shortly afterwards, as his father applies for his readmission to the choir in 1674. If we may trust the date on a MS. copy of the opera 'Il giroello' at Modena, that work was written as early as 1669; in a printed book this might easily be, as has been suggested, an error for 1696, but hardly in a MS. The opera was performed in Venice in 1682, and Stradella wrote a prologue to it, so that the earlier date of composition may very possibly be correct. In 1675 he began the career of an operatic singer, in which he won considerable renown. In 1679 his opera 'Leandro' was performed by puppets at Venice, and in 1682 an opera called 'Amori fatali' at the same place. In 1687-94 he was a singer at the court of Parma. About 1696 he became Kapellmeister to the Margrave of Ansbach; in the following year his opera 'Narciso' was produced there, and in 1699 his 'Le pazzie d' Amore.' In this period falls the publication of his 'Scherzi musicali,' a set of airs to Italian, French and German words. In 1699 he went to Venice and produced an oratorio, 'Il martirio di San Adriano,' which had apparently been written as early as 1692. In 1700 he produced at Vienna a three-act opera 'Le rise di Democrito.' The date 1698 is given by Riemann for his oratorio 'Maria Vergine addolorata,' from which Burney quotes an aria in his *History*, vol. iv. p. 121. In 1701 he went back to Bologna, and re-entered the choir of San Petronio as a contralto, and a few years afterwards founded the school of singing which made Bologna famous, and was imitated in other Italian cities. The year 1707, when a volume of duets and trios was published as op. 3, at Bologna, seems to have been the date of another opera, 'Bertoldo' (Eitner gives it as 1787, which is impossible), at Vienna, and 1710 that of 'I rivali generosi' at Reggio. In 1715 he entered the order of the Oratorians, and in 1717 (according to Riemann) wrote an oratorio 'La fuga di S. Teresa.' Several church compositions mentioned in Q.-L. probably date from this last

period of his life. The chief authority for his life is Busi's life of G. B. Martini. The list of those few works which are still extant is given in Q.-L., and various others are mentioned in Riemann.

M.

PISTON, see **VALVE**.

PITCH. This word, in its general sense, refers to the position of any sound in the musical scale of acuteness and gravity, this being determined by the corresponding *vibration-number*, i.e. the number of double vibrations per second which will produce that sound. Thus when we speak of one sound being 'higher in pitch' than another, we mean that the vibrations producing the former are more rapid than those producing the latter, so giving what is recognised as a higher sound. The general nature of this relation is dealt with in the article on **ACOUSTICS**; it is sufficient here to state that, as a matter of practice, when the exact pitch of any musical sound has to be defined, this is most properly done by stating its vibration-number.

STANDARD OF PITCH.—It becomes, then, an important practical question for the musician, what is the exact pitch corresponding with the written notes he is accustomed to use? or, to put the question in a simpler form, what is the true vibration-number attached to any one given note, say, for example, treble C? for if this is known, the true pitch of any other note can be calculated from it by well-known rules.

This opens the vexed question of what is called the 'Standard of Pitch.' It is an interesting consideration whether, as a matter of theory, a philosophical standard of pitch can be devised, based on natural facts, like the standards of measure, weight and time. Such a standard is easily deducible. We may assume the existence of a note corresponding with the simplest possible rate of vibration, viz. *one per second*; and the various octaves of this note will be represented by 2, 4, 8, etc. vibrations, being a series of powers of the number 2. This theoretical note is found to agree so nearly with the musician's idea of the note C (the simplest or fundamental note in our modern musical system) that they may be assumed to correspond, and we thus get $c'' = 512$ double vibrations per second, which may be called the 'Philosophical Standard of Pitch,' and which has been adopted, for theoretical purposes, in many books on music. And as it will be seen that this corresponds very fairly with the 'Classical Pitch,' and differs very little from the authorised French pitch and the vocal pitch now followed in England, it would form a reasonably good standard in a practical as well as in a theoretical point of view. According to reason and common sense there ought to be some agreement among the musicians of the world as to what musical note should be

denoted by a certain musical sign; but unfortunately there is no complete agreement, though considerable advance has been made within recent times, as the following account will show. The question has been much debated,¹ but it must suffice here to state some of the more important facts that have been elicited in the discussion.

HISTORY.—We have no positive data as to the pitch used in the earliest music of our present form, but we may arrive at some idea of it by inference. The two octaves of Pythagoras's Greek scale must have corresponded with the compass of male voices, and when Guido added the Gamma (G), one tone below the Proslambanomenos of the Greeks, we may fairly assume that it expressed the lowest note that could be comfortably taken by ordinary voices of the bass kind. This is a matter of physiology, and is known to be somewhere about 90 to 100 vibrations per second; according to which the note *c'*, two octaves and a fourth higher (see **STAVELESS NOTATION**), would lie between 480 and 532.

At a later period some information of a more positive kind is obtained by organ pipes, such as those at Halberstadt (1495)—*A*=505.8—respecting the dimensions of which evidence exists; and it is found that the pitch varied considerably according to the nature of the music used, there being very different pitches for religious and secular purposes severally.² The inconvenience of this, however, seems to have been found out, and early in the 17th century an attempt was made to introduce a *Mean Pitch* which should reconcile the requirements of the church with those of the chamber, or the 'Chorton' with the 'Kammerton.' It was about a whole tone above the flattest, and a minor third below the highest pitch used. The effort to introduce this met with some success, although the tables in the article in the *Ency. Brit.*, 10th ed., show that from 1495–1690 the pitch was gradually lowered, from the pitch above given to that of the Hampton Court organ (*A*=441.7); on the other hand, from 1713 (Strassburg Minister organ, *A*=393.2) onwards until 1897 the pitch rose steadily. Ellis (*History of Musical Pitch*, 1880) gives a long list of examples taken at various dates over what is generally called the classical period, varying for *A* from 415 to 429, or for *C* from 498 to 515 vibrations. This is an extreme range of only about half a semitone, which, considering the imperfect nature of the means then practicable of obtaining identity and

uniformity, is remarkably satisfactory. During this period lived and wrote Purcell, Bach, Handel, Haydn, Mozart, Beethoven, Weber, Schubert, and partly Spohr, Mendelssohn and Rossini. That is to say, the founders and perfecters of musical art all thought out their music and arranged it to be played and sung in this pitch. This is therefore emphatically the *Classical Pitch* of music. And, singularly enough, it agrees with the presumptive determination we have made of the pitch that must have been used in the earliest times, as well as with the theoretic standard considered above.

But, unhappily, this satisfactory state of things was disturbed during the 19th century. The orchestra began to assume greater importance as regards its wind element, new and improved wind instruments being introduced, and the use of them being much extended. This led to a constant desire for louder and more exciting effects, and both makers and users of wind instruments soon perceived that such effects might be enhanced by raising slightly the pitch of the sounds. The wind instruments were of course the standards in an orchestra, and so a gradual rise crept in, which both strings and voices were obliged to follow. The conductors, who ought in the interests of good music to have checked this, were either ignorant of, or indifferent to, the mischief that was being done, until at length it assumed alarming proportions. In 1878 the opera band at Covent Garden was playing at about *A*=450 or *C*=540, being a rise of a semitone above the 'classical pitch' used down to Beethoven's day. In 1897 the Strauss band played at the Imperial Institute, London, at a pitch of *A*=457.5.

Such a change was attended with many evils. It altered the character of the best compositions; it tended to spoil the performance and ruin the voices of the best singers; and it threw the musical world into confusion from the uncertainty as to the practical meaning of the symbols used; and all for no object whatever, as no one could affirm that the new pitch was on any ground better than the old one. Accordingly strong remonstrances were expressed from time to time, and efforts were made either to restore the original pitch, or at least to stop its further rise, and to obtain some general agreement for uniformity.

In 1834 a 'Congress of Physicists' held at Stuttgart adopted a proposal by Scheibler to fix the *A* at 440 (true *C*=528), but it does not appear that this had any practical result. In 1858 the French government appointed a commission, consisting partly of musicians³ and partly of physicists, to consider the subject. The instructions stated that

¹ The most thorough investigation of this subject will be found in two papers read before the Society of Arts, May 12, 1877, and Mar. 3, 1880, by Dr. A. J. Ellis, F.R.S. See also Ellis's translation of Helmholtz, 2nd ed. App. p. 493, and an essay by D. J. Blakley in the *Descriptive Catalogue of Musical Instruments in the Royal Military Exhibition, 1890* (1891), p. 235; also, by the same writer, *Memorandum on the Pitch of Army Bands* (Boosey & Co., 1909). The article 'Pitch' in the supplementary volume of the *Ency. Brit.*, 10th ed., with its valuable tables of pitch, should also be consulted.

² In the Elizabethan era in England three pitches seem to have been generally recognised.

³ The musicians were Ambler, Halévy (who drew the Report), Berlioz, Meyerbeer, Rossini and Thomas. The other members were Felleiter, Desprez, Doucet, Lissajous, Monnaie and Gen. Malmst.

the constant and increasing elevation of the pitch presents inconveniences by which the musical art, composers, artists, and musical instrument-makers all equally suffer, and the difference existing between the pitches of different countries, of different musical establishments, and of different manufacturing houses, is a source of embarrassment in musical combinations and of difficulties in commercial relations.'

The Commission reported in Feb. 1859.¹ After substantiating the facts of the rise (which they attributed to the desire for increased sonority and brilliancy on the part of instrument-makers) and the great want of uniformity, they resolved to recommend a fixed standard: A=435 (C true=522; C by equal temperament=517). This was confirmed by a legal decree, and it has been adopted in France generally, to the great advantage of all musical interests in that country.

Soon afterwards an attempt was made to do something in England. A committee was appointed by the Society of Arts, who reported in 1869, recommending the Stuttgart standard of C=528; but the recommendation fell dead, and had no immediate influence. Other agitations and discussions were for a long time without effect, and the state of matters in this country in regard to the standard of pitch was as follows. The principal orchestras continued to play at the elevated pitch; but this was repudiated by the general consensus of vocal performers, and in all cases where an orchestra was not employed, as in churches and at vocal concerts, a much lower pitch was used, corresponding nearly with either the French or the 'classical' one. Hence all idea of uniformity in the practical interpretation of music was out of the question—a state of things most deplorable, and a disgrace to the musical education of the country, and one which complicated immeasurably the business of the piano manufacturers, who had to supply instruments at different pitches. The endeavours of A. J. Hipkins, Dr. A. J. Ellis and Dr. Pole at last bore fruit in the general adoption of what is virtually the French *diapason normal* in 1896, i.e. A=439 double vibrations at a temperature of 68° Fahr., or A=435 double vibrations at 59° Fahr. The difference between A=435 and A=439 represents the rise in pitch between 59° Fahr. and 68° Fahr. in flue organ pipes, due to the change of temperature, and a similar but not so great a rise takes place in orchestral and other wind instruments. For a time, and until the organ in the large concert-hall could be altered to correspond with the change, there was much discrepancy between the 'old' and 'new' Philharmonic pitches, as they were called, but now (1926), except where an organ² of the high pitch is still in use, the latter is almost as universal in England as on the Continent, with the exception that the instruments

used in the military bands are still at the high pitch.

W. F.; rev. with addns. by D. J. B., etc.

ENGLISH MILITARY PITCH.—It is interesting to note that the pitch of drum and fife bands until some time between 1880 and 1890 remained the same as Sir George Smart's pitch of 1828, practically identical with the present low orchestral pitch (Philharmonic, 1896), although from about the middle of last century military bands, in accordance with the Queen's regulations, used the high or 'old' Philharmonic pitch. Drum and fife bands now conform to the military or Kneller Hall pitch, which (in agreement with the 'old Philharmonic' or high pitch) was in 1909 officially defined in the King's Regulations as A=452.4 at 60° Fahr. This is the pitch used not only in the bands of the King's forces, but practically in the vast number of brass bands throughout the country, and at present there seems but little prospect of these military and other wind bands being converted from the 'old' to the 'new' Philharmonic pitch, notwithstanding the desirability and advantage of the change.

D. J. B.

PITCHPIPE, a small stopped diapason pipe with long movable graduated stopper, blown by the mouth, and adjustable approximately to any note of the scale by pushing the stopper inwards or outwards. A pipe of this kind is so much influenced by temperature, moisture, force of blowing, and irregularities of calibre, that it can only be depended on for the pitch of vocal music, and is not to be trusted for more accurate determinations. A small reed pipe of the free species, in which the length of the vibrating portion of metal is controlled by a rotating spiral, is somewhat superior, and far less bulky than the older contrivance. It is known as Eardley's patent chromatic pitch-pipe. Sets of single free reeds, each in its own tube, arranged in a box, forming a more or less complete scale, are to be obtained, and form comparatively trustworthy implements; if tuned to equal temperament they may be employed to facilitate pianoforte or organ-tuning. All pitchpipes are, however, inferior in accuracy to tuning-forks; the only advantage they possess over the latter being their louder, more strident, more coercive tone, and the readiness with which beats are produced. No accurate tuning is practicable except by the principle of beats and interferences.

W. H. S.

PITONI, GIUSEPPE OTTAVIO (b. Rieti, Mar. 18, 1657; d. San Marco, Feb. 1, 1743), eminent musician of the Roman school; from the age of 5 attended the music-school of Pompeo Nale, and was successively chorister at San Giovanni de' Fiorentini, and the SS. Apostoli in Rome. Here he attracted the attention of Foggia, who gave him instruction in counter

¹ *Rapport et arrêté pour l'établissement en France d'un diapason musical uniforme.* Paris, Imprimerie Impériale, 1859.

² The organ of the Albert Hall, London, was lowered in 1923.

point during several years. In 1873 he became maestro di cappella at Terra di Rotondo, and afterwards at Assisi, where he began to score Palestrina's works, a practice he afterwards enjoined on his pupils, as the best way of studying style. In 1876 he removed to Rieti, and in 1877 became maestro di cappella of the Collegio di San Marco in Rome, where his pieces for two and three choirs were first performed. He was also engaged by various other churches, San Apollinare and San Lorenzo in Damaso in 1886, the Lateran in 1708, and St. Peter's in 1719, but he retained his post at San Marco till his death, and was buried there.

Pitoni's 'Dixit' in sixteen parts is still one of the finest pieces of music sung at St. Peter's during Holy Week, and his masses, 'Li pastori a maremme,' 'Li pastori a montagna,' and 'Mosca,' founded openly on popular melodies, still sound fresh and new. His fertility was enormous; for St. Peter's alone he composed complete services for the entire year. He also wrote many pieces for six and nine choirs. He compiled a history of the maestri di cappella of Rome from 1500-1700, the MS. of which is in the Vatican Library, and was used by Baini for his life of Palestrina. Gaspari drew the attention of Fétis to a work of 108 pages, *Guida armonica di Giuseppe Ottavio Pitoni*, presumably printed in 1689. The MS. is lost. Among Pitoni's numerous pupils were Durante, Leo and Feo. The library of the Corsini Palace in Rome contains a biography of him by his friend Geronimo Chiti of Siena. Proske's 'Musica divina' contains a Mass and a Requiem, six motets, a psalm, a hymn, and a 'Christus factus est,' by Pitoni. See *Q.-L.*

F. G.

PITSCH, KAREL FRANT (*b.* Bartošovice-by-Roketnice, Bohemia, 1789¹; *d.* Prague, June 13, 1858), was organist of St. Nicholas' church, and important as a teacher and the director of the Organ School, where Anton Dvořák was his pupil. His compositions include a Mass and organ works.

PITT, PERCY (*b.* London, Jan. 4, 1870), composer, organist and pianist, studied music almost entirely abroad, after undergoing a general education in France. At Leipzig, whither he went from Paris to live, from 1886-1888, he was a pupil of Reinecke and Jadassohn, and for the three following years he worked at Munich under Rheinberger. On his return to England in 1893 he devoted much time to composition, and, in addition, was appointed in 1895 chorus-master of the Mottl Concerts; in 1896 official organist of the Queen's Hall; and in 1902 musical adviser and occasional conductor at Covent Garden. He became musical director to the Grand Opera Syndicate in 1907, conducted the Beecham Opera Company (1915-1918), and became artistic director of its suc-

cessor, The BRITISH NATIONAL OPERA COMPANY (*q.v.*), in 1920. In 1922 he was appointed musical director to the British Broadcasting Company.

His compositions belong mostly to his earlier years. His symphonic prelude 'Le Sang des crépuscules' (1900); his suite from the incidental music to Stephen Phillips's 'Paola and Francesca' (1902); his overture 'The Taming of the Shrew' (1898); his ballade for violin and orchestra (1900), composed for Ysaÿe, have been played on the Continent and in America, as well as in England. Pitt has written also a suite for orchestra (1895), and other suites, 'Fêtes galantes' (after Verlaine, 1896), 'Cinderella' (1899), 'Dance rhythms' (1901); a concerto for clarinet and orchestra (1897); a Coronation march and a march for military band, the last written expressly for the Trooping of the Colour; an oriental rhapsody; a ballad for male chorus and orchestra, 'Hohenlinden' (1899); five poems for baritone and orchestra (1902), and others for mezzo-soprano and orchestra (1904); incidental music, in addition to that named, to 'Flodden Field' by Alfred Austin, and to 'King Richard II.,' and a sinfonietta produced at the Birmingham Festival, Oct. 1906, and in the repertory of the Queen's Hall Symphony Concerts in London. B. H. L., with addns.

PITTMAN, JOSIAH (*b.* Sept. 3, 1816; *d.* London, Apr. 23, 1886), the son of a musician. He began to study both theory and practice at an early age, and became a pupil of Goodman and of S. S. Wesley on the organ, and, at a later date, of Moscheles on the piano. He held the post of organist at Sydenham (1831), Tooting (1833), and Spitalfields (1835) successively—the last of the three for twelve years. Feeling the need of fuller instruction in theory, he visited Frankfurt in 1836 and 1837, and studied with Schnyder von Wartensee. In 1852 he was elected organist to Lincoln's Inn; the service was in a very unsatisfactory condition, but Pittman's zeal, perseverance and judgment improved it greatly, and he remained there for twelve years. It was in support of this reform that he wrote a little book entitled *The People in Church* (1858), which at the time excited much attention. He also composed many services and anthems for the Chapel. Pittman was connected with the opera as maestro al cembalo at Her Majesty's (1865-68) and Covent Garden (1868-80). His early predilections were for the German organ music, and, like Gauntlett, Jacob and the Wesleys, he worked hard by precept, example and publication to introduce Bach's fugues and pedal organs into England. He edited a series of 'Progressive Studies,' contrapuntal pieces from the works of 18th-century English organists (Stanley, Battisill, James, etc.). For several years Pittman delivered the annual course of lectures on music

¹ According to *Stemann*; *Borovský* gives 1786.

at the London Institution. He arranged many operas, etc., for piano. G.

PIUTTI, CARL (b. Elgersburg, 1846; d. Leipzig, 1902), organist and composer. He studied at Leipzig Conservatoire, becoming a professor there in 1875. In 1880 he succeeded Rust as organist at the Thomaskirche. He wrote much admirable organ music, including three sonatas, some fugues, many choral preludes and short pieces; works for a *cappella* choir; songs; piano works and a text-book on harmony.

H. G.

PIXIS, a family of musicians. (1) FRIEDRICH WILHELM, the elder, was a pupil of the Abbé Vogler in Mannheim in 1770, and still lived there in 1805. He published organ music, and sonatas and trios for PF. His eldest son, (2) FRIEDRICH WILHELM (b. Mannheim, 1786; d. Oct. 20, 1842), studied the violin under Ritter, Luigi and Franzel, early made a name, and travelled throughout Germany with his father and brother. At Hamburg he took lessons from Viotti. In 1804 he entered the Elector's chapel at Mannheim, and afterwards went to Prague, where he became professor at the Conservatorium, and Kapellmeister of the theatre. His brother,

(3) JOHANN PETER (b. 1788; d. Baden-Baden, Dec. 22, 1874), pianist and composer for the piano, lived with his father and brother till 1809, when he settled in Munich. In 1825 he went to Paris, and became a teacher of great note there. He settled finally in Baden-Baden in 1845, and gave lessons at his well-known villa there almost up to his death. He composed much for the piano—concertos, sonatas and drawing-room pieces, all now forgotten. The fact that he contributed the third variation to the 'Hexameron,' in company with Liszt, Czerny, Thalberg, Herz and Chopin, shows the position which he held in Paris. His works amount in all to more than 150. Though not wholly devoid of originality he was apt to follow too closely in the footsteps of Mozart, Haydn and Beethoven. In 1831 he composed an opera 'Bibiana' for Mme. Schroeder-Devrient, produced in Paris without success. 'Die Sprache des Herzens' was composed in 1836 for the Königstadt Theatre in Berlin. His adopted daughter,

(4) FRANZILLA GÖHRINGER (b. Lichtenthal, Baden, 1816), developing a good mezzo-soprano voice and real talent, he trained her for a singer, and in 1833 started with her on a tour, which extended to Naples. Here Pacini wrote for her the part of Saffo in his well-known opera of that name. She married an Italian named Minofrio. F. G.

PIZARRO, DIEGO (17th cent.), Spanish composer, author or compiler of a large and important MS. vol. of secular vocal music in the Bibl. Nac., Madrid ('Libro de tonos humanos,' M. 1262).

J. B. T.

PIZZETTI, ILDEBRANDO (ILDEBRANDO DA PARMA) (b. Parma, Sept. 20, 1880), perhaps the most individual and thoughtful Italian composer of the present time. The chief events of his life are told in the opening chapter of *Intermezzo critici*, a collection of critical essays dedicated to the memory of an intimate friend and collaborator, Annibale Beggi. He studied at the Parmese Conservatorio with Galligani and Tebaldini. While still a student his compositions attracted some attention. A first opera, 'Sabina,' on an Alsatian legend, and a second on Shakespeare's 'Romeo and Juliet,' were both written 'between a fugue and a sonata movement' while Pizzetti was under the discipline of the school. Such labours, if devoid of practical results through lack of experience and technical knowledge, apart from the performance of an *Intermezzo* at a students' concert, nevertheless produced some fruit in focusing the composer's attention on the problems of opera music, problems which he attempted to solve in various ways until he found the form which finally satisfied him and applied in 'Fedra' and 'Debora e Jael.' After leaving the Conservatorio (1901) he devoted himself to teaching and conducting, acting as substitute to Cleofonte Campanini at the Parma Opera House. In the following year the competition of the publisher Souzegno resulted in the composition of an opera on the subject of 'The Cid,' which the examiners declined to take into consideration because the last scene was wanting. His notions of opera then inclined towards the accepted canons of Italian composers, and he aimed at carrying on the lyrical tradition of Rossini, Bellini and Verdi, which he was then convinced best suited the Italian temperament. He felt, however, that greater freedom of rhythm and measure was necessary, that new technical means, vocal and instrumental, were needed, and after 'The Cid' he realised for the first time that lyricism and drama are different things, that the essential point of dramatic expression 'is not in the abandon and exaltation of the singer; that it was necessary to seek something different and seek elsewhere.'

The years between 1903 and 1907 (when Pizzetti left Parma for Florence) were devoted to the composition of chamber music, of a quartet, a sonata and a symphonic poem. In view of the extraordinary success of his sonatas later, it is interesting to note that he did not, at first, find the symphonic form congenial. 'Unable to create new forms,' he writes, 'I had to accept those which already existed and which I felt were inimical and did violence to my own feelings,' concluding that the only form in which he could express all he wanted to express was the drama. But some time had yet to pass before he could find a solution to all the doubts and questioning of his artistic conscience in

respect of opera. Many subjects were considered—Byron's *Sardanapalus*, then Poushkin's *Mazeppa*, were begun and soon set aside. 'Aeneas,' suggested by a reading of Ovid, and 'Lena' were carried further but, in the end, left unfinished. 'Aeneas,' however, showed him that 'drama is not pure epic'; in 'Lena,' on the other hand, he attempted to portray contemporary life and this took him a step further. 'The experience ended in failure, but was useful nevertheless, and perhaps needed.'

The study of the Greek classics turned his thoughts in a new direction. At first Euripides's *Hippolytus* attracted him and he actually began to set it to music; this was discarded for *Phaedra*, of which he wrote part of the text. But after a meeting with D'Annunzio, who was writing a tragedy on the same subject, he decided to wait for the Italian text offered him by the author. The composition of 'Fedra' occupied him three years (1909–12), and the opera was successfully performed at La Scala in Milan some time later, in Mar. 1915. It is the first opera to show his mature dramatic style based on the reforms he had been evolving ever since he had felt the inadequacy of lyricism as a means of expression in musical drama. Long before 'Fedra' Pizzetti's name became known to all Italians through his contribution of choral music to D'Annunzio's drama *La Nave* (1903). Searching study of the old Italian composers had given Pizzetti a mastery grip of the technique of choral writing, which he used with telling effect in the choral sections of the drama. Exceedingly important is also the part he assigned to the chorus in the next opera, 'Debora e Jael' (1915–21), produced at La Scala in 1923, which may be said to embody all his ideals. What his views are on the subject may be gathered from an article published in *R.M.I.*, where he asserts that the ideal drama for music is that in which not only every word and action can be enhanced and be made more significant by music, but which also gives music the opportunity to reveal 'continuously' the profoundest depths of the human soul and carry their expression beyond the limits set to the words. The poet must eliminate all episodes where music can be only an accompaniment or description.

The chief innovation is in the substitution of a dramatic recitative for the lyricism supreme in all modern Italian operas, a recitative which has often the lyrical beauty of melody but is at once more elastic and more subtle. The chorus becomes more important; but the orchestra, although treated with great skill, has lost the predominance it obtained with Wagner and his successors.

In England Pizzetti is known so far mainly through some songs and the two sonatas for violin and pianoforte (1919); violoncello and pianoforte (1921). The latter was first per-

formed here at a concert in 1923 in which the composer himself played the piano part. Both are excellent examples of an art which is national only in so far as it reflects the intense melancholy of the true Italian folk-song. But lyricism is a new thing in his hands. It appears controlled by a discrimination which at times leaves only a bare skeleton to be clad again in accordance with a strong individual fancy and with considerable resource of technical means. The composer's attitude towards the technique of his art may be briefly defined as an enlightened and liberal conservatism. He admits the claims of modern harmonists, but he expects the idea expressed to be of value, apart from the manner in which it is expressed. Hence his strictures on certain moderns and notably Schönberg, whose complexity Pizzetti maintains to be a cloak for poverty of original invention. In 1924 Pizzetti was appointed director of the Milan Conservatorium.

Besides the works already noted his output includes:

- 'Ave Maria.'
- 'Tenebrae factae sunt.'
- 'Tantum Ergo' for 8 v.
- Trio for violin, v'cl. and PF.
- 'Canzone a Maggio.'
- Overture to 'Oedipus et Colon.'
- Three Interludes to 'Oedipus Rex.'
- Mass for voices and strings.
- 'Cantate,' orchestral poem.
- 'Epitaphs' on a text of V. Hugo.
- 'Sera d'inverno,' a lyric.
- Three lyrics on a text of Concord.
- 'Foglio d'album' for PF.
- 'I pastori,' a lyric on text of D'Annunzio.
- 'Poema romantico' for PF.
- 'La madre al figlio lontano,' a lyric.
- Popular Greek Songs.
- Three pieces for piano.
- Overture for a tragic comedy.
- Due canzoni corali.
- Incidental music to D'Annunzio's 'La Pisanella.'
- Danza satirica' (for a performance of Tasso's 'Aminta').
- Poem for violin and orchestra.
- Music to D'Annunzio's cinema play 'Cabrira.'
- Terza canzone corale.
- 'Passeggiata,' a lyric.
- 'Angelica.'
- 'Assunte' } Neapolitan dramatic lyrics.
- Quartet in A.
- Mass for voices to the memory of King Humbert.

Critical studies and reviews have appeared in *R.M.I.*, *Giornale dei musicisti*, *Il Secolo*, etc. Collected essays have been published by Treves (Milan) under the title *Musicisti contemporanei*; also *Intermezzi critici* (Vallecchi, Florence).

PIZZICATO (Ital. = pinched). On the violin, and other instruments of the violin family, a note or a passage is said to be played pizzicato if the string is set in vibration not by the bow, but by being pinched or plucked with the finger. Early instances of this valuable orchestral effect are to be found in Handel's 'Agrippina,' 'Pastor fido,' 'Terpsichore,' and in an air by Hasse, written for Mingotti in 1748. In solo-playing a distinction is made between the pizzicato executed with the left and that with the right hand. The former one is frequently used, but not so much in classical as in bravura pieces. Paganini made an extensive use of it, either by playing a pizzicato accom-

paniment to a tune played with the bow (a), or in quick passages with arco notes interspersed (b) and (c).

(The notes marked * to be played pizzicato with the left hand.)

A natural harmonic note, when played pizzicato, produces an effect very similar to that of a note on the harp.

The 'pizzicato tremolando' is an effect devised by Elgar and used by him in his violin concerto, the players 'thrumming' spread chords with the soft part of three or four fingers across the strings.

PLAGAL CADENCE is the form in which the final Tonic chord is preceded by Subdominant Harmony. (See CADENCE.)

C. H. H. F.

PLAICHINGER, THILIA (b. Vienna, Mar. 13, 1868), operatic soprano. She was a pupil of Gänsbacher at the Vienna Conservatoire, and made her début in that city. Her first real success, however, was achieved at Hamburg in 1893, and it was from there that she secured an engagement for the Municipal Theatre at Strassburg, where she sang from 1894 until 1901. During that period she appeared in most of the dramatic rôles of the Wagnerian and ordinary repertoires, her powerful voice and fine acting meanwhile gaining the notice of Bayreuth, where she sang for several summers. From 1901-14 she was one of the principal sopranos of the Berlin Opera, and she made two visits to London, once in 1904 and once during the winter season of 1910, appearing on each occasion as Isolde. She afterwards became a teacher at the Stern Conservatorium in Berlin.

BILL.—International Who's Who in Music.

H. K.

PLAIDY, LOUIS (b. Wernsdorf, Saxony, Nov. 28, 1810; d. Grimma, Mar. 3, 1874), learnt the pianoforte from Agthe, and the violin from Haase, of Dresden. He was first known as a violinist in the Dresden concerts, and went to Leipzig in 1831; he afterwards turned his attention especially to the pianoforte, and was so successful as to attract the notice of Mendelssohn, who in 1843 induced him to take the post

of pianoforte-teacher in the Leipzig Conservatorium. There he attained a great and deserved reputation. His class was always thronged, and his instruction eagerly sought by pupils from all parts of the world. This popularity arose from his remarkable gift (for it was a gift) of imparting technical power. Were a pupil ever so deficient in execution, under Plaidy's care his faults would disappear, his fingers grow strong, his touch become smooth, singing and equal, and slovenliness be replaced by neatness. He devoted his life to technical teaching, and brought all his powers and experience to bear upon his celebrated work *Technische Studien*, which became a standard text-book. Great attention to every detail, unwearying patience, and a genuine enthusiasm for the mechanical part of pianoforte-playing were his most striking characteristics. He was a man of a most simple and kindly nature, and took a warm interest in his pupils. He resigned his post in 1865, and taught privately for the rest of his life.

A. S. S.

PLAIN-SONG (*Cantus Planus*) is the name now given to the style of unisonous ecclesiastical art-music which arose before the development of harmony. In its earliest days it was called by more general names, such as *musica*, *cantilena* or *cantus*; but when harmony arose and brought with it measured music (*musica mensurala* or *mensuralis*), with a definite series of time-values, a distinguishing name was required, and *cantus planus* was adopted in order to emphasise the fact that the older music differed from the newer in having no definite time-values. All early unison melody, which is unmeasured, may in the broadest sense of the term be called Plain-song. The melodies to which a Hindu chants his sacred books or the Mahometan the Koran are plain-song. The Synagogue music of the pre-Christian era was probably of the same character, and the traditional music of the Synagogue of to-day is in parts so characteristic of the style that it will be worth while later on to quote some specimens of it for the purposes of comparison. (See HEBREW MUSIC.)

While there is much interest attached to the development of plain-song melody in connexion with other forms of religion than the Christian, the chief interest centres round the plain-song of the Christian Church in the West. The value of the history of the Latin plain-song, apart from its ecclesiastical and liturgical side, lies in the fact that it represents the evolution of melody from the artistic point of view. It is thus a different line of evolution from the rise of harmony on the one side and from the development of folk-song on the other. Plain-song, like sculpture, evolved very rapidly, and reached its climax at an early point in its history, while the art of harmony, like the art of painting, evolved very slowly, and went

through many crude stages before reaching its present stage of perfection. The result has been that the masterpieces of melody came into existence at a period when the art of harmony was undeveloped or even non-existent; they had already become old at the time when the new art of music was making its first crude experiments in harmony, just as the art of sculpture was already long past its zenith when the art of painting made its first crude experiments towards perspective. It is only, therefore, by a confusion of thought that the masterpieces of plain-song melody can be compared (to their disadvantage) with the crude attempts of mediæval harmony. Plain-song is archaic only in the sense in which Greek sculpture is archaic; that is to say, it is an art-product which early reached its climax. In consequence its appeal is to a less wide public than the appeal of harmonised music, just as the appeal of sculpture is to a less wide public than the appeal of painting. But there is no justification for treating either the masterpieces of Greek sculpture or the masterpieces of Latin plain-song as being anything less than unsurpassed. To call either of them crude or barbarous reveals a lack of artistic perception.

The relation of plain-song to measured music may again be expressed by another parallel, for plain-song is analogous to prose, while measured music, with its definite subdivisions of time, is analogous to poetry, with its definite subdivisions of metre. The freedom of rhythm which belongs to plain-song is a freedom desirable in itself. It was a sacrifice of freedom when Harmonised Music found itself forced to become also Measured Music, because of the difficulties that beset the performance of music in harmony without strict time. The sacrifice of liberty was well worth making then, in view of what was to be won; but now a reversal is taking place, and the tendency of the present evolution of the musical art is to work back again out of the bondage of strict time towards the recovery of rhythmical freedom. In the future it may well be that even harmonised music may become for certain purposes independent of strict time, and therefore a new form of plain-song.

Meanwhile it is clear that, while measured music can be suitably adapted to a metrical text, plain-song must always be more readily suited to a prose text. The ecclesiastical plain-song, therefore, finds its justification in this, even if in nothing else, since all the early texts to which plain-song is set (apart from the hymns) are prose texts. And it finds its counterpart again in later days in recitative, either of the simpler kind, as used in classical Italian opera, or of the later declamatory kind, as used in the modern German opera.

Plain-song and Measured Music may again be contrasted with regard to tonality. The Modal system which underlies ecclesiastical plain-song

has already been described in the article *Modes*, and the contrast between measured music in the modern scales and plain-song written in the ancient modes has been made clear there.

For the purpose of this article the plain-song of the Eastern Church must be left out of account, and attention must be exclusively directed to the Latin plain-song or the Gregorian music, which has already been described summarily under that heading. It is necessary, however, here to go more fully into the nature and condition of the two collections of music which make up the Gregorian collection. We turn first of all to the collection of music for the Mass comprised in a mediæval or modern Gradual. The chief ancient pieces are the variable items which are inserted into the fixed structure of the service on any given occasion at four special points—the Introit or *Antiphona ad introitum* at the beginning of the service; the Gradual, with *Alleluia* or Tract which precede the Gospel; the Offertory which accompanies the preparation of the oblations; and the Communion or *Antiphona ad communionem* which accompanies the partaking of the Sacrament. There are thus six sorts of composition, and the music written for them belongs almost exclusively to the 5th and 6th centuries. In the parallel collection of music for the Divine Service, embodied in the Antiphonal, we find less variety. The two forms to be considered are, (1) the Respons which belong to the lessons read during the service and form a musical interlude between them, and (2) the Antiphons which form an integral part of the Psalmody. The Hymns stand to a certain extent apart, and must be treated separately.

The same musical principles underlie both these collections. The root-forms of psalmody are described elsewhere under *ANTIPHON*, *PSALMODY* and *RESPONSORIAL PSALMODY*; while the simpler form of music consisting of inflected monotone, which has provided such forms as versicles and responses, the chants for the Lessons, Epistle, Gospel, etc., has been described under *INFLEXION*.

These simple recitatives are the earliest and most fundamental part of plain-song; they go back, for the most part, to the stage at which there is a clearly defined Dominant which figures as the reciting note, but no clearly defined Final. The most familiar example of this class is the music of the *PREFACE* (*q.v.*) in the Eucharist; another is the tone of the Lord's Prayer in the same service. This class of recitative stands midway between the mere inflected monotone of the responses or the lectionary tones on one side, and on the other the pieces of plain-song that may be definitely called art-products or compositions.

We come next to investigate the methods and characteristics of plain-song composition in the classical period of the 5th and 6th centuries,

starting with the Gradual, rather than with the Antiphonal, as being the more orderly and exclusively classical collection of the two. This great storehouse of plain-song shows many signs of uniformity and order; over against the parallel collection of Ambrosian music it exhibits the character of a well-managed and fertile estate as contrasted with the shapeless luxuriance of primitive forest. Its liturgical orderliness is shown by such things as the sequence of psalms used for the Communions in Lent, or for the Introits, Graduals, etc., in the summer season—points which do not call for discussion here. But its musical orderliness calls for some further exposition. A significant instance of methodical arrangement that has so far escaped notice is connected with the Graduals of the Third and Fourth Modes. These, with one exception, are all confined to the period of penitence between Septuagesima and Easter. The fact is worth noting, for it not only shows arrangement of a careful sort, but it also reveals something of the æsthetic sense of the musicians of the day, inasmuch as they seem to have connected this tonality with a penitential spirit. The one exception is also interesting. The gradual *Benedicite* of Michaelmas is to a large extent modelled on the gradual *Eripe me* of Passion Sunday. Now this festival belongs to the 6th, if not to the 5th, century; the holy day, and perhaps even the Mass itself, came originally from a church dedication. It is probable that, in settling the music of the gradual, such an exception was not made until the reason of the rule and perhaps its very existence had gone out of memory; and if this be so, then this rule of assigning the third and fourth mode graduals to the penitential season carries us back to very early days, and shows systematic arrangement being made early in the 5th century.

While such matters as these point to orderliness, it must be remembered that the classical Gregorian collection is far from being homogeneous in character. It is a stratified collection; and it is not difficult to separate, at any rate roughly, the various strata. The instance just cited suggests the high antiquity of the series of graduals; and on other grounds, too, it is probable that just as the gradual, in some musical form, represents the oldest form of psalmody at the Mass, so the existing graduals in their present form are the most ancient of the extant chants of that service. The Tract—the one instance of 'Direct Psalmody' here—should probably be put next in chronological order and before all the existing Mass music of the antiphonal sort. Among the antiphons those of the Offertory are probably to be assigned to an earlier date than the Introits and Communions. Last in order of time in the true Gregorian collection come the *alleluias*, which are so novel to the collection that their

position there is a much less stable one than that of the rest.

It is important to inquire how far this body of classical plain-song is uniform in its tonality, and presupposes the later modal theory. The answer seems to be that the actual music of the collection is not further removed from the eight-mode theory that prevailed, with slight modifications, through the mediæval period, than theory and practice in music are wont to be. No doubt there are certain features not easily reconcilable, and these have to be accounted for. Those who have supposed that the eight-mode theory was a late Byzantine importation of the 7th or 8th century, have also supposed that there followed upon the new importation a far-reaching transformation process by which the old music was adapted to the new theory; after which process there remained some few irreconcilable items such as these. But there are no signs of such a wholesale transformation visible. The discrepancies, as they at present exist, are to a large extent merely due to the corruption or the ignorant revision of the musical text. Apart from this, some licenses may be detected, which apparently the composers allowed themselves, though contrary to the strict theory. For example, they seem to have used the *b* for the low *B* as well as for the high *b*, although the strict theory knew of no such modification. This habit is best shown by a group of Offertories of the second mode, though the same phenomenon is visible also elsewhere. The discrepancy was not a glaring one, for by transposing the melody a fifth higher it was easy to avoid actually writing the low *B*. Such transposition, therefore, in some cases hides the fact; though in others the same Offertory may be found in one MS. transposed and in another kept at its normal pitch, and with the *B*₂ changed to *B*₁. (See for example the *O. Meditabor* of the Wednesday in Whitsun-week, which the Sarum Gradual gives untransposed, and therefore with *B*₂; while the Solesmes Gradual has an *F*, in the transposed position, equivalent to the *B*₂ in the normal position.) There are a good many instances of this point to be found, which show that the divergence is not a mere casual mistake. In other cases, too, besides these, the power of transposing, which existed either independently of the *B*₂ or through it, was utilised so as to allow the introduction of certain notes which were not, strictly speaking, countenanced by the theory, but involved the use of chromatic effects. Thus a sixth-mode melody, which in its natural position used the *B*₂ uniformly and not the *B*₁, was transposed a fifth higher, so that by use of the *B*₂ in the new position the leading note might be avoided, and the effect be obtained of an *F*♯, which is, properly speaking, alien to the mode. Similarly by transposition the effect of an *F*♯ could be obtained. Want of space

precludes the full discussion of these points with instances, and only the bare statement of the facts can be made here. (Cf. NOTATION; SOLMISATION.)

When these exceptions have been mentioned and allowed for, there remains the general truth that the bulk of the music of the classical Gregorian collection conforms to the mediæval modal theory in its main features. In some smaller points, such as the range of the modes, or the notes on which a melody could begin, the later mediæval theorists, after the 9th century, made certain pedantic rules which were at variance with the practice of previous generations, and even of their own; but these were of small importance. It is probably true to say that the theory that lies behind the classical plain-song is substantially that which survived as a tradition down to the time of the musical revival of Charlemagne's day, and not true to say that a new Greek theory was introduced then.

From this consideration of theory we turn to consider the art of musical composition in the stricter sense. What were the principles on which such music was written? There is a radical difference in this respect between the responsorial and the antiphonal music. As these two were confronted with one another in the primitive era we can dimly discern a certain amount of accommodation taking place between them. The responsorial clung to its strong sense of Dominant, but acquired a new definiteness as to Final. This was easily done, because, as we shall see, the method of responsorial composition made it easy to modify, if necessary, the close of a melody. On the other hand, the antiphonal music, that had originally very little sense of dominant, adopted it to a considerable extent. The difference between the Ambrosian and the Gregorian psalm-tones shows the effect of the change. In the former a variety of notes may be employed in each mode for the reciting note, while in the latter the reciting note is regularly the Dominant of the mode. (See PSALMODY.) But even after this mutual borrowing, the two methods of psalmody remained very distinct in their procedure, though to a certain extent they were bound to move along the same lines.

The fundamental lines of all plain-song composition were determined by the circumstances. The parallelism of Hebrew poetry made it necessary that the music which was set to it should be binary in form. The *Cursus*, or law of rhythm that ruled Latin prose, made definite moulds for the musical cadences. The pentasyllabic character of the great cadences is shown in the article RESPONSORIAL PSALMODY, and the shorter cadences of four, three and two accents were similarly determined. Thus though plain-song is not formal in the sense that measured music is formal, with its bar of so many beats

and its rhythm of so many bars, yet it has a very definite form of its own; and, however much bad execution and want of understanding may have obscured this in time past, and brought plain-song into undeserved bad odour with musicians, the recovery of the true plain-song and the study of its principles and methods are bound to bring it back to their notice not merely as an antiquarian study, but as living and effective artistic music.

Add to the two principles mentioned—the binary form and the rhythmical cadences—the principle of elaboration by vocal adornments, and you have the three root-ideas that are common to plain-song 'form.' This use of melodic enrichment, where elaboration was required, arose also out of the necessities of the case; for there was as yet no faculty of harmonic enrichment available, and richness was necessarily to be gained only by melodic elaboration. When this is realised, the long *melismata*, which, when ill-executed, are so intolerable in practice and so unjustifiable in theory, become, when properly sung, both artistically defensible and æsthetically ravishing.

The special methods of the responsorial music are exemplified in the graduals. These are very unevenly divided among the modes; they show less sense than the rest of the distinction between plagal and authentic. While fifty or so belong to the fifth and sixth modes (the old *Tritus*), and some forty to the first and second (the old *Protus*), the third and fourth (the old *Deuterus*) claim only a dozen, properly speaking, and the seventh and eighth (the old *Tetrardus*) only one or two more than that number. The method of composition is a development of inflected monotone. (See RESPONSORIAL PSALMODY.) Many of the cadences are common to many of the graduals of the same mode, but they are not as a rule shared with those belonging to other modes. Thus each mode has its characteristic figures—certain cadences which are used in closing (these may possibly have been modified when it was desired to make more explicit the Final), and others used in the body of the respond or verse. Some of these are combinable with one another, and thus by a skilful use of these figures the plain-song composer gets his effects of melodic richness and beauty just as the master of harmony gets his by the collocation, combination and sequence of familiar chords.

It is one of the chief merits of the new reforms instituted by the Benedictines, and now being carried through under Papal authority, that this music is being recovered from the chaos into which the official music editions current since the 16th century had plunged it: and once again the artistic method of the compositions is being revealed and vindicated. A specimen gradual of the *Tritus* tonality, with

some comments, will exemplify this method of composition (it consists of three sections):

This opening is found in half-a-dozen other cases; the closing *melisma* is also occasionally used in the body of the composition as well. The next section stands alone, and is not specially distinctive, but it is made up of common phrases:

The gradual then ends with a characteristic close, which, in combination with various other figures, is the most popular of all the final cadences in this tonality:

There is even more use of common material in the four sections which make up the verse. Its opening section is common to seven gradual verses, while an eighth has the same music but not as its opening section. Its second section is also in whole or in part shared by many of this group, a third section is peculiar to *Anima mea*, and not found elsewhere, while the final section brings in once more the closing cadence with which the gradual has been seen to end.

Even from this single example, and from the specimens given under RESPONSORIAL PSALMODY, it is easy to see the way in which the primitive monotone survives, though elaborate cadences have been grafted on to it, and even the monotone itself has become highly ornamented. It is interesting to compare some of the Hebrew cadences which form, with their monotone, the staple bulk of the Jewish ecclesiastical chant. Like the Hebrew writing they are to be read from right to left.

The Great Telisha (written thus ♪):

The Small Pazer (written thus ♪):

The Zarka is of a minor character (written thus ♪):

The Shalshleth is more elaborate still (written thus ♪):

These forms, given by S. Münster in his *Institutiones Hebraicae* of 1524, are of no great antiquity as it seems, nor do they compare in

interest with the Gregorian *melismata*; but they exemplify the same method of composition, which is indeed almost universal in early chant music.¹

It will be well to give here, for purposes of comparison, a few specimens of the cadences as used in the Responds of the Office, which are built up on the same lines. A good set of examples may be drawn from a group of Responds of the eighth mode, used in Holy Week—'In Monte Oliveti' and others akin to it.

Thus we have this used as a common cadence:

and in many more instances. This, again, is characteristic:

Sometimes a phrase is used with great skill in different positions, thus, on the Final and on the Dominant:

and the like phrase is also used so as to end on yet another degree of the mode, with a minor effect, thus:—
Thus throughout the whole range of responsorial compositions the same principles prevail.

The tracts, though they differ from the graduals in their method of performance, do not differ from them in their style of composition. They need not, therefore, be separately treated here. (See TRACT.) It is different, however, with the antiphons. These are all pure melody without any suspicion of a primitive monotone lying behind them. Antiphons in their simplest form are constructed upon certain standard types of melody, and even in the elaborate shape in which they figure in the Mass music they remain true to their history. In the Gregorian antiphon the Dominant figures prominently, but as a mere dominant and not as a reciting note. The Final is equally prominent, and the cadences are so ordered as to produce variety and feeling. Richness is here, too, obtained by the use of *melismata*; they differ in the different modes, and according to the sort of composition.

¹ For richer Jewish Plain-song see HEBREW MUSIC, also *Organoist and Choirmaster* for 1897; F. Leitner, *Der gesungene Psalter im jüdischen und christlichen Alterthum* (Freiburg, 1906), and *Jewish Encycl.*

The Offertories are the richest sort of chant, and stand on slightly different ground from the antiphons of the Introit and Communion. These two formed a pair, they agreed as to their method of psalmody, each of them being associated with several verses of a psalm sung to a tone, until in the course of the 10th-12th centuries the Communion lost its psalm. The offertory on the contrary was associated with one or more verses set to very elaborate chants, which were assigned to a soloist as if they had been responsorial rather than antiphonal. Similar differences prevail in the musical texture of the two classes. It is not at all uncommon to find the same figures used in introits and communions belonging to the same tonality (authentic and plagal), but it is not so common to find points of contact between them and the offertories of that tonality. When such are found they are usually in the closing phrases, as for example in the stock closing cadence of the fourth mode:—

The figures and phrases found in the antiphons are not unlike some of the simpler *melismata* of responsorial music, though rarely the same. Thus we find constantly in introits and communions of the first mode the phrase:— which is like one cited above. The figure is used also a third higher, so as to end not on D the Final, but on F:— But there is no doubt as to the marked difference between the antiphonal and the responsorial style.

The *Alleluia* differs in character from the preceding. It is essentially a *pneuma* or *jubilus*, that is, a long melody sung merely to a vowel sound. Having thus no liturgical text, it was not specially appropriated to a particular occasion. Even when St. Gregory added a psalm-verse to the *Alleluia* it retained some of its features as a free-lance; it was the most unstable element in the Gregorian repertory, and the one opening for new compositions for the Mass chants that remained when all other lines of such productivity were closed up in the 7th century. Unhindered by words, the *Alleluia* developed a musical form of its own. There is constant repetition of phrases, so that the same musical idea gains emphasis by reiteration, and also constant repetition with slight differences, so that variety and contrast is obtained as well as reiteration. The *Alleluia* of the fourth Sunday in Advent opens thus:

The verse 'Veni domine' follows, and in the middle of it comes this long *jubilus*:

At the end of the verse comes a closing *jubilus*, which is not in this case, as is usual, the same as that of the *Alleluia*.

Here also we get the beginnings of musical rhyme clearly established. Signs of it have appeared in the early compositions occasionally—especially in the case of one or two stock phrases already cited; but it becomes a common procedure in the *Alleluias*. That for Christmas Eve begins its verse thus (Solemes, not Sarum):

The tendency will be seen further developed when we come to Sequences.

The same features which have been described as regards the Mass music in the Gradual appear also in the Office music of the Antiphonal. There, too, is to be found the same blending of responsorial and antiphonal psalmody; but there is not the same clear line drawn between the classical plain-song of the 5th and 6th centuries, and that which (in the case of the Office) was composed subsequently, and added to the Gregorian collection. In some respects both antiphonal and responsorial music are seen in a more primitive stage in the Antiphonal than in the Gradual. The psalm music has not been written for purposes of a choir, and therefore it has not been elaborated as it has in connexion with the Mass. There, it is only in a few cases that that simple music has survived, as for example for one or two communions where the old simple melody has not been superseded. Here it is otherwise. The Respons of the Office, unlike those at Mass, keep as a rule to their stock psalm-tone for the verse; and, though they indulge in elaborate *melismata*, the structure is on the whole simpler than in the case of the graduals.

So far as antiphons are concerned, they exist in their primitive form in the Psalter of the Office, and are found in a simple shape throughout the whole of it. It is quite exceptional to find in the Office any elaborate form of antiphon at all comparable to the introits in complexity; though there is some gradation, and the antiphons of the gospel canticles are more florid as a rule than those of the psalms. It is among these antiphons of the Office that

It is possible to trace out the way in which a large number are constructed upon the same musical theme. (See ANTIPHON.)

We turn now from the Gregorian collection of classical plain-song to the music which lies outside it. The hymn melodies are not subsequent in date, but they are different in character, and must be treated separately. The rest of the music is subsequent in date, and is to be distinguished on that ground from the classical plain-song. It is not easy to discover what were the primitive melodies to which the hymns were sung at their first introduction to church worship. But it is clear that a hymn melody has always been regarded rather as a piece of folk-music than as an artistic composition; and in this respect it differs from the ordinary plain-song. It differs also inasmuch as it is the setting of metrical words, and therefore takes its character from the metre. It is necessarily, therefore, more closely allied to measured music than any other branch of plain-song; in fact, a simple syllabic melody set to a hymn of pronounced metre is bound to become almost measured in its rhythm. This is less the case with the more elaborate hymn melodies; but even with them there remains the necessity to fit the music to the regular recurrent accents of the words (see HYMN), and this produces a uniformity of rhythm which is not found in plain-song set to prose texts. Hymn melodies, though popular in origin, show, however, clear signs of artistic structure. For example, in the following melody there is considerable skill shown in developing the third line from the second, and making its close rhyme with its central climax.

The music of the 'Ordinary of the Mass' (see GREGORIAN MUSIC) lies for the most part outside the true Gregorian collection; this music, being essentially congregational in character, was originally simple and unvarying. There is one primitive form of *Kyrie*, one primitive setting of the Creed, *Sanctus* and *Agnus*, and probably also one primitive *Gloria in Excelsis*. These settings are of the simplest sort, and should be classed with the recitatives dealt with above rather than with the Gregorian compositions. It was not till long after the classical period that fresh settings of the Ordinary came into common use. They were for the most part local in character. Some were originally composed for the particular purpose, as, for example, the *Kyrie rex splendens* composed by St. Dunstan while waiting to celebrate. Others were nothing but adapta-

tions; take, for example, the following *Sanctus*, which is an adaptation of the antiphon *O Christi pietas* of the Office of St. Nicholas, in itself a late Office:

From the 9th or 10th century onwards these fresh melodies for the Ordinary were being composed or adapted. They have not by any means the merit of the classical compositions. Some began to approximate to the modern tonality, as for example an English *Gloria in Excelsis* which opens thus:

This has a very modern ring, and still more so in the somewhat degraded form in which it has been given in the new Vatican Gradual; and as time went on this tendency exhibited itself more and more fully until it issued in such compositions as the *Missa de Angelis*.

A development of a fresh sort brought about the introduction of tropes, proses and sequences. The influence of the Byzantine singers who came to the West in the early days of the Frankish Empire has probably been over-estimated. No doubt they were responsible for the introduction to the Western Church of certain Greek compositions such as the Lauds antiphons of the octave of the Epiphany. There was no great novelty in a borrowing such as this, for as far back as Latin plain-song can be traced there was going on a continual infiltration of Greek compositions, sometimes appearing singly, sometimes taken over in block, as for example in connexion with Candlemas and other festivals of the Blessed Virgin. It is, however, probably to these Byzantine singers that we must assign the impulse which produced tropes and sequences. The same instinct which had already produced the *Alleluia-jubilus* induced people to go a step further, and interpolate similar musical

phrases into the midst of already existing compositions, or to append them at the end. Thus, the *Alleluia* became the starting-point for a new set of *Jubili*; and even in the body of old-fashioned responds there were inserted long *melismata*, which in process of time were made into proses (see SEQUENTIA). When this had come about, it was not surprising that the same tendency should decorate the music of the Ordinary—the *Kyrie*, etc.—with tropes.

This fresh development marks a further advance in the development of musical form. In these *melismata* we find not only the extension of those same principles of repetition and rhyme which we have already noted in the case of the *Alleluia*, but we find also the first symptoms of key relationship. The fundamental structure of the sequence melody was based upon the principle of repetition, for normally each phrase of the melody was repeated. In many of them the cadences are so framed as to suggest a tonic and dominant relationship. This is remarkable. Hitherto any suggestion of key relationship had been that of tonic and subdominant, and had arisen out of the use of the tetrachord symmenon and the B \flat . But this appearance of tonic and dominant relationship is new. The longer sequence melodies give it in very clear form, and the beginnings of it, at any rate, are observable even in such a short melody as the following, in the sections marked by the change of clef:

The *Alleluia* melody *Eduxit Dominus*, set later to the Prose *Prome casta concio*.

The tropes and other developments of the sort, because of their liturgical impropriety, disappeared as quickly as they had arisen, surviving mainly in the sequences, which became practically independent compositions, and in the farsed *Kyries*; but the fresh principles of form which they had introduced still continued. The new ideas of key relationship naturally formed a league with the folk-song tonality which was invading music; and since the Church was already provided with a collection of liturgical music, which satisfied for the most part its traditional needs, on the lines of plain-

song composition, further musical experiment, both melodic and harmonic, was restricted to new ecclesiastical forms such as the motet, or was even diverted to a large extent into the secular sphere.

After the 11th century plain-song composition went on, but only to a limited extent. At times it made pathetic attempts to keep the old flavour, just as in later days the Italian composers tried to keep up the polyphonic style even when their thoughts ran more naturally in the operatic style; but the later writers of plain-song could not fail to be profoundly influenced by the new tendencies out of which modern music was to develop. The true art of plain-song was lost, the best days of plain-song composition were over, and it would have been well for plain-song if the compositions in a degraded style which were put forth in its name, and obtained an unhealthy popularity, had never come into existence. Plain-song, like everything else, must be judged by its classical epoch; and the decadent compositions of the 15th, 16th and 17th centuries are only worth study as a warning of what plain-song is not.

In conclusion, something must be said about the preservation of the plain-song tradition. The music in the early days was all preserved orally. It is not clear at what time the melodies were written down. Long before that they were probably taught by the teacher to his class from memory, and with the assistance of gestures which indicated the rise and fall of the melodies, and probably also the extent of the intervals. Even when the system of neum notation arose, out of combination of the acute and grave accents (see NOTATION), the practical singing was still a matter of oral tradition, and the noted books were probably few. The change which introduced a staff notation instead of the neumatic notation made it possible to define the intervals accurately, and, in this respect at any rate, to be more secure in the preservation of the tradition. The grouping and phrasing was less well safeguarded by the Guidonian notation; but the fact that the earliest manuscripts which contain the staff notation agree in the main as regards the tradition, though they are spread over a wide area, shows that on the whole the tradition has been faithfully preserved, and that the mediæval books substantially represent the primitive plain-song.

It is probably true to say that the tradition suffered more at the period subsequent to the invention of printing than it ever suffered in the period of oral tradition. So long as manuscripts continued there was uniformity and faithfulness; but ill-advised and ignorant reforms were attempted in the 16th century which led up to the Medicean editions at the beginning of the 17th century. These editions

were fastened upon the Church, and became official, though they presented a most undesirable and corrupt text of the melodies. Interest in plain-song, however, and knowledge about it were so slight that no rebellion took place against the evil tyranny of the Medicean editions till the 19th century. Simultaneously the tide set against the deformation of the chant by 'Machicotage,' i.e. the introduction into the melody of the grace notes and *fioriture* beloved of the 18th century. From 1848 there dates a new interest and a gradual improvement in the tradition. The new Mechlin books of 1848 were no improvement, but they were followed by a better edition issued jointly by the Archbishops of Reims and Cambrai. Good pioneer work was also done by the Jesuit Lambillotte in France, and by Hermesdorff in Germany; but these attempts only provoked suspicion. Official sanction was again given, and in a much more definite and exclusive form, to the corrupt Medicean version of the melodies, and from 1871 onwards the Ratisbon service-books perpetuated the evil. Following on the work of Lambillotte and Hermesdorff came the fuller revival of real plain-song in the hands of the Benedictines of the Congregation of France, led by Guéranger, Pothier and Mocquereau. Their work has been to return to the manuscripts, to show up the unworthiness of the modern printed editions in comparison with the uniform manuscript tradition, and to call for the official adoption of a better set of service-books. The publications issued at Solesmes have led up to this result. The Gradual and other service-books published by the monks showed their superiority and their greater conformity to the true tradition, while the scientific handling of the questions at issue went on in the succeeding volumes of *Paléographie musicale*. Through this patient work and ardent enthusiasm the Vatican itself has been conquered. Plain-song reform has received official sanction, and a new set of books issued from the Vatican press reproduces more faithfully the true Gregorian tradition of plain-song.

In England the plain-song tradition began early, coming straight from Rome with the advent of St. Augustine; and the English plain-song tradition has always been a particularly trustworthy one. When the Latin services were superseded in the 16th century it was only possible to preserve very little of the ancient plain-song. It was retained in the English Litany issued by Cranmer in 1544; and six years later, in 1550, one year after the issue of the First Prayer Book, John Merbecke published his famous *Booke of Common Praier Noted*, in which plain-song melodies, printed in the square-headed Gregorian character, were adapted to the Anglican offices of 'Matins,' 'Euen Song,' 'The Communion,' 'The

Communion when there is a Burial,' etc., under the serious restriction which was imposed upon him (in rebellion against former elaborateness), namely, that he should only set one note to one syllable. Through these publications and others the Gregorian tones survived in some form even down to the 18th century, but the bulk of the plain-song had passed away out of the English service. (See MERBECKE; CHANT.)

The revived interest in plain-song within the English Church was begun by Dyce, who brought out his *Book of Common Prayer Noted* in 1843. Since then there have been many adaptations of the simplest plain-song of the responses and tones to the English service. The *Hymnal Noted* brought back the hymn melodies in 1851, and these have become increasingly popular. The more genuine and elaborate plain-song compositions have not had the same opportunity, and have not obtained any wide currency, though in some churches plain-song masses are sung at the Holy Communion service, and even Introits also, with the English words adapted to the old melodies. In some of the modern Anglican Communities plain-song has been much studied and is very fully, if not exclusively, used in the community services. The later part of this revival of the plain-song tradition in the English Church has to a large extent focussed round the PLAIN-SONG AND MEDIAEVAL MUSIC SOCIETY, and, apart from rival Plain-song Psalters, its publications represent the greater part of what has been done.

For the study of Plain-song the Benedictine *Paléographie* is indispensable; the most recent and full manual is that of Dr. Wagner, *Einführung in die Greg. Melodien* (Part I., General and Liturgical; Part II., on Notation; Part III., on Theory). An English translation of Part I. is published by the Plain-Song and Mediaeval Music Society. A *Grammar of Plain-Song* has been issued by the Benedictines of Stanbrook. Older books are Pothier, *Les Mélodies Grégoriennes*, *The Elements of Plain-Song* (Plain-Song Soc.); Kienle, *Chant Grégorien*. Important scientific points are treated in Gevaert's *Mélopée antique*, and Jacobsthal's *Chromatische Aliteration*.

W. H. F.

PLAIN-SONG AND MEDIAEVAL MUSIC SOCIETY, THE. In Nov. 1888 a meeting was held by Somers Clarke, W. J. Birkbeck, H. B. Briggs, Brown, Nottingham, Athelstan Riley and B. Luard Selby, at which was formed the above Society with the following objects:

- (1) To be a centre of information in England for students of Plain-song and Mediaeval Music, and a means of communication between them and those of other countries.
- (2) To publish facsimiles of important MSS., translations of foreign works on the subject, adaptations of the plain-song to the English use, and such other works as may be desirable.
- (3) To form a catalogue of all plain-song and

measured music in England, dating not later than the middle of the 16th century.

(4) To form a thoroughly proficient choir of limited numbers, with which to give illustrations of Plain-song and Medieval Music.

The subscription is £1 per annum, entitling members to all publications gratis. Clergymen and organists are eligible for election as associates, at a subscription of 2s. 6d. per annum, entitling them to the annual publications at a reduced price. H. B. Briggs was honorary secretary from the foundation of the Society till his death in 1901, when he was succeeded by Percy E. Sankey (retired 1925), who also became treasurer. In 1926 Dom Anselm Hughes, O.S.B., became Secretary.

The publications of the Society fall into two branches, one of which, though possibly the more useful of the two, does not need detailed specification in this place. It consists of educational works on the execution of plain-song, and adaptations to the English use. The other branch consists of facsimiles of MSS., and its value from an archaeological point of view is very great, even if some of the translations printed in the older issues are here and there open to question. The volumes already published are as follows :

- The Musical Notation of the Middle Ages (out of print).
Songs and Madrigals of the 15th century (14 examples).
Gradual *Sarcophagus*, a facsimile of an English 13th-century Gradual, with an introduction, etc.
The Sarum Gradual, an introduction to the above.
Antiphonale *Harburiense*, a facsimile of an English 13th-century Antiphoner.
Early English Harmony, from the 10th to the 15th century. Vols. I. and II.
Madrigals of the 15th century (six in modern notation). (Out of print.)
Bibliothèque Musico-Liturgica, a descriptive hand-list of the Musical and Latin Liturgical MSS. of the Middle Ages preserved in English libraries.
Pars antiphonarii, a reproduction of a MS. of the 11th century.
Pie Cantiones, a collection of church and school songs, A.D. 1582.
Wagner's Introduction to the Gregorian melodies.
The Ordinary of the Mass.
Elements of Plain-song.
Plain-song hymn melodies and Sequences.
Fauxbourdon to Magnificat.

M.; addns. from P. E. Sankey.

PLAINTÉ, the name of an ornament of the French school, also called **ACCENT** or **CHUTE**. (See **ORNAMENTS**.) E. B.

PLANCHÉ, JAMES ROBINSON (b. London, Feb. 27, 1796; d. there, May 30, 1880), of French descent; made Rouge Croix Pursuivant of Arms, 1854, and Somerset Herald, 1866. Planché's many dramas and extravaganzas do not call for notice in these pages; but he requires mention as the author of the librettos of 'Maid Marian, or the Huntress of Harlingford, an Historical Opera,' for Bishop (Covent Garden, Dec. 3, 1822), and 'Oberon, or The Elf-King's Oath, a Romantic and Fairy Opera,' for Weber (Covent Garden, Apr. 12, 1826). He was manager of the musical arrangements at Vauxhall Gardens in 1826-27, and in 1838 he wrote for Chappell a libretto founded on the Siege of Calais by Edward III., with a view to its being set by Mendelssohn. Mendelssohn, however, was not satisfied with the book, and it was ultimately transferred to Henry Smart, by whom a large portion was

composed. The correspondence between Mendelssohn and Planché may be read in the *Recollections and Reflections* of the latter (1872 i. 279-316). G.

PLANÇON, POL HENRI (b. Fumay, Ardennes, June 12, 1854; d. Paris, Aug. 11, 1914), received instruction in singing at Paris from Duprez, and later from Sbriglia. In 1877 he made his début on the stage at Lyons as St. Bris, and during a two years' engagement there sang, Dec. 1, 1877, as Joseph in Gounod's 'Cinq Mars'; Feb. 8, 1879, as Eustache on the production of Saint-Saëns's 'Étienne Marcel.' On Feb. 11, 1880, he made his début in Paris at the Théâtre de la Gaîté as Colonna in Duprat's 'Pétrarque.' He next sang with great success at the Lamoureux Concerts, and on June 25, 1883, first appeared at the Opéra as Mephistopheles, a part in which he became very popular, and which was sung by him over a hundred times during his ten years' engagement there. His parts included, Apr. 2, 1884, Pittacus on the revival of Gounod's 'Sapho' and in new operas; Nov. 30, 1885, Don Gormas in Massenet's 'Cid'; Mar. 21, 1890, Francis I. in Saint-Saëns's 'Ascanio,' etc. On June 3, 1891, he made his début at Covent Garden as Mephistopheles, with great success. From that time until 1904 inclusive, he sang every season at Covent Garden, and in 1892 for a few nights at Drury Lane, and obtained great popularity in a large number of parts sung in four different languages, notably as both the King and the Priest in 'Aida'; Capulet and the Friar in 'Roméo'; Oroveso, the bass parts of Meyerbeer and Wagner (Landgrave, Henry the Fowler, Pogner), etc. His later parts included, June 20, 1894, General Garrido in Massenet's 'Navarraise'; July 11, 1898, Arioforme in Mancinelli's 'Ero e Leandro'; May 30, 1901, in English as the Friar in Stanford's 'Much Ado about Nothing'; July 14, 1902, the King in Bunning's 'Princesse Osra'; July 6, 1904, Phanuel in Massenet's 'Salome,' etc. From 1893 Plançon sang much in America, where he enjoyed the same popularity as in Europe. A. C.

PLANQUETTE, ROBERT (b. Paris, July 31, 1848; d. there, Jan. 28, 1903), passed rapidly through the Conservatoire, and first appeared as a composer of songs and chansonsnettes for the Cafés-concerts. Encouraged by the popularity accorded to these songs, he rose to operettas—'Valet de cour,' 'Le Serment de Mme. Grégoire' and 'Paille d'avoine.' The decided progress evinced by this last piece was confirmed by 'Les Cloches de Corneville,' a three-act operetta, produced with immense success at the Folies Dramatiques on Apr. 19, 1877, adapted to the English stage by Farnie and Reece, and brought out at the Folly Theatre, London, Feb. 23, 1878, with equally extraordinary good fortune. Planquette after

wards composed and published 'Le Chevalier Gaston,' one act (Monte Carlo, Feb. 8, 1879), and 'Les Voltigeurs de la 32me,' three acts (Théâtre de la Renaissance, Jan. 7, 1880). His next piece was 'La Cantinière,' which was followed in 1882 by 'Rip van Winkle' (also given in London with great success), 'Nell Gwynne' in 1884, 'La Crémallière' in 1885, and 'Surcouf' in 1887. In the latter year he wrote, especially for England, 'The Old Guard' (Liverpool and London), and in 1889 his 'Paul Jones' was brought out at the Prince of Wales's Theatre in London; his last works were 'La Cocarde tricolore' (1892), 'Le Talisman' (1892), 'Panurge' (1895) and 'Mam'zelle Quat' Sous' (1897). G., with addns.

PLANTADE, CHARLES HENRI (b. Pontoise, Oct. 14, 1764; d. Paris, Dec. 18, 1839), was admitted at the age of 8 to the school of the king's 'Pages de la musique,' where he learned singing and the violoncello. On leaving this he studied composition with Honoré Langlé (b. Monaco, 1741; d. Villiers le Bel, 1807), a popular singing-master; the pianoforte with Hüllmandel (b. Strassburg, 1751; d. London, 1823); and the harp, then a fashionable instrument, from Petrini (b. 1744; d. Paris, 1819). Having started as a teacher of singing and the harp, he published a number of romances, and nocturnes for two voices, the success of which procured him admission to the stage. Between 1791 and 1815 Plantade produced a dozen or so dramatic works, three of which, 'Palma, ou le voyage en Grèce,' two acts (1798), 'Zoé, ou la pauvre petite' (1800) and 'Le Mari de circonstance' (1813), one act each, were engraved. The whole of this fluent but insipid music has disappeared. His numerous sacred compositions are also forgotten; out of about a dozen masses, the 'Messe de Requiem' alone was published, but the Conservatoire has the MS. of a Te Deum (1807), several motets and five masses. He had a great reputation as a teacher, was a polished man of the world, and a witty and brilliant talker. Queen Hortense, who had learned singing from him, procured his appointment as maître de chapelle to her husband, and also as professor at the Conservatoire (1799). He gave up his class in 1807, but resumed it in 1815; was dismissed on Apr. 1, 1816, reinstated Jan. 1, 1818, and finally retired in 1828. He was officially employed in the Opéra in 1812. He was decorated with the Légion d'honneur by Louis XVIII. in 1814. His best pupil was Mme. Cinti-Damoreau. He left two sons, one of whom, CHARLES FRANÇOIS (b. Paris, Apr. 14, 1787; d. Mar. 25, 1870), composed numerous chansons and chansonnettes, some of which have been popular. G. C.

PLANTÉ, FRANÇOIS (b. Orthez, Basses Pyrénées, Mar. 2, 1839), a distinguished pianist, appeared in Paris at a very early age as

an infant prodigy, playing the piano with much success. In Dec. 1849 he entered Marmontel's class at the Conservatoire, and in the following year carried off the first prize. He was then before the public again as a performer, for some three years, during which time he played frequently at the chamber concerts given by Alard and Franchomme; in 1853 he returned to the Conservatoire to study harmony under Bazin. Here he obtained a second prize in 1855. It must be regarded as a fortunate circumstance that at a party at which he was playing the audience persisted in talking to an extent that highly offended Planté; whereupon he retired in great wrath to the Pyrenees, where he remained for nearly ten years, becoming familiar with the compositions of all schools, and counteracting the evils which necessarily accompany such a career as his had hitherto been. He did not reappear in Paris until 1872, when he devoted himself to playing on behalf of various charitable objects. A series of concerts given with Alard and Franchomme established his position, and thenceforth he held a distinguished place among French pianists. He undertook many successful concert tours on the Continent, and appeared in England in 1878, playing Mendelssohn's second PF. concerto at the Philharmonic Concert of May 1 in that year. His playing, characterised by repose, maturity of style and rare intelligence, was enjoyed in Paris as lately as the war period (1914-18). M.

PLATEL, NICOLAS JOSEPH (b. Versailles, c. 1777; d. Brussels, Aug. 25, 1835), son of a royal chamber musician, was educated as a page of Louis XVI., and studied music under Richer and Duport (violoncello). In 1796 he was appointed violoncellist at the Théâtre Feydeau, eloped with a singer to Lyons, but returned to Paris in 1801. In 1803 he gave a concert at Brussels, whence he went to England. After touring for some years he went to Antwerp in 1813, became principal violoncello at the Brussels theatre in 1819, and professor at the Conservatoire in 1831. He acquired a great reputation as teacher, and counted Servais, Batta and the elder Demunck (who became his successor) among his pupils. He wrote 5 concertos, sonatas, solos, etc., for violoncello and some duets for violin and violoncello (E. v. d. Straeten: *History of the Violoncello*).

PLAYFORD. A family connected with the publication of English music from 1650 to the first decade of the 18th century.

(1) JOHN, the elder (b. 1623; d. circa 1686),

was a younger son of John Playford of Norwich.¹ In 1648 his name appears as bookseller in London, and in Nov. 1650 he published his first musical work, 'The English Dancing-Master,' dated 1651. From this time onward his publications included Hilton's 'Catch that Catch can,' 'Select Musically Ayres and Dialogues' and 'Musick's Recreation on the Lyra Violl.' He was from 1653 clerk to the Temple Church, and held his shop in a dwelling-house connected with the Temple ('in the Inner Temple near the Church door'). As his wife, Hannah, kept a boarding-school for young ladies at Islington, he in due course removed there, still keeping on his place of business in the Temple. His house at Islington was a large one 'near the church,' and after his wife's death in 1679 he advertised it for sale,² removing to Arundel Street 'near the Thames side, the lower end and over against the George' (some references give this as 'over against the Blew Ball'). The character of the man appears to have been such as made him liked and respected by all who came into contact with him, and he seems to have well earned his general epithet 'Honest' John Playford. According to the edition of Pepys's Diary edited by Wheatley, Samuel Pepys had very friendly relations with Playford, the latter frequently giving him copies of his publications.

In music-publishing Playford had no rival, and the list of his publications would practically be a list (with the exception perhaps of less than twenty works) of all the music issued in England during the time covered by his business career. Playford was enough of a musician to compose many psalm tunes and one glee which became popular, 'Comely Swain, why sitt'st thou so'; and to write a handbook on the theory of music which, concise, plain and excellent, might well serve for a model to-day. This *Introduction to the Skill of Musick* attained nineteen or twenty editions, and was the standard text-book on the subject for nearly a century; the first edition is dated 1654, and the last 1730. In 1655 Playford published an enlarged edition of it which long passed as the first.³ It is divided into two books, the first containing the principles of music, with directions for singing and playing the viol; the second the art of composing music in parts, by Dr. Campion, with additions by Christopher Simpson. The book acquired great popularity; in 1730 it reached its nineteenth edition, independent of at least six intermediate unnumbered editions. There are variations both of the text and musical examples, frequently extensive and important, in every edition. In the tenth edition, 1683, Campion's tract was replaced by *A Brief*

Introduction to the Art of Descant, or composing Music in parts, without author's name, which in subsequent editions appeared with considerable additions by Henry Purcell. The seventh edition contained, in addition to the other matter, 'The Order of performing the Cathedral Service,' which was continued, with a few exceptions, in the later editions.

Another of Playford's important works was the 'Dancing-Master,' a collection of airs for the violin used for country dances, the tunes being the popular ballad and other airs of the period. This work ran through a great number of editions from 1650-1728, and is the source of much of our national English melody (see SHARP, Cecil). 'Courtly Masquing Ayres of two parts' (a title-page of the treble part is preserved in the Bagford collection in the British Museum, Harl. MS. 5966) appeared in 1662.

Other valuable works in a series of editions were published by Playford, books of catches, of psalms and songs. Instruction books and 'lessons' for the cithern, viol and flageolet also followed in a number of editions. After Playford's death many of these were continued by his son Henry, and by Wm. Pearson and John Young, who ultimately acquired the rights of publication.

In the early times of his business, Playford was in trade relations, if not in partnership, with others—John Benson, 1652; Zach Walkins, in 1664-65; and later than this with John Carr, who kept a music shop also in the Temple, a few steps from John Playford's.

Many mistaken statements have been made regarding Playford's business. For instance, it is mentioned⁴ that he invented the 'new ty'd note' in 1658. This is quite an error. The tied note was not introduced before 1690, some years after Playford's death. Neither is it true that in 1672 he began engraving on copper.

John Playford, senior, was neither a printer nor an engraver, and long before 1672 he had issued musical works printed from engraved copperplates. In 1667 Playford republished Hilton's 'Catch that Catch can,' with extensive additions and the second title of 'The Musical Companion,' and a second part containing 'Dialogues, Gleees, Ayres and Ballads, etc.'; and in 1672 issued another edition, with further additions, under the second title only. Some compositions by Playford himself are included in this work. In 1671 he edited 'Psalms and Hymns in solemn musick of four parts on the Common Tunes to the Psalms in Metre: used in Parish Churches'; and in 1677, 'The Whole Book of Psalms, with the . . . Tunes . . . in three parts,' which passed through twenty editions. In 1673 he took part in the Salmon and Locke controversy, by addressing a letter to the former, 'by way of Confutation

¹ See researches of Miss L. M. Middleton in *Notes and Queries*; also *D.N.B.*

³ See the *Samuelbonds* of the *Int. Mus. Ges.* vi. 521.

⁴ *D.N.B.*

of his Essay, etc.,' which was printed with Locke's *Present Practice of Musick Vindicated*. The style of writing in this letter contrasts very favourably with the writings of Salmon and Locke. In place of abuse we have quiet argument and clear demonstration of the superiority of the accepted notation (see LOCKE). Towards the year 1684, Playford, feeling the effects of age and illness, handed over his business to his son Henry; and there is a farewell to the public in the fifth book of 'Choice Ayres and Songs,' 1684. All attempts to settle satisfactorily the date of John Playford's death have hitherto failed. The likeliest date is about Nov. 1686,¹ and this is borne out by his unsigned will, which, dated Nov. 5, 1686, was not proved until 1694, the handwriting being sworn to, on the issue of probate. It may be supposed that the will was written on his death-bed, and that from feebleness or other cause it remained without signature. That he was dead in 1687 is proved by several elegies; one by Nahum Tate, set to music by Henry Purcell, was issued in folio in this year. Cummings suggests² that this relates to John Playford the younger, but he has overlooked the fact that an elegy 'on the death of Mr. John Playford, author of these, and several other works' appears in the 1687 and later editions of Playford's *Introduction to the Skill of Musick*, a work incontestably by the elder John Playford.

There are several portraits of the elder Playford extant, taken at different periods of his life, and these are prefixed to various editions of the *Introduction*.

(2) HENRY, son of the above (b. May 5, 1657³; d. after 1706), succeeded to his father's business in 1684. Before this, however, he had published one or two books, notably *An Antidote against Melancholy*, 1682 and 1684. Henry Playford was at first in partnership with Richard Carr, the son of John Carr. The Carrs, father and son, kept a music shop at the Middle Temple Gate, facing St. Dunstan's Church, and the early publications of Henry Playford were sold both at the Inner Temple and here, Henry Playford becoming in due course owner of the shop at the Middle Temple Gate, or at Temple Change as it was otherwise called. Henry Playford republished editions of the works originally issued by his father and a small quantity of his own fresh ventures. In 1698 he advertised a lottery of music-books. He published several important musical works, among which were Purcell's 'Ten Sonatas' and 'Te Deum and Jubilate for St. Cecilia's day,' 1697; 'Orpheus Britannicus,' 1698-1702; Blow's 'Ode on the Death of Purcell,' 1696, and 'Amphion Anglicus,' 1700. It is quite evident that he had not the same business ability as his father, but in 1699 he established a Concert of Music held thrice weekly at a

coffee-room, and in 1701 another series of weekly concerts at Oxford.⁴ Later he developed into a dabbler in picture and print dealing, and his music business began in consequence to decline. Walsh had arisen, and Henry Playford must have found in him a very powerful rival in the music trade. The statement⁵ that in 1694 he sold his copyright in the 'Dancing-Master' to Heptinstall does not appear to be justified, as long after this date his name as publisher occurs on all copies. About 1706 or 1707 it appears that he had retired from the music business altogether. His stock seems to have been purchased by John CULLEN (q.v.), whose address 'at the Buck between the two Temple Gates' appears to be Henry Playford's (formerly John Carr's) shop. His death is variously given as occurring in 1706 and 1710. If his will was proved in 1721, as one authority states, it is likely that his decease must have been much later than either of these dates.

(3) JOHN, the younger (b. Stanmore Magna, 1655; d. 1685). Miss Middleton has definitely dispelled the error that he was a son of John Playford, the elder; he was his nephew, and son of Matthew Playford, rector of Stanmore Magna. He must have served his apprenticeship to printing in London, and this he no doubt did with William Godbid, a printer of great repute for scientific works and for music, being the one employed in his period by the elder Playford. The printing-office was in Little Britain, and Godbid having died in 1679, young Playford in this year entered into partnership with the widow Anne Godbid. At her death or retirement Playford alone held the business, and printed all the musical works issued by his cousin Henry until 1685.

In this year John Playford, junior, died, and his sister⁶ Eleanor advertises the business as for sale.⁶

In regard to the Playford publications it may be mentioned that after the death or retirement of Henry Playford such books as were still saleable, like the 'Dancing-Master,' *The Introduction to the Skill of Musick*, Simpson's *Compendium of Musick*, Playford's 'Whole Book of Psalms,' etc., were reprinted in fresh editions by William PEARSON (q.v.), and were sold by John Young. Cullen certainly acquired Henry Playford's stock (probably he was an assistant with Playford), but never issued any editions. All the Playford publications, with very few exceptions, were from movable music type. The exceptions were some instrumental works, as 'Musick's Handmaid,' etc., and some reprints from earlier copperplates, as Orlando Gibbons's 'Fantazies,' Child's 'Psalms,' etc.; these the

elder Playford had got possession of on starting business. Henry Playford also issued a few engraved half-sheet songs. (For list of the Playford publications see the writer's *British Music Publishers*.) F. K.

PLEASANTS, THOMAS (b. 1848; d. Nov. 20, 1889), became in 1870 organist and master of the choristers of Norwich Cathedral. He was buried on Nov. 23 in the north transept of Norwich Cathedral. (*West's Cath. Org.*)

PLECTRUM, a small piece of horn, wood, ivory, tortoiseshell or other substance used for playing certain stringed instruments, and taking the place of the finger-nails, or fingers in instruments of the lute tribe. From paintings and other evidence it is quite plain that the Greeks generally played the lyre with a plectrum, though this was varied by the use of the fingers. In modern days the instruments of the mandoline family alone are played with the plectrum. Although the wire-strung guitar of the middle of the 18th century appears to have demanded (for the fingers' sake) a plectrum, yet the old instruction books direct it to be played by the unarm'd fingers. The touch of the finger on the string produces, of course, a quality of tone which no substitute can effect. The jacks of the spinet and harpsichord are plectra, and though generally these are armed with quill, yet in the later form of harpsichord one set of jacks is supplied with leather tips which produces a more mellow effect. PLENO, see PIENO.

PLEYEL, (1) IGNAZ JOSEPH (b. June 1, 1757; d. Paris, Nov. 14, 1831), a most prolific instrumental composer, the twenty-fourth child of the village schoolmaster at Ruppersthal in Lower Austria.

His musical talent showed itself early. He learnt to play the clavier and violin in Vienna, the former from Van Hal, or Wanhall, and found a patron in the then Count Erdödy, who put him under Haydn as a pupil in composition in 1774, and appointed him his Kapellmeister in 1777, allowing him, however, leave of absence to continue his studies. After remaining several years with Haydn he went to Italy, where he fully imbibed the taste of the Italian opera, and lived in intercourse with the best singers and composers. In 1783 he was called to Strassburg at first as deputy, and in 1789 as first Kapellmeister to the cathedral. In 1791 he was invited to London to take the control of the Professional Concerts of the following season. He was probably not aware of the fact that his appointment was a blow aimed at Salomon, and that he would be in competition with Haydn. The blow, however, missed its aim. Pleyel conducted his first Professional Concert, Feb. 13, 1792. Haydn was present, and the programme contained three symphonies, by Haydn, Mozart and

Pleyel himself (composed expressly for the concert). On May 14 he took his benefit. The visit was a satisfactory one both from an artistic and a pecuniary point of view. On his return to France he found himself denounced as an enemy to the Republic, and was forced to flee. He succeeded in clearing himself from the charge, and at length settled in Paris as a music-seller. In 1800 the musicians of the opera proposed to perform Haydn's 'Creation,' and Pleyel was selected to arrange that Haydn should himself conduct the performance. He got as far as Dresden on the road to Vienna, but all the influence of Haydn and Artaria failed to obtain a pass for him any further, and the direction of the performance came finally into the hands of Steibelt. The evening of the concert—3 Nivôse or Dec. 24, 1800—was a memorable one, since on his road to the opera-house, in the Rue Nicaise, Bonaparte nearly met his death from an infernal machine. Pleyel visited Vienna and obtained great success there in 1805. He was the first to publish the complete collection of Haydn's quartets (except the last three, of which two had not then been printed, and the third was not composed till some time afterwards). The edition, in separate parts only, has a portrait of Haydn by Darcis after Guérin, and is dedicated to the First Consul. It was followed by thirty quartets and five symphonies in score. In 1807 Pleyel founded the pianoforte factory which has since become so widely celebrated. (See PLEYEL & Co.)

Haydn considered Pleyel as his dearest and most efficient pupil. He writes from London :

'Since his arrival [Dec. 23, 1791], Pleyel has been so modest to me that my old affection has revived; we are often together, and it does him honour to find that he knows the worth of his old father. We shall each take our share of success, and go home satisfied.'

Pleyel dedicated to Haydn his op. 2, six quartets 'in segno di perpetua gratitudine.' When Pleyel's first six string quartets, dedicated to his patron, Count Ladislaus Erdödy, appeared in Vienna, Mozart wrote to his father (Apr. 24, 1784) :

'Some quartets have come out by a certain Pleyel, a scholar of Jos. Haydn's. If you don't already know them, try to get them, it is worth your while. They are very well written, and very agreeable; you will soon get to know the author. It will be a happy thing for music, if, when the time arrives, Pleyel should replace Haydn for us.'

This wish was not destined to be fulfilled. In his later works Pleyel gave himself up to a vast quantity of mechanical writing, vixing Haydn by copying his style and manner without a trace of his spirit, and misleading the public into neglecting the works of both master and scholar, including many of Pleyel's own earlier compositions, which were written with taste and care, and deserve a better fate than oblivion.

Pleyel was emphatically an instrumental composer, and wrote an enormous number of symphonies, concertos and chamber pieces (list in *Fétis*), comprising twenty-nine symphonies; five books of quintets and seven of quartets, some of them containing as many as twelve compositions each; six flute quartets; four books of trios; eight concertos; five symphonies concertanti; eight books of duets for strings; ten books of sonatas for PF. solo, and twelve sonatas for PF. and violin. When in Italy he wrote an opera, 'Iphigenia in Aulide,' which was performed at Naples in 1785. A hymn or cantata in praise of revolutionary doctrines, called 'La Révolution du 10 août (1792) ou le Tocsin allégorique,' is mentioned by Lobstein, and a 'Hymn to Night' was published by André at Offenbach in 1797. A series of twelve Lieder, op. 47, was published at Hamburg by Gunther and Böhme. It has never yet been mentioned that his introduction to the world as a vocal composer was with an opera for the marionette theatre at Esterházy in 1776, 'Die Fee Urgele,' containing a quantity of vocal pieces. A portrait of him, painted by H. Hardy and engraved by W. Nutter, was published by Bland during Pleyel's residence in London. C. F. P.

Pleyel's connexion with Scottish music arose in this way. In 1791 George THOMSON (*q.v.*) of Edinburgh sought Pleyel in London, and applied for assistance in the arrangements of a collection of Scots songs which he was about to issue. He also commissioned him to compose twelve sonatas for the pianoforte, founded upon Scottish airs. Pleyel, after much delay and difficulty, completed six of the sonatas and wrote symphonies and pianoforte arrangements to thirty-two Scots songs, for all of which Thomson, in 1793, paid him £131:6s. The sonatas were issued in two sets of three each, and the first twenty-five songs formed the first number of Thomson's collection, the remaining seven being published later. Thomson's relations with Pleyel were by no means satisfactory. He complained that the composer had 'juggled with him' and 'grossly deceived him,' added to which was the delay and uncertainty of communicating with him during the continental war. Thomson, therefore, at a later date obtained the services of Kozeluch and finally Haydn, ultimately rejecting much of Pleyel's work on a republication for new arrangements by Haydn. F. K.

(2) CAMILLE, eldest son of the foregoing (*b.* Strassburg, Dec. 18, 1788; *d.* Montmorency, near Paris, May 4, 1855), took over the music business in 1824, associating himself with Kalkbrenner for the pianoforte department. He had had a good musical education from his father and Dussek; he lived for some time in London, and published several pieces which evince considerable talent. He died leaving

Auguste WOLFF, his son-in-law, at the head of the firm.

His wife, Marie Felicité Denise Mooke or Mooke, known as (3) MADAME PLEYEL (*b.* Paris, July¹ 4, 1811; *d.* Saint Josseden Noode, near Brussels, Mar. 30, 1875), at an early age developed an extraordinary gift for playing. Herz, Moscheles and Kalkbrenner were successively her masters, and she learnt much from hearing Thalberg; but her own unwearied industry was the secret of her success. Her *tournées* in Russia, Germany, Austria, Belgium, France and England were so many triumphal progresses, in which her fame continually increased. Mendelssohn in Leipzig, and Liszt at Vienna, were equally fascinated by her performances; Liszt led her to the piano, turned over for her, and played with her a duet by Herz. Not less marked was the admiration of Auber and Fétis, the latter pronouncing her the most perfect player he had ever heard. Berlioz² was violently in love with her in 1830. In this country she made her first appearance at the Philharmonic, June 27, 1846, in Weber's Concertstück. To Brussels she always felt an attraction, and in 1848 took the post of teacher of the PF. in the Conservatoire there, which she retained till 1872. Her pupils were numerous, and worthy of her remarkable ability. C. F. P.; rev. M. L. P.

PLEYEL & CO. This distinguished Parisian firm of pianoforte-makers is now styled 'Pleyel, Wolff et Cie.' Its founder was Ignaz Pleyel, the composer, who established it in 1807. The Pleyel firm is remarkable for having always been directed by musicians, such as Camille Pleyel, who became his father's partner in 1821, and Kalkbrenner, who joined them three years later. At starting, the pianoforte-maker, Henry PARE, lent valuable aid. The influence of Chopin, who made his début in Paris at Pleyel's rooms, in 1831, has remained a tradition in the facile touch and peculiar singing tone of their instruments. Camille Pleyel was succeeded in the control of the business by Auguste WOLFF (*q.v.*), who much improved the Pleyel grand pianos in the direction of power, having made them adequate to the modern requirements of the concert-room, without loss of those refined qualities to which we have referred. The firm has had since 1876 agencies in London. A. J. H.

Since Wolff's death (1887), the direction has passed to his son-in-law, Gustave Frantz Lyon (*b.* Paris, Nov. 19, 1857), formerly a pupil of the École Polytechnique. Amongst his inventions is the 'harpe éolienne,' adaptable to concert pianos; the 'pédale harmonique,' allowing a struck chord to vibrate at will; various devices for controlling the tone of the piano, etc. He has also made other instru-

PLICA (literally a Fold, or Plait), a character mentioned by Franco of Cologne, Joannes de Muris and other early writers. Franco describes four kinds: (1) the 'Plica longa ascendens,' formed by the addition, to a square note, of two ascending tails, of which that on the right hand is longer than that on the left; (2) the 'Plica longa descendens,' the tails of which are drawn downwards, that on the right being, as before, longer than that on the left; (3) the 'Plica brevis ascendens,' in which the longer of the ascending tails is placed on the left side; and (4) the 'Plica brevis descendens,' in which the same arrangement obtains with the two descending tails:

These notes had the ordinary values of longs and breves, but they were sung with some sort of falsetto grace at the end, the art of which has long been lost. The grace occupied one-third of the length of the note when perfect, or one-half when imperfect. Franco tells us that besides longs and breves, semibreves could be plicated when in ligature, but not when standing alone: he defines 'plica' as 'the division of the same sound into grave and acute' (Cousse-maker's *Scriptores*, i. 123). Pseudo-Aristotle says that the interval taken at the end may be either a semitone, tone, minor or major third, or perfect fourth or fifth: he adds that plication is effected 'per compositionem epiglotticum repercussione gutturis subtiliter inclusa,' whatever that may mean (Cousse-maker, i. 273, ii. 406). Marchettus of Padua tells us that 'to plicate a note is to extend the sound upwards or downwards in a feigned voice, different from that naturally produced,' the interval taken depending on the position of the next note (Gerbert, *Scriptores*, iii. 181). J. F. R. S.

PLUNKETT, CATHERINE (b. Dublin, 1725), almost invariably known as 'Miss Plunkett,' one of the first female violinists of whom there is any record. She was sent as an 'apprentice' to Dubourg, then Master of the State Music in Ireland, in 1740, made her début as a 'prodigy' violinist at Crow Street Music Hall on Feb. 27, 1740, and on Dec. 6, 1742, gave a benefit concert in Fishamble Street Music Hall. Having studied sedulously under Dubourg for another year, she determined to try her fortune before a London audience. Accordingly, on Jan. 27, 1743/4, Miss Plunkett, announced as 'a scholar of Mr. Dubourg's lately arrived from Dublin,' gave a concert at the Haymarket Theatre. Apparently this must have been successful, as the young lady again appeared at

the same theatre on Feb. 27 following. After the year 1744 no trace of Miss Plunkett is found.

W. H. G. F.

PNEUMA, from the Greek πνεῦμα, 'a breathing'; also written Neuma and Neupma. A melody sung to a vowel sound at the close of a word or sentence. Such decorations, known also as 'Jubili,' have been utilised in church music from very early times. St. Augustine and St. Jerome both speak of the way in which music of this sort, unhampered by words, can be used as an expression of devotional feeling which could not be put into words. While the Pneuma was used to decorate many musical phrases, its chief elaboration was in connexion with the 'Alleluia' at Mass. Here it is an invariable feature, and the final *a* of the word 'Alleluia' was always used as a vowel with which to associate an elaborate piece of vocal melody. The following 'Alleluia' of Easter Sunday will serve as an example:

A verse follows, 'Pascha nostrum immolatus est Christus'; on the second word there is a long cadence, and others follow on the last two syllables of 'immolatus'; the melody of the 'Alleluia' is then repeated on the word 'Christus.'

A further illustration of the same tendency to ornament melodies with vocal additions led to the evolution of the Tropes and Sequences (*q.v.*).

The ordinary pneumas of the psalm-tones are those given at the end of the eight characteristic melodies. (See *MODS*.) W. H. F.

PNEUMATIC ACTION, see ORGAN, Vol. III. p. 759.

POCHETTE (Fr.; Ital. *sordino*), small boat-shaped and diminutive normal-shaped violins, which came into vogue in France about the time of Louis XIII. (See VIOLINO PICCOLO.)

It is difficult to decide accurately the original form of these little instruments, as both types come under the equivocal title of 'Pochette'; but judging from Kircher's illustration of a boat-shaped pochette in his 'Musurgia universalis' (1650), which he calls a *Linterculus* (the name is derived from *linter*, a small boat, wherry or trough), it would appear that the *linter* or boat-shaped form was the earlier. The Padre Bonanni (*Descrizione degli instrumenti armonici*, 1770) also refers to the Latin name, saying: 'This young man is learning to play a little instrument' (an illustration of a boat-shaped instrument is given) 'which the Latins named *Linterculus*,' and mentions that in Italy it is called *Sordino* and is used for dancing.

Mersenne (*De instrumentis harmonicis*, 1637) gives three different sizes, all boat-shaped, and says they were called *pera* or *poche*, and were carried in the pockets of the professors of dancing; and de Furetière's *Dictionary* (1690) defines the word 'Poche': 'petit violon que les maîtres à danser mettent dans leur poche quand ils vont monter en ville.' In a word, the small tone of the boat-shaped *Linterculus* earned for itself the name of *Sordino* in Italy, and—owing to its convenient dimensions—'Pochette' in France, and 'Taschengeige' in Germany; and the miniature violin known as *Kit* (*q.v.*) in England was a later development, which crept in and assumed the title of its predecessors.

The boat-shaped 'Pochette' or 'Sordino' (see *PLATE LXXXVII.* No. 5) measures from fifteen to twenty inches in length; there is generally a heart-shaped sound-hole, as well as two *f* holes, and the neck forms part of the instrument—a detail which points to the pochette as a survival of the 'Rebec' of Arabian origin. They are often beautifully embellished, either with inlaying of ivory, tortoise-shell, carving or other ornamentation, and their accompanying cases are usually lined with satin or velvet, and bear conventional designs, mostly of fleurs-de-llys, on the exterior. The bows, which measure from fifteen to seventeen inches in length, are made sometimes entirely of ivory, or partially inlaid to match the accompanying 'Pochette.' The diversity and fancy which was lavished by their makers upon these little instruments has made it almost impossible to determine (as may be done in judging violins) the maker or school to which they belong. The varnish on the boat-shaped pochettes gives place to excessive ornamentation, whereas some of the violin-shaped pochettes have beautiful varnish. At the South Kensington Loan Exhibition in 1874, a sordino by *Matthias Albanus* (1680) was exhibited, and at the Samary Sale two exquisite little pochettes—one by *Matthias Hofmans tot Antwerpen* and the other by *Antonius Medard, Nancy*, were sold. A beautiful pochette of the violin type, made by *Stradivarius* in 1717, was brought to France by *Tarasio* on one of his first visits. He sold it to *Sylvestre*, and it eventually became the property of *Clapißon*, who was so enchanted with it that he included it in the orchestral score of his opera 'Les Trois Nicolaas.' Another exquisite little pochette (violin-shaped), also the property of *Clapißon*, contained a fan, which opened at will between the belly and the back. Jubinal possessed a pochette which fitted into a walking-stick. At the Donaldson Museum there is a violin-shaped pochette, with very fine varnish, which is thought to be the work of *Nicola Amati*; and another, which is exquisitely inlaid with squares of ebony and ivory, has six gut strings and six sympathetic wire strings (17th century,

French). The players of the pochette were mostly dancing-masters. They held the instrument against their left breast and marked the rhythms of the dance, at the same time performing the steps for the instruction of their pupils. *Hawkins* (*History of Music*) mentions a dancing-master of London named *Francis Pemberton* who 'was so excellent a master of the "Kit," that he was able to play solos on it, exhibiting in his performance all the graces and elegances of the violin'; and the Abbé de *Marolles* (*Mémoires*, 1745 edition) quotes *Constantin* and *Bocan* as 'Fameux joueurs de poche.' The utility of the pochettes has ceased since the accession of the piano, and their occupation being gone, the collector alone cherishes them as handsome curiosities. The South Kensington Museum and the Donaldson Museum in London contain some beautiful specimens, as also do the Musée du Louvre, the Musée Cluny, the Musée du Conservatoire, and that of the Opéra at Paris.

E. H.-A.

POCHON, ALFRED (*b.* Lausanne, 1878), second violinist in the FLONZALEY QUARTET (*q.v.*), studied at Liège with César Thomson, of whose quartet he became a member, and was also first violin in the Ysaÿe orchestra at Brussels. He started co-operation with the late M. de Coppet in the Flonzaley Quartet in 1902.

W. G. C.

POCKRICH, RICHARD (*b.* Derryusk, Co. Monaghan, Ireland, c. 1690; *d.* London, 1759), the son of an Irish gentleman of good fortune, settled in Dublin in 1715, having opened a brewery and distillery at Island Bridge. He was an excellent musical amateur, and when his distillery failed he applied in 1742, but unsuccessfully, for the post of master of the chorists of Armagh Cathedral. In 1741 he invented, or rather re-invented, the HARMONICA, and gave concerts exhibiting its powers in Dublin, during the years 1743 and 1744. These concerts were so successful that Pockrich made a tour of England, where the Harmonica was much appreciated. From 1750-56 he had many successful concert tours, but finally met with a tragic death, being burned in a fire at Hamlin's Coffee House, Sweetings Alley, near the Royal Exchange, London. W. H. G. F.

POCO, a little; rather; as poco adagio, not quite so slow as adagio itself; poco sostenuto, somewhat sustained. It is the opposite of Assai. POCCHETTINO is a diminutive of poco, and implies the same thing but in a smaller degree, as does also the superlative POCCHISSIMO. G.

POELCHAU, GEORG (b. Cremon, Livonia, July 5, 1773; d. Berlin, Aug. 12, 1836), a distinguished amateur, left Russia during the reign of the Emperor Paul, and settled in Hamburg, where he formed an intimacy with Klopstock. On the death of Emanuel Bach he bought the whole of his music, which contained many autographs of his father. On another occasion he bought the residue of the library of the Hamburg opera, with a set of Reinhard Keiser's works. In 1813 he settled in Berlin, in 1814 became a member of the Singakademie, and assumed the charge of its library in 1833. At the request of the Crown Prince he searched the royal libraries for the compositions of Frederick the Great, and found 120 pieces. His collection of music was bought at his death by the Royal (now State) Library and the Singakademie. In 1855 the Singakademie sold their collection of the autographs of the Bach family to the Royal (now State) Library, which now has a larger number of these treasures than any other institution. There is a bust of Poelchau in one of the rooms. F. G.

POGLIETTI, ALESSANDRO (d. 1683), was organist to the Imperial court chapel at Vienna in 1661-83. Of his origin and earlier career nothing has as yet come to light. Walther, in his *Lexicon*, describes him as having been German by birth, but this is highly improbable. He would appear to have been held in high esteem at the Imperial court, since below his portrait and on the title-pages of some of his MS. works there is appended to his name the honorary distinction of Comes Palatinus. He was killed during the siege of Vienna by the Turks in 1683. On the return of the court to Vienna in 1684 his widow was allowed a pension of 18 gulden monthly, until her remarriage.

The works of Poglietti, which are mostly for clavier and organ, circulated chiefly in MS. copies, and none ever appeared in print during his lifetime. His most widely known work, of which a large number of MS. copies exist, is a collection of twelve *ricercari* for the organ on the church tones, which are comparatively simple and severe in style. Ritter has printed one of them in his *Geschichte des Orgelspiels*, Ex. 25. His most important work for the clavier is a very extended suite entitled 'Rosignolo,' the original autograph MS. of which, magnificently bound, bears a dedication to the Empress Eleonora Magdalena Theresia, the third wife of the Emperor Leopold I. This suite, along with two others, has been printed in *D.T.O.*, Jahrg. XIII. ii.; and the editor (Dr. Hugo Botstiber) takes occasion to correct some mistakes of Max Seiffert in his *Geschichte der Claviermusik* with regard to it. The suite consists of a toccata, canzona, allemande with two doubles, courante, sarabande, gigue with one double each, and following these comes an 'Aria allemanda con alcune variazioni sopra

l'età della Maestà Vostra,' concluding with a *ricercar*, capriccio and 'Aria bizzarra del rosignolo.' To the aria there are thus altogether twenty-three variations; and Seiffert, understanding its title to refer to the age of the Emperor himself, inferred that the work was written in 1663, when the Emperor was 23 years old. But the chronograms on the title-page of the work prove it to have been written in the year 1677, and since it is dedicated to the Empress, the reference is to her age and not that of the Emperor. The variations are remarkable in other ways. Most of them have special superscriptions, with imitations of various national instruments, meant probably to imply the homage of various nationalities to the Emperor and Empress. So, for instance, the eighth variation is superscribed 'Böhmisch-Dudelsack,' the ninth 'Holländisch-Flageolet,' the fourteenth 'Französische Baiselemens' (Baiser les mains), the eighteenth 'Ungarische Geigen,' etc. The last two movements consist of an imitation of the song of the nightingale, which gives a title to the whole work. Seiffert thinks the opening of Poglietti's 'Capriccio per lo rosignolo' must have remained in Handel's memory when he wrote the first movement of his Concerto Grosso, No. 11. The other two suites, now first published, are also extraordinary specimens of early programme music. One is entitled 'Sopra la ribellione di Ungheria,' and the reference is to the rebellion of 1671, when the endeavour was made to separate Hungary from the rule of the House of Hapsburg. This suite opens with a toccatina superscribed 'Galop'; the allemande has the title 'La Prisonnie'; the courante, 'Le Procès'; the sarabande, 'La Sentence'; the gigue, 'La Lige,' followed by 'La Décapitation' and 'Les Cloches,' 'Requiem Aeternam.' The third suite consists of a canzon and 'Capriccio über das Henner und Hannergerchrey,' which may have been in Bach's mind when he wrote his fugue with the 'Thema all' imitatio Gallina cucua.' The only work of Poglietti which was previously published was a Suite for clavier in F, which appeared in the publication of Roger of Amsterdam, entitled 'Toccatos et suites pour le clavecin de Messieurs Pasquini, Poglietti et Gaspard Kerle,' 1704. This collection was republished by Walsh in London under the title 'A second collection of toccates voluntarys and fugues made on purpose for the Organ and Harpsichord composed by Pasquini, Poglietti and others, etc.' Another work for clavier, which bears Poglietti's name in several MSS. abroad, is now proved to be the work of Dr. Juhn Bull. It is a fugue upon the hexachord, which appears in the 'Fitzwilliam Virginal' Book.' Poglietti may simply have copied it from some source for his own use. Other works of Poglietti remaining in MS. are a few for various combinations of

instruments, and some sacred works for voices with instrumental accompaniment. Botstiber also claims for Poglietti the authorship of a theoretical work which Sandberger had previously ascribed to Johann Kaspar Kerl. It is entitled 'Regulæ compositionis,' and while two MS. copies ascribe it to Kerl, two others and one very important copy made by the Hamburg organist, Johann Adam Reinken, expressly attest it as Poglietti's.

J. R. M.

POHL, CARL FERDINAND (b. Darmstadt, Sept. 6, 1819; d. Vienna, Apr. 28, 1887), writer on musical subjects. He came of a musical family, his grandfather having been the first maker of glass harmonicas, his father (d. 1869) chamber musician to the Duke of Hesse at Darmstadt, and his mother a daughter of the composer Beczwarzowsky. In 1841 he settled in Vienna, and after studying under Sechter became in 1849 organist of the new Protestant church in the Gumpendorf suburb. At this date he published Variations on an old 'Nachtwachtlied' (Diabelli), and other pieces. He resigned the post in 1855 on account of his health, and devoted himself exclusively to teaching and literature. In 1862 he published in Vienna an interesting pamphlet, *On the History of the Glass Harmonica*. From 1863–1866 he lived in London, occupied in researches at the British Museum on Haydn and Mozart, the results of which he embodied in his *Mozart und Haydn in London*, two vols. (Vienna, Gerold, 1867), a work full of accurate detail, and indispensable to the student. Through the influence of Jahn and von Köchel, and of his intimate friend the Ritter von Karajan, Pohl was appointed in Jan. 1866 to the important post of archivist and librarian to the Gesellschaft der Musikfreunde in Vienna. His care and conscientiousness brought the immense collections of this great institution into a highly satisfactory condition. In connexion therewith he published two works, which, though of moderate extent, are full of interest, and are marked by that accuracy and sound judgment which distinguish all his works, namely, *Die Gesellschaft der Musikfreunde und ihr Conservatorium in Wien* (Braunmüller, 1871), and *Denkschrift aus Anlass des 100jährigen Bestehens der Tonkünstler Societät in Wien* (Gerold, 1871). He was for many years occupied on a biography of Haydn, which he undertook at the instigation of Jahn, and of which vol. i. was published in 1875 (Berlin, Sacco; since transferred to Breitkopf & Härtel) and vol. ii. in 1882. Pohl left materials at his death in the hands of MANDYCZEWSKY (q.v.). The main facts are contained in his article on Haydn in this Dictionary, to the first edition of which he was an extensive contributor. The summaries of the musical events

of each year which Pohl furnished to the *Signale für die musikalische Welt*, of which he was the Vienna correspondent, were most careful and correct, and it would be a boon to the student of contemporary music if they could be republished separately. Pohl's courtesy to students desiring to collate MSS., and his readiness to supply information, were well known to the musical visitors to Vienna.

F. G.

POHL, DR. RICHARD (b. Leipzig, Sept. 12, 1826; d. Baden-Baden, Dec. 17, 1896), a German musical critic, well known for his thoroughgoing advocacy of Wagner. He devoted himself to mathematics, and after concluding his course at Göttingen and Leipzig was elected to a professorial chair at Gratz. This he vacated for political reasons, and then settled at Dresden (1852), and Weimar (1854) as a musical critic. In 1864 he moved to Baden-Baden, where he died. He was one of the editors of the *Neue Zeitschrift für Musik*, in which he strongly championed the cause of Wagner's and other advanced music, and a frequent contributor to the musical periodicals. He began his Autobiography in the *Mus. Wochenblatt* for Dec. 30, 1880. His other works include: *Akustische Briefe* (1853), *Bayreuther Erinnerungen* (1877), *Richard Wagner* (1883), *Franz Liszt* (1883) and *Hector Berlioz* (1884), *Die Hohenzüge der musikalischen Entwicklung* (1888). He also wrote poetry, translated the works of Berlioz into German, made a connecting text for Schumann's 'Manfred' and Liszt's 'Prometheus,' and composed some music of a slight but agreeable kind.

G.

POHLENZ, CHRISTIAN AUGUST (b. Saalgast, Lower Lusatia, July 3, 1790; d. Leipzig, Mar. 10, 1843). In 1829 we find him well established in Leipzig as a singing-master, a conductor of concerts, organist of the Thomaskirche, director of the Singakademie and the Musikverein, etc. At the end of 1834 he resigned the post of conductor of the Gewandhaus subscription concerts, which he had held since 1827, and in which he was succeeded by Mendelssohn in the following October. After the death of Weinlig, Mar. 6, 1842, and before the appointment of Hauptmann later in the same year, Pohlenz filled the office of cantor at the St. Thomas's School. Mendelssohn chose him as teacher of singing in the new Leipzig Conservatorium, in the prospectus of which his name appears, in the *A.M.Z.* of Jan. 18, 1843. He died of apoplexy at Leipzig just three weeks before the operations were begun. He published *Polonaises* for the PF., but his best works are part-songs for equal voices, of which one or two good specimens are given in 'Orpheus.'

G.

POILLOT, ÉMILE (b. Dijon, Mar. 10, 1886), piano virtuoso and organist, a pupil at the Paris Conservatoire under Philipp, Guilmant

and Gigout. He won the first prize for piano in 1907, and for the organ in 1911. He has been organist of Dijon Cathedral since 1911 and professor at the Conservatoire there since 1919. He has composed some pianoforte pieces and motets which are sound and skilful in style.

F. R².

POINT (Lat. *punctus*, vel *punctum*; Fr. *point*; Ger. *Punkt*; Ital. *punto*): (1) See NOTATION.

(2) A term applied to the passages of imitation in vocal music of the madrigalian era to the opening notes of the subject of a fugue or other important theme.

POINT D'ORGUE (Fr.), (1) an organ point or PEDAL (*q.v.*).

(2) The cadenza in a concerto—the flourish interpolated between the chords of the 6-4 and 7-3 of the cadence—the place for which is indicated by a pause ~. Rousseau gives a clue to the origin of the term by explaining (under 'Couronne') that when the above sign, which he denominates 'Couronne,' was placed over the last note of a single part in the score it was then called Point d'orgue, and signified that the sound of the note was to be held on till the other parts had come to the end. Thus the note so held on became a pedal, and is so in theory.

G.

POISE, JEAN ALEXANDRE FERDINAND (b. Nîmes, June 3, 1828; d. Paris, May 13, 1892), opera composer. He entered the Paris Conservatoire in 1850, and in 1852 gained the second prize for composition, under Adolphe Adam, from whom he derived his taste for easy, flowing melody. 'Bonsoir Voisin,' a pleasing little opera produced at the Théâtre Lyrique, Sept. 18, 1853, was followed at the same theatre by 'Les Charmeurs' (Mar. 15, 1855), also a success. He next produced 'Polichinelle' (1856) at the Bouffes Parisiens; and at the Opéra-Comique, 'Le Roi Don Pèdre,' two acts (1857); 'Le Jardinier galant,' two acts (Mar. 4, 1861); 'Les Absents,' a charming piece in one act (Oct. 26, 1864); 'Corricolo,' three acts (Nov. 28, 1868); 'Les Trois Souhais' (1873); 'La Surprise de l'Amour,' two acts (Oct. 31, 1878); and 'L'Amour médecin' (Dec. 20, 1880). The last two, arranged by Poise and Monselet from Marivaux and Molière, give a high idea of his powers. He also composed another pretty little opera, 'Les Deux Billets' (1858), revived at the Athénée in Feb. 1870. Among his later works are 'Joli Gilles' (1884), 'Le Médecin malgré lui' (1887), 'Carmosine' and an oratorio, 'Cécilie' (Dijon, 1888). In their ease and absence of pretension his works resemble those of Adolphe Adam, but there the comparison ends; the latter had a real vein of comedy, while Poise's merriment has the air of being assumed to conceal his inward melancholy. Nevertheless, his music is flowing and happy; and being well scored and never

vulgar, it is listened to with pleasure, and is remembered.

G. C.

POLACCA (Italian for POLONAISE). Polaccas may be defined as Polonaises treated in an Italian manner, but still retaining much of the rhythm characteristic of their Polish origin. Polaccas are both vocal and instrumental, and are generally of a brilliant and ornate description, gaining in brilliancy what they lose in national character. Thus Chopin, in a letter from Warsaw, dated Nov. 14, 1829 (Karasowski, vol. i.), speaks of an 'Alla Polacca' with violoncello accompaniment that he had written, as 'nothing more than a brilliant drawing-room piece—suitable for the ladies,' and although this composition is probably the same as the 'Introduction et Polonaise brillante pour piano et violoncelle' (op. 3) in C major, yet from the above passage it seems as if Chopin did not put it in the same class as his poetical compositions for the pianoforte which bear the same name.

W. B. S.

POLACCO, GIORGIO (b. Venice, Apr. 12, 1875), operatic conductor. The busy career of this excellent *chef-d'orchestre* began when he was in his early 'twenties,' and has embraced no fewer than three continents and some ten capitals. Educated partly in St. Petersburg, partly in Milan, his first experiences with the bâton were gained in Milan, Genoa and Rome: later, at Brussels, Lisbon, Warsaw and St. Petersburg, where his Wagner productions earned especial eulogy. For seven seasons he was engaged at Rio de Janeiro, and for four at Buenos Ayres; then at Mexico in 1906, the year in which he made his début in the U.S.A. at San Francisco. In 1911 he directed the first English production of Puccini's 'Girl of the Golden West,' with H. W. Savage's company, and in the following year was engaged for the Metropolitan Opera House, New York, where (replacing Toscanini when his health gave way) he began with 'Manon Lescaut' on Nov. 11, and remained as principal Italian conductor until 1917. Subsequently he held a similar post at Chicago. Meanwhile, he had been winning popularity at Covent Garden, where he made his début—Destinn singing Tosca—on May 21, 1913. On July 15, 1914, he directed the 300th performance of 'Don Giovanni' at Covent Garden.

BIBL.—*International Who's Who in Music*; NORTHOTT: *Covent Garden and the Royal Opera*.

H. K.

POLAROLI (POLLAROLO), (1) CARLO FRANCESCO (b. Brescia, c. 1653; d. end of 1722), was a pupil of Legrenzi and became a chorister at St. Mark's, Venice, in 1665. In 1690 he became second organist, and in 1692 vice-maestro di cappella in the same church. The statement that he rose to be first maestro lacks authority, but, according to Busi's Life of Marcello, he was maestro at the music school of the Incurabili at Venice about 1706. Three oratorios. 'Jefte,' 'Le Rosinda' and

'Jesabel,' are in MS. at Vienna and Brussels, and many pieces of church music are mentioned in *Q.-L.* Of his numerous operas (Fétis gives the names of sixty-eight) the following are extant:

'Roderico' (Milan, 1684, performed also at Verona, Naples, Brescia and Rome); 'La forza della virtù' (Venice, 1693); 'Gismon' (Venice, 1693-94); 'Farinondo' (1699); 'Semiramide' (Venice, 1714, nine songs only preserved); 'Maria deluso' (1714); 'Artodante' (Venice, 1710); and three without dates, 'Le pazzie degli amanti', 'Gli inganni felici' and 'Genuinda' (one act, the other two being provided by G. del Violone and Alessandro Sciaratti).

An organ sonata is in vol. iii. of Torchi's 'L'arte musicale in Italia.' (*Q.-L.*, etc.) M.

(2) ANTONIO, son of Carlo Francesco (b. Venice, c. 1680; d. there, May 4, 1746), was the pupil of his father. In 1723 he became vice-maestro di cappella at St. Mark's, and in 1740 maestro. As early as 1702 he had assisted his father in the duties of the office. His opera 'Aristote' was performed at Venice in 1700, 'Leucippo e Teonoc' in 1719, 'Cosroë' in 1723 and 'I tre voti,' a serenata, at Vienna in 1724. (See *Q.-L.*) M.

POLE, WILLIAM, MUS.D., F.R.S. (b. Birmingham, Apr. 22, 1814; d. London, Dec. 30, 1900), an instance of the successful union of science, literature and music. He was bred to the profession of civil engineering, in which he became eminent. He wrote many works and papers on scientific subjects, and was a contributor to the leading reviews, and F.R.S. of London and Edinburgh. He was Professor of Civil Engineering at University College, London, 1859-78. His researches into the question of musical pitch, on which he wrote in this Dictionary (see *PITCH*), were a valuable contribution to a much-debated subject.

His taste for music developed itself early; he studied hard at both theoretical and practical music, and was organist in St. Mark's Church, North Audley Street, London, in 1836-66. He graduated at Oxford as Mus.B. in 1860, and as Mus.D. in 1867. He was appointed Reporter to the Jury on Musical Instruments at the International Exhibition of 1862, and was one of the examiners for Musical Degrees in the University of London (1878-90), author of a Treatise on the Musical Instruments in the Exhibition of 1851, *The Story of Mozart's Requiem* (1879), *The Philosophy of Music* (1879, reprinted 1895) and various minor critical essays. His only printed musical compositions are a setting of Psalm c. given at Tenbury in 1861, an eight-part motet from which was performed at the Chester Festival of 1882, and some four-handed PF. accompaniments to classical songs. (See *Brit. Mus. Biog.*; *Mus. T.* for Feb. 1901, p. 103, etc.) G., with addns.

POLIPHANT (POLYPHON), a wire-string instrument invented or evolved from the many forms current about the year 1600, by Daniel Farrant, son of the organist of St. George's

Chapel, Windsor, and afterwards one of the court musicians to James I. and Charles I. Playford (*Introduction to the Skill of Musick*) says it was an excellent instrument not much unlike a lute, and according to an illustration given by Randle Holme (Academy of Armory, 17th century) it had from 25 to 40 strings and resembled more nearly the later HARP-LUTE (*q.v.*). Queen Elizabeth was particularly partial to the Poliphant and was a proficient performer upon it. Farrant also produced another wire-string instrument of the cittern or pandore class called the 'Stump,' of which, however, no description exists. F. W. G.

POLIUTO, see POLYEUTE.

POLKA, a well-known round dance, said to be of Bohemian origin. According to Alfred Waldau (*Böhmische Nationaltänze*, Prague, 1859 and 1860) the polka was invented in the year 1830 by a servant girl who lived at Elbeteinitz, the music being written down by a local musician named Neruda. The original name by which the polka was known in its birthplace and in the neighbourhood of Jičín, Kopidlno and Dimokury was the 'Nimra.' This was derived from the song to which it was danced, the first lines of which ran as follows:

'Strejček Nimra
Koupil šimla
Za půl páta tolaru.'¹

In 1835 it was danced in Prague, where it first obtained the name of 'Polka,' which is probably a corruption of the Czech 'pulka' (half), a characteristic feature of the dance being its short half-steps.

According to another account the polka was invented in 1834 by a native of Moksic, near Hitschin in Bohemia, and was from that place introduced into Prague by students. In 1839 it was brought to Vienna by the band of a Bohemian regiment under its conductor, Pergler; in 1840 it was danced at the Odéon in Paris by the Bohemian Raab; and in 1844 it found its way to London. Wherever the polka was introduced, it suddenly attained an extraordinary popularity. Vienna, Paris and London were successively attacked by this curious 'polkamania'; clothes, hats and streets were named after the dance, and in England the absurdity was carried so far that public-houses displayed on their signs the 'Polka Arms.' In the *Illustrated London News* for Mar. 23, 1844, will be found a polka by Offenbach, 'a celebrated French artiste,' headed by two rather primitive woodcuts, to which the following description of the dance is appended:

'The Polka is an original Bohemian peasant dance, and was first introduced into the fashionable saloons of Berlin and St. Petersburg about eight years since.' Last season it was the favourite at Baden-Baden.

¹ Translation: 'Uncle Nimra bought a white horse for five and a half thalers.'

² If this is true, the dates of Waldau's account of the origin of the dance can hardly be correct.

The Polka is written in 2-4 time. The gentleman holds his partner in the manner shown in the engraving; each lift first the right leg, strike twice the left heel with the right heel, and then turn as in the waltz—

a performance which must have presented a rather curious appearance. On Apr. 13 the same paper, reviewing a polka by Jullien, says:

'It is waste of time to consider this nonsense. The wendrock heads of the Parisians have been delighted always by any innovation, but they never imported anything more ridiculous or ungraceful than this Polka. It is a hybrid confusion of Scotch Lilt, Irish Jig and Bohemian Waltz, and needs only to be seen once to be avoided for ever!'

In spite of this criticism the popularity of the dance went on increasing, and the papers of the day are full of advertisements professing to teach 'the genuine polka.' It was danced at Her Majesty's Opera by Cerito, Carlotta Griali and Perrot, and the following was published as

'the much celebrated Polka Dance, performed at Her Majesty's Theatre, by Carlotta Griali and Perrot, composed and arranged for the pianoforte by Alberto Sowinsky.'

Many ways of dancing the polka seem to have been in use, and in order to settle all disputes on the important matter, the *Illustrated London News*, on May 11 (having changed its opinions since April), was

'much gratified in being enabled to lay before its readers an accurate description of the *véritable*, or Drawing-room Polka, as danced at Almack's, and at the balls of the nobility and gentry in this country.'

According to this description, which is accompanied by three very amusing illustrations, the polka began with an introduction (danced *vis-à-vis*), and consisted of five figures. Of these, the 'heel and toe' step, which was the most characteristic feature of the dance, has been quite abandoned, probably owing to the difficulty in executing it properly, which (according to *Punch*, vol. vii. p. 172¹) generally caused it to result in the dancers 'stamping their own heels upon other people's toes.' The account of the polka concludes as follows:

'In conclusion we would observe that La Polka is a noiseless dance; there is no stamping of heels, toes or kicking of legs in sharp angles forward. This may do very well at the threshold of a Bohemian *auberge*, but is inadmissible into the *salons* of London or Paris. La Polka, as danced in Paris, and now adopted by us, is elegant, graceful and fascinating in the extreme; it is replete with opportunities of showing care and attention to your partner in assisting her through its performance.'

The music of the polka is written in 2-4 time; according to Cellarius (*La Danse des*

¹ See also *Punch*, vol. vi., for an admirable cartoon by Leech, representing Lord Brougham dancing the polka with the woolsack.

salons, Paris, 1847) the tempo is that of a military march played rather slowly; Maelzel's metronome, $\text{♩} = 104$. The rhythm is characterised by the following 2-bar figures:

The music can be divided into the usual 8-bar parts. In all early polkas the figure

is found in the accompaniment of the 4th and 8th bars of these parts, marking a very slight pause in the dance, but in later examples this pause has disappeared, owing to the dances being performed somewhat faster, and more in the spirit of a waltz or galop. The first polka which was published is said to have been composed by Franz Hilmar, a native of Kopidlno in Bohemia. The best national polkas are those by Labitzky, Liebmann, Prochaska, Swoboda and Titl. W. B. S.

POLLAROLO, see POLAROLI.

POLLEDRO, GIOVANNI BATTISTA (b. Piovà, near Turin, June 10, 1781²; d. there, Aug. 15, 1853), an eminent violinist. At 15 he studied for a short time under Pugnani, and soon entered the royal band at Turin. In 1804 he became first violin in the theatre at Bergamo, and after a short stay there began to travel. In Russia he remained for five years, and in 1814 accepted the appointment of leader of the band at Dresden, where he remained till 1824. In that year he accepted a brilliant engagement as director-general of the royal orchestra at Turin.

Polledro was an excellent violinist and sound musician. He had the great tone and dignified style of the classical Italian school. All contemporaneous critics praise his faultless and brilliant execution not less than the deep feeling with which he played. In 1812 he met Beethoven at Carlsbad, and played with him one of Beethoven's violin sonatas (see Thayer's *Life of Beethoven*, iii. 208). His published compositions consist of two concertos, some airs variés, trios and duos for stringed instruments, and a set of exercises for the violin; a *Miserere* and a Mass for voices and orchestra, and a *Sinfonia pastorale* for full orchestra.

P. D.

POLLINI, FRANCESCO GIUSEPPE (b. Lubiano, Illyria, 1763; d. Milan, Sept. 17, 1846),

² According to one authority, 1778.

was a pupil of Mozart. He became a skilful pianist at an early age, his style having combined some of the distinguishing characteristics of that of his preceptor, of Clementi and of Hummel, each of whom he surpassed in some forms of the mere mechanism of the art. In 1793 he studied with Zingarelli at Milan, where he was appointed professor of the piano on the opening of the Conservatorio in 1809. Pollini indeed may, in this respect, be considered as an inventor, having anticipated Thalberg in the extended grasp of the keyboard by the use of three staves (as in Thalberg's *Fantasia on 'God save the Queen' and 'Rule Britannia'*)—thus enabling the player to sustain a prominent melody in the middle region of the instrument, while each hand is also employed with elaborate passages above and beneath it. This mode of producing by two hands almost the effect of four appears, indeed, to have been originated by Pollini in his '*Trentadue esercizi in forma di toccata*,' brought out in 1820. This work was dedicated to Meyerbeer; the original edition containing a preface addressed to that composer by Pollini, which includes the following passage explanatory of the construction of the toccata:

'I propose to offer a simple melody more or less plain, and of varied character, combined with accompaniments of different rhythms, from which it can be clearly distinguished by a particular expression and touch in the cantilena in contrast to the accompaniment.'

Dehn appears to have been the first to draw attention to Pollini's speciality, in his preface to the original edition of Liszt's pianoforte transcriptions of the six great organ preludes and fugues of Bach.

Pollini's productions consist chiefly of pianoforte music, including an elaborate instruction book, many solo pieces, and some for two performers. These works are included in the catalogue of Ricordi, of Milan. Pollini also produced some stage music and a *Stabat Mater*. He was highly esteemed—professionally and personally—by his contemporaries. Bellini dedicated his '*Sonnambula*,' a celebre Francesco Pollini.'

H. J. L.

POLLITZER, ADOLPHE (b. Buda-Pest, July 23, 1832; d. London, Nov. 14, 1900), violinist, the youngest of a family numbering nineteen.

He left his native town for Vienna at the age of 10, and there became a pupil of Böhm, at the same time receiving lessons in composition from Preyer. While still a boy he played before the Emperor of Austria, and at the age of 13 performed Mendelssohn's Violin Concerto in the presence of its composer, and was rewarded by his warm congratulations and a lifelong interest in his career. In 1846 Pollitzer gained the first prize for violin-playing at the Vienna Conservatorium, and after a short concert tour in Germany, betook himself

to Paris, where he received lessons from Alard. By the advice of Ernst he came to London in 1851. Here his talents gained him speedy recognition. He occupied the post of leader at the Opera, under the baton of Costa, for many years, and held similar positions at the head of the New Philharmonic Orchestra and the Royal Choral Society. In 1861 he was appointed violin professor at the London Academy of Music, and in 1890 succeeded Dr. Henry Wylde as principal of that institution. During the period of his activity as a teacher Pollitzer was responsible for the training of a vast number of professional and amateur violinists, and these, under the presidency of Sir Joseph Barnby, presented him with a signed testimonial and a handsome gold watch at the Hôtel Metropole on Feb. 18, 1888. His published compositions comprise '*Ten Caprices for the Violin*' and some short pieces for violin and piano. He revised and edited a prodigious amount of De Bériot's compositions, as well as those of Alard, Léonard, Singelee, Ernst, etc.

E. H.-A.

POLLY, a ballad opera, written by John Gay as a second part of his '*Beggar's Opera*.' When about to be rehearsed a message was received from the Lord Chamberlain that the piece 'was not allowed to be acted, but commanded to be suppressed,' the prohibition being supposed to have been instigated by Sir Robert Walpole, who had been satirised in the '*Beggar's Opera*.' Failing to obtain a reversal of the decree, Gay had recourse to the press, and in 1729 published the piece in 4to, with the tunes of the songs, and a numerous list of subscribers, by which he gained at least as much as he would have done by representation. Like most sequels, '*Polly*' is far inferior to the first part, and when in 1777 it was produced at the Haymarket Theatre, with alterations by the elder Colman, it was so unsuccessful that it was withdrawn after a few representations. It was revived at the same theatre, June 11, 1782, and again at Drury Lane (for Kelly's benefit), June 16, 1813.

W. H. H.

Following the success of the '*Beggar's Opera*' at Hammersmith, a revised version of '*Polly*'—the play rewritten by Clifford Bax; the music arranged by Frederic Austin (q.v.)—was produced at the Kingsway Theatre, London, Dec. 30, 1922.

C.

POLO, see SONG, subsection SPAIN (4).

POLO or OLE, a Spanish dance accompanied by singing, which took its origin in Andalusia. It is said to be identical with the Romalis, which is

'danced to an old religious Eastern tune, low and melancholy, diatonic, not chromatic, and full of sudden pauses, which are strange and startling.'

and is only danced by the Spanish gipsies.

1 Walter Thornbury, *Life in Spain*.

It resembles the Oriental dances in being full of wild energy and contortions of the body, while the feet merely glide or shuffle along the ground. The words ('coplas') of these dances are generally of a jocular character, and differ from those of the Seguidilla in wanting the 'estrevillo,' or refrain; several examples of them may be found in Preciso's *Coleccion de las Mejores Coplas de Seguidillas, Tiranas y Polos* (Madrid, 1816). They are sung in unison by a chorus, who mark the time by clapping their hands. Some characteristic examples of the music of the Polo will be found in J. Gansino's *La Joya de Andalucia* (Madrid, Romero).

W. B. S.

POLONAISE, a stately dance of Polish origin. According to Sowinski (*Les Musiciens polonaise*) the polonaise is derived from the ancient Christmas carols which are still sung in Poland. In support of this theory he quotes a carol, 'W zlobie lezy,' which contains the rhythm and close characteristic of the dance; but the fact that although in later times they were accompanied by singing, yet the earliest polonaises extant are purely instrumental, renders it more probable that the generally received opinion as to their courtly origin is correct.

According to this latter view, the polonaise originated under the following circumstances. In 1573 Henry III. of Anjou was elected to the Polish throne, and in the following year held a great reception at Cracow, at which the wives of the nobles marched in procession past the throne to the sound of stately music. It is said that after this, whenever a foreign prince was elected to the crown of Poland, the same ceremony was repeated, and that out of it the polonaise was gradually developed as the opening dance at court festivities. If this custom was introduced by Henry III., we may perhaps look upon the polonaise, which is so full of stateliness, as the survival of the dignified pavans and passamezzos which were so much in vogue at the French court in the 15th century. Evidence is not wanting to prove that the dance was not always of so marked a national character as it assumed in later times. Book vii. of Bésard's *Thesaurus harmonicus Divini Laurencini Romani* (Cologne, 1603) consists of 'Selectiores aliquot choreæ quas Allemande vocant, germanico saltui maxime accommodatæ, una cum Polonicis aliquot et aliis ab hoc saltationis genere haud absimilibus,' and these 'choreæ Polonicæ' (which are principally composed by one Diomedes, a naturalised Venetian at the court of Sigismund III.) exhibit very slightly the rhythm and peculiarities of Polish national music. During the 17th century, although it was no doubt during this time that it assumed the form that was afterwards destined to become so popular, the Polonaise left no mark upon musical

history, and it is not until the first half of the 18th century that examples of it begin to occur.¹

In Walther's *Lexicon* (1732) no mention is made of it, or of any Polish music; but in Mattheson's *Vollkommener Kapellmeister* (1739) we find it (as the author himself tells us) described for the first time. Mattheson notices the spondaic character of the rhythm, and remarks that the music of the polonaise should begin on the first beat of the bar: he gives two examples (one in 3-4, the other in common time) made by himself out of the chorale 'Ich ruf zu dir, Herr Jesu Christ.' At this time the polonaise seems suddenly to have attained immense popularity, probably owing to the intimate connexion between Saxony and Poland which was caused by the election (1733) of Augustus III. to the Polish throne. In 1742-1743 there was published at Leipzig a curious little collection of songs entitled 'Sperantes Singende Muse,' which contains many adaptations of Polish airs: in the following example (from the second part of the work) some of the peculiarities of the polonaise may be traced.

Deine Rösche Sind die Stricke, All-er-an-ge-nahmtes Kind, Die die Lie-be so bewingend nicht Irgend-wo sonst zugericht. Deiner Anmuth Scheint Nimmt mehr Her-sen ein, Als des Mo-gols Macht Volk an sich gebracht, Und der gröes-te Feld-herr und Sol-dat, Noch zur Zeit je-mals be-sungen hat

From this time the polonaise has always been a favourite form of composition with instrumental composers, and has not been without influence on vocal music, especially in Italian opera. (See POLACCA.) Bach wrote two polonaises (orchestral partita in B minor, and French suite, No. 6), besides a 'Polacca' (Brandenburg Concertos, No. 1, Dehn); and there are also examples by Handel (Grand Concerto, No. 3, in E minor), Beethoven (op. 89, triple concerto, and serenade trio, op. 8), Mozart ('Rondeau Polonaise,' sonata in D minor), Schubert (polonaises for four hands),

¹ In the State Library at Berlin there is preserved a MS. volume which bears the date 1728, and formerly belonged to Bach's second wife, Anna Magdalena (see B.-G. xliii. 2). In it are five Polonaises written in the owner's autograph; but it is improbable that they are all of Sebastian Bach's composition.

Weber (op. 21, and the 'Polacca brillante,' op. 72), Wagner (for four hands, op. 2), as well as by the Polish composers Kurpinski and Ogniski, and above all by Chopin, under whose hands it reached what is perhaps the highest development possible for mere dance forms.

Attracted by its striking rhythmical capabilities, and imbued with the deepest national sympathy, Chopin animated the dry form of the old polonaise with a new and intensely living spirit, altering it as (in a lesser degree) he altered the waltz and the mazurka, and changing it from a mere dance into a glowing tone-picture of Poland, her departed glory, her many wrongs, and her hoped-for regeneration. Karasowski (*Chopin*, vol. ii.) divides his polonaises into two classes. The first (which includes those in A major, op. 40, No. 1; F# minor, op. 44, and A♭ major, op. 53) is characterised by strong and martial rhythm, and may be taken to represent the feudal court of Poland in the days of its splendour. The second class (including the polonaises in C# minor and E♭ minor, op. 26; in C minor, op. 40, No. 2; in D minor, B♭ major and F minor, op. 71) is distinguished by dreamy melancholy, and forms a picture of Poland in her adversity. The 'Fantaisie Polonaise' (A♭ major, op. 61) is different in character from both classes, and is said to represent the national struggles ending with a song of triumph.

As a dance, the polonaise is of little interest: it consists of a procession in which both old and young take part, moving several times round the room in solemn order. It does not depend upon the execution of any particular steps, although it is said to have been formerly danced with different figures, something like the English country dances. It survived in Germany during the Empire, and was danced at the beginning of all court balls. In Mecklenburg a sort of degenerate polonaise is sometimes danced at the end of the evening; it is called 'Der Auskehr' ('The Turn-out'), and consists in a procession of the whole company through the house, each person being armed with some household utensil, and singing in chorus 'Un as de Grotvare de Grotmoder nahm.' (See GROSSVATER-TANZ.)

The tempo of the polonaise is that of a march, played between andante and allegro: it is nearly always written in 3-4 time,¹ and should always begin on the first beat of the bar. It generally consists of two parts, sometimes followed by a trio in a different key; the number of bars in each part is irregular. The chief peculiarity of the polonaise consists in the strong emphasis falling repeatedly on the half-beat of the bar, the first beat generally consisting of a quaver followed by a crotchet (see the polonaise given below). Another peculiarity is that the close takes place on the third beat,

¹ Matheson says it may be written in common time.

often preceded by a strong accent on the second beat. The last bar should properly consist of four semiquavers, the last of which should fall on the leading note, and be repeated before the concluding chord, thus:

The accompaniment generally consists of quavers and semiquavers in the following rhythm:

The following example, although not conforming entirely with the above rules, is nevertheless interesting as a genuine polonaise danced and sung at weddings in the district of Krzeszowice in Poland:

Po ja - lem so bio nieprzepla cona, Ka ta da s pło ha na

ślo tęg ro dę na. Da ci mi ty le da ty le wia na,

o ci pke ślo niy i wi pa kę sta na. Mo ji są śle dzi

o ci pke cie le pie, nie chas mi choć da za go nek z se py.¹

The notes printed in small type are variations of the tune which are performed in some districts.

W. B. S.

POLSKA, a national Swedish dance, popular in West Gothland, something like a Scotch reel in character. Polskas are usually written in minor keys, although they are occasionally found in the major. The example which is given below ('Neckens Polska') is well known,

¹ Translation: I have taken for my wife the reverend Parson's own sister. He gave me as her marriage portion a piece of bacon and a bundle of hay. My neighbour, what do you think? The fellow has refused to give me even a little plot of land sown with turnips.

as Ambroise Thomas has introduced it in Ophelia's mad scene in 'Hamlet.' Other examples will be found in Ahlström's 'Walds Svenska Folksånga' (Stockholm, 1850).

W. B. S.

POLYEUCTE (POLIUTO). (1) Opera in 3 acts; libretto, after Corneille, conceived by Adolphe Nourrit, and carried out by Cammarano; music by Donizetti. It was completed in 1838, but the performance was forbidden by the Censure of Naples; translated into French by Scribe, and as 'Les Martyrs,' produced Opéra (4 acts), Apr. 10, 1840; Théâtre Italien, as 'I martiri,' Apr. 14, 1859; in London, as 'I martiri,' Royal Italian Opera, Apr. 20, 1852.

(2) Opera in 5 acts; words by Barbier and Carré, music by Gounod. Produced Opéra, Paris, Oct. 7, 1878. G.

POLYPHONY. The harmonious combination of two or more melodies, i.e. composition considered horizontally as distinct from Homophony, which is vertical in the principle of its structure. Differing from COUNTERPOINT (*q.v.*) rather in the customary use of the term than in its meaning, the name of Polyphony is usually attached to the actual compositions, while that of Counterpoint is applied to the academic or scientific forms.

The history of musical composition up to the year 1500, owing to the overwhelming predominance of the vocal element, is very largely the history of polyphony. It is generally (though not universally) conceded that the only variant from strict monophony or unison singing which was known to the earlier civilisations consisted in a duplication at the octave, which went by the name of *magadising* among the Greeks. For our present purpose the ground of this first section may roughly be mapped out as under:

1. The age of Organum (900-1200).
2. The age of Rhythmic Forms (1200-1400).
3. The birth and development of free composition (1400-1500).

1. The origins of harmony are most obscure, and for that reason have provided fruitful ground for controversy. Scholarship seems to tend, however, more and more to agree that the ultimate source (unless there was more than one) lies outside the Latin civilisation of the early Middle Ages. Ireland, Wales, the Anglo-Saxons, the Danes have each their supporters; while the earliest Latin texts bifurcate between the Northern who occupied Northern France in the 10th century, and the group which seems to centre round the monastery of St. Gall in Switzerland. The chief early exception to the list of non-Latin sources is the Abbey of St. Martial at Limoges. The oldest specimen known to exist to-day is from Cornwall, and consists of a two-part setting of four lines from the six-lined hymn of St. Stephen in the Sarum

Breviary, *Sanctæ dei pretiose*: it is dated about the year 1000.

HARMONY (*q.v.*), considered as a science, has sprung from the mating of the mathematical mind with the musical, and not until the middle of the 15th century does the fledgling leave the nest and bid farewell to the care of the mathematicians. It is significant that music occupies the place immediately next before mathematics in the Quadrivium, or traditional course of higher studies at the universities, and one of the leading musical treatises (Odington, *De speculatione musices*) has its earlier half given over almost entirely to mathematical questions. De Muris and Dunstable also were mathematicians.

The earliest theoretical work of any detail is that of Hucbald (c. 880), who describes the practice of singing as it was current in his day, under the name of Organum; but John Scotus Erigena some 100 years earlier had spoken of the Celtic knowledge of vocal harmony. For fuller information about the various forms taken by the compositions of the earlier centuries, the reader is referred to the separate articles on CONDUCTUS, DESCANT, MOTET, ORGANUM: information will also be found under FAUXBOURDON, GYMEL, HOCKET, ORDINES, PES, and in the earlier part of MASS.

The examples of organum, apart from those in the theoretical treatises, are very scarce, for so simple a form needed no score apart from the plain-song *canto fermo*; moreover, the stave had not yet come into use in the 10th century. The harmony of the most extensive collection, the Organa of the Winchester Troper,¹ is practically indecipherable, both voices being provided with neumes *in campo aperto* (see NOTATION). But its historical importance is very great, as showing that the Winchester music before the Norman Conquest was already in advance of the system of parallel fifths and fourths, with occasional oblique motion, described by Hucbald; for though the actual position of the notes cannot be identified, contrary motion can be discerned.

A later specimen of this early harmony can be seen in the first number of *Revue grégorienne* (Desclée, Tournai, 1911), where a long passage from a Chartres MS. is printed; here the actual position of the notes is ascertainable. The music appears in the form of two plain-song melodies, harmonising with one another, fifths and thirds being the most frequent intervals. There is much discord, and no trace as yet of any strictly measured rhythm; both voices are singing plain-song in free time, carefully balanced one against another, a group of two notes in one voice being accompanied by a group of two in the other, and so one. The specimen is dated by Dr. Bannister at about 1100.

¹ For a full account see W. H. Frere, *The Winchester Troper* (Henry Bradshaw Society, 1894).

Meanwhile the theorists were getting busy, and by 1100 two stages of discovery had been reached which gave the necessary material and impetus for real progress in the art of polyphony. The first is the invention of the stave, ascribed to Guido d' Arezzo (c. 1050) but in reality a gradual development, which made it no longer necessary for music to depend upon oral tradition (neumes *in campo aperto* being only aids to memory), as compositions could now be written down with accuracy and transmitted by the circulation and copying of MSS. The second invention, more closely bound up with our immediate subject, was that of a notation to express mensurate time-values. These were of course known before, for dance music and march music are absolutely dependent upon a fixed recurring rhythm; but there was no notation in the modern sense; and the great advance associated with the name of FRANCO OF COLOGNE (c. 1100) was caused by the realisation that music sung in harmony between voices at different pitch and with varying melodic contour is but limited in scope where both (or all) voices are left free to follow plain-song rhythm. So the notation of plain-song was taken over and adapted slightly to express fixed time-values. The earlier ecclesiastical theorists had allowed only the intervals of fifth and fourth, but (probably under the influence of English example) the imperfect concords of third and sixth were now permitted. We already find an abundance of thirds in the Chartres MS. referred to above; here, as always, theory does not direct practice, but follows and codifies it.

2. We find the first considerable application of the new doctrines of fixed rhythm in the beginning of the 13th century, centred round a flourishing and prolific school of composers at Notre Dame in Paris. A large store of their compositions in two, three and four parts has fortunately come down to us, together with some of the composers' names, Léonin and Pérotin being the leaders. The forms used are Organum (of a newer style in which all but the tenor sang in measured time, the tenor holding long notes as pedals which moved at conventional points), Conductus and Motet.¹ The Notre Dame MSS. and the later collateral remains from Bamberg, Montpellier and Worcester bring us into a second chapter of polyphonic development, that of scientific rhythm. Like many other discoveries it was worked to extremes, and the mathematician tended to predominate over the artist. But the rhythmic relation of voices to one another, in place of the 'double plain-song' of the older Organum and unmeasured descant, was a genuine and important advance. Probably the advance would have been more rapid had it been recog-

nised that rhythmic *unity* between individual parts is not necessarily a lower stage of art than rhythmic *variety* between the voices. But the fashion was all for complexity in rhythm, and the simpler form of the Conductus seems to have been less popular than the more elaborate Motet.

The early period of Rhythmic Forms is notable for the great landmark of SUMER IS ICMEN IN (*q.v.*). The apex was reached by Guillaume de MACHAUT (*q.v.*), large quantities of whose work remain in the Bibliothèque Nationale at Paris, and elsewhere, awaiting publication. In Machaut we reach for the first time (with the exception of the Reading Rota) a stage of 'harmoniousness' according to modern ideas combined with an amazing grasp of technique and high artistic feeling. But the Independent Entry has not yet been discovered, and it is not until the middle of the 15th century that the art, under this new spur, begins to enter upon its Golden Age.

3. It is unsafe to make definite statements as to the age when this or that point of form first makes its appearance, and all we can say is that, so far as present knowledge goes, Independent Entry, of a formal, fugal kind, is not found before 1425. Suspensions, unprepared discords (as distinct from the arbitrary unresolved discords of the 13th century) and the like have to be dated back to an earlier period as some new MS. is discovered and scored. But, broadly speaking, we may say that all the devices of classical counterpoint have their origin in the later part of the 15th century, if not earlier.

The first half of the century is chiefly notable for some good Christmas carols, and for the Agincourt song, in which a duet is followed by a three-part chorus, probably the earliest example of this kind of treatment.

A certain mastery of independent part-writing is reached by the middle of the century, and a strong English school of composers headed by DUNSTABLE and Leonel POWER have left us some of their work in the Old Hall MS. (c. 1455). About this time Dunstable and others would seem to have migrated to the Continent, and to have thrown in their lot with their contemporaries and pupils of the 'First Flemish School' (DUFAY; BINCHOIS, etc.), for most of their work is found abroad, notably in some Cambrai choir-books, dated 1459-70, selections from which have been published as 'Sechs Trienter Codices' (Artaria, Vienna; the MSS. belong to Italy). In these works we find that three- and four-part writing is the normal form, though occasional five-part items are found, e.g. in Mayshuet's 'Arae post libamina' in the Old Hall MS.

It is with the 'Second Flemish School' of OKEGHEM (c. 1430-1513) and ORBEGOT (c. 1430-1500) that we find development in the number

¹ Many examples are given in *Conf. Hist. Mus.* vol. I.

of parts, and in looking for advance in the last quarter of the century we shall probably trace progress best by looking in this direction, though the line of Canon followed by most historians is by no means unimportant. Multiple writing was certainly the 'new thing,' and though not always the best work, it had a beneficial influence on the 3- and 4-part composition, giving a greater desire for complete chords and solid cadences, and improving the 'emptiness' conveyed by so much of Dunstable. We note, for instance, in the only existing English collection of this period (Eton MS. 178) that the 9-part *Salve Regina* and 13-part Apostles' Creed by Wilkinson are monotonous in their repetition of one or two fundamental chords: ingenuity has dominated over art. It is not until modulation is well known and practised that a more complex scheme of voices can be satisfactorily handled, and there is a whole world of difference between these things and Palestrina's 'Stabat Mater.' But excellent 5-part writing of this period may be found in the anonymous Mass 'O quam suavis' at Cambridge, worthy to stand beside the best of Fayrfax. A short extract from the Eton MS. instances the real (though perhaps unrealised) strength of this period in florid 2-part counterpoint.

From a *Magnificat* for four male voices
by DOM WILLIAM STRATFORD.
O Eton MS. 178 (c. 1500).

Time values of the original notes halved.

Ingenuity was expended in another direction in this period by the curious devices of puzzle-canons and enigmas of amazing subtlety. Flemish as well as English excelled in these.

The first quarter of the 16th century brings us to the first peak of the Golden Age—LASSUS on the Continent, TAVERNER in England. In this period of individual composers, an account of whose art will be found under their respective names, we may be relatively brief in dealing with the very important transition of the art from scholastic to expressive composition. Two names stand out in the transitional period, one on either side of the Channel—Robert FAYRFAX and Josquin des Prés, the leaders of two vigorous schools.

The art in England now develops in a course somewhat different from that followed by the Netherlanders. The work of the Fayrfax school has not yet been thoroughly explored, very little of their music being in print; but it is well known to some few who have scored these compositions in MS., and all agree in admiration for Fayrfax's great mastery of technique, his bold sweep of melody, and his massive strength. He wrote chiefly in five and six parts, and some of his music, together with work by his contemporary Ludford, has recently been revived in practical form. By comparison with the Flemings of his day he is said to be conservative; but in one direction he was progressive, for he seems to have taught English composers to forsake the tiresome habits of enigma, puzzle-canon and the over-elaboration of contrapuntal device.

Josquin des Prés, on the other hand, and his prolific school (known as the 'Third Flemish School'), though freeing their music from the shackles of Okeghem's excessive mathematical subtleties, still make use of 'trick-writing' from time to time. But their great contribution to the development of composition—and here they forged ahead of England for a time—is the alliance of counterpoint and expression. Modal 'flavour' had hitherto been sufficient, but in the hands of the polyphonists the modes have tended to settle more and more into three stereotyped forms—Ionic (Mixo-Lydian) or modern major, Dorian and Aeolian or modern minor. So that from 1500 onwards we find that dramatic effects are produced by the more successful writers with apparent ease; though analysis often reveals their consummate skill and mastery of technical device. Modal polyphony had its day, a glorious day; but being a living thing, and one of the most marvellous fruits that the art, devotion and skill of man have ever brought to perfection, it held within itself the seeds of decay; and of rebirth. And by the middle of the 16th century we find musicians writing frankly in the modern major and minor modes,

the minor third in the final chord being, of course, always disallowed.

A. H.

PRINCIPLES OF THE 16TH CENTURY

An attempt is made here to state briefly what the principles of composition of the great polyphonic schools really were, so that the reader may see for himself how far they differ from text-book theory. It will be of practical convenience to consider these principles under the separate headings of Scale, Rhythm and Harmony; but no musician will need to be reminded how deeply these three elements interpenetrate and modify one another in practice.

(1) SCALE.—It is not necessary to give here any detailed account of the modal system (see *MODES, ECCLESIASTICAL*). It has only to be remembered that the two-scale system had not yet completely emerged, although the constant use of accidentals in accordance with the rules of *MUSICA FICTA* (*q.v.*) was rapidly transforming the modal system into something very unlike its original self. But in all the accounts of *Musica Ficta* nothing emerges at all resembling the later idea of modulation. Accidentals are purely local, so to speak, in their action; they are introduced to secure or avoid some particular and momentary effect, and are not at all to be thought of as shifting the harmonic centre of gravity as the later modulation did. In most modern text-books, on the other hand, no attempt is made to preserve this vital element of the older counterpoint; accidentals are used, if at all, for the specific purpose of modulation, and are otherwise banned, except so far as they are required in the ascending form of the melodic minor scale. In this way the historic evolution of the diatonic and chromatic scales, their gradual emergence from the older modal system, is concealed from the student, who is thereby so much the poorer. Scholastic counterpoint would no doubt reply that a student should be trained in the scale-system in which he will ultimately have to work, and that the modes were of historical but not practical interest. To this a modern teacher can only reply that it was so, but is so no longer. What composers seek to-day is freedom from the limits of the major and minor scale-system. That freedom they will attain, but they must have a centre of gravity. They cannot, humanly speaking, do without the point of balance which a scale affords. Atonality tries to dispense with balance altogether; polytonality attempts to balance at more than one point at the same time. Both ventures appear foredoomed. But the resources they are trying to develop are not thereby placed for ever beyond our grasp; they are latent in the music of the 16th century. A composer then, writing for in-

stance in the scale or mode of *G*, had two thirds at his command, two sixths and two sevenths; he could use *B*_♭ or *B*_♮, *E*_♭ or *E*_♮, *F*_♯ or *F*_♮, according as the natural course of the melody might indicate. He could even use the two forms simultaneously in two different parts: the English composers were constantly doing so. A modern composer has only to develop this method of proceeding to attain the full freedom of a twelve-note scale, with no need of becoming either arbitrary or chaotic. It can thus be realised that music in 1600 did indeed stand at the cross-roads, but saw only one arm. That was right at that time, but now the hour has come to go back and see where the other arm points us. Scholastic counterpoint has little to say on such matters; but it will have to say more if it is to justify itself to the coming generation.

(2) RHYTHM.—The rhythm of the polyphonic period was in every way more complex and more subtle than that of the so-called classical period which succeeded it. One may perhaps best express the nature of this complexity by saying that the rhythm of a piece of music taken as a whole—i.e. harmonically—was quite different from the rhythms of the individual voices of which it was composed, and that these individual rhythms in turn could be, and often were, quite different from one another. That said, it remains to describe the nature of these differences. For the moment, let us put on one side the consideration of the individual voices, and think of the music simply as a sequence of chords, interwoven with suspensions, passing notes, and so on.

Thus viewed, it presents little difficulty. All discords had to be prepared first, and then resolved. The chord of preparation and the resolution invariably occurred on 'weak' beats, the discord itself coming on the intervening 'strong' beat. Which those beats were depended on the time and prolation signatures at the beginning of the movement. If, for example, the sign was *C*, the accentual system was — ◡ — ◡ — ◡ — ◡, and so on; if the sign was *O*, the accentuation was ◡ — ◡ — ◡ — ◡, and so on (the mark — indicating in each case the 'strong' beats; i.e. the places where discords could occur). It is therefore most misleading to say (as some modern editors seem never tired of saying) that the time-signature was of 'purely arithmetical significance,' when in fact it determined the whole harmonic structure of the composition.

Now let us consider the rhythmical structure of the individual voices. Here one may indeed say that the time-signature is of 'purely arithmetical significance,' for it may exercise no influence whatever on the melodic accentuation. This accentuation is free, plastic and independent, making itself felt by duration

rather than by stress (cf. ACCENT). It prefers to follow the natural spoken rhythm of the words, and does not care in the least whether these 'duration accents' come on a metrically strong or a metrically weak beat. Consider, for example, the two following passages from Palestrina's eight-part *Stabat Mater*.

Here the 'duration accents' are most cunningly contrived to fit the natural stress of the words they accompany, yet in both passages they utterly defy the authority of their respective time-signatures. And in this determination to be free at all costs they are an epitome of 16th-century music as a whole, for that music always declined to submit to the bondage of the dance, whose uniformity of rhythmic pattern, though admirable for its own purpose, is more apt to content the body than to refresh the soul. Now this idea of rhythmical freedom, like the idea of metrical regularity, is in itself quite easy to grasp. But the co-existence of the two principles within one and the same piece of music does appear to present a certain difficulty to many modern minds. Scholastic counterpoint does not recognise the existence of the problem; it assures the student that tied notes and dotted notes are 'useful as giving variety to the rhythm' (or words to that effect), but it makes no attempt to investigate and define the function of the tie, considered from the point of view of the single part in which it occurs. It does not see that the effect of the tie is to hold back the accent, to create a fresh accent, as it were, an accent of duration, whose position is quite independent of the 'strong' and 'weak' beats of the measure, although the harmonic stress, as shown by the discords, is determined entirely by these regular beats. This is not theorising: it is a plain fact for any one who will study the English madrigals and observe how free is the position of the stressed syllables in the music, taken as they are quite impartially in 'strong' or 'weak' places as the spirit may dictate. Yet it is surely desirable that a student of music should be made familiar

with a rhythmical system so subtle, so complex, and so precise. And it is not only to be desired for the sake of the historical information so acquired. Rhythmical exercise on such lines will give not only knowledge, but power; it will make the student inwardly mobile, and point him the way to a new rhythmic freedom. There can be no return to the 16th-century system as it stands, for that would imply a return also to the harmonic limitations on which that system depends, which is unthinkable. But a study of that system will show us how to 'think across the bar-line,' to elide an accent or displace a stress, without doing sudden violence to the measure in which we are writing. Measure in itself is good; the regular periodic rise and fall which measure gives is an element of power for music as for poetry. But freedom must be able to assert itself from time to time within the domain of law, for where there is no freedom the spirit will not enter. The 'free rhythms' of the present day are unbalanced and self-conscious; moreover, the constant abrupt changes of time and bar are bewildering to the players and a terror to their conductor. Counterpoint can show us the way to a truer and more spontaneous freedom, working in harmony with metric law, instead of seeking to thrust it aside with violence. But such counterpoint must be taught in the spirit as well as the letter.

(3) HARMONY.—Every one knows that the classic system of harmony, which served mankind from Bach to Brahms, was derived from the counterpoint of the previous age—the age, that is to say, which is here under consideration. Strip that harmony of its trimmings, chromatic passing notes and such like embellishments, and you are left with a handful of simple diatonic chords, which passed into musical currency simply because the sound of them had become familiar. They were originally, so to speak, fortuitous combinations which were so frequently brought about by the normal flow of counterpoint that by constant repetition they acquired independent existence, and were ultimately grouped, classified and labelled as common chords, diatonic sevenths, secondary sevenths and so on. If one wants to press the inquiry farther back, and inquire how these combinations first became possible, one must speak no longer in terms of chords, but of intervals. There is indeed only one harmonic principle underlying the music of the 16th century, and it is this: In every piece of music, no matter how many the parts, every part must make correct two-part harmony with every other part. And to the question, What in their view was correct two-part harmony? there is a threefold answer: (1) The intervals of the second and the seventh are dissonant,

and require preparation, except when they occur merely as passing notes. (2) The interval of the fourth is also a dissonance when it occurs between one of the upper parts and the bass. But occurring between upper parts it is a consonance, if it is supported by the bass—i.e. as we should say, if it constitutes the upper part of a ♯ or ♭ chord. The same is true of the augmented fourth and the diminished fifth. (3) The other intervals are consonant and require no preparation. But consecutive fifths and octaves are forbidden.

To this question of prohibited consecutives we shall return. For the moment the essential thing to note is that the whole edifice of 16th-century music rests, harmonically speaking, on these three rules. The rest is a matter of detail—how suspensions resolve, where passing notes may occur, and so on. It is superfluous to enter here into these matters of procedure. The prohibited consecutives, however, are worth considering. They can throw light on the problems of the present and the future; but to get our true bearings we must go back still further, and consider summarily the changes that took place in music between the 14th and the 16th centuries. Three of these claim our attention:

(1) At the beginning of this period fourths and fifths are the favoured intervals: seconds and sevenths are quite acceptable: thirds and sixths are curiously infrequent. By the end of it, seconds and sevenths are banned altogether, while octaves and fifths are placed under severe restrictions. Thirds and sixths, on the other hand, are now the only intervals that can be used without let or hindrance.

(2) The number of voices has tended steadily to increase. Two or three parts were usual at first: by the end of the period five- and six-part combinations were normal, and eight- and twelve-part work by no means uncommon.

(3) The centre of interest tends to pass outwards from the tenor. The bass is felt more and more as dominating the harmony (as the interval of the fourth bears witness): the upper parts, on the other hand, claim more and more of the melodic interest. This last feature is perhaps less noticeable in the sacred music than the secular, but of its general existence there is no doubt.

Now these three changes are interconnected. What (2) and (3) together tell us in effect is this:

'In hearing music of many parts, one has not attention to spare for all the parts equally. What one hears is largely, though not entirely, synthetic. So far as one does hear analytically, the outer parts are more prominent than the inner.'

Whereupon (1) says in turn:

'Quite so. And music must recognise the nature and limitations of the faculty by which men apprehend music. Therefore seconds and sevenths must be avoided, for in these is no element of synthesis; they cause the voices to stand sharply apart from one another. Octaves and fifths, on the other hand,

are too synthetic; they blend as though into a single sound. It is in the thirds and the sixths that the analytic and synthetic elements find their true balance and equipoise.'

Now what (2) and (3) said in the 16th century is as true to-day as it was then. To attend to two melodies simultaneously requires intense concentration; to attend to three is beyond even the most expert capacity, so far as the writer, searching carefully, has been able to discover. Therefore one can safely ignore the current theory of 'non-harmonic linear counterpoint,' which seeks to elevate mere simultaneity to the rank of an aesthetic principle. We must admit the need for some real principle of harmonic synthesis, nay more, we must acknowledge, if we are honest, that the burning question for the music of to-day is, Where can such a principle be found? The 16th century, as we have seen, found its own answer to the question, and in that answer we too can find truth if we try, as we should always try, to penetrate beyond the letter into the spirit informing the letter. What the 16th century has really to say on the subject is this: What is called dissonance is not a matter of pleasantness or unpleasantness, nor is it concerned with any theory of beats, or other acoustical abstraction. The fact is simply this—that when two tones are sounded together, one is not conscious of them simply as a single sound. To some extent they tend to remain apart, and that tendency is what we call dissonance. We may also say of the same two tones that one is not conscious of them simply as two sounds. To some extent they tend to merge their separate identities, to fuse into a single sound; and that tendency is what we call consonance. An interval is consonant (or dissonant) in greater or less degree according as one tendency (or the other) is more or less strongly revealed by it. A chord is an assemblage of intervals, and it in turn is more or less concordant according as the more or the less consonant intervals preponderate in its composition. And a composer will therefore choose more concordant or less concordant assemblages from moment to moment according as he wants his different voices to blend or to assert their separate selves. It is not a matter of theory but of plain psychological fact, grounded in the very nature of what we may call our aural consciousness—i.e. the way in which we hear music.

Such is the message for our times of 16th-century harmony. The first man to rediscover its true significance was Professor Watt, whose book, *The Foundations of Music*, inquires deeply and exhaustively into the subjects here briefly touched on. Professor Watt, indeed, does not always seem fully aware of the real scope of his inquiries; he seems now and again to shrink, perhaps unconsciously, from the conclusions to which his researches point.

That does not affect the value of the book in the slightest, nor does it absolve the present writer from the necessity of acknowledging, freely and gladly, that without the guidance of that book this article would probably never have been written.

R. O. M.

POLYTONALITY, see TONALITY; HARMONY.

POMMER, see OBOE (5).

POMPOSO, 'pompously,' is used by Schumann in the Humoreske, op. 20, for pianoforte. Handel had employed the term a century before in the first movement of the overture to 'Samson.'

M.

PONCHARD, LOUIS ANTOINE ELEONORE (b. Paris, Aug. 31, 1787; d. there, Jan. 6, 1860), son of ANTOINE PONCHARD, maître de chapelle of St. Eustache, professor at the Conservatoire and composer of church music. Louis Antoine was also a distinguished church composer (masses, etc.), and maître de chapelle in various French towns. An excellent singer, pupil of Garat, he made his début in 1812 at the Opéra-Comique, to which he belonged until 1837. In 1819 he became professor of singing at the Conservatoire, and was the first operatic singer who became a member of the Legion of Honour. His wife, MARIE SOPHIE CALLAULT-PONCHARD (b. Paris, 1792; d. there, 1873), was also a distinguished member of the Opéra-Comique.

E. v. d. s.

PONCHIELLI, AMILCARE (b. Paderno Fasolaro, Cremona, Sept. 1, 1834; d. Milan, Jan. 16, 1886), opera composer. In Nov. 1843 he entered the Conservatorio di Milan, and remained there till Sept. 1854. Two years afterwards, on Aug. 30, 1856, he was able to produce at the Concordia at Cremona his first opera, 'I promessi sposi.' His next were 'La Savojarda,' Cremona, Jan. 19, 1861; 'Roderico,' Piacenza, 1864; 'Bertrand de Born' (not performed) and 'La stella del monte,' in 1867. Hitherto Ponchielli's reputation had been confined to the provinces; but in 1872 he was fortunate enough to find an opportunity of coming before the general public at the opening of the new Teatro Dal Verme at Milan, where his 'Promessi sposi' was performed Dec. 5. He rewrote a considerable portion of the opera for the occasion, and its success was immediate and complete. (The work was given by the Carl Rosa Company at Birmingham in Apr. 1881.) The managers of the theatre of La Scala at Milan at once commissioned him to write a ballet, 'Le due gemelle,' which was produced there Feb. 1873, received with frantic enthusiasm and immediately published. This was followed by a ballet, 'Clarina' (Dal Verme, Sept. 1873); a scherzo or comedy, 'Il parlatore eterno' (Lecco, Oct. 18, 1873); and a piece in three acts, 'I Lituani,' given with immense success at La Scala, Mar. 7, 1874. (It was rearranged and produced as 'Alduna' at the same theatre in 1884.)

In the following year he wrote a *cantata* for the reception of the remains of Donizetti and Simone Mayr at Bergamo, a work of some extent and importance, which was performed there Sept. 13, 1875. On Apr. 8, 1876, he produced a new opera at La Scala called 'Gioconda' (after Victor Hugo's 'Angelo'), with the same success as before (it was given with much success at Covent Garden, May 31, 1883); and on Nov. 17, 1877, he gave at the Dal Verme, the scene of his first triumph, a three-act piece called 'Lina,' which was a *réchauffé* of his early opera 'La Savojarda,' and does not appear to have pleased. His opera 'Il figliuol prodigo' was produced at La Scala, Dec. 26, 1880, with astonishing success. In 1881 Ponchielli was appointed maestro di cappella at Bergamo. His last work was a three-act opera, 'Marion Delorme,' produced at La Scala, Mar. 17, 1885. A hymn in memory of Garibaldi was performed in Sept. 1882.

The above notice is indebted to Paloschi's *Annuario*, and Pougin's Supplement to *Fétis*.

G.

PONIATOWSKI, JOSEPH MICHAEL XAVIER FRANCIS JOHN, Prince of Monte Rotondo (b. Rome, Feb. 20, 1816; d. July 3, 1873), opera composer. He was a nephew of the Prince Poniatowski who was a marshal of the French army and died in the battle of Leipzig, Oct. 19, 1812, and whose portrait was found by Mendelssohn at Wyler inscribed 'Brinz Baniadofski.'¹ Poniatowski devoted himself so entirely to music that he can hardly be called an amateur. He regularly attended the musical classes at the Lycée at Florence, and also studied under Ceccherini. He made his début at the Pergola, Florence, as a tenor singer; produced his first opera, 'Giovanni da Procida'—in which he sang the title-rôle—at Lucca in 1838, and from that time for more than thirty years supplied the theatres of Italy and Paris with a large number of operas. After the Revolution of 1848 he settled in Paris as plenipotentiary of the Grand Duke of Tuscany, and was made Senator under the Empire. After Sedan he followed his friend Napoleon III. to England, produced his opera 'Gelmina' at Covent Garden, June 4, 1872, his operetta 'Au travers du mur' at St. George's Hall, June 6, 1873, and selections from his *Mass in F* at Her Majesty's Theatre, June 27, 1873.

His operas are 'Giovanni da Procida' (Florence and Lucca, 1838); 'Don Desiderio' (Pisa, 1839; Paris, 1858); 'Ruy Blas' (Lucca, 1842); 'Bonifazio' (Rome, 1844); 'I Lambertazzi' (Florence, 1845); 'Malek Adel' (Genoa, 1846); 'Esmeralda' (Leghorn, 1847); 'La sposa d'Abido' (Venice, 1847); 'Pierre de Medicis' (Paris, 1860); 'Au travers du mur' (*ibid.* 1861); 'L'Aventurier' (*ibid.* 1865); 'La Contessina' (*ibid.* 1868).

¹ Buried at Chislehurst, Kent.

² Letter, Aug. 9, 1881.

His music evinces much melody and knowledge of the voice, considerable familiarity with stage effect, fluency and power of sustained writing — everything in short but genius and individuality. His popular ballad 'The Yeoman's Wedding Song' is still sometimes heard in England. G. C.

PONS, JOSÉ (b. Girona, Catalonia, 1768; d. Valencia, 1818), Spanish musician. He studied under Balins, maestro de capilla at Cordoba. Pons was maestro de capilla of the cathedral of his native town, a post which he left for that at Valencia. He is distinguished for his VILLANCICOS (*q.v.*) for Christmas, which, in his time, came to resemble oratorios for voices with orchestra or organ. He wrote also Misereres for Holy Week. *Eslava* (*Lira sacro-hispana*, iv.) gives a Letrilla of his, 'O madre,' for 8 voices, and characterises him as the typical composer of the Catalan school as opposed to that of Valencia.

G.; rev. J. B. T.

PONTE, LORENZO DA (b. Ceneda, Republic of Venice, Mar. 10, 1749; d. Aug. 17, 1838), Italian poet and author of the libretti of Mozart's 'Nozze di Figaro,' 'Don Giovanni' and 'Così fan tutte,' was the son of a Jewish leather-merchant named Jeremia Conegliano; his mother's maiden name was Rachel Pincherle; his name until his fourteenth year Emmanuel Conegliano.

His precocious talents attracted the attention of the Bishop of Ceneda, Lorenzo da Ponte, who gave him his name when the family, which included two brothers, embraced Christianity and received baptism in the cathedral of Ceneda on Aug. 20, 1763. After five years of study in the seminary of Ceneda (probably with the priesthood as an object), he went to Venice, where he indulged in amorous escapades which compelled his departure from the city. He went to Treviso and taught rhetoric in the University, incidentally took part in political movements, lampooned an opponent in a sonnet, and was ordered out of the Republic. In Dresden, whither he turned his steps, he found no occupation for his talents, and journeyed on to Vienna. There, helped by Salieri, he received from Joseph II. the appointment of poet to the Imperial Theatre and Latin secretary. Good fortune brought him in contact with Mozart, who asked him to make an opera-book of Beaumarchais's 'Mariage de Figaro.' The great success of Mozart's opera on this theme led to further co-operation, and it was on Da Ponte's suggestion that 'Don Giovanni' was undertaken, the prompting coming largely from the favour enjoyed at the time by Gazzaniga's opera on the same subject, from which Da Ponte made generous draughts—as a comparison of the libretti will show. Having incurred the ill-will of Leopold, Da Ponte was compelled to leave Vienna on

the death of Joseph II. He went to Trieste, where Leopold was sojourning, in the hope of effecting a reconciliation, but failed; but there he met and married an Englishwoman, who was thenceforth fated to share his chequered fortunes. He obtained a letter recommending him to the interest of Marie Antoinette, but while journeying towards Paris learned of the imprisonment of the Queen and went to London instead. A year was spent in the British metropolis in idleness, and some time in Holland in a futile effort to establish an Italian theatre there. Again he turned his face toward London, and this time secured employment as poet to the Italian Opera and assistant to the manager Taylor. He took a part of Domenico Corri's shop¹ to sell Italian books, but soon ended in difficulties, and to escape his creditors fled to America, arriving in New York on June 4, 1805. His London sojourn had endured eight years, and his wife had preceded him to America carrying with her enough money to enable him to begin business in the New World as vendor of tobacco, drugs and liquors. Discouragement led him to try his fortune in Elizabethtown, N.J., in three months, but in a twelvemonth he failed there also, and came back to New York, where he took up the one form of activity which won him respect and modest emoluments; he became a teacher of Italian language and literature. After eleven years the mercantile spirit prevailed with him again, and he ventured his savings in a distillery in Sunbury, Penn. Again he failed, and again he returned to New York and a professional career. He wrote his memoirs in three volumes, secured an appointment, which was little more than nominal, as professor of Italian literature in Columbia College, lectured on Italy, sold books to the College library, and enjoyed the friendship of some of New York's most eminent citizens and men of letters until his death, though his last years were spent in comparative poverty. When Manuel Garcia came to New York with the first Italian Opera Company which visited that city, Da Ponte attached himself to the troupe as poet, and was more or less concerned in subsequent operative ventures during the next decade, but never to his own or anybody else's profit. Dr. J. W. Francis attended him in his last illness, and to him the poet, a day before his death, his leading passion inextinguishable, addressed a sonnet. Allegri's *Miserere* was sung at his funeral, and, say eyewitnesses, he was buried 'in the Roman Cemetery in Second-Avenue.' The Italians of the city resolved to rear a monument over his grave, but never did so, and the place of his burial is unmarked and unknown, like the grave of Mozart.

PONTICELLO (Ital. for the bridge of a stringed instrument) is used chiefly in the term *sul ponticello*, indicating that a passage on the violin, viola or violoncello is to be played by crossing the strings with the bow close to the bridge. In this way the vibration of the string is partially stopped, and a sound of a strange, almost uncanny character is produced. It occurs in solo pieces as well as in concerted and orchestral music. See the opening scene, Act II. of 'Tristan und Isolde.'

POOLE, ELIZABETH (b. London, Apr. 5, 1820; d. Langley, Bucks, Jan. 14, 1906), a favourite English actress and mezzo-soprano singer. She made her first appearance in a pantomime at the Olympic Theatre in 1827, and continued for some years to play children's parts—Duke of York to Kean's Richard; Albert to Macready's Tell; Ariel, etc. In 1834 she came out in opera at Drury Lane as the Page in 'Gustavus'; in 1839 visited the United States and sang in 'Sonnambula' and other operas; in 1841 was engaged by Bunn for his English operas at Drury Lane. Here she sang many parts, especially Elvira in 'Don Giovanni,' with Malibran in Balfe's 'Maid of Artois,' and as Lazarillo in 'Maritana.' At the same time her ballads and songs were highly popular at concerts both in London and the provinces. Miss Poole appeared at the Philharmonic, June 15, 1846. Balfe wrote for her 'This gone, the past is all a dream,' which she introduced into 'The Bohemian Girl,' in which she played the Gipsy Queen. She was a leading singer in the operas brought out at the Surrey Theatre by Miss Romer in 1852, where she sang in 'The Daughter of the Regiment,' 'Huguenots,' etc., and was also much engaged by Charles Kean, F. Chatterton and German Reed. Miss Poole (then Mrs. Bacon) retired from public life in 1870. Her portrait is preserved in the collection of the Garrick Club. (See *Musical Herald*, Feb. 1, 1906.)

POOLE, MISS, see **DICKONS, MRS.**

POPPER, DAVID (b. Prague, June 18, 1846; d. Aug. 7, 1913), violoncellist, received his musical education in the Conservatorium at Prague. He learnt the violoncello under Goltermann, and soon gave evidence of the possession of a remarkable talent.

In 1863 he made his first musical tour in Germany, and quickly rose to very high rank as a player. In the course of the journey he met von Bülow, who was charmed with his playing, performed with him in public, and induced Prince Hohenzollern to make him his Kammervirtuos. Popper afterwards extended his tour to Holland, Switzerland and

England. In 1867 he played for the first time in Vienna, where he was made first solo-player at the Hofoper, a post, however, which he resigned after a few years, that he might continue his concert tours on a great scale. His tone was large and full of sentiment, his execution highly finished and his style classical. His compositions were suited to his instrument, and are recognised as such by violoncello-players.

G. F. P.

Early in 1872 Popper married Sophie MENTER; the marriage was dissolved in 1886. He reappeared in England at a concert at the Crystal Palace on Nov. 10, 1891, and played one movement of his violoncello concerto in C minor with orchestra. He performed at the Popular Concerts, St. James's Hall, for the first time on Nov. 21, 1891. On Nov. 25, 1891, he gave a violoncello recital at St. James's Hall, when he played his 'Requiem' for three violoncellos, with Delsart and Howell. In 1896 he accepted the post of professor at the Royal Conservatoire in Budapest.

E. H. A.

POPULAR CONCERTS, THE. This unique institution, more familiarly known as the Monday and Saturday 'Pops,' owed its origin to some miscellaneous concerts given in the early days of the old St. James's Hall, which stood at the back of the Quadrant between Regent Street and Piccadilly. A preliminary series of three concerts, organised by the promoters of the building, with Messrs. Chappell & Co. at their head, took place during the 'Cattle Show Week' in Dec. 1858, under the direction of Mr. (afterwards Sir) Julius Benedict, and resulted in a loss. It was followed by four more of a similar nature, which were announced as 'Monday Popular Concerts'; these proved rather more successful. Then, at the suggestion of James W. Davison, the critic of *The Times*, it was decided to change the character of the concerts and restrict them entirely to 'classical' music, of which there had been no regular performances in London down to that time such as would bring chamber music within the reach of the general public. The direction of the undertaking was assumed by Arthur CHAPPELL (*q.v.*), and retained by him throughout the 40 years of its existence; while during the greater part of that period the well-known sixpenny analytical programmes, which formed a conspicuous element in the educative influence of these concerts, were written by Davison—after him by Joseph Bennett. Thus the idea was 'to collect a permanent audience from the lovers of music resident in London and the suburbs,' and, *inter alia*, help to popularise the new hall, which was as yet far from paying its way. With these objects in view it was decided to engage only artists of the highest standing to perform the best music; and the first six concerts were devoted in turn to a Mendelssohn night, a Mozart night, a Haydn

and Weber night, a Beethoven night, a second Mozart night, and a second Beethoven night.

The 'new series of entertainments,' as it was officially described, was started on Feb. 14, 1859, with a programme that included vocal items, sung by Santley, and two organ solos, played by Dr. Edward J. Hopkins. Charles Hallé was the pianist and Benedict the accompanist. The members of the quartet on this occasion were Henri Wieniawski, Louis Ries, C. W. Doyle and Alfredo Piatti; and of these Ries and Piatti retained their respective posts of second violin and violoncello practically for the entire duration of the enterprise—to the great advantage of the ensemble and its unity of artistic spirit. The success of the opening season was in the highest degree encouraging, the audiences becoming more numerous each week; while to the above masters were added compositions by Bach and Handel, including four organ solos played by W. T. Best. There was also one entirely English programme which comprised works by G. A. Macfarren, G. F. Pinto, E. J. Loder and Sterndale Bennett. Altogether fourteen concerts were given between Feb. 14 and June 27, when the season ended. After this excellent beginning there was every justification for lengthening the period of the subscription by starting in the late autumn and concluding at about Easter, which thenceforward became the regular practice. Furthermore, in 1865 the Saturday 'Pops' were started as an occasional supplementary series, and from 1876 they alternated every week with the Monday concerts. The 1000th concert took place on Apr. 4, 1887, while some 460 more concerts were added to this remarkable total during the remaining eleven years that the 'Pops' continued to be given. Their existence was practically coeval with that of the building which gave them birth.

In assessing the just value of these incomparable concerts, as the medium whereby the soul of the English metropolis was awakened to the beauty and meaning of chamber music in its noblest forms, it is essential to recognise above all two things: first, the lofty standard that was maintained throughout in the choice and the interpretation of those works of the great masters, living as well as dead, which had hitherto been as a 'sealed book' to the music-loving community; and, secondly, the unstinted labour and devotion of the distinguished artists who appeared year after year—some with unflinching regularity, others during their brief annual visits to this country—ever associating themselves more conspicuously with their splendid tasks and endearing themselves more closely to an intelligent, grateful and affectionate public. Amid such unprecedented conditions it was no wonder that the warmest personal ties became established

between those who performed and those who listened. And the latter, it should be recalled, included not only the new generation of amateurs who frequented the shilling gallery and three-shilling balcony, but, among the habitués of the five-shilling stalls, some of the most prominent poets, painters and *littérateurs* of the Victorian era.

During the greater part of each season the quartet was led by the illustrious violinist Joseph JOACHIM, the presiding genius of the 'Pops,' whose name was to be associated with their history from the opening year, when he introduced the Rasoumowsky quartets of Beethoven and the Chaconne of Bach. No less worthy of record was the constant co-operation of the great Italian violoncellist Alfredo PIATTI, and of that admirable violinist Wilhelmina Norman-NERUDA (Lady Hallé), to both of whom the public was devotedly attached. With Louis Ries invariably at the second violin desk, the quartet was completed by one of the four excellent viola-players C. W. Doyle, Ludwig Straus, J. B. Zerbini and Benoit Hollander. Foremost among the many gifted pianists who used to appear was Mme. Clara Schumann, the ideal exponent of the works of the romantic school in general and of her husband's in particular; and, when her distinguished career had closed, its inestimable example was worthily carried on by her brilliant pupils, Fanny Davies, Leonard Borwick, N. Janotha and Ilona Eibenschütz, all of whom made their London débuts at these concerts. Invaluable in the same sense were the constant labours of pianists such as Charles Hallé, Ernst Pauer, Agnes Zimmermann and Clotilde Kleeberg, not to mention the occasional appearances of Anton Rubinstein, Hans von Bülow, Edward Grieg and Ignaz Paderewski. So again the vocal music, usually restricted to a couple of items in each programme, was almost invariably of the finest type and contributed by the best concert-singers of the day. The admirable work of the two principal accompanists, Sir Julius Benedict and Henry R. Bird, also deserves mention.

The repertory of the Popular Concerts contained some 1050 works of every calibre. Oddly enough, it did not include a single composition by Purcell, but, on the other hand, comprised chamber works by several contemporary English composers—Sterndale Bennett, Stanford, Hubert Parry and Mackenzie. The following alphabetical list shows the number of works drawn upon from each of the 16 most 'popular' composers: Bach, 66; Beethoven, 99; Brahms, 46; Chopin, 59; Dvořák, 13; Grieg, 13; Handel, 16; Haydn, 58; Mendelssohn, 64; Mozart, 66; Rubinstein, 14; Scarlatti, 22; Schubert, 44; Schumann, 79; Spohr, 44; and Weber, 12. The last of the long series of concerts came with

1790-95, are printed in Pompeo Molmenti's *Caricaturi Casanoviani*, Naples, 1918 (Collezione settecentesca); JOSEPH LOUIS RUSSO, *Lorenzo de' Medici, Past and Adventure*, pp. xviii, 166, New York, 1921 (Columbia University Studies in Romance, Philology and Literature); E. J. DENT, *Mozart's Operas*.

The repertory of the Popular Concerts contained some 1050 works of every calibre. Oddly enough, it did not include a single composition by Purcell, but, on the other hand, comprised chamber works by several contemporary English composers—Sterndale Bennett, Stanford, Hubert Parry and Mackenzie. The following alphabetical list shows the number of works drawn upon from each of the 16 most 'popular' composers: Bach, 66; Beethoven, 99; Brahms, 46; Chopin, 59; Dvořák, 13; Grieg, 13; Handel, 16; Haydn, 58; Mendelssohn, 64; Mozart, 66; Rubinstein, 14; Scarlatti, 22; Schubert, 44; Schumann, 79; Spohr, 44; and Weber, 12. The last of the long series of concerts came with

the termination of the season of 1897-98. For some time a few concerts were given annually in the spring by Joachim with the members of his Berlin quartet. An attempt at revival was also made by Johann Kruse in 1903-04; but before the century was much older St. James's Hall, and with it the well-loved 'Pops,' had ceased to be more than a memory. H. K.

PORDENON, MARCO ANTONIO (b. Padua), was maestro di cappella at S. Marco, Pordenone, Lombardy, in 1578. In 1580 he no longer retained that title. He composed 5 books of madrigals a 5 v. and one book a 4 v., published by Gardano, Venice, between 1564 and 1580.

E. v. d. s.

PORPORA, NICCOLA,¹ or NICCOLO, ANTONIO (b. Naples, Aug. 19, 1686; d. there, 1767), composer and celebrated teacher of singing. His father, a bookseller with a numerous family, obtained admission for him at a very early age to the Conservatorio di S. M. di Loreto, where he received instruction from Padre Gaetano of Perugia (apparently confused with Gaetano Greco by Florimo) and Francesco Mancini, former pupils of the same school. His first opera was 'Basilio, re di Oriente,' written for the theatre 'de' Fiorentini.' On the title-page of this work he styles himself 'maestro di cappella to the Portuguese Ambassador.' The opera of 'Berenice,' written in 1710 for the Capranica theatre at Rome, attracted the notice and elicited the commendation of Handel. It was followed by 'Flavio Anicio Olibrio' (1711); by several masses, motets and other compositions for the Church; by 'Faramondo' (1719) and 'Eumene' (1721), on the title-page of which last work he calls himself 'Virtuoso to the Prince of Hesse Darmstadt.' Having been appointed master of the Conservatorio di San Onofrio, he wrote for it an oratorio, 'La martiria di Santa Eugenia,' which had much success on its first performance there in 1721. In 1723 he wrote for the wedding of Prince Montemiletto a cantata, in which Farinelli sang. 'He had, before this time, established the school for singing whence issued those wonderful pupils who have made their master's name famous. After 'L' Imeneo' came 'Amare per regnare' and 'Semiramide' (1724) (according to Villafosa); and a MS. in the Conservatoire of Paris gives evidence of another opera, 'Adelaida,' belonging to 1723 and performed at Rome. In 1724 Hasse arrived at Naples with the avowed intention of becoming Porpora's pupil. After a short trial, however, he deserted this master in favour of Alessandro Scarlatti, a slight which Porpora never forgave, and for which, in later years, he had abundant opportunity of revenging himself on HASSE (q.v.).

¹ In his autographs Niccola, but on the title-pages of works published by himself, and in contemporary MS. copies, Niccolo.

Porpora's natural gifts were united to an extremely restless, changeable disposition. He seems never to have remained very long in one place, and the dates of many events in his life are uncertain. It appears that in 1725 he set off for Vienna, but he must have stopped at Venice on his way, as there is evidence to show that he was appointed to the mastership of one of the four great singing-schools for girls there, that of La Pietà. He hoped to get a hearing for some of his music at Vienna, but the Emperor Charles VI. disliked his florid style and profuse employment of vocal ornament, and gave him no encouragement to remain. He therefore returned as far as Venice, where he produced his opera 'Siface' in 1726, and was appointed master to another of the schools above-mentioned, that of the Incurabili. For his pupils at this institution he wrote the vocal cantatas, twelve of which he published in London in 1735, and which are among his best compositions.

In 1728 he set out for Dresden, where the Electoral Princess, Marie Antoinette, was eager to receive instruction from the famous *maestro*. On the way thither he revisited Vienna, hoping for a chance of effacing the unfavourable impression he had formerly made; but the Emperor's prejudice against him was so strong, and carried so much weight, as to make it seem probable that he would once more find nothing to do. He found a friend, however, in the Venetian ambassador, who not only received him under his own roof but succeeded in obtaining for him an Imperial commission to write an oratorio, accompanied by a hint to be sparing in the use of trills and flourishes. Accordingly, when the Emperor came to hear the work rehearsed, he was charmed at finding it quite simple and unadorned in style. Only at the end a little surprise was reserved for him. The theme of the concluding fugue began by four ascending notes, with a trill on each. The strange effect of this series of trills was increased as each part entered, and in the final *stretto* became farcical outright. The Emperor's gravity could not stand it; he laughed convulsively but forgave the audacious composer and paid him well for his work. The name of this oratorio is lost.

Porpora was warmly received at Dresden, where he was specially patronised by his pupil the Electoral Princess, to whom he taught not only singing but composition. So it happened that when Hasse, with his wife Faustina, appeared on the scene in 1730, he found his old master, who had never forgiven his pupil's defection, in possession of the field. A great rivalry ensued, the public being divided between the two *maestri*, who themselves lost no opportunity of exchanging offices anything but friendly. The erratic Porpora, however,

did not by any means spend his whole time in the Saxon capital. Early in 1729 he had produced (or revived) 'Somiramide riconosciuta' at Venice, and in April of the same year had obtained leave of absence in order to go to London, there to undertake the direction of the opera-house established in opposition to that presided over by HANDEL (*q.v.*). The speculation was a failure, and both houses suffered serious losses. Porpora never was popular in England as a composer, and even the presence of Senesino among his company failed to ensure its success, until, during a sojourn in Dresden, he succeeded in engaging the great Farinelli, who appeared in London in 1734, with Senesino and Signora Cuzzoni, and saved the house. Porpora got his Dresden engagement cancelled in order to remain in London, but that he must have paid several visits to Venice is certain, as 'Mitridate' was written there in 1730, and 'Annibale' was produced there in 1731. It seems that he finally quitted England in 1737, at the end of Farinelli's third and last season in that country, and that he established himself again at Venice; for on the title-page of a MS. in the Conservatoire at Paris, dated 1744, he is described as director of the Ospedaleto school of music there. About 1745 he once more went to Vienna, this time in the suite of the Venetian ambassador, Correr. During a sojourn there of some years he published in 1754 a set of twelve sonatas for violin, with figured bass, one of his most esteemed compositions, of which he says in the dedicatory epistle that they are written 'in the diatonic, chromatic and enharmonic styles,' describing himself as now Kapellmeister to the King of Poland. At this time he became acquainted with the young Haydn, whom he helped with instruction and advice.

He returned to Naples, his native town, between 1755 and 1760. Gazzaniga, his pupil, in a biographical notice, says it was in 1759, and that in 1760 he succeeded Abos as maestro di cappella of the cathedral of Naples and of the Conservatorio di San Onofrio. In the same year his last opera, 'Camilla,' was re-presented, with no success. After that he wrote nothing but one or two pieces for the Church. He had outlived his reputation as a composer. His latest years were passed in extreme indigence, a fact hard to reconcile with that of his holding the double appointment named above, but one which is vouched for by contemporary writers and by Villarsosa, who says that he died of pleurisy in 1767: Gazzaniga affirms that his death was the result of an injury to his leg in 1766. Both may be true: it is at least certain that a subscription was raised among the musicians of the town to defray the expenses of the *maestro's* burial.

Besides six oratorios and numerous masses,

thirty-three operas of Porpora's are mentioned by Florimo and twenty-six are in the list of extant works in *Q.-L.* They may have been popular with singers as showing off what was possible in the way of execution, but he was devoid of dramatic genius in composition. Nothing can be more tedious than to read through an opera of his, where one conventional, florid air succeeds another, often with no change of key and with little change of time; here and there a stray chorus of the most meagre description. When not writing for the stage he achieved better things. His cantatas for a single voice, twelve of which were published in London in 1735, have merit and elevation of style, and the same is asserted of the sonatas, published at Vienna, for violin with bass. The 'six free fugues' for clavi-chord (first published by Clementi in his *Practical Harmony*, afterwards by Farrenc in the first number of the *Trésor des pianistes*) will repay attention. Specimens of his violin music will be found in Choron's *Principes*, David's *Hohe Schule* and Alard's *Maitres classiques*; and six Latin duets on the Passion (works of remarkable beauty) and some Solfeggi were edited by Nava and published by Breitkopf.

He was the greatest singing-master that ever lived. No singers, before or since, have sung like his pupils. This is made certain by the universal contemporary testimony as to their powers, by the music which was written for them and which they performed, and by the fact that such relics of a grand pure style of vocalisation as remain to us now, have been handed down in direct succession from these artists. He has left us no written account of his manner of teaching, and such *solfeggi* of his as we possess differ only from those of his contemporaries by being perhaps more exclusively directed than others are towards the development of *flexibility* in the vocal organ. In musical interest they are inferior to those of Scarlatti and Leo, and to some of those of Hasse. There is little difference between them and his songs, which are for the most part only so many *solfeggi*. The probability is that he had no peculiar method of his own, but that he was one of those artists whose grand secret lies in their own personality. To a profound knowledge of the human voice in its every peculiarity, and an intuitive sympathy with singers, he must have united that innate capacity of imposing his own will on others which is a form of genius. Powerful indeed must have been the influence that could keep a singer (as he is said to have kept Caffarelli) for five years to one sheet of exercises. And if we are inclined to think that when Caffarelli was dismissed with the words 'You may go, you are the greatest singer in Europe,' there must still have been a good deal for him to

learn which that sheet of exercises could not teach him, still, no *mechanical* difficulty then stood between him and the acquisition of these qualities; the instrument was perfect.

Lists of his works are to be found in *Q.-L.*, in Villarosa's notice of his life, and in those by Farrenc (*Trésor des pianistes*, i.), in *Fétis*, and in Florimo's *Cenno storico sulla scuola di Napoli*, 1869, pp. 376-80. F. A. M.

PORSILE, GIUSEPPE (b. Naples, c. 1672; d. Vienna, May 29, 1750), at first vice-maestro di cappella at Naples, then maestro di cappella to Charles III. at Barcelona until 1711; singing-master at the court of the Empress Amalia at Vienna, and composer to the Viennese Imperial court, 1720 to Apr. 1, 1740. He composed 12 oratorios, 6 operas, 13 serenades and festival plays, cantatas, canzonets, 5 partitas for 2 vlns., v'cl. and Bc., *Divertimento a 3*, and solo for flute and bass (*Riemann*; *Q.-L.*).

PORT, a term formerly in use in Scotland to denominate a 'Lesson,' or more properly a musical composition for an instrument, principally, it appears, the harp. 'Rory Dall's Port' (i.e. Blind Rory or Roderick's composition) is the best-known survival. It was a piece associated with the blind harper above-named, in the 17th century, but in more modern times adapted to Burns's song, 'Ae fond kiss and then we sever.'

There are several 'Ports' in the Straloch Lute MS., 1627, including 'Jean Lindsay's Port'; and the 17th-century Skene MS. has 'Port Ballangowne.' Tytler, the writer of a famous 18th-century *Dissertation on Scottish Music*, speaks of it as a particular type of composition, and says that 'every great family had its "Port" named after the family.' R. K.

PORTA, COSTANZO (b. Cremona, c. 1530; d. Padua, May 26, 1601), received his musical training under Adrian Willaert at Venice. He became a Minorite friar, when exactly we are not told. From 1552-64 he was choirmaster at Osimo, near Ancona. On Dec. 16, 1564, he was elected choirmaster to the Cappella Antoniana, the church of his Order, at Padua, the same church with which, in later days, Tartini's violin performances were associated. From a Paduan document, 'Arca del Santo,' Proske quotes two entries: one to the effect that at Whitsuntide 1565 Porta was permitted to go to Florence to direct the music at the General Chapter of the Minorite Order, another stating that, on account of his great reputation as a musician and his other virtues, he was assigned a servant. In 1567 he was called to be choirmaster of the cathedral of Ravenna, Proske says at the instance of the vicar-general of his Order, better known afterwards as Pope Sixtus V., and again at his instance in 1575 accepted a similar position at the Casa Santa of Loreto. We learn in 1585 that he had returned to Padua, but it is only in 1595 that he was definitely reappointed choirmaster to the

Basilica of St. Antony, in which position he remained till his death in 1601.

Porta was recognised as one of the most learned musicians of the time, versed in the deepest mysteries of canon and counterpoint. His countryman Francesco Arisio in *Cremona literata* designates him as 'musicorum omnium praeter invidiam princeps.' Padre Martini and Dr. Burney after him quote as an example of Porta's contrapuntal ingenuity his motet a 7, 'Diffusa est gratia,' in which four voices are in canon, two *per motum rectum* and two *per motum contrarium*. Leichtentritt¹ considers that this motet unites in a peculiar way the highest learning of the Netherlands with a fine Italian sense of euphony. Hawkins quotes from Artusi (*Delle imperfettioni della modern musica*, 1600) a motet a 4, 'Vobis datum est,' which may be equally well sung backwards upside down with change of clefs. Porta's general style Proske characterises as one of great seriousness and solidity. For an Italian he seems to have imbibed from his Flemish master, Willaert, almost too much of Flemish severity, while on the other hand Willaert himself, by his stay in Venice, and especially in his madrigals and villote, gained much of Italian softness and grace. Porta's first publications appeared contemporaneously with those of Lassus and Palestrina: in 1555 a First Book of Motets a 5 and a First Book of Madrigals a 4; in 1559 a First Book of Motets a 4 with one of Madrigals a 5. It may seem strange that a Minorite friar should occupy himself with madrigals as well as motets, but the madrigal was then the school for the motet, and Porta had also considerable distinction as a madrigalist. From the First Book of Motets a 4 Proske has reprinted three in 'Musica divina,' tom. ii. In 1566 Claudio Merulo da Correggio, himself a composer of merit, set up a music-printing press in Venice, and among his first publications in that year was a work by Porta bearing the title 'Quinque vocum Musica in Introitus Missarum quae in diebus Dominicis toto anno celebrantur iuxta ritum sanctae Romanae ecclesiae.' Merulo writes of Porta as 'his very dear friend, and one with few equals in his profession,' and apparently published this work for Porta on his own initiative, since it is described as 'nunc primum a Claudio Correggiato in lucem edita.' It was dedicated to the Chapter of St. Antony's Basilica, and consists of 37 contrapuntal settings of the plain-song Introits for the Sundays from the Roman Gradual. It was followed in 1588 by a similar series of Introits for the Saints' Days, 55 in number. In 1571 was published his First Book of Motets a 6, and in 1573 a Third Book of Madrigals a 5. No mention is made in *Q.-L.* of a Second Book of Madrigals a 5, which thus appears to be lost.

¹ *Geschichte der Motette*, p. 144.

While Porta was still at Ravenna in 1575, and before he left for his new appointment at Loreto, he was specially urged by the Archbishop, Cardinal Giulio Feltrio da Rovere, to compose some masses which should both have the merit of brevity and in which the text should be so declaimed as to be easily followed by the hearers. Porta was slow in complying with this request, and it was not till 1578 that he published his 'Missarum liber primus,' containing 7 a 4, 2 a 5 and 3 a 6, which he dedicated to the Archbishop. In the dedication he explains why he hesitated to attempt this task. 'I thought,' he writes, 'it behoved me rather to guard from an unjust oblivion the works which the great composers have left to posterity, so apt as they are to their purpose, so full of beauty, delight and charm.' All this is but the expression of an undue modesty by a Minorite friar, but inferences have been drawn from it which are not warranted by the language itself or by the circumstances of the case. Porta makes no reference to any express prohibition of the older masses by the Council of Trent or other ecclesiastical authority, as there was none such (see PALESTRINA), but there was a general movement of the time, and especially in the north of Italy, with some encouragement from ecclesiastical authority, in favour of the *Missae Brevis*, with the words clearly declaimed, particularly in the Gloria and Credo. Carlo Borromeo, the famous Archbishop of Milan, seems to have led the way in the encouragement of this movement by his commission to Vincenzo Ruffo sometime before 1570 to compose masses of this kind.¹ These masses of Ruffo were even expressly designated in later editions as 'Missae Borromeae.' Another distinguished composer, Marcantonio Ingegneri of Cremona, followed in the same direction by publishing in 1573 a book of masses 3 a 5 and 1 a 8,² all very short with the text syllabically declaimed. Porta, with his love for imitative polyphony, may have disliked the new style when carried out to an extreme as in Ruffo and Ingegneri, but there was also a middle way to be found, as in masses by Croce and Sponstone,³ and if there had been any prohibition by ecclesiastical authority of the longer very elaborate masses, there was all the more reason for composers like Porta to provide new compositions that would satisfy reasonable requirements.

His next published work in 1580 bears the title 'Liber quinquaginta duorum motetorum 4, 5, 6, 7 et 8 voc. nunc tandem in lucem prodeuntium.' These last words would also lead us to infer that in the opinion of his admirers Porta himself was never too eager in

the publication of his works. In 1583 Leonard Lechner published at Nuremberg a miscellaneous collection of motets ('*Harmoniae miscellae*'), including three by Porta, one of which, 'Oravi Dominum Deum' a 6, was reprinted by Dehn in his 'Sammlung älterer Musik,' 1837. In 1585 Porta dedicated to Pope Sixtus V. his Third Book of Motets a 6, which Proske specially singles out as showing Porta to be a master of real genius over and above his wonderful mastery of contrapuntal technique. One piece from this work, 'Ecce sacerdos magnus,' is given in the continuation of the '*Musica divina*.' One might imagine this motet to have been intended as an act of homage to Sixtus V., as Palestrina's Mass with the same title to Julius III. In the same year appeared his Fourth Book of Madrigals a 5, but they are described as 'novamente da Marsilio Christoffori raccolti.' Porta's name also appears frequently about this time in the miscellaneous madrigal collections got up by Venetian and other publishers under such titles as 'Li amorosi ardori,' 'I lieti amanti,' 'Sdegnosi ardori,' 'Madrigali pastorali,' etc. The collection entitled 'Sdegnosi ardori' is peculiar as consisting of 31 settings of the same lines, 'Ardo sì, ma non t'amo,' by about as many different composers. Porta's setting is reproduced in Kiesewetter's '*Schicksale des weltlichen Gesanges*,' 1844. He was also one of the contributors to the more famous collection 'Il trionfo di Dori,' 1592, and in this year, too, joined with Asola and other North Italian masters in the great tribute of homage to Palestrina as the acknowledged head of their profession by the dedication to him of their collective work, entitled '*Psalmodia vespertina cum cantico B. Virginis*.' On its title-page this work bears the inscription, 'ad celeberrimum ac praestantissimum in arte musica Coryphaeum D. Jo. Petrum Aloysium Praenestinum.' Posthumous publications of Porta's works are '*Hymnodia sacra totius per anni circulum*' a 4, 44 nos., 1602, and '*Psalmodia vespertina cum 4 canticis B.V.*' a 8, 1605. From this latter work Torchi, in '*L'arte musicale d'Italia*,' vol. i., has reprinted 'Lauda Deum tuum' a 8, and from other sources a 'Pater noster' a 6, and two madrigals a 4. Other works by Porta are in the older collections of Padre Martini and Paolucci, but mainly as illustrations of contrapuntal technique. J. R. M.

PORTA, ERCOLE (b. Bologna), organist at the college of S. Giovanni, Persicetto, 1609. He composed between 1600-26 3 books of sacred vocal compositions (*concerti*) with a 'Symphonie' for 2 instruments, and 3 or more books of secular songs. Neither titles nor number of these, as given by Riemann, Q.-L., Mendel and Fétis, agree, thus making their actual number doubtful. The 'Vaghe ghir-

¹ See extracts from Ruffo's masses in Torchi, *L'arte musicale d'Italia*, vol. i.

² One of these masses bears the title 'Susanne un jour,' and another 'Graziato di vida,' and would thus seem to be based on works of Orlando Lasso.

³ See masses by Croce published by Ruffo, and one by Sponstone in Torchi, *L'arte musicale d'Italia*, vol. ii.

landa' contains a sonata for violin, cornetto and 2 trombones. E. v. d. s.

PORTA, FRANCESCO DELLA (b. Monza, c. 1590; d. Milan, Jan. 1666), organist and church composer. The date of his birth is conjectured from his having published in 1619 a collection of 'Villanelle a 1, 2, e 3 voci, accomodate per qualsivoglio stromento' (Rome, Robletti). This fact seems to confute Fétis and Mendel, who place his birth in the beginning of the 17th century. His master was Ripalta, organist of Monza, and he became organist and maestro di cappella of more than one church in Milan. He published *Salmi da cappella* (1657), motets (1645, 1648, 1651), *riercari*, etc., and was one of the first composers to make practical use of the basso continuo. F. G.

PORTA, GIOVANNI (b. Venice, c. 1690; d. Munich, Sept. 1755), was in London from 1720-36, where he produced several operas. Burney, who praises his work, says that he was long in the service of Cardinal Ottoboni. From 1737 to his death he was court Kapellmeister at Munich. He composed 32 operas and a considerable number of masses; also other church music (*Riemann; Q.-L.*).

PORTAMENTO (Fr. *port de voix*), a gradual 'carrying of the sound or voice with extreme smoothness from one note to another,' which can only be really executed by the voice or by a bowed instrument, though the trombone alone among brass instruments can be used in this way to a limited extent. It is of frequent occurrence as a musical direction in vocal music or in that for stringed instruments, and also appears in music for keyed instruments. In old music one of the *agréments* (see ORNAMENTS) was so called. (See SHIFT.) M.

PORTATIVE ORGAN, see POSITIVE ORGAN.

PORT DE VOIX, an *agrement* of the French school. The term is also sometimes used to denote the *Coulé*. (See ORNAMENTS.)

PORTER, (1) SAMUEL (b. Norwich, 1733; d. Canterbury, Dec. 11, 1810), was a chorister at St. Paul's Cathedral, and a pupil of Dr. Greene. In 1757 he was elected organist of Canterbury Cathedral. In 1803 he resigned in favour of Highmore Skeats, organist of Salisbury Cathedral. He was buried in the cloisters at Canterbury. A volume of his 'Cathedral Music,' containing two services, five anthems, a Sanctus, Kyrie, suffrages and nine chants, with his portrait on the title, was published by his son, (2) Rev. WILLIAM JAMES PORTER, head master of the College School, Worcester, who also published two anthems and four chants of his own composition, on the title-page of which he is described as 'of the King's School, Canterbury.' W. H. H.

PORTER, WALTER (b. circa 1595; d. Nov., 1659), 'an English pupil of Monteverdi,'¹ son

of Henry Porter, Mus.B. Oxon. 1600, was sworn gentleman of the Chapel Royal without pay, Jan. 5, 1616, 'for the next place that should fall void by the death of any tenor'; a contingency which happened on Jan. 27, 1617, in the person of Peter Wright, and Porter was sworn in his place on Feb. 1. In 1632 he published

¹ Madrigales and Ayres of two, three, four and five voices, with the continued bass, with Toccatos, Sinfonias and Ritornelles to them after the manner of Consort Musique. To be performed with the Harpsichord, Lutes, Theorboes, Bass-Viols, two Viols or two Viola.

This book is somewhat similar in character to that of Martin PEERSON (*q.v.*), and like Peer-son Porter stands between the madrigalists and the Restoration composers. But he has an individual style of his own, and a special feature of it is the use of rapidly reiterated notes upon a single syllable of the words. This device he undoubtedly borrowed from Monteverdi, whose pupil he was. Porter explains the purpose of it in his 'address to the practitioner' at the beginning of the volume: 'In the Songs which are set forth with Division where you find many Notes in a place after this manner  in rule or space they are set to express the Trillo' (see ORNAMENTS, VOCAL). The following is an example of this in Porter's work:

The only known copy of this book was formerly in the Christie-Miller collection at Burnham Court and is now in the British Museum.

Both Hawkins and Burney mention a collection bearing the title of

¹ Ayres and Madrigals for two, three, four and five voices, with a thorough bass for the organ or Theorbo Lute, the Italian way.

dated 1639, which may probably have been a second edition of the same work. In 1639 Porter was appointed master of the choristers of Westminster Abbey. After losing both his places on the suppression of the choral service in 1644, he found a patron in Sir Edward Spencer. In 1657 he published

¹ Motets of Two Voices for Treble or Tenor and Bass; with the Continued Bass or Score. To be performed to an Organ, Harpsichord, Lute or Bass-Viol.

Porter was buried at St. Margaret's Church, Westminster, Nov. 30, 1659. His 'Divine Hymns,' advertised by Playford in 1664, was perhaps identical with 'The Psalms of George Sandys set to Music for two Voices with a Thorough-bass for the Organ,' which was published about 1671.

W. H. H.; with addns. E. H. F.

PORTIMARO, FRANCESCO (b. Padua). In 1560 he was master of the academy at Padua; in 1568 he was in the service of Cardinal Luigi

¹ So described by Arkwright in an interesting account of Porter in *Mus. Ant.* iv. 258.

d' Este. He composed 3 books of motets, and 3 books of madrigals and 'Vergini' (Q.-L.).

PORTMAN, RICHARD (d. Nov. 1659¹), English organist and composer, chiefly of church music. A pupil of Orlando Gibbons, he succeeded Thomas Day as organist of Westminster Abbey in 1633. He was still organist there in 1648 (*Westminster Abbey Records*), and Anthony Wood says he was buried in the Abbey cloisters. When, in 1644, the Protectorate Government suppressed all choral services, Portman became a teacher, and Playford, in a list of the principal London teachers during the Commonwealth, puts Portman first among those 'for Organ or Virginal.' A petition to Cromwell's Council of State, dated Feb. 29, 1656, refers to Portman as 'recently deceased' (Davey, *Hist. Eng. Mus.*). In 1645 Portman published a book of meditations under the title:

'The Soules Life, exercising itself in the sweet Fields of Divine Meditation, collected for the comfort thereof, in these sad days of distraction.'

This was reissued by Playford in 1660, with some alterations and additions. A saraband for harpsichord by Portman is in Ch. Ch. 1177. His anthem, 'How many hired servants,' is from his 'Dialogue of the Prodigal Son,' a miniature cantata with solos by the prodigal, his father and the elder son, and two sections for chorus.

SERVICES

Whole Service (T.D.; B.; K.; C.; M.; N.D.). Ch. Ch. 1002. Score. Ch. Ch. 1012. Bass part only.
Service in G maj. (V. T.D.; B.; K.; C.; M.; N.D.); PH.; Yk.; Harl. 737/142b. Score.
Evening Service (M.; N.D.). Ch. Ch. 440. Tenor part only.

ANTHEMS

Behold, how good and joyful. Durh.; B.M. Add. MSS. 30,478-9. Tenor cantoris part only.
How many hired servants. Harl. 6346/43. Words only.
I will always give thanks. Durh.; B.M. Add. MSS. 30,478-9. Tenor cantoris part only.
Lord, who shall dwell. PH.; R.C.M. 1061. Bassus decani part only.
Most gracious God. Harl. 6346/77. Words only.
O God, my heart is ready. PH.
O God, wherefore art Thou a' sent. Harl. 6346/85. Words only.
O Lamb of God. Harl. 6346/16. Words only.
O Lord God of my salvation. Harl. 6346/42. Words only.
O sing unto the Lord. Harl. 6346/86. Words only.
Rejoice in the Lord. Tenb. OB/476; R.C.M. Ia. 1; Ch. Ch. 49. Score.
Save me, O God. Durh.; B.M. Add. MSS. 30,478-9. Tenor cantoris part only.
The Heavens declare the glory of God. Tenb. OB/477; Harl. 6346/71b. Words only.

Q.-L. refers to an anthem and a service in Ely Cathedral, and to an anthem in Gloucester Cathedral.

J. M.²
PORTUGAL (PORTUGALLO), (1) MARCOS ANTONIO DA FONSECA (b. Lisbon, Mar. 24, 1762; d. Rio de Janeiro, Feb. 7, 1830), Portuguese operatic composer. His real name was MARCOS ANTONIO, son of Manuel Antonio da Ascensão (or Assumpção). He adopted the high-sounding 'da Fonseca Portugal' in 1785, at the time of his first appointment, taking the name from a Captain José Correia da Fonseca Portugal who had befriended his parents. He was educated at the Seminário Patriarcal at Lisbon, and had music lessons from João de Sousa Carvalho. There is no trace of the teacher 'Orao,' who is said to have taught him

counterpoint; and the Italian singer Borselli, who is said to have given him singing lessons, may have been BERSELLI (q.v.). There is no evidence, either, that he was ever accompanist at the opera in Madrid, or that the Portuguese Ambassador there sent him to Italy in 1787. On his election to the brotherhood of S. Cecilia at Lisbon in 1783, he is described as plain Marcos Antonio, cantor and organist at the Patriarcal Seminary, where he had been to school. The new name first appears in 1785, with his appointment as conductor at the Salitre Theatre; in July 1787 he was at Lisbon, where he produced a 'Licença pastoril' (MS. score, Bibl. da Ajuda, Lisbon) for the birthday of the Princess D. Maria Benedicta; and between 1785 and 1792 he produced five Portuguese comic operas which brought him great popularity, especially 'A Castanheira' (The Chestnut-seller). He also contributed popular drawing-room airs to the *Journal de Modinhas*, founded in 1790. In 1792 he went to Naples. 'L' Eroce cinese' was produced at Florence in 1793, and he composed opera after opera with great success at Parma, Rome, Venice and Milan. One of the most successful was 'La confusione nata dalla somiglianza, ossia i Gobbi,' produced in Italian at Dresden in 1793, also performed in German. 'Demofonte' was performed in 1794 at Milan, and 'La vedova raggiratrice' in Florence. In 1796 he went back to Italy, where his 'Zulema' (Florence), 'L' inganno poco dura' (Naples) and 'La donna di genio volubile' (Venice) were played with success. In 1797 his 'Ritorno di Serse' was given at Florence, and two farces at Venice; the opera 'Fernando nel Messico,' written for Mrs. Billington and performed at Rome in 1798, was described by Fétis as the composer's *chef-d'œuvre*. Two more operas, 'Alceste' and 'Le nozze di Figaro,' were played at Venice in 1799. He returned in 1800 to Portugal, where he became director of the San Carlos theatre and maestro di cappella to the King. In the autumn of 1800 his 'Adrasto' was played at the San Carlos theatre, and 'La Monte di Semiramide' in 1801; 'Zaira' and 'Il trionfo di Clelia' in 1802; 'Sofonisba,' at Catalan's benefit, and a revised version of the 'Ritorno di Serse' in 1803; 'L' oro non compra amore' in 1804, and many others followed until the French invasion in 1807. The court fled to Brazil, but Marcos Portugal remained at Lisbon, directing the San Carlos theatre, rewriting 'Demofonte,' and composing a new opera, 'La speranza,' the finale of which was adopted as the national hymn until 1834. In 1810 he went with his brother Simão to Brazil, and resumed his court functions. In 1811 he had an apoplectic fit, and a second one in 1817. He was unable to return to Lisbon with the court in 1821, though he lived on until 1830.

¹ West's Cath. Org.

In a list of his works, begun in 1809 and afterwards kept up to date, Marcos Portugal enumerates 35 Italian operas, 21 Portuguese comic operas (mainly in one act) and over 100 pieces of church music. Of these 8 operas and the 'Licença pastoril' are preserved in the Ajuda Palace Library, Lisbon, together with 19 MS. scores of sacred music (see *Q.-L.*). There is a copy of his 'Semiramide' in the Bibl. Nac., Lisbon; also an Italian oratorio on the Immaculate Conception. The library at Mafra possesses folio choir-books with unaccompanied church music for male voices. The most recent authority on the composer is the late Manuel CARVALHAES, whose collection of over 500 libretti shows how widely popular were the operas of Marcos Portugal in all parts of Europe.

Portogallo was not unknown in London. His 'Fernando nel Messico' was played at Mrs. Billington's benefit, Mar. 31, 1803; his 'Argenide e Serse,' Jan. 25, 1806; 'Semiramide,' Dec. 13, 1806; 'La morte di Mitridate' at Catalani's benefit, Apr. 16, 1807; and 'Barseni, Regina di Lidia,' June 3, 1815, 'Il Principe Spazzacammino,' 'Artaserse' and 'L'astuta, ossia La Vedova raggiratrice' were given in Russian at St. Petersburg. His brother, (2) SMÃO, wrote for the church.

G.; rev. with addns. J. B. T.

POSAUNE, the German name for the TROMBONE (*q.v.*), also occasionally used for organ reed-stops of a like character. W. H. S.

POSCH, ISAAC (*d.* in or before 1623), organist at Laibach in 1618. He composed 'Harmonia concertans,' sacred songs 1-4 v. (1623 ed. by Widow); 1 book of instrumental suites in 4 parts and 1 book in 5 parts (3 movements: Gaillard or Courant, Dance, 'Propertio'). In 1626 they appeared combined as 'Musicalische Ehren- und Tafelfreuden' (*Q.-L.*).

POSITIONS (or SHIFTS). (1) In the case of all instruments of the violin family the term is applied to the places on the finger-board occupied by the left hand, and the spaces which the fingers will cover in each place. Thus in the case of the violin the 1st position covers a perfect 5th on each string, the lowest note being given by the open string, the highest being a 5th above it stopped by the little finger. All other positions comprise normally 1 a 4th, since their lowest note is that stopped by the 1st finger. They ascend according to the position of the 1st finger on the string. Thus on the G string of the violin the 2nd position begins with the 1st finger on B, the 3rd with it on C, the 4th with it on D, and so on. For the technique of the positions see FINGERING (VIOLIN, etc.); for the history see SHIFT.

(2) The term is also used to indicate the

¹ Besides the natural compass of a position, notes which really lie beyond it are frequently reached by extension of the fingers, without the hand leaving its position.

various degrees of extension of the trombone slide. When the slide is home or closed it is said to be in the 1st position, and as it is extended to flatten the pitch from one to six semitones, it is described as being in corresponding positions. (See TROMBONE.) D. J. B.

POSITIVE ORGAN (Fr. *positif*; Ger. *Positiv*), originally a stationary organ, as opposed to a *portative* or portable instrument used in processions. Hence the term 'positive' came to signify a 'chamber organ'; and later still, when in a church instrument a separate manual was set aside for the accompaniment of the choir, this also was called a 'positive,' owing, no doubt, to the fact that it generally had much the same delicate voicing as a chamber organ, and contained about the same number and disposition of stops. By old English authors the term is generally applied to a chamber organ, the 'positive' of our church instruments being called from its functions the 'choir organ.' When placed behind the player (Ger. *Rückpositiv*) it was often styled a 'chair organ,' but it is difficult to say whether this name arose from a play upon the terms 'choir' and 'chair,' or from a misunderstanding as to the origin of its distinctive title. With the French the 'clavier de positif' is our 'Choir manual.' Small portable organs were called REGALS (*q.v.*). J. S.

In modern days the name has been applied to an organ designed by Thomas Casson to meet the requirements of country and mission churches. The Positive Organ Company, Ltd., was formed to manufacture instruments on the principles of Casson. The earlier and smaller instruments of this Company have a compass from F (6 ft.) to *f'''*. A pedal effect is obtained in very accurate form by the 'Double Bass' stop on the keyboard, from F to *c'*, by which only the lowest note struck is sounded. The effect of a second manual is obtained by the 'Melodic' stop, which, on the selected stop, sounds only the highest note struck, and if used with a softer stop played in harmony, asserts the melody. A transposing arrangement is also provided. T. E.

POSSENTI, PELLEGRINO, an early 17th-century Italian who composed 2 books of madrigals, canzonets and arie (1st book, 1623, republ. 1628; 2nd book, 1625), *Concentus armonici, instrumental sonatas*, 7 a 2, 9 a 3, 2 a 4 parts (1628) (*Riemann*; *Q.-L.*).

POSTANS, MISS, see SHAW, MRS. ALFRED.

POSTHORN, a small straight brass or copper instrument, varying in length from two to four feet. As now made, the bore usually resembles that of the cornet, but formerly the larger post- or mail-horns were of the bugle type of bore. The mouthpiece for the longer instrument is the same as for the bugle or cornet, but for the short higher-pitched horns the cup requires to be small and shallow. Originally

intended as a signal for stage-coaches carrying mails, it has to a limited extent been adopted into light music for the production of occasional effects by exceptional players.

Its pitch varies according to length from the four-foot C to its two-foot octave. The scale consists of the ordinary open notes, beginning with the first harmonic. The fundamental sound cannot easily be obtained with the mouthpiece used. Five, or at most six, sounds, forming a common chord, are available, but no means exist for bridging over the gaps between them. In a four-foot instrument such as was commonly used by mail-guards, the sequence would be as follows—

W. H. S.; addns. D. J. B.

POSTILLON DE LONGJUMEAU, LE, opéra-comique in 3 acts; words by De Leuven and Brunswick, music by A. Adam. Produced Opéra-Comique, Paris, Oct. 13, 1836; London (Grecian Theatre, City Road), during T. Rouse's opera seasons, 1840 *et seq.* G.

POSTILLONS, 'Symfonie allegro Postillons' is Handel's autograph inscription to the piece of orchestral music which precedes the entry of the Wise Men in 'Belshazzar,' and begins as follows:

It is written for the strings, with oboes in unison; no horn is employed; some of the later passages resemble those which can be played on the ordinary posthorn; but there is nothing to say whether this was the origin of the indication, or whether it refers to the haste in which the Wise Men may be supposed to have arrived, or contains some allusion now lost.

Bach, in his Capriccio describing the departure of his brother, has introduced an 'Aria di postiglione' and a 'Fuga all' imitazione delle cornette di Postiglione.' G.

POSTLUDE, a piece played after service, an outgoing VOLUNTARY (q.v.). G.

POTHIER, DOM JOSEPH, abbot of St. Wandrille (b. Bouzémont, near St. Dié, Loire-et-Cher, Dec. 7, 1835; d. Conques, Belgium, Sept. 8, 1923). In 1859 he entered the Benedictine Order at the abbey of Solesmes, where in 1862 he became sub-prior, and in 1866 professor of theology. In 1893 he was appointed prior of Ligugé (Vienne), in 1895 prior of St. Wandrille (Seine-Inférieure), and

in 1898 abbot of the last-named monastery, subsequently removed temporarily by the expulsion of the religious orders from France to Belgium.

Dom Pothier was one of the pioneers of the movement initiated at Solesmes under Dom Guéranger for the study and reform of plain-song, and his first important work, *Les Mélodies grégoriennes* (Tournai, 1880), became the recognised textbook on the subject. It was reprinted in 1881 and 1890, and has been translated into German by Dom A. Kienle (1881), and into Italian by Dom M. Serafini (1890). This work was followed by a 'Liber Gradualis' (Tournai, 1883; Solesmes, 1895); 'Hymni de tempore et de Sanctis' (Solesmes, 1885); 'Processionale monasticum' (Solesmes, 1888, 1893); 'Liber Antiphonarius' (*ib.*, 1891); 'Liber Responsorialis' (*ib.*, 1895); 'Variæ Preces de mysteriis et festis' (*ib.*, 1888, 1889, 1892, 1897, 1901) and 'Cantus Mariales' (Paris, 1903, 1906). In addition to these important works Dom Pothier edited many detached examples of plain-song, and published monthly from 1892, in the *Revue du chant grégorien*, numerous articles on liturgical music. Under his direction was started at Solesmes, in 1889, the valuable series of re-productions, etc., of musical manuscripts of the 9th to the 16th centuries, issued as *Paléographie musicale*, and carried on by his most eminent pupil and successor, Dom André Mocquereau (q.v.), prior of Solesmes. In 1904 Dom Pothier was appointed by Pius X. president of the Commission for editing and publishing the musical portions of the Roman liturgy. Further details of the origin of the Solesmes movement for the restoration of plain-song will be found in the *Rassegna Gregoriana* for Apr. 1904, which also contains a portrait of Dom Pothier. (See also SOLESMES.)

W. B. S.

POT-POURRI, a name first given by J. B. Cramer to a kind of drawing-room composition consisting of a string of well-known airs from some particular opera, or even of national or other familiar tunes having no association with each other. These were connected by a few showy passages, or sometimes by short variations on the different themes. The pot-pourri is a less ambitious form of composition than the (modern) fantasia, as there is little or no working-out of the subjects taken, and very little 'fancy' is required in its production. Peters's Catalogue contains thirty-eight by V. Felix and sixty-four by Ollivier, on all the chief operas. Chopin, in a letter, calls his op. 13 a 'Pot-pourri' on Polish airs. The pot-pourri has been invaded by the 'transcription,' which closely resembles it in form although taking only one subject, as a rule, instead of many. 'Olla podrida' was another name for the same sort of production. M.

POTT, AUGUST (b. Nordheim, Hanover, Nov. 7, 1806; d. Graz, Aug. 27, 1883). His father was Stadtmusikus of Nordheim. He adopted the violin as his instrument, and shortly after Spohr's appointment to be Hofkapellmeister at Cassel, went there as his pupil, and there made his first public appearance in 1824. He occupied the next few years in travelling through Denmark and Germany. In 1832 he was appointed Konzertmeister to the Duke of Oldenburg, and afterwards advanced to the post of Kapellmeister at the same court. This he resigned in 1861, and went to live at Graz. In 1838 he visited England, and played Lipinski's Concerto in B minor at the Philharmonic on May 21 with great applause. The critic of the *Musical World* speaks with enthusiasm of the extraordinary power of his tone, his great execution and the purity of his style. He published two concertos, and various smaller pieces for the violin with and without orchestra. g.

POTTER, PHILIP CIPRIANI¹ HAMBLY (HAMBLEY) (b. London, Oct. 2, 1792; d. Sept. 28,² 1871), composer and pianist, began his musical education at the age of 7, under his father, a teacher of the pianoforte. He afterwards studied counterpoint under Attwood and theory under Callcott and Crotch, and on Woelfl's arrival in England received instruction from him during five years.

In 1816 an overture by Potter was commissioned and performed (Mar. 11) by the PHILHARMONIC SOCIETY (*q.v.*), of which he had been an associate from its foundation in 1813, and a member from the date of his attaining his majority. On Apr. 29 of the same year he made his first public appearance as a performer at the Society's concert, and played the pianoforte part in a set of his own composition for pianoforte and stringed instruments. He again performed Mar. 10, 1817. Shortly after this he went to Vienna and studied composition under Aloys Förster, receiving also friendly advice from Beethoven. Writing to Ries in London on Mar. 5, 1818, the great man says: 'Potter has visited me several times: he seems to be a good man and has talent for composition.' After visiting other German towns he made a tour in Italy, and returned to London in 1821, when he performed Mozart's concerto in D minor at the Philharmonic (Mar. 12). In 1822 he was appointed professor of the pianoforte at the R.A.M., and on the resignation of Crotch in June 1832, succeeded him as principal. The latter office he resigned in 1859 in favour of Charles Lucas. He was conductor of the Madrigal Society, 1856-70, and treasurer of the Society of British Musicians, 1858-65.

Potter's published works extend to op. 29, and include 2 sonatas, 9 rondos, 2 toccatas,

6 sets of variations, waltzes, a polonaise, a large number of improprios, fantasias, romances, amusements, etc., and 2 books of studies³ composed for the R.A.M.—all for PF. solo. Also a 'Duet Symphony' in D, and 4 other duets, besides arrangements of two of his symphonies and an overture, all for four hands; a fantasia and fugue for 2 PFs.; a trio for 3 players on the PF.; a sextet for PF. and instruments; a duo for PF. and vln.; a sonata for PF. and horn; 3 trios, etc. etc.

His MS. works comprise nine symphonies for full orchestra, of which six are in the Philharmonic Library; 4 overtures (three ditto); 3 concertos, PF. and orch. (ditto); a concertante, PF. and violoncello; a cantata, 'Medora e Corrado'; an Ode to Harmony; additional accompaniments to 'Acis and Galatea' (for the production on the stage of the Queen's Theatre in 1831), and many other pieces of more or less importance. These compositions, though well received,⁴ and many of them in their time much in vogue, are now forgotten, except the studies. Wagner's favourable opinion deserves record. When Wagner conducted the Philharmonic Society in 1855, the care which he bestowed on one of Potter's works gave great delight to the composer.

As a performer he ranked high, and he had the honour to introduce Beethoven's concertos in C, C minor and G to the English public at the Philharmonic. He played the C minor concerto on Mar. 8, 1824, and the G major in 1825. As a conductor he is most highly spoken of, and it may be worth mentioning that he beat time with his hand and not with a baton. His fresh and genial spirit, and the eagerness with which he welcomed and tried new music from whatever quarter, will not be forgotten by those who had the pleasure and profit of his acquaintance. One of the last occasions on which he was seen in public was assisting in the accompaniment of Brahms's Requiem at its first (private) performance in London, July 10, 1871. He contributed a few papers to periodicals—*Recollections of Beethoven*, to the *Musical World*, Apr. 29, 1836 (reprinted in *Mus. T.*, Dec. 1, 1861); *Companion to the Orchestra*, or *Hints on Instrumentation*, *Musical World*, Oct. 28, Dec. 23, 1836, Mar. 10, May 12, 1837. Potter edited the 'Complete Pianoforte Works of Mozart' for Novello; and Schumann's 'Album für die Jugend' (op. 68) for Wessel & Co. in 1857.

In 1860 a subscription was raised and an exhibition founded at the R.A.M. in honour of Potter. It is called after him, and entitles the

³ Analysed by W. H. Holmes in *Notes upon Notes* (1880). The studies are twenty-four in number, and are arranged for a key and its relative minor—No. 1, C major; 2, A minor; 3, D♭ major; 4, B♭ minor, etc.

⁴ The symphonies were played at the Philharmonic as follows: In —, May 29, 1826, June 8, 1836; in A, May 27, 1833; in G minor, May 19, 1834, May 28, 1866; in D, Mar. 21, 1836, Apr. 22, 1840, May 8, 1868.

¹ He derived this name from his godmother, a sister of G. B. Cipriani the painter.

² *Annual Register*.

holder to one year's instruction in the R.A.M. A panegyric on Cipriani Potter was pronounced by Sir G. A. Macfarren at the Musical Association. (See *Proc. of the Mus. Assoc.*, 1883-84, p. 41.) He was buried in Kensal Green Cemetery.

W. H. H., with addns.

POUGIN, ARTHUR (b. Châteauroux, Aug. 6, 1834; d. Paris, Aug. 8, 1921), registered at Châteauroux as François Auguste Arthur Paroisse-Pougin, eminent writer on musical subjects. As the son of an itinerant actor he had few educational advantages, and his literary attainments were therefore due to his own exertions alone; his knowledge of music was partly obtained at the Paris Conservatoire, where he passed through the violin class of Alard and studied harmony with Henri Reber. From the age of 13 he played the violin at a theatre, and in 1855 became conductor of the Théâtre Beaumarchais, which, however, he soon quitted for Musard's orchestra. From 1856-59 he was vice-conductor and *répétiteur* (or conductor of rehearsals) at the Folies Nouvelles.

Pougin soon turned his attention to musical literature, beginning with biographical articles on French musicians of the 18th century in the *Revue et Gazette musicale*. At an early period of his career he gave up teaching, and resigned his post among the violins at the Opéra-Comique (1860-63) in order the better to carry out his literary projects. Besides his frequent contributions to *Le Ménestrel*, *La France musicale*, *L'Art musical*, *Le Théâtre, Chronique musicale*, etc., and other periodicals specially devoted to music, he edited the musical articles in the *Dictionnaire universel* of Larousse, and was successively musical feuilletoniste to the *Soir*, the *Tribune*, *L'Événement*, and, from 1878, to the *Journal Officiel*, where he succeeded Eugène Gautier. In 1885 he became chief editor of *Le Ménestrel*.

Among his numerous works the following may be specified:

André Campra (1861); *Grénetzky and Desdés* (1862); *Floquet* (1863); *Martini and Denon* (1864); *the six monographies collected as Musiciens français du XVIII^e siècle*, *Mayerbeer, notes biographiques* (1864, 12mo); *P. Halévy, souvenirs* (1865, 8vo); *W. Vincent Wallace, étude biographique et critique* (1866, 8vo); *Baldini, sa vie, ses œuvres* (1868, 12mo); *Albert Grisar, étude artistique* (1870, 12mo); *Rossini, notes, impressions, etc.* (1871, 8vo); *Auber* (1872); *Bedolius, sa vie, etc.* (1875, 12mo); *Figures d'opéra-comique: Elénor; Mme. Ducrest; Le Tribu de Gaudouan* (1875, 8vo); *Rameau, sa vie et ses œuvres* (1876, 10mo); *Adolphe Adam, sa vie, etc.* (1876, 12mo); *Les Vrais Orchestres de l'opéra français: Perrin et Combet* (1881); *Maître et l'Opéra-Comique* (1882); *Victor* (1886); *L'Opéra-Comique pendant la Révolution* (1891); *Méhuil, sa vie, son génie, son caractère* (1898, 1899); *Essai historique sur la musique en Russie* (1897, 1901); *J.-J. Rousseau, musicien* (1901); *Le Comité français de la Révolution* (1902); *Monod* (1903); *Henri* (1908); *Marie Mailbran* (1911); *Mme. Pasani* (1912); *Giuseppina Grassini; La Violon, les violoncelles et la musique de violon du XVI^e au XVIII^e siècle* (posthumous) (1920, 1924).

His most important work, the *Life of Verdi*, was published first in Italian (A. Formis) in 1881, and translated by J. E. Matthew, 1887; the *Supplément et Complément* to the *Biographie universelle des musiciens* of Fétis, a work of great extent and industry, and containing a mass of new names and information (2 vols. 8vo, Paris), 1878-80; and the new edition of

Clément and Larousse's *Dictionnaire lyrique*, 1897. In 1905 he was decorated with the order of the Crown of Italy. On his death his extensive private library was acquired for the University of Rochester, N.Y. (See *LIBRARIES.*)

G. C.

POULENC, FRANCIS (b. Paris, Jan. 7, 1899), composer, was a member of the group known as the 'Six.' His parents insisting on a classical education, he could devote comparatively little time to music during his youth and student days, but he nevertheless contrived to take piano lessons from Ricardo Viñes and to pick up some technical knowledge of composition here and there. Early in 1918 military service claimed him, and a regular musical training could no longer be thought of. Meanwhile Poulenc had already begun to compose, and from the first his music revealed traces of originality under its raw technique. In 1917 the 'Rhapsodie nègre' for piano, string quartet, flute, clarinet and voice was written, and in 1918 followed the 'Mouvements perpétuels' for piano, and two sonatas, for piano duet and two clarinets respectively.

Francis Poulenc, who was to some extent influenced by Erik Satie, at once began to show a strong tendency to oppose what seemed to him the excessive sensitiveness and refinement of the French 'impressionist' school that immediately precedes his generation. The reaction, in which his colleagues of the 'Six' all shared to a greater or less extent, led to a careful avoidance of anything savouring in the least of romantic sentiment and poetic delicacy. The result was music characterised by a love of plain statement and a frankness of humour sometimes bordering on pretension and vulgarity, but often not without a certain youthful charm. The preference for the circus and the fair to more elevated subjects need not necessarily be regarded as an affectation; as a protest against romanticism it is perfectly understandable, and attempts to utilise the forms and rhythms of comic songs and popular dance music have been productive of at least a new flavour in the art. In the way of orchestration Poulenc has certainly learnt much from the often fortuitous instrumental combinations found in the ball-rooms and the music-halls frequented by the Parisian populace. The accompaniment of the 'Cocardes' (songs for two male voices to poems by Jean Cocteau), for instance, is scored for violin, cornet, trombone, bass drum and triangle. This work, like the setting of some poems from *Le Bestiaire* by Guillaume Apollinaire, for voice, string quartet, flute, clarinet and bassoon, dates from 1919.

The years 1920-21 saw the production of four works for piano (Impromptus, Suite, Napoli and Promenades), 'Quatre Poèmes de Max Jacob' for tenor, flute, oboe, clarinet,

bassoon and trumpet, and the *comédie-bouffe* in one act, 'Le Gendarme incompis.' These last two works point to a return to the style of the *opera buffa*.

Poulenc shares the predilection for wind instruments evinced by so many modern composers, and takes an active part in their endeavour to enrich the repertory of chamber music for various wind combinations. E. B.

LIST OF WORKS

1. 'Rapsodie nègre' for FF., str. quartet, flute, clarinet and voices. 1917.
2. Sonata for FF. 4 hands. 1918.
3. Sonata for 2 clarinets. 1918.
4. 'Mouvements perpétuels' for FF. 1918.
5. 'Le Bestiaire, ou le Cortège d'Orphée (Apollinaire)' for voice, str. quartet, flute, clarinet and bassoon. 1919.
6. 'Cocarde' (three poems by Jean Cocteau) for tenor, clarinet, cornet, trombone, bass drum and triangle. 1919.
7. Suite for FF. 1920.
8. Impromptus for FF. 1920. (Revised version 1924.)
9. 'Le Gendarme incompis' comédie-bouffe. 1920 (MS.).
10. Promenades for FF. 1921.
11. Sonata for clarinet and bassoon. 1922.
12. Sonata for horn, trumpet and trombone. 1922.
13. 'Chanson à boire' for male voice choir. 1922.
14. 'Les Biches.' Ballet with chorus (produced in London as 'The House Party'). 1923.
15. 'Cinq Poèmes de Ronsard.' voice and FF. 1924.
16. Trio for FF., oboe and bassoon. 1924-26 (MS.).
17. Marches militaires (in 3 movements) for FF. and orch. 1925 (MS.).

POUPELINIÈRE (LA POPELINIÈRE), ALEXANDRE JEAN JOSEPH LE RICHE DE LA (b. Paris, 1892; d. there, Dec. 5, 1762), general farmer of taxes; a great musical enthusiast, and pupil of Rameau, who lived in his house for several years. He was also a patron of Johann Stamitz, and introduced horns, clarinets and the harp into his private orchestra, that being the first time of their appearing in any French orchestra. E. v. d. s.

POUSSÉ (Fr.). In violin music the word 'Poussé,' or its equivalent sign \vee , is employed to indicate that the note over which it is placed shall be begun with an upward course of the Bow (*g.v.*). O. R.

POWELL, JOHN (b. Richmond, Virginia, Sept. 6, 1882), American pianist and composer. Following his graduation from the University of Virginia in 1901, he studied in Vienna for some years: piano with Leschetizky and composition with Navrátil. His début as pianist was made in Berlin in Nov. 1907, with the Tonkünstler Orchestra; for several years he toured widely in Germany, France and England, and since 1913 he has played throughout the United States.

As composer Powell is best known for his effective use of negro themes. His compositions include:

- Concerto, B minor, piano/forte and orchestra, op. 13.
 Concerto, E, violin and orchestra, op. 23.
 'Rapsodie nègre,' piano/forte and orchestra.
 String Quartet, op. 19.
 'Sonata virginianesque,' violin and piano/forte, op. 27.
 Sonata, E, violin and piano/forte, op. 23.
 Piano/forte sonata, smaller piano/forte pieces and songs.

W. S. S.

POWELL, MAUD (b. Peru, Illinois, Aug. 22, 1868; d. Uniontown, Pa., Jan. 8, 1920), violinist. Four years' study with William Lewis of Chicago, and occasional concert appearances, developed her exceptional gifts as a violinist so rapidly that she was taken to

Leipzig, where she became a pupil of Professor Schrädick. At the end of a year (in 1881) she was awarded a diploma at the public examinations held in the Gewandhaus, and then proceeded to Paris, where—out of eighty applicants—she obtained one of the six vacancies in Charles Danclos's class. By the advice of Léonard she came to England in 1883, played at some London concerts and before the Royal Family, and toured in the provinces with Miss José Sherrington. While in London she met Joachim, who invited her to Berlin, where she became his pupil, and made her début in Germany at one of the Philharmonic Concerts in Berlin in 1885, playing Max Bruch's G minor concerto. In the same year she returned to New York and made her début at one of the Philharmonic Society's concerts, under the baton of Theodore Thomas. In 1892 she toured in Germany and Austria with the New York Arion Society, under the conductorship of Van der Stucken, and in 1893 appeared at the World's Exposition in Chicago. In 1894 she organised the Maud Powell String Quartet, with which she toured extensively through the States, and in 1898 again appeared in London, playing at the Philharmonic, the Saturday Popular Concerts and in the provinces. She also toured in Germany, Holland, Belgium, France, Austria, Russia and Denmark. In 1903 she was engaged by Sousa to accompany him on his European tour of thirty weeks, and in the spring of 1905-06 made forty appearances in South Africa with her own concert party, and subsequently undertook annual concert tours in her own country.

Arensky's violin concerto was introduced by her to an American audience, and under the personal supervision and inspiration of Dvořák, his violin concerto was played by her for the first time in America at the New York Philharmonic Society's concert. Other works which she introduced to concert audiences are: Saint-Saëns's concerto in C minor, Lalo's concerto in G major, and compositions by American composers.

STIEL.—LAKER, *Famous Violinists*, and contemporary journals.
 E. H. A.

POWELL, SAMUEL (d. Nov. 27, 1775), a Dublin printer of some note. At an early date in the history of Irish music-printing he issued some excellently printed musical works for the use of the French Huguenots who were then settled in Dublin. These include an edition of *Les Psaumes de David mis en vers français*, 1731, 8vo, and *Cantiques sacrez*, 1748, 12mo, both set up in movable music type. He was working, however, long before this date, as a well-printed edition of Allan Ramsay's poems, dated 1724, testifies. He lived in Crane Lane, but in 1762 removed into Dame Street. Most of his early works were published in conjunction with George Risk, a Dublin bookseller. F. K.

POWELL, THOMAS (b. London, 1776; d. (?) Edinburgh, after 1863), harpist, violinist and pianist; member of the Royal Society of Music. He married in 1811. He played a violin concerto at the Haymarket Theatre, London; resided as teacher in Dublin, afterwards in Edinburgh, and composed 15 violin concertos, 3 grand sonatas PF. and violin (1825), 3 duets for vln. and v'cl., 3 duets for 2 v'cls., overtures, etc. (Brown and Stratton; Fétis; Q.-L.).

POWELL, WALTER (b. Oxford, 1697; d. Nov. 6, 1744), was on July 1, 1704, admitted a chorister of Magdalen College. In 1714 he was appointed a clerk in the same college. On Apr. 16, 1718, he was elected Yeoman Bedell of Divinity, and on Jan. 26, 1732, Esquire Bedell of the same faculty. He was also a member of the choirs of Christ Church and St. John's Colleges. In July 1733 he sang in the oratorios given by Handel during his visit to Oxford, and later in the year at the meeting of the Three Choirs at Gloucester. He was sworn a gentleman of the Chapel Royal on July 28, 1733, vice Gostling. His voice (counter tenor) and singing were greatly admired. He was buried at St. Peter's-in-the-East, Oxford. W. H. H.; addns. W. H. G. F.

POWER, JAMES (b. Galway, 1766; d. Aug. 26, 1836), a music publisher, first of Dublin and afterwards of London. Being apprenticed to a pewterer, he was by chance called upon to repair the instruments of a regimental band passing through the town where he was working. This incident led him into the musical instrument trade; he set up shop with his brother William at 4 Westmorland Street, Dublin.

A happy idea of the publication of the national music of Ireland, united to words by celebrated poets, caused the brothers to apply to Thomas Moore, and it was ultimately arranged that Moore alone should provide the literary work. The design was to run a similar work to that being issued by George Thomson, of Edinburgh, who was then publishing, in parts, the 'Scottish Melodies,' to which Burns and other writers were supplying verses. The same style of printing, etc., with pictorial engravings was adopted, and the first two numbers were issued in 1808. The success of these parts of the 'Irish Melodies' was beyond expectation. (See MOORE.) Near the end of the year 1807 Power came to London, to 34 Strand, as a military instrument-maker and music-seller, his brother remaining at the Dublin address. After the seventh number of the 'Melodies' a quarrel arose between the brothers, James asserting that he had made an arrangement by which all succeeding numbers should be his own sole copyright, and at the publication of the eighth number, 1821, entered an action against his brother for infringement of copyright. It was decided in the favour of

James, who made an agreement (continued to his widow) that he should have the sole rights in all musical settings of verses by Moore then written and to be written. The ninth (1824) and the tenth (1834) numbers completed the 'Irish Melodies,' and besides these James Power issued Moore's 'Sacred Songs,' 'National Airs,' 'Evenings in Greece,' etc.

Power's other publications include collections of 'Scottish Melodies' by Horace Twiss, 'Indian Airs' arranged by C. E. Horn, 'Welsh Airs' collected by Clifton and Dovaston, and similar works, whose elegance in engraving, paper and binding had to compensate for the lack of other intrinsic qualities. The plates of, and copyright in, the 'Irish Melodies' passed to Addison and Hodson. The friendship of Moore for Power, and his extraordinary dependence on him for help in matters ranging from the purchase of fish to heavy overdrafts and loans, is sufficiently indicated in Moore's own diary, and is more fully set forth in the letters which passed between the two. (See *Letters of Thomas Moore to his Music-publisher James Power*, New York, 1854.) F. K.

POWER, LEONEL, an English musician who flourished in the 15th century, but of whose biography absolutely nothing is known. His name occurs in MSS. as Leonel, Leonell Polbero or Powero, Leonelle, Lyonel. Leonell Leonellus Anglicus and Lyonel Power. In Hothby's *Dialogus in arte musica* (Florence, Magliabecch., Cl. xix. Cod. 36) he is referred to as follows:

"Sic . . . in quamplurimis . . . alijs cantilenis recentissimis quarum conditores plerique adhuc vivunt Dunstable Anglicus lie. Duiay. leonel. pluntri. * frier. Busnoys. Morton. Otinghem. Pelagulfus. * Micheleth. * Bacluin. * Forest. Stane. Fich. Caron, * etc.

From this passage it would seem that he was a contemporary of Dunstable, and the style of the two composers seems to have had so much in common that their compositions are sometimes ascribed indiscriminately to one another in different MSS. Power is best known as the author of an English Treatise¹ preserved in a MS. (dating from about 1450), transcribed by John Wylde, precentor of the abbey of Waltham Cross. The text, which has been partly printed by both Burney and Hawkins, begins:

'This tretise in contrivd upon ye Gamme for hem yt wil be syngers or makers or tochers,' and is signed 'Q Lyonel Power.' It is followed by

'A littl tretise according to ye first tretise of ye sight of Decant, and also for ye sight of Counter and for ye syght of the Countertenor and of faburden.'

This second treatise ends abruptly without any author's name, but it is possibly a sequel by Power to the 'Treatise upon the Gamme.'²

¹ The passage has been examined by H. P. Horne, and his reading is here followed. Morelet (*De la musique au X^e siècle*, 1856) reads Pluntri, Pelagulfus, Bicheleth and Radulf for the names marked above with an asterisk.

² Brit. Mus., Lansd. MS. 783.

³ As to the importance of this little work see Riemann's *Geschichte der Musiktheorie* (1893), chap. 7.

The largest collection of Power's compositions is contained in the Old Hall MS., in which are twenty-one pieces (mostly parts of masses) for three and four voices; in the Trent MSS. there is a Mass, 'Missa Rex Saeculorum' (without a Kyrie), and ten other pieces; at Modena (Cod. vi. H. 15) are eight pieces; at Bologna four motets (three in Cod. 37 of the Liceo Musicale, and one at the University, MS. 2216); the Selden MS. at Oxford (Bodleian, Selden, B. 26) contains an Ave Regina for four voices and the British Museum (Lansd. 462) part of a Kyrie. The following have been printed:

1. Ave Regina (3 voc.). From Old Hall. (I.M.G. *Sammelbände*, 1901.)
 2. Ave Regina (4 voc.). From Selden MS. (Stainer's Bodleian Music, 1901.)
 3. Salve Regina (3 voc.). At Trent and Modena. (Trenter Codices, 1, 1900.)
 4. Ave Regina (4 voc.). At Trent and Bologna. (Trenter Codices, 1, 1900.)
 5. Mater ora filium (3 voc.). At Trent and Modena. (Trenter Codices, 1, 1900.)
- (Nos. 3 and 4 are the same composition.)

As in the similar case of Dunstable, the almost complete absence of any facts relating to Power's life have caused various fanciful statements to be made about him. Thus he has been said by different writers to have been an 'Anglo-Irish' cleric, educated at Oxford, to have lived in Italy, to have assumed the name of 'John of Dunstable' on entering the monastery of Dunstable, to have been a Welshman, to have been 'the inventor of figured bass,' etc. But all these statements are purely imaginary, and at present we know nothing of who Power was, nor of where he lived and died.

W. B. S.

POZNANSKI, BARRETT ISAAC (b. Charleston, Virginia, Dec. 11, 1840; d. London, June 24, 1896), violinist and composer for his instrument, son of the Rev. Gustavus Poznanski and his wife Esther G. Barret. He began to study the violin with Pietro Basvecchi at the age of 8, and shortly after made his début at a concert given in aid of the Ladies' Calhoun Monument Association at Charleston. In 1858 he went to Paris and studied with Henri Vieuxtemps for three years, during which period he appeared frequently at concerts given by his master both at Vienna and Paris. After playing in Germany and other continental towns, Poznanski returned to Charleston in 1861; but when the Civil War broke out in America he again went to Paris, gave concerts in that city, became leader of the orchestras at the Opéra-Comique and Imperial Theatre, and toured in the south of France with success. In 1866 he was again in his native country. He settled in New York for some time, made an extended concert tour in company with his brother Joseph, and accepted the directorship of the Illinois Conservatoire of music. In 1870 he came to London, where his abilities as a teacher and composer brought him considerable repute. He studied composition with Bagge, who was a

pupil of Sechter, and he was the author of an excellent instruction-book for the violin, *Violine und Bogen*, which aims at instructing the student by a series of illustrations showing correct and faulty positions in violin-playing. He also wrote a vast number of short pieces for violin and piano.

PRACTICE CLAVIER, see VIRGIL PRACTICE CLAVIER.

PRAEGER, FERDINAND CHRISTIAN WILHELM (b. Leipzig, Jan. 22, 1815; d. London, Sept. 2, 1891), son of Heinrich Aloys Praeger, violinist, composer and Kapellmeister. His musical gifts developed themselves very early; at 9 he played the violoncello with ability, but was diverted from that instrument to the piano by the advice of Hummel. At 16 he established himself as teacher at The Hague, meanwhile strenuously maintaining his practice of the piano, violin and composition. In 1834 he settled in London, and became esteemed as a teacher. While living in London Praeger acted as correspondent of the *Neue Zeitschrift für Musik*, a post for which he was selected by Schumann himself in 1842. In Jan. 1851 he gave a recital in Paris of his own compositions with success; in 1852 he played at the Gewandhaus, Leipzig, and at Berlin, Hamburg, etc.; and later, in 1867, a new P.F. trio of his was selected by the United German Musicians and performed at their festival at Meiningen. He was always an enthusiast for Wagner, and it was mainly owing to his endeavours that Wagner was engaged to conduct the Philharmonic Concerts in 1855. A concert of his compositions was organised by his pupils in his honour, on July 10, 1870, in London. An overture from his pen entitled 'Abellino' was played at the New Philharmonic Concerts of May 24, 1854, and July 4, 1855 (under Lindpaintner and Berlioz); and a Symphonic Prelude to Manfred at the Crystal Palace, Apr. 17, 1880. A selection of his best pieces is published in two vols. under the title of the *Präger Album* (Kahnt, Leipzig). The publication of his interesting book, *Wagner as I knew him*, in 1885 drew forth various categorical contradictions and very severe criticisms from the writer of the authorised Life of the composer. (See Ashton Ellis's *Life, passim*.) The book was brought out again in the following year.

G., with addns.

PRAENESTINUS, see PALESTRINA.

PRAETORIUS (PRÆTORIUS), the assumed surname of more than one family of distinguished German musicians, whose true patronymic was Schultz.¹

(1) BARTHOLOMAEUS is known as the composer of 'Neue liebliche Paduanen, und Galliar-den, mit 6 Stimmen' (Berlin, 1616).

¹ The word Schultes means the head-man of the village or small town, and may therefore be translated by Praetor.

(2) **GODESCALOUS** (b. Salzwedel, Mar. 28, 1524; d. July 8, 1573) was for many years professor of philosophy at Wittenberg. He published at Magdeburg, in 1557, a volume entitled '*Melodiae scholasticae*,' in the preparation of which he was assisted by Martin Agricola.

(3) **HIERONYMUS** (b. Hamburg, Aug. 10, 1580; d. there, Jan. 27, 1629) received his first musical instruction from his father, Jacob Schultze or Praetorius, who was organist of the church of St. James, Hamburg. The first appointment of Hieronymus was that of cantor at Erfurt in 1580, but in 1582 he succeeded to his father's post at Hamburg, where he remained till his death. Like Hans Leo Hassler, Hieronymus Praetorius was one of the German followers of the Venetian school of church music. He shows great contrapuntal dexterity in writing for a large number of voices disposed in several choirs. Thus he hardly ever writes for four voices, but from five upwards, and more especially from eight to twenty disposed in two to four choirs. Though a basso continuo part is appended to some of his publications, it is purely *ad libitum*, and he makes no use of an independent instrumental accompaniment. Some of his works, first published independently from 1599-1618, were afterwards republished at his own expense in an enlarged complete edition in five volumes, 1622-25. The titles and contents are as follows: *Opus musicum*, tom. i., 'Cantiones sacrae de praecipuis festis totius anni,' 5-12 voc. This volume was originally dedicated in 1599 to the chief parishioners of St. James's, Hamburg, and contains in its enlarged form forty-six motets or 64 n., reckoning second parts. *Opus musicum*, tom. ii., 'Magnificat octo vocum super octo tonos consuetos cum motetis,' 8-12 voc. This volume contains nine Magnificats, there being a second setting of the fifth tone with Christmas carols appended, also five motets a 8-12. It was originally dedicated in 1602 to the Landgraf Moritz of Hesse. *Opus musicum*, tom. iii., 'Liber missarum,' contains six masses a 5-8, four of them on themes of his own motets, two on motets by Felis and Meiland (Eitner mistakenly attributes the masses themselves to these composers). This volume was originally dedicated in 1616 to certain Hamburg patricians, the composer's patrons. *Opus musicum*, tom. iv., 'Cantiones variae,' 5, 6, 7, 8, 10, 12, 16, 20 voc., contains twenty-six Latin motets and two settings of German texts, 'Ein Kindlein so lübelich' and 'Herr Gott wir loben dich,' the latter a 16 in three parts. *Opus musicum*, tom. v., 'Cantiones novae officiosae,' 5, 6, 7, 8, 10 et 15 voc., dedicated to the Senate of Hamburg, contains twenty-one Latin motets and three German pieces. A representative selection from all these volumes has now been included in *D.D.T.*, Bd. xxiii. Besides these larger works, Hieronymus Praetorius had a considerable share in the *Hamburger Melodeyen-*

Gesangbuch of 1604, which contains twenty-one of his settings of chorales in simple counterpoint a 4.

(4) **JACOB**, son of Hieronymus (b. Feb. 8, 1586; d. Oct. 22, 1651), became a pupil of Sweelinck in Amsterdam, and in 1603 organist of the church of St. Peter in Hamburg. Three of his motets were included in the first volume of his father's *Opus musicum*, and he was also one of the contributors to the *Hamburger Melodeyen-Gesangbuch* of 1604. His other works, as enumerated in *Q.-L.*, are chiefly motets for weddings after the fashion of the time. He enjoyed a great reputation as an organ-player and teacher.

J. R. M.

(5) **MICHAEL** (b. Kreuzberg, Thuringia, Feb. 15, 1571; d. Wolfenbüttel, Feb. 15, 1621), most celebrated of the name on account of his *Syntagma musicum*, began his artistic career in the character of Kapellmeister at Lüneburg, in 1604 he entered the service of the Duke of Brunswick, first as organist, and then as Kapellmeister and secretary; he was appointed prior of the monastery of Ringelheim, near Götting, without necessity of residence.

The compositions of Michael Praetorius are very voluminous. He himself has left us, at the end of his *Syntagma musicum*, a catalogue the most important items of which are: fifteen volumes of 'Polyhymnia,' adapted partly to Latin and partly to German words; sixteen volumes of 'Musae Sionae,'¹ of which the first five are in Latin and the remainder in German; nine volumes of a secular work called 'Musa Aonia,' of which the several books are entitled 'Terpsichore' (2 vols.), 'Calliope' (2 vols.), 'Thalia' (2 vols.), 'Erato' (1 vol.), 'Diana Teutonica' (1 vol.) and *Regensburgische Echo* (1 vol.); and a long list of other works, 'partly printed, and partly, through God's mercy, to be printed.' The *Syntagma musicum* (Musical Treatise) is a book the excessive rarity and great historical value of which entitle it to a special notice. The full title of this remarkable work is:

'*Syntagma Musaeum: ex veterum et recentiorum Ecclesiasticorum auctorum lectione, Polyhymnia, Varietate, Varietate Linguarum notatione, Hodierni seculi usurpatione, Ipsius denique Musicae artis observatione in Cantorum, Organistarum, Organopocorum, ceterorumque Musican scientiam amantium & tractantium gratiam collectum, et Secundum generalem indolem totius Operi praefatum, in Quatuor Tomos distributum, a Michaele Praetorio Creutzbergensi, Censorio Ringelhemensi Priori, & in aula Brunsvicensi Chori Musici Magistro, — VVittenbergae etc.* Anno 1618.

Notwithstanding this distinct mention of four volumes, it is morally certain that no more than three were ever printed, and that the much-coveted copy of the fourth, noticed in Forkel's catalogue, was nothing more than the separate set of plates attached to the second.

Tom. I. (Part. i., Wolfenbüttel, 1614²; Part. ii.,

¹ There is rather an extensive collection of separate volumes in the British Museum; but of Part ix. of the 'Musae Sionae' containing 'Bithia' and 'Tricinia,' the only copies mentioned in *Q.-L.* are in the State Library at Berlin and at Liegitz.

² In the preface pages, which give a conspectus of the contents, there is a chronogram which gives the date twice over as 1614:

'IVDICIVM p[ro]p[ri]e non terreat: nam
MICHAEI Praetorio Christ. V.'.

Wittenberg, 1615), written chiefly in Latin but with frequent interpolations in German, is arranged in two principal parts, each subdivided into innumerable minor sections. Part i. is entirely devoted to the consideration of Ecclesiastical Music, and its four sections treat, respectively, (1) of Choral Music and Psalmody, as practised in the Jewish, Egyptian, Asiatic,¹ Greek and Latin Churches; (2) of the Music of the Mass; (3) of the Music of the Antiphons, Psalms, Tones, Responsoria, Hymns and Canticles, as sung at Matins and Vespers, and the Greater and Lesser Litanies; and (4) of Instrumental Music, as used in the Jewish and early Christian Churches, including a detailed description of all the musical instruments mentioned either in the Old or the New Testament. Part ii. treats of the Secular Music of the Ancients, including (1) Dissertations on the Invention and Inventors of the Art of Music, its most eminent Teachers, its Modes and Melodies, its connexion with Dancing and the Theatre, its use at Funeral Ceremonies, and many other kindred matters; and (2) Descriptions of all the Instruments used in ancient Secular Music, on the forms and peculiarities of some of which much light is thrown by copious quotations from the works of classical authors.

TOM. II. (Wolfenbüttel, Part i. in 1619²; Part ii. in 1620), written wholly in German, is called *Organographia*, and divided into five principal sections. Section i. treats of the nomenclature and classification of all the musical instruments in use at the beginning of the 17th century. Section ii. contains descriptions of the form, compass, quality of tone and other peculiarities of all these instruments *seriatim*, including, among wind instruments, trombones of four different sizes, the various kinds of trumpet, horns (Jäger Trommetten), flutes, both of the old and the transverse forms, cornetts, hautboys, both treble and bass (here called Pommern, Bombardoni and Schalmeyen), bassoons and dolcians, double bassoons and sordoni, dopppioni, racketten and the different kinds of krumhorn (or Lituus), corna-muse, bassanello, schreyerpeiffe, and sockpeiffe or bagpipes. These are followed by the stringed instruments, divided into two classes—viola da gamba, or viola, played between the knees, and viola da braccio, played upon the arm. In the former class are comprised several different kinds of the ordinary viola da gamba, the viola bastarda, and the violone or double-bass; in the latter, the ordinary viola da braccio, the violino da braccio, the violetta piccola and the tenor viola da braccio. The lutes, lutes, theorbas (*sic*), mandolins, guitars, harps and other instruments in which the strings are plucked by the fingers or by a plectrum, are classed by themselves; as are

the keyed instruments, including the harpsi-chord (Clavicymbalum), spinet (Virginal), clavictherium, claviorganum, arpicordum, the Nürnbergisch Geigenwerck and organs of all kinds, beginning with the ancient regall and positive. Section iii. treats of ancient organs in detail, giving much valuable information concerning their form and construction. Section iv. gives a minute description of modern organs, with details of their construction, the form of their pipes, the number and quality of their stops or registers, and other equally interesting and important matters relating to them. Section v. treats of certain individual organs, celebrated either for their size or the excellence of their tone, with special accounts of more than thirty instruments, including those in the Nicolai-kirche and Thomaskirche at Leipzig, the cathedrals of Ulm, Lübeck, Magdeburg and Brunswick, and many other well-known churches.

This part of the work is rendered still more valuable by an Appendix, printed at Wolfenbüttel in 1620, two years after the publication of tom. ii. and iii., under the title of *Theatrum instrumentorum, seu sciagraphia, Michaelis Praetorii, C.* This consists of forty-two well-executed plates, exhibiting woodcuts of all the more important instruments previously described in the text. Among these there are few more curious than the engraving of the Nürnbergisch Geigenwerck.

TOM. III., also printed at Wolfenbüttel in 1619, is arranged in three main sections. Part i. treats of all the different kinds of secular composition practised during the first half of the 17th century in Italy, France, England and Germany, with separate accounts of the Concerto, Motet, Fauxbourdon, Madrigal, Stanza, Sestina, Sonnet, Dialogue, Canzone, Canzonetta, Aria, Messanza, Quodlibet, Giustiniano, Serenata, Ballo or Balletto, Vinetto, Giardiniero, Villanella, Prélude, Phantasie, Capriccio, Fuga, Ricercare, Symphonia, Sonata, Intrada, Toccata, Padovana, Passamezzo, Galliarda, Bransle, Courante, Volta, Allemanda and Mascherada, the distinctive peculiarities of each of which are described with a clearness which throws much light on certain forms now practically forgotten. Part ii. deals with the technical mysteries of solmisation, notation, ligatures, proportions, sharps, flats, naturals, modes or tones, signs of all kinds, 'Tactus' or rhythm, transposition, the arrangement of voices, the management of double, triple and quadruple choirs, and other like matters. Part iii. is devoted to the explanation of Italian technical terms, the arrangement of a complete 'Cappella,' either vocal or instrumental, the rules of 'General-Bass' (THOROUGH-BASS), and the management of a concert for voices and instruments of all kinds; the whole concluding with a detailed list of the author's own com-

¹ Called, in the German index, the Arabian Church

² But see later, description of the Tenbury copy.

positions, both sacred and secular, and a compendium of rules for the training of boys' voices, after the Italian method.

TOM. IV., had it been completed, was to have treated of counterpoint.

There is a copy in the British Museum, one in the Glasgow and West of Scotland Technical College, and one in Mr. Alfred H. Littleton's possession. For the use of the remarkably fine exemplar which served as the basis of the above description, the writer was indebted to the Rev. Sir F. A. Gore Ouseley, who placed it unreservedly at his disposal. The second volume contains the autograph of J. B. Bach (the B has been altered to E, but the accompanying date, 1739, might refer to either of the Eisenach Bachs, father or son. See Vol. I. p. 148, table, Nos. 11 and 12). The second volume belonged to G. P. Telemann in 1712. The first volume of the edition described by Fétis was printed at Wittenberg in 1615, the second and third at Wolfenbüttel in 1619, and the collection of plates—*Theatrum instrumentorum, seu sciagraphia*—at Wolfenbüttel in 1620. Neither Fétis nor Mendel seems to have been aware of the existence of an older edition. The Rev. Sir F. A. G. Ouseley's copy bears in its first volume the same date as the other editions, 'Wittebergae, 1615,' but the second and third volumes are dated 'Wolfenbüttel, 1618'; and the difference does not merely lie in the statement of the year, but clearly indicates an earlier issue. In the edition of 1618 the title-page of the second volume is printed entirely in black; in that of 1619 it is in black and red. The Ouseley copy of vol. ii. begins with a summary of contents and an address to organists, instrumentalists, organ- and instrument-makers of Germany and other nations. The other edition has a dedication to the burgomaster and town council of Leipzig. The title-page of the third volume is black in both editions, but in different type; and, though the contents of the second and third volumes correspond generally in both copies, slight typographical differences may be detected in sufficient numbers to prove the existence of a distinct edition beyond all doubt. The Ouseley copy of vol. iii. begins with a summary of contents, the 1619 edition with a dedication to the burgomaster and town council of Nuremberg, and an ode in praise of the authors. The 1618 edition has another chronogram—

'IesV In te spero, non ConfVnDar In aeternVM,'

pointing again at 1614 as the initial date of the work. The 1618 copy contains at pp. 57-72 musical examples not in the later edition, and pp. 78 and 79 are misplaced. It has long been known that twenty pages of the General Introduction were more than once reprinted; but these belong to the first volume, and are in no way concerned with the edition of 1618,

of which, so far as we have been able to ascertain, the copy referred to, now at St. Michael's, Tenbury, is a unique example.

W. S. R.; rev. with addns.

PRAGUE (PRAHA), the capital of the ancient kingdom of Bohemia and now the capital of the Republic of Czechoslovakia, has a long musical history dating back to the 10th century. Even before the time of Bedřich Smetana (1824-84) there was a desire to separate the musical life of the Czechs in Prague from that of the German cohabitants, who, as the ruling race, were better provided with theatres, concert-halls and State emoluments. From the date of the erection of a Provisional Theatre for the performance of operas and plays in the vernacular, in 1862, the two streams of tendency have flowed side by side, each in its own clearly defined course, the Slavonic current gathering an increasing force and volume which culminated with the Declaration of Independence on Feb. 29, 1920. The Ministry of Education and National Culture includes a special department for music, with a Minister-secretary at the head (Dr. Jan Branberger) and an advisory board consisting of leading musical representatives in Bohemia, Moravia and Slovakia. There is an Inspector of Music for Czech Schools, and another for German Schools throughout the Republic. The chief musical institutions in Prague at the present time are as follows:

1. THE NATIONAL THEATRE (*Národní Divadlo*), on the banks of Vltava, built by national subscription, replaced the first building, which was burnt down in 1881 before its actual inauguration. The designs are by the architects Zítěk and Schulz; the decorations by Zenišek (from drawings by Aleš) and Liebscher; the curtain by Ad. Hinais; so that the entire building is a monument to national art. The repertory is not confined to national opera; Italian, French, German and Russian works are staged from time to time. The chief conductors during its existence have been: Smetana, Ad. Čech (1876-1900), Karel Kovařovic (1900-19), Otakar Ostrčil (since 1920).

2. THE NEW GERMAN THEATRE (*Deutsches Landestheater*) for German, Italian and French opera. Chief conductor, Alexander Zemlinsky.

3. THE CZECH PHILHARMONIC SOCIETY. A series of annual concerts, about 20 in all, in the Smetana Hall of the Národní Dům (National House). Chief conductor, Václav Talich.

4. THE ŠAK PHILHARMONIC SOCIETY, conducted by V. V. Šak, L. V. Čelanský, J. Kvapil and others.

5. THE PRAGUE CHORAL UNION (*Hlahol*). Conductor, Jaromír Herle. Four concerts in the year.

6. THE MUSICAL EVENINGS OF THE STATE CONSERVATOIRE. Twice weekly.

7. THE CZECH CHAMBER MUSIC UNION OF

PRAGUE. Sixteen serial concerts yearly, employing the Bohemian (Czech) String Quartet, the Ševčík-Lhotzky Quartet, the Zíka and Ondříček Quartets.

8. THE CHORAL UNION OF PRAGUE TEACHERS (*Pěvecké sdružení pražských učitelů*). Conductor, Hubert Doležil.

Other societies on a smaller scale include: the CZECH ASSOCIATION FOR THE ENCOURAGEMENT OF SONG (*Lieder*); the ASSOCIATION FOR MODERN MUSIC; the CONCERTS OF THE WORKING MEN'S ACADEMY; the PEOPLE'S MUSICAL EVENINGS; the MUSICAL EVENINGS OF THE LEAGUE OF CULTURE (*Svaz Osvětový*).

9. PHILHARMONIC CONCERTS IN THE NEW GERMAN THEATRE. Conductor, A. Zemlinsky.

10. THE GERMAN CHAMBER MUSIC SOCIETY.

11. *Teaching Institutions.*—(1) THE CZECH UNIVERSITY (Charles IV.). Chair of Music, lecturer in aesthetics, etc., Prof. Dr. Zdeněk Nejedlý; professor in ordinary and reader in musical theory, Prof. J. B. Foerster; head of the department of musical books, Prof. Zd. Nejedlý.

(2) THE GERMAN UNIVERSITY. Chair of Music, Dr. Heinrich Rietsch; history of music, Privatdozent Dr. Paul Nettl; reader in musical theory, Hans Schneider.

(3) THE STATE CONSERVATOIRE OF MUSIC, established in the Emmaus Monastery since 1920. Founded in 1811, and therefore, with the exception of Paris, the oldest Conservatoire in mid-Europe. Reorganised as a State institution (with recognition of the Czech language) in 1920. It includes a Master-school and a Middle-school under the same direction, and is run upon the lines of other State middle-schools. There are two classes of teachers: professors in ordinary and extraordinary. At the head of all is the Rector, chosen from the ranks of the teachers in the Master-school. This is an annual appointment (1921-22, Vít. Novák; 1922-23, J. B. Foerster; 1923-24, Karel Hoffmeister; 1924-25, Josef Suk). There is also an Administrator in charge of the business side of the institution.

(4) THE GERMAN ACADEMY OF MUSIC (with State subvention). Rector, Prof. Alex. Zemlinsky; Director, Prof. Romeo Finke.

(5) PRIVATE INSTITUTIONS. Music classes of the Huss School (League of Culture); 'Hudební Budeč' for the improvement of school singing; Music School of the Choral Society (Lukes); Music School for Blind Children, etc. R. N.

PRALLTRILLER, an ornament of the keyboard instruments not used in the classical French school and possessing no equivalent English name, though it is in fact a short shake and in effect an inverted MORDENT (*g.v.*).

1. *Written. Played.*

PRALLTRILLER

The Pralltriller is characterised by C. P. E. Bach as the most agreeable and at the same time the most indispensable of all graces, but also the most difficult. He says that it ought to be made with such extreme rapidity that, even when introduced on a very short note, the listener must not be aware of any loss of value.

The proper, and according to some writers the only, place for the introduction of the Pralltriller is on the first of two notes which descend diatonically, a position which the Mordent cannot properly occupy. This being the case, there can be no doubt that in such instances as the following, where the Mordent is indicated in a false position, the Pralltriller is in reality intended, and the sign is an error either of the pen or of the press.

2. MOZART, Rondo in D.

Nevertheless the Mordent is occasionally, though very rarely, met with on a note followed by a note one degree lower, as in J. S. Bach's fugue in C in Book II. of the '48.' This is, however, the only instance in Bach's works with which the writer is acquainted.

When the Pralltriller is preceded by an appoggiatura, or a slurred note one degree above the principal note, its entrance is slightly delayed (Ex. 3), and the same is the case if the Mordent is preceded by a note one degree below (Ex. 4).

3. W. F. BACH, Sonata in D.

4. J. S. BACH, Sarabande from 'Suite anglaise No. 3.'

C. P. E. Bach says that if this occurs before a pause the appoggiatura is to be held very long, and the remaining three notes to be 'snapped up' very quickly, thus—

The earlier writers drew a distinction between the Pralltriller and the so-called Schneller (*schnellen*, 'to fillip'). This grace was in all respects identical with the Pralltriller, but it was held that the latter could only occur on a descending diatonic progression (as in Ex. 1), while the Schneller might appear on detached notes. It was also laid down that the Schneller was always to be written in small notes, thus—

, while the sign *AV* only indicated the Pralltriller. Türk observes, nevertheless, that the best composers have often made use of the sign in cases where the indispensable diatonic progression is absent, and have thus indicated the Pralltriller where the Schneller was really intended. This is, however, of no consequence, since the two ornaments are essentially the same, and Türk himself ends by saying 'the enormity of this crime may be left for the critics to determine.'

Both Mordent and Pralltriller occur very frequently in the works of Bach and his immediate successors; perhaps the most striking instance of the lavish use of both occurs in the first movement of Bach's 'Capriccio on the Departure of a Brother,' which though only seventeen bars in length contains no fewer than 17 Mordents and 30 Pralltriller. F. T.

PRATELLA, FRANCESCO BALILLA (b. Lugo, Romagna, Feb. 1, 1880), composer, studied at the Liceo Musicale of Pesaro, where his masters were Antonio Cicognani and Mascagni. He took his degree as a composer in 1903 with the symphonic poem 'La chiesa di Polenta,' based on Carducci's ode of the same name. In 1910 Pratella issued, at Milan, his first pamphlet on futurist music, dealing with aesthetic questions which aroused a considerable amount of controversy among Italian musicians, and he further propagated his views by means of numerous lectures in the principal Italian cities. From 1914–17 he contributed to the futurist review *Gli Avvenimenti*, and subsequently collected all his writing and lectures in the publications entitled *Evoluzione della musica* and *Croniche e critiche*.

Pratella has written the following operas:

'Il regno lontano,' 'Lilla,' 'La Sina d' Varguun,' 'L'aviatore Dro' and 'Il dono primaverile.'

Among his orchestral works the most important are:

'Musica futurista per orchestra' (Inno alla Vita), produced at the Teatro Costanzi in Rome in 1913; 'Romagna,' cycle of five symphonic poems; and three dances, 'La Guerra.'

There are also a number of piano, organ and violin pieces, songs, and a trio for violin, violoncello and piano. E. B.

PRATI, ALESSIO (b. Ferrara, July 19, 1750; d. there, Jan. 17, 1788), studied at the Conservatorio di Loreto, Naples. He visited Paris, where his opera 'Ifigenia in Aulide' met with great success. In 1781 he was in St. Petersburg, where he brought out 2 oratorios; and in 1783 was in Vienna. He returned to Ferrara in 1784 and wrote operas for Venice and Turin; he also wrote masses and other church music, vocal rondos, arias, romances, concertos for harpsichord and sonatas for harpsichord and for harp, some with violin; also a duet for 2 violoncellos (Q.-L.).

PRATT, JOHN (b. Cambridge, 1772; d. there, Mar. 9, 1855), son of Jonas Pratt, music-seller and teacher. In 1780 he was admitted a chorister of King's College. After quitting the choir he became a pupil of, and deputy for, Dr. Randall, the college organist, and on his death in Mar. 1799 was appointed his successor. In Sept. following he was appointed organist to the University, and in 1813 organist of St. Peter's College. He composed several services and anthems. He published 'A Collection of Anthems, selected from the works of Handel, Haydn, Mozart, Clari, Leo and Carissimi' (an adaptation to English words of detached movements from the masses, etc., of those composers), and a selection of psalm and hymn tunes first published in 1810, and again in 1820, with the title 'Psalmodia Cantabrigiensis.'

W. H. H.

PRATT, WALDO SELDEN (b. Philadelphia, Nov. 10, 1857), writer on musical subjects, edited (1920) a valuable *American Supplement* to this Dictionary (Macmillan Co., New York), giving full accounts of the careers of a great number of American musicians. A *New Encyclopædia of Music and Musicians* followed in 1924 (see DICTIONARIES OF MUSIC). His many publications include works on church music and a *History of Music* (1907). (See Baker.)

PRATTEN, (1) ROBERT SIDNEY (b. Bristol, Jan. 23, 1824; d. Ramsgate, Feb. 10, 1868), a distinguished English flute-player. His father was a professor of music in Bristol. The boy was considered a prodigy on the flute, and in his twelfth year was much in request at the concerts at Bath and Bristol. From thence he migrated to Dublin, where he played first flute at the Theatre Royal and musical societies. In 1846 he came to London, and was soon engaged as first flute at the Royal Italian Opera, the Sacred Harmonic and Philharmonic Societies, the Musical Society of London, Alfred Mellon's concerts, etc. Through the kindness of the late Duke of Cambridge, Pratten passed some time in Germany in the study of theory and composition, and became a clever writer for his instrument. His Concertstück and Fantasia on Marie Stuart are among the best of his productions. His widow

was a well-known professor of the guitar. His brother, (2) **FREDERICK SIDNEY** (*d.* London, Mar. 3, 1873), was an eminent contrabassist, engaged in the principal orchestras. *G.*

PREAMBULUM, see **PRELUDE**.

PRÉ AUX CLERCS, *LE*, opéra-comique in 3 acts; words by Planard, music by Hérold. Produced Opéra-Comique, Dec. 15, 1832; in London (in French), Princess's, May 2, 1849; in Italian, Covent Garden, June 26, 1880. *G.*

PRECENTOR (Fr. *grand chantre*; Ger. *Primicier*; at Cologne, *chorepiscopus*; Span. *chantre*, *caput scholæ* or *capiscol*; Gr. *protopsaltes* and *canonarcha*), the director of the choir in a cathedral, collegiate or monastic church. In the English cathedrals of the old foundation, as well as in the cathedrals of France, Spain and Germany, the Precentor was always a dignitary, and ranked next to the Dean, although in a few instances the Archdeacons preceded him. At Exeter the Precentor installed the Canons; at York he installed the Dean and other dignitaries; and at Lichfield even the Bishop received visible possession of his office from his hands. At Paris the Precentor of Notre-Dame divided with the Chancellor the supervision of the schools and teachers in the city, and of the respondents in the university. The dignity of Precentor was established at Exeter, Salisbury, York and Lincoln in the 11th century; at Rouen, Amiens, Chichester, Wells, Lichfield and Hereford in the 12th century; and at St. David's and St. Paul's (London) in the 13th century. In cathedrals of the new foundation (with the exception of Christ Church, Dublin) the Precentor is a minor canon appointed by the Dean and Chapter, and removable at their pleasure. The duties of the Precentor were to conduct the musical portion of the service, to superintend the choir generally, to distribute copes and regulate processions; on Sundays and great festivals to begin the hymns, responses, etc., and at Mass to give the note to the Bishop and Dean, as the Succentor did to the canons and clerks. In monasteries the Precentor had similar duties, and was in addition generally chief librarian and registrar, as well as superintendent of much of the ecclesiastical discipline of the establishment. In some French cathedrals he carries a silver or white staff as the badge of his dignity. In the Anglican Church his duties are to superintend the musical portions of the service, and he has the general management of the choir. His stall in the cathedral corresponds with that of the Dean. (Walcott, *Sacred Archaeology*; Hook, *Church Dictionary*.) See **CANTOR**.

W. B. S.

PRECIOSA, play in 4 acts by P. A. Wolff, with overture and music by Weber; music completed July 15, 1820. Produced Royal Opera House, Berlin, Mar. 14, 1821; Paris, in

1825, at the Odéon, adapted and arranged by Sauvage and Cremont; Apr. 16, 1858, at the Théâtre Lyrique, reduced to 1 act by Nutter and Beaumont. In London, in English, Covent Garden, Apr. 28, 1825. *G.*

PREDIERI, *LUO' ANTONIO* (*b.* Bologna, Sept. 13, 1688; *d.* there, 1769 or 1770), became maestro di cappella of the cathedral, was made a member of the Accademia dei Filarmonici in 1706, and its president in 1723. On the recommendation of Fux he was appointed by the Emperor Charles VI. vice-Kapellmeister of the court chapel at Vienna in Feb. 1739. He was promoted to the chief Kapellmeistership in 1746, but dismissed in 1751 with title and full salary, apparently in favour of Reutter. He returned to Bologna, and died there. Among the MSS. of the court library and of the Gesellschaft der Musikfreunde at Vienna are many scores of his operas, oratorios, feste di camera, serenatas, etc., which pleased in their day, and were for the most part produced at court. (See *Q.-L.* for list.) *C. F. P.*

PREFACE. One of the most important and familiar of the ecclesiastical recitatives is the dialogue and solo which introduces the *Sanctus* at the Holy Eucharist. After three versicles and responses (or two only in the English rite) the Preface follows, set to a somewhat elaborate melody of the simple recitative type. The two cadences which chiefly distinguish it are as follows:

The whole Preface, including the special additions made to it for special occasions, is based upon these figures. *W. H. F.*

PREINDL, *JOSEPH* (*b.* Marbach on the Danube, Jan. 30, 1756; *d.* Oct. 26, 1823), a pupil of Albrechtsberger in Vienna, became in 1780 or 1790 choirmaster of the Peterskirche, and in 1809 Kapellmeister of St. Stephen's, in which post he died. He was a solid composer, a skilled pianist and organist, and a valued teacher of singing. His compositions include five masses (printed), a Requiem, a book of choral settings of the 'Lamentationes', smaller church pieces, and pianoforte and organ music, partly published in Vienna. He also printed a *Gesanglehre* (2nd ed. Steiner) and 'Melodien aller deutschen Kirchenlieder welche in St. Stephansdom in Wien gesungen werden,' with cadences, symphonies and preludes, for organ or pianoforte (Diabelli, 3rd ed. revised and enlarged by Sechter). Seyfried edited his posthumous work, *Wiener Tonschule*, a method of instruction in harmony, counterpoint and fugue (Haeßinger, 1827; 2nd ed. 1832).

C. F. P.

PRELLEUR, *PETER*, was of French extraction, and in early life a writing-master. About 1728 he was elected organist of St. Alban's,

Wood Street, and shortly afterwards engaged to play the harpsichord at Goodman's Fields Theatre, which he continued to do until the suppression of the theatre under the Licensing Act in 1737, composing also the dances and occasional music. In 1730 he published *The Modern Musick Master, or the Universal Musician*, containing an introduction to singing, instructions for playing the flute, German flute, hautboy, violin and harpsichord, with a brief History of Music and a Musical Dictionary. In 1735 he was elected the first organist of Christ Church, Spitalfields. After the closing of Goodman's Fields Theatre he was engaged at a newly opened place of entertainment in Leman Street close by, called the New Wells, for which he composed some songs, and an interlude entitled 'Baucis and Philemon,' containing a good overture and some pleasing songs and duets, the score of which he published. Fifteen hymn tunes by him were included in a collection of twenty-four published by one Moze, an organist, in 1758, under the title of 'Divine Melody,' in which he is spoken of as dead.

W. H. H.

PRELUDE (Fr. *prélude*; Ger. *Vorspiel*; Ital. *preludio*; Lat. *præludivium*), strictly a preliminary movement, an introduction to the main body of a work; also used as the title of a movement of an independent character.

In the sonatas of Corelli and Bach the Prelude developed into a simple movement in the old sonata form (see FORM); in the '48 Preludes and Fugues' for clavier, and those for organ, no special form is adhered to, indeed the term may be said to be free from formal restrictions.

In the case of opera the term is used as a synonym for overture to emphasise the fact that the music is very closely related to what follows. Again, however, there is no restriction as regards form. Compare the several Wagner Preludes. (See INTRODUCTION; OVERTURE.)

As a movement apart, the Chopin Preludes set the fashion for a short movement of a suggestive, imaginative nature, often approaching an improvisation. His example was followed by numerous composers of pianoforte music. (See RACHMANINOV and Scriabin.) N. C. G.

PRELUDES, LES, 'Symphonic Poems' by Liszt for full orchestra; first performed Weimar, Feb. 23, 1854. G.

PRENTICE, THOMAS RIDLEY (b. Paslow Hall, Ongar, July 6, 1842; d. Hampstead, July 15, 1895), entered the R.A.M. in 1861, studying the piano under Walter Macfarren, and harmony and composition under G. A. Macfarren. In 1863 he obtained the Silver Medal and the Potter Exhibition. In 1869 he started 'monthly popular concerts' at Brixton, which were carried on for five years, the assistance of first-rate artists being secured, and many new works, both English and foreign,

being performed. For some years he gave an annual concert at the Hanover Square Rooms. At the Crystal Palace he played Beethoven's Rondo in B \flat with orchestra, for the first time in England. In 1872 he was given the post of organist at Christ Church, Lee Park, but ill-health compelled him to resign it after a few years. In 1880 he was appointed professor of the piano at the G.S.M., and in the same year he organised an extremely successful series of 'twopenny concerts' in Kensington Town Hall, especially intended for the working classes. In 1881 he became professor at the Blackheath Conservatoire of Music. His compositions include a cantata, 'Linda,' for female voices, several anthems, 'Break forth into joy,' 'I love the Lord,' etc., part songs, trios, etc., besides numerous songs and pianoforte pieces, among the latter of which may be mentioned a 'Gavotte fantastique,' an elegy, a minuet and trio, etc. He edited six cantatas by Carissimi, with accompaniments, and wrote an excellent series of instruction-books for the pianoforte under the collective title of *The Musician* (Swan Sonnenschein & Co.), in which special stress is laid upon the analysis of musical compositions from the beginning of pianoforte study. His *Hand Gymnastics* is No. 36 of Novello's Music Primers. M.

PREPARATION. The possibility of using a very large proportion of the dissonant combinations in music was only discovered at first through the process of 'suspension,' which amounts to the delaying of the progression of a part or voice out of a concordant combination while the other parts move on to a fresh combination; so that until the delayed part moves also to its destination a dissonance is heard. As long as the parts which have moved first wait for the suspended notes to move into their places before moving farther, the group belongs to the order of ordinary suspensions (Ex. 1); but when they move again while the part which was as it were left behind moves into its place, a different class of discords is created (Ex. 2). In both these cases the sounding of the

discordant note in the previous combination (i.e. the upper C in the first chord of both examples) is called the 'preparation' of the discord, and the latter class are sometimes distinguished especially as prepared discords.

C. H. H. F.

PRÉS, JOSQUIN DES, see JOSQUIN DES PRÉS.

PRESA (literally, 'a taking'), a sign used to indicate the places at which the Guida (or

Subject) of a canon is to be taken up by the several voices.

The following are the forms most frequently adopted :

·S ·S: ·Ṡ + ✕

In the famous 'Enimme,' or enigmatical canons, of the 15th and 16th centuries an INSCRIPTION (*q.v.*) is usually substituted for the Presa, though in many cases even this is wanting, and the singer is left without assistance.

W. S. R.

PRESENDA, JOHANNES FRANCISCUS (*b.* Lequio-Berria, Alba, Jan. 6, 1777; *d.* Turin, Sept. 11, 1854), a Turin violin-maker of local repute.

When a lad of 12 he begged and fiddled his way to Cremona, where he arrived after an eventful and arduous journey, and in due course became a pupil of Lorenzo Storioni. On the completion of his studies at Cremona he returned to his native town in the same manner in which he came, and in 1814 set up a business of his own at Alba. Meeting with but little encouragement he removed to Carmagnola in 1817, and finally drifted to Turin in 1820. Here success at last attended his efforts, owing to the patronage of Giambattista Polledro. This pupil of Pugnani was appointed conductor of the royal band by King Charles Felix in 1824, and in the reorganisation which ensued, Polledro, together with Ghebart (his successor), adopted the use of Pressenda's violins in the royal band and the orchestras of the theatres. Tarsio brought a considerable number of his violins, predicting an auspicious future for them, and diplomas and silver medals were awarded Pressenda by various Philharmonic Societies. Beyond Italy Pressenda's name is comparatively unknown, but his work was brought before the notice of the musical public in this country in 1882, in connexion with the Hodges v. Chanot case. The violin—a remarkably handsome instrument bearing a Bergonzi label—which was the cause of the suit, brought to light the very doubtful practices of violin-dealers, and their methods of inserting false labels. Von Lüttgendorff (*Die Geigen- und Lautenmacher*) highly commends Pressenda's work, especially praising his varnish, and the individuality displayed in the scrolls.

BIRCH.—R. G. RINALDI, *Classico fabbricazione di violini in Piemonte* (Turin, 1873), followed by a German translation, *Von LUTTGENDORFF, Die Geigen- und Lautenmacher*; CHANOT, *Hodges v. Chanot, Ortelius and Remarks on the great Violin Case*; *Times*, Standard, *Daily Telegraph* and contemporary papers between Feb. and June 1882; HERRON-ALLAN, *Hodges against Chanot, being the History of a Celebrated Case* (London, 1883).

E. H.-A.

PRESSER, THEODORE (*b.* Pittsburg, Pennsylvania, July 3, 1848; *d.* Philadelphia, Nov. 1925), American publisher and musical philanthropist. He was an early student at the New England Conservatory; later he spent two years in Leipzig. In 1883 he founded, at Lynchburg, Virginia, *The Etude*

(moved a few months later to Philadelphia), a monthly magazine devoted to the interests of music teachers and students, which has a large circulation; three years later he established a music-publishing business which, as the Theo. Presser Co., is now an important firm. In 1906 he opened, in Philadelphia, the Presser Home for Retired Music Teachers, the only one in America. In 1916 the Presser Foundation was established, with funds of over \$1,000,000, which supports, besides the Home, a Department of Scholarships, given directly to institutions and not to individuals, and a Department for the Relief of Deserving Musicians.

W. S. S.

PRETISSIMO, 'very quickly,' indicates the highest rate of speed used in music.

PRESTO, 'fast,' indicates a rate of speed quicker than allegro, or any other sign except prestissimo. When the time becomes faster in the middle of a movement, 'Più presto' is used, as for instance in Beethoven's Quartet in E \flat (op. 74), third movement (Presto), where the direction for the part of the movement that serves as the trio is 'Più presto quasi prestissimo.' A curious misuse of this direction is in the pianoforte sonata of Schumann, op. 22, where the first movement is headed 'Il più presto possibile,' and in German below 'So rasch wie möglich.' At forty-one bars from the end of the movement comes 'Più mosso,' translated 'Schneller,' and again, twenty-five bars from the end, 'Ancora più mosso,' 'Noch schneller.'

PRESTON, (1) THOMAS (late 15th or early 16th cent.), English composer of church music. B.M. Add. MSS. 29,996 contains an early 16th-century collection of 91 motets arranged for organ (or possibly virginal), written on two staves of 5, 6 or 8 lines each. Nos. 1-50 are in the hand of John REDFORD (*q.v.*), who is composer of most, if not all, of these. Preston is similarly the composer of most, if not all, of Nos. 51-69: the remainder are anonymous. They are mostly composed on plain-songs, and were probably reductions of motets originally written for voices, and used to support the voices. A motet by Preston, 'O Lux,' is in the Commonplace Book of John BALDWIN (*q.v.*).

(2) THOMAS (*b.* 1662), English organist and composer. He was organist of Ripon Minster from 1690 to 1730 and was buried in the South Transept (*West's Cath. Org.*). He is the composer of a piece, 'Tho. Preston's Jig,' which appears in B.M. Add. MSS. 17,863/206, a miscellaneous collection of tunes for violin (or flute).

(3) THOMAS, son of the above, succeeded his father as organist of Ripon in 1731, and held this post until 1748 (*West's Cath. Org.*).

J. M^c.

PRESTON & SON, a family of London music publishers during the latter part of the 18th and the early portion of the 19th centuries.

The firm was first started by John Preston, who in 1774 was established at 9 Banbury Court, Long Acre, as a musical instrument-maker. In 1776 he had removed to 105 Strand, near Beaufort Buildings, and was publishing some small and unimportant musical works. Two years later he was at 97 Strand, where the firm remained until 1823. John Preston's business after his removal to the Strand soon became one of the most important in the trade, and he issued a vast quantity of music of all kinds, buying, in 1789, the whole of the plates and stock-in-trade of Robert Bremner, who had then just died. About this time the son, Thomas, came into the business, and towards the end of the century John's name disappears. In 1823 Thomas Preston had left the Strand for 71 Dean Street, Soho, where he remained until about 1835, the business then becoming the property of Coventry & Hollier, who reissued some of the Preston publications. Shortly after 1850 Novello were large purchasers at their sale of effects.

The Preston publications include an interesting series of country dances begun in 1786, and extending for nearly forty years after this date. Others are many of the popular operas of the day; such works as Bunting's 'Ancient Music of Ireland,' 1796, W. Linley's 'Shakespeare's Dramatic Songs,' J. S. Smith's 'Musica antiqua,' etc. They were also the London publishers of George Thomson's Scottish, Irish and Welsh collections. R. K.

PRÉVOST, EUGÈNE PROSPER (b. Paris, Aug. 23, 1809; d. New Orleans, Aug. 30, 1872), studied harmony and counterpoint at the Conservatoire with Seuriot and Jelensperger, and composition with Lesueur; took the second Grand Prix de Rome in 1829, and the Prix de Rome in 1831 for his cantata 'Bianca Capello.' Previous to this he had produced 'L'Hôtel des Princes' and 'Le Grenadier de Wagram'—one-act pieces containing pretty music—both with success, at the Ambigu-Comique. On his return from Italy, 'Cosimo,' an opéra-bouffe in two acts, was well received at the Opéra-Comique, and followed by 'Le bon Garçon,' one act, of no remarkable merit. After his marriage with Eléonore Colon, Prévost left Paris to become conductor of the theatre at Havre. In 1838 he left Havre for New Orleans, where he remained twenty years. He was in great request as a singing-master, conducted the French theatre at New Orleans, and produced with marked success a Mass for full orchestra, and several dramatic works, including 'Esmeralda,' which contained some striking music. None of these was engraved. When the American war broke out he returned to Paris, and became favourably known as a conductor. He directed the concerts of the Champs Elysées, and the fantasias which he arranged for them show great skill in orchestra-

tion. 'L'Illustre Gaspard' (1 act) was produced at the Opéra-Comique (Feb. 11, 1863), but the fellow-pupil of Berlioz, Reber and A. Thomas had virtually fallen out of the race.

His son LÉON, also a good conductor, recalled him to New Orleans, where he settled finally towards the end of 1867. G. C.

PREYER, GOTTFRIED (b. Hausbrunn, Lower Austria, Mar. 15, 1807; d. Vienna, May 9, 1901), studied at Vienna with Sechter, became in 1835 organist of the Reformed Church, in 1844 supernumerary vice-Kapellmeister to the court, in 1846 court organist, in 1862 vice-Kapellmeister, and retired on a pension in 1876. From 1853 he was Kapellmeister of the cathedral. His connexion with the Conservatorium dates from 1838, when he became professor of harmony and counterpoint, and conductor of the pupils' concerts; from 1844-48 he directed the institution. The Tonkünstler-Societät performed his oratorio 'Noah' in 1842, 1845 and 1851. He printed a symphony, op. 16 (Diabelli); several masses and smaller church pieces; music for pianoforte and organ, choruses, and a large quantity of popular Lieder (chiefly Diabelli); 'Hymns for the Orthodox Greek Church,' in three vols., Vienna, 1847; a Mass for four male voices with organ, op. 76, etc. C. F. P.

PRICE, JOHN, a 16th-17th-century English cornet- and viola bastarda-player. Mersenne in his *Harmonie universelle* calls him an excellent piccolo-player. In 1605 he was appointed at the court at Stuttgart, where in 1625 he had formed an English company together with John and David Morell (his brothers-in-law?) and John Dixon. On Apr. 23, 1629, he was appointed in the Dresden court chapel, and there formed, with the Elector's permission, the Little Chamber Music (*Kleine Kammermusik*). The war, however, drove him away, and he received his passport in 1633; but in 1634 his wife still wrote to the Elector for support (Q. L.).

PRICK-SONG, the name given by old English writers upon music to divisions or descant upon a Plain-song or Ground, which were written, or pricked, down, in contradistinction to those which were performed extemporaneously. (See Morley's *Plaine and Easy Introduction*, Second Part.) Shakespeare (*Romeo and Juliet*, Act ii. Sc. 4) makes Mercutio describe Tybalt as one who

'fights as you sing prick-song, keeps time, distance, and proportion; rests me his minim rest, one, two, and the third in your bosom.'

The term 'pricking of musick bookes' was formerly employed to express the writing of them. Payments for so doing are frequently found in the accounts of cathedral and college choirs. W. H. H.

PRIESTNALL, JOHN (b. Saddleworth, near Oldham, Nov. 1819; d. Rochdale, Jan. 18,

1899), English violin-maker and repairer. Originally a joiner and pattern-maker, as well as the inventor of several improvements in wood-cutting machines, Priestnall did not devote himself entirely to violin-making until 1870. From that year until his death he made some 300 excellent violins, 30 violas, 6 violoncellos and 8 double-basses. The wood of these instruments is mostly regular in figure, the workmanship finished, the scrolls cut with a free firm hand, the sound-holes pleasing but somewhat quaint, and the gold-amber oil varnish transparent and handsome. The tone of the violins is powerful, but has something of the viola quality on the lower strings. Priestnall's instruments do not bear a conventional label, but his name is stamped upon the wood with a cold punch in several places, and the opus number marked on the button. As a repairer this maker's inventive genius stood him in good stead, and brought him considerable fame, and a vast number of old English and French violins owe their regeneration to his clever manipulation. During his lifetime Priestnall sold his fiddles for £4, but their value has risen considerably since his death.

BIRL.—MEREDITH MORRIS, *British Violin-Makers*. E. H. & A.

PRIMAVERA, GIOVANNI LEONARDO (b. Barletta, kingdom of Naples). All that we know of his career is that about 1573 he was maestro di cappella to the Spanish Governor of Milan. He has sometimes been confused with Giovanni Leonardo di l' Arpa, though the very title of the work in which the two names occur together shows them to belong to two different persons ('Il 1 lib. de Canzone Napolitane a 3 voci di Jo. Leonardo Primavera con alcune Napolitane di Jo. Leonardo di L' Arpa, 1565'). Primavera's works consist of several Books of Madrigals *a 5* and *6*, some of which are lost, and four Books of Canzone Napolitane or Villotte *a 3*, all published between 1565 and 1584. Palestrina took the themes of a madrigal *a 6* by Primavera, 'Nasce la gioia mia,' as a subject for richer contrapuntal treatment by himself in a Mass bearing the same title, and having the same distribution of voices. The Mass is No. 7 in his 'Fifth Book of Masses,' dedicated to Duke William of Bavaria and published in 1590.

J. B. M.

PRIME (Lat. *prima*; *hora prima*. *Officium (vel Oratio) ad horam primam*), the first of the 'Lesser Hours' in the Roman Breviary.

PRIMO, 'first,' is used in two ways in music: (1) In pianoforte duets *Primo* or *Imo* is generally put over the right-hand page, and then means the part taken by the 'treble' player, while *Secondo* or *2do* is put over that for the 'bass'; while in an orchestral score where, for example, two clarinet parts are written on the same staff, the indications *Imo* or *2do* show which of the pair undertakes

a solo passage. (2) In the repetition of the first section of a movement a few bars are often necessary before the double-bar to lead back to the repetition, which are not required the second time of playing the section. The words *Primo*, *Imo*, *1ma volta* or *1st time* are then put over all these bars, so that when the repeated portion reaches this direction, the player goes on to the part after the double-bar, leaving out the bars over which 'Primo' is written. The first few bars after the double-bar are frequently, but not always, labelled *Secondo*, *2do* or *2nd time*.

PRINCE FERELON, musical extravaganza in 1 act; text and music by Nicholas Gatty. First performance in public, 'Old Vic,' May 21, 1921.

PRINCE IGOR, opera in a prologue and 4 acts; text and music by Borodin; unfinished, but completed by Rimsky-Korsakov and Glazounov. Produced Imperial Opera, St. Petersburg, Oct. 23 (O.S.), 1890; Drury Lane (in Russian), June 8, 1914; Covent Garden (in English), July 26, 1919.

PRINCESSE D'AUVERGNE (Herberg princesses), lyric drama in 3 acts; Flemish text by Nestor de Tièrre, French translation by Gustave Lagye, music by Jan Blockx. Produced in Flemish at Antwerp in 1896.

PRINCESS IDA; OR CASTLE ADAMANT, comic opera in a prologue and 3 acts; written by W. S. Gilbert, music by Sullivan. Produced Savoy Theatre, Jan. 5, 1884.

M.

PRINCESS OF KENSINGTON, A, comic opera in 2 acts; text by Basil Hood, music by Edward German. Produced Savoy Theatre, Jan. 22, 1903.

PRINCIPAL. (1) An organ stop. In Germany the term is very properly applied to the most important 8-foot stops of open flue-pipes on the manuals, and to open 16-foot stops on the pedals, thus corresponding with our 'open diapasons.' But in this country the Principal is, with very few exceptions, the chief open metal stop of 4-foot pitch, and should more properly be termed an Octave or Principal octave, since it sounds an octave above the diapasons.

J. S.

(2) PRINCIPAL OF PRINZIPALE. A term employed in many of Handel's scores for the third trumpet part. This is not usually in unison with the first and second trumpets, which are designated as Tromba 1^{mo} and 2^{do}. It is often written for in the old soprano clef with C on the lowest line, and has a range somewhat lower than the trombe. The older works on instrumentation, such as those of Schilling, Koch, Schläderbach and Lichtenthal, recognise the difference and draw a distinction between 'Principal-Stimme' and a 'Clarinet-Stimme.' It is obvious that whereas the tromba or clarino represented the old small-bored instrument, now obsolete, for which the

majority of Handel's and Bach's high and difficult solos were composed, the Principal, in tone and compass, more nearly resembled the modern large-bored military trumpet. The contrast can easily be recognised by an examination of the overture to the 'Occasional Oratorio' in Arnold's edition, or that of the *Dettingen Te Deum* as published by the Gorman Handel Society. In the latter the old soprano, in the former the usual treble clef, is adopted. W. H. S.

In old trumpet music, in which trumpets with kettle-drums formed the whole band, four and sometimes five trumpet parts occur; in these cases, as in those noted above for three trumpets, the Principal is the name given to the lowest part. (See TRUMPET.) D. J. B.

(3) Principals, in modern musical language, are the solo singers or players in a concert, and those who lead in the different departments of the orchestra. W. H. S.

PRING. Three brothers, sons of James Pring, were all chorists of St. Paul's under Robert Hudson, as follows:

(1) JACOB CUBITT (b. Lewisham, 1771; d. 1799) was organist of St. Botolph, Aldersgate Street, London. He graduated as Mus.B. at Oxford in 1797, was the composer of several anthems, glees and other vocal pieces, and one of the founders of the *Concentores Sodales*. He published two books of glees, canons, etc., a set of eight anthems, and a set of harpsichord sonatinas. Seven glees and a catch by him are included in Warren's Collections.

(2) JOSEPH (b. Kensington, Jan. 15, 1776; d. Bangor, Feb. 13, 1842) was on Apr. 1, 1793, appointed organist of Bangor Cathedral on the resignation of Olive, but not formally elected until Sept. 28, 1810. In 1805 he published 'Twenty Anthems,' and on Jan. 27, 1808, accumulated the degrees of Mus.B. and Mus.D. at Oxford. In June 1813 he and three of the vicars-choral of Bangor Cathedral presented a petition to the Court of Chancery for the proper application of certain tithes which had, by an Act of Parliament passed in 1685, been appropriated for the maintenance of the cathedral choir, but had been diverted by the capitular body to other purposes. The suit lasted until 1819, when Lord Chancellor Eldon, setting at naught the express provisions of the Act, sanctioned a scheme which indeed gave to the organist and choir increased stipends, but yet kept them considerably below the amounts they would have received if the Act had been fully carried out. Dr. Pring, in 1819, printed copies of the proceedings in the suit, and other documents, with annotations, forming a history of the transactions, which has long been a scarce book. He also wrote a pamphlet on the Menai Tubular Bridge. He was buried in the Cathedral Yard at Bangor. His epitaph is given in *West's Cath. Org.* p. 4.

(3) ISAAC (b. Kensington, 1777; d. Oct. 18, 1799) became in 1794 assistant organist to Dr. Philip Hayes at Oxford, and on his death in 1797 succeeded him as organist of New College. He graduated at Oxford in Mar. 1799, and died of consumption in the same year.

(4) JAMES SHARPE (b. circa 1811; d. Jan. 3, 1868), son of Joseph (2), succeeded his father at Bangor. He was successively chorister, assistant organist and organist from 1842, being appointed from year to year. He was buried in Glenadda Cemetery, Bangor. Some chants by him are in Warren's Collections (*West's Cath. Org.*). W. H. H.

PRINTING OF MUSIC. The art of printing music followed quickly upon that of ordinary letterpress typography. Though the printing of music was fairly frequent upon the Continent, yet it was nearly a century after the first continental work that any attempt was made in that direction in England.

The date 1465 is mentioned as that when music was first printed, but this is not confirmed. A more authentic date is 1476, when Ulrich Hahn printed a missal at Rome. Another early musical work is that of Jorg Reyser of Würzburg with the date 1481.

Other music printers of the 15th century were Octavianus Scotus working at Venice, S. Planck (1482), J. Sensenschmidt (1455), Erhard Ratdolt (1487). In the works of these printers the notes were printed in black and the stave lines were red, which, of course, were worked off at a second printing.

It is quite obvious that double printing is a somewhat difficult operation to effect correctly. The registration has to be carefully carried out, so that each note stands upon its particular stave line. It presently occurred to these early printers that as the art of wood engraving was by no means in its infancy, it was quite as easy to cut a page of music in wood as it was to produce a woodcut book illustration, and that this music block could be worked off with the text at one printing. How very clumsily this was done is shown overleaf in the reproduction of a page of *Musices opusculum* printed by Nicolaus Burtius at Bologna in 1487. Meanwhile Ottaviano dei PERRUCCI (*q.v.*) effected great improvements in musical typography, and he may be considered the first to print florid song from metal type. He settled at Venice, and his first work was a collection of ninety-six songs, published in 1501; another work of his appeared in 1503.

From this period music printing on the Continent was fairly frequent and more or less good, both from metal type and from wood blocks.

It is perhaps a strain to call the few notes in Higden's *Polycricon*, printed by Wynkyn de Worde at Westminster in 1495, the first English music printing. It is but eight notes built up

from 'quads' and 'rules' to illustrate a passage in the text. In the previous edition, printed by Caxton in 1482, the notes are filled in by hand.

type at this period, and Rastell is credited with four pages set up in movable type in *A New Interlude and Mery of the Nature of iiij Elements*, the date being probably 1539.

Page (Tractatus 2dus, p. 76) from the *Opusculum* of Burtius (Burzio),
in the Library of A. H. Littleton, Esq.

There was little of music printing in England after this first essay of 1495; R. Pynson printed several missals between 1500 and 1520, and Wynkyn de Worde printed the York missal in 1509. Gough, Grafton, Vautroller, Kynston and others were printing off music

One of the finely printed English music books of this time is an oblong quarto work of which only the bass part remains to us. It was printed by Wynkyn de Worde in 1530, the stave lines being printed after the notes had been done. It is a book of songs, and its

title runs: *In this boke ar cōteynyd xx sōges, ix of iiij ptes and xi of thre ptes.* The book is in the British Museum.

William Sores and John Day were among the early music printers. The editions of Sternhold and Hopkins's metrical Psalter by John Day were very great, and his earliest copy was 1582. (See PSALTER.)

In 1575 Queen Elizabeth granted a patent right over the printing of music and the right of importations from foreign sources. The patent was granted to William Byrd and Thomas Tallis in recognition of services given at the Chapel Royal. Thomas Tallis died in 1585 and Byrd became the sole owner of the right. He allowed, for monetary considerations, sundry printers to print music, and all the imprints during the period of Byrd on the patent state that the book is printed by the assignment of William Byrd. The patent was for twenty-one years. After the expiration of this patent another one in the same terms was granted to Thomas Morley. This was in 1598.

In the madrigal period English music printing began to flourish. Thomas East (Este) was one of the first to print music. He began working in or about 1587-88, and he died in 1609. He was succeeded by Thomas Snodham, who may have married his widow, who was working as late as 1624. Another music printer in the madrigal era was Peter Short, who worked at the 'Star' on Bread Street Hill from 1584-1603, when he was succeeded by Humfrey Lownes. These printed many of the collections of madrigals and similar works from movable type. The other printers of this kind of work were William Barley, John Windet, W. Stansby and Edward Allde. After about 1620 the issue of printed music books in England seemed to languish. The restrictive patents had ceased to be in force, and the printing press was free. It was not until 1651, when John Playford arose, that music found expression in English publications.

John Playford, in the early part of his business career, was practically the only music publisher in England. Thomas Harper printed his first works, and afterwards W. Godbid. John Playford, junior, was apprenticed with Godbid, and when Godbid died, young Playford and the widow, Anne, printed for the elder Playford.

At this time, before the introduction of the 'new tied note,' all quavers and semiquavers were printed separately, and if necessary 'tied' with a semicircular slur. The whole effect of music printing at this period was crudity. The article on Playford in *D.N.B.* is wrong in attributing to him the introduction of the 'new tied note.' Both the Playfords, senior and junior, were dead before any specimen of its use is found. It occurs in the

second book of *Comes Amoris*, dated 1688, which was printed by Thomas Moore. John Heptinstall, another London printer, made some improvements, but William Pearson some years later carried these improvements further. In 1699 he published *Twelve New Songs . . . chiefly to encourage William Pearson's new London character.* The 'tied' note printed the quavers and semiquavers with their tails united, and was generally adopted in place of the earlier form.

In 1767 Henry Fover (q.v.) obtained a patent for improvements in music type. He issued sheet and other books beautifully printed by the new type at cheap rates. About 1770 Robert Falkener purchased Foug's plant and continued his business.

Musical typography progressed steadily towards perfection. Certain printers still used woodcut blocks for music printing, notably John Watts, who used wood blocks for his six volumes of *Musical Miscellany*, 1729-31, and for his series of the ballad operas. Most of the magazines which published a page of music used engraved wood blocks, and woodcut blocks were printed from in some psalm-books published in Wakefield and Leeds.

In 1827 Edward Cowper was granted a patent for his improvements in music printing. The notes, made of copper, were set up separately, and the stave lines printed afterwards. Samuel Chappell, Goulding & Co. and Willis used his patent for a time, but soon reverted to their engraved method.

In Scotland music printing from movable metal type began early. Robert Lekpreuvick printed at Edinburgh a *Forme of Prayers* in 1565 and T. Bassandine printed psalm tunes in 1575. Henry Chatteris printed an edition of *The Psalmes of David in Metre* in 1595. Another early Edinburgh printer was Andro Hart. In Aberdeen John Forbes printed his *Cantus* in 1662, with two later editions, 1666 and 1682.

Although the art of engraving was well established and practised, nobody appears to have thought of its application to music printing in the 16th century. The first engraved music in England was probably *Parthenia*, or the *Maidenhead of the First Musicke the ever was printed for the Virginals*. The book is not dated, but it is generally referred to as engraved in 1611. One or two engraved works were printed in the early part of the 16th century, but typographical works were the rule.

Thomas Cross was most active in the production of engraved music. He engraved Henry Purcell's *Sonnates of iii parts*, 1683, the Songs of Leveridge, and many hundred single half-sheet songs which were currently fashionable in the early years of the 18th century. Before his time songs were chiefly in collections,

but Cross has the distinction of introducing the single sheet or half-sheet song. The latest date the writer has found for his work is 1732.

After Cross had been working some years the practice of stamping the notes on pewter plates was introduced. Hawkins fixes the date 1710 for this method, and credits John Walsh and John Hare as its authors. The method of punching pewter plates and working off on a copperplate press was continued up to about 1840 or 1850. It is the method used to-day, but the first pull is on a lithograph transfer, and this being placed on a lithographic stone, copies are worked off very rapidly. Cross resented the new method of punching the notes on the plate instead of engraving. At the foot of some of his sheets he makes protest against this practice. One of these is 'Beware of ye nonsensical puncht ones.'

The modern method of music printing from metal type has attained wellnigh to perfection. It is a very complex business to set up, and requires a compositor specially trained for the work. The fount for average use consists of about 400 pieces. The type is too costly to bear the pressure of the printing press, so after the proof the music is worked off from electrotypes or stereotypes.

Double printing is not now in use. For large editions it is found cheapest and best to use music typography, but for ordinary work the stamped pewter plate method with the copies pulled from a lithographic stone is most convenient. The plates can be reserved for a new edition if it be called for.

BIBL.—An important work on the subject is *The Earliest English Music Printing* by ROBERT STEELE, 1903. This gives many reproductions of early music printing. Another work is *The History of Music Engraving and Printing* by WILLIAM GABRIEL, 1923. Two most excellent articles on John Day, the early music printer, appeared in *Mus. T.* for Mar. 1906 and Nov. 1907.

F. K.

PRINTZ, WOLFGANG KASPAR (VON WALDTHURN) (b. Waldthurn, Palatinate, Oct. 10, 1641; d. Sorau, Oct. 13, 1717), was appointed cantor at Sorau in 1665. Printz wrote a considerable number of theoretical and didactic books on music. The only one which is still of historical importance is *Historische Beschreibung der edlen Sing- und Klingkunst* (1690). His compositions have not been preserved (Riemann).

PRIORIS, JOHANNES, is mentioned in 1490 as being organist at St. Peter's in Rome, and in 1507 as maître de chapelle to Louis XII. of France. Several of his compositions appear in the choir-books of the Papal Chapel, three masses, five motets and two Magnificats. Only one work of his was ever printed, a Requiem Mass a 4 in Attaignant's collection of 1532, to which Ambros grants considerable merit. Ambros also speaks of his MS. chansons as quite interesting works, but Eitner (Q.-L.) points out a serious mistake into which Ambros has

fallen, of attributing other works to Prioris which are not his.

J. R. M.

PRISE DE TROIE, the first part of Berlioz's *TROYENS* (q.v.).

PRIULI (PRIOLI), GIOVANNI (d. 1629), a musician in the chapel of the Archduke Ferdinand at Graz c. 1604. From 1619 till his death he was Kapellmeister to the Emperor Ferdinand II. He wrote several books of sacred songs and psalms, as well as 3 books of secular madrigals a 5 v.; also 'Musiche concertate' a 3-9 v. (1622), 'Delicie musicali,' 2-10 v. (1625), and motets and songs in collective volumes (Q.-L.).

PROCH, HEINRICH (b. Vienna, July 22, 1809; d. Dec. 18, 1878), well-known composer of Lieder, Kapellmeister and teacher of singing, was destined for the law, but studied the violin with enthusiasm, and in 1833-34 frequently played in public in Vienna. He became in 1837 Kapellmeister of the Josephstadt theatre, Vienna, and in 1840 of the court opera, retiring with a pension in 1870. On the foundation of the short-lived Comic Opera in 1874 he was appointed its Kapellmeister. His popularity is mainly due to his Lieder, among the best-known of which we may cite 'Das Alpenhorn' and a famous set of florid vocal variations. A three-act comic opera, 'Ring und Maske,' was produced in 1844, and three one-act pieces in the following year. He trained a large number of celebrated singers—among others Dustmann, Caillag and Tietjens. Several good German translations of Italian operas—the 'Trovatore,' for example—are from his pen.

F. G.

PRODANÁ NEVESTÁ (The Bartered Bride), comic opera in 3 acts; words by K. Sabina, music by Bedřich Smetana. Produced Prague, May 30, 1866; London, in German (Die verkaufte Braut), Drury Lane, June 26, 1895, and Covent Garden, Jan. 24, 1907.

PRODIGAL SON, THE, oratorio by Sullivan, composed for the Worcester Festival of 1869. Dr. Samuel Arnold's oratorio on the same subject was performed in 1777. (See ENFANT PRODIGE for operas, etc., of Auber, Debussy, Gaveaux, Ponchielli and Wormser.)

G.

PROFE (PROFUS), AMBROSIVS (b. Breslau, Feb. 12, 1589; d. Dec. 27, 1661). After studying theology at Wittenburg, he received the appointment of Lutheran cantor and schoolmaster at Jauer, in Silesia. When in 1629 Lutheranism was suppressed in Jauer, and Catholic worship re-established, Profe was obliged to return to Breslau, where he engaged in mercantile pursuits. In 1633 he was appointed organist to the church of St. Elizabeth, Breslau, not, however, giving up his other business. In consequence of the falling in of part of the church and the destruction of the organ, his organistship came to an end, but he continued his mercantile career, and died as a well-to-do merchant.

It is not specially as a composer, but as a diligent editor and collector that Profe deserves mention. Between 1641 and 1646 he published four considerable collections of 'Geistlicher Concerten und Harmonien a 1, 2, 3, 4, 5, 6, 7, etc., vociibus cum et sine violinis & basso ad organum, aus den berühmtesten italienischen und andern Autoribus,' etc. The composers chiefly represented are those of the later Venetian School, with a few of their German followers, as Heinrich Schütz. In 1649 a supplement appeared with the title 'Corollarium geistlicher Collectaneorum.' Prefixed to the first part of this collection, though not in all copies, is a Compendium Musicum, by way of a brief instruction in singing. In this little work Profe attacks the old Solmisation system founded upon the Hexachord, for which he receives the warm commendation of Mattheson. Another collection of Profe bears the title 'Cunis solennibus Jesuli recens-nati sacra genethliaca' (1646), which, as the title indicates, consists of various songs for Christmas-tide. To this collection Profe contributes two of his own compositions for two to six voices, with instrumental accompaniment. In 1657 Profe put forth a small handy edition of Heinrich Albert's 'Arien.' For a fuller account of Profe see Dr. Reinhold Starke's article in *Monatshefte*, xxxiv. pp. 189-215.

J. R. M.

PROFESSOR is a term which in its application to musicians is used exceedingly loosely in this country. It is often applied to and assumed by private teachers of all grades, and is used commonly of members of the teaching staffs of the various musical colleges.¹

It is properly applied to the occupant of a chair of music at a university. There is one professorship of music in each of the older universities and in several of the newer ones. The conditions of the appointment and the duties of the professor differ in every case, but while, until late in the 19th century, the holders of musical professorships were generally required only to give occasional public lectures and to preside over examinations for degrees (see DEGREES IN MUSIC), there is a general tendency now to make the professorship of music an active, and in some cases a vigorous, teaching appointment. The following is a list of the principal professorships in the universities of the British Isles, with the names of the holders thereof in 1926:

Oxford (founded by William Heyther, 1626).
Sir Hugh P. Allen, Mus.D.

Cambridge (founded 1684). Edward J. Dent.

Dublin (Trinity College, founded 1764).
C. H. Kitson, Mus.D.

Edinburgh (founded by John Reid, 1839).
Donald Francis Tovey.

Durham (founded 1897). John C. Bridge, Mus.D.

Birmingham (founded 1903). Granville Bantock.

London (King Edward Professorship, founded 1910); Percy C. Buck, Mus.D.

University of Wales (Aberystwyth). Sir H. Walford Davies, Mus.D.

(See also GRESHAM PROFESSOR OF MUSIC.)

PROGRAMME (from *πρό*, 'before,' and *γράμμα*, 'a writing'), a list of the pieces to be performed at a concert, usually accompanied by the names of the performers. The term seems to have come into use in this connexion in the 19th century, and is now often further applied to the books containing the words and the analytical remarks on the pieces. (See ANALYTICAL NOTES.)

PROGRAMME-MUSIC. Every composition may, theoretically, be described as either Absolute Music or Programme-music, since it will either set out to describe a series of events or it will not. There is, however, no hard and fast line of division between the two, and in consequence divergence of opinion is often more than a little acrimonious.

In one sense all music is Programme-music, since it is a panorama of the composer's mood and an index to his character. When a composer, instead of placing the simple word *Allegro* or *Adagio* at the head of his movement, adds *giocoso* or *mesto*, he is telling you beforehand that you are to judge it as the biography of a particular mood. This fact is accentuated when a whole group of movements, in the form of a Sonata or Symphony, is labelled 'Pastorale' or 'Pathétique.'

Since, however, all music that is not deliberately manufactured must be the outcome of feeling, it is agreed to give the name Absolute to music which owes its coherence to structure, even though the development of the emotional basis may be the outstanding feature of the work. If we open Bach's Forty-eight or Beethoven's sonatas and play page one, we are playing Absolute Music; not because imaginative people find it impossible to invent a 'story' for the music, but because it is possible to enjoy it to the full without any such help. Indeed, even if music is written on the most definite of programmes, it is still open to us to ignore the fact, and to judge and enjoy the work *qua* Absolute Music.

In its crudest form Programme-music is purely imitative. The songs of birds, the clang of bells, the roll of thunder, the swirl of the wind, or the crackling of fire—all of these are capable of an imitation so exact as to be scarcely distinguishable from the genuine original. No one is so censorious as to say that it is always and essentially derogatory to the Art of Music that it should be put to such purely repre-

¹ At the R.C.M. an official distinction is drawn between members of the Board of Professors and of the general teaching staff.

sentative uses, since in opera it is clear that occasions arise where such use is not only justifiable but imperative. But serious musicians do claim, as a fundamental law of Taste, that simple imitation is only justifiable when music has deliberately abdicated its right to be considered the sole end, and is content (as in opera) with being a factor in the end aimed at.

Hence all purely descriptive music—once so popular in the form of 'Battle-pieces,' etc., and still lingering on in the occasional 'Storm'—is put out of court. It may be amusing, as a pun may be; it may be skilful, as an acrostic may be; but the one is no more properly Music than the other is properly Literature.

Between these two extremes of Absolute and Imitative there lies an immense uncharted tract. It is the field of Analogy and Suggestion. The real question at issue is not whether the composer may, without losing caste, descend from the Absolute plane to that of Suggestion, since all composers have continually done so. It is merely a question of how far we think they can legitimately stray.

The matter is one so clearly depending on Imagination that our opinions on the limits of the programme are apt to vary as much as our Imaginations do. No one presumably resents Beethoven's hint of 'Fate knocking at the door.' No one thinks it derogatory to Art that Chopin should have tried to suggest the solemn pageantry of a cortège in his 'Marche funèbre.' Both are cases where the suggestion is a help to appreciating the music. But many critics think that when music is definitely founded on facts—as in Debussy's 'La Cathédrale engloutie,' or is definitely illustrating a story—as in Sibelius' 'Valse triste,' its dignity is smirched.

It is not possible, nor desirable, to dogmatise at the present time on the limits that composers should place on their use of the programme. What began as an occasional *jeu d'esprit* has suddenly grown, in modern times, into a serious form of Art. And its growth has possibly been too rapid for its health. There is only one sane test that can be applied, at this moment, to any piece of Programme-music by an unprejudiced person. Is the music, *qua* music, satisfactory to me apart from its programme; and if not, do I, in my own individual case, think that the deficiency is made good when I apply the programme and review my verdict? F. C. B.

PROGRESSION is motion from note to note, or from chord to chord. The term is sometimes used to define the general aspect of a more or less extended group of such motions. It is also used of a group of modulations, with reference to the order of their succession. The expression 'progression of parts' is used with special reference to their relative motion in respect of one another, and of the laws to which such relative motion is subject. (See MORRIS.) O. H. F.

PROKOFIEV, SERGE SERGEEVITCH (b. Soln-zovo, Ekaterinoslav, Apr. 11 (23), 1891), composer, received his musical education at the St. Petersburg Conservatoire. His teachers for theory, harmony and composition were Rimsky-Korsakov, Liadov, Wihtol and Nicolas Tcherépchin, and he was one of the most brilliant pupils of the piano class of Anna Nicolaievna Essipova. In 1910 he gained the Rubinstein Prize with his first piano concerto (op. 10), and in 1914 he left the Conservatoire with the highest prize awarded for piano-playing. From that time onward he lived successively in London, Paris, Japan and the U.S.A. In 1921 the Chicago Opera Association produced his opera in 4 acts, 'The Love for three Oranges,' composed to his own libretto based on one of the dramatic fables of Carlo Gozzi, 'L'amore delle tre melerancie.' The same year saw the production of his ballet 'Chout,' by Serge Diaghilev's Russian Ballet Company, in Paris. Prokofiev now lives at Ettal, near Oberammergau in Bavaria, but he frequently appears in the principal European musical centres, chiefly as a brilliant exponent of his own works for the piano.

As a composer Prokofiev does not court popular appreciation. By its deliberate avoidance of all romantic and emotional factors, his music is calculated never to appeal to the hearer's feelings: it is designed to please solely as a kind of decorative pattern and to avoid conveying extra-musical ideas of any kind. Whatever its intrinsic value may be, it has the merit of refusing to force itself on the listener's attention or to capture his affection by any means which are not legitimately and absolutely musical.

No music that refuses to compromise with sentiment and to stimulate sympathy can be expected to strike many hearers as pleasing. The best of Prokofiev's works, nevertheless, produce a kind of physical exhilaration the bracing effect of which few can resist. The third piano concerto, the 'Scythian Suite' and the fourth piano sonata may be singled out as good and characteristic examples of his art. Elsewhere the composer's invention sometimes loses itself in arid experiments, as in the 'Sarcasmes' for piano, with their systematic combinations of two distinct tonalities; or in sheer extravagance of studiously displeasing sounds, as in the ballet 'Chout,' the scenario of which is based on a folk-tale from the Government of Perm of 'a buffoon who hoodwinked seven other buffoons.'

In his later works, such as the violin concerto and the 'Symphonie classique,' Prokofiev returns to an almost primitive simplicity, and his more recent piano pieces and songs are not always devoid of a certain lyricism, although they never err on the side of sensibility.

Prokofiev might well be described as a cubist

in music. His thematic material is generally square-cut and clearly defined, his idiom hard and dry, his texture free from half-tones and haziness, and his forms are angular and symmetrical. The continuous, unflagging rhythmic motion of many of his movements gives an impression of physical energy and sureness of purpose.

The decision as to whether Prokofiev was successful in his setting of 'The Love for three Oranges' depends on one's outlook upon the position occupied by Carlo Gozzi in literature. Those who hold the more common view that the 18th-century champion and reviver of the *commedia dell'arte* was an early precursor of the Romantics, are bound to consider that so entirely objective a musician as Prokofiev failed to do him justice; but those who are aware that Gozzi's fairy-tales are nothing else than biting satires directed against the plays of Goldoni and Chiari, and that he had no feeling for the fantastic beauty they already possessed before he handled them, cannot help agreeing that the grotesque, caustic and wholly unromantic music of Prokofiev is admirably suited to the subject.

LIST OF PRINCIPAL WORKS

PIANO SOLO

5 Sonatas (opp. 1, 14, 28, 29, 38); Toccata (op. 11); Suite of 10 Pieces (op. 12); 'Barcasomes' (op. 17); 'Visions fugitives' (op. 22); 'Contes de la vieille grand'mère' (op. 31); and several sets of smaller pieces.

CHAMBER MUSIC

Ballade, V'cl and PF. (op. 15); Overture on Hebrew Themes, Clar. PF. and Str. quartet (op. 34); Quartet for Ob., Clar., Viola and Double Bass; Scherzo for 4 Bassoons (art. from one of the PF. pieces).

ORCHESTRA

3 PF. Concertos (opp. 10, 16, 26); Symphonietta (op. 5); Vin. Concerto (op. 19); 'Scythian Suite' (Ale and Lolly) (op. 20); 'Symphonie classique' (op. 25); 'Les Réves', Tableau Musical.

VOCAL WORKS

2 Songs (op. 9); 'The Ugly Duckling' (after Hans Andersen), Voice and PF. (op. 18); 5 Songs (op. 27); 5 Songs without Words (op. 35); 5 Songs (Balmont) (op. 36); 'They are Seven', Choral Tone Poem.

STAGE WORKS

'Chout' (The Buffoon), ballet (op. 21); 'The Love for three Oranges', opera (after Carlo Gozzi) (op. 33); 'Maddalena', opera (MS.); 'The Gambler', opera (after Dostoevsky) (MS.).

E. B.

PROLATION (Lat. *prolatio*; Ital. *prolazione*), a subdivision of the rhythmic system which in Mediaeval Music governed the proportionate duration of the Semibreve and the Minim. (See NOTATION, subsection TIME SIGNATURES.)

PROMENADE CONCERTS. Although the concerts given at Vauxhall, Ranelagh, Marylebone and other public gardens might be placed under this head, the class of entertainment now so well known in this country under the name was introduced into London from Paris.

In 1838 some of the leading London instrumentalists gave concerts at the English Opera-House (Lyceum), under the title of 'Promenade Concerts à la Musard.' The pit was boarded over and an orchestra erected upon the stage. The band consisted of sixty performers, including many of the most eminent professors; J. T. Willy was the leader, and Negri the conductor; the programmes were composed exclusively of

instrumental music, each consisting of four overtures, four quadrilles (principally by Musard), four waltzes (by Strauss and Lanner) and a solo, usually for a wind instrument. The first of the concerts was given on Dec. 12, and they were continued, with great success, during the winter. Early in 1839 the band of Valentino, the rival of Musard, came to London, and gave concerts at the Crown and Anchor Tavern, the programmes being composed of music of a higher class, the first part usually including a symphony; but they met with little support. In Oct. 1839 the original speculators resumed operations at the Lyceum. On June 8, 1840, 'Concerts d'Été' were begun at Drury Lane under the conductorship of Eliason the violinist, with Jullien as his assistant, and a band of nearly 100, and a small chorus. Some dissensions among the original managers led to concerts of the same class being given by Willy in the autumn and winter at the Princess's Theatre, the majority of the band, however, still performing at the Lyceum. About the same period promenade concerts were given at Drury Lane, and Musard was brought over to conduct them. In Jan. 1841 'Concerts d'Hiver' were given in the same house by JULLIEN (*g.v.*), who soon firmly established himself in public favour and continued to give this class of concerts until 1859.

In 1850 promenade concerts conducted by Balfe were given at Her Majesty's Theatre, under the title of 'National Concerts'; a large band and chorus and some eminent principal singers were engaged, but the speculation proved unsuccessful. After Jullien's retirement, promenade concerts were annually given in the autumn at Covent Garden, with Alfred Mellon as conductor until 1866, and afterwards under various conductors, Arditi, Hervé, Sullivan, Riviere, etc.

W. H. H.

The autumnal promenade concerts languished for a good many years, until, in fact, 1895, when Robert Newman, who had been appointed manager of the lately opened QUEEN'S HALL (*g.v.*), and had previously managed such concerts at Covent Garden, started a new series in that hall under the direction of Henry J. Wood. Since then these concerts have been given nightly for ten weeks¹ (Aug. to Oct.) in each year, and have been of the greatest possible benefit to the musical public. They have always had the particular character of a wide catholicity in the selection of the programmes, and it was soon found that the best music could be made attractive, and that gradually the general level of the week's music could be considerably raised. A typical week's programme in the early days differs

¹ In 1926 the season lasted only nine weeks, but was followed by some Saturday afternoon concerts, described as Promenade Matinees. In March 1927 Messrs. Chappell announced their intention of abandoning the whole enterprise. The future of the concerts is still in debate.

very little from that obtaining to-day, with its Wagner, classical and 'popular' nights. Later it became the practice to play all the Beethoven symphonies during the season in chronological order, while quite recently special attention has been given to the symphonies of Haydn. Novelty soon began to appear, foreign and native, and it may truly be said that at no period in our musical history has the young British composer been more materially helped. The production of his work and the effect upon so receptive an audience has indeed been a most valuable experience. In more recent years he has received further experience in being invited to conduct his own music. It is interesting to note that the programmes have always been divided into two parts, and that in early days the second part was of the lightest character, fantasias and dance music interspersed with ballads; but Wood did not rest satisfied until he had given the orchestral section of this part the same interest as that of the first. The history of the concerts in certain aspects is that of the orchestra. (See NEW QUEEN'S HALL ORCHESTRA.)

Among the numerous composers whose works have been given for the first time, actual novelties or new to London, the following names may be mentioned:

AMERICAN: Chadwick, Converse, Hadley, MacDowell. BELGIAN: Lekaou, Jules de Swert. CZECH: Dvořák (four of the symphonic poems). FINNISH: Järnefeldt, Sibelius. FRENCH: Bruneau, Debussy ('L'Après-midi d'un faune'), Franck (Variations Symphoniques, pianoforte and orchestra), D'Indy, Lalo, Ravel. GERMAN: Bruch, Goetz, Goldmark, Kistler, Korngold, Mahler (two symphonies), Reger, Schönberg, Strauss. HUNGARIAN: Bartók, Dohnányi. ITALIAN: Busoni, Casella, Sinigaglia, Malipiero. POLISH: Paderewski. ROMANIAN: Enesco. RUSSIAN: Balakirev, Glazounov, Prokofiev, Rachmaninov, Rimsky-Korsakov (Sheherazade Suite), Stravinsky, Tchaikovsky (a large number of works, including 'Casse-noisette' suite, the three early symphonies and 'Mantred').

The long British list may be said to contain the names of every composer who has earned distinction. N. C. G.

PROMETHEUS. (1) Beethoven's only Ballet (op. 43); designed by Salvatore Viganò; composed in 1800, and produced, for Mlle. Casentini's benefit, Mar. 28, 1801, in the Burg-theater, Vienna, under the title of 'Die Geschöpfe des Prometheus.' It contains an overture, an 'Introduction' and sixteen numbers. The title of the first edition, an arrangement for the piano (Vienna, 1801, numbered in error op. 24), is 'Gli uomini di Prometeo'; English edition, 'The men of Prometheus.'

(2) 'Prometheus Unbound,' a setting for soli, chorus and orchestra of Shelley's poem, by C. H. H. Parry, produced Gloucester Festival, 1880.

(3) 'Prometheus, the poem of fire,' the fifth and last of Scriabin's symphonic works for large orchestra and piano *obbligato*, originally in-

tended to be accompanied by a 'light' machine, noted in the score as *Luca*.

PROPHÈTE, LE, opera in 5 acts; words by Scribe, music by Meyerbeer. Produced Opéra, Paris, Apr. 16, 1849; in Italian, in 4 acts, Covent Garden, July 24, 1849; New Orleans, Apr. 2, 1850; New York, Nov. 25, 1853. G.

PROPORTION (Lat. *proportio*; Ital. *proporzione*), a term used in arithmetic to express certain harmonious relations existing between the several elements of a series of numbers; and transferred from the terminology of mathematics to that of theoretical music, in which it plays a very prominent part. In music, however, the word is not always employed in its strict mathematical sense; for a true Proportion can only exist in the presence of three terms; in which point it differs from Ratio, which is naturally expressed by two. Now the so-called 'Proportions' of musical science are almost always expressible by two terms only, and should therefore be more correctly called Ratios; but we shall find it convenient to assume that, in musical phraseology, the two words may be lawfully treated as synonymous—as, in fact, they actually have been treated by almost all who have written on the subject, from Joannes Tinctor, who published the first musical dictionary, in the year 1474,¹ to the Theorists of the 18th and 19th centuries.

Thomas Morley, in his *Plaine and easie Introduction to Practical Musick* (London, 1597), gives a table, reproduced opposite, which exhibits, at one view, all the different kinds of Proportion then in use.

To use this table (1) When the name of the Proportion is known, but not its constituents, find the name in the upper part of the diagram; follow down the lines of the lozenge in which it is enclosed, as far as the first horizontal line of figures; and the two required numbers will be found under the points to which those diagonal lines lead. Thus, Tripla Sesquialtera lies near the left-hand side of the diagram, about midway between the top and bottom; and the diagonal lines leading down from it conduct us to the numbers 2 and 7, which express the required Proportion in its lowest terms. (2) When the constituents of the Proportion are known, but not its name, find the two known numbers in the same horizontal line; follow the lines which enclose them, upwards, into the diagonal portion of the diagram; and, at the apex of the triangle thus formed will be found the required name. Thus, the lines leading from 2 and 8 conduct us to Quadrupla.

The uppermost of the horizontal lines comprises all the Proportions possible, between the series of numbers from 1 to 10 inclusive, reduced to their lowest terms. The subsequent lines give their multiples, as far as 100; and, as

¹ 'PROPORTIO est duorum numerorum habitudo' (Joannes Tinctoris, *Terminorum musicorum differentiarum*. 1474.)

these multiples always bear the same names as their lowest representatives, the lines drawn from them lead always to the apex of the same triangle.

By means of the Proportions here indicated the theorist was enabled to define the difference

of pitch between two given sounds with mathematical exactness. Thus the octave, sounded by the half of an open string, is represented by the Proportion called Dupla; the Perfect Fifth, sounded by 2-3 of the string, by that called Sesquialtera; the Perfect Fourth, sounded by 3-4, by Sesquiquarta. These Ratios are simple enough, and scarcely need a diagram for their

elucidation; but as we proceed to more complex intervals, and especially to those of a dissonant character, the Proportions grow far more intricate, and Morley's table becomes really valuable.

A certain number of these Proportions are also used for the purpose of defining differences of rhythm; and, in mediæval music, the latter class of differences involves even greater complications than the former.

The nature of Mood, Time and Prolation are fully explained under NOTATION (*q.v.*). It was chiefly for the sake of elucidating the mysteries of this style of writing that Morley gave his table; and, by way of making the matter clearer, he followed it up by a setting of 'Christes Crosse be my speed,' for three voices, containing examples of Dupla, Tripla, Quadrupla, Sesquialtera, Sesquiquarta, Quadrupla-Sesquialtera, Quintupla, Sextupla, Septupla, Nonupla, Decupla and Supertripartita quatas, giving it to his pupil, Philomathes, with the encouraging direction—'Take this Song, peruse it, and sing it perfectly; and I doubt not but you may sing any reasonable hard wrote Song that may come to your sight.'

Nevertheless, Morley himself confesses that these curious combinations had fallen quite into disuse long before the close of the 16th century.

W. S. R. abridged.

For the proportions of pitch see MONOCHORD and ACOUSTICS.

PROPOSTA (Lat. *dux*; Eng. Subject), a term applied to the leading part in a fugue or point of imitation, in contradistinction to the Risposta, or response (Eng. Answer; Lat. *comes*). The leading part of a canon is usually called the Guida, though the term Proposta is sometimes applied to that also.

W. S. R.

PROPRIETAS, propriety (Ger. *Eigenheit*), a peculiarity attributed by mediæval writers to those ligatures in which the first note was sung as a breve, the breve being always understood to represent a complete measure (Lat. *tactus*; Old Eng. Stroke). Franco of Cologne describes ligatures beginning with breves, longs and semibreves as *Ligaturæ cum, sine and cum opposita Proprietate*, respectively.

PROSE, see SEQUENCE.

PROSKE, KARL (b. Gröbning, Upper Silesia, Feb. 11, 1794; d. Dec. 20, 1861), editor of the celebrated collection of ancient church music called MUSICA DIVINA (*q.v.*). His father was a wealthy land-owner at Gröbning. Having studied medicine he made the campaign of 1813-15 as an army surgeon, but being compelled to retire by his health he took his degree as Doctor of Medicine at Halle, and settled as government physician at Oppeln in Upper Silesia. Here he suddenly became a religious enthusiast, a change to which his devoted

to church music doubtless contributed. On Apr. 11, 1826, he was ordained priest by Bishop Sailer at Ratisbon, where he became vicar-choral in 1827, and canon and Kapellmeister of the Cathedral in 1830. From this time, with the aid of his private fortune, he began his celebrated collection of church music, residing for long in Italy exploring the great MS. collections there, and scoring from the voice-parts many very beautiful but hitherto unknown works, and publishing them in a cheap, accurate and legible form as 'Musica divina.' Each volume is preceded by introductory remarks, biographical and bibliographical. Proske died of angina pectoris, bequeathing his collection to the episcopal library of Ratisbon, of which it forms one of the chief ornaments. F. G.

BIBL.—*Kirchenmusikalisches Jahrbuch*, 1894; Bibliography with diary kept by Proske while in Italy; K. WEINMANN, *K. Proske, der Restaurator der klassischen Kirchenmusik*, 1900.

PROUT, EBENEZER, Mus.D., B.A. (b. Oundle, Northamptonshire, Mar. 1, 1835; d. Hackney, Dec. 5, 1909), earned considerable reputation as teacher, lecturer and theoretician.

He graduated at London, 1854, studied the pianoforte under Charles Salaman, acted as organist at various chapels, and was at Union Chapel, Islington, in 1861-73. From 1861-85 he taught the pianoforte at the Crystal Palace School of Art. In 1862 he gained the first prize of the Society of British Musicians for the best string quartet, and in 1865 their first prize for pianoforte quartet. From 1871-74 he was editor of *The Monthly Musical Record*, and from that time was successively music critic of *The Academy* (1874-79) and *The Athenæum* (1879-89). He conducted the Borough of Hackney Choral Association in 1876-90, and was appointed professor of harmony and composition at the National Training School of Music in 1876. In 1879 he was given a similar post at the R.A.M., and in 1884 at the G.S.M.

His many compositions include cantatas, symphonies, organ concertos and chamber music. Of more importance are his theoretical works which have been received as standard text-books. They include a primer on *Instrumentation* (1876); *Harmony, its Theory and Practice* (1889; twentieth edition, 1903); *Counterpoint, Strict and Free* (1890); *Double Counterpoint and Canon* (1891); *Fugue* (1891); *Fugal Analysis* (1892); *Musical Form* (1893); *Applied Forms* (1895); *The Orchestra* (1897). Most, if not all, of these have gone through several editions. In 1894 Prout was elected Professor of Music in the University of Dublin, and received the honorary degree of Mus.D. from the university in the following year. His work as an editor should also be mentioned; he provided ADDITIONAL ACCOMPANIMENTS (q.v.) for several of Handel's oratorios (such as

'Samson,' for the Leeds Festival of 1880), and in 1902 he brought out a new full score and vocal score of the 'Messiah,' and conducted a performance of the work, according to his own readings, given by the Royal Society of Musicians in the Queen's Hall, Nov. 12, of the same year. (See an article in *Mus. T.*, 1899, p. 255.) W. H. H., rev.

PRUCKNER, DIONYS (b. Munich, May 12, 1834; d. Heidelberg, Dec. 1, 1896), was a pupil of F. Nist, and appeared as a pianist at the Leipzig Gewandhaus at the age of 17. He then studied under Liszt at Weimar until 1855, when he settled in Vienna, making concert-tours from there. In 1859 he was appointed professor at the Stuttgart Conservatorium, and in 1864 received the title of court pianist. (Riemann.)

PRUDENT, EMILE RACINE GAUTHIER (b. Angoulême, Apr. 3, 1817; d. Paris, May 13, 1863), pianist and composer, never knew his parents, but was adopted by a piano-tuner, who taught him a little music. He entered the Paris Conservatoire at 10, and obtained the first piano prize in 1833, and the second harmony prize in 1834. He had no patrons to push him, and his want of education not being supplied by natural facility he had a long struggle with the stern realities of life, but by dint of patience and perseverance he overcame all obstacles. His first performance in public was at a concert with Thalberg, whose style he imitated, and the success of his fantasia on 'Lucia di Lammermoor' (op. 8) established him with the public. He then made constant excursions in France, and occasional trips abroad, but his home continued to be in Paris, and there he composed and produced his new pieces. His compositions, about seventy in number, include a trio for PF., violin and violoncello; a concerto-symphonic 'Les Trois Rêves' (op. 67); several brilliant and pleasing morceaux de genre, such as 'Les Bois,' and 'La Danse des fées'; fantasias on operas, or themes by classical composers; transcriptions with and without variations, cleverly calculated to display the virtuosity of a pianist; and finally 'Études de genre,' also intended to show off manual dexterity. He was a good teacher, and formed several distinguished pupils. In England he was well known. He played a concerto in B \flat of his own composition at the Philharmonic, May 1, 1848; returned in 1852 and introduced his elegant morceau 'La Chasse,' which he repeated at the New Philharmonic Concert, June 1, 1853. G. C.

PRUME, FRANÇOIS HUBERT (b. Stavelot near Liège, June 3, 1816; d. there, July 14, 1849), violinist. Having received his first instruction at Malmédy, he entered in 1827 the newly opened Conservatoire at Liège, and in 1830 that at Paris, where he studied for two

years under Habeneck. Returning to Liège he was appointed professor at the Conservatoire, although only 17 years of age. In 1839 he began to travel, and visited with much success Germany, Russia and the Scandinavian countries. Prume was an elegant virtuoso. He is chiefly remembered as the composer of 'La Mélancolie,' a sentimental *pièce de salon*, which for a time attained an extraordinary popularity.

P. D.

PRUMIER, (1) ANTOINE (b. Paris, July 2, 1794; d. there, Jan. 20, 1868), learned the harp from his mother, and afterwards entered the Conservatoire, and obtained the second harmony prize in Catel's class in 1812. After this, however, he was compelled by military law to enter the École polytechnique; but in 1815 he gave up mathematics, re-entered the Conservatoire, and finished his studies in counterpoint under Eler. He then became harpist in the orchestra of the Italiens, and, on the death of Nadermann in 1835, professor of the harp at the Conservatoire. In the same year he migrated to the Opéra-Comique, but resigned his post in 1840 in favour of his son, the best of his pupils. Prumier composed and published about a hundred fantasias, rondeaux and airs with variations for the harp—all well written but now antiquated. He received the Legion of Honour in 1845, and was vice-president of the Association des Artistes Musiciens for seventeen years consecutively. He died from the rupture of an aneurism at a committee meeting of the Conservatoire. He had retired on his pension the year before (1867), and been succeeded by Labarre, at whose death (Apr. 1870) the professorship devolved upon Prumier's son.

(2) ANGE CONRAD ANTOINE (b. Paris, Jan. 5, 1820; d. there, Apr. 3, 1884), lauréat in 1838. He was assistant professor of the harp at the Conservatoire, 1838–51, and professor, 1870–84. Like his father he wrote well for the harp, and was a skilled performer and a musician of taste.

G. C.

PSALM. (1) For the musical recitation of the prose translation of the Psalms see articles ANTI-PHON, GREGORIAN TONES, INFLEXION, PSALMODY, RESPONSORIAL PSALMODY, CHANT and CHANTING.

(2) For the musical settings of metrical versions of the Psalms, see HYMN and PSALTER.

(3) The elaborate settings of entire psalms, whether for chorus alone, for solo voices, or for combinations of voices and instruments, are mentioned under the names of their composers.

PSALMODY. There are three different types of Psalmody which have been in use in the Christian Church, and are broadly distinguished from one another. The two most important classes, the Antiphonal and Responsorial Psalmody, will be found under ANTI-PHON and RESPONSORIAL PSALMODY. The third,

which is called Direct Psalmody (*Psalmodya in directum*, or *Psalmus directaneus*), has never had the same vogue, and now only survives in a few positions. The fundamental distinction between the three is as follows: Responsorial Psalmody is the alternation between the soloist and choir, Antiphonal Psalmody the alternation of two choirs, while the Direct Psalmody has no alternation at all, but simply goes straight forward. The last appears in simple shape in the Benedictine services, where still a psalm is sung *in directum*, that is, in unbroken chorus. The method of singing is of the simplest sort, being mere recitation with a slight inflexion, thus:

The same type of Psalmody is found in a more elaborate shape in the TRACT sung in the Mass, for, like the antiphonal Responsorial Psalmody, this also varies in degree of ornamentation.

The tones employed for the Psalms in conjunction with the Antiphon are simple. They are found in the Ambrosian music in a more primitive form than in the Gregorian, with a less definite tonality, and that absence of methodical arrangement which is characteristic of the Ambrosian music. The Gregorian tones have all been reduced to order. A tone corresponds with each of the eight modes; and its reciting note is the dominant of the mode. Each tone consists of two members corresponding with the two halves of the psalm verse. According to the law already explained in the article INFLEXION it has an intonation leading up to the reciting note, and a cadence called the mediation at the end of the first half, the reciting note is then resumed in the second half and leads to a final cadence called the ending. This is the fixed shape of all Gregorian tones; only in the case of the irregular or 'peregrine' tone it is relinquished and the recitation takes place at a different pitch in the second half from that used in the first half. According to the strict Gregorian system the mediation of the first half of the tone is also fixed. It is only in debased plain-song that the clear distinction between the tones has been obliterated by the introduction of fancy mediations. Variety is secured by the final cadences, technically called the endings. These vary in number according to the different tones. They never have been uniform. The earliest documents show a certain amount of variety of use, and this variety survives. The larger number of mediæval endings, however,

were in universal use in the Middle Ages, and there was much more agreement than variety.

A more elaborate form of tone was adopted for the gospel-canticles; the intonation and mediation, and to a certain extent even the reciting note, were decorated, while the ending remained the same as in the case of the ordinary psalms. The forms of tone in use for the antiphons at Mass, namely the Introit and Communion, were of a still more decorated character. Each tone, therefore, exists in three forms, as a psalm tone, as a gospel-canticle tone, and as an introit tone. The Sarum form of the Gregorian tones is here subjoined. It is as good a representative as any of the best mediæval traditions on the subject.

FIRST MODE.

Psalm-tones and endings.

First.

Dixit do-mi-nus do-mi-nus me-o: se-de a dex-tris me-is

Second. Third. Fourth.

Fifth. Sixth. Seventh.

Eighth. Ninth.

The Gospel-canticle tone.

Benedictus dominus de-us Ie-ra-el: quia visitavit, etc.

The Introit-tone and endings.

First.

Beati im-ma-cu-la-ti in vi-a: qui ambulat in lege do-mi-ni

Second. Third. Fourth.

SECOND MODE.

Psalm-tone and endings.

First.

Dixit do-mi-nus do-mi-nus me-o: se-de a dex-tris me-is

Second.

The Gospel-canticle tone.

Benedictus dominus de-us Ie-ra-el: quia visitavit, etc.

The Introit-tone and ending.

Quare fremuerunt gentes: et populi... sunt in ma-ni-a

THIRD MODE.

Psalm-tone and endings.

First.

Dixit do-mi-nus do-mi-nus me-o: se-de a dex-tris me-is

Second. Third. Fourth.

Fifth. Sixth.

The Gospel-canticle tone.

Be-ne-dictus, etc.

The Introit-tone and endings.

Can-ta-te do-mi-ni-mo can-ti-cum no-vum:

First. Second.

can-ta-te do-mi-ni om-ni-ter-ra

FOURTH MODE.

Psalm-tone and endings.

First.

Dixit dominus do-mi-nus me-o: se-de a dex-tris me-is

Second. Third. Fourth.

Fifth. Sixth. Seventh. Eighth. Ninth.

The Gospel-canticle tone.

Be-ne-dic-tus do-mi-nus de-us Ie-ra-el: quia visitavit, etc.

The Introit-tone and endings.

First.

Be-a-ti im-ma-cu-la-ti in vi-a: qui am-bu-lant

Second.

in le-gem do-mi-ni

FIFTH MODE.

Psalm-tone and endings.

First.

Dixit do-mi-nus do-mi-nus me-o: se-de a dex-tris me-is

Second.

Third.

The Gospel-canticle tone is the same.

The Introit-tone and endings.

In te do-mi-ni sper-a-vi, non con-fun-dar in e-ter-num

First.

in jus-ti-ti-a tu-a li-ber-a me

Second.

Third.

SIXTH MODE.

Psalm-tone and ending.

Dixit dominus do-mi-ni me-o: se-de a dex-tris me-is

The Gospel-canticle tone is the same as the First Mode.

The Introit-tone and ending.

Do-mi-ni est ter-ra et ple-ni-tu-do eius.

or-bis ter-ra-rum et u-ni-ver-si qui ha-bi-tant in e-o

SEVENTH MODE.

Psalm-tone and endings.

First.

Dixit do-mi-nus do-mi-ni me-o: se-de a dex-tris me-is

Second.

Third.

Fourth.

Fifth.

Sixth.

Seventh.

Intonation for Gospel-canticles.

Be-ne-dic-tus, etc.

Introit-tone and endings.

First.

De-mi-nus . . . ex-ul-tet ter-ra. le-tan-tur . . . in su-as mul-tas.

Second.

Third.

EIGHTH MODE.

Psalm-tone and endings.

First.

Dixit do-mi-nus do-mi-ni me-o: se-de a dex-tris me-is.

Second.

Third.

The Gospel-canticle tone is like the Second Mode, a fifth higher.

The Introit-tone and endings.

Do-mi-nus reg-na-vit de-co-rem in du-tus est. in-du tus

First.

est do-mi-nus for-ti-tu-di-nem et prae-cinxit se.

Second.

THE IRREGULAR OR PEREGRINE TONE.

In exitu Israel de Egypto. domus Jacob de populo barbaro

Those psalm-tones provide great variety of rhythm. The mediations are in some cases formed from a single accent (Modes II., V., VIII.), in others from a double accent (III. and VII.), while in Modes I. and VI. the inflexion is on the penultimate independently of accent. Still greater differences prevail in the endings, ranging from the single-note inflexion of IV. 6 to the five-note inflexion of III. 6. They thus avoid rhythmically all the measured monotony of the Anglican chant as well as the wearisome recurrence of all closes in harmony.

Responsorial Psalmody in its simplest form has entirely disappeared. Psalms are no longer sung anywhere in the Western Church in the simple inflected monotone of a soloist with a brief interpolation on the part of the congregation; nor does anything survive to show exactly what musical form this primitive Psalmody had. It is probable that it was not unlike the Litany. Responsorial Psalmody survives in its elaborated form in the Gradual at Mass and at the Office in the shape of a Respond alternating with one or more verses. There is no fixed tone for use with the verses in the case of the Gradual, but there is a fixed responsorial tone in each mode for use with the verses of the responds of the Office. These eight responsorial verse-tones are here given in outline:

THE TONE OF THE RESPOND-VERSE IN THE SEVERAL MODES.

First.

1 2 3 4 5 1 2 3 4 5

Glo-ri-a pa-tri et fi-li-o et spi-ri-tu-i sanct-o.
Per-fec-ti e-is qui spe-rant in te in con-spectu a-li-o-rum ho-mi-num.

Second.

Glo-ri-a pa-tri et fi-li-o et spi-ri-tu-i sanct-o.
Peo-ca-vinus cum pa-tri-bus nos-tris in-lus-te ... ta-tem fe-ci-tus.

Third.

Glo-ri-a pa-tri et fi-li-o et spi-ri-tu-i sanct-o.
Dum er-go essent ... metum lu-de-o-rum so-nus repen-te... ve-nit au-per e-o-s.

Fourth.

Glo-ri-a pa-tri et fi-li-o et spi-ri-tu-i sanct-o.
Vi-dens vi-di ... ei-us au-di-vi et des-cen-di li-be-ra-re e-u-m.

Fifth.

Glo-ri-a pa-tri et fi-li-o et spi-ri-tu-i sanct-o.
In do-mi-no laudabitur a-ni-ma me-a au-di-ant man-sue-ti et le-ten-tur.

Sixth.

Glo-ri-a pa-tri et fi-li-o et spi-ri-tu-i sanct-o.
Mis-e-re-re mei mi-se-re-re me-i quo-ni-am in te ... a-ni-ma me-a.

Seventh.

Glo-ri-a pa-tri et fi-li-o et spi-ri-tu-i sanct-o.
In prin-ci-pio fecit deus ce-lum et ter-ram et cre-avit in e-a ho-mi-nem.

Eighth.

Glo-ri-a pa-tri et fi-li-o et spi-ri-tu-i sanct-o.
Con-serva me domine ... in te o-cu-fi-do; dix-i do-mi-no De-us me-us es tu.

They will be seen to consist of the same elements as were noted before in the Antiphonal psalm-tone; each of them is double in character, has an intonation leading to the recitation, each in turn is closed by a mediation; then in the second half the recitation is resumed (with or without a second intonation to lead into it), and the whole is closed by a final cadence. Here it is the final cadences that are the most fixed parts of the tone. They are pentsyllabic, that is to say, the last five principal syllables of each half of the verse are set to the five groups of the cadence. If there were small light syllables too unimportant to be counted they were neglected in the reckoning and a small note (represented here with a white centre) was inserted to accommodate them somewhere in the body of the cadence. If the psalm-verse is

long the recitation itself may be a good deal decorated. If it is short the reciting note may altogether disappear. Similarly the intonation is expanded or contracted as occasion may demand. The *Gloria Patri* represents a contracted form of the psalm-verse, but side by side with it indications are given to show the employment of the same melody to a longer text.

It only remains to give here, by way of contrast, some of the Ambrosian Psalm Tones. They are more simple, and are notable for the absence of mediation. In the Gregorian system the mediation is an essential inflexion in the first half of the verse, corresponding with the ending in the second half. The archaic Ambrosian tones have no intonation, no mediation, and very simple endings, as the following examples show.

Contrast these with the Gregorian forms given above.

The Gregorian tones were adapted to the English Prayer Book by MERBECKE (*q.v.*), and remained in use in some form down at least to the middle of the 18th century. Here, for example, is the First Tone 4th Ending, as given for Venite on Sundays in Playford's *Introduction to the Skill of Musick* (first published 1654, nineteenth edition, 1730:

In harmonised form they were the starting-point of the Anglican chant (see CHANT) which practically superseded the old tones; and they disappeared until they were revived by the Church movement in the middle of the 19th century (see GREGORIAN TONES). W. H. F.

For Metrical Psalmody, see PSALTER, THE ENGLISH METRICAL, and BOURGEOIS.

PSALTER, THE ENGLISH METRICAL, or paraphrastic rhyming translation of the Psalms and Evangelical Hymns, intended to be sung, dates from the third year of King Edward the Sixth, the year 1549; but if we may believe the accounts usually given of the subject, the practice of singing compositions of this nature in England is far older, having existed among the sympathisers with the new doctrines long before the Reformation; it may even have had its beginnings among the followers of Wycliffe or Walter Lollard. With regard to this supposition, one thing only is certain: Sternhold's translations—the nucleus of the metrical Psalter which has come down to us—were not by any means the first. Sir Thomas Wyatt the elder had already translated the seven penitential Psalms, and the Earl of Surrey three others; while about the same time Miles Coverdale, an eminent divine—formerly, like Luther, an Augustinian monk, and one of the earliest converts to the reformed doctrines,—brought out thirteen of the most popular Psalms, translated into English (two of them twice) in metrical form, apparently from the rhymed versions contained in the current German hymn-books published between 1524 and 1536. But the scope of the work was not confined to a few of the Psalms of David, as will be seen from the title:

'Ghostly psalmes and spirituall songes drawn out of the holy Scripture, for the comfort and consolacyon of such as loue to reioyce in God and his worde (Colophon). Imprinted by me Johan Gough. Cum priuilegio Regali.' No date (? 1539),

the compositions being twenty-six in number. There are, among other hymns, three to the Holy Spirit, two of the Commandments, two of the Creed, two of the Paternoster; hymns of the Nativity and the Resurrection, the Magnificat and Nunc Dimittis. The rest are for the most part sacred songs of the chorale type; but there is one office hymn—'Christe qui lux es'—with its proper tune. Of the tunes, which accompany the words throughout—no Psalm or hymn being without a tune—it may be said generally that they were probably taken as they were found in the 'Geistliche Lieder' referred to above, attached to the hymns or Psalms selected for translation. Many have already been identified, and, judging from the entire similarity of style which is seen throughout the collection, it may be supposed that the rest will eventually reveal their derivation from the same source. They are of course strictly modal. All the modes except the fifth and sixth are represented, both in their original and transposed positions. The first, fourth, twelfth and thirteenth each contribute five tunes; the rest one or two each. The melodies are often exceedingly fine and striking, but from the nature of the metres employed, metres very different from those adopted for similar purposes in this country, few of them could be thought to have exercised any influence upon the English ideal of metrical music. The only copy of Coverdale's work known to exist is in the Library of Queen's College, Oxford. Its rarity, and also the fact that its methods were not to any apparent extent adopted in England, may be in part due to the circumstance of its suppression in 1539, the year, indeed, of its supposed publication, by order of King Henry VIII.

In 1549, the year in which Sternhold's first small work was published, without tunes, there appeared a metrical translation of the Psalter complete, together with the Evangelical Hymns, and music set in four parts, of which the title is as follows:

'The Psalter of David newly translated into Englysh metre in such sort that it maye the more decently, and wyth more delyte of the mynde, be read and songe of al men. Wherunto is added a note of four partes, with other thynges, as shall appeare in the Epistle to the Reader. Translated and Imprinted by Robert Crowley in the yere of our Lorde MDXLIX the XX daye of September. And are to be sold in Eley rentes in Holbourne. Cum priuilegio ad Imprimendum solum.'

In the 'Epistle to the Reader' the music is described thus:

¹ 'Note,' or 'note of song,' was, or rather had been, the usual description of music set to words. At this date it was probably old-fashioned, since *Neuloudon* occurs again. In 1644 Cramer, in his letter to Henry VIII. respecting his *Litany*, speaks of the whole of the music sometimes as 'the note,' and sometimes as 'the song.'
² A copy of this book is in the library of Brasenose College, Oxford. Thanks are due to the College for permission to examine it. Another copy—differently set up—is in Christie Miller's library, Britwell, Bucks.

Geneva were all, except one or two, in double common measure; and there are no foreign tunes of this date which will fit that peculiarly English metre. The true answer is probably to be found in Ravenscroft's classified index of the tunes in his Psalter, published in 1621, where, under the heading of 'English tunes imitating the High Dutch, Italian, French and Netherlandish tunes,' will be found almost all the original 'church tunes' which remained in use in his day. According to this excellent authority, therefore, the 'church tunes,' as a whole, are English compositions. Furthermore, considering that they appear for the first time in this volume, published at Geneva, three years after the emigration, it becomes exceedingly probable that they are imitations of those which the emigrants found in use at Geneva among the French Protestants, which were chiefly, if not entirely, the tunes composed by Bourgeois for the Psalter of Marot and Bésa. (See *BOURGEOIS*.) Some of the French tunes evidently at once became great favourites with the English Protestants. Already in this volume we find a most interesting attempt to adapt the famous French tune now known as the Old Hundredth to the double common measure. It is set to the 3rd Psalm. Here the first line is note for note the same as in the French tune: the difference begins with the difference of metre in the second line. We find further that as the translation of the Psalter proceeded towards completion, Keith and Whittingham, residents in Geneva, rendered some of the later Psalms into special metres, and retranslated others—among them the 100th, in order to provide for the adoption of the most admired French tunes intact: these will be mentioned in detail, so far as they have been as yet identified, later on. The question of authorship is of secondary interest. There were at this time, no doubt, many English musicians capable of composing them, among the organists or singing men in the cathedrals and Chapel Royal, who are known to have entered almost as warmly as the clergy into the religious discussions of the time, and of whom many took refuge at Geneva along with the clergy. Immediately upon the death of Mary, in 1558, in which year a second edition appeared,¹ this work found its way to England. The tunes at once became popular, and a strong and general demand was made for liberty to sing them in the churches. In the following year permission was given, in the 49th section of the injunctions for the guidance of the clergy, where, after commanding that the former order of service (Edward's) be preserved, Elizabeth adds:

'And yet nevertheless, for the comforting of such as delight in music, it may be permitted, that in the beginning or in the end of Common Prayer, either at

¹ The discovery of a copy of the second edition was described in *The Times*, Sept. 19, 1902.

morning or evening, there may be sung an hymn, or such like song, to the praise of Almighty God, in the best melody and music that may be conveniently devised, having respect that the sentence of the hymn may be understood and perceived.'

This permission, and the immediate advantage that was taken of it, no doubt did much to increase the popular taste for Psalm-singing, and to hasten the completion of the Psalter. For in the course of the next year, 1560, a new edition appeared, in which the number of Psalms is raised to 64, with the following title:

'*Psalmes of David in Englishe Metre, by Thomas Sterneholde and others: conferred with the Ebrue, and in certeine places corrected, as the sense of the Prophete required: and the Note joynted withall. Very mete to be used of all sorte of people privately for their godly solace & comfort, laying aparte all ungodly songes & ballades, which tende only to the nourishing of vice, and corrupting of youth. Newly set forth and allowed, according to the Quenes Maiesties Injunctions. 1560.*'

The same title, practically word for word, appears in the English edition of 1561, the only known copy of which is in the library of the Society of Antiquaries, where it is bound up together with a Bible of 1553. It bears Day's name as printer and the date. It contains, moreover, an *Introduction to learn to sing*, a feature hitherto unknown in Sternhold, but not unfrequently occurring afterwards. Although no mention is made of them in the title, the edition of 1560 includes metrical versions of three of the Evangelical Hymns, the ten Commandments, the Lord's Prayer and the Creed. The practice of repeating the tunes begins here, for though the number of Psalms has been increased, the number of tunes has diminished. There are only forty-two, of which twenty-four have been taken on from the previous edition; the rest are new. Among the new tunes will be found six adopted from the French Psalter, in the manner described above. They are as follows: the tunes to the French 50th, 121st, 124th, 127th, 129th and 130th have been set to the same Psalms in the English version; the French 107th has been compressed to suit the English 120th. The tune for the metrical commandments is the same in both versions.

Twenty-three more translations were added in another edition brought out in 1561 at Geneva:²

'*Four score and seven Psalmes of David in English Mitre, by Thomas Sterneholde and others: conferred with the Hebrew, and in certeine places corrected, as the sense of the Prophet requirith. Whereunto are added the Songe of Simeon, the then commandments and the Lord's Prayer. 1561.*'

From the 'Forme of Prayers,' etc., bound up with it, we gather that it was 'printed at Geneva by Zacharie Durand.' The number of tunes had now been largely increased, and raised to a point beyond which we shall find it scarcely advanced for many years afterwards. The exact number

² A copy, without name of place or printer, and imperfect at the end, is in the library of Christ Church, Oxford.

³ The unique copy of this book is in the Library of St. Paul's Cathedral.

is sixty-two; of which twenty-four had appeared in both previous editions, fourteen in the edition of 1560 only and two in the edition of 1556 only. The rest were new. Among the new tunes will again be found several French importations. The tunes for the English 50th and 104th are the French tunes for the same Psalms. The 100th is the French 134th from Claudin le Jeune's collection, Leyden, 1633,

the 113th is the French 36th, the 122nd the French 3rd, the 125th the French 21st, the 126th the French 90th. Thus far there is no sign of any other direct influence. The imported tunes, so far as can be discovered, are all French; and the rest are English imitations in the same style.¹

Before we enter upon the year 1562, which saw the completion of Sternhold's version, it is necessary that some account should be given of another Psalter, evidently intended for the public, which had been in preparation for some little time, and actually printed in 1567 or 1568 according to John Daye's license granted by the Stationers' Company, but which was never issued—the Psalter of Archbishop Parker. The title is as follows:

'The whole Psalter translated into English metre, which containeth an hundredth and fifty psalmes. Imprinted at London by John Daye, dwelling over Aldersgate beneath S. Martyn's. Cum gratia et privilegio Regiæ maiestatis, per decennium.'

The privilege sufficiently proves the intention to publish. It seems at first sight curious, that while it has been necessary to speak of the copies of published works hitherto referred to as

unique, it should be possible to say of this, which was never given to the public, that at least eight examples are in existence. The reason, however, is no doubt to be found in the fact that the few copies struck off as specimens were distributed to select persons, and so, finding their way at once into careful hands, were the better preserved. The existing copies, so far as they have been compared, correspond exactly; and show that the work was complete, lacking nothing except the date, for which a blank space was left at the foot of the title-page. The verse of this translation, which is in various metres, is in every way far superior to that of Sternhold's; but, though the author has evidently aimed at the simplicity and directness of his original, he is frequently obscure. The suppression of the work, however, was probably not due to any considerations of this kind, but either to the enormous popularity of Sternhold's version, which was every day becoming more manifest, or, as it has been sometimes supposed, to a change in the author's opinion as to the desirability of psalm-singing. In any case, it is much to be regretted, since it involved the suppression of nine tunes specially composed by Tallis, in a style peculiar to himself, which, if the work had been published, would at all events have once more established the standard of an English tune in four parts, broad, simple and effective, and suitable for congregational use; and, from the technical point of view, finer than anything of the kind that has been done since. Whether it would have prevailed or not, it is impossible to say. We have seen how, in the case of Tye, the influence of Geneva triumphed over the beauty of his music; and that influence had become stronger in the interval. On the other hand, the tendency to florid descent, so hateful to the reformers, was absent from the work of Tallis. The compositions in this book are printed, in the manner then customary, in separate parts, all four being visible at once. They are in nearly plain counterpoint; the final close is sometimes slightly elaborated, but generally the effect—which is one of great richness, solemn or sweet according to the nature of the particular scale—is obtained by very simple means. Eight of the tunes are in the first eight modes, and are intended for the Psalms; the ninth, in Mode XIII., is supplementary, and is set to a translation of *Veni Creator*. Two of them have been revived, and are now well known. One appears in our hymnals as 'Tallis,' and is the supplementary tune in Mode XIII.; the other, generally set to Bishop Ken's evening hymn, and known as 'Canon,' is the tune in Mode VIII. With regard to the latter, it should be mentioned that in the original it is twice as long as in the modern form, every section being repeated before proceeding to the next. With this exception the melodies appear as they were

¹ The imported tunes sometimes underwent a slight alteration, necessitated by the frequency of the feminine rhymes in the French version. By this method a new character was often given to the tune.

written; but, as regards the three other parts, only such fragments have been retained as have happened to suit the taste or convenience of compilers. In the original, too, the tenor leads in the canon; this is reversed in the modern arrangement. The tune in Mode I., given as No. 78 in *The English Hymnal* (1906), transposed a third higher, is in a more severe and solemn strain than the two just mentioned. The treatment of the sixth—natural in the first half of the tune and flat in the latter half—is in the finest manner of Dorian harmony. The instruction with regard to the tunes is as follows:

'The tenor of these partes be for the people when they will syng alone, the other parte, put for greater queers, or such as will syng or play them privately.'

The method of fitting the Psalms to appropriate tunes is very simple. At the head of each Psalm stands an accent—grave, acute or circumflex—indicating its nature as sad, joyful or indifferent, according to the author's notion: the tunes bear corresponding accents. The work is divided into three parts, each containing fifty Psalms; and since it is only in the third part that these accents appear (together with a rather ingenious system of red and black brackets, showing the rhyming structure of the verse), we may perhaps conclude that the work was not all printed at once, and that it was only towards the end—possibly after the promulgation of Elizabeth's injunctions—that it was thought desirable to have tunes composed.

The first complete edition of the Sternhold and Hopkins version, containing the whole Psalms, the Evangelical Hymns and the Spiritual Songs, was published in 1562.¹ The second edition followed in 1563 and the third in 1564; the title is as follows:

'The whole booke of Psalmes collected into English Meter, by T. Sternhold, I. Hopkins, and others, conferred with the Ebrue, with apt notes to singe them withal. Faithfully perused and allowed according to thorder appointed in the Queene's maiestie's Injunctions. . . . Imprinted at London by John Day dwelling over Aldersgate. . . . 1562.'

The number of tunes in this edition is sixty-five, including a few duplicates; of which ten had appeared in all the previous editions, nine in the editions of 1560 and 1561 only, seven in the edition of 1561 only, and four in the edition of 1560 only. The rest were new. It will have been observed that a considerable rearrangement of the tunes had hitherto taken place in every new edition; the tunes which were taken on from previous editions generally remained attached to the same Psalms as before, but the number of new tunes, as well as of those omitted, was always large. Now, however, the compilers rested content; and henceforward, notwithstanding that a new edition was published almost yearly, the changes were so gradual that it will only be necessary to take note of them at intervals. The tunes are

printed without bars, and in notes of unequal length. Semibreves and minims are both used, but in what seems at first sight so unsystematic a way—since they do not correspond with the accents of the verse—that few of the tunes, as they stand, could be divided into equal sections; and some could not be made to submit to any time-signature whatever. In this respect they resemble the older ecclesiastical melodies. The idea of imitation, however, was probably far from the composer's mind, and the object of his irregularity was no doubt variety of effect; the destruction of the monotonous swing of the alternate eight and six with accents constantly recurring in similar positions. To the eye the tunes appear somewhat confused; but upon trial it will be found that the long and short notes have been adjusted with great care, and, taking a whole tune together, with a fine sense of rhythmical balance. The modes in which these compositions are written are such as we should expect to meet with in works of a popular, as opposed to an ecclesiastical, character. The great majority of the tunes will be found to be in the modes which have since become our major and minor scales. The exact numbers are as follows: twenty-eight are in Modes XIII. and XIV., twenty-three in Modes IX. and X., twelve in Modes I. and II., one in Mode VII., and one in Mode VIII. All these modes, except the last two, are used both in their original and transposed positions.

A knowledge of music was at this time so general that the number of persons able to sing or play these tunes at sight was probably very considerable. Nevertheless, as in the edition of 1560, so also in 1561, 1562, 1564 and again in 1577 and 1581, there was published *An Introduction to Learn to Sing*, consisting of the scale and a few elementary rules, for the benefit of the ignorant. The edition of 1607 contained a more elaborate system of rules, and 'like, those of 1570, 1573, 1583, 1584, 1588, 1590,' had the sol-fa joined to every note of the tunes throughout the book.

For competent musicians, a four-part setting of the 'church tunes' was also provided by the same publisher:

'The whole psalmes in foure partes, which may be song to al musically instruments, set forth for the encrease of vertue, and abolishing of other vayne and trifling ballades. . . . Imprinted at London by John Day, dwelling over Aldersgate, beneath Saynt Maryns. Cum gratia et privilegio Regie Maiestatis, per septennium. 1563.'

Notwithstanding this title, only the first verse of each Psalm is given; enough to accompany the notes once, and no more: it is therefore only a companion to Sternhold; not, like almost all subsequent works of the kind, a substitute. But in other respects it was designed on a much larger scale than anything

¹ A copy is in the John Rylands Library at Manchester.

² A second edition was published in 1565.

that appeared afterwards. It is in four volumes, one for each voice. Every composition, long or short, occupies a page; and at the head of each stands one of the fine pictorial initial letters which appear in all Day's best books about this time. But it is as regards the quantity of the music that it goes furthest beyond all other collections of the same kind. The composers of subsequent Psalters thought it quite sufficient, as a rule, to furnish each of the sixty-five 'church tunes' with a single setting; but here, not only has each been set, but frequently two and sometimes three and four composers have contributed settings of the same tune; and as if this were not enough, they have increased the work by as many as thirty tunes, not to be found in Sternhold, and for the most part probably original. The total result of their labours is a collection of 141 compositions, of which four are by N. Southerton, eleven by R. Brimble, seventeen by J. Hake, twenty-seven by T. Causton and eighty-one by W. Parsons. It is worthy of remark that while all the contemporary musicians of the first rank had already been employed upon contributions to the liturgical service—not only by way of MSS., but also in the printed work, 'Certayne notes,' etc., issued by Day in 1560—the composers to whom the publisher had recourse for this undertaking are all, except one, otherwise unknown.¹ Nor is their music, though generally respectable and sometimes excellent, of a kind that requires any detailed description: it will be sufficient to mention a few of its most noticeable characteristics, interesting chiefly from the insight they afford into the practice of the average proficient at this period. The character of these compositions in most cases is much the same as that of the simple settings of the French Psalter² by Goudimel and Claude le Jeune, the parts usually moving together, and the tenor taking the tune. The method of Causton, however, differs in some respects from that of his associates: he is evidently a follower of Tye, showing the same tendency towards florid counterpoint, and often indeed using the same figures. He is, as might be expected, very much Tye's inferior in invention, and, moreover, still retains some of the objectionable collisions, inherited by the school of this period from the earlier descendant, which Tye had refused to accept.³ Brimble offends in the same way, but to a far greater extent: indeed, unless he has been cruelly used by the printer, he is sometimes unintelligible. In one of his compositions, for instance, having to accommodate his accompanying voices to a

difficult close in the melody, he has written as follows⁴:

The difficulty arising from the progression of the melody in this passage was one that often presented itself during the process of setting the earliest versions of the 'church tunes.' It arose whenever the melody, in closing, passed by the interval of a whole tone from the seventh of the scale to the final. When this happened, the final cadence of the mode was of course impossible, and some sort of expedient became necessary. Since, however, no substitute for the proper close could be really satisfactory—because, no matter how cleverly it might be treated, the result must necessarily be ambiguous—in all such cases the melody was sooner or later altered. As these expedients do not occur in subsequent Psalters, two other specimens are here given of a more rational kind than the one quoted above.

MODE IX. Transposed (Final, D).

MODE I. Transposed (Final, G).

¹ This passage, however, will present nothing extraordinary to those who may happen to have examined the examples, taken from Rieby, Pigott and others, in Morley's *Plaine and Easie Introduction to Practicall Musick*. From those examples it appears that the laws which govern the treatment of discords were not at all generally understood by English musicians, even as late as the beginning of Henry the Eighth's reign. It is quite evident that discords (not passing) were not only constantly taken unprepared, but, what is more strange, the discordant note was absolutely free in its progression. It might either rise or fall at pleasure: it might pass, by skip or by degree, either to concord or discord; or it might remain to become the preparation of a suspended discord. And this was the practice of musicians of whom Morley says that 'they were skilful men for the time wherein they lived.'

² In East's Psalter the tune of No. 1 has already been altered, in order to make a true final close possible, in the manner shown below. The tune containing No. 2 does not occur again, but here also an equally simple alteration brings about the desired result.

W. CORBOLD.

¹ Causton a gentleman of the Chapel Royal, had been a contributor to 'Certayne notes.'

² Concerning those composed by Franco for the Psalter of 1565, see Vol. II. p. 292.

³ He frequently converts passing discords into discords of persecution, by repeating the base note; and his ear, it seems, could tolerate the prepared ninth at the distance of a second, when it occurred between inner parts.

Both Parsons¹ and Hake appear to have been excellent musicians. The style of the former is somewhat severe, sometimes even harsh, but always strong and solid. In the latter we find more sweetness; and it is characteristic of him that, more frequently than the others, he makes use of the soft harmony of the imperfect triad in its first inversion. It should be mentioned that of the seventeen tunes set by him in this collection, seven were 'church tunes,' and ten had previously appeared in Crespin's edition of Sternhold, and had afterwards been dropped. His additions, therefore, were none of them original. One other point remains to be noticed. Modulation, in these settings, is extremely rare; and often, when it would seem—to modern ears at least—to be irresistibly suggested by the progression of the melody, the apparent ingenuity with which it has been avoided is very curious. In the tune given to the 22nd Psalm, for instance, which is in Mode XIII. (final, C), the second half begins with a phrase which obviously suggests a modulation to the dominant:

but which has been treated by Parsons as follows:²

The importance of this Psalter, at once the first and the most liberal of its kind, entitles it to a complete example of its workmanship. The tune chosen is that to the 137th Psalm, an excellent specimen of the English imitations of the French melodies, and interesting also as being one of the two tunes which, appearing among the first printed—in Crespin's edition of

¹ W. Parsons must not be confounded with R. Parsons, a well-known composer of this period. J. Hake may possibly have been the 'Mr. Hake,' a singing man of Windsor, whose name was mentioned by Testwoode in one of the roofing speeches for which he was afterwards tried (with Merbecke and another) and executed.

² Nothing is more interesting than to trace the progress of a passage of this kind through subsequent Psalters, and to notice how surely, sooner or later, the modulation comes.

MODE XIII. Transposed.

W. CORBOLD (Este's Psalter, 1562).

T. MORLEY (Barley's Psalter).

Sternhold—are in use at this day. It was evidently a favourite with Parsons, who has set it three times; twice placing it in the tenor, and once in the upper voice. The latter setting is the one here given³:

MODE XIV. Transposed.

Psalm cxxxvii.

W. PARSONS.

When as we sat in Ba-bi-lon,

the ry-vers round a-bout: And in re-mem-

brance of Sh-on, the teares for grief burst out:

We hang'd our harpes and in-stru-ments, the

wil-low trees up-on: For th' that place men

for their use, had plant-ed ma-ny oaks.

At the end of the book are to be found a few miscellaneous compositions, some in metre and some in prose, probably not specially intended for this work, but adopted into it. Some of these are by the musicians employed upon the Psalter; but there are also two by Tallis, and one each by Shephard and Edwards.

The ample supply of four-part settings contained in Day's great collection seems to have so far satisfied the public craving that during the next sixteen years no other publication of the

³ It must be confessed that the tune is more beautiful without the setting. Parsons has not only avoided every kind of modulation, but has even refused those which the ear desires, and which he might have taken without having recourse to chromatic notes. It remained for later musicians to bring out the beauty of the melody.

same kind was attempted. Nor had the work which appeared at the end of that period been composed with any kind of desire to rival or succeed the existing one; it had, in fact, never been intended for the public, and was brought out without the permission, or even the knowledge, of its author. Its title was as follows:

'The Psalmes of David in English meter with notes of foure partes set unto them by Gullelmo Daman, for John Bull, to the use of the godly Christians for recreating themselves, instead of fond and unseemly Ballades. Anno 1579 at London Printed by John Daye. Cum privilegio.'

The circumstances of this publication, as they were afterwards related, were shortly these. It was Damon's custom, on the occasion of each of his visits to his friend, John Bull, to compose, and leave behind him, a four-part setting of some one of the 'church tunes'; and these, when the collection was complete, Bull gave to the printer, without asking the author's consent. The preface, by one Edward Hake, is a kind of apology, partly for the conduct of the above-mentioned John Bull, 'citizen and goldsmith of London,' and partly for the settings themselves, of which he says that they were 'by pece meale gotten and gathered together from the fertile soyle of his honest frend Guilielmo Damon one of her Maiesties Musitions,' who 'never meant them to the use of any learned and cunning Musition, but altogether respected the pleasurynge of his private frend.' The settings—one only to each tune—are very much of the kind that might be expected from the circumstances. They are in plain counterpoint, with the tune in the tenor; evidently the work of a competent musician, but without special merit. The book contains fourteen tunes not to be found in Day, and among these are the first of those single common measure tunes which later quite took the place in popular favour of all but a few of the older double kind. They had not as yet been named, but they were afterwards known as Cambridge, Oxford, Canterbury and Southwell. Two of the 'church tunes' have been dropped; and it should also be remarked that in many tunes the value of the notes has been altered, the alteration being, in all cases, the substitution of a minim for a semibreve.

Warton mentions a small publication, 'VII Steppes to heauen, alias the vij [penitential] Psalmes reduced into meter by Will Hunnys,'¹ which he says was brought out by Henry Denham in 1581; and 'Seuen sobes of a sorrowfull soule for sinne,' published in 1585, was, according to the same authority, a second edition of the same work with a new title. The later edition contains seven tunes in double common measure, in the style of the 'church tunes,' exceedingly well written, and quite up to the average merit of their models. Burney and

Lowndes both mention a collection of settings with the following title:

'Musicke of six and five parts made upon the common tunes used in singing of the Psalmes by John Cosyn, London by John Wolfe, 1585.'

Another work, called by Canon Havergal the 'Psalter of Henrie Denham,'² is said to have been published in 1588.

Damon seems to have been considerably annoyed to find that compositions which he thought good enough for Bull, had been by Bull thought good enough for the public; and, as a protest against the injustice done to his reputation, began, and lived long enough to finish, two other separate and complete settings of the 'church tunes,' in motet fashion; the tunes in the first being in the tenor, and in the second in the upper voice. They were brought out after his death by a friend, one William Swayne, from whose preface we learn the particulars of the publication of 1579. The titles are as follows:

1. 'The former booke of the Musicke of M. William Damon late one of her maiesties Musitions: containing all the tunes of David's Psalmes, as they are ordinarily sung in the Church: most excellently by him composed into 4 parts. In which sett the Tenor singeth the Church tune. Published for the recreation of such as delight in Musike: by W. Swayne Gent. Printed by T. Este, the assigne of W. Byrd. 1591.'

2. 'The second Booke of the Musicke of M. William Damon, late one of her maiesties Musitions; containing all the tunes of David's Psalmes, as they are ordinarily sung in the Church: most excellently by him composed into 4 parts. In which sett the highest part singeth the Church tune. Published for the recreation of such as delight in Musike: By W. Swayne, Gent. Printed by T. Este, the assigne of W. Byrd, 1591.'

In both these works the compositions are in the same rather ornate style; points of imitation are frequently taken upon the plain-song, the parts from time to time resting, in the usual manner of the motet. Their whole aim is, in fact, more ambitious than that of any other setting of the 'church tunes.' Fourteen of the original tunes have been dropped, and five added—among them the tune afterwards known as Windsor or Eton. (See WINDSOR TUNE.)

East (Este), the publisher of these two works, must have been at the same time engaged upon the preparation of his own famous Psalter, for in the course of the next year it was brought out, with the following title:

'The whole booke of psalmes: with their wonted Tunes, as they are song in Churches, composed into foure parts: All which are so placed that foure may sing ech one a seuerall part in this booke. Wherein the Church tunes are carefully corrected, and thereunto added other short tunes usually song in London, and other places of this Realme. With a table in the end of the booke of such tunes as are newly added, with the number of ech Psalm place to the said Tune. Compiled by sondry authors who have so laboured herein, that the vsnikfull with small practice may attaine to sing that part which is fittest for their voice. Imprinted at London by Thomas Est, the assigne of William Byrd: dwelling in Aldersgate streete at the signe of the Black Horse and are there to be sold. 1592.'

¹ This and the above were not examined by the writer.

² A second edition was published in 1594, and a third in 1604. The work was reprinted by the Musical Antiquarian Society in 1844.

It seems to have been part of East's plan to ignore his predecessor. He has dropped nine of the tunes which were new in Daman's Psalters, and the five which he has taken on appear in his 'Note of tunes newly added in this booke.' Four of these five were those afterwards known as Cambridge, Oxford, Canterbury and Windsor, and the first three must already have become great favourites with the public, since Cambridge has been repeated thirty-one times, Oxford twenty-six times, and Canterbury thirty-three times. The repetition, therefore, is now on a new principle: the older custom was to repeat almost every tune once or twice, but in this Psalter the repetition is confined almost entirely to these three tunes. Four really new tunes, all in single common measure, have been added. To three of these, names, for the first time, are given; they are 'Glassenburie,' 'Kentish' (afterwards Rochester) and 'Cheshire.' The other, though not named as yet, afterwards became Winchester.

For the four-part settings East engaged ten composers, 'being such,' he says in his preface, 'as I know to be expert in the Arte and sufficient to answer such curious carping Musitions, whose skill hath not been employed to the furthering of this work.' This is no empty boast: seventeen of the settings are by John Farmer; twelve by George Kirbye; ten by Richard Allison; nine by Giles Farnaby; seven by Edward Blanks; five by John Douland; five by William Cobbold; four by Edmund Hooper; three by Edward Johnson, and one by Michael Cavendish. It will be observed that though most of these composers are eminent as madrigalists, none of them, except Hooper, and perhaps Johnson, are known as experts in the ecclesiastical style: a certain interest therefore belongs to their settings of plain-song; a kind of composition which they have nowhere attempted except in this work.¹ The method of treatment is very varied: in some cases the counterpoint is perfectly plain; in others plain is mixed with florid; while in others again the florid prevails throughout. In the plain settings no great advance upon the best of those in Day's Psalter will be observed. Indeed, in one respect—the melodious progression of the voices—advance was scarcely possible; since equality of interest in the parts had been, from the very beginning, the fundamental principle of composition. What advance there is will be found to be in the direction of harmony. The ear is gratified more often than before by a harmonic progression appropriate to the progression of the tune. Modulation in the closes, therefore, becomes more frequent; and in some cases, for special reasons, a partial modulation is even introduced in the middle of a section. In

all styles, a close containing the prepared fourth, either struck or suspended, and accompanied by the fifth, is the most usual termination; but the penultimate harmony is also sometimes preceded by the sixth and fifth together upon the fourth of the scale. The plain style has been more often, and more successfully, treated by Blanks than by any of the others. He contrives always to unite solid and reasonable harmony with freedom of movement and melody in the parts; indeed, the melody of his upper voice is often so good that it might be sung as a tune by itself. But by far the greater number of the settings in this work are in the mixed style, in which the figuration introduced consists chiefly of suspended concords (discords being still reserved for the closes), passing notes, and short points of imitation between two of the parts at the beginning of the section. It is difficult to say who is most excellent in this manner. Farmer's skill in contriving the short points of imitation is remarkable, but one must also admire the richness of Hooper's harmony, Allison's smoothness, and the ingenuity and resource shown by Cobbold and Kirbye. The last two, also, are undoubtedly the most successful in dealing with the more florid style, which, in fact, and perhaps for this reason, they have attempted more often than any of their associates. They have produced several compositions of great beauty, in which most of the devices of counterpoint have been introduced, though without ostentation or apparent effort.

Farnaby and Johnson were perhaps not included in the original scheme of the work, since they do not appear till late, Johnson's first setting being Ps. ciii. and Farnaby's Ps. cxix. They need special, but not favourable, mention; because, although their compositions are thoroughly able, and often beautiful—Johnson's especially so—it is they who make it impossible to point to East's Psalter as a model throughout of pure writing. The art of composing for concerted voices in the strict diatonic style had reached, about the year 1580, probably the highest point of excellence it was capable of. Any change must have been for the worse, and it is in Johnson and Farnaby that we here see the change beginning.²

¹ Johnson (Ps. cxl.) has taken the fourth unprepared in a chord of the 6-4, and the imperfect triad with the root in the bass. Farnaby so frequently abandons the old practice of making all the notes upon one syllable conjunct, that one must suppose he actually preferred the leap in such cases. The following variants of a well-known cadence, also, have a kind of interest, since it is difficult to see how they could for a moment have borne comparison with their original:

Johnson, though sometimes licentious, was also sometimes even prodigal in taking the sixth and fifth upon the fourth of the

² Farmer had published, in the previous year, forty canons, two in one, upon one plain-song. These, however, were only contrivance exercises.

There is, however, one Psalter which can be said to show the pure Elizabethan counterpoint in perfection throughout. It is entirely the work of one man, Richard Allison, already mentioned as one of East's contributors, who published it in 1599, with the following title :

'The Psalmes of David in Meter, the plaine song beeing the common tune to be sung and plaide upon the Lute, Orpharion, Citterne or Base Violl, severally or altogether, the singing part to be either Tenor or Treble to the Instrument, according to the nature of the voyce, or for fowre voyces. With tenne short Tunnies in the end, to which for the most part all the Psalmes may be usually sung, for the use of such as are of mean skill, and whose leysure leaseth serveth to practize. By Richard Allison Gent, Practitioner in the Art of Musicke, and are to be sold at his house in the Dukes place neere Alde-Gate London, printed by William Barley, the assigne of Thomas Morley. 1599.'

The style of treatment employed by Allison in this work—in which he has given the tune to the upper voice throughout—is almost the same as the mixed style adopted by him in East's Psalter. Here, after an interval of seven years, we find a slightly stronger tendency towards the more florid manner, but his devices and ornaments are still always in perfectly pure taste.¹ The lute part was evidently only intended for use when the tune was sung by a single voice, since it is constructed in the manner then proper to lute accompaniments to songs, in which the notes taken by the voice were omitted. Sir John Hawkins, in his account of the book, makes a curious mistake on this point. He says, 'It is observable that the author has made the plain-song or church tune the cantus part, which part being intended as well for the lute or cittern as the voice, is given also in those characters called the tablature which are peculiar to those instruments.' That the exact opposite is the case² will be seen from the translation of a fragment of the lute part, here given :

VOICES.
When as we sat in Be - li - ion.

TUNE.

LUTE.

The next Psalter to be mentioned is one which seems to have hitherto escaped notice.

scale, his associates accompanied them, in the modern way, with a third : Johnson, however, refuses this, and, following the strict Roman practice, doubles the bass note instead.

¹ It was by a chance more unfortunate even than usual that Dr. Burney selected this Psalter—on the whole the best that ever appeared—as a victim to his strange prejudice against our native music. His slighting verdict is that 'the book has no merit, but what was very common at the time it was printed' : which is certainly true ; but Allison, a musician of the first rank, is not deserving of contempt on the ground that merit of the highest kind happened to be very common in his day.

² Hawkins has evidently been misled by the clumsily worded title.

It was issued without date ; but since we find that it contains tunes not existing in the third edition of East (1604), it may perhaps be supposed to be later than that edition ; and since we know that its printer, W. Barley, brought out nothing after the year 1614, it would be natural to assume that it was published in the interval between those two dates. Its title is as follows :

'The whole Booke of Psalmes. With their woonted Tunes, as they are sung in Churches, composed into foure parts. Compiled by sundrie Authors, who have so laboured herein, that the unskilful with small practise may attaine to sing that part, which is fittest for their voice. Printed at London in little S. Hellens by W. Barley, the assigne of T. Morley, and are to be sold at his shop in Gracious street. Cum privilegio.'

From this title, and from the fact that Morley was the successor to Byrd, whose assignee East was, it would be natural to infer that the work was a further edition of East's Psalter : and from its contents, it would seem to put forward some pretence to be so. But it differs in several important respects from the original. East's Psalter was a beautiful book, in octavo size, printed in small but perfectly clear type ; the voice parts separate, but all visible at once, and all turning the leaf together. Barley's Psalter is reduced to duodecimo size, becoming in consequence inconveniently thick ; it is badly printed ; and the parts, though separate, do not always turn the leaf together. Worse than this, in almost all the settings, the two upper voice parts are omitted, and the remaining parts—the tune and the bass—being separate are rendered useless even to the organist, the only person who could have turned two parts to any sort of account. The work, therefore, is so unsatisfactory as to be scarcely worthy of notice, did it not contain ten new and admirable settings, of which four are by Morley himself, five by John Bennet, and one by Farnaby. These not only save the book, but render it valuable ; for in Ravenscroft's Psalter, published a few years later, only four of them—two by Morley and two by Bennet—survive. This work, therefore, contains six compositions by eminent musicians which are not to be found elsewhere. They are of course printed entire, as are also the settings of the two established and often-repeated favourites above referred to, Oxford and Cambridge tunes, and a few others, which, however, though they have escaped mutilation, have not escaped alteration, considerable changes being sometimes made in the parts. In some of the mutilated settings, also, the bass part has been altered, and in some a new bass has been substituted for the old one, while the editor has allowed the name of the original composer to stand above the tune. Examples of extreme carelessness in editing might also be given, were it worth while to do so. On the whole, the book is somewhat of a puzzle. There would be nothing

surprising in its peculiarities had it been some unauthorised or piratical edition of East; but when we remember that the printer was working under the royal patent granted to Morley, and that Morley himself, and another musician almost as distinguished, contributed to it some of the best settings of church tunes ever composed, it becomes difficult to account for its badness.¹ Besides the new settings of old tunes, it also contains one new tune set by Blanks, afterwards called by Ravenscroft a Dutch tune.

Ravenscroft's Psalter, which comes next in order, was published in 1621, with the following title:

'The whole Booke of Psalmes with the Hymnes Evangelicall and Songs Spirituall. Composed into four parts by sundry authors, to such severall tunes, as have been, and are generally sung in England, Scotland, Wales, Germany, Italy, France, and the Netherlands: never as yet before in one volume published. . . . Newly corrected and enlarged by Thomas Ravenscroft, Bachelor of Musick. Printed at London, for the Company of Stationers.'

This Psalter contains a larger number of compositions than any other except that of Day; but the number in excess of the 'church tunes' is not made up, as in Day, by alternative settings, but by the addition of new tunes, almost all of which are single common measure tunes of the later kind, with names. They appear in the index under the heading—'such tunes of the Psalmes usually sung in Cathedrall Churches, Collegiat Chapels, &c.' and are divided broadly into three classes, one of which contains those named after the English Cathedrals and Universities, while the other two are called respectively Scotch and Welsh, and the tunes named accordingly. The whole subject of these names, and how they are to be understood, has been gone into at some length by Canon Havergal in the preface to his quasi-reprint of this Psalter; and his conclusion is probably the right one, namely, that the tunes were in most cases designated according to the localities in which they were found in use, but that this does not necessarily imply a local origin. We have already referred to Ravenscroft's description of the old double common measure tunes, and need add nothing here with respect to them. Under the heading 'forraigne tunes usually sung in Great Brittain' will be found, for the French, only the few tunes taken from the Geneva Psalter, enumerated above;

¹ One explanation only can be suggested at present. The work may never have been intended to rank with four-part psalters at all. The sole right to print Sternhold's version, with the 'church tunes,' had just passed into the hands of the Stationers' Company; and it is possible that this book may have been put forward, not as a fourth edition of East, but in competition with the company: the promoters hoping, by the retention of the complete settings of a few favourite tunes, and the useless base part of the rest, to create a technical difference, which would enable them to avoid infringement of the Stationers' patent. The new settings of Morley and Bennet may have been added as an attractive feature. If, however, the announcement in the title of the third edition of East (1604), printed for the company of Stationers, should mean that the company had acquired a permanent right to that work, Barley's publication would seem no longer to be defensible, on any ground. Further research may make the matter more clear.

² A second edition was published in 1688. It was also several times reprinted, either entirely or in part, during the 18th century.

with regard to other sources, the magnificent promise of the title-page is reduced to three German tunes, two Dutch, and one Italian.

Of the 105 settings in this work, 28 had appeared in previous ones. All the musicians engaged upon East's Psalter are represented here; a large proportion of their compositions have been taken on, and Dowland has contributed a new one; Dowland's is the setting of the 100th Psalm here given. Also, one of Parsons' settings has been taken from Day's Psalter, though not without alteration. The four settings by Morley and Bennet, from Barley's Psalter, have already been mentioned, and in addition there is a new one by Morley, a setting of the 1st Psalm. Tallis's tune in Mode VIII is also given here from Parker's

'French tune,' from Ravenscroft's 'Booke of Psalmes,' 1621.

Psalter (to a morning hymn), in the shortened form, but with the tenor still leading the canon.

New composers appear, whose names and contributions are as follows: R. Palmer, 1; J. Milton, 2; W. Harrison, 1; J. Tomkins, 1; T. Tomkins, 2; W. Cranfield or Cranford, 1; J. Ward, 1; S. Stubbs, 2; Martin Pierson, 1, and Ravenscroft, 51. In the work of all these composers is to be seen the same impurity of taste which was visible in the settings made for East by Farnaby and Johnson. The two cadences given above in a note, as examples of a kind of aberration, are here found to have become part of the common stock of music; and an inferior treatment of conjunct passages in short notes, in which the alternate crotchet is dotted, finds, among other disimprovements,

great favour with the editor. Ravenscroft and Milton appear to be by far the best of the new contributors. The variety shown by the former in his methods of treatment is remarkable: he seems to have formed himself upon East's Psalter, to have attempted all its styles in turn, and to have measured himself with almost every composer. Notwithstanding this, it is evident that he had no firm grasp of the older style, and that he was advancing as rapidly as any musician of his day towards the modern tonality and the modern priority of harmonic considerations in part-writing. Milton's two settings are fine, notwithstanding the occasional use of the degraded cadence, and on the whole worthy of the older school, to which indeed he properly belonged. The rest, if we except Ward, may be briefly dismissed. They were inferior men, working with an inferior method.

Two years later appeared the work of George Wither:

'The Hymnes and Songs of the Church, Divided into two Parts. The first Part comprehends the Canonical Hymnes, and such parcels of Holy Scripture as may properly be sung: with some other ancient Songs and Creeds. The second Part consists of Spiritual Songs, appropriated to the severall Times and Occasions, observable in the Church of England. Translated and composed by G. W. London, printed by the assignes of George Wither, 1623. Cum privilegio Regis Regali.'

This work was submitted during its progress to James the First, and so far found favour that the author obtained a privilege of fifty-one years, and a recommendation in the patent that the book should be 'inserted in convenient manner and due place in every English Psalm book in metre.' The king's benevolence, however, was of no effect; the Company of Stationers, considering their own privilege invaded, declared against the author, and by every means in their power, short of a flat refusal, avoided the sale of the book. Here again, as in the case of Parker's Psalter, the virtual suppression of the work occasioned the loss of a set of noble tunes by a great master. Sixteen compositions by Orlando Gibbons had been made for it, and were printed with it. They are in two-part counterpoint, nearly plain, for treble and bass, the treble being the tune, and the bass, though not figured, probably intended for the organ. In style they resemble rather the tunes of Tallis than the imitations of the Geneva tunes to which English congregations had been accustomed, it being possible to accent them in the same way as the words they were to accompany; syncopation, however, sometimes occurs, but rarely, and more rarely still in the bass. The harmony often reveals very clearly the transitional condition of music at this period. For instance, in Modes XIII. and XIV.¹ a sectional termination in the melody on the second of the scale was

always, in the older harmony, treated as a full close, having the same note in the bass; here we find it treated in the modern way, as a half close, with the fifth of the scale in the bass.

In 1632 an attempt was made to introduce the Geneva tunes complete into this country. Translations were made to suit them, and the work was brought out by Thomas Harper. It does not seem, however, to have reached a second edition. The enthusiasm of earlier days had no doubt enabled the reformers to master the exotic metres of the few imported tunes; but from the beginning the tendency had been to simplify and, so to speak, to anglicise them; and since the Geneva tunes had remained unchanged, Harper's work must have presented difficulties which would appear quite insuperable to ordinary congregations.

The Scottish Psalter of 1635 was reprinted in full, with dissertations, etc., by the Rev. Neil Livingston, at Glasgow, in 1864.

We have now arrived at the period when the dislike which was beginning to be felt by educated persons for the abject version of Sternhold was to find practical expression. Wither had intended his admirable translation of the Ecclesiastical Hymns and Spiritual Songs to supersede the older one, and in 1638 George Sandys, a son of the Archbishop, published the complete Psalter, with the following title:

'A paraphrase upon the Divine Poems. by G. S. Set to new tunes for private devotion; and a thorough bass, for voice or instrument. By Henry Lawes, gentleman of His Majesty's Chapel Royal.'

The tunes, twenty-four in number, are of great interest. Lawes was an ardent disciple of the new Italian school; and these two-part compositions, though following in their outline the accustomed Psalm-tune form, are in their details as directly opposed to the older practice as anything ever written by Peri or Caccini. The two parts proceed sometimes for five or six notes together in thirds or tenths; the bass is frequently raised a semitone, and the imperfect fifth is constantly taken, both as a harmony and as an interval of melody. The extreme poverty of Lawes's music, as compared with what was afterwards produced by composers following the same principles, has prevented him from receiving the praise which was certainly his due. He was the first English composer who perceived the melodies to which the new system of tonality was to give rise; and in this volume will be found the germs of some of the most beautiful and affecting tunes of the 17th and 18th centuries: the first section of the famous St. Anne's tune, for instance, is note for note the same as the first section of his tune to the 9th Psalm. Several of these tunes, complete, are to be found in our modern hymnals.

¹ These tunes, with four-part harmony, are included in the 1904 edition of *Hymns Ancient and Modern*. Eleven examples of Gibbons's tunes are included in the *English Hymnal*, 1906.

² These tunes were reprinted by John Russell Smith in 1886 and 1873 respectively.

The translation of Sandys was intended, as the title shows, to supersede Sternhold's in private use; but several others, intended to be sung in the churches, soon followed. Besides the translation of Sir W. Alexander (published in Charles the First's reign), of which King James had been content to pass for the author, there appeared, during the Commonwealth, the versions of Bishop King, Barton and Rous. None, however, require more than a bare mention, since they were all adapted to the 'church tunes' to be found in the current editions of Sternhold, and have therefore only a literary interest. Nothing requiring notice here was produced until after the Restoration, when, in 1671, under circumstances very different from any which had decided the form of previous four-part Psalters, John Playford brought out the first of his well-known publications:

'*Psalms and Hymns in solemn musick of foure parts on the Common Tunes to the Psalms in Metre: used in Parish Churches. Also six Hymns for one voyce to the Organ.* By John Playford. London, printed by W. Godbid for J. Playford at his shop in the Inner Temple. 1671.'

This book contains only forty-seven tunes, of which thirty-four were taken from Sternhold (including fourteen of the single common measure tunes with names, which had now become 'church tunes'), one from Wither, and twelve were new. But Playford, in printing even this comparatively small selection, was offering to the public a great many more than they had been of late accustomed to make use of. The tunes in Sternhold were still accessible to all; but not only had the general interest in music been steadily declining during the reigns of James and Charles, but the authorised version itself, from long use in the churches, had now become associated in the minds of the puritans with the system of Episcopacy, and was consequently unfavourably regarded, the result being that the number of tunes to which the Psalms were now commonly sung, when they were sung at all, had dwindled down to some half-dozen. These tunes may be found in the appendix to Bishop King's translation, printed in 1651. According to the title-page, his Psalms were 'to be sung after the old tunes used in y^e churches,' but the tunes actually printed are only the Old 100th, 51st, 81st, 119th, Commandments, Windsor, Southwell and the Lamentations. 'There be other tunes,' adds the author, 'but being not very usuall are not here set down.' The miserable state of music in general at the Restoration is well known, but, as regards Psalmody in particular, a passage in Playford's preface so well describes the situation, and some of its causes, that it cannot be omitted here:

'For many years, this part of divine service was skilfully and devoutly performed, with delight and comfort, by many honest and religious people; and is still continued in our churches, but not with that

reverence and estimation as formerly: some not affecting the translation, others not liking the music: both, I must confess, need reformation. Those many tunes formerly used to these Psalms, for excellency of form, solemn air, and suitableness to the matter of the Psalms, were not inferior to any tunes used in foreign churches; but at this day the best, and almost all the choice tunes are lost, and out of use in our churches; nor must we expect it otherwise, when in and about this great city, in above one hundred parishes, there is but few parish clerks to be found that have either ear or understanding to set one of these tunes musically as it ought to be: it having been a custom during the late wars, and since, to choose men into such places, more for their poverty than skill or ability; whereby this part of God's service hath been so ridiculously performed in most places, that it is now brought into scorn and derision by many people.'

The settings are all by Playford himself. They are in plain counterpoint, and the voices indicated are alto, countertenor, tenor and bass, an arrangement rendered necessary by the entire absence, at the Restoration, of trained trebles.

This publication had no great success, a result ascribed by the author to the folio size of the book, which he admits made it inconvenient to 'carry to church.' His second Psalter, therefore, which he brought out six years later, was printed in 8vo. The settings are here again in plain counterpoint, but this time the work contains the whole of the 'church tunes.' The title is as follows:

'The whole book of Psalms, collected into English metre by Sternhold Hopkins, &c. With the usual Hymns and Spiritual Songs, and all the ancient and modern tunes sung in Churches, composed in three parts, Cantus Medius and Bassus. In a more plain and useful method than hath been heretofore published. By John Playford. 1677.'

Apart from the reasons given by Playford for setting the tunes in three parts only, we know that this way of writing was much in favour with English composers after the Restoration, and remained so till the time of Handel. Three-part counterpoint had been much used in earlier days by the secular school of Henry the Eighth's time, but its prevalence at this period was probably due to the fact that it was a favourite form of composition with Carissimi and his Italian and French followers, whose influence with the English school of the Restoration was paramount.

This was the last complete setting of the 'church tunes,' and for a hundred years afterwards it continued to be printed for the benefit of those who still remained faithful to the old melodies and the old way of setting them. In 1757 the book had reached its 20th edition.

Playford generally receives the credit, or discredit, of having reduced the 'church tunes' to notes of equal value, since in his Psalters they appear in minims throughout, except the first and last notes of sections, where the semi-breve is retained; but it will be found, on referring to the current editions of Sternhold, that this had already been done, probably by the congregations themselves, and that he

has taken the tunes as he found them in the authorised version. His settings also have often been blamed, and it must be confessed that, compared with most of his predecessors, he is only a tolerable musician; but this being admitted, he is still deserving of praise for having made, in the publication of his Psalters, an intelligent attempt to assist in the general work of reconstruction; and if he failed to effect the permanent restoration of the older kind of Psalmody, it was in fact not so much owing to his weakness as to the natural development of new tendencies in the art of music.

The new metrical translations afterwards brought out were always intended, like those of the Commonwealth, to be sung to the 'church tunes'; and each work usually contained a small selection, consisting of those most in use, together with a few new ones. Concurrently with these appeared a large number of publications—*Harmonious Companions*, *Psalm Singers' Magazines*, etc., which contained all the favourite tunes, old and new, set generally in four parts. Through one or other of these channels most of the leading musicians of this and the following century contributed to the popular Psalmody. Both tunes and settings now became very various in character, and side by side with settings made for East's Psalter might be found compositions of which the following fragment will give some idea:

Harmonious Companion, 1732.

Tune.

The Lord goes up

. above the sky.

On the next page of the 'Harmonious Companion' is the original setting of the 44th Psalm by Blancks.

The fact most strongly impressed upon the mind after going through a number of these publications, extending over a period of one hundred and fifty years, is that the quality and character of the new tunes and settings in no way depends, as in the case of the old Psalters, upon the date at which they were written. Dr. Howard's beautiful tune, 'St. Bride,' for instance, was composed thirty or forty years after the strange production given above; his tune, however, must not be taken as a sign of any general improvement, things having rather gone from bad to worse. The truth seems to

be that the popular tradition of Psalmody having been hopelessly broken during the Commonwealth, and individual taste and ability having become the only deciding forces in the production of tunes, the composers of the 17th and 18th centuries, in the exercise of their discretion, chose sometimes to imitate the older style and sometimes to employ the inferior methods of contemporary music. To the public the question of style seems to have been a matter of the most perfect indifference.

Sternhold continued to be printed as an authorised version until the second decade of the 19th century. The version of Tate and Brady remained in favour twenty or thirty years longer, and was only superseded by the hymnals now in actual use. H. E. W.

(See an interesting article on the French Huguenot Psalters, by H. Kling, professor in the Conservatoire of Geneva, in the *R.M.J.*, vol. vi, p. 496. On the Puritan use of Psalters, see *Ref. Rev.*, 1901, p. 403.)

PSALTERY (ψαλτήριον; Old Eng. *sautry*; Fr. *psalterion*; Ger. *Psalter*; Ital. *salterio*). A dulcimer, played with the fingers or a plectrum instead of by hammers. There exists a classic sculptured representation of the Muse Erato, holding a long ten-stringed lyre, with the name ΨΑΛΤΡΙΑΝ cut on its base. From this it has been inferred that the strings of this lyre were touched by the fingers without the usual plectrum of ivory or metal. Chaucer's 'sautrie' in the Miller's Tale¹ came direct from the East, perhaps imported by returning Crusaders, its kinship to the Persian and Arabic *sautir* and *kanun* being unmistakable. The psaltery was the prototype of the spinet and harpsichord, particularly in the form which is described by Praetorius in his *Organographia*, as the 'istromento di porco,' so called from its likeness to a pig's head.

Notwithstanding the general use of keyed instruments in 1650 we read in the *Musurgia* of Athanasius Kircher that the psaltery played with a skilled hand stood second to no other instrument, and Mersenne, about the same date, praises its silvery tone in preference to that of any other, and its purity of intonation, so easily controlled by the fingers.

No 'istromento di porco' being now known to exist, we have to look for its likeness in painted or sculptured representations. The earliest occurs in a 13th-century MS. in the library at Douai. It is there played without a plectrum. From the 14th century there remain frequent examples, notably at Florence, in the famous Organ Podium of Luca della Robbia, a cast of which is in the Victoria and Albert Museum at South Kensington.

But other forms were admired. (See *PLATE XXVIII.* No. 5.) Exactly like an Arabic *kanun* is a psaltery painted A.D. 1348 by that loving

¹ And all above ther lay a gay sautrie
On which he made on nightes melodie,
So sweetly, that all the chambre rong,
And Angles ad virginen be song.

delineator of musical instruments, Orcagna, himself a musician, in his 'Trionfo della Morte,' at Pisa. The strings of the instrument are in groups of three, each group, as in a grand piano, being tuned in unison to make one note. Sometimes there were groups of four, a not unfrequent stringing in the DULCIMER. There is a good coloured lithograph of Orcagna's fresco in *Les Arts au moyen âge* by Paul Lacroix (Paris, 1874, p. 282); it is there called 'Le Songe de la Vie.' A fine representation of such a psalter, strung in threes, by Orcagna, will be found in the National Gallery, London. A. J. H.

PUCCINI, GIACOMO ANTONIO DOMENICO MICHELE SECONDO MARIA (b. Lucca, June 22, 1858; d. Brussels, Nov. 29, 1924), belonged to a family which for a century and a half had produced an uninterrupted line of musicians. His great-great-grandfather, Giacomo (b. 1712), was maestro di cappella to the republic of Lucca, wrote highly respectable church music, and was the master of Gugiellini. Antonio, the son of Giacomo the elder (b. 1747), was less famous as a composer than as a theorist. Domenico (b. 1771), the grandfather of the subject of this article, attained distinction as a church composer, but was more famous for his operas. Michele, his son (b. 1813), won more than local notoriety. His sacred music was admired throughout North Italy, and his death in 1864 was honoured by the composition of a Requiem by Pacini.

With so distinguished a genealogy it was not surprising that Giacomo Puccini should show precocious signs of musical talent. When Lucca had taught him all that he could learn, his name won him a pension from the Queen of Italy, which enabled him to enter the Milan Conservatorio. While he was still a student, his first orchestral work, a 'Sinfonia-Capriccio,' was performed at the school with considerable success. His chief instructor was Amilcare Ponchielli, at whose suggestion he undertook the composition of 'Le Villi,' a 1-act opera, the libretto of which was by Fontana. The opera was written for a competition organised by the paper *Teatro illustrato*. The committee which examined the works submitted did not consider 'Le Villi' worthy even of mention. But some friends of Puccini, amongst whom was Arrigo Boito, heard the score and soon discovered its worth. On their recommendation the opera was performed on May 31, 1884, at the Dal Verme theatre, and so well received that an enlarged edition was prepared for La Scala, where again it met with success in the following year. The score, though immature, shows remarkable melodic invention and no little imaginative power, and the symphonic movements are scored in masterly fashion. After 'Le Villi,' Puccini was silent until 1889, when his 'Edgar' was produced at La Scala, Apr. 21. It is founded upon Alfred de

Musset's wild melodrama *La Coupe et les lèvres*. Puccini's music is always melodious and often vigorous and impressive, but the book was too much for him, and 'Edgar' was a complete failure. 'Manon Lescaut,' produced at the Teatro Regio, Turin, Feb. 1, 1893, atoned in some measure for this failure. The libretto is the work of the composer and a committee of friends. The music shows a remarkable development of style, and many of the scenes—notably that of the embarkation of the *filles de joie* at Havre—are designed with graphic decision and handled with real power.

With 'La Bohème' (Teatro Regio, Turin, Feb. 1, 1896) Puccini surpassed all his previous triumphs, and placed himself definitely at the head of the younger Italian composers. The librettists, Giacosa and Illica, wisely made no attempt to construct a dramatic whole from Murger's novel, but chose four scenes, each complete in itself and all admirably contrasted one with another, which together give a capital picture of Bohemian life in Paris about 1830. Puccini's music reflects the alternate gaiety and pathos of Murger's novel with a truth and sincerity to which no name but that of genius can be applied. 'Tosca,' produced at the Teatro Costanzi, Rome, Jan. 14, 1900, unquestionably revealed fresh aspects of his genius. The libretto, founded by Illica and Giacosa upon Sardou's famous drama, is a prolonged orgy of lust and crime, which lends itself but ill to musical illustration. Yet the skill with which Puccini fastened upon everything in the story that had a spark of lyrical feeling showed the quality of his musical instinct. Much of 'Tosca' is hardly more than glorified incidental music, as indeed, given the nature of the subject, was only to be expected, but whenever the libretto gave him a chance Puccini showed that the hand which wrote 'La Bohème' had gained in strength and certainty of touch. The passions treated in 'Tosca' are often crude and sometimes monstrous, and have little in common with the quick play of chequered feeling that characterises 'La Bohème,' yet such passages as Cavaradossi's air in the first act, Tosca's air in the second and almost the whole of the last act, which rises to a wonderful height of lyric rapture, show that Puccini's power of expressing certain aspects of emotion was maturing in a very remarkable manner. R. A. S.; rev. F. B.

'Madama Butterfly,' founded on a magazine story by John Luther Long, dramatised by the author and David Belasco, and turned into a libretto by Illica and Giacosa, is the opera which first showed a change in the attitude of the Italian public, which had hitherto idolised Puccini. It was given at La Scala on Feb. 17, 1904, and the performance ended in a complete fiasco. Various reasons have been given to explain the set-back, especially since a revised

version, first given at Brescia in May of the same year, reversed the verdict of the Milanese and opened up a career of success not less definite than that of 'Tosca' and 'Bohème.' Undoubtedly the introduction of singers wearing lounge suits had an unfavourable impression on the audience. The two acts of which the opera then consisted were also much longer than Italian traditions demand. But it is probable that the chief cause of the first failure lay in a more critical frame of mind of an audience determined not to be intoxicated by the charm of passionate melody. Having been praised for 'Bohème' and 'Tosca,' in terms which knew no measure, he was now blamed more than any weakness of the opera justified. Certainly 'Butterfly' even in the revised edition we now know is not a flawless work. It was Puccini's habit in setting to music a foreign subject to embody songs and airs of the country in order to secure local colour. This was the procedure he adopted in 'Butterfly' and also in 'The Girl of the Golden West.' But he had not the genius of the symphonic writer which can turn a common tune into a thing of tragedy or pathos. The American and Japanese tunes in 'Butterfly' remain to the end foreign elements, and the strength of the opera is in those scenes in which the composer has forgotten both East and West and devoted himself wholly to the description of the heroine and her tragic story. In these the warm, passionate nature of his music, the fine sense of theatrical needs and effects, have exercised a profound appeal on all audiences, including the English audience which first heard 'Butterfly' at Covent Garden in 1906.

With the next opera, 'The Girl of the Golden West' (Ital. 'La fanciulla del West'), Puccini opens up a new epoch in his career, an epoch of experiments to bring his technique up-to-date, and to assimilate to some extent the reforms advocated by the moderns. In this he was not quite successful. 'The Girl of the Golden West' (the libretto of which was drawn from a play of Belasco by G. Civinini and G. Zangarini) had a triumphant reception on its first performance in New York on Dec. 10, 1910. Elsewhere, however, it has been received more coolly and critically. The new manner, the improved technique, is not nearly as convincing as the old manner was. He has learnt to use subtler or more modern harmonic combinations, but not to use them in such a way as to make them appear inevitable. Similarly, local colour is obtained by the use of local melodies which are never remoulded so as to harmonise with the composer's more characteristic style. In spite of some excellent and typical pages, 'The Girl of the Golden West' has not proved a worthy successor to 'Butterfly.'

Even less successful was 'La Rondine,' Puccini's next venture. It was undertaken at the request of a Viennese publisher anxious to persuade Puccini to write musical comedy. Puccini had then a disagreement with his publishers, Ricordi, and, after demurring for a while, accepted the proposal to write the operetta for which he was to receive 200,000 Austrian crowns on a libretto by Wilner, the librettist of Lehar. The Italian translator, Adami, was already at work converting the musical comedy book into comic opera when war broke out. The original contract was cancelled, the book remodelled, and the opera sold to an Italian publisher. It was performed at Monte Carlo on Mar. 27, 1917. It was very well received, but that verdict was not confirmed elsewhere, and the opera has failed to hold its place in the Puccinian repertory.

Of the three 1-act operas which make up the Trittico (New York, Dec. 14, 1918), the first, 'Il tabarro,' is tragic to the point of melodrama; the second, 'Suor Angelica,' is supposed to represent a mystic subject; the third, 'Gianni Schicchi,' is comedy. The contrast is most effective, and there is no question that in this triptych the composer's technique is more elaborate than in 'Butterfly,' but complexity is no longer an impediment to natural expression. Not all the three operas, however, have equal merit. 'Il tabarro' has pages of fine dramatic writing, and in 'Suor Angelica' the melody has at times greater strength if less luscious beauty than in any other opera of Puccini. But the subject of the first is somewhat sordid, and in 'Suor Angelica' the librettist has attempted to condense too many episodes for a homogeneous work of one act. The final scene, moreover, in which a miracle is represented, is merely theatrical and does not carry conviction. The third opera, 'Gianni Schicchi,' on the other hand had delighted by its deftness, skill and *vis comica* even those who found little to praise in any other work of Puccini. The action fits admirably the requirements of the 1-act play. It is swift, varied, interesting, and the music aids it at every point. It adds lyrical charm to the by-play of the two young lovers, and it gives zest to the adventure of the Florentine rogue who turns the greed of Donati's heirs to his advantage. Thus vivacity, wit and humour rob the story of whatever gruesome feature it might have, had it been less ably told.

Puccini's last opera, 'Turandot,' was almost finished when he was attacked by the disease of which he died. He carried the sheets of the last duet to Brussels, where he went to be operated upon for cancer of the throat. The operation was successful, but his heart did not stand the shock, and he died on Nov. 29, 1924. 'Turandot' was produced at La Scala, Milan under the direction of Toscanini on

April 25, 1926. The score was completed by F. ALFANO.

Puccini* (Milan, 1925); article by FUSSETTI, in *Musicisti contemporanei* (Milan). F. B.

PUCCITTA, VINCENZO (b. Civitavecchia, 1778; d. Milan, Dec. 20, 1861), pupil of Fenaroli and Salò at the Conservatorio dei Turchini, Naples. He was in great demand as an opera composer in his time, and visited all the principal towns of Europe, for which he wrote 30 operas. He wrote with great facility, but without depth of thought or feeling (Q.-L.; *Riemann*).

PUENTE, GIUSEPPE DEL (b. Naples; d. New York, 1894 or 1895), Italian baritone, was the Escamillo when, in 1878 at the rebuilt Her Majesty's Theatre, 'Carmen' was heard for the first time in England. According to Mapleson, Del Puente was no better pleased with his part before the rehearsals than Campanini was with that of Don José, but when the eventful night came both singers triumphed.

Del Puente enjoyed at that time a well-established reputation in London. Under Mapleson at Drury Lane he made a most successful first appearance as Rigoletto in 1873, and in 1874 he was a member of the brilliant cast that strove to put life into Balfe's 'Il talismano.' He was again at Drury Lane—in Harris's memorable season—in 1887, singing, among other parts, Valentine to Jean de Reszke's Faust. Late in his career he sang in America with Gilmore's band. S. H. P.

PUGET, LOISA (b. Paris, c. 1810), though an amateur, achieved an extraordinary popularity in the reign of Louis Philippe by her songs, composed to Gustave Lemoine's words. Among the best known of these were 'À la grâce de Dieu,' 'Ave Maria,' 'Le Soleil de ma Bretagne,' 'Ta Dot,' 'Mon Pays,' 'Les Rêves d'une jeune fille,' etc. Musically speaking, they are inferior to those of Panseron, Labarre or Masini; but the melodies were always so natural and so well suited to the words, and the words themselves were so full of that good bourgeois character which at that time was all the fashion in France, that their vogue was immense. Encouraged by her success, Puget aspired to the theatre. She took lessons from Adolphe Adam, and on Oct. 1, 1836, produced at the Opéra-Comique a one-act piece, 'Le Mauvais Cœur,' which was sung to perfection by Ponchard and Mme. Damoreau. In 1842 she married Lemoine, and, finding the popularity of her songs on the wane, had the tact to publish no more. She broke silence only once again with an operetta called 'La Veilleuse, ou les Nuits de Milady,' produced at the Gymnase, Sept. 27, 1869. G. C.

PUGNANI, GAETANO (b. Turin, Nov. 27, 1731; d. there, June 15, 1798), celebrated violinist, one of the best representatives of the Piedmontese school of violin-playing.

Being a pupil first of Somis, who studied under Corelli, and afterwards of Tartini, he combined the prominent qualities of the style and technique of both these great masters. He was appointed first violin to the Sardinian court in 1752, and began to travel in 1754. He made lengthened stays at Paris and in London, where he was for a time leader of the opera band, produced an opera of his own (Burney, *Hist.* iv. 494), and published trios, quartets, quintets and symphonies. In 1770 Burney found him at Turin, and there he remained as leader, conductor, teacher and composer for the rest of his life.

To Pugnani more than to any other master of the violin appears to be due the preservation of the pure grand style of Corelli, Tartini and Vivaldi, and its transmission to the next generation of violinists. Apart from being himself an excellent player, he trained a large number of eminent violinists—such as Conforti, Bruni, Polledro and, above all, Viotti. He was also a prolific composer: he wrote a number of operas and ballets, which, however, appear not to have been very successful. Fétis gives the names of nine, and a list of his published instrumental compositions: one violin-concerto (out of nine), three sets of violin-sonatas, duos, trios, quartets, quintets, and twelve symphonies for strings, oboes and horns. R. D.

PUGNO, STÉPHANE RAOUL (b. Paris, June 23, 1852; d. Moscow, Jan. 3, 1914), pianist and composer, was a pupil of the Conservatoire, where he won the first piano prize in 1866, first harmony prize, and first medal for solfège in 1867, and first organ prize in 1869. He was organist of Saint Eugène (1872-92), chorus-master at the Théâtre Ventadour in 1874, professor of harmony (1892-96) and of the piano (1896-1901) in the Conservatoire.

He gained a world-wide reputation as a pianist, and his playing of Mozart in particular was a thing of exquisite quality. His first appearance in London took place on May 28, 1894, at a recital of his own, and his subsequent appearances here were frequent. His sonata recitals in conjunction with Ysaÿe, and his playing of the works of César Franck with orchestra were alike noteworthy.

His first important composition was an oratorio, 'La Résurrection de Lazare' (1879), after which he wrote a three-act féerie, 'La Fée Cocotte'; 'Les Papillons,' a ballet (Palace Theatre, 1881); an opéra-comique, 'Ninetta' (Renaissance, 1882); a five-act ballet, 'Viviane' (Eden Theatre, 1886); a three-act opéra-bouffe, 'Le Sosie' (Bouffes-Parisiens, 1887); a three-act opéra-comique, 'Le Valet de

sœur' (Bouffes, 1888); 'Le Retour d'Ulysse' (Bouffes, 1889); 'La Vocation de Marius,' four acts (Nouveautés, 1890); 'La petite Poucette' (Renaissance, 1891); 'La Danseuse de corde,' three-act pantomime (Nouveau Théâtre, 1892); 'Pour le Drapeau,' mimodrame in three acts (Ambigu, 1895); 'Le Chevalier aux fleurs,' ballet in collaboration with Messager (Folies-Marigny, 1897); 'Mélusine,' 'Les Pauvres Gens,' and other things, such as songs, a piano-forte sonata, and a set of four piano pieces 'Les Nuits.' His last work was music to the *Città Mortè* (Ville Mortè) of d'Annunzio, written in collaboration with Nadia Boulanger. G. F.

PUJOL, JOAN (JOHANNES) (*b.* Barcelona, 1573; *d.* there, 1626), Spanish composer. He was maestro de capilla at Tarragona, 1593-95, Saragossa (Cathedral of El Pilar), 1595-1612, and Barcelona, 1612-26. In 1600 he was ordained priest. His church music shows both the severity of the mid. 16th century and the dramatic feeling of the 17th; he sometimes employs a continuo, and his MSS. provide interesting examples of how chromatic alteration was practised in his time. Many of his works were written for St. George's Day and other festivals in the chapel of St. George, patron of Catalonia, and are dedicated to the *diputats* (deputies) of the General Catalan Assembly. MSS. are preserved in Barcelona (Bibl. de la Diputació, Orfeo Català, the church of Santa Maria del Mar and the Cathedral Archives), Cardona (Communal Archives), Gandía, Montserrat, Saragossa (both cathedrals), Vich. Secular works with Spanish words are to be seen at Munich (Staatsbibl., MS. E. 200), Madrid (Bibl. Nac., M. 1370-2, and Bibl. Medinaceli, MS. 13,231).

A complete edition (by H. Anglès) is in course of publication at Barcelona. Publ. del Depart. de Musica, III.) J. B. T.

PULIASCHI, GIOVANNI DOMENICO, a 16th-17th-century singer of the Papal Chapel (1600) with a voice of extraordinary compass, of whom Solerti says that he sang contralto, tenor and bass. G. F. Anerio dedicated to him his 'Gemma musicali,' and edited also Puliaschi's songs (1620) (*Riemann*).

PULITI, GABRIELLO (*b.* Montepulciano, near Arezzo, late 16th cent.), Franciscan monk, held a number of posts as organist, including an appointment at Trieste Cathedral. He wrote several books of motets, madrigals, and other sacred and secular songs, including sacred songs for a solo voice with bass (1618) (*Q.-L.*).

PUNTO, see STICH, Joh. Wenzel.

PUPPO, GIUSEPPE (*b.* Lucca, June 12, 1749; *d.* Florence, Apr. 19, 1827), eminent violinist, was a pupil of the Conservatorio at Naples, and when still very young gained considerable reputation in Italy as a virtuoso.

He came to Paris in 1775; thence he went to Spain and Portugal, where he is reported to

have amassed a fortune. After having stayed for some years in England he returned to Paris in 1784, and remained there till 1811, occupying the post of leader, first at the Théâtre de Monsieur, which was then under Viotti's direction, then at the Théâtre-Feydeau, and finally conducting the band at the Théâtre-Français. As he was an excellent accompanist, he was much in request in musical circles, and might have secured for himself a competence if it had not been for his eccentricity and unsteadiness, which brought him into constant troubles. In 1811 he suddenly left Paris, abandoning his wife and children for ever. Arrived at Naples he was lucky enough to secure the leadership of the band at a theatre. He, however, did not stay long, but went to Lucca, thence to Florence, and finally found employment as teacher at a music school at Pontremoli. After two years he threw up this appointment and returned to Florence; was there found, utterly destitute, by Edward Taylor, Gresham Professor of Music, and by his generosity was placed in a hospice, where he died. His published compositions include three concertos, eight studies, duets for violin and pianoforte pieces. P. D.

PURCELL, the name of a family of musicians in the 17th and 18th centuries, which included amongst its members the greatest and most original of English composers.

(1) The name of 'Pursell,' presumably HENRY PURCELL the elder (*d.* Aug. 11, 1664), is first found in Pepys's *Diary*, under date Feb. 21, 1659-60, where he is styled 'Master of Musique.' He is said to have acted in 'The Siege of Rhodes' in 1656, and to have doubled the part of Mustapha with Thomas Blagrove. Upon the re-establishment of the Chapel Royal (1660) Henry Purcell was appointed one of the Gentlemen. He was also Master of the Choristers of Westminster Abbey. On Dec. 21, 1663, he succeeded Signor Angelo as one of the King's Band of Music. His sons are numbered below as Edward (3), Henry (4) and Daniel (5). He died Aug. 11, 1664, and was buried in the east cloister of Westminster Abbey, Aug. 13. There is a three-part song, 'Sweet tyranness, I now resign my heart,' in Playford's 'Musical Companion,' 1667, which is probably of his composition, although it is sometimes attributed to his more celebrated son. It was reprinted in Burney's *History*, iii. 486.

His brother, (2) THOMAS (*d.* July 31, 1682), was appointed Gentleman of the Chapel Royal in 1660. In 1661 he was lay-vicar of Westminster Abbey and copyist. On Aug. 8, 1662, he was appointed, jointly with Pelham Humfrey, Composer in Ordinary for the Viols to His Majesty, and on Nov. 29 following, 'Musician in Ordinary for the Lute and Voice

in the room of Henry Lawes, deceased.' In May 28, 1666, he supplicated¹ for arrears of payment. In 1672 he was, with Humfrey, made Master of the King's Band of Music. He was buried in the cloisters of Westminster Abbey, Aug. 2, 1682. He had probably been long before in ill-health, as on May 15, 1681, he granted a power of attorney to his son Matthew to receive his salary as Gentleman of the Chapel Royal. He was the composer of several chants, one of which (printed by Burney, *History*, iii, 477) has remained in constant use. A pencil portrait on vellum by Thos. Foster of 'Colonel Purcell' (Holburne Museum, Bath) may represent him. W. H. R., with addns.

(3) EDWARD (b. 1653; d. June 2, 1717), son of Henry (1) was Gentleman Usher to Charles II. He afterwards entered the army and served with Sir George Rooke at the taking of Gibraltar, and the Prince of Hesse at the defence of it. Upon the death of Queen Anne he retired and resided in the house of the Earl of Abingdon, where he died. He was buried in the chancel of the church of Wytham, near Oxford.

(4) HENRY (b. 1658-59; d. Westminster, Nov. 21, 1695), the famous composer, is discussed below.

(5) DANIEL (b. circa 1660; d. Nov. 1717), was in 1688 appointed organist of Magdalen College, Oxford, remaining there until 1695, when he resigned his appointment in order to live in London. It may have been as a consequence of his illustrious brother's illness and death in that year that he came to London, as in the last year of his brother's life he had written a masque in the fifth act of 'The Indian Queen,' and had added to the music of 'Pausanias.' In 1693 he had set to music Yalden's 'Ode for St. Cecilia's Day.' After his brother's death, Daniel Purcell seems to have been greatly in request for music for plays. He wrote music for 'The Patriot' and 'The Northern Lass.' In 1696 he wrote music for Mary Pix's 'Ibrahim XIII.,' possibly also for her 'Spanish Wives,' as well as for the anonymous 'Neglected Virtue,' and the 'opera,' 'Brutus of Alba,' the published songs from which bear the imprint 1696, though the piece was not produced till 1697-98. Cibber's 'Love's Last Shift' has music written by Purcell in the same year, and so has Lord Lansdowne's 'She Gallants.' In 1697 he wrote instrumental and vocal music to D'Urfeys's 'Cynthia and Endymion,' and collaborated with Jeremiah Clark in Settle's 'World in the Moon.' In 1698 he wrote music for Gildon's 'Phaeton, or the Fatal Divorce,' Cibber's 'Love makes a Man' and Lacy's 'Sawney the Soot' (an alteration of 'The Taming of the Shrew'), and set odes for the Princess Anne's birthday and St. Cecilia's

Day. About this time he set Nahum Tate's 'Lamentation on the Death of Henry Purcell.' Other odes for St. Cecilia's Day were written in later years. In 1699 he wrote music for Motteux's 'Island Princess' with Jeremiah Clark and Leveridge. In 1700 he wrote music for Oldmixon's 'The Grove, or Love's Paradise,' and gained the third of the prizes offered for musical settings of Congreve's 'Judgment of Paris.' (See ECCLES; FINGER; and WELDON.) The plays furnished for the year were Farquhar's 'Constant Couple'; D'Urfeys's 'Masaniello'; 'The Pilgrim' (Beaumont and Fletcher); Burnaby's 'Reformed Husband' and Cibber's 'Careless Husband.' In 1701 he provided some of the music for Lee's 'Rival Queens,' Finger having written some before him; Baker's 'Humours of the Age' and Mrs. Trotter's 'Unhappy Penitent'; in 1702, Steele's 'Funeral,' and in 1703, Farquhar's 'Inconstant' and Steele's 'Tender Husband' were the plays for which he wrote music. For the opening of Vanbrugh's theatre in the Haymarket (1705) he wrote an 'opera' on 'Orlando Furioso'; in Mar. 1706-07 he contributed music to Farquhar's 'Beau's Stratagem,' and in the latter year set a St. Cecilia Ode for Oxford. A masque, 'Orpheus and Eurydice,'² is mentioned in 1707, and among plays for which dates are not forthcoming are J. Hughes's 'Amalasont,' D'Urfeys's 'The Bath' and 'The Campaigners,' Motteux's 'Younger Brother,' and a revival of 'Macbeth,' all of which had music by Daniel Purcell. In 1712 he gave a concert of 'vocal and instrumental musick entirely new,' at Stationers' Hall, and in 1713 he was appointed organist of St. Andrew's, Holborn,³ a post which he retained until his death.⁴ On Dec. 12, 1717, the *Daily Courant* contained an advertisement of Edward Purcell's application for the post of organist 'in the room of his uncle, Mr. Daniel Purcell, deceased.' Daniel Purcell's works include

'The Psalmes set full for the Organ or Harpsichord as they are Plaid in Churches and Chappells in the manner given out; as also with their Interludes of great Variety.'

One of the 'givings out' and an 'interlude' are printed in *Mus. T.*, 1905, p. 162. There are six anthems in Magdalen College, Oxford, and songs, etc., are in 'Harmonia sacra,' 'The Banquet of Musick,' 'Thesaurus musicus' and 'Deliciae musicae.' Some sonatas for flute and some for violin with bass were published, as well as 'Six Cantatas for a Voice.'

(6) EDWARD (d. July 1, 1740⁵), youngest, but only surviving, son of the great Henry Purcell, was baptized in Westminster Abbey,

¹ By Dennis, printed in *The Musaeus Mercury*, 1707, W. D. S.

² For this appointment see 7th Report Historical MSS. Commission, Appx. p. 689b (Rev. T. W. Webb's Papers). 'Report of Sergeant Penningly as to ye organist of St. Andrews, Holborn.' W. D. S.

⁴ See *Mus. T.*, 1905, p. 158.

⁵ See *Ibid.*, Aug. 1905, p. 517.

¹ *Col. of State Papers*, ch. II. 1665-66, Ent. Books, xiv. p. 96.

Sept. 6, 1689. He was therefore (like his father) only 6 years old when his father died. When 16 years old he lost his mother, who by her nuncupative will stated that,

'according to her husband's desire, she had given her deare son good education, and she alsoe did give him all the Bookes of Musick in general, the Organ, the double spinnett, the single spinnett, a silver tankard, a silver watch, two pairs of gold buttons, a halfe ring, a mourning ring of Dr. Busby's, a Iarum clock, Mr. Edward Purcell's picture, handsome furniture for a room, and he was to be maintained until provided for.'

Embracing the profession of music, he became organist of St. Clement's, Eastcheap. He applied for the post of organist of St Andrew's, Holborn (see above, under Daniel (5)), but was unsuccessful, both at that time, when Maurice Greene was appointed, and a few months afterwards, when the post became vacant again owing to Greene's appointment to St. Paul's. On July 8, 1726, he was appointed organist of St. Margaret's, Westminster. There is a song by him in the 'Monthly Mask' for Sept. 1717.¹ He left a son,

(7) EDWARD HENRY (*d. circa* 1770), who was a chorister of the Chapel Royal under Bernard Gates. He succeeded his father as organist of St. Clement's, Eastcheap. He was organist of St. Edmund's, Lombard Street, and of St. John's, Hackney, from 1753-64. His name is among the subscribers to H. Burgess's songs.

LIFE OF HENRY PURCELL

HENRY (*b. circa* 1658-59; *d.* Westminster, Nov. 21, 1695), younger son of Henry Purcell the elder, is traditionally said to have been born in Little St. Ann's Lane, Old Pye Street, Westminster, but no authoritative evidence as to the birthplace is as yet forthcoming. Nor can the date be certainly fixed; the inscription on the tombstone, 'Anno Aetatis suae 37mo,' may be taken as proving him to have been born between Nov. 21, 1658, and Nov. 20, 1659 (see below, and *Mus. T.*, 1895, p. 733). From 1661 till the death of Henry Purcell the elder in 1664, the family lived in 'the Great Almonry South.' The arms on the monument, and those below the portrait in the 'Sonnetta's of Three Parts' (1683) seem to connect the composer with the family of Purcell of Onslow, Shropshire, but on this point nothing certain has been found. The statement that he lost his father before he was 6 years old (Aug. 11, 1664), if it can be accepted, still further limits the time of his birth, which must therefore have taken place between Nov. 21, 1658, and Aug. 11, 1659. On his father's death he was adopted by his uncle, Thomas Purcell (2), and was admitted a chorister of the Chapel Royal, under Captain Cooke, the master of the children. Cooke was succeeded in 1672 by Pelham HUMFREY (*q.v.*), and it is assumed that Purcell learnt from Humfrey the new French style of

music which Humfrey had learnt from Lully. As early as 1670 Purcell is said² to have composed music for an 'Address of the Children of the Chapel Royal to the King.' On the theory that the famous Macbeth Music is by Purcell, we are driven to suppose it to have been written in Purcell's 14th year, in 1672. If the song, 'Sweet tyranness,' ascribed to Henry Purcell the elder, is by Henry the younger it must date from this time.

On the breaking of his voice, he seems to have been retained as a supernumerary, and to have become a pupil of John Blow for composition. It is more than likely that he composed anthems during this period, but at present the dates of his earlier anthems have not been established. From 1676-78, and again from 1688-90, he held the post of copyist at Westminster Abbey. In 1676 he contributed a song to the new edition of bk. i. of Playford's 'Choice Ayres,' etc., and in 1677 composed an elegy on the death of Matthew Locke, printed in bk. ii. of the 'Choice Ayres,' 1679; other songs by him appeared in the same book. That he was composing anthems about this time is clear from a letter³ written by his uncle, Thomas Purcell, to John Gostling, the famous bass singer, at Canterbury, on Feb. 8, 1678-79, in which reference is made to Gostling's exceptionally low notes; it has been supposed that the anthem, 'They that go down to the sea in ships,' was written at this time, as it was undoubtedly intended for Gostling, but there is no direct evidence as to this. (See list below.)

In 1679⁴ Purcell succeeded Blow as organist of Westminster Abbey: it has been generally held that Blow resigned his place voluntarily, resuming it again after Purcell's death; but the act of magnanimity is by no means certain, and here again direct evidence is wanting. In 1680 began the long series of dramas in which music by Purcell played a more or less important part.⁵ About the same year Purcell wrote a number of 'Fantazias' for strings⁶ in various numbers of parts, which are preserved (B.M. Add. MSS. 30,930); a comparison of them with his 'Sonnetta's' of 1683 shows that the former were modelled rather on those of Orlando Gibbons than on those of the Italian masters who were copied in the later set. In that year, too, began the series of odes and 'welcome songs' which form no unimportant section of the composer's work from this time

¹ Cummings's *Life*.

² See *Ibid.*, p. 28.

³ 1680 has been generally accepted, but a re-examination of the Abbey records establishes 1679, see West, *Cath. Org.* p. 144.

⁴ Downes, *Roxius Anglicanus*, p. 49, states 'Theodorus or The Force of Love wrote by Mr Nathaniel Lee (not given), all the parts in it being perfectly performed with several entertainments of singing composed by the famous master Mr Henry Purcell (being the first he ever composed for the stage), made it a living and gainful play to the company, the Court, especially the Ladies by their daily charming preference gave it great encouragement.'

⁵ The nine 4-part Fantazias are dated from June 10 to Aug. 31, 1680. The Three, four and five part Fantazias for Strings were first published in score and parts by Cuwen in 1927; edited by P Warlock and A. Mangerot.

¹ Cf. also *Mus. T.*, Aug. 1905.

forth until the end of his life. 'Welcome, Viceroy of the mighty King' was written to greet Charles II. on his return from Windsor in 1680. Another ode of this year, 'to welcome the Duke of York on his return from Scotland,' is mentioned by Cummings,¹ but is not otherwise known. On July 14, 1682, he was appointed organist of the Chapel Royal in place of Edward Lowe, deceased. A year or more before this appointment he had married, and his eldest son was born on Aug. 9, 1682. Some songs are said to have been written for the inauguration of the Lord Mayor, Sir William Pritchard, on Oct. 29 of the same year. The following year, 1683, saw the publication of Purcell's first printed composition, the twelve 'Sonatas' of III. Parts: two violins and basso: to the Organ or Harpsicord. Composed by Henry Purcell, Composer in Ordinary to his most Sacred Majesty, and Organist of his Chappell Royall.²

It is quite clear from the preface that Purcell 'faithfully endeavour'd a just imitation of the most fam'd Italian Masters,' and it is an interesting question what were his exact models; it has been supposed that Bassani's sonatas were known to Purcell; but if this were so, the 'Balletti, correnti, gighe e sarabande,' the only work of his which was printed early enough (1677) are all on such a very simple, recurrent pattern that the theory can hardly be upheld. In that same year, 1677, the Opera quinta, also called 'Sonatas,' of Giovanni Battista Vitali, appeared at Bologna, and there is in their design and character so great a resemblance to Purcell's work that it is difficult to resist the conclusion that these may have been the Englishman's models.³ The opportunity for becoming acquainted with these Italian works was very probably due to Purcell's court appointment; but whatever the circumstances of their origin, there can be no doubt that the sonatas reach a far higher point of power and originality than had been previously attained in England, and that they are far more vigorous than the works from which they were imitated. The sonatas were printed in four partbooks, with one for the continuo part, or thorough-bass.⁴ It is perhaps fanciful to see in the name of Purcell's eldest son, 'John Baptista,' another imitation of Italian models.

The first of the odes on St. Cecilia's Day was composed in this same year (1683), and he seems to have written three for the same festival, one in Latin, 'Laudate Ceciliam.' The score of one, to words by Christopher Fishburn, 'Welcome to all the pleasures,' was

published in the following year. In 1684 Purcell, with Blow, took part in the famous organ competition at the Temple Church, playing the organ by 'Father' SMITH, the rival instrument, by Renatus HARRIS, being played by Draghi. At the time of the coronation of James II. Purcell received £34:12s. from the secret-service money for superintending the erection of an organ in the Abbey especially for the coronation. One of the anthems, 'My heart is inditing,' is held to have been composed for the occasion; the other, 'I was glad,' to have been composed before.⁵ In 1687 an 'Elegy on John Playford' was written, and, as well as a birthday ode, 'Sound the Trumpets,' in which occurs 'a duet for altos, "Let Caesar and Urania live," which continued so long in favour that succeeding composers of odes for royal birthdays were accustomed to introduce it into their own productions until after the middle of the 18th century.'⁶

By this time Purcell had provided music for about nine plays (see list below), and so had gained some stage experience. Still, none of the plays were such as required much skill of dramatic writing, and the marvel of the production of 'Dido and Aeneas' remains as great when it is assigned to its proper period of time in the composer's career as when the earlier dates of its origin were universally accepted.⁷

The history of this problem may be briefly summarised as follows: Hawkins,⁸ apparently reasoning from the fact that Tate's play 'Brutus of Alba' was first called 'Dido and Aeneas,' and that therefore the play with the latter title preceded 'Brutus of Alba' (pubd. 1678), suggested 1677 as the latest possible date for Purcell's music, and treated the work as that of a youth of 19. Prof. Taylor, in the Musical Antiquarian Society's edition, put it still further back, to 1675, but the discovery, in 1842, of a copy of the original libretto,⁹ showed —although it is not dated—that the work was written for Mr. Josias Priest's boarding-school at Chelsea. As Priest removed to Chelsea in 1680, that date was accepted by Rimbaud and others following him, who were anxious to place the composition of the opera as early as possible, for Purcell's credit. In D'Urfey's 'New Poems' (1690) is an epilogue spoken at the performance 'by Lady Dorothy Burk.' Squire, though unable to find more exact evidence for Lady Dorothy's age than can be

¹ *Life*, p. 32.

³ Bridge, quoting Roger North, held that Nicola Matteis (q.v.) was Purcell's principal model. See *Mus. Ass. Proc.* 1915-16, p. 4, also *Twelve Good Musicians*, p. 129. Barclay Squire has drawn attention to a first-hand piece of evidence from the 12th edition of Playford's introduction to the skill of Musick, which Purcell edited. Purcell has there introduced a passage from a work by 'the famous Lello Callista, an Italian,' as an example of fugue in the composition of a sonata. See 'ALBERTA.'

⁴ See preface to the sonatas, Purcell Society, vol. v., and *Mus. T.*, 296, p. 10.

⁵ On the chronology of Purcell's Church Music, see G. E. F. Arkwright, *Mus. Ass. T.* 63, 234; also preface to the several volumes of the Purcell Society. See also A. Hughes-Hughes, *Mus. T.*, 1890, pp. 21-3, for an attempt to establish two periods from the evidence of the composer's handwriting.

⁶ See Husk, article 'Purcell,' in 1st edition of this Dictionary. Barclay Squire established the date of the first performance as taking place between 1686 and 1690 (see *Samuel's Int. Mus. Ges.* vol. v, pp. 506-14).

⁷ *History*, edition of 1813, p. 745.

⁸ Printed in facsimile in vol. III. of the Purcell Society's publications.

based on a Treasury Paper containing a petition which shows that Lady Dorothy was a Protestant though her father was a Catholic, deduced from the fact that her father, the eighth earl of Clanricarde, succeeded in 1687 (and that therefore she would not be 'Lady Dorothy' until that year) the theory that the opera could not have been produced before that year, while a line in the epilogue, 'we are Protestants and English nuns,' and the phrase 'turning times,' point to the revolution of 1688 as being past, so that the date is limited to the time between 1688 and 1690, when the epilogue was published in D'Urfey's poems. Squire further pointed to internal evidence tending to confirm the comparatively late date of this most interesting work. For in dramatic directness, characterisation, adaptation of means to ends, feeling for climax, as well as actual beauty, the opera¹ is as much alive in the 20th century as are any of Gluck's. Every student is familiar with the poignant farewell of Dido, 'When I am laid in earth,' on Purcell's favourite foundation of a ground-bass; and the succeeding chorus of cupids is hardly less affecting, while the witches' music and all the rest is full of dramatic life and originality.

In 1689 Purcell was involved in a dispute concerning the fees paid for seats in the organ-gallery at the Abbey for the coronation of William and Mary; these fees had been considered by Purcell as his lawful perquisite, but an order was made that unless he refunded the money his place would be declared null and void. As he retained his place until his death, it is probable that he gave back the fees. In 1690 was produced, and in 1691 was published, the music to 'Dioclesian,' Betterton's adaptation of Beaumont and Fletcher's 'Prophetess,' the printed copies of which, issued at so low a price that the composer lost by the transaction, were all corrected by him with his own hand. The music would rank with the other theatrical productions were it not for the elaborate masque in the fifth act; the rest consists of act-tunes and a song or two. The whole is more elaborately scored than anything we have yet met with of Purcell's, trumpets and oboes (including a tenor oboe) being introduced. A oboe alone before the third act, in which two flutes have a canon above the recurrent bass, is singularly beautiful, the song, 'What shall I do to show how much I love her!' has remained in favour until the present day, and the final chorus, 'Triumph, victorious Love,' is a remarkably fine, sustained piece of music. In spite of its want of commercial success, the music to 'Dioclesian' seems to have won for the composer the favour of Dryden.²

Of far greater importance was the next work in which Purcell was associated with Dryden, the so-called opera of 'King Arthur' (1691). The musical numbers in this piece, though far more numerous than those in 'Dioclesian,' are still a kind of adjunct to the main scheme of the play; the singing parts are quite distinct from the personages of the drama, and the music, as a whole, might be most properly described as a series of *intermezzi*. Individual scenes, such as the sacrificial scene, the wonderfully effective 'frost scene,' and the whole of the concluding masque, are full of beauty and originality; but there is so little connexion with the play that a performance of the music alone (such as was given at the Birmingham³ Festival of 1897) must necessarily seem rather wanting in continuity. Whether, after uniting all the separate portions preserved in various MSS. and printed editions, we possess all the music that Purcell wrote, as he wrote it, cannot as yet be decided; but music has been found for all the portions in which music is required, and what we have now is probably something very like what Purcell produced. The 'Ayres for the Theatre,' which is the authority for many of the instrumental numbers, were only published for stringed instruments, and there may have been other instruments added to these for the performance, as other instruments take part in the body of the work.

The chief work of 1692 was in connexion with an anonymous adaptation of *A Midsummer Night's Dream*, called 'The Fairy Queen,' and produced at Dorset Gardens Theatre in the spring of that year. The 'Select Songs' published by Heptinstall in 1692 are the only part of the music that appeared in Purcell's lifetime; by Oct. of 1700 the score had been lost, and the patentees of the theatre offered a reward of £20 for its recovery. By a most fortunate accident the theatre copy of the music was discovered in 1901 in the library of the R.A.M., and the whole work, edited by Mr. J. S. Shedlock, was published in the Purcell Society's edition (1903). It is conjectured that the volume was in the hands successively of Dr. Pepusch, William Savage and R. J. S. Stevens.⁴ Like the other 'operas,' the piece contains a number of beautiful things quite unconnected with the original play of Shakespeare, and it is curious to notice that no word of Shakespeare's is here set to music by Purcell. The songs of the seasons, culminating in the splendid bass song, 'Next Winter comes slowly,' the beautiful soprano air, 'O let me weep,' and other things, are justly famous. The ode for St. Cecilia's Day of the same year, set to words by Brady, 'Hail, bright Cecilia!' is the most elaborate of the compositions for

¹ On the question as to the completeness or incompleteness of the present score see the *Editorial Note* of the Int. Mus. Ges. vi, 56.

⁴ *Mus. T.*, 1901, pp. 388 and 473.

this festival, and the ode for Queen Mary's birthday in this year, Sedley's 'Love's Goddess sure was blind,' contains a song, 'May her blest example chase,' in connexion with which a story is told by Hawkins to the effect that Purcell, nettled by the Queen's asking Mrs. Arabella Hunt to sing the Scots song, 'Cold and Raw,' on some occasion when he was present, introduced it in the next birthday ode, making it the bass of the air just mentioned. The story may or may not be true, but the song is a striking instance of Purcell's love for a moving bass and his skill in treating basses of this kind, whether melodic in themselves, or recurrent, as in the numberless 'ground-basses' of fine quality that exist of his.

In 1693 Purcell wrote music for a great many plays, and set Tate's ode for the Queen's birthday, 'Celebrate this Festival.' He must have composed in this year the ode for the centenary commemoration of Trinity College, Dublin, 'Great Parent, hail' in connexion with the celebration held on Jan. 9, 1694.¹ In 1694 Purcell revised the twelfth edition of Playford's *Introduction to the Skill of Musick*, and while altering the earlier part of the book in many ways, he completely rewrote the treatise at the end.² The opening words of the section for which he is responsible are curious when taken in connexion with Purcell's own way of treating the bass.

'Formerly they used to Compose from the *Bass*, but Modern Authors Compose to the *Treble*, when they make *Counterpoint* or *Basses* to Tunes or Songs.'

The whole passage which follows is of the utmost interest to the student of Purcell's music. The great work of this year was the splendid *Te Deum* and *Jubilate* for St. Cecilia's Day, which, after its publication by Purcell's widow in 1697, was annually performed at the FESTIVAL OF THE SONS OF THE CLERGY (*q.v.*) until Handel wrote his *Utrecht Te Deum* in 1713, after which the two works were performed alternately till 1743, when Handel's *Dettingen Te Deum* displaced both the others. (See also THREE CHOIRS FESTIVAL.) In a mistaken desire to bring Purcell's work into accordance with the prevailing Handelian fashion of his day, Boyce rearranged it in such a manner that its character was spoilt, and the work was not available in its original form until, in 1895, for the Purcell Bicentenary, Sir J. F. Bridge, who possessed the autograph score,³ brought out a purified edition of it.

Queen Mary died of smallpox at Kensington, Dec. 28, 1694, and was buried on Mar. 5, 1694/95, in Henry VII.'s chapel in Westminster Abbey. The funeral was of rare magnificence, and various accounts of it were

published; it is now certain that Purcell composed for it the beautiful anthem, 'Thou knowest, Lord, the secrets of our hearts,' as well as two pieces for 'flatt trumpets'; but the evidence for the assumption that the second anthem was his 'Blessed is the man' rests on a very slight foundation. Barclay Squire has given the text of the 'March' and 'Canzona' that were played; the former was adapted from the music to 'The Libertine' written about two years before. The instruments on which the pieces were played were almost undoubtedly 'sackbuts' or trombones. The anthem became so famous that in after-years, when CROFT (*q.v.*) composed the music for the Burial Service, he incorporated Purcell's music, instead of setting these words anew. Two elegies for the Queen were written in 1695, which were published in a collection, together with one by Blow. In this same year, the last of the composer's life, he wrote music for the 'operatic' version of Howard and Dryden's *Indian Queen*, when it underwent the usual process of adaptation for music, i.e. the addition of numbers which could be set to music quite independently of the original play. It has been shown by Squire⁴ that the work belongs to this last year of Purcell's life, and it is conjectured that to his illness was due the fact that the final masque was composed by his brother, Daniel Purcell. An extraordinary piece of literary piracy was achieved in regard to this music. Messrs. May and Hudgebutt not only brought out the music, but had the impertinence to prefix to it a dedication to Purcell himself, in which they admit and excuse their theft. Another work for the stage, probably dating from the same year, was in connexion with Shadwell's adaptation of *The Tempest* into 'an opera'; this had first appeared in 1673, but there is no evidence of any of Purcell's music being written before 1695, in which year a song, 'Dear pretty Youth,' was published, in 'Deliciae musicae' (see TEMPEST). There is a strange lack of contemporary MSS. of the music.⁵ Cummings had an old theatre copy, and another is in the British Museum; Goodison's edition is the principal source for the music, but is untrustworthy as to dates. Yet another work for the stage, produced in the same year, 'Don Quixote, part iii,' contained what was no doubt Purcell's last composition, the song 'From rosie Bow'rs.' This was also printed in 'Orpheus Britannicus' with the heading, 'This was the last Song that Mr. Purcell Sett, it being in his Sickness.' There is apparently nothing else of Purcell's in the production. Purcell died on Nov. 21, 1695, probably at his house in Marsham Street, Westminster.⁷ The

¹ The score (30 pages) for voices and strings preserved in the Library of Trinity College, Dublin, is entitled 'Commemoration Ode Performed at Christ Church in Dublin, Jan. 9, 1694.' L. L. M. C. D.

early deaths of three of his children suggest that there was a consumptive tendency in the family, and in any case there is no need to attach any importance to the tradition reported by Hawkins, that the composer caught cold from being kept waiting for admittance into his house late at night. He was buried Nov. 26, 1695, beneath the organ in Westminster Abbey, and a tablet was erected on a pillar near the grave by Annabella, Lady Howard, who may have written the inscription:

'Here lyes HENRY PURCELL Esqr. Who left this life And is gone to that Blessed Place Where only his Harmony can be exceeded. Obijt 2jmo die Novembris Anno Aetatis suae 37mo. Annoq Domini 1695.'

Over the grave was placed the following epitaph:

'Plaudite, felices superi, tanto hospite, nostris
Praefuerat, vestris addite ille choris:
Invida nec vobis Purcellum terra repositat.
Questa decus aëli, delicataeque breves.
Tam cito decessisse, modo cul singula debet
Musa, prophana suos religiosa suos.
Vivit lo et vivat, dum vicina organa spirant,
Dumque colet numeris turba canora Deum.'

This, having become totally defaced, was renewed in 1876.

Purcell had six children, three of whom died before him, viz. John Baptista, baptized Aug. 9, 1682, buried Oct. 17 following; Thomas, buried Aug. 3, 1686; and Henry, baptized June 9, 1687, buried Sept. 23 following.

His eldest daughter was FRANCES (bapt. Westminster Abbey, May 30, 1688; *d.* 1724). In 1706 her mother appointed her her residuary legatee and her executrix, when she should reach the age of 18. She proved the will July 6, 1706. She married, shortly after her mother's death, Leonard Welsted, poet and dramatist. Her only daughter was FRANCES (b. 1708; *d.* unmarried 1726). Another daughter of Purcell, MARY PETERS (bapt. Westminster Abbey, Dec. 10, 1693), it is presumed, survived her father, but predeceased her mother, as she is not named in the latter's will. For EDWARD, the only son who survived his parents, see (6) above.

The composer's widow survived him till Feb. 1706, when she died at Richmond, being buried on the 14th in the north aisle of Westminster Abbey. The works of Purcell published posthumously are as follows:

'Ten Sonatas in Four Parts' (1697), for the same combination of instruments as the set published in 1683, and containing the famous 'Garden Sonata.'

'Lessons for the Harpsichord or Spinnet' (1696).

'A Collection of Ayres for the Theatre' (1697), containing act-tunes, etc., for many of the plays.

'Orpheus Britannicus', a 'collection of Purcell's songs, bk. I. 1698, bk. II. 1702, second edition of bk. I. 1706, second edition of bk. II. 1711. A third edition of both books, or more probably the 'remainder' of the stock, furnished with a new title-page, was issued in 1721, but is very rare.

By way of exception to the usual course of composers' reputations, there has always been a tradition of Purcell's greatness, and a more or less continuous stream of editions of his works. Even the vogue of Handel was not enough to obliterate all trace of Purcell's

fame. The influence of the Englishman's music upon the German master is quite unmistakable; before Handel came to England the massive choral effects, produced by means of the utmost simplicity, are not to be found in any of his works; they are the distinguishing mark of Purcell's choruses, although Purcell's are very short as compared with Handel's.¹ Among the most important issues of Purcell's music must be reckoned Vincent Novello's four volumes of the Sacred Music (1829-32), which contain all the anthems and services, etc., then accessible. Unfortunately the edition, and those which base their readings upon it without reference to better authorities, are so inaccurate that very little idea can be obtained of the true characteristics of the composer's genius. The Musical Antiquarian Society did useful work in publishing many of the most important of Purcell's compositions; but it was not until the foundation of the PURCELL SOCIETY (*q.v.*) in 1878 that a really methodical issue of the music could be begun.

M.

PORTRAITS.—The following is a list of the portraits of Purcell as to which there can be no doubt.

(i.) Oval, head and shoulders, turned to the left, as a young man, by Sir Godfrey Kneller. This picture was given by Purcell to John Church (1675?-1741), from whom it descended to his son, the Rev. John Church (*d.* 1785), rector of Boxford, Suffolk. The latter's daughter (Mrs. Strutt) gave it to Joah Bates (1741-99), who owned it in 1793. In 1846 it was owned by Edward Bates, when it was engraved by W. Humphreys from a drawing by Edward Novello for Vincent Novello's edition of Purcell's sacred music. It was bought from the Bates family by Henry Littleton, and from him passed to his son Alfred H. Littleton, after whose death (1915) it was bought by W. Barclay Squire (see *PLATE LXII.*).

(ii.) A drawing or sketch of (i.), formerly in the possession of Dr. Burney, later in that of Archdeacon Burney, now in the Print Room, British Museum.

(iii.) At the age of 24. Engraving by R. White in the Sonatas of Three Parts, published in 1683. No original of this is known.

(iv.) A painting (oval, half-length) by John Closterman, in the National Portrait Gallery (No. 1352). This is the original of the engraving in 'Orpheus Britannicus' (1698), and was probably painted after the composer's death. A copy or replica is preserved at Dyrham Park, Chippenham, and a small version is in the collection of Mr. A. F. Hill. According to Hawkins (*History of Music*, 1853, ed. ii. p. 747, and also in the *Universal*

¹ See E. D. Rendall, *Mus. J.* 1895, p. 292, on the influence of Purcell on Handel's 'Acis and Galatea.'

Magazine, Dec. 1777), a tavern formerly existed in Wyck Street with the sign of 'The Purcell's Head.' This sign was 'a half-length; the dress a brown full-bottomed wig, and a green night-gown, very finely executed.' The description agrees with the Closterman portrait, and possibly one of the two above-mentioned versions was originally the tavern-sign.

As to the following, doubts have been raised whether they represent Henry or Daniel Purcell.

(v.) A small half-length, seated at a harpsichord, on which is an open music-book containing part of a 'Sonata Settima'; the left hand points to a miniature held in the right hand. By John Closterman (National Portrait Gallery, No. 1463). This picture formerly belonged to Dr. Burney. Another version of it (belonging to Miss Done, Worcester) has a different portrait in the miniature, and the music-book contains 'Britons, strike home' (from 'King Arthur'). A sketch for this picture is at Christ Church, Oxford (Walpole, Soc. vol. v. p. 2). Sir Charles Holmes (*Burlington Magazine*, Aug. 1915) considers that these pictures represent Daniel Purcell.

(vi.) Half-length, holding a roll of music. By John Closterman (Royal Society of Musicians). Belonged to the composer's son Edward and his grandson, Edward Henry, from whom it was bought by Dr. Boyce. At the death of the latter it was sold to Redmond Simpson, who bequeathed it to the directors of the Ancient Concerts, with remainder to the Royal Society of Musicians. Engraved (mezzotint) by G. Zobel. Sir Charles Holmes (*Burlington Magazine*, Aug. 1915) considers that this represents Daniel Purcell; the original is certainly the same as that of No. v.

(vii.) A fine oil painting now at the R.C.M. bears the inscription, 'Henri Purcell A^o Dⁿⁱ 1693.'

All the prints and engravings are copied from or based on Nos. (i.), (ii.), (iii.). (i.) From this and the sketch for it there are prints or engravings by S. Harding, engraved by W. N. Gardiner, published by E. and S. Harding in 1794 as from 'an original picture at Dulwich College'; by W. Pinnock, 1823, and as the frontispiece to Novello's edition of Purcell's Sacred Music. From (iii.) there is a print 'finely engraved from an original Painting' in the *Universal Magazine*, Dec. 1777, and by C. Grignion in Hawkins. From (iii.), besides the frontispiece to 'Orpheus Britannicus,' there is a small engraving by H. Adlard.

A bust of Purcell was formerly in the Music School, Oxford, but has disappeared. In the *Dictionary of National Biography* it is stated that a portrait (called 'Thomas Clark') in the Board Room, Dulwich College, represents Purcell. The picture is still there, and certainly is not a portrait of the composer.

The *Mus. T.* for Sept. 1920 published reproductions of three alleged portraits of Purcell, but in the best opinion these are not contemporary, nor is anything said about their origin.

W. B. S.

CHARACTERISTICS OF PURCELL'S ART

It remains to make some examination of the grounds on which Purcell has been styled 'the greatest and most original of English composers.' In recent years his claim to that title has been questioned in view of the increased knowledge of the great Elizabethans, notably Byrd and Weelkes, and the fuller and richly deserved homage paid to them. They stand at the summit of a great artistic epoch; Henry Purcell began a new era. He was born into a society which had to recreate traditions from the ruins of old ones, to build up new institutions and prove the efficacy of untried tools. It was Purcell who, more than any other, did all these things for the London of the Restoration period, and in doing so set his seal on the music of the Church, the theatre, the concert room and the chamber. In only the first of these is it possible to institute a comparison between Purcell and his Elizabethan predecessors which may be partly to his detriment (see ANTHEM and SERVICE). Even here, however, the comparison is not very pertinent. It is true that the Restoration re-established practically the same liturgy in the English Church as that which had belonged to the first Caroline era, but the appearance of identity is deceptive. There was a deeper cleavage between the Church of Purcell and Orlando Gibbons than between that of Gibbons and Taverner, although Taverner had composed for a Latin Office and Gibbons for an English one which virtually was that of Purcell's day. Despite the destruction of the monasteries the English cathedral service had maintained, up to Gibbons's day, much of the monastic ideal, expressed musically in a polyphony which was the combination of modal melodies. It was the puritan revolt which swept away the reflective artistic culture of the monasteries.

CHURCH MUSIC.—Purcell served a thoroughly secularised church, and its music was based on the secular methods deliberately imported by Charles II. through HUMFREY (*q.v.*). In the Chapel Royal, in which Purcell was brought up and for which the majority of his anthems were written, music was regarded as a discreet entertainment for the men and women of fashion who composed the court. Purcell's methods in his numerous 'verse' anthems with accompaniments, including long ritornelli for strings, are those of the theatre and the chamber sonata, the parts moving harmonically over a THOROUGH-BASS (*q.v.*). Their words are most frequently taken from the Psalms, occa-

HENRY PURCELL

From the painting by Sir Godfrey Kneller, bequeathed by the late W. Barclay Squire to the
National Portrait Gallery

sionally from the Prophets, and in one famous instance, 'My beloved spake,' from the Song of Solomon. The Christian religion is sedulously avoided; save where the Judaic texts are occasionally rounded off with a 'Gloria Patri,' his anthems would be as suitable to a synagogue as to a Christian Church. What he did was to dramatise the sentiments of the Psalmist, just as he dramatised his theatrical librettists, and he produced in these works a series of cantatas bristling with points of interest, quickly achieved moments of vivid expression between combined solo voices (generally male alto, tenor and bass) filled out with ingeniously wrought instrumental music.

The survival of Purcell's anthems in the daily cathedral services of later generations damaged his reputation far more than the temporary neglect of all his admittedly secular work. Their instrumental parts were omitted; their rhythms were flattened out by the droning voices of 'lay clerks' and their *tempi* were slowed down to suit conceptions of propriety which had never troubled him in their composition. Purcell's church music cannot be properly understood until it is taken at his own valuation, performed as he intended it to be, frankly and fearlessly and without, as it were, an eye on the stately tread of the Dean's vergers. An example may be quoted from 'In thee, O Lord, do I put my trust.' It begins with a fine symphony for strings on a ground-bass, and the whole is carried on in a series of 'verses' for men's voices alternating with symphonies in which the themes are developed instrumentally. The following air for alto voice is a typical example of Purcell's vocal cantilena above a flowing instrumental bass.

1.

My lips shall be fain when I

sing un - to Thee, My lips shall be

fain when I sing un - to Thee,

Obviously this moves freely at a fairly quick pace, which will make the 'Alleluja' trio at the same pace very fast indeed. The entry of the bass voice with this phrase,

2.
Al - le - lu - ja, Al - le - lu - ja,
Al - le - lu - ja, Al - le - lu - ja.

may sound shockingly jovial, but that is the pace at which it must go if Purcell is to be rightly interpreted, and when so sung the movement is a brilliant scherzo. It is that sort of thing which has earned Purcell the reputation for frivolity in church circles, but his anthems are anything but frivolous. Next to his capacity for happiness is his capacity for poignant expression produced by an interval of melody or an unexpected conjunction of harmonies, the latter especially where the words suggest a hint of mystery. Such a moment occurs earlier in the same anthem in the words 'Thou art He that took me out of my mother's womb,' where the chord (D, B \flat and F \sharp) following on F major harmony is extraordinarily arresting.

8.

Alto and Tenor.

Bass.

Cont.

Thou art He that

Thou art He that took me out,

Thou art He that

took me out, Thou art He that

Thou art He that took me out . . .

took me out, Thou art

But the fact that such things as these were the basis of his style does not mean that he was oblivious of the broader effects of choral voices in the mass or unable to draw on the resources of polyphony when necessary. The spacious handling of 'Let every thing that hath breath' (finale to the anthem, 'O Praise God in his holiness'), where ten real parts, two violins and eight voices, employ the arts both of polyphony and of homophonic groups of chords, shows his command, and we have only to quote the ending of the beautiful 'Save me, O God' to realise that Purcell was a master of the strict contrapuntal style (see overleaf).

The quotation further shows how strong was the influence of modal melody on Purcell, and throughout his works it gains an added interest by its conjunction with the clearly defined

recitatives a melodic form which makes them musical works of the first order. They are singularly free from that desultory wandering from phrase to phrase and the repetition of harmonic and melodic *clichés* which deface the recitatives of the 18th century, even those of the greatest composers. To get the full measure of his power in this direction a careful study should be made of the soliloquy of Aeneas which ends the second act of 'Dido.'

It must be admitted that his eloquence is sometimes limited (though not in 'Dido,' his greatest piece of vocal declamation) by a tendency to seek expressiveness through a strained use of vocal ornament. Certainly he uses to excess such dotted note rhythms as

in both the anthems and the odes, and in a way which gives the feeling of a forced cheerfulness becoming at times irritating. But the reliance on such rhythms is the only sign of anything which can be called a *cliché* in the whole of Purcell's work. Sometimes his ornaments are unsuccessful only because of their extreme venturesomeness. The song 'Tis Nature's Voice,' in the Ode on Saint Cecilia's Day (1692), said to have been 'sung with incredible graces by Mr. Purcell himself,'¹ pushes to its furthest limit the art of decorative word-painting.² That it was written for his own voice shows that Purcell must have been himself a very highly accomplished counter-tenor (alto) singer, and lets us into the supreme secret of his composition. Whatever he writes for the voice, from the most artless melody, tavern song or catch to the most elaborate piece of vocalisation such as this, has behind it the sure instinct of the singer.

It was this singer's instinct which made Purcell the greatest master of the ground-bass used as a song form. The ground-bass of the Chaconne type, wherever it appears in musical history, in the operas of Lully, the violin solo sonata of Bach, or the fourth symphony of Brahms, has the inherent weakness that the music tends to get cut into phrase lengths corresponding with the repetitions of the ground. That is equally a characteristic of Purcell's use of it for dance purposes in his stage works.³ Where, however, he adopts the ground-bass as a structural principle in song the voice part is entirely unfettered in rhythm by the measure of the bass. In 'Dido and

Aeneas' there are three such songs of which the last has become the most famous on account of its extraordinary intimacy of expression. Both the others, however, 'Ah! Belinda' and 'Oft she visits' are more subtle examples of Purcell's way of crossing the 4-bar rhythm of the ground-bass with vocal phrases of unequal length, overlapping the cadences and producing melodic contours as free as those of unaccompanied recitative. The music of 'Dido' is now so generally accessible⁴ that quotation here is unnecessary.

THEATRE MUSIC.—Romain Rolland, in one of the most penetrating studies of Purcell's art which has appeared in recent years,⁵ says:

'Presque partout, il resta incomplet; il ne chercha pas à briser les dernières barrières qui le séparaient de la perfection.'

The general truth of this must be admitted, but in 'Dido' we have the one work which makes the qualification of the statement necessary. The more it is studied the more confidently can we assert its flawlessness as one of the masterpieces of music-drama and the only English one. The special circumstances of its production (see LIFE OF HENRY PURCELL above) made it possible for Purcell to write here as he willed and not in accordance with the demands made by fashion. We have seen how largely his church music was conditioned by fashion, and the Restoration theatre was even more fettered than the Restoration Church. That which was called 'opera' meant a stage work designed to appeal to the eye rather than to the ear, a hybrid of the spoken drama and the MASQUE (*q.v.*). Music ranked with dancing, scenery and 'machines' as one of the attractive accessories of the production, not as its *raison d'être*. Matthew LOCKE (*q.v.*) in his preface to 'Psyché' (1675) exposes the whole position with frankness, bitterly contrasting the English conception of opera with that of the Italians, and claiming with justice that he had done more than any other to raise the musical status of the entertainment which passed by that name. Purcell at a later date also expresses his view of the matter in a preface,⁶ that to 'The Fairy Queen' (1692), where, like Locke, he draws an unfavourable comparison between the position of English opera and opera in Italy and France, and raises what is probably the first plea for a subsidised opera-house. This preface, written after the private production of 'Dido' at Chelsea,⁷ defines opera as 'a story sung with proper action,' which is just what 'Dido' is and 'The Fairy Queen' is not. All that

⁴ There are two editions of the vocal score, that edited by W. H. Cummings (Novello) and one, embodying more recent research (1926), edited by E. J. Dent (Oxford Univ. Press), with a German translation by Anton Mayer.

⁵ *Encyclopédie de la musique et dictionnaire du Conservatoire; L'Opéra au XVII^e siècle—Anglais.*

⁶ Reprint in Purcell Society's edition, vol. xii.

¹ See, for example, the 'Chaconne,' 'Dance for a Chinese man and woman' in 'The Fairy Queen,' but compare with this the sonata No. 6 of the 'Ten Sonatas in Four Parts' discussed below.

⁷ 'Dido' itself seems to have been an attempt to follow up the experiment, also privately made, of Blow's 'Venus and Adonis.'

Purcell was ever able to do in his works written for the public stage was to secure the continuity of the music through certain scenes (generally those having to do with supernatural characters) interpolated into the spoken play. 'The Fairy Queen,' 'King Arthur,' 'The Tempest' and 'The Indian Queen' may be regarded as operas in this limited sense, but no one of them is, to use his own term, 'a perfect opera.' The masques in 'Dioclesian' and in 'Timon of Athens' also have sufficient continuity to be considered as belonging to the operatic category. The rest are a more or less fortuitous collection of pieces, overtures, curtain tunes, dances and songs, hastily thrown off to meet the requirements of incidental music. Except as evidence of Purcell's almost Schubertian fund of melody they are unimportant.

FESTIVAL ODES.—The fashion of producing odes set to elaborate music for combined voices and instruments whenever a festival of any sort, public or private, was to be celebrated is historically interesting for us, because it marks the beginning of that form of concert-giving which has been most characteristic of the English people through two succeeding centuries. Handel discerned the national genius for such choral singing and exploited it in his oratorios from which many developments spring (see **THREE CHOIRS FESTIVAL**). In Purcell's day the institution of the festivals of **ST. CECILIA** (*q.v.*, subsection **CECILIAN FESTIVALS**) were the most public occasions of the kind and the most worthy to engage the powers of the artist. The praise of music was a theme calculated to inspire a composer; Purcell's contributions to it are all interesting, and culminate in the masterpiece of 1692, 'Hail, bright Cecilia,' for which Nicholas Brady provided him with at least a fairly serviceable libretto. Its central chorus 'Soul of the World' stands beside the final chorus of 'Dido' and the anthem 'Save me, O God' as evidence of Purcell's power to rise to the expression of a supreme emotion when he was deeply stirred. Apart from this moment the work is full of subtle strokes of the kind in which he excelled; the declamation of 'Tis Nature's Voice,' the ground-bass song 'Wondrous Machine,' and the handling of *obbligato* instruments, flutes, oboes and violins, in several numbers are all Purcell in his finest and most delicate vein. Particularly it is worth while to note the duet (alto and tenor), 'In vain the am'rous flute,' where he quotes the ground-bass of Dido's Lament but does not use it as a ground. This treatment shows his freedom from stereotyped formulae. Apart from the St. Cecilian celebrations, however, the production of odes for every conceivable occasion, especially royal occasions, was part of the routine duty of a composer who, young as he was, was the

acknowledged leader of his time and who held royal appointments. In the long series of birthday and welcome odes, with their fulsome compliments to thoroughly uninteresting dignitaries, it is quite evident that Purcell is often forced to simulate an enthusiasm which he does not feel. He schools himself to sentiment for Queen Mary's birthday year by year; compare the following from 'Now does the glorious day appear' (1689) with the very similar movement of 'Oft she visits' in 'Dido,' and the difference between art and artifice is instantly apparent.

A year later the martial prowess of Dutch William sinks him to

We know that Purcell had a sense of humour. The drunken poet, supposed to be a caricature of D'Urfey, in 'The Fairy Queen,' sufficiently shows that. Is it possible that he apostrophised his sovereign with his tongue in his cheek? A sincerer form of patriotism, the love of country, could rouse Purcell to write sturdy British songs as different in tone from this bombast as they are from the delicate artistry of 'Dido' and 'Hail, bright Cecilia.' Chief among the odes in this vein is the robust 'Yorkshire Feast Song' whose ballad tunes and bucolic choruses belong to the same category as those of the patriotic opera 'King Arthur.' In such things Purcell shows that he can say the obvious thing in music without fear of vulgarity. That power alone goes far to establish him as the greatest of English composers.

INSTRUMENTAL MUSIC.—There remains to be considered one field of his art in which his position is certainly unique, that of pure instrumental music. For practical purposes that is covered by the fantasies for strings and the sonatas for strings and harpsichord. His suites for harpsichord solo were written for educational purposes, many of the single dance pieces for harpsichord are arrangements from

theatre tunes and songs, and only the toccata in A stands out from these things as a work conceived in the grand manner for virtuoso performance. It has been suggested that this was intended for the organ, but a comparison of it with the few desultory organ pieces by him which survive makes the suggestion seem more than doubtful. Certainly no intelligent editor would have included any of them among the doubtful works of J. S. Bach, as the toccata was included by the editors of the Bachgesellschaft edition. With this solitary example of big work one wonders the more at the lack of enterprise shown by Purcell in writing for the keyboard instruments. He did nothing to revive for the harpsichord or the organ the glories of the old English virginal school (see VIRGINAL MUSIC), and this toccata shows that he could have done something.

With his string music, however, the case is very different. The 'Fantazias' of 1680 show him working on the lines of the old English consort of viols which had been the instrumental counterpart to the madrigal in an earlier generation (see FANCY). The twelve 'Sonnetas' of III Parts,¹ published three years later, make a definite break with the past. In them the composer revises his technical style in the light of what he had gleaned from whatever source of the methods of the Italians. The counterpoint now rests on the foundation of the THOROUGH-BASS (*q.v.*), and the three parts, two violins and bass viol, are accompanied by a keyboard instrument. Each sonata consists of a group of movements arranged to give direct contrasts of *tempi*, fast and slow. Their number varies from four to seven, and each (except generally the first movement) is marked by one of the Italian terms, *adagio*, *grave*, *largo*, *presto*, *allegro*, *vivace*, which are explained according to his own interpretation of them in the preface. It is quite clear from the internal evidence of style that the opening movements are always intended to have dignity and weight of utterance, and demand a moderate *tempo*. The *largo* is always in a triple time and has the character of a saraband, though neither that nor any other dance-form name is employed by Purcell in his sonatas. In fact the only generic title used is 'canzona,' which appears in eight out of the twelve sonatas. The *canzona* is the movement of greatest contrapuntal energy. An incisive subject introduced fugally sets the rhythmic pattern of the movement. Sometimes imitations on the principal theme form the chief source of thematic interest, as in the *canzona* of sonata No. 4 in F major; at other times (*e.g.* the *canzona* in No. VI, C major), after a sufficient development of the first idea Purcell leaves it for another one in a care-free fashion. A certain looseness of texture in the *canzonas*, and indeed

elsewhere, remains as a legacy from the style of the Fancy, as described by Morley. The principle of recapitulation which the Italians early made the basis of their form (see FORM and SONATA) is hardly recognised by Purcell. The short *grave* and *adagio* movements which separate these larger forms and are sometimes employed as finales are very personal. It is in them that we get most of those astringent harmonies which he uses in moments of strong feeling, alike in the music of the Church and the stage. Such passages as the following give an interest and colour to those sonatas, which more than replaces the suavity of melody on which the Italians relied.

This from sonata No. IX., one of the finest of the whole series, is typical, and it should be noticed that a peculiarly vivid sense of contrast is here produced by the fact that this striking chromatic cadence precedes a finale in 12-8 time, which is in effect, though not in name, one of the most light-hearted of jigs. In this instance, as in others which approach dance movement types, the form is thoroughly organised and balanced.

Burney's general criticism of the style of these sonatas, that 'the passages all come from the head and not from the hand,'¹ is a pertinent one. His comparison, to Purcell's disadvantage in this respect, is with Corelli, whose first set was published in Italy simultaneously with Purcell's, and therefore was not among the latter's Italian models. But the defect which Burney discovers has nothing to do with models of composition but with the fact that a violinist instinctively gravitates towards passages which belong to the technique of his instrument (see BOWING and FINGERING), and one searches in vain

¹ General History of Music, vol. III. p. 567.

through Purcell for any evidence that the composer was a violinist. The note *c*¹ is the limit of his upward compass, arpeggio passages of the kind which lie across strings tuned in fifths are not sought out, no emphasis is laid on the contrasts of tone between one string and another, bowing is hardly considered.² In general the counterpoint might be as well played on flute or organ stops as on the strings. This is sufficient to explain why Purcell, with far more original genius than Corelli, failed to found a school of concerted chamber music in England. His sonatas appealed, as they still do, to those 'who carry musical souls about them,' but much less to those who carried violins about them. They neither advanced the technique of the student nor served to display the achievements of the virtuoso.

What care Purcell bestowed on the musical scheme of these sonatas, which it must be remembered were his first important publication, is shown by the fact that no two of the twelve are in the same key. They are arranged in pairs, a minor key being followed by a major one throughout, the first eight being in a sequence of a minor followed by its relative major.³ The implication is that he set himself to exhibit all the keys which the unequal temperament of the harpsichord made it convenient to use. He may even have contemplated pursuing the matter further on the lines of Bach's 'Wohltemperiertes Clavier,'⁴ since the 'Ten Sonatas in Four Parts' published posthumously by his widow begin with two further keys,⁵ which would accord with this scheme.

It has generally been assumed that the 'Ten Sonatas in Four Parts' represent a later phase of Purcell's art, but there is no evidence, either external or internal, to support this idea. Indeed Frances Purcell's remark in the dedication to Lady Rhodia Cavendish, that the collection had 'already found many friends,' shows that at any rate they were not new. It is even possible that some were already written when Purcell himself made his choice of twelve in contrasted keys for his first publication. There is little in the way of either scope or handling which can be pointed to as signs of greater maturity in the composer. Occasionally a subject, such as that of the opening movement of No. 4 in D minor or the *largo*

of No. 8 in G minor, leads him to a more expansive development than is usual, but such things are no more than examples of those sudden strokes of genius which are to be met with throughout Purcell's work.⁶ The sonata No. 9 in F major has attained a peculiar fame under the title of the 'Golden Sonata.' It is one of Purcell's larger works, consisting of an opening movement, a *largo*, *canzona*, *grave* and *allegro*, all very firmly knit in design and distinct from one another in character, but it is difficult to see why it should have been thus crowned above its companions, and one is tempted to suspect that the chance of its having received the golden crown of its title has persuaded posterity to invent reasons for the distinction.⁷ The one sonata of the ten which stands apart from all its companions is No. 6, and it does so by reason of the fact that it is not really a sonata at all in Purcell's usual acceptance of the term, but virtually a *chaconne* built on a ground-bass of five bars, as follows:

The form is one after Purcell's own heart. The five-bar measure of the bass gives him unlimited scope for weaving melodies of varying lengths between the two violin parts, and applying that art which we have seen was the peculiar property of his songs on a ground-bass. It is an exceptionally spacious piece of writing, and in the course of 42 repetitions of the bass Purcell manages to cover an extraordinary emotional range; there is never a dull or perfunctory moment, and each thought leads so naturally to the next that the whole strikes the ear as one great piece of symphonic design.

From this cursory view of Purcell's output, undertaken to exhibit prevailing characteristics rather than to provide a commentary on particular works, one broad fact emerges. His view of music was identical with that of the modern musician. We may compare such a movement as the above with Bach or Brahms and test his theatre music by the principles of Gluck and Wagner, not in order to assert that he was as great as the greatest, but as a means of discovering where he is great at all. The method is inapplicable to any composer of an earlier generation save in a few particular instances. To put Byrd's Mass for five voices beside Bach's in B minor, or Bull's variations beside those of Beethoven on a theme of Diabelli would be a manifest futility. We have

¹ Very occasionally Purcell uses *slurs* to indicate bowing, but only in a tentative fashion. In the final *largo* of sonata No. 1 in G minor a passage is first marked *piano* with slurred bowing and then repeated without slurs.

² The keys are, G minor, B♭ major, D minor, F major, A minor, C major, E minor, G major, C minor, A major, F minor, D major.

³ It has been suggested that Father Smith's introduction of the so-called 'Quarter Tones' into the organ of the Temple Church (i.e. the division of the notes G♯-A♭ and D♯-E♭) may have originated with Purcell himself. If so, it shows that Purcell, like J. S. Bach, was exercised about the question of temperament. See Andrew Freeman, *Father Smith* (1926).

⁴ These are B minor and E♭ (relatives to D major and C minor). The other keys of the 1697 set repeat those of 1683; they are, A minor, D minor, three in G minor (a favourite viola key), C major, F major and D major.

⁵ The part-writing is the same as in the 1683 set, only here the through-bass is accounted a part, and Purcell says of the 1683 set that the engraving of the through-bass was 'a thing quite beside his first resolutions.'

⁶ C. V. Stanford, in editing the 'Ten Sonatas in Four Parts' for the Purcell Society, enriched them with a brilliantly written piano part which materially adds to their importance. But this is an example of Stanford's genius, not of Purcell's.

⁷ Fuller Maitland, in editing the 1683 set for the Purcell Society, declares that, among the Twelve Sonatas we look in vain for a rival to the famous 'Golden Sonata,' but J. P. Bridge (*Purcell's Good Music*, p. 130) thinks it inferior to No. 4 (also in F) to the first set.

for the most part to be conversant with a whole set of conditions embodied in a now obsolete theory of music before we can measure the stature of each individual work of Byrd's and Bull's time. But Purcell belongs to our world, the world made for us by two centuries of great masters intervening between his life and our own. We can apply familiar criteria to every department of his work and discover by their means his successes and his failures. In doing so a large proportion of his output will drop off as perfunctory or damaged by the social or other material conditions in which he produced it. But his best stands the test triumphantly and shows him to have been a man of first-rate creative power, a mind of vivid imagination and keen sensitiveness, of the same order, if not of the same calibre, as the masters who have made music the subtly expressive agent of human feeling which it has become in modern times. C.

SUMMARY OF WORKS

The following list of Purcell's works is necessarily only an attempt, as many of the anthems, etc., cannot at present be authoritatively dated, or even ascribed to certain periods in the composer's career. The list of plays for which he wrote music is based on that given in Squire's article in the *Sammelbände* of the *Int. Mus. Ges.* (v. 489 ff.).

1. SACRED MUSIC

ANTHEMS AND CHURCH MUSIC

The main source for the bulk of these anthems, etc., is Vincent Novello's edition of 'Purcell's Sacred Music.' His versions are for the most part quite untrustworthy, but until the work of editing them with care and reverence shall have been completed it is convenient to use his collection as indicating the number, etc., of extant works. A list of the anthems already published by the Purcell Society will be found on p. 301.

- Ah! few and full of sorrows.

 Unto Thee will I cry. Verse, A.T.B.
 Who hath believed our report? Verse, A.T.T.B.
 Why do the heathen? Verse, A.T.B.

SERVICES

- Te Deum and Jubilate in D.
 Te Deum, Benedictus, Kyrie, Creed, in B flat.
 Benedicite, and Jubilate, in B flat. ('Second Morning Service'.)
 Magnificat and Nunc Dimittis, in B flat.
 Cantate and Deus miseratur, in B flat.
 Evening Service in G minor.

HYMNS, ETC., IN PLAYFORD'S 'HARMONIA SACRA,' AND NOVELLO'S 'PURCELL'S SACRED MUSIC.'

(For solo voices, unless otherwise stated; frequently a 'chorus' is added for two voices.)

- Arise, my darkened melancholy soul.
 Awake, and with attention hear.
 Awake, ye dead (two voices).
 Begin the song.
 Close thine eyes and sleep secure (two voices).
 Full of wrath (for the Conversion of St. Paul).
 (Great God, and just)
 How have I strayed?
 How long, great God? ('The Aspiration').
 In guilty night (Crisp. 'Saul and the Witch of Endor').
 In the black dismal dungeon.
 Let the night perish ('Job's Curse').
 Lord, what is man?
 Now that the sun (Evening Hymn).
 O I'm sick of life. A.T.B.
 O Solitude!
 Plung'd in the confines of despair. T.T.B. (Add. MS. 80,930).
 Since God so tender a regard. T.T.B.
 Tell me, some playing Angel ('The Blessed Virgin's Expostulation').
 The earth trembled ('On our Saviour's Passion').
 The night is come (Evening Hymn).
 Thou wakeful shepherd (Morning Hymn).
 We sing to Him, whose wisdom.
 With sick and famish'd eyes.
 Hymns, etc., and settings of several psalm-tunes in Playford's *Introd.* (1694), see the *Sammelbände* of the *Int. Mus. Ges.* vi. 521.

II. SECULAR MUSIC

ODES AND WELCOME SONGS

1. 1680. Welcome, Vicegerent.
2. 1681. Swiftly, fast.
3. 1682. What shall be done.
4. 1682. The Summer's Absence unconcern'd we bear.
5. 1683. Fly, bold Rebellion.
6. 1683. Welcome to all the pleasures
7. 1683. Raise the voice.
8. 1683. Laudate Caelum.
9. 1683. From Hardy Climes (Marriage Ode for Princess Anne).
10. 1684. From these scenes.
11. 1685. Why are all the muses mute?
12. 1686. Ye tuneful Muses.
13. 1687. Sound the Trumpet.
14. 1689. Now does the glorious day appear (Queen Mary's Birthday).
15. 1689. Celestial Music.
16. 1690. Arise my Muse (Queen Mary's Birthday).
17. 1690. Of old when Heroes (Yorkshire Feast Song).
18. 1691. Welcome, glorious morn (Queen Mary's Birthday).
19. 1692. Love's Goddess sure was blind (Queen Mary's Birthday).
20. 1692. Hall bright Cecilia (Ode on St. Cecilia's Day).
21. 1693. Celebrate this festival (Queen Mary's Birthday).
22. 1694. Great Parent, hail (Dublin Commemoration Ode).
23. 1694. Come, ye sons of Art (Queen Mary's Birthday).
24. 1695. Who can from joy refrain? (Duke of Gloucester's Birthday).

Odes of uncertain date

25. If ever I more riches did desire (to words by Cowley).
26. Hark, Damon, hark.
27. Hark, hark the wild muscades sing (words by Cowley).
28. How pleasant is this flowery plain (words by Cowley).
29. We reap all the pleasures (words by Cowley).

INCIDENTAL MUSIC TO PLAYS, 'OPERAS,' ETC.

1680. Theodosius and The Virtuous Wife.
 1681. King Richard the Second, and Sir Barnaby Whigg.
 1682? The Double Marriage.
 1683? The English Lawyer.
 1684? Ciro, and Sophonoba.
 1686. The Knight of Malta.

1688. The Fool's Preferment.

1688-90 ? Dido and Aeneas.

1680. Diocletian, Disressed Innocence, Pausanias, Sir Anthony

Love, Amphitruon, and The Massacre of Paris.

1691. King Arthur, The Gordian Knot untied, The Indian Emperor,
The Wives' Excuse, and Have a Wife.1692. Cleomenes, The Fairy Queen, The Marriage-Hater Match'd,
Ragulus, The Libertine, Henry the Second, Aureng-Zebe, and
Oedipus.1693. The Old Bachelor, The Richmond Heir, The Maid's Last
Prayer, The Female Veturioses, The Double Dealer, Spem
Wells, and Rule a Wife and Have a Wife.1694. Don Quixote part I., Love Triumphant, The Married Beau,
The Fatal Marriage, Canterbury Guests, Don Quixote part II.,
Timon of Athens, The Spanish Friar, and (1) Trypanck Love.1695. Abdelazer, Bonduca, The Indian Queen, The Mock Marriage,
The Rival Sisters, Oroonoko, The Tempest, and Don Quixote
part III.

SONGS, DUMES, TRIOS AND CATCHES (upwards of 200)

It is at present impossible to catalogue these, as in many cases such questions as authenticity, sources, etc., have yet to be settled. The Purcell Society's publications will eventually contain the complete works in these forms.

INSTRUMENTAL MUSIC

Fantasias in 3, 4, 5, 6, 7 and 8 parts. (B.M. Add. MS. 30,580).
Twelve Sonatas of Three Parts, 1695.

Ten Sonatas of Four Parts, 1697.

Sonata for violin and bass, from a MS. formerly in the possession
of Mr. Tapbush, printed in A. Moffat's 'Meisterschule.'

Overtures, etc.

Organ music: Four voluntaries (a) on the 100th Psalm Tune,
(b) in D minor, (c) in D minor 'for the Double Organ,' and (d)
in C, ascribed to Purcell.

Harpichord Music: 'A Choice Collection c. Lessons for the
Harpichord or Spinnet,' 1696, contains eight suites, March, Trumpet
Tune, Chaconne, Jig and Trumpet Tune called the Cabell.

'Musick's Handmaid,' part II., contains (1695) Song Tune, Lesson,
March, three Minuets, a new Scotch Tune, a new Ground, a new
Irish Tune ('Lilliburiero'), Rigadoon, Sefaulchi's Farewell
(Sefaulchi is for 'Suffice'; see that article), Minuet.

From various sources: Air, Ground in Gamut, Lesson, Voluntary,
A Verse, Trumpet Tune, Air, Rondo, Ground, Prelude, Air, Toccatina,
Hornpipe, Airman, Corant, Air, Gavott, Minuet, Ground, Prelude,
Airman and Berry, Overture, Air and Jig in G, Gamut &c.

M.

PURCELL CLUB, THE (1836-63), was constituted at a meeting held in Aug. 1836: the first members were Turle (conductor), King, Bellamy, Fitzwilliam, J. W. Hobbs and E. Hawkins (secretary). The club was limited to twenty professional and twenty non-professional members, who met twice a year; on the second Thursday in February, when they dined together, and on the last Thursday in July, when they assembled in Westminster Abbey, at the morning service, by permission of the Dean, for the purpose of assisting in such Purcell music as might be selected for the occasion. On the evening of the same day the members again met to perform secular music composed by Purcell; the soprano parts were sung by the chorister-boys from Westminster Abbey, the Chapel Royal, and St. Paul's Cathedral, but ladies were admitted amongst the audience.

On Feb. 27, 1842, a special meeting was held, when EDWARD TAYLOR (q.v.) was elected President, and the dates of meeting were changed to Jan. 30 and the first Thursday in July. Interesting performances of many of Purcell's works were given year by year, and a book of words of 194 pages was privately printed for the use of the members, under the editorship of Taylor. The Club was dissolved in 1863, and the valuable library, which had been acquired by gift and purchase, was deposited at Westminster Abbey, under the guardianship of the organists of Westminster Abbey and St. Paul's Cathedral.

W. H. C.

¹ This Toccatina was printed from a MS. formerly in the possession of Fr. Knauth, and Wm. Rust, as a doubtful work of J. A. Bach in the B.-G. edition, vol. xiii. p. 320.

PURCELL COMMEMORATION. (1) The

bicentenary of Henry Purcell's birth was commemorated in London on Jan. 30, 1858. The members of the **PURCELL CLUB** (q.v.) and a large number of musicians and amateurs assembled in the evening at the Albion Tavern, Aldersgate Street, London, when, after a banquet, a selection of Purcell music was performed, and addresses were given by EDWARD TAYLOR (q.v.), who presided. The programme consisted entirely of music composed by Purcell, and was as follows: Grace, 'Gloria Patri'; anthems, 'O give thanks,' 'O God, thou hast cast us out,' 'O sing unto the Lord'; song and chorus, 'Celebrate this festival'; a selection from 'King Arthur'; cantata, 'Cupid, the slyest rogue alive'; song, 'Let the dreadful engines'; chorus, 'Soul of the world, inspired by thee.'

W. H. C.

(2) In Nov. 1895 the bicentenary of the composer's death was celebrated by a performance of 'Dido and Aeneas' by the pupils of the R.C.M. at the Lyceum Theatre, Nov. 20; a special service in Westminster Abbey on Nov. 21, at which the following anthems were sung—'O all ye people,' 'O give thanks,' 'Praise the Lord, O my soul,' 'Remember not, Lord,' 'O sing unto the Lord,' 'Thou knowest, Lord,' 'Praise the Lord, O Jerusalem'; and by a special concert of the Philharmonic Society in the Queen's Hall on Nov. 21, at which the 1692 'Ode on St. Cecilia's Day' was revived, and a miscellaneous programme gone through. At the preceding Leeds Festival an 'Invocation to Music,' by Parry, was produced, with special reference to the bicentenary, and at the following Birmingham Festival, in 1897, 'King Arthur' was given.

M.

PURCELL OPERATIC SOCIETY, see SHAW, (2) MARTIN.

PURCELL SOCIETY, THE. Founded Feb. 21, 1876, 'for the purpose'—in the words of the prospectus—'of doing justice to the memory of Henry Purcell, firstly by the publication of his works, most of which exist only in MS., and secondly by meeting for the study and performance of his various compositions.'² The original committee consisted of the Rev. Sir F. A. G. Ouseley, Bart., G. A. Macfarren, Sir Herbert S. Oakeley, Sir John Goss, Sir George Elvey, Joseph Barnby, Joseph Bennett, J. F. Bridge, W. Chappell, W. H. Cummings, J. W. Davison, E. J. Hopkins, John Hullah, Henry Leslie, A. H. Littleton, Hon. Secretary, Walter Macfarren, Julian Marshall, E. Prout, E. F. Rimbault, Henry Smart, John Stainer, Rev. J. Troutbeck, James Turle.

The subscription is one guinea per volume. In 1887 the scheme, which had fallen into abeyance for some years, was reorganised, W. H. Cummings undertaking the duties of editor, and W. Barclay Squire becoming

² This part of the scheme was soon given up.

OPENING BARS OF PURCELL'S 'GOLDEN SONATA,' 1683.

BEGINNING OF A PRELUDE from Part II. of Johann Sebastian Bach's
'Das Wohltemperirte Klavier,' 1744.

honorary secretary. In 1923 Gerald Cooper became honorary secretary.

The following volumes have appeared:

1. The Yorkshire Feast Song (1859), ed. Cummings. 1878.
2. The Masque in 'Tinnon of Athens', ed. Sir F. A. Gore Ouseley (assumed date 1678, probable date 1694). 1882.
3. Dido and Aeneas, ed. Cummings (assumed date 1680, probable date 1688-89). 1889.
4. Duke of Gloucester's Birthday Ode. 'Who can from joy refrain?' ed. Cummings (1682). 1882.
5. Twelve 'Sonatas' of Three Parts (1683), ed. J. A. Fuller Maitland. 1893.
6. Harpsichord Music, ed. W. B. Squire, and Organ Music, ed. Dr. E. J. Hopkins. 1896.
7. Ten Sonatas of Four Parts (1687), ed. Sir C. V. Stanford. 1896.
8. Ode on St Cecilia's Day, 1690, ed. J. A. Fuller Maitland. 1897.
9. Dioclesian (1690), ed. Sir J. F. Bridge and John Pointer. 1900.
10. Three Odes to St Cecilia's Day. ('Welcome to all the pleasures, 1683; 'Raise the Voice,' probably 1683, and 'Laudate ecclesiam,' 1683), ed. G. E. P. Arkwright. 1899.
11. Birthday Odes for Queen Mary, part I. ('Now does the glorious day appear, 1689; 'Arise, my Muse, 1690; 'Welcome, welcome, glorious morn, 1691), ed. Arkwright. 1902.
12. The Fairy Queen, ed. J. B. Shedlock. 1903.
- 13 (a) Sacred Music, Part I. Eight Anthems. Two Funeral Sentences: (1) 'In the midst of life,' (2) 'Thou knowest, Lord; 'Who hath believed our report?'; 'My beloved spake' (earliest version); 'Behold, my God, the Lord'; 'Save me, O God'; 'Blessed is he whose unrighteousness'; 'Hear me, O Lord' (earliest version of opening verse, later anthems); 'Bow down thine ear,' ed. by G. E. P. Arkwright. 1921.
- 13 (b) Sacred Music, Part II. Early Anthems (not yet published, 1926).
14. Sacred Music, Part II. Anthems. 'It is a good thing,' O praise God in His holiness; 'Awake, put on thy strength,' 'In Thee, O Lord,' 'The Lord is my light,' 'I was glad,' 'My heart is stirred,' 'Praise the Lord, O my soul,' 'Rejoice in the Lord alway,' ed. Woodbridge and Arkwright. 1904.
15. Welcome songs, Part I. 'Welcome, Viceroy of the mighty King,' on his Majesty's return from Windsor, 1680; 'Swiftly, late, swiftly, come, my Muse, I shall be done on behalf of the man,' on the Duke of York's return from Scotland, 1682; 'The Summer's Absence unconcerned we bear,' for the King's return from Newmarket, 1682; 'Hij, bold, Hebelikon,' 1683, on the discovery of the Rye House Plot, ed. R. Vaughan Williams. 1903.
16. Dramatic Music, Part I. 'Abdelazar,' 'Amphitryon,' 'Aurung-Zebe,' 'The Cuckoo,' 'The Canterbury Guests,' 'Ures,' 'Cleopatra,' 'Distressed Innocence,' 'The Comical History of Don Quixote' Parts I, II, and III, 'The Double Dealer,' 'The Double Marriage,' 'The Elder,' 'The Elder,' 'The Elder,' 1906.
17. Sacred Music, Part III. Anthems, 'Why do the heathen,' 'Unto Thee will I cry,' 'I will give thanks,' 'My heart is inditing,' 'O sing unto the Lord,' 'Praise the Lord, O Jerusalem,' 'Praise the Lord, O my soul,' ed. by H. E. Woodbridge and G. E. P. Arkwright. 1907.
18. Welcome Songs, Part II. 'From those serene and rapturous joys,' returned to His Majesty in 1684. 'Why, why are all the muses mute?' being the first song performed to King James II, 1685; 'Ye tuneful Muses, 1686; 'Sound the trumpet,' 1687; ed. by R. Vaughan Williams. 1909.
19. 'The Indian Queen,' 'The Tempest,' ed. Edward J. Dent. 1912.
20. Dramatic Music, Part II. 'The Fatal Marriage,' 'The Female Virtuoso,' 'A Fool's Preference,' 'The Gordian Knot untied,' 'Henry the Second,' 'The Indian Emperor,' 'King Richard the Second,' 'The Knight of Malta,' 'The Libertine,' 'Love Triumphant,' 'The Maid's Last Prayer,' 'The Marriage-hater Match'd,' 'The Married Beau,' 'The Massacre of Paris,' 'The Mock Marriage,' ed. by Alan Gray. 1916.
21. Dramatic Music, Part III. 'Oedipus,' 'The Old Bachelor,' 'Oronoko,' 'Pausanias,' 'Regulus,' 'The Richmond Heiress,' 'The Rival Sisters,' 'Rule a Wife and Have a Wife,' 'Sir Anthony Love,' 'Sir Barnaby Rudge,' 'The Spanish Friar,' 'Theodorus,' 'Tyranick Love,' 'The Virtuous Wife,' 'The Wives' Excuse,' Music in an unidentified play, ed. by Alan Gray. 1917.
22. Catches and Round Songs, ed. by W. B. Squire. Two Part and Three Part Songs, ed. by J. A. Fuller Maitland. 1922.
23. Services. Morning and Evening in Bp; Evening in G m. To Deum and Jubilate in D (with accompan. for 2 triple and strings), ed. by Alan Gray. 1923.
24. Birthday Odes for Queen Mary, Part II. 'Love's Goddess sings' (1694), ed. by Geoffrey Shaw. 1926.

The following volumes, still unpublished (1926), are expected to complete the series: Secular Songs and Cantatas (ed. by G. Shaw); Sacred Music (ed. by G. Shaw); Secular Songs (ed. by G. E. P. Arkwright); King Arthur (ed. by Dennis Arundell); Miscellaneous Odes and Choral pieces; Miscellaneous Instrumental Music and Supplements.

PURDAY, a London family largely connected with music and music-publishing.

(1) PURDAY & BUTTON were the direct successors to the large firm of THOMPSON (q.v.) who had held business premises at 75 St. Paul's Churchyard from about 1750. Purday went into partnership with S. J. Button about 1805, but retired about 1808, when the firm took the name BUTTON & WHITAKER (q.v.). Purday was probably the father of (2) ZENAS TRIVETT

PURDAY who, taking over JOHN BLAND's (q.v.) old shop, in succession to William Hodsoil, in 1831 established a large music trade, principally in numerous sheet songs. He ceased business about 1855-60.

(3) THOMAS EDWARD PURDAY, of the same family, was, from 1836 to after 1855, doing a similar trade in sheet songs in St. Paul's Churchyard.

(4) CHARLES HENRY PURDAY (b. Folkestone, Jan. 11, 1799¹; d. London, Apr. 23, 1885), well known as a composer and a writer, was a lecturer on musical matters, and at one time a vocalist of some repute. He directed much energy to the amendment of the law in relation to musical copyright, and he acted for some time as conductor of psalmody to the Scotch Church in Crown Street, Covent Garden, composing and editing a number of works of sacred music. Some of his secular songs, and his fine tune to 'Lead, kindly light,' attained considerable popularity. He was a contributor to the first edition of this Dictionary. F. K.

PURDIE, ROBERT, the founder of an extensive music-publishing business in Edinburgh. He is first heard of in 1804 as a music-teacher in Jollie's Close, Edinburgh, off the Canongate, but in 1805 he had removed to a better district, St. James's Square. In 1808 he opened a music shop at 35 Princes Street, and here he began the issue of sheet music. In 1813 the number of the premises changed to 71, and in 1828 it was again renumbered as 83.

He quickly became the leading music-publisher in the Scottish capital; and besides a great deal of sheet music his imprint is on a well-known collection of Scottish songs, 'The Scottish Minstrel,' in six vols., edited by R. A. Smith, 'The Irish Minstrel,' and on similar works. On the failure of Nathaniel Gow, Purdie, in conjunction with Alexander Robertson, another Edinburgh publisher, reissued the Gow publications. Robert Purdie was succeeded near the year 1837 by his son John, and the business was carried on until about 1887. F. K.

PURFLING, the inlaid line of plane wood, formed of three slips, of which the centre one is stained black, the two outer being left white, following the outlines of musical instruments of the violin and guitar type, which, owing to its utility in preserving the edges from chipping, is all that is left of the redundant ornamentation so skillfully employed by the ancient lute and viol makers. Some of the earlier makers, notably Jacobs of Amsterdam, purfled with whalebone, but the true artists used, and still use, the three strips sunk together into a carefully cut groove, and finished off when the glue is dry with a small gouge. 'Purfing' may be bought ready made, i.e. the three strips ready glued together for inlaying, but this

¹ Brit. Mus. Slop.

strains and buckles at the sharper bends with deplorable results upon the ultimate effect. (See VIOLIN-MAKING.) Some of the lavish decoration, purfled and otherwise, of former times is to be seen on modern Italian guitars and mandolines. The great makers could not wholly resist these graceful adornings. Gasparo da Salò made a violin, we are told, of which the head, finger-board, tailpiece and bridge were carved by Benvenuto Cellini. Maggini strove to replace the ebony and ivory embellishments by purfled designs of elegant patterns, within the regulation line of purfling as we know it to-day. Amati made a couple of violins which were decorated at each corner and on the sides, at the blocks, with designs in black, of a *fleur-de-lys*, inlaid with precious stones, while other instruments, notably some of Andreas Amati, bear painted armorial bearings and inscriptions. Even Stradivarius himself ornamented some of his best violins with beautiful designs painted in black, or inlaid with ebony, and also, as in the case of the 'Rode' (1722), with a double line of purfling, enclosing a diamond pattern in mother-of-pearl.

BIEL.—HILL, *Antonio Stradivari*; HART, *The Violin*; HERON-ALLAN, *Violin-making*; MERRIDITH MORRIS, *British Violin-makers*; MAUTOIS and MAIGNE, *Manuel du Luthier*. E. H.-A.

PURITANI DI SCOZIA, I, opera in 2 acts; words by Count Pepoli, music by Bellini; produced Théâtre des Italiens, Paris, Jan. 25, 1835; King's Theatre, as 'I Puritani ed i Cavalieri,' May 21, 1835; New York, Palmo's Opera House, Feb. 1844. G.

PURITAN'S DAUGHTER, THE, opera in 3 acts; words by J. V. Bridgeman, music by Balfe. Produced Covent Garden, London, Nov. 30, 1861 (Pyne and Harrison). G.

PUSCHMANN, ADAM ZACHARIAS (b. Görlitz, 1532; d. Breslau, Apr. 4, 1600), one of the most remarkable of the latest 'Meistersinger' and a pupil of Hans Sachs. He wrote 'Gründlicher Bericht des deutschen Meistersanges' (1574), containing some of his own songs. The MS. collection of his songs, containing also some by M. Bohaim and Hans Sachs, was published in 1906 by Georg Münzer (*Riemann*).

PYE, KELLOW JOHN (b. Exeter, Feb. 9, 1812; d. Exmouth, Sept. 22, 1901?), entered the R.A.M., in Feb. 1823, immediately after its foundation, and took the first pianoforte lesson ever given within its walls. This was from Cipriani Potter. He also studied harmony, counterpoint and composition there, under Dr. Crotch, the Principal, and remained a pupil till 1829. He returned in 1830 to Exeter, and for some years enjoyed considerable local fame in the south-west of England. In 1832 he gained the Gresham medal for his full anthem, 'Turn Thee again, O Lord' (Novello), which with other anthems of his is in use in the Cathedrals. In 1842 he took the degree of Mus.B. at Oxford.

He was a member of the Philharmonic Society from 1846, and in 1853 gave up the professional career, and went into business (in the firm of Plasket & Co., wine merchants) in London, where he retained his connexion with the art by joining the direction of the R.A.M., succeeding Sir G. Clerk as chairman of the committee of management (1864-67). He was also a member of the Executive and Finance Committees of the National Training School of Music; he joined the committee of the Bach Choir on its foundation in 1876, and was on the council of the R.C.M. from the beginning of that institution in 1883. He was an active member of the Madrigal Society, its treasurer in 1856, and vice-president in 1891. Madrigals of his own gained the Society's prize in 1888 and 1891. He war on the committee of the Mendelssohn Scholarship Foundation. His published works, besides those mentioned, comprise 'Stray Leaves,' 12 Nos. (Lamborn Cock & Co.), 4 Full Anthems (Novello), 3 Short Full Anthems (Do.), Songs, etc. G.

PYGOTT, RICHARD (late 15th and early 16th cent.), English choir trainer and composer. As early as 1517 he was master of the children of Cardinal Wolsey's Chapel. He thus held this post while William CORNYSHE (q.v.) was similarly employed at the Chapel Royal, and, like him, was much favoured by Royal preferences and payments. Dean Pace, who succeeded Colet as Dean of St. Paul's in 1519, in various letters to Wolsey, compliments the Cardinal on the excellence of his chapel, intimating that it was better than that of the King. He even quotes Cornyshe himself as extolling Pygott for his good training, and refers to 'his sure and cleanly singing...[and]...good and crafty discant.' In 1524 Pygott became a gentleman of the Chapel Royal, but kept his post in Wolsey's Chapel until the Cardinal's fall in 1529. During this period (as appears from a payment made to him in 1527) he was deputy master at the Royal Chapel. In 1532 he was given a corrody in the monastery of Coggeshall, Essex, and the next year was presented to the canonry and prebend of Tamworth. After the dissolution of the monasteries, Pygott was granted a pension to be paid out of the confiscated property at Coggeshall (1538), and also received some further monies from the Abbey of Tower Hill. His name appears regularly in the royal pensions list during 1540-47. On Oct. 31, 1541, he was given a substantial sum for his house at Greenwich, and in 1545 was restored to his prebend at Tamworth, which he had apparently left because he was not in Orders (a royal letter instructs the Dean and Chapter of Wells 'to suffer Richard Pygot of the Chapel to reside upon his prebend there, notwithstanding his laity'). His name appears as a gentleman of the Chapel Royal in the last year of Henry VIII.'s reign

(1547), and two payments to him, in 1551 and 1552, show that Edward VI. still retained his services.¹

He is mentioned by Morley in his *Plaine and Easie Introduction* (1597) as a 'Practitioner' in music. A 4-part Carol ('By-by') by him is included in Wynkyn de Worde's Song-book, 1520, the only known copy of which is the bassus part in the British Museum.

PYNE, LOUISA FANNY (*b.* Aug. 27, 1832; *d.* London, Mar. 20, 1904), daughter of George Pyne, alto singer (*b.* 1790; *d.* Mar. 15, 1877), and niece of James Kendrick Pyne, tenor singer (*d.* Sept. 23, 1857). She studied singing under Sir George Smart, and in 1842 appeared successfully in public with her elder sister, Susan (afterwards the wife of F. H. Standing, a baritone singer, known professionally as Celli). In 1847 the sisters performed in Paris. In Aug. 1849 Louisa made her first appearance on the stage at Boulogne as Amina in 'La Sonnambula.' On Oct. 1 following she began an engagement at the Princess's Theatre as Zerlina, in an English version of 'Don Juan.' Her first original part was Fanny in Macfarren's 'Charles the Second,' produced Oct. 27, 1849. On Mar. 1850 she sang at the Philharmonic; was engaged the same year at Liverpool, and in 1851 at the Haymarket. On Aug. 14, 1851, she performed the

¹ See W. H. Grattan Flood, *Early Tudor Composers*.

Queen of Night in 'Il Flauto Magico' at the Royal Italian Opera. She also sang in oratorios and at concerts.

In Aug. 1854 she embarked for America in company with her sister Susan, W. Harrison and Borroni. She performed in the principal cities of the United States for three seasons, being received everywhere with the greatest favour. On her return to England in 1856 she, in partnership with Harrison, formed a company for the performance of English operas, which they gave first at the Lyceum and afterwards at Drury Lane and Covent Garden Theatres, until 1864, when the partnership was dissolved. (See HARRISON, WILLIAM.) Miss Pyne subsequently appeared at Her Majesty's Theatre. In 1868 she was married to Frank Bodda, the baritone singer. She retired from public life, and devoted herself to teaching. Her voice was a soprano of beautiful quality and great compass and flexibility; she sang with great taste and judgment, and excelled in the florid style, of which she was a perfect mistress. She received a pension from the Civil List in 1896.

PYROPHONE, see KASTNER (2).

PYSING (PISING), WILLIAM, 17th-century English composer of church music. A man of this name was a lay clerk of Canterbury Cathedral from 1635-83 (G. E. P. Arkwright, *Catalogue of Mus. in Ch. Ch.*). A verse anthem by Pysing, 'I will magnify thee' is in Barnard's MS. collection (R.C.M. 1045-51), and is also in Tenb.O.B./66b. Another verse anthem by him, 'The Lord heare thee,' is in Ch. Ch. 61-6. J. M.

J. M^K.

QUADRILLE (Ger. *Kontretanz*), a dance executed by an equal number of couples drawn up in a square. The name (which is derived from the Ital. *squadra*) was originally not solely applied to dances, but was used to denote a small company or squadron of horsemen, from three to fifteen in number, magnificently mounted and caparisoned to take part in a tournament or carousal.¹ The name was next given to four, six, eight or twelve dancers, dressed alike, who danced in one or more companies in the elaborate French ballets² of the 18th century. The introduction of 'contredanses' into the ballet, which first took place in the fifth act of Rousseau's 'Fêtes de Polymnie' (1745), and the consequent popularity of these dances, are the origin of the dance which, at first known as the 'Quadrille de contredanses,' was soon abbreviated into 'quadrille.'

The quadrille was settled in its present shape at the beginning of the 19th century, and it has undergone but little change, save in the simplification of its steps. It was very popular in Paris during the Consulate and the first Empire, and after the fall of Napoleon was brought to England by Lady Jersey, who in 1815 danced it for the first time at Almack's³ with Lady Harriet Butler, Lady Susan Ryde, Miss Montgomery, Count St. Aldegonde, Montgomery, Montague and Standish. The English took it up with the same eagerness which they displayed with regard to the polka in 1845, and the caricatures of the period abound with amusing illustrations of the quadrille mania. It became popular in Berlin in 1821.

The quadrille consists of five distinct parts, which bear the name of the 'contredanses' to which they owe their origin. No. 1 is 'Le Pantalon,' the name of which is derived from a song which began as follows:

'Le pantalon
De Madelon
N'a pas de fond,'

and was adapted to the dance. The music consists of 32 bars in 6-8 time. No. 2 is 'L'Été,' the name of a very difficult and graceful 'contredanse' popular in the year 1800; it consists of 32 bars in 2-4 time. No. 3 is 'La Poule' (32 bars in 6-8 time) which dates from the year 1802. For No. 4 (32 bars in 2-4 time) two figures are danced, 'La Trénise,' named after the celebrated dancer Trenitz, and 'La Pastourelle,' perhaps a survival of the old 'Pastorale.' No. 5 — 'Finale' — consists of three parts repeated four times. In all these

figures (except the Finale, which sometimes ends with a coda) the dance begins at the ninth bar of the music, the first eight bars being repeated at the end by way of conclusion. The music of quadrilles is scarcely ever original; operatic and popular tunes are strung together, and even the works of the great composers are sometimes made use of.⁴ The quadrilles of Musard, with some by Strauss, are almost the only exceptions. W. B. S.

The 'Quadrille des Lanciers' was invented in 1856 at Paris by the dancer Laborde. It is composed of five figures: 'les tiroirs,' 'les lignes,' 'les moulinets,' 'les visites,' 'les lanciers,' the latter giving its name to the whole quadrille. Each figure consists of 24 bars, except the third one with only 16. M. L. P.

QUAGLIATI, PAOLO (b. circa 1560), was a musician living in Rome, who in 1608 is indicated as holding the position of organist at the Liberian Basilica of Santa Maria Maggiore. In 1585 he edited a collection of Spiritual Canzonets for three voices, containing, besides sixteen numbers by himself, some contributions by Marenzio, Nanino and Giovanelli. His other publications before 1600 consist of two books of Secular Canzonets a 3. Two Canzonets a 4 with cembalo and lute accompaniment appear in Verovio's collection of 1591, which has been republished complete by Alfred Wotquenne. After 1600 he appears to have followed with interest the twofold direction in music emanating from Florence and Venice respectively, the Florentine *stile rappresentativo* for solo voices, and the Venetian concerted style with basso continuo. In 1606 he composed an opera with libretto by his pupil Pietro della Valle, entitled 'Carro di fedeltà d'amore,' which was performed on a Carnival car in the streets of Rome. It has five solo voices, and was published in 1611, with the addition of several Arie a 1-3. His other works are a book of Concerted Madrigals a 4 for voices and instruments, with a separate book for Basso Continuo, some other books of Spiritual Madrigals a 1-3, and two books of Sacred Motets and Dialogues for two and three choirs in the concerted style with Basso Continuo (Rome, 1612-27). In Diruta's 'Il Transilvano' there appears a toccata by Quagliati for organ or clavier, which has been republished by L. Torchii in *L'arte musicale in Italia*, vol. iii. J. R. M.

QUALITY. The characteristic feature by which the notes of the different instruments of the orchestra can be distinguished from each

¹ Compare the use of the Spanish equivalent, *cuadrilla*, for the party of four *banderilleros* associated with each *torero* in a bull-fight, and the familiar name of a card-game once very popular.

² The Ballets were divided into five acts, each act into three, six, nine, or twelve 'entrées,' and each 'entrée' was performed by one or more 'quadrilles' of dancers.

³ See Captain Gronow's *Reminiscences* (1861).

⁴ The clever 'Bologna Quadrilles' on themes from Rossini's *Stabat Mater*, were published shortly after the appearance of that work. The plates of these quadrilles were destroyed on the publishers learning the source from which the author (popularly supposed to be J. W. Davison) had obtained the melodies. Hans von Bülow wrote a set of quadrilles on airs from Berlioz's 'Benvenuto Cellini'.

other is called the quality of the notes. In popular language the word tone is commonly used with the same meaning. (See ACOUSTICS, subsection QUALITY.) J. W. C.

QUANTITY, see METRE.

QUANTZ, JOHANN JOACHIM (b. Oberscheden, near Göttingen, Jan. 30, 1697¹; d. Potsdam, July 12, 1773), celebrated flute-player and composer. His father, a blacksmith, urged him on his death-bed (1707) to follow the same calling, but, in his own words, 'Providence, who disposes all for the best, soon pointed out a different path for my future.' From the age of 8 he had been in the habit of playing the double-bass with his elder brother at village fêtes, and judging from this that he had a talent for music, his uncle Justus Quantz, Stadtmusikus of Merseburg, offered to bring him up as a musician. He went to Merseburg in Aug. 1708,² but his uncle did not long survive his father, and Quantz passed under the care of the new Stadtmusikus, Fleischhack, who had married his predecessor's daughter. For the next five and a half years he studied various instruments, Kiesewetter being his master for the pianoforte. In Dec. 1713 he was released from his apprenticeship, and soon after became assistant, first to Knoll, Stadtmusikus of Radeberg, and then to Schalle of Pirna near Dresden. Here he studied Vivaldi's violin-concertos, and made the acquaintance of Heine, a musician in Dresden, with whom he went to live in Mar. 1716. He now had opportunities of hearing great artists, such as Pisendel, Veracini, Sylvius Weiss, Richter and Buffardin, the flute-player. In 1717 he went, during his three months' leave, to Vienna, and studied counterpoint with Zelenka, a pupil of Fux. In 1718 he entered the chapel of the King of Poland, which consisted of twelve players, and was stationed alternately in Warsaw and Dresden. His salary was 150 thalers, with free quarters in Warsaw, but finding no opportunity of distinguishing himself either on the oboe, the instrument for which he was engaged, or the violin, he took up the flute, studying it with Buffardin. In 1723 he went with Weiss to Prague, and the two played in Fux's opera 'Costanza e fortezza,' performed in honour of the coronation of Charles VI. Here also he heard Tartini. In 1724 Quantz accompanied Count Lagnasco to Italy, arriving in Rome on July 11, and going at once for lessons in counterpoint to Gasparini, whom he describes as a 'good-natured and honourable man.' In 1725 he went on to Naples, and there made the acquaintance of Scarlatti, Hesse, Mancini, Leo, Feo and other musicians of a similar stamp. In May 1726 we find him in Reggio and Parma, whence he travelled by Milan, Turin, Geneva and Lyons to Paris,

arriving on Aug. 15. In Paris—where his name was remembered³ as 'Quouance'—he remained seven months, and occupied himself with contriving improvements in the flute, the most important being the addition of a second key, as described by himself in his *Versuch einer Anweisung die Flöte . . . zu spielen*, vol. iii. chap. 58 (Berlin, 1752). He was at length recalled to Dresden, but first visited London for three months. He arrived there on Mar. 20, 1727, when Handel was at the very summit of his operatic career, with Faustina, Cuzzoni, Castrucci, Senesino, Attilio and Tosi in his train. He returned to Dresden on July 23, 1727, and in the following March re-entered the chapel, and again devoted himself to the flute. During a visit to Berlin in 1728 the Crown Prince, afterwards Frederick the Great, was so charmed with his playing that he determined to learn the flute, and in future Quantz went twice a year to give him instruction. In 1741 his pupil, having succeeded to the throne, made him liberal offers if he would settle in Berlin, which he did, remaining till his death. He was Kammermusikus and court-composer, with a salary of 2000 thalers, an additional payment for each composition, and 100 ducats for each flute which he supplied. His chief duties were to conduct the private concerts at the Palace, in which the king played the flute, and to compose pieces for his royal pupil. He left in MS. 300⁴ concertos for one and two flutes—of which 277 are preserved in the Neue Palais at Potsdam—and 200 other pieces; flute solos, and dozens of trios and quatuors, of which 51 are to be found at Dresden. His printed works are three—'Sei Sonate' dedicated to Augustus III. of Poland, op. 1, Dresden, 1734; 'Sei duetti,' op. 2, Berlin, 1759; six sonatas for two flutes, op. 3, of doubtful authenticity, London, Walsh; five sonatas for flutes, also op. 3, Paris, Boivin; a Method⁵ for the flute—*Versuch einer Anweisung die Flöte traversière zu spielen*—dedicated to Frederick 'Könige in Preussen,' Berlin, 1752, 4to, with twenty-four copperplates. This passed through three (or four) German editions, and was also published in French and Dutch. He left also a serenata, a few songs, music to twenty-two of Gellert's hymns, 'Neue Kirchenmelodien,' etc. (Berlin, 1760), and an autobiography (in Marburg's *Beiträge*). Three of the Melodien are given by von Winterfeld, *Evang. Kircheng.* iii. 272. Besides the key which he added to the flute, he invented the sliding top for tuning the instrument. His playing, which was unusually correct for the imperfect instruments of the day, delighted not only Frederick, but

¹ In Boivin's *Catalogue*.

² But see Q.-L. p. 99, on this number.

³ A new edition of the *Versuch*, by A. Schering, appeared at Leipzig in 1906. The work is much more than a Method for the flute, almost what we should now call a handbook of 'musical appreciation.' The pages devoted to the flute only number about an eighth of the whole work.

⁴ According to his autobiography in Marburg's *Beiträge zur Geschichte der Musik*.

⁵ Not 1707, as Mendel states.

Marpurg, a more fastidious critic. He married, not happily, in 1737; and died in easy circumstances and generally respected.

All details regarding him may be found in *Leben und Werke*, etc., by his grandson Albert Quantz (Berlin, 1877).

F. G.

QUARENGHI, GUGLIELMO (b. Casalmaggiore, Oct. 22, 1826; d. Milan, Feb. 4, 1882), violoncellist and composer. He studied at the Milan Conservatoire, 1839-42, occupied the post of first violoncello at La Scala Theatre in 1850; became professor of his instrument at the Milan Conservatoire in 1851, and in 1879 maestro di capella at the Milan Cathedral. As a composer he contributed an opera entitled 'Il di di Michel'; published in 1863 some church music and transcriptions, as well as an interesting method for the violoncello; a valuable treatise upon the origin of bow instruments precedes this *Metodo di violoncello* (Milan, 1876), in which he compares the earliest forms with the various barbaric and semi-barbaric instruments previously in use amongst primitive nations. In addition the author gives the 'Personaggi' of Monteverdi's 'Orfeo,' and the tuning of the earliest viols. (*Riemann; Baker.*)

E. H.-A.

QUARLES, CHARLES, Mus.B. (d. York early in 1727), graduated at Cambridge in 1698. He was organist of Trinity College, Cambridge, from 1688-1709. He was appointed organist of York Minster, June 30, 1722. 'A Lesson' for the harpsichord by him was printed by Goodison about 1788.

W. H. H.

QUARTET (Fr. *quatuor*; Ger. *Quartett*; Ital. *quartetto*), a composition for four instruments or voices.

STRING QUARTET.—The leading instrumental quartet is that written for two violins, viola and violoncello, and down to the close of the 19th century it conformed in the main to the structure of the symphony or sonata. Indeed the development of the sonata form can be traced quite clearly in the string quartet. At first it concerned itself chiefly with melody played by the first violin and accompanied by the other instruments, but composers were not long in seeing the possibilities opened out by the establishment of a combination which possessed in its four members a similarity in tone-quality and an equally distributed flexibility in musical expression. Thus Haydn's quartets, even those written at Weizsirl known as op. 1, whether originally intended for quartet or string orchestra, show an increasing perception of how to distribute the interest of the writing and make each instrument in turn take a part of equal importance. Mozart's greater skill and feeling for polyphonic writing carried matters much further, while in the work of Beethoven the quartet reached the climax of the purely classical style. The 'romantic' period left its mark upon the quartet in the evident desire for in-

creasing the richness of the tone, and we find in the quartets of Schubert, Schumann, Mendelssohn and Brahms attempts to replace pure polyphony by massed tonal effects, the frequent use of double-stopping and the *tremolo*; in fact the character of independent part-writing sometimes disappears, and the writing approaches that of the orchestra both in point of view and sound. Still more has the orchestral influence been noticeable in later developments where a far more extensive use of the various 'colour' effects of which the instruments are capable has been made. Eventually also other forms than the strict sonata form were taken up, as had already been done with the symphony and the orchestra, and we thus get quartets in one movement of the 'FANTASY' (*q.v.*) type, or short 'character' movements described as 'pictures,' 'sketches' and the like.

The main classical repertory is as follows: Haydn, 83, of which the very early examples were possibly intended for string orchestra; Mozart, 26; Beethoven, 16, and Fugue, op. 133, originally intended as finale to op. 130; Schubert, 3; Schumann, 3; Mendelssohn, 6; Brahms, 3; Dvořák, 8; Tchaikovsky, 3; Glazounov, 6; Borodin, 2; Reger, 4; Stanford, 5; S. Taneiev, 5; Smetana, 2; Verdi, Franck, Grieg, Wolf and Debussy each left one. More recent quartets are those of Bartók, Bax, Bloch, Bridge, Busoni, Elgar, Gibbs, Hindemith, Holbrooke, Honegger, Jarnach, McEwen, Milhaud, Novák, Pfitzner, Pizzetti, Ravel, Respighi, Schönberg, Scott, Smyth, Suk, Tailleferre, Tovey, Turina, Vaughan Williams, Gerrard Williams and Charles Wood.

PIANOFORTE QUARTET.—Next in importance to the quartet for strings alone is that for pianoforte and strings (violin, viola and violoncello). Having its origin in the accompanied sonatas for one or more stringed instruments, the combination was found with the development of the piano and of the technique of piano playing to possess valuable qualities for musical expression. Obviously the effects are of a different nature from those of the strings alone, and while there must always be a disadvantage in the association of a fixed-tone instrument with those whose tones are free, this is compensated for by the difference in quality and the harmonic support which the pianoforte supplies.

There are two pianoforte quartets of Mozart, four of Beethoven, three of which were early works and bear no opus-number, and Mendelssohn's opp. 1, 2 and 3, the combination practically coming into prominence with Schumann's op. 47 in E flat and the opp. 25, 26 and 60 of Brahms. There are also examples by Dvořák, 2; Fauré, 2; Holbrooke, Novák, Parry, Reger, Saint-Saëns, Stanford.

Other quartet combinations are of course possible, such as that of Mozart for oboe, violin, viola and violoncello. (See CHAMBER MUSIC.)

VOCAL QUARTETS are so called whether accompanied or not. Both types have been greatly exploited in oratorio, alone and in combination with chorus, while the ensemble of a quartet of protagonists in opera was a regular feature of the older schools wherein the composer was often called on to show his skill in portraying simultaneously four different lines of thought or types of characterisation. The self-existing vocal quartet, soprano, alto, tenor and bass, with or without accompaniment, has, if one excepts the madrigal, a curiously small repertory. In point of fact, many madrigals and partsongs are equally suitable for a small choir. Otherwise outstanding works of this class are the two sets of 'Liebeslieder-Walzer,' opp. 52 and 65, the 'Gypsy Songs,' op. 103, and quartets, opp. 64, 92 and 112, of Brahms, Schumann's 'Spanisches Liederspiel,' Henschel's 'Serbisches Liederspiel,' Fauré's 'Pavane' and 'Madrigal'; and from English writers there may be mentioned 'Six Pastorals' and 'Nursery Rhymes' (two sets) of H. Walford Davies, 'Songs of the River' of T. F. Dunhill, songs from 'The Princess' of Stanford and five songs from 'England's Helicon' of Ernest Walker. N. C. G.

QUARTET ASSOCIATION, THE (1852-1855). A Society for the performance of chamber music, started in 1852 by Sainton, Cooper, Hill and Piatti, with such eminent artists as Sterndale Bennett, Mlle. Clauss, Mme. Pleyel, Arabella Goddard, Pauer, Hallé, etc., at the pianoforte. They gave six concerts each season at Willis's Rooms, but ended with the third season. The programmes were selected with much freedom, embracing English composers—Bennett, Ellerton, Loder, Macfarren, Mellon, etc.; foreign musicians then but seldom heard—Schumann, Cherubini, Hummel, etc., and Beethoven's posthumous quartets. The pieces were analysed by G. A. Macfarren. G.

QUART-GEIGE, see VIOLINO PICCOLO.

QUART-POSAUNE, see TROMBONE.

QUASI, as if—i.e. an approach to. 'Andante quasi allegretto' or 'Allegretto quasi vivace' means a little quicker than the one and not so quick as the other—answering to poco allegretto, or più tosto allegro. G.

QUATRE FILS AYMON, LES, opéra-comique; words by Leuven and Brunswick, music by Balfe. Produced Opéra-Comique, Paris, July 15, 1844; Princess's Theatre, London, as 'The Castle of Aymon, or The Four Brothers,' in 3 acts, Nov. 20, 1844. G.

QUAVER (Fr. *croche*; Ger. *Achtelnote*, whence the American term, *Eighth note*; Ital. *croma*): half the value of a crotchet, and the eighth part of a semibreve. It is written, when single ♪, when joined ♪. Its rest is 7.

QUEEN OF SHEBA, see KÖNIGIN VON SABA, DIE; REINE DE SABA, LA.

QUEEN'S HALL. This hall in Langham Place was built in 1893 by private enterprise and was opened to the public on Dec. 2 of that year, when a choral and orchestral concert was conducted by Cowen, the programme including Mendelssohn's 'Hymn of Praise.' The actual first concert, however, was that given on Nov. 27 by the Royal Amateur Orchestral Society conducted by George Mount, at which the Prince of Wales was present, the Duke of Edinburgh occupying his post as leader; a private view had been held on Nov. 25 with various musical performances, including those of the band of the Coldstream Guards. April 8, 1894, saw the first Sunday afternoon concert, an organ recital, while on Apr. 7, 1895, there took place the first Sunday evening orchestral concert, conducted by Randegger. In the following August the PROMENADE CONCERTS (q.v.) began (see also NEW QUEEN'S HALL ORCHESTRA), and in October the first regular series of Sunday afternoon orchestral concerts, which for two seasons were conducted by Randegger and subsequently by Henry Wood. These were continued regularly down to the autumn of 1924. It was in 1897 that the Sunday Concert Society was formed to undertake the responsibilities of these concerts and meet the objections raised by the London County Council regarding the profits over Sunday entertainments, the Sunday Musical Union taking its place in 1918; in this connexion it may be stated that about £3000 has been given to various philanthropic institutions, besides the endowment of a Musician's Bed at the Middlesex Hospital.

The main hall, for there are really two under the one roof, with its seating capacity of 2492 and central situation, became London's principal musical centre after the closing of the St. James's Hall in 1905. Intimately connected with Henry Wood and the New Queen's Hall Orchestra, it has been the scene of many important events, such as the three visits in 1896-97 of the Lamoureux Orchestra from Paris, Robert Newman's Musical Festivals, 1899, 1902, besides countless recitals and orchestral concerts given by the leading musicians of the day. It should be added that the small hall with a seating capacity of over 500 was formerly much used for recitals. The hall was designed by T. E. Knightley, structural features being the 17 exits into 3 streets and the fact that the grand circle is on the street level. The organ is by Hill. In Dec. 1902 Messrs. Chappell became lessees of the hall. N. C. G.

QUEEN'S HALL ORCHESTRA, see NEW QUEEN'S HALL ORCHESTRA.

QUEEN SQUARE SELECT SOCIETY, see ALSAGER, THOS. MARSA.

QUEISSER, CARL TRAUGOTT (b. Döben, near Leipzig, Jan. 11, 1800; d. Leipzig, June 12, 1846), a great trombone-player, born of poor

parents. His turn for music showed itself early, and he soon mastered all the ordinary orchestral instruments. He ultimately confined himself to the viola, and to the trombone. In 1817 he was appointed to play the violin and trombone in the town orchestra, and by 1830 had worked his way into the other orchestras of Leipzig, including that of the Gewandhaus. He played the viola in Matthäi's well-known quartet for many years; was one of the founders of the Leipzig 'Euterpe,' and led its orchestra for a long time; and in short was one of the most prominent musical figures in Leipzig during its best period.

As a solo trombone-player he appeared frequently in the Gewandhaus Concerts, with concertos, concertinos, fantasias and variations, many of them composed expressly for him by C. G. Müller, F. David, Meyer, Kummer and others; and the reports of these appearances rarely mention him without some term of pride or endearment. 'For fullness, purity and power of tone, lightness of lip, and extraordinary facility in passages,' says his biographer, 'he surpassed all the trombone players of Germany.'¹ There was a Leipzig story to the effect that at the first rehearsal of the 'Lobgesang,' Quaiser led off the Introduction as follows:

to Mendelssohn's infinite amusement. *Se non è vero, è ben trovato.*

Quaiser was well known throughout Germany, but never appears to have left his native country. G.

QUERCU, SIMON DE (VAN EIJCKEN) (b. Brabant, late 15th cent.), cantor at the court of Milan. He accompanied Maximilian and Francesco Sforza, sons of the Duke, to Vienna, where he was still living in 1513, and brought out his *Opusculum musices*, etc., an essay on elementary musical theory for students, in 1509 (other editions, 1513, 1516, 1518); also *Vigiliae cum vesperis et exequiis mortuorum* (1513). E. v. d. s.

QUICK-STEP, see MARCH.

QUILTER, ROGER (b. Brighton, Nov. 1, 1877), composer, is known chiefly by his songs, graceful settings of English lyrics.

He was educated at Eton and studied composition at Frankfort with Iwan Knorr. He first made his mark with settings (voice and piano) of Shakespeare, particularly the songs from *Twelfth Night* and *As You Like It*, which beside showing a gift for vocal melody had a certain distinction of touch. He continued writing in the same genre, ranging in his choice of poets from the Elizabethans to Tennyson. The latter's 'Now sleeps the crimson petal' is

among the most charming. Quilter has been fortunate in the fact that his work has appealed to such singers as ELWES (who produced his cycle, 'To Julia,' and many other songs), Plunket GREENE and John COATES.

Several of his orchestral works, slight in quality but, like his songs, graceful and spontaneous, have been produced by Wood at Queen's Hall, and include a Serenade (1907), 'Three English Dances' (small orchestra) and a 'Children's Overture' based on tunes from Crane's book of nursery rhymes, *Baby's Opera*. Quilter wrote incidental music for the fairy play 'Where the Rainbow ends' (Savoy, 1911), as well as for a production of *As You Like It* (1922). (For list, see *B.M.S. Ann.*, 1920). C.

QUINAULT, JEAN BAPTISTE MAURICE (called QUINAULT l'Aîné) (d. Gien, 1744), dramatic composer, singer at the Théâtre-Français from 1712-18, afterwards actor at the Comédie Française until 1723. He composed ballets, divertissements, incidental music and songs for comedies, etc. His ballet, 'Les Amours des déesses,' was performed at the Opéra in 1728. His sister, MARIE ANNE, made her début at the Opéra in 1709, but afterwards became a member of the Comédie Française. E. v. d. s.

QUINIBLE, see QUINTOYER.

QUINT, an organ stop which causes the fifth above a given note to sound as well as the note belonging to the key which is pressed down. From the note and its fifth there arises a differential tone an octave below the note. By this mixture an organ with 16-ft. pipes can be made to sound as if with 32-ft. pipes; that is the pitch of the lowest note, but with far less energy than if properly produced with a 32-ft. pipe. T. E.

QUINTA FALSA (False fifth). The forbidden interval between Mi in the Hexachordon durum, and Fa in the Hexachordon naturale—the diminished fifth of modern music. (See MI CONTRA FA.) W. S. B.

QUINTE, the name given in France, during the 17th and part of the 18th centuries, to the now obsolete five-stringed tenor viol, and also to one of the members of the violin family, 'Quinte,' or 'taille de violon,' the modern so-called 'alto' (English, viola). The origin of the word 'Quinte' may be traced to the fact that its strings were tuned a fifth lower than those of the violin, or, more probably, it originated with the instrumental writing in 5 parts, then usual. When 4-part writing came into use, the word 'Quinte' was retained, whilst 'taille,' became obsolete. The instrument retained its old name in France until the beginning of the 19th century, when it was replaced by the Italian 'alto.'

Five-stringed viols were amongst the earliest in use. Praetorius (*Organographia*, 1619) says

ney were employed in ancient times, and Agricola (*Musica instrumentalis*, 1532) gives the tuning of the five-stringed viols then in vogue. Although composers of vocal music during the 16th century not infrequently called their tenor part 'Quinte' or 'Quintus,' viols of that denomination remained under the title of tenor until a later period; and probably the first instance where 'Quintus' designates a musical instrument occurs in the overture to Monteverdi's 'Orfeo' (Venice, 1609-13). *L'État de France*, in 1683, gives the name of 'Fossart,' who played the 'Quinte de violon' in the Queen's band, and in 1712-13 the Paris opera orchestra included two 'Quintes' amongst the instruments. In 1773 there were four 'Quintes' amongst the musicians of the 'Grande Chapelle,' and 'Quintes' were employed in all the orchestras. Jean-Jacques Rousseau (*Dictionnaire de musique*, Paris, 1708) gives a good deal of information concerning the 'Quinte.' Under 'Viole' he says that in France the 'Quinte' and the 'Taille' (a large six-stringed tenor viol), contrary to the Italian custom, played the same part, and under 'Partie' mentions that the 'Quinte' and 'Taille' were united under the name 'Viole.' The highest and lowest notes of these instruments, according to the same writer, were—

from which it is to be inferred that the tuning was the same as that given by Agricola in 1532, i.e.

In England the two tenor viols which formed a part of the 'Chests of six Viols,' so much in vogue during the 17th and beginning of the 18th centuries, were probably identical with the 'Quinte' and 'Taille'; but the French title was never adopted in this country. The bulky size of the 'Quinte' rendered it such an awkward instrument to play upon that its dimensions gradually diminished from century to century, and when the violin came into more general use, it melted into the 'Haute Contre' (alto viol). In the second half of the 18th century it developed into a tenor violin with four strings, and adopted the C clef on the third line which was formerly the clef of the 'Haute Contre' or alto viol. (See VIOL FAMILY.)

E. H. A.; addn. M. L. P.

QUINTET (Fr. *quintette*; Ger. *Quintett*; Ital. *quintetto*), a composition for five instruments or voices. The ideal instrumental quintet is that for strings alone. It generally consists of two violins, two violas and violoncello. As the tone of the violoncello is far more powerful than that of the viola, this combination is considered superior to that in which the numbers of viola and violoncello are reversed, as in the notable work of Schubert. A double-bass has been tried in the 34 quintets of Onslow; here, however, one begins to get outside the domain of true chamber-music and to approach that of the small orchestra. Dvořák's op. 77 is for this combination. Beethoven left one quintet (two violas) and Brahms two. The quintets of Parry, Schillings and Vaughan Williams may also be mentioned.

The addition of the pianoforte to the string quartet dates from the 'romantics,' and the rich effect of combining two distinct tone-colourings, each one capable of harmonic independence, has been widely exploited since the famous example of Schumann appeared. This form of quintet is very popular, and many composers have written them. The list includes Bax, Brahms, Dohnányi, Dvořák, Elgar, Fauré, Franck, Goossens, Hindemith, Pfitzner, Reger, Scott, Stanford, Tovey and Turina. Schubert's 'Trout' quintet is for piano, violin, viola, violoncello and double-bass.

Other combinations have been employed. There are quintets for clarinet and strings of Mozart, Brahms, Holbrooke, Howells, Reger and Weber, and one for horn and strings of Mozart; Weingartner has written for clarinet, strings and pianoforte, and for two oboes, two violins and violoncello; there are harp and strings quintets of Bax and Harrison, pianoforte strings and horn of Draeseke, pianoforte and wind of Beethoven (or for pianoforte and strings), Mozart, Rubinstein and Spohr, and for wind alone of Fibich and Hindemith. (See CHAMBER MUSIC.)

The addition of another part to the vocal quartet has a singularly rich effect, the nature of that part in opera necessarily depending upon the characters assembled at the moment where such an *ensemble* becomes possible. There are two quintets in Mozart's 'Die Zauberflöte,' for example, in which three women's voices are supported by a tenor and bass; the same arrangement occurs in Spohr's 'Azor and Zemira,' while in Wagner's 'Die Meistersinger' there are two tenors. Compare songs of four and five parts in the ENGLISH MADRIGAL SCHOOL.

N. C. G.

QUINTON, a five-stringed TREBLE VIOL. (See PLATE LXXXVII. No. 6; also VIOL, TREBLE 3.)

QUINTOYER (Old Eng. 'Quinible'), to sing in fifths—a French verb, in frequent use among extempore organisers during the Middle Ages. (See ORGANUM; PART-WRITING.) W. S. B.

QUINTUPLE TIME, the measure of five beats. As a rule quintuple time has two accents, one on the first beat of the bar, and the other on either the third or fourth, the bar being thus divided into two unequal parts, when it can be regarded as a compound of duple and triple, employed alternately.

Quintuple time produces an effect sufficiently characteristic and interesting to have induced various composers to make experiments therein, the earliest attempt of any importance being a symphony in the second act of Handel's 'Orlando' (1732), in which the hero's perturbation¹ is represented by this peculiar time. The same rhythm occurs in an air to the words 'Se la sorte mi condanna' in the opera of 'Ariadne' by Adolphi, written in 1750, and it is also found in the folk-music of many countries. Thus Reicha, in a note to No. 20 of his set of 36 fugues (each of which embodies some curious experiment in either tonality or rhythm), states that in a certain district of the Lower Rhine, named Kochersberg, the airs of most of the dances have a well-marked rhythm of five beats, and he gives as an example the following waltz:

In the above example the second accent falls on the third beat, the rhythm being that of 2-8 followed by 3-8, and the same order is observed in a charming movement by Hiller, from the trio, op. 64.

In Reicha's fugue above referred to, the reverse is the case, the fourth beat receiving the accent, as is shown by the composer's own time-signature, as well as by his explicit directions as to performance. The following is the subject:

Instances of quintuple time in compositions of the early 19th century are to be found in a trio for strings by K. J. Bischoff, for which a prize was awarded by the Deutsche Tonhalle in 1853; in Chopin's sonata in C minor, op. 4; in Hiller's 'Rhythmische Studien,' op. 52; in 'Viens, gentille dame'; in Boieldieu's 'La Dame blanche'; Löwe's Ballad 'Prinz Eugen'; a number in Rubinstein's 'Tower of Babel,' etc.

Another characteristic example occurs in the 'Gypsies' Glee,' by W. Reeve (1796). This may fairly be considered an example of genuine quintuple rhythm, for instead of the usual division of the bar into two parts, such as might be expressed by alternate bars of 3-4 and 2-4, or 2-4 and 3-4, there are five distinct beats in

¹ Burney, *History*, iv 364, describes it as 'a division of time which can only be borne in such a situation.'

every bar, each consisting of an accent and a non-accent. The same true quintuple time, as distinguished from a combination of triple and duple time, distinguishes the second movement of Tchaikovsky's 'Pathetic' symphony. The passage in the third act of 'Tristan und Isolde,' occurring at a most exciting moment in the drama, is apt to escape the attention of many hearers who are only conscious of the impatient effect it produces.

In the 20th century quintuple time has been so freely exploited as to have become almost a mannerism of the age. It may be said to have spread west over Europe since the Russian nationalists, who consciously based their style on folk-songs, were drawn to use it. In England, Gustav Holst has made a particularly extensive use of it.

F. T., rev.; with addns. M. and C.

QUINTUS (the Fifth), the fifth part in a composition for five voices; called also Pars quinta and Quincuplum. In music of the 15th and 16th centuries, the fifth part always corresponded exactly in compass with one of the other four; it would, therefore, have been impossible to describe it as first or second cantus altus, tenor or bassus. W. S. R.

QUIRE, see CHOIR.

QUITTARD, HENRI (b. Clermont-Ferrand, Puy de Dôme, May 13, 1864; d. Paris, July 21, 1919), a French musical historian whose name stands high. A *licencié es lettres* at 24, he came to Paris, and, following the advice of E. Chabrier, studied music with C. Franck. He soon devoted himself to the history of music, and his first studies appeared in 1898. His special domain was the French musicians of the 16th and 17th centuries, but he investigated French musical history from the 13th century in a striking way. The lutenists of France were of great interest to him; with M. Brenet he was one of the first to demonstrate their importance. His activity shows itself in the numerous articles published in the *Revue internationale de musique*, *Revue musicale*, *Tribune de St. Germain*, publications of the International Musical Society, etc. For list see *Bulletin de la Société Française de Musicologie*, No. 5, Dec. 1919, obituary article by L. de La Laurencie. His last articles, *Notes sur Guillaume de Machaut et son œuvre*, were published in the *Bulletin* of the above-named Society (1918-19).

His few separate published works are: *Un Musicien en France au XVII^e siècle: Henri du Mont* (Paris, 1906, *Mercur du France*); *Meslanges divers* on the same, and on G. Bouzignac. (Schola, Paris); *Le Trésor d'Orphée* of Antoine Francisque (lute transcription) (Paris S.I.M. editions). He left in preparation an important work on G. de Machaut, and an edition of harpsichord pieces by L. Couperin. His private collection of lute music, transcriptions, etc., which he himself built up, has been

bequeathed to the Conservatoire Library. H. Quittard was lecturer at the École des Hautes Études Sociales, archivist at the Opéra, 1912 until his death, musical critic to *Le Matin*, and from 1909 to *Le Figaro*. M. L. P.

QUODLIBET (Lat. 'What you please'), also called QUOTLIBET ('As many as you please'), and in Italian MESSANZA or MISTICHANZA ('A mixture'). This was a kind of musical joke in the 16th and early part of the 17th centuries, the fun of which consisted in the extempore juxtaposition of different melodies, whether sacred or secular, which were incongruous either in their musical character, or in the words with which they were associated; sometimes, however, the words were the same in all parts, but were sung in snatches and scraps, as in the quodlibets of Melchior Franck.¹ There were two ways of performing this: one was to string the melodies together simply and without any attempt at connecting them by passages such as those found in modern 'fantasias'; the other, the more elaborate method, consisted in singing or playing the melodies simultaneously, the only modifications allowed being those of time.

This pastime was a favourite one with the Bachs, at whose annual family gatherings the singing of quodlibets was a great feature.² Sebastian Bach himself has left us one delightful example of a written-down quodlibet, at the end of the '30 variations' in G major, for a detailed analysis of which see Spitta. The two tunes used in it are 'Ich bin so lang bei dir nicht gewest,' and 'Kraut und Ruben, Haben mich vertrieben.' One of the best modern examples, although only two themes are used, is in Reinecke's variations for two pianos on a gavotte of Gluck's, where, in the last variation, he brings in simultaneously with the gavotte the well-known musette of Bach which occurs in the third 'English'

suite. A good instance, and one in which the extempore character is retained, is the singing of the three tunes 'Polly Hopkins,' 'Buy a Broom' and 'The Merry Swiss Boy' together, which was formerly sometimes done for a joke. A very interesting specimen of a 16th-century quodlibet by Johann Gödel, consisting of five chorale-tunes—viz. (1) 'Erhalt uns, Herr, bei deinem Wort,' (2) 'Ach Gott von Himmel,' (3) 'Vater unser im Himmelreich,' (4) 'Wir glauben all,' (5) 'Durch Adams Fall'—is given as an appendix to Hilgenfeldt's *Life of Bach*. We quote a few bars as an example of the ingenuity with which the five melodies are brought together:

Parry's music to *The Clouds* of Aristophanes (see GREEK PLAYS, MUSIC TO) contains a brilliant modern example of the quodlibet, and his music of this kind makes liberal use of the principle without necessarily employing the name. C.

RAAFF, ANTON (b. Holzem, near Bonn, 1714; d. Munich, May 27, 1797), one of the most distinguished tenors of his day; educated for the priesthood at the Jesuit College at Cologne. His fine voice so struck the Elector, Clement Augustus, that he took him to Munich, where Ferrandini brought him forward in an opera. After studying for a short time with Bernacchi at Bologna, Raaff became one of the first tenors of his time. In 1738 he sang at Florence on the betrothal of Maria Theresa, and followed up this successful début at many of the Italian theatres. In 1742 he returned to Bonn, and sang at Vienna in Jommelli's 'Didone' (1749), to Metastasio's great satisfaction. In 1752 he passed through Italy to Lisbon; in 1755 he accepted a summons to Madrid, where he remained under Farinelli's direction, enjoying every favour from the court and public. In 1759 he accompanied Farinelli to Naples. In 1770 he entered the service of the Elector, Karl Theodor, at Mannheim. In 1778 he was in Paris with Mozart, and in 1779 he followed the court to Munich, where Mozart composed the part of Idomeneo for him. Mozart in his letters speaks of him as his 'best and dearest friend,' especially in one from Paris, dated June 12, 1778. He composed for him in Mannheim the air, 'Se al labbro mio non credi' (Köchel, 295). c. f. p.

RABAN, EDWARD (d. 1658), was an Englishman who, having fought in the wars of the Netherlands, from the year 1600, settled at Edinburgh, at the Cowgate Port, as a printer, in 1620. One work with the Edinburgh imprint alone remains, and in the same year he removed to St. Andrews, and finally to Aberdeen in 1622. In this place he was under the patronage of the town dignitaries, and had the friendship of Bishop Forbes. It was, presumably, these circumstances that enabled him to carry on his craft unmolested, unlike John Forbes of the same city who, at a later date, suffered fine and imprisonment for infringing the monopoly held by the King's printer in Scotland. Raban at once started the printing of liturgical works, including a prayer-book, dated 1625, which is stated to have the music to the Psalms. In 1629 he printed two editions of *CL. Psalmes of the princelie prophet David*, a quarto for binding with Bibles and a 16mo edition. Also, in 1633, two editions of *The Peames of David in prose and metre according to the Church of Scotland*. . . . In Aberdeen, imprinted by Edward Raban for David Melvill, 1633, 8°. These have the music to the Psalms printed from movable type. Though probably not so well executed as the music of Andro Hart of Edinburgh, these are of great interest in the history of Scottish music-printing. Raban gave up business in 1649. r. k.

RACHMANINOV, SERGEI VASSILIEVICH (b. in the Government of Novgorod, Apr. 1-Mar. 20, O.S., 1873), distinguished pianist and one of the most talented of the Moscow school of composers. At 9 years of age he entered the St. Petersburg Conservatoire, where he remained three years, making the pianoforte his chief study. Three years later, in 1885, he was transferred to the Conservatoire at Moscow. Here he studied the pianoforte, first with Tchaikovsky's friend, Zvierev, and afterwards with Siloti. His masters for theory and composition were Taneiev and Arensky. The musical influences of Moscow are clearly evident in the works of Rachmaninov. In 1892 he won the gold medal for composition, and on quitting the Conservatoire, in the same year, started on a long concert tour through the chief towns of Russia. In 1899 Rachmaninov appeared in London at one of the concerts of the Philharmonic Society, and made a good impression in the threefold capacity of composer, conductor and pianist. In 1893 he was appointed professor of pianoforte to the Maryinsky Institute for Girls, in Moscow. From 1897-98 he directed the Private Opera in Moscow. His first symphony was given at a concert of the Royal Philharmonic Society, in May 1909, under Nikisch; the second, in E minor, at the Leeds Festival, 1910, conducted by the composer. Since the Russian revolution he has spent much of his time in America, revisiting Europe for concert tours. Several of Rachmaninov's songs and pianoforte pieces, especially the famous prelude in C♯ minor, have attained immense popularity. His compositions are as follows:

ORCHESTRAL

'The Rock,' fantasia, op. 7; *Gl'ye Capriccio*, op. 12; Symphony No. 1, op. 13 (1890); No. 2, in E minor, op. 27; symphonic poem, 'The Isle of Death' (after Bocklin), *Promenade Concerts*, Aug. 28, 1915.

PIANOFORTE

Three Concertos, opp. 1, 18 and 30; two Suites, opp. 5 and 17; six pieces for four hands, op. 11; five pieces for two hands, op. 3 (including the C♯ minor prelude); seven pieces, op. 10; six *Moments Musicaux*, op. 16; variations on the theme of Chopin's Prelude in C minor, op. 22.

CHAMBER MUSIC

Elegiac trio (in memory of Tchaikovsky) for pianoforte, violin and violoncello, op. 9 (1893); sonata for violoncello and pianoforte, op. 19; two pieces for violin and pianoforte, op. 6; two pieces for violoncello and pianoforte, op. 2.

VOCAL

Six choruses for female voices, op. 15; humorous chorus for mixed voices; cantata, 'Spring,' for chorus, baritone solo and orchestra, op. 20; six songs, op. 4; six ditto, op. 8; 12 ditto, op. 14; 'Fata' (to Beethoven's Fifth Symphony), op. 17; 'The Bell' (Edgar Allan Poe) for chorus and orchestra, Birmingham Fest. Choral Soc. 1921, Liverpool 1922 conducted by Sir Henry J. Wood.

OPERATIC

'Aleko,' one act, imp. Opera, Moscow, 1892. 'The Avareicious Knight,' Moscow; 'Francesca da Rimini' (1906) — both revived in Moscow, 1912. R. N.

RACKET, RACKETT or RANKETT (Fr. *cervelat*); also known as sausage-bassoon, an obsolete instrument of small cylindrical bore, played with a double reed of the bassoon type.

It is described both by Praetorius and by Mersenne, and was made both of wood and ivory. The *apparent* length of the instrument was very small, as the bore doubled many times upon itself, the true length being thus disguised. In addition to the holes or ventages closed by the tips of the fingers in the usual way, the doubling of the tube allowed of the piercing of several holes which were closed by other joints of the fingers, or soft parts of the hand. According to Praetorius the rackets were made in families, the compass of a set of four extending from C to d'. (See *PLATE IV.* No. 3.)

D. J. B.

RADESCA DI FOGGIA, ENRICO, organist from c. 1805 of the cathedral, and a citizen of Turin, chamber musician in the ducal chapel there, of which he became the 'maestro' in 1815. He composed a book of masses & 4 v., and 7 books of motets, madrigals, canzonets, etc. (list in *Q.-L.*).

RADFORD, ROBERT (b. Nottingham, May 13, 1874), bass singer. This versatile and capable artist, after his successful début at the Norwich Festival in 1899, secured and maintained a high position among contemporary British vocalists. He was trained chiefly at the R.A.M., where he studied under Alberto Randegger, Frederic King and Battison Haynes. Possessing a voice of rich and resonant quality with the timbre and compass of a genuine basso, he was able by combined intelligence and industry to make the most of his natural musical gifts; and his progress, as he gained experience both in opera and in concert work, was proportionately rapid. He developed a sound and dignified oratorio style, and during many years was engaged as the leading English bass soloist at all the chief provincial festivals, the Handel Festivals, etc. At the same time his bent as a dramatic artist early marked him out for a career on the operatic stage. He made his first appearance at Covent Garden, on the opening night of the summer season of 1904, in the small but important rôle of the Commendatore in 'Don Giovanni,' Emmy Destinn making her début on the same occasion, with Hans Richter as conductor. He next took part in the English cycles of the 'Ring' given in the winter of 1908 under the same distinguished conductor, filling with credit the parts of Fasolt and Hunding. This was really the start of his long and successful labours in connexion with opera sung in the vernacular, first under the Grand Opera Syndicate at Covent Garden, then under Sir Thomas Beecham at the same house, at Drury Lane, and His Majesty's; and subsequently with the BRITISH NATIONAL OPERA COMPANY (*q.v.*), of which he was a founder and director from its inception in 1921. He added steadily to his repertory, and among the parts in which he became especially popular were, besides the

Wagnerian, those of Sarastro, Osmin, Mephistopheles, the Father in 'Louise,' and 'Boris Godounov.' Alike in the older and the more modern operas his excellent enunciation and diction stood him in good stead, and the same valuable quality lent a notable weight and impressiveness to his declamation in the part of Elijah and the oratorios of Handel and Haydn.

H. K.

RADICATI, FELICE ALESSANDRO (b. Turin, 1778; d. Vienna, Apr. 14, 1823), violinist and composer. His parents belonging to the poor nobility of Italy, the child's singular interest in music was encouraged the more, and he began his studies at a very early age. Pugnani taught him the violin. Profiting by the precepts of this great master, Radicati acquired many of Pugnani's finer qualities, and, on reaching manhood, toured with unqualified success in Italy, France and England.¹ The love of his native land, however, and the additional inducement of a post at the court of King Victor Emanuel V., drew him back to Italy, whither he returned, accompanied by his accomplished wife, Teresa BERTINOTTI. In the year 1815 the town of Bologna announced a competition for the post of leader of the town orchestra—at that time celebrated; but when it came to be known that Radicati had entered the lists, no one would contend against him; with the result that he was elected to the post on Mar. 31, 1815, without contest. After this his talents obtained for him the appointments of director of the great orchestra of the Basilica di S. Pietro, and professor of the violin at the famous Liceo Filarmonico of Bologna. His career was calamitously cut short, in the prime of life, by a fatal carriage accident.

The authorities on the subject of Radicati's career give but few dates. According to *Q.-L.* he was in London 1806-07, and toured in Lombardy² in 1816. His principal biographer, Carlo Pancaldi—a Bolognese lawyer—wrote an eulogy in his memory, but unfortunately mentions but one date, that of his election at Padua on Mar. 31, 1815. As a violinist his qualities appear to have been those of a musician rather than those of a virtuoso. Pancaldi tells us that his style was dignified and his tone sonorous, that he counted Haydn, Beethoven and Romberg among his friends, and that he was well educated in other respects than music. As a composer he devoted himself especially to perfecting the quartet, which at that time—in spite of Boccherini's influence—was less thought of in Italy than in other countries. Besides his numerous contributions to chamber music, Radicati wrote six or seven operas, among which are included his 'Ricardo Cuor di Leone,' produced at Bologna;

¹ *Q.-L.*

² He had a season of Italian Opera at Crow Street Theatre, Dublin, Aug.-Sept. 1911.

³ *F.M.H.*

a couple of farces, 'I due prigionieri,' 'Il medico per forza'; a concerto for violin, and a number of small 'Arias,' 'Cavatinas,' etc. All these were in the possession of his son in 1828. The most complete list of his compositions—published and MS.—is probably that given in *Q.-L. Radicati's* wife and his son Karolus, who became a lawyer, erected a monument to his memory in the Campo Santo at Bologna.

BIBL.—CARLO FANCALDI, *Omni intorno Felice Radicati*, Bologna, 1828; *Q.-L.; Feltz; Baker*. E. H.-A.

RADZIWIŁŁ, ANTON HEINRICH, Prince of, Royal Prussian 'Statthalter' of the Grand Duchy of Posen (b. Wilna, June 13, 1775; d. Berlin, Apr. 7, 1833), married in 1796 the Princess Luise, sister of that distinguished amateur, Prince Louis Ferdinand of Prussia. Radziwiłł was known in Berlin not only as an ardent admirer of good music, but as a fine violoncello player, and 'a singer of such taste and ability as is very rarely met with amongst amateurs.'¹ Beethoven was the great object of his admiration. He played his quartets with devotion, made a long journey to Prince Galitzin's on purpose to hear the Mass in D, was invited by Beethoven to subscribe to the publication of that work, and indeed was one of the seven who sent in their names in answer to that appeal. To him Beethoven dedicated the overture in C, op. 115 (known as 'Namensfeier'), which was published as 'Grosses Ouverture in C dur *gedichtet*,' etc., by Steiner of Vienna in 1825.

Radziwiłł was not only a player, a singer and a passionate lover of music, he was also a composer of no mean order. Whistling's *Handbuch* (1828) names three Romances for voice and PF. (Peters), and songs with guitar and violoncello (B. & H.), and Mendel mentions duets with PF. accompaniment, a 'Complaint of Maria Stuart,' with PF. and violoncello, and many partsongs (still in MS.) composed for Zelter's Liedertafel, of which he was an enthusiastic supporter.² But these were only preparations for his great work, entitled 'Compositions to Goethe's dramatic poem of Faust.' This, which was published in score and arrangement by Trautwein of Berlin in Nov. 1835, contains twenty-five numbers, occupying 589 pages. A portion was sung by the Singakademie as early as May 1, 1810; the choruses were performed in May 1816, three new scenes as late as Nov. 21, 1830, and the whole work was brought out by that institution after the death of the composer. The work was repeatedly performed during several years in Berlin, Danzig, Hanover, Leipzig, Prague and many other places.³ It made its appearance in a performance at Hyde Park College,

London, on May 21, 1880, under the direction of L. Martin-Eiffe. G.

RAFF, JOSEPH JOACHIM (b. Lachen, Lake of Zurich, May 27, 1822; d. Frankfort, June 24/5, 1882), received his early education at Wiesenstetten in Württemberg, in the home of his parents, and then at the Jesuit Lyceum of Schwyz, where he carried off the first prizes in German, Latin and mathematics. Want of means compelled him to give up his classical studies and become a schoolmaster, but he stuck to music, and, though unable to afford a teacher, made such progress not only with the piano and the violin, but also in composition, that Mendelssohn, to whom he sent some MSS., gave him in 1843 a recommendation to Breitkopf & Härtel, who published his early pianoforte pieces. Amidst privations which would have daunted any one of less determination he worked steadily on, and at length having fallen in with Liszt, was treated by him with the kindness which always marked his intercourse with rising or struggling talent, and was taken by him on a concert-tour. Meeting Mendelssohn for the first time at Cologne in 1846, and being afterwards invited by him to become his pupil at Leipzig, he left Liszt for that purpose. Before he could carry this project into effect, however, Mendelssohn died, and Raff remained at Cologne, occupying himself *inter alia* in writing critiques for Dehn's *Cäcilia*. Later, in 1854, he published *Die Wagnerfrage*, a pamphlet which excited considerable attention. Liszt's endeavours to secure him a patron in Vienna in the person of Mecchetti the publisher, were frustrated by Mecchetti's death while Raff was actually on the way to see him. Undismayed by these repeated obstacles he devoted himself to a severe course of study, partly at home and partly at Stuttgart, with the view to remedy the deficiencies of his early training. At Stuttgart he made the acquaintance of Bülow, who became deeply interested in him, and did him a great service by taking up his new Concertstück, for PF. and orchestra, and playing it (Jan. 1, 1848).

By degrees Raff attached himself more and more closely to the new German school, and in 1850 went to Weimar to be near Liszt. Here he remodelled an opera, 'König Alfred,' which he had composed in Stuttgart three years before, and it was produced at the court theatre, where it was often performed. Other works followed—a string quartet in 1855, and the first sonata for PF. and violin (E minor) in 1857. In the meantime he had engaged himself to Doris Genast, daughter of the well-known actor and manager, and herself on the stage; and in 1856 he followed her to Wiesbaden, where he was soon in great request as a pianoforte teacher. In 1858 he composed the incidental music for *Bernhard von Weimar*, a drama by Wilhelm Genast, the overture to

¹ *A.M.S.* 1831, July 27. See also 1809, June 28; 1814, Sept. 28.

² *Seller's Correspondence with Goethe* (contains with notices of the Prince).

³ See Index to *A.M.S.* For an analysis of the work see *A.M.S.* 1886, pp. 601, 617.

which speedily became a favourite, and was much played throughout Germany. In 1859 he married. In 1863 his first symphony, 'An das Vaterland,' obtained the prize offered by the Gesellschaft der Musikfreunde in Vienna. In 1870 his comic opera, 'Dame Kobold,' was produced at Weimar. Other operas for which he himself wrote the libretti have not been performed in public. In 1877 he was appointed with much éclat director of the Hoch Conservatorium at Frankfurt, a post he held until his death. Since his death his music has passed, alike in Germany and England, into an oblivion which cannot excite surprise in those who realise the inherent weaknesses of the composer; and the sudden change on the part of the public, from a widespread admiration to almost complete neglect, is of itself a severe criticism on his work. A detailed analysis of the first six of his symphonies appeared in the *Monthly Musical Record* for 1875, and a good idea may be gathered therefrom of Raff's style.

A complete catalogue of Raff's works appeared in earlier editions of this Dictionary; the greater number of them are for pianoforte solo. The following are his more important compositions:

Sonatas for vln. and PF, opp. 73 (E minor), 78 (A), 128 (D), 129 (G minor), 'Chrom. Sonate in einem Satz,' 145 (C minor).
 PF Trios, opp. 102, 112 (G minor), 155, 158 (D).
 String Quartets, opp. 77 (D minor), 90 (A), 136 (E minor), 137 (A minor), 138 (D), 192, No. 1 (G minor); No. 2 (D). 'Die schöne Müllerin,' No. 3, in canon-form.
 PF Quartets, opp. 202, Nos. 1 and 2.
 PF Quintet, opp. 107 (A minor).
 String Sextet, opp. 178.
 String Octet, opp. 176.
 PF and orch., op. 76, 'Ode au printemps'; op. 185, Concerto (G minor); op. 200, Suite (E flat).
 Violin and orch., Suite, op. 180.
 Concerto for vln., opp. 181 (B minor), and 206 (A minor).
 Concerto for vcl., opp. 193 (D minor).
 Suites and Overtures, op. 101, Suite; op. 103, Jubilee Overture; op. 117, Festival Overture; op. 127, 'Ein feste Burg' Overture; op. 204, Suite (B flat).
 Symphonies, 'An das Vaterland,' op. 96; (C), op. 140, 'Im Walde,' op. 153; (G minor), op. 167, 'Lenore,' op. 177; 'Geliebt, gestrebt, gelitten, gestorben, ungeworben' (D minor), op. 189; 'In die Höhe' (B flat), op. 201; 'Frühlingsklänge' (A), op. 205; 'Im Sommer' (B minor), op. 209, 'Zur Herbstzeit,' op. 213; 'Der Winter,' op. 214 (left unfinished, and revised by Erdmannsdorfer).
 Sinfonietta for wind instruments, op. 188.
 Voices and orch., 'Wachet auf,' op. 80; Psalm 130, 'De profundis,' op. 141, 'Die Tageszeiten,' op. 209; 'Weltende—Gericht—neue Welt,' oratorio, op. 212.
 Comic Opera, 'Dame Kobold,' op. 154.

F. G., rev. and abridged.

RAG TIME. A modern term, of American origin, signifying, in the first instance, broken rhythm in melody, especially a sort of continuous syncopation. 'Rag time tunes' is a name given to those airs which are usually associated with the so-called 'coon' songs or lyrics, which are supposed to depict negro life in modern America.

F. K.

RAICK, DIEUDONNÉ (b. Liège, 1702; d. Antwerp, Nov. 30, 1764), a vicar-choral of Notre Dame (Cathedral), after filling organist posts there as well as at Louvain and Ghent. He composed 12 suites and 3 sonatas for harpsi-

chord, 6 'petites suites' for harpsichord, flute or violin, and a number of harpsichord pieces.

E. v. d. s.

RAIF, OSKAR (b. Zwolle, Holland, July 31, 1847; d. Berlin, July 29, 1899), was a pupil of Tausig, and occupied a post as pianoforte teacher in the Royal Hochschule at Berlin, with the title of Königlichler Professor, from 1875 till his death.

H. v. H.

RAIMONDI, IGNAZIO (b. Naples, c. 1735; d. London, Jan. 14, 1813), Neapolitan violinist and composer. Judging by the fact that he went to Amsterdam in 1760, and there produced his first compositions, we may infer that he was born about 1735 or 1740. He died in London at his own house, 74 Great Portland Street. From 1762-80 he was director of concerts at Amsterdam, and produced his symphony entitled 'The Adventures of Telemachus.' From Amsterdam he went to Paris, where his opera, 'La Muette,' was performed, and about 1780 he came to London, where he received sufficient encouragement to induce him to make it his permanent home. His compositions became very popular in England, particularly a symphony entitled 'The Battle' (1785). On June 1, 1791, he gave a benefit concert at the Hanover Square Rooms, at which he figured both as violinist and composer; he was assisted by Signor Pacchierotti, Madame Mara, Lord Mornington and Monsieur Dahmer.² The following year he gave a series of 12 subscription concerts at Willis's Rooms, and at these he both played solos and led the orchestra. Emanuele Barbella is said to have taught Raimondi the violin, but whether this be fact or no, we may infer from Dr. Burney³ who calls Raimondi a 'worthy disciple' of Barbella, that this artist's technique was of the then greatly admired Tartini school. Raimondi's published compositions include two symphonies—besides the 'Telemachus' above mentioned, a number of quartets for two violins, viola and violoncello, two sets of six trios for two violins and violoncello, and some sonatas for two violins, violin and violoncello, and violin and viola.

RAIMONDI, PIETRO (b. Rome, Dec. 20, 1786; d. there, Oct. 30, 1853), came of poor parents and at an early age passed six years in the Conservatorio of the Pietà de' Turchini at Naples. After many wanderings, mostly on foot—from Naples to Rome, from Rome to Florence, from Florence to Genoa—and many years, he at length found an opportunity of coming before the public with an opera entitled 'Le bizzarrie d'amore,' which was performed at Genoa in 1807. After three years there,

² The dates of composition of later symphonies are as follows: 2nd and 3rd, 1809; 4th, 1871; 5th, 1873. 6th, 1876; 7th, 1877; 8th, 1878; 9th, 1880.

³ See *Morning Chronicle*, June 1, 1791; *History of Music*, vol. III. 575.

each producing its opera, he passed a twelve-month at Florence, and brought out two more. The next twenty-five years were spent between Rome, Milan, Naples and Sicily, and each year had its full complement of operas and ballets. In 1824 he became director of the royal theatres at Naples, a position which he retained till 1832. In that year the brilliant success of his opera buffa, 'Il vortaggio' (Naples, 1831), procured him the post of professor of composition in the Conservatorio at Palermo. Here he was much esteemed, and trained several promising pupils. In Dec. 1852, he was called upon to succeed Basili as maestro di cappella at St. Peter's. Shortly before this, in 1848, he had after four years of toil completed three oratorios, 'Potiphar,' 'Pharaoh' and 'Jacob,' which were not only designed to be performed in the usual manner, but to be played all three in combination as one work, under the name of 'Joseph.' On Aug. 7, 1852, the new maestro brought out this work at the Teatro Argentina. The success of the three single oratorios was moderate, but when they were united on the following day—the three orchestras and the three troupes forming an *ensemble* of nearly 400 musicians—the excitement and applause of the spectators knew no bounds and so great was his emotion that Raimondi fainted away.

The list of his works is astonishing, and embraces 62 operas; 21 grand ballets, composed for San Carlo between 1812 and 1828; 8 oratorios; 4 masses with full orchestra; 2 ditto with 2 choirs a *cappella*; 2 Requiems with full orchestra; 1 ditto for 8 and 16 voices; a Credo for 16 voices; the whole Book of Psalms, for 4, 5, 6, 7 and 8 voices; many Te Deums, Stabats, Misereres, Tantum ergos, psalms and litanies; two books of *30 partimenti*, each on a separate bass, with three different accompaniments; a collection of figured basses with fugued accompaniments as a school of accompaniment; 4 fugues for 4 voices, each independent but capable of being united and sung together as a quadruple fugue in 16 parts; 6 fugues for 4 voices capable of combination into 1 fugue for 24 voices; a fugue for 16 choirs; 16 fugues for 4 voices; 24 fugues for 4, 5, 6, 7 and 8 voices, of which 4 and 5 separate fugues will combine into one. A fugue in 64 parts, for 16 four-part choirs, is said to exist. Besides the above feat with the three oratorios he composed an opera seria and an opera buffa which went equally well separately and in combination. Such stupendous labours are, as Fétis remarked, enough to give the reader the headache: what must they have done to the persevering artist who accomplished them? But they also give one the heartache at the thought of their utter futility. Raimondi's compositions, with all their ingenuity, belong to a past age, and we may safely say that they will never be revived.

G.

RAINFORTH, ELIZABETH (b. Nov. 23, 1814; d. Redland, Bristol, Sept. 22, 1877), studied singing under George Perry and T. Cooke, and acting under Mrs. Davison, the eminent comedienne. After having gained experience at minor concerts, she appeared upon the stage at the St. James's Theatre, Oct. 27, 1836, as Mandane, in Arne's 'Artaxerxes,' with complete success. She performed there for the remainder of the season, and then removed to the English Opera-House. Subsequently to her public appearance she took lessons from Crivelli. In 1837 she sang in oratorio at the Sacred Harmonic Society, and continued to do so for several years. She made her first appearance at the Philharmonic, Mar. 18, 1839. In 1840 she sang at the Antient Concerts, and in 1843 at the Birmingham Festival. After performing at Covent Garden from 1838–43 she transferred her services to Drury Lane, where she made a great hit by her performance of Arline, in Balfe's 'Bohemian Girl,' on its production, Nov. 27, 1843. In the previous year she had a most successful season in Dublin, and repeated her visits to Ireland in 1844 and 1849. She was engaged at the Worcester Festival of 1845, and in this year (Crosby Hall, London, Jan. 8) sang the soprano solo in Mendelssohn's 'Hear my prayer' at its first performance. She continued to perform in the metropolis until about 1852, when she removed to Edinburgh, where she remained until about 1856. She then retired, and in 1858 went to live at Old Windsor, and taught music in the neighbourhood until her complete retirement in Mar. 1871, when she removed to her father's at Bristol. Her voice was a high soprano, even and sweet in quality.

W. H. H.

RAISON, ANDRÉ, a late 17th-century organist at St^e Geneviève and the Jacobin Church, Paris; one of the great French organ-masters. He composed 'Livre d'orgue' (1687), republished by Guilmant; 'Offerte du 5^e ton,' addition to former (1688); 2nd book of 'Livre d'orgue' (1714).

E. v. d. s.

RALLENTANDO, RITARDANDO, RITENENTE, RITENUTO—'Becoming slow again,' 'Slackening,' 'Holding back,' 'Held back.' The first two of these words are used quite indifferently to express a gradual diminution of the rate of speed in a composition, and although the last is commonly used in exactly the same way, it seems originally and in a strict sense to have meant a uniform rate of slower time, so that the whole passage marked *ritenuto* would be taken at the same time, while each bar and each phrase in a passage marked *rallentando* would be a little slower than the one before it. That there exists a difference in their uses is conclusively proved by a passage in the quartet op. 131 of Beethoven, where in the 7th movement (*allegro*) a phrase of three recurring minims, which is repeated in all five times, has

the direction 'Espressivo, poco ritenuto' for its first three appearances, which are separated by two bars *a tempo*, and for the last two times has *ritardando*, which at length leads into the real *a tempo*, of which the former separating fragments were but a presage. This is one of the very rare instances of the use of the word *ritenuto* by Beethoven. The conclusion from it is confirmed by a passage in Chopin's Rondo, op. 16, consisting of the four bars which immediately precede the entry of the second subject. Here the first two bars consist of a fragment of a preceding figure which is repeated, so that both these bars are exactly the same; the last two bars, however, have a little chromatic cadence leading into the second subject. The direction over the first two bars is 'poco ritenuto,' and over the last two 'rallentando,' by which we may be quite sure that the composer intended the repeated fragment to be played at the same speed in each bar, and the chromatic cadence to be slackened gradually.

Ritenente is used by Beethoven in the PF. sonata, op. 110, about the middle of the first movement, and again in the sonata, op. 111, in the first movement, in the seventh and fifteenth bars from the beginning of the *allegro con brio*. It would seem that the same effect is intended as if 'ritenuto' were employed; in each case, the words 'meno mosso' might have been used. Beethoven prefers *ritardando* to *rallentando*, which latter is common only in his earlier works. M.

RAMANN, (1) LINA (b. Mainstockheim, near Kitzingen, Bavaria, June 24, 1833; d. Munich, Mar. 30, 1912), musical writer and educationist. It was not till her seventeenth year that she had any instruction in music. At that time her parents removed to Leipzig, and from 1850-53 she there enjoyed the advantage of pianoforte lessons from the wife of Dr. F. Brendel, herself formerly a scholar of Field's. From this period she adopted the career of a teacher of music, and studied assiduously, though without help, for that end. After a period of activity in America, she opened (in 1858) an institute in Glückstadt (Holstein) for the special training of music-mistresses, and maintained it till 1865, in which year she founded a more important establishment, the Music School at Nuremberg, in conjunction with Frau Ida Volkmann of Tilsit, and assisted by a staff of superior teachers, under Fräulein Ramann's own superintendence. The school was transferred to Aug. Göllerich in 1890, when Fräulein Ramann moved to Munich. She published two works—*Die Musik als Gegenstand der Erziehung* (Leipzig: Merseburger, 1868), and *Allgemeine Erzieh.- und Unterrichtslehre der Jugend* (Leipzig: H. Schmidt, 1869; 2nd ed. 1873), which were both received with favour by the German press. From 1860 she was musical correspondent of the *Hamburg Jahresszeiten*.

A volume of her essays contributed to that paper has been collected and published, under the title of *Aus der Gegenwart* (Nuremberg: Schmid, 1868). In the early part of 1880 she published a study of Liszt's 'Christus' (Leipzig, Kahnt), and later in the year the first volume of a *Life of Liszt*,¹ completed in 1894 (Leipzig, Breitkopf). The first portion was translated by Mrs. S. H. Eddy, Chicago, and by Miss E. Cowdery, and published in two vols. in 1882. This is an important work. It suffers somewhat from over-enthusiasm, but it is done with great care, minuteness and intelligence, and obviously profited largely by direct information from Liszt himself. She also edited Liszt's writings (1880-83, in six volumes). Her cousin.

(2) BRUNO (b. Erfurt, Apr. 17, 1832; d. Dresden, Mar. 13, 1897), was brought up to commerce, but his desire and talent for music were so strong, that in 1857 or 1858 he succeeded in getting rid of his business and put himself under Dr. F. Brendel and Riedel for regular instruction. He then for five years studied under Hauptmann at Leipzig, and was a teacher and composer at Dresden from 1867 until his death. His works are numerous, but they consist almost entirely of songs for one or more voices, and of small and more or less sentimental pieces for the pianoforte. He also wrote poetry and some dramatic pieces. G.

RAMEAU, JEAN PHILIPPE (b. Dijon, Oct. 23, 1683¹; d. Paris, Sept. 12, 1764), eminent composer and writer on the theory of music, born in the house of the former 'Cour de Saint-Vincent,' actually 5 and 7 rue Vaillant, and baptized in the Collegiate church of St. Étienne, Sept. 25, 1683. In this church his father, Jean² was organist. He held similar posts at the Cathedral, Sainte Bénigne and Notre-Dame, after the birth of his son. He intended Jean Philippe, the eldest of his three sons, to be a magistrate, but his strong vocation for music and obstinacy of character frustrated these views. According to his biographers he played the harpsichord at 7, and read at sight any piece of music put before him: music indeed absorbed him to such an extent when at the Jesuit College that he neglected his classical studies, and was altogether so refractory that his parents were requested to remove him. Henceforth he never opened a book, unless it were a musical treatise. He quickly mastered the harpsichord, and studied the organ and violin with success, but there was no master in Dijon capable of teaching him to write music, and he was left to discover for himself the laws of harmony and composition.

At the age of 17 he fell in love with a young

¹ Vol. I., 1880; vol. II. part I., 1887; vol. II. part II., 1894.

² The date of birth is taken from the composer's monument at Dijon: the first edition of this Dictionary gives the more usual date, Sept. 25, 1683.

³ His mother's name was Claudine de Martincourt.

widow in the neighbourhood, who indirectly did him good service, since the shame which he felt at the bad spelling of his letters drove him to write correctly. To break off this acquaintance his father sent him, in 1701, to Italy, where, however, he did not remain long, a mistake which, in after life, he regretted. He liked Milan, and indeed the attractions of such a centre of music must have been great. The story goes that he left with a theatrical manager whom he accompanied as first violin to Marseilles, Lyons, Nîmes, Montpellier and other places in the south of France. It is known that in 1702 he became temporary music-master at the Metropolitan church of Avignon, and in the same year he was organist at Clermont-Ferrand (until 1705). From his 'Premier Livre de pièces de clavecin' (Paris, 1706) we learn that he was then living in Paris, at a wig-maker's in the Vieille Rue du Temple, as Haydn did at Keller's, though without the disastrous results which followed that connexion. Meantime he was organist of the Jesuit convent in the Rue St. Jacques, and of the chapel of the Pères de la Merci. Up to 1708 he remained in Paris, but took his father's place at Notre Dame, Dijon, from 1709-14, in which year he was nominated organist at the Jacobins, Lyons, till 1715, when he again started for Clermont-Ferrand, becoming cathedral organist there, and composing his *Traité de l'harmonie*. It has been stated that his brother Claude resigned the post of organist there in his favour, but this is incorrect, his brother being then at Dijon.¹ In this secluded mountain town, with a harsh climate predisposing to indoor life, he had plenty of time for thought and study. The defects of his education drove him to find out everything for himself. From the works of Descartes, Mersenne, Zarlini and Kircher he gained some general knowledge of the science of sound, and taking the equal division of the monochord as the starting-point of his system of harmony, soon conceived the possibility of placing the theory of music on a sound basis. Henceforth he devoted all his energies to drawing up his *Traité de l'harmonie*, and as soon as that important work was finished he determined to go to Paris and publish it. His engagement with the Chapter of Clermont had, however, several years to run, and there was great opposition to his leaving, owing to the popularity of his improvisations on the organ, in which his theoretical studies, far from hampering his ideas, seemed to give them greater freshness and fertility.

Once free he started immediately for Paris,

¹ His younger brother, Claude (b. Dijon; d. Autun, May 20, 1781) a man of indomitable spirit, succeeded his father as organist at Dijon, and only left his native town in 1765, being engaged as organist at Autun Cathedral on Mar. 8, 1765 (*Bulletin de la Société française de Musicologie*, 1921, No. 6). His son Jean François, a gifted musician, but a dissipated man, is admirably portrayed by Diderot in his *Nouveaux de Rameau*. He published in 1766 a poem in five cantos called *Le Raméide*, followed in the same year by *La Nouvelle Raméide*, a parody by his schoolfellow Jacques Casotie. He is mentioned by Mercier in his *Tableau de Paris*.

and brought out his *Traité de l'harmonie* (Ballard, 1722, 4to, 432 pp.).² The work did not at first attract much attention among French musicians, and yet, as Fétis observes, it laid the foundation for a philosophical science of harmony. Rameau's style is prolix and obscure, often calculated rather to repel than attract the reader, and the very boldness and novelty of his theories excited surprise and provoked criticism. His discovery of the law of inversion in chords was a stroke of genius, and led to very important results, although in founding his system of harmony on the sounds of the common chord, with the addition of thirds above or thirds below, he put both himself and others on a wrong track. In the application of his principle to all the chords he found himself compelled to give up all idea of tonality, since, on the principles of tonality he could not make the thirds for the discords fall on the notes that his system required. Fétis justly accuses him of having abandoned the tonal successions and resolutions prescribed in the old treatises on harmony, accompaniment and composition and the rules for connecting the chords based on the ear for a fixed order of generation, attractive from its apparent regularity, but with the serious inconvenience of leaving each chord disconnected from the rest.

Having rejected the received rules for the succession and resolution of chords which were contrary to his system, Rameau perceived the necessity of formulating new ones, and drew up a method for composing a fundamental bass for every species of music. The principles he laid down for forming a bass different from the real bass of the music, and for verifying the right use of the chords, are arbitrary, insufficient in a large number of cases and, as regards many of the successions, contrary to the judgment of the ear. Finally, he did not perceive that by using the chord of the 6-5-3 both as a fundamental chord and an inversion he destroyed his whole system, as in the former case it is impossible to derive it from the third above or below.³ After more study, however, particularly on the subject of harmonics, Rameau gave up many of his earlier notions and corrected some of his most essential mistakes. The development and modification of his ideas may be seen by consulting his works, of which the following is a list: *Nouveau système de musique théorique . . . pour servir d'introduction au traité d'harmonie* (1726, 4to); *Génération harmonique*, etc. (1737, 8vo); *Démonstration du principe de l'harmonie* (1750, 8vo); *Nouvelles réflexions sur la démonstration du principe de l'harmonie* (1752, 8vo); *Extrait*

² The third part of this was translated into English fifteen years later with the title *Treatise of Music containing the Principles of Composition*. London, no date, 8vo, 180 pp.

³ Fétis has explained, detailed and refuted Rameau's system in his *Revue de l'histoire de l'harmonie*, which has been used by the writer, and to which he refers his readers.

d'une réponse de M. Rameau à M. Euler sur l'identité des octaves, etc. (1753, 8vo)—all published in Paris. To these specific works, all dealing with the science of harmony, should be added the *Dissertation sur les différentes méthodes d'accompagnement pour le clavecin ou pour l'orgue* (Paris, Boivin, 1732, 4to), and some articles which appeared in the *Mercur de France* and in the *Mémoires de Trévoux*.

The mere titles of these works are a proof of the research and invention which Rameau brought to bear on the theory of music; but what was most remarkable in his case is that he succeeded in lines which are generally opposed to each other, and throughout life occupied the first rank not only as a theorist, but as a player and composer. Just when his *Traité de l'harmonie* was beginning to attract attention he arranged to make music for the little pieces which his fellow-countryman, Alexis Piron, was writing for the Théâtre de la Foire, and accordingly, on Feb. 3, 1723, they produced 'L'Endriague,' in three acts, with dances, divertissements and 'grand airs,' as stated in the title. In Jan. 1724 he obtained the privilege of publishing his cantatas and various instrumental compositions, amongst others his 'Pièces de clavecin, avec une méthode pour la mécanique des doigts,' etc., republished as 'Pièces de clavecin, avec une table pour les agréments'¹ (Paris, 1731 and 1736, oblong folio).

As a favourite music-master Rameau's position and prospects now warranted his taking a wife, and on Feb. 25, 1726, he was united to Marie Louise Mangot, a good musician, with a pretty voice. The disparity of their ages was considerable, the bride being only 18, but her loving and gentle disposition made the marriage a very happy one.

A few days later, on Feb. 29, Rameau produced at the Théâtre de la Foire a one-act piece called 'L'Enrôlement d'Arlequin,' followed in the autumn by 'Le Faux Prodiges,' two acts, both written by Piron. Such small comic pieces as these were obviously composed, by a man of his age and attainments (he was now 42), solely with the view of gaining access to a stage of higher rank, but there was no hope of admission to the theatre of the Académie without a good libretto, and this it was as difficult for a beginner to obtain then as it is now. There is a remarkable letter, still extant, from Rameau to Houdar de Lamotte, dated Oct. 1727, asking him for a lyric tragedy, and assuring him that he was no novice, but one who had mastered the 'art of concealing his art.' The blind poet refused his request, but aid came from another quarter. La Popelinière, the *fermier général*, musician, poet and artist, whose houses in Paris and at

Passy were frequented by the most celebrated artists, French and foreign, had chosen Rameau as his clavichinist and conductor of the music at his fêtes, and before long placed at his disposal the organ in his chapel, his orchestra and his theatre. He did more, for through his influence Rameau obtained from Voltaire the lyric tragedy of 'Samson,' which he promptly set to music, though the performance was prohibited on the eve of its representation at the Académie—an exceptional stroke of ill-fortune.²

In 1727 a competition took place for the post of organist at the church of St. Paul, and Rameau was among the candidates. Marchand, then at the head of the organists in Paris, was naturally one of the examiners; and either from fear of being outshone by one whom he had formerly patronised, or for some other reason, he used his whole influence in favour of Daquin, who obtained the post.

In 1732 Rameau was organist at Sainte-Croix de la Bretonnerie and in 1736 at the church of the Jesuits' College. His first dramatic work of importance, for which the Abbé Pelleguin agreed to furnish a libretto, was 'Hippolyte et Aricie,' founded on Racine's *Phèdre*. The Abbé compelled Rameau to sign a bill for 500 livres as security in case the opera failed, but showed more sagacity and more heart than might have been expected from one

'Qui dînait de l'autel et soupait au théâtre,
Le matin catholique et le soir idolâtre.'

for he was so delighted with the music on its first performance at La Popelinière's that he tore up the bill at the end of the first act. The world in general was less enthusiastic, and after having overcome the ill-will or stupidity of the performers, Rameau had to encounter the astonishment of the crowd, the prejudices of routine and the jealousy of his brother artists. Campra alone recognised his genius, and it is to his honour that when questioned by the Prince de Conti on the subject he replied, 'There is stuff enough in "Hippolyte et Aricie" for ten operas; this man will eclipse us all.'

The opera was produced at the Académie de Musique on Oct. 1, 1733. Rameau was then turned 50 years of age, and the outcry with which his work was greeted suggested to him that he had possibly mistaken his career; for a time he contemplated retiring from the theatre, but was reassured by seeing his hearers gradually accustoming themselves to the novelties which at first shocked them. The success of 'Les Indes galantes' (Aug. 23, 1735), of 'Castor et Pollux,' his masterpiece (Oct. 24, 1737) and of 'Les Fêtes d'Hébé' (May 21, 1739), however, neither disarmed his critics, nor prevented Rousseau from making himself the mouthpiece of those who cried up Lully at the expense of the new composer. But Rameau was too well

¹ Both Fétis and Pouglin have fallen into the mistake of considering this a separate work.

² On the history of this work, see Eugène Imbert's *Symphonies* (1891), and for a résumé of the facts, see *Mus. T.*, 1898, p. 279 ff.

aware of the cost of success to be hurt by epigrams, especially when he found that he could count both on the applause of the multitude and the genuine appreciation of the more enlightened.

His industry was immense, as the following list of his operas and ballets produced at the Académie de Musique in twenty years will show:

<p>Dardanus, five acts and prologue (Oct. 19, 1739). Les Fêtes de Polymnie, three acts and prologue (Oct. 12, 1745). Le Temple de la Gloire, Fête in three acts and prologue (Feb. 1748). Zaïs, four acts and prologue (Feb. 26, 1748). Pyramion, one act (Aug. 27, 1748). Les Fêtes de l'Hymen et de l'Amour, three acts and prologue (Mar. 15, 1747). Platée, three acts and prologue (Feb. 4, 1749). (First performed Versailles, Mar. 31, 1745.)</p>	<p>Nais, three acts and prologue (Apr. 22, 1749). Zoroastre, five acts (Dec. 5, 1749). La Guirlande, ou les Fleurs enchantées, one act (Sept. 21, 1751). Acanie et Zéphire, three acts (Nov. 19, 1751). Les Surprises de l'Amour, three acts (July 12, 1757). (First performed Versailles, 1748.) Les Paladins, three acts (Feb. 12, 1760). Néée et Myrtilis, pastorale in one act. Abaris, ou les Boréades, 'tragédie,' in five acts.</p>
--	--

Besides these, Rameau found time to write diversissements for 'Les Courses de Tempé,' a pastoral (Théâtre-Français, Aug. 1734), and 'La Rose' (Théâtre de la Foire, Mar. 1744), both by Piron. From 1740-45 the director of the Opéra gave him no employment, and in this interval he published his 'Nouvelles Suites de pièces de clavecin' and his 'Pièces de clavecin en concert avec un violon ou une flûte' (1741), remarkable compositions which have been reprinted by Mme. Farrenc ('Le Trésor des pianistes') and Poiseot. He also accepted the post of conductor of the Opéra-Comique, of which Monnet¹ was manager, probably in the hope of attracting public attention and forcing the management of the Opéra to alter their treatment of him. Finally he composed for the Court 'Lysis et Délie,' 'Daphnis et Eglé,' 'Les Sybarites' (Oct. and Nov. 1753); 'La Naissance d'Osiris,' and 'Anacréon' (Oct. 1754), all given at Fontainebleau. Some years previously, on the occasion of the marriage of the Dauphin with the Infanta, he had composed 'La Princesse de Navarre' to a libretto of Voltaire (three acts and prologue, performed with great splendour at Versailles, Feb. 23, 1745). This was the most successful of all his *opéras de circonstance*, and the authors adapted from it 'Les Fêtes de Ramire,' a one-act opera-ballet, also performed at Versailles (Dec. 22, 1745).

In estimating Rameau's merits we cannot in justice compare him with the great Italian and German masters of the day, whose names and works were then equally unknown in France; we must measure him with contemporary French composers for the stage. These writers had no idea of art beyond attempting a servile copy of Lully, with overtures, recitatives, vocal pieces and ballet airs, all cast in one stereotyped form. Rameau made use of such a variety of means as not only attracted the attention of his hearers, but retained it. For the placid and

monotonous harmonies of the day, the trite modulation, insignificant accompaniments and stereotyped ritornelles, he substituted new forms, varied and piquant rhythms, ingenious harmonies, bold modulations and a richer and more effective orchestration. He even ventured on enharmonic changes, and instead of the time-honoured accompaniments with the strings in five parts and flutes and oboes in two, and with *tutti* in which the wind simply doubled the strings, he gave each instrument a distinct part of its own, and thus imparted life and colour to the whole. Without interrupting the other instruments, he introduced interesting and unexpected passages on the flutes, oboes and bassoons, and thus opened a path which has been followed up with ever-increasing success. He also gave importance to the orchestral pieces, introducing his operas with a well-constructed overture, instead of the meagre introduction of the period, in which the same phrases were repeated *ad nauseam*. (See ORCHESTRATION.) Nor did he neglect the chorus; he developed it, added greatly to its musical interest and introduced the syllabic style with considerable effect. Lastly, his ballet-music was so new in its rhythms, and so fresh and pleasing in melody, that it was at once adopted and copied in the theatres of Italy and Germany.

We have said enough to prove that Rameau was a composer of real invention and originality. His declamation was not always so just as that of Lully; his airs have not the same grace, and are occasionally marred by eccentricity and harshness and disfigured by roulades in doubtful taste; but when inspired by his subject Rameau found appropriate expression for all sentiments, whether simple or pathetic, passionate, dramatic or heroic. His best operas contain beauties which defy the caprices of fashion and will command the respect of true artists for all time.

But if his music was so good, how is it that it never attained the same popularity as that of Lully? In the first place, he took the wrong line on a most important point; and in the second, he was less favoured by circumstances than his predecessor. It was his doctrine that for a musician of genius all subjects are equally good, and hence he contented himself with uninteresting fables written in wretched style, instead of taking pains, as Lully did, to secure pieces constructed with skill and well verified. He used to say that he could set the *Gazette de Hollande* to music. Thus he damaged his own fame, for a French audience will not listen even to good music unless it is founded on an interesting drama.

Much as Rameau would have gained by the co-operation of another Quinault, instead of having to employ Cahusac, there was another reason for the greater popularity of Lully.

¹ See Monnet's *Supplément au roman comique*, p. 51. This fact seems to have escaped all Rameau's biographers.

Under Louis XIV, the King's patronage was quite sufficient to ensure the success of an artist; but after the Regency, under Louis XV., other authorities asserted themselves, especially the 'philosophes.' Rameau had first to encounter the vehement opposition of the Lullists; this he had succeeded in overcoming, when a company of Italian singers arrived in Paris, and at once obtained the attention of the public and the support of a powerful party. The partisans of French music rallied round Rameau, and the two factions carried on what is known as the 'Guerre des Bouffons,' but when the struggle was over, Rameau perceived that his victory was only an ephemeral one, and that his works would not maintain their position in the repertory of the Opéra beyond a few years. With a frankness very touching in a man of his gifts, he said one evening to the Abbé Arnaud, who had lately arrived in Paris, 'If I were twenty years younger I would go to Italy, and take Pergolesi for my model, abandon something of my harmony and devote myself to attaining truth of declamation, which should be the sole guide of musicians. But after sixty one cannot change; experience points plainly enough the best course, but the mind refuses to obey.' No critic could have stated the truth more plainly. Rameau never attained complete skill in writing for the voice; he is in consequence only the first French musician of his time, instead of taking his rank among the great composers of European fame. But for this, he might have effected that revolution in dramatic music which Gluck accomplished some years later.¹

But even as it was, his life's work is one of which any man might have been proud; and in old age he enjoyed privileges accorded only to talent of the first rank. The directors of the Opéra decreed him a pension; his appearance in his box was the signal for a general burst of applause, and at the last performance of 'Dardanus' (Nov. 9, 1760) he received a perfect ovation from the audience. At Dijon the Académie elected him a member in 1761, and the authorities exempted himself and his family for ever from the municipal taxes. The King had named him composer of his chamber music in 1745; his patent of nobility was registered, and he was on the point of receiving the order of St. Michel, when, already suffering from the infirmities of age, he took typhoid fever and died.² All France mourned for him; Paris

gave him a magnificent funeral, and in many other towns funeral services were held in his honour. Such marks of esteem are accorded only to the monarchs of art.

Having spoken of Rameau as a theorist and composer, we will now say a word about him as a man. If we are to believe Grimm and Diderot, he was hard, choleric and cruel, avaricious to a degree and the most ferocious of egotists. The evidence of these writers is, however, suspect; both disliked French music, and Diderot, as the friend and *collaborateur* of d'Alembert, would naturally be opposed to the man who had had the audacity to declare war against the Encyclopedists.³ It is right to say that, though he drew a vigorous and scathing portrait of the composer, he did not publish it.⁴ As to the charge of avarice, Rameau may have been fond of money, but he supported his sister Catherine⁵ during an illness of many years, and assisted more than one of his brother artists—such as Dauvergne and the organist Balbâtre. He was a vehement controversialist, and those whom he had offended would naturally say hard things of him. Tall, and thin almost to emaciation, his sharply marked features indicated great strength of character, while his eyes burned with the fire of genius. There was a decided resemblance between him and Voltaire, and painters have often placed their likenesses side by side. Amongst the best portraits of Rameau may be specified those of Benoit (after Restout), G. Dagoty, Masquelier and Carmonelle (full length); also a bust by J. J. Caffieri and a drawing of it engraved by Saint-Aubin.⁶ (See PLATE XLIV.) In the fine oil-painting in the Museum of Dijon (in which it is difficult to recognise Rameau), and a work by Chardin,⁷ he is represented seated, with his fingers on the strings of his violin, the instrument he generally used in composing. The bust which stood in the foyer of the Opéra was destroyed when the theatre was burnt down in 1781; that in the Paris Conservatoire is by Destreez (1865). A bronze statue by Guillaume was erected at Dijon in 1880.

Rameau had one son and two daughters, none of them musicians. He left in MS. four

¹ Rameau was asked to correct the articles on music for the *Encyclopédie*, but the MSs. were not submitted to him. He published in consequence *Erreurs sur la musique dans l'Encyclopédie* (1756); *Table des Erreurs*, etc. (1756). *Réponse de M. Rameau à M. M. les éditeurs de l'Encyclopédie sur leur Avertissement* (1757), *Lettre de M. d'Alenbert à M. Rameau, concernant le corps sonore*, avec la réponse de M. Rameau (undated, but apparently 1760)—all printed in Paris. He also wrote other theoretical works: *Nouveau Système de musique théorique*, . . . (1736); *Dissertation sur les différentes méthodes d'accompagnement pour le clavier* (1732); *Génération harmonique ou traité de musique harmonique*, . . . (1737); *Nouvelles Réflexions sur la démonstration au principe d'harmonie*, . . . (1752), etc.

² We refer to Diderot's violent attack on the morals and philosophic tendencies of the 18th century, entitled *Le Neveu de Rameau*. It is a curious fact that this brilliantly written dialogue was only known in France through a re-translation of Goethe's German version. The first French edition, by Saur, appeared in Paris only in 1821.

³ A good player on the harpsichord; she lived in Dijon, and died there, 1762.

⁴ *Jal. Dictionnaire critique de biographie et d'histoire* (2nd ed. Paris, 1878, p. 167).

⁵ *Revue de musicologie*, 1923, pp. 175-6; and L. de La Laurencie, *L'Ecole française de violon de Lully à Vieux*.

¹ 'Rameau,' writes L. de La Laurencie, 'may be considered as one of the ancestors of the modern orchestra, and doubtless as one of the precursors of the symphony. Such pieces as the overtures to "Zoroastre" and "Nais" rank him amongst those who opened the way to Haydn and Mozart. As for his dance airs, Diderot justly said of them, that they would last eternally. Above all, he is a great and profound musician, a complete artist; and it cannot be imputed to him that in his time the only field of action opened to composers was operatic production.'

In France, the growing taste for old music and the development of its practice have gradually replaced Rameau in the position he deserves to occupy. The work of divulgation undertaken by the *Schola Cantorum*, and the modern publication of his music, have greatly contributed to this result.

² In the Rue des Bons Enfants. He was buried at Saint-Eustache.

cantatas, three motets with chorus and fragments of an opera 'Roland,' all which are now in the Bibliothèque Nationale. None of his organ pieces have survived; and some cantatas, mentioned by the earlier biographers, besides two lyric tragedies, 'Abaris' and 'Linus,' and a comic opera, 'Le Procureur dupé,' are lost; but they would have added nothing to his fame.

See the March No., 1921, of the *Bulletin de la Société de Musicologie*, which contains several studies relative to the Rameau family.

DE LA LAURENCE, THÉROU); FERRAS LASSERRE, *L'Esprit de la musique française de Rameau à l'émancipation contemporaine* (Paris, 1817); PAUL-MARIE MASSON, *L'Opéra de Rameau* (in prep. 1826).

RAMIN, GÜNTHER (b. Karlsruhe, Oct. 15, 1898), organist and composer. At the age of 11 he entered the Thomasschule at Leipzig and in 1914 joined the Leipzig Conservatorium, where he studied the organ with Straube, piano with Teichmüller, theory and composition with Krehl. In 1918, when less than 20, he succeeded Straube as organist of the famous Thomaskirche at Leipzig, and in 1921 assumed the additional duties of organ-teacher at the Conservatorium. He is the most brilliant of Straube's many brilliant organ-pupils, and has already established a wide renown in Germany and other countries as one of the first organists of the day. His virtuosity is controlled by a fine taste and musicianship, and his gift of improvisation is in no way inferior to his remarkable powers of interpretation of the great masters. His compositions include organ pieces, a piano and violin sonata and a 4-part motet. Mention should also be made of his exquisite accompanying on the piano-forte, and of his skill as a choral conductor.

H. B.

RAMIREZ DE ARELLANO, ALONSO (18th cent.), Spanish composer, author of a 'Canon, Recte & Retro for 48 voices,' printed in London (by Welcker) in 1765. (B.M.; Liceo, Bologna.)

J. B. T.

RAMONDON, LEWIS, presumably a Frenchman, and at first a singer in the pre-Handelian Italian operas in London. He appeared in 'Arsinoë,' 1705; in 'Camilla,' 1706; and 'Pyrrhus and Demetrius,' 1709. He sometimes took Leveridge's parts in these operas, but about 1711 he ceased to be a public singer, and turned his talents to composition. He brought out the series called 'The Lady's Entertainment' in 1709, 1710, 1711 and 1738.

He arranged for the harpsichord the song-tunes in 'Camilla,' using, perhaps for the first time in music notation for this instrument, a five instead of a six-line stave, and giving as the reason—that the lessons being placed on five lines renders them proper for a violin and a base.' His vocal compositions were in high favour, and half a dozen or so may be seen in Walsh's 'Merry Musician, or a Cure for the Spleen,' vol. i., 1716; others are on the single song sheet of the period. A tune of his, 'All you that must take a leap in the dark,' attained some degree of popularity by being sung by Hacheath in the 'Beggars' Opera.' It is probable that he died about 1720, as his name does not appear after that date.

F. K.

RAMOS (RAMIS) DE PAREJA, BARTOLOMÉ (b. Baeza, c. 1440; d. ? Rome, after 1491; perhaps in 1521), a learned Spanish musician, who first propounded the theory of equal temperament. He lectured in Salamanca and then removed to Bologna, where he resided from 1480–82. He was living in Rome in 1491. His *Musica practica* was published at Bologna in 1482; a Latin version of a (hypothetical) Spanish original, said to have been written at Salamanca. It has been reprinted by Joh. Wolf (*Beiheft* 2, I.M.G., 1901).

Spanish musicians consider that Ramos de Pareja arrived at the theory of equal temperament from observing the practice of players on the GUITAR and VIHUELA (q.v.), in which the scales are formed of equal semitones and the frets are placed a semitone apart.

That this was the custom in Spain not long after Ramos de Pareja is shown by Juan BRUMUDO, who states in his *Declaracion de Instrumentos* (1st ed., 1549) that the frets must be placed so that from one to the other is a semitone, 'so that the semitone is formed of two frets, the tone of three.' Again, tuning (he says) is accomplished by getting two notes in unison on different strings, touching the lower string on the 5th fret while the upper one is sounded 'open'—as is the custom to-day. Clearly the system of tuning by equal semitones has been practised in Spain from very early times; and Ramos de Pareja's theory, which caused such astonishment, may have been merely a generalisation from familiar practice in his own country. Two motets and a Magnificat by him were printed by Eslava.

J. B. T.

RAMPOLLINI, MATTIO, of Florence, where he contributed songs to the wedding festivities of the Duke in 1539. He composed a book of canzone, words by Petrarca, published by Jacque Moderne¹; also songs in various collective volumes (E. Vogel; *Q.-L.*).

RAMSEY, ROBERT (1st half of 17th cent.), English organist and composer. He took his Mus.B. degree at Cambridge in 1616, and was

required to compose a 'Canticum' to be performed at St. Mary's Church. He was organist of Trinity College, Cambridge, 1628-44, and master of the children there, 1637-44.¹ B.M. Add. MSS. 11,608/26 contains a song by Ramsey, 'Wnat teares, deere Prince,' apparently written on the occasion of the death of Henry, Prince of Wales (1612). Three madrigals by him, 'Wilt thou, unkind, now leave me' (a 6), 'O how fortunate they' (a 5) and 'Since no desert can move thee,' are also in the British Museum (the first is Add. MSS. 17,786-91, and the treble, basses and quintus parts of the 2nd and 3rd in Add. MSS. 29,366-8). The British Museum also contains (Harl. 7337) 3 canons, 'Hast thee, O Lord' (3 in 1), 'Music devine' (3 in 1) and 'She weepeth sore in ye night' (4 in 1), by Ramsey; but Hilton elsewhere attributes the first to Thomas Ford, and the third to William Lawes. A dialogue between Saul, the witch of Endor, and 'Samuell's ghost,' beginning, 'In guiltie night' (and later set by Purcell), was also set by Ramsey, and is in B.M. Add. MSS. 11,608/23b, score; and Add. MSS. 29,396/113, single part and words only. Besides the following list the words of an anthem are given in Clifford's 'Collection' (1663), while Davey (*Hist. Eng. Mus.*) refers to an autograph copy of some services and anthems at Anderson's College, Glasgow.

RANDALL, JOHN, Mus.D. (b. 1715; d. Cambridge, Mar. 18, 1799), was a chorister of the Chapel Royal under Bernard Gates. He was one of the boys who shared in the representation of Handel's 'Esther' at Gates's house, Feb. 23, 1732, he himself taking the part of Esther. He graduated as Mus.B. at Cambridge in 1744, his exercise being an anthem. In 1743 he was appointed organist of King's College, and on the death of Dr. Greene in 1755 was elected professor of music at Cambridge. In 1756 he proceeded Mus.D. He composed the music for Gray's Ode for the Installation of the Duke of Grafton as Chancellor of the University in July 1767, and some church

music. He was organist of Trinity College in 1777. Two fine hymn tunes attributed to him are reprinted in the 'English Hymnal' (Nos. 93 and 250). W. H. H., addn.

RANDALL, (1) P., a London music-seller and publisher, who had a shop at the sign of 'Ye Viol and Lute,' at Paul's Grave, without Temple Bar, in 1707, and for some years later. He may have been related, by marriage, to John Walsh, senior, the great music-publisher of this period. Before 1710 he was a partner with Walsh, and had abandoned his own place of business for Walsh's address in Katherine Street, Strand. His name, in conjunction with Walsh's, appears on many imprints of Walsh's publications. Later issues of these publications have Randall's name erased, and before 1720 his name entirely disappears from them.

(2) WILLIAM (d. circa 1780), is presumed to be a son of the preceding. At the death of John Walsh, junior, Jan. 15, 1766, William Randall succeeded to the extensive business in Katherine Street, and shortly afterwards was for a couple of years or less in partnership with a person named Abell. Randall & Abell issued in large folio in 1768 what is practically the first complete edition of the 'Messiah,' as well as some minor issues. Randall was in business alone in 1771, and besides reprinting the Walsh publications, he published many interesting works. One of these was a reissue in 1771 of Morley's *Plaine and Easie Introduction*. Collections of Vauxhall or other songs came forth, country dances, and the like. William Randall died about 1780, and his widow, Elizabeth, carried on the business until it was taken over, about 1783, by Wright & Wilkinson, who made a great business almost solely by reprinting Handel's works from the original plates. F. K.

RANDEGGER, ALBERTO (b. Trieste, Apr. 13, 1832; d. London, Dec. 18, 1911), composer, conductor and singing-master. He began the study of music at the age of 13, under Lafont for the PF. and L. Ricci for composition, soon began to write, and by the year 1852 was known as the composer of several masses and smaller pieces of church music, and of two ballets, both produced at the Teatro Grande of his native town. In the latter year he joined three other of Ricci's pupils in the composition of a buffo opera to a libretto by Gaetano Rossi, entitled 'Il lazzarone,' which had much success, first at the Teatro Mauroner at Trieste, and then elsewhere. In the next two years he was occupied as musical director of theatres at Fiume, Zara, Sinigaglia, Broscia and Venice. In the winter of 1854 he brought out a tragic opera in four acts, called 'Bianca Capello,' at the chief theatre of Brescia. At this time he was induced to come to London, where he became widely known as a teacher of singing, conductor and composer. In 1864 he

¹ Davey, *Hist. Eng. Mus.*, refers to him as holding this latter post in 1691.

produced at the Theatre Royal, Leeds, 'The Rival Beauties,' a comic operetta in two acts. In 1868 he became professor of singing at the R.A.M., and was made an honorary member and director of that institution and a member of the Committee of Management. He was also a professor of singing at the R.C.M. and on the Board of Professors there. In the autumn of 1857 he conducted a series of Italian operas at St. James's Theatre; in 1879-85 for the Carl Rosa Company, and for Harris at Drury Lane and Covent Garden in 1887-98. He conducted the Queen's Hall Choral Society in 1895-97, and also the first two seasons of symphony concerts at QUEEN'S HALL (*q.v.*); but his most important position of this kind was the conductorship of the Norwich Festival, which he held from 1881-1905 inclusive.

Randegger's published works comprise a dramatic cantata (words by Mme. Rudersdorff), entitled 'Fridolin,' composed for the Birmingham Festival, and produced there, Aug. 28, 1873; the 150th Psalm, for soprano, solo, chorus, orchestra and organ, for the Boston Festival, 1872; Funeral Anthem for the death of the Prince Consort; a scena, 'The Prayer of Nature,' sung by Edward Lloyd at a Philharmonic concert in 1887; and a large number of songs and concerted vocal music for voice and orchestra or PF. He wrote the *Primer of Singing* in Novello's series. (See the *Mus. T.* for 1899, p. 653 ff.) *G.*, rev. with addns.

RANDHARTINGER, BENEDICT (*b.* Ruprechtshofen, Lower Austria, July 27, 1802; *d.* Vienna, Dec. 22, 1893), an Austrian musician, memorable for his connexion with Schubert. At 10 years old he came to the Convict school at Vienna, and was then a pupil of Salieri's. He afterwards studied for the law, and for ten years was secretary to Count Széchenyi, an official about the court. But he forsook this line of life for music; in 1832 entered the court chapel as a tenor singer; in 1844 became vice-court-Kapellmeister, and in 1862, after Assmayer's death, entered on the full enjoyment of that dignity. His compositions are more than 600 in number, comprising an opera, 'König Enzo'; 20 masses; 60 motets; symphonies; quartets, etc.; 400 songs, 76 4-part songs, etc. Of all these, 124, chiefly songs, are published; also a volume of Greek national songs, and a volume of Greek liturgies.

His acquaintance with Schubert probably began at the Convict, and at Salieri's; though as he was Schubert's junior by five years, they can have been there together only for a short time; but there are many slight traces of the existence of a close friendship between them. He was present, for example, at the first trial of the D minor string quartet (Jan. 29, 1826), and he was one of the very few friends who visited Schubert in the terrible loneliness of his last illness. But for Randhartinger it's almost

certain that Schubert's 'Schöne Müllerin' would never have existed. He was called out of his room while Schubert was paying him a visit, and on his return found that his friend had disappeared with a volume of Müller's poems which he had accidentally looked into while waiting, and had been so much interested in as to carry off. On his going the next day to reclaim the book, Schubert presented him with some of the now well-known songs, which he had composed during the night. This was in 1823. It is surely enough to entitle Randhartinger to a perpetual memory.

He had a brother JOSEF, of whom nothing is known beyond this—that he was probably one of the immediate entourage of Beethoven's coffin at the funeral. He, Lachner and Schubert are said to have gone together as torch-bearers (Kreissle von Hellborn's *Schubert*, p. 266). *G.*

RANDLES, ELIZABETH (*b.* Wrexham, Aug. 1, 1800; *d.* Liverpool, 1829), an extraordinary infant musical prodigy and performer on the pianoforte. She played in public before she was fully 2 years of age. Her father, a blind harper and organist of Wrexham, of some degree of local fame (1760-1820), placed her under John Parry the harper, and afterwards took her on tour to London, where she attracted much attention, and was made a pet of by the royal family. A second visit to London was undertaken in 1808, and a concert for her benefit given in the Hanover Square rooms. At this Madame Catalani and other singers and instrumentalists gave their gratuitous services, Sir George Smart conducting. She settled in Liverpool as a music teacher about 1818. *F. K.*

RANELAGH HOUSE AND GARDENS were situated on the bank of the Thames, eastward of Chelsea Hospital. They were erected and laid out about 1690 by Richard Jones, Viscount (afterwards Earl of) Ranelagh, who resided there until his death in 1712. In 1733 the property was sold in lots, and eventually the house and part of the gardens came into the hands of a number of persons who converted them into a place of public entertainment. In 1741 they began the erection of a spacious Rotunda (185 feet external, and 150 feet internal diameter), with four entrances through porticoes. Surrounding it was an arcade, and over that a covered gallery, above which were the windows, sixty in number. In the centre of the interior and supporting the roof was a square erection containing the orchestra, as well as fireplaces of peculiar construction for warming the building in winter. Forty-seven boxes, each to contain eight persons, were placed round the building, and in these the company partook of tea and coffee. In the garden was a Chinese building, and a canal upon which the visitors were rowed about

in boats. Ranelagh was opened with a public breakfast, Apr. 5, 1742. The admission was 2s. including breakfast. On May 24 following it was opened for evening concerts; Beard was the principal singer, Festing the leader, and the choruses were chiefly from oratorios. Twice a week *ridottos* were given, the tickets for which were £1:1s. each, including supper. Masquerades were shortly afterwards introduced, and the place soon became the favourite resort of the world of fashion. Ranelagh was afterwards opened about the end of Feb. for breakfasts, and on Easter Monday for the evening entertainments. On Apr. 10, 1746, a new organ by Byfield was opened at a public morning rehearsal of the music for the season, and Parry, the celebrated Welsh harper, appeared. In 1749, in honour of the Peace of Aix-la-Chapelle, an entertainment called 'A Jubilee Masquerade in the Venetian manner,' was given, of which Horace Walpole, in a letter to Sir Horace Mann, dated May 3, 1749, gives a lively description.

This proved so attractive that it was repeated several times in that and succeeding years, until the suppression of such entertainments in 1755. In 1751 morning concerts were given twice a week, Signora Frasi and Beard being the singers. At that date it had lost none of its charm. 'You cannot conceive,' says Mrs. Ellison, in Fielding's *Amelia*, 'what a sweet elegant delicious place it is. Paradise itself can hardly be equal to it.' In 1754 an entertainment of singing, recitation, etc. was given under the name of 'Comus's Court,' which was very successful. In 1755 a pastoral, the words from Shakespeare, the music by Arne, was produced; Beard and Miss Young were the singers; Handel's 'L' Allegro ed Il Penseroso' was introduced on Beard's benefit night, and Stanley was the organist. In 1759 Bonnell Thornton's burlesque 'Ode on St. Cecilia's Day' was performed with great success. In 1762 Tenducci was the principal male singer. In 1764 a new orchestra was erected in one of the porticos of the rotunda, the original one being found inconvenient from its height. On June 29, 1764, Mozart, then 8 years old, performed on the harpsichord and organ several pieces of his own composition for the benefit of a charity. In 1770 Burney was the organist. Fireworks were occasionally exhibited, when the price of admission was raised to 5s. In 1777 the fashionable world played one of its strange, unreasoning freaks at Ranelagh. Walpole wrote on June 18:

'It is the fashion now to go to Ranelagh two hours after it is over. You may not believe this, but it is literal. The music ends at ten, the company go at twelve.'

This practice caused the concert to be started at a later hour than before. In 1790 a representation of Mount Etna in eruption, with the

Cyclops at work in the centre of the mountain, and the lava pouring down its side, was exhibited. The mountain was 80 feet high. In 1793 the Chevalier d'Éon fenced in public with a French professor, and about the same time regattas on the Thames in connexion with the place were established. In 1802 the Installation Ball of the Knights of the Bath was given at Ranelagh, and also a magnificent entertainment by the Spanish ambassador. These were the last occurrences of any importance; the fortunes of the place had long been languishing, and it opened for the last time July 8, 1803. On Sept. 30, 1805, the proprietors gave directions for taking down the house and rotunda; the furniture was soon after sold by auction, and the buildings removed. The organ was placed in Tetbury Church, Gloucestershire. No traces of Ranelagh remain; the site now forms part of Chelsea Hospital garden. W. H. H.

RANK. A rank of organ-pipes is one complete series or set, of the same quality of tone and kind of construction from the largest to the smallest, controlled by one draw-stop, acting on one slider. If the combined movement of draw-stop and slider admits air to two or more such series of pipes, an organ-stop is said to be of two or more ranks, as the case may be. Occasionally the twelfth and fifteenth, or fifteenth and twenty-second, are thus united, forming a stop of two ranks; but, as a rule, only those stops whose tones are reinforcements of some of the higher upper-partials of the ground-tone are made to consist of several ranks, such as the Sesquialtera, Mixture, Furniture, etc. These stops have usually from three to five ranks each, reinforcing (according to their special disposition) the ground-tone by the addition of its 17th, 19th, 22nd, 24th, 26th, 29th—that is, of its 3rd, 5th and 8th in the third and fourth octave above. (See SESQUIALTERA; MIXTURE.) J. S.

RANSFORD, (1) EDWIN (b. Bourton-on-the-Water, Gloucestershire, Mar. 13, 1805; d. London, July 11, 1876), baritone singer, song-writer and composer. He first appeared on the stage as an 'extra' in the opera-chorus at the King's Theatre, Haymarket, and was afterwards engaged in that of Covent Garden Theatre. During Charles Kemble's management of that theatre he made his first appearance as Don Caesar in 'The Castle of Andalusia,' on May 27, 1829, and was engaged soon afterwards by Arnold for the English Opera-House (now the Lyceum). In the autumn of 1829, and in 1830, he was at Covent Garden. In 1831 he played leading characters under Elliston at the Surrey Theatre, and became a general favourite. In 1832 he was with Joe Grimaldi at Sadler's Wells, playing Tom Truck in Campbell's nautical drama 'The Battle of Trafalgar,' in which he made a great hit with

Neukomm's song 'The Sea.' At this theatre he sustained the part of Captain Cannonade in Barnett's opera 'The Pet of the Petticoats.' He afterwards fulfilled important engagements at Drury Lane, the Lyceum and Covent Garden. At Covent Garden he played the Doge of Venice in 'Othello,' Mar. 25, 1833, when Edmund Kean last appeared on the stage, and Sir Harry in *The School for Scandal* on Charles Kemble's last appearance as Charles Surface. His final theatrical engagement was with Macready at Covent Garden in 1837-38. He wrote the words of many songs, his best being perhaps 'In the days when we went gipsying.' In later years his entertainments, 'Gipsy Life,' 'Tales of the Sea' and 'Songs of Dibdin,' etc., became deservedly popular. As a genial *bon camarade* he was universally liked. He was also a music-seller and publisher, and during the 'forties and 'fifties issued a great number of the popular songs of the day. His shop was in Charles Street, Soho, but in 1850 he moved to 461 Oxford Street.

In 1869 he went into partnership with his son, (2) WILLIAM EDWIN (*d.* Sept. 21, 1890), at 2 Princes Street, Cavendish Square. The son, who continued the business after his father's death, was a tenor vocalist of ability.

W. H.; addns. F. K.

RANTZAU, I, opera in 4 acts; text by G. Targioni-Tozzetti and G. Menasci; music by Mascagni. Produced Pergola, Florence, Nov. 10, 1892; Covent Garden, July 7, 1893.

RANZ DES VACHES (*Kuhreihen, Kuhreigen*; Appenzell patois *Chuerreika*), a strain of an irregular description, which in some parts of Switzerland is sung or blown on the Alpine horn in June, to call the cattle from the valleys to the higher pastures. Several derivations have been suggested for the words *ranz* and *reihen* or *reigen*. *Ranz* has been translated by the English 'rant,' and the French 'rondeau,' and has been derived from the Gaelic root *riunne* or *raun*, which may also be the derivation of *reihen*, in which case both words would mean the 'procession or march of the cows.' Stalder (*Schweizerisches Idiotikon*) thinks that *reihen* means 'to reach,' or 'fetch,' while other authorities say that the word is the same as *reigen* (a dance accompanied by singing), and derive *ranz* from the Swiss patois 'ranner,' to rejoice.

The Ranz des Vaches are very numerous, and differ both in music and words in the different cantons. They are extremely irregular in character, full of long cadences and abrupt changes of tempo. It is a curious fact that they are seldom strictly in tune, more particularly when played on the Alpine horn, an instrument in which, like the BAGPIPE, the note represented by F is really an extra note between F and F \sharp . This note is very characteristic of the Ranz des

Vaches; passages like the following being repeated and varied almost *ad infinitum*.

The most celebrated Ranz des Vaches is that of Appenzell, a copy of which is said to have been sent to our Queen Anne, with whom it was a great favourite. The first work in which it was printed is Georg Rhau's *Bicinia* (Wittenberg, 1545). It is also to be found in a dissertation on Nostalgia in Zwinger's *Fasciculus dissertationum medicarum* (Basle, 1710). Rousseau printed a version in his *Dictionnaire de musique*, which Laborde arranged for four voices in his *Essai sur la musique*.¹ It was used by Grétry in his overture to 'Guillaume Tell,' and by Adam in his *Méthode de piano du Conservatoire*. It has been also arranged by Webbe, Weigl, Rossini ('Guillaume Tell') and Meyerbeer. W. B. S.

RAOUL, JEAN MARIE (*b.* Paris, c. 1766; *d.* there, 1837), a government official and an excellent violoncellist. He composed sonatas, studies, solos and a tutor for the violoncello. Having acquired the famous *Duifloppugrar* viola da gamba (now in Brussels Conservatoire Museum) he decided, c. 1810, to revive that instrument, and had a 7-stringed gamba of a modified model constructed by Vuilleaume, which figured in the exhibition of that year under the name of 'Heptacorde.' He contributed a *Notice sur l'heptacorde* to the *Annales de la littérature*, etc., which appeared also as a pamphlet. E. V. D. S.

RAPPOLDI, EDUARD (*b.* Vienna, Feb. 21, 1831; *d.* Dresden, May 16, 1903), made his first appearance in his 7th year as violinist, pianist and composer. His talent for the pianoforte was so great as to induce the Countess Banffy to put him under Mittag, Thalberg's teacher. But the violin was the instrument of his choice, and he succeeded in studying it under Jansa, who induced him to go to London in 1850. Here he made no recorded appearance. On his return to Vienna he was so far provided for by the liberality of the same lady, that he became a pupil of the Conservatorium under Hellmesberger from 1851-54. He then put himself

¹ There is a curious analogy between the above and the following strain, which was sung with infinite variations in the agricultural districts near London to frighten away the birds from the seed. In both passages the F is more nearly F \sharp .

² Other examples and descriptions will be found in the following works: Cappellet's *Pilati Mendicanti historia* (1787); Stolburg's *Reise in Deutschland, der Schweiz, etc.* (1784); Ebel's *Schilderung der Gebräusdichter der Schweiz* (1798); Bismund von Wagner's *Acht Schweizer Kuhreihen* (1800); the article on Viols in the *Grand dictionnaire philosophique* (An 8); Casteleian's *Considérations sur la nostalgie* (1806); Edward Jones's *Musical Overtures* (1811); *Recueil de ren des vaches et de chansons nationales suisses*, 3rd edition, Bern, 1818; also Tarenna's *Sammlung von Schweizer Kuhreihen und Volksliedern* (1818). Huber's *Recueil de ranz des vaches* (1830); and Tobler's *Appenzellerische Sprachschätze* (1887).

under Böhm, and shortly began to travel, and to be spoken of as a promising player. The first real step in his career was conducting a concert of Joachim's at Rotterdam in 1866, where he had been Konzertmeister since 1861. At the end of that year he went to Lübeck as Kapellmeister, in 1867 to Stettin in the same capacity, and in 1869 to the Landestheater at Prague. During this time he was working hard at the violin, and also studying composition with Sechter and Hiller. From 1871-77 he was a colleague of Joachim at the Hochschule at Berlin—where he proved himself a first-rate teacher—and became a member of the JOACHIM QUARTET (*q.v.*). In 1876 he was made Royal Professor, and in 1877 became joint Konzertmeister with Lauterbach at the Dresden opera, and chief teacher in the Conservatorium there. He retired in 1898, after which time he only taught a few favoured pupils. Though a virtuoso of the first rank, he followed in the footsteps of Joachim by sacrificing display to the finer interpretation of the music, and succeeded in infusing a new spirit into chamber music at Dresden. He composed symphonies, quartets, sonatas and songs, some of which have been printed. They are distinguished for earnestness, and for great beauty of form, and a quartet was performed in Dresden in the winter of 1878 which aroused quite an unusual sensation. In 1874 Rappoldi married Laura KAHRER (*q.v.*). G.

RASELIUS, ANDREAS (*b.* Hahnbach, near Amberg, Upper Palatinate, between 1562 and 1564; *d.* Heidelberg, Jan. 6, 1602), son of a Lutheran preacher, who had studied at Wittenberg under Melancthon, and whose original name, Rassel, Melancthon latinised into Raselius. From 1581-84 Andreas attended the then Lutheran University of Heidelberg, taking his degree as Magister Artium in the latter year. In the same year he was appointed cantor and teacher at the Gymnasium of Ratisbon, then conducted under Lutheran auspices. In his capacity as cantor he published in 1589 a musical instruction book with the title *Hexachordum seu Quaestiones musicae practicae sex capitibus comprehensae*, which was still in use at Ratisbon in 1664. In 1599 appeared his 'Regenspurgischer Kirchen-Contrapunkt,' which contains simple settings *a 5* of 51 of the older Lutheran psalm tunes and Chorals. The full title describes them as set so that the congregation may easily sing the Choral tune while the trained choir provide the harmonies. The Choral tune is in the upper part, but the harmonies are not always mere note-for-note counterpoint as in a modern hymn tune. A few specimens of these settings are given in Schöberlein's *Schatz*. Other published works of Raselius are 'Teutsche Sprüche aus den sonntäglichen Evangelia . . .,' 53 German motets *a 5* (Nuremberg, 1594), and 'Neue Teutsche Sprüche auf die . . . Fest und

Aposteltage . . .,' 22 motets *a 5-9*, described as composed on the 12 modes of the Dodecachordon (Nuremberg, 1596). Besides these published works there remain in MS. several collections of Latin and German motets and Magnificats by Raselius. He is also known as the author of a historical work, a chronicle of Ratisbon, originally written both in Latin and German, of which only the German edition survives. Raselius remained at Ratisbon till 1600, when he received a pressing invitation from the Elector Palatine Frederick IV. to return to Heidelberg as Hofkapellmeister. This higher post of honour he held till his death in 1602. A monograph on Raselius by J. Auer, of Amberg, appeared as a Beilage to Eitner's *Monatshefte* of 1892. J. R. M.

RASI, FRANCESCO (*b.* Arezzo, late 16th cent.), of a Tuscan noble family, singer, poet and composer; pupil of Caccini. From the end of the 16th century to 1620 he was at the court of Mantua. He composed 'Musica di camera e di chiesa,' dedicated to the Archbishop of Salzburg (1612); also madrigals, songs, dialogues (1608, 1610, 1620). (Particulars in *Q.-L.* and *Mendel*.)

RASOUMOWSKY,¹ ANDREAS KYRILLOVITSCH (*b.* Oct. 22, 1752), a Russian nobleman to whom Beethoven dedicated the 'Rasoumowsky quartets' (op. 59). He was the son of Kyrill Rasum, a peasant of Lemeschi, a village in the Ukraine, who, with his elder brother, was made a Count (Graf) by the Empress Elisabeth of Russia. Andreas served in the English and Russian navies, rose to the rank of admiral, and was Russian ambassador at Venice, Naples, Copenhagen, Stockholm and Vienna. In England his name must have been familiar, or Foote would hardly have introduced it as he has in *The Liar* (1762). At Vienna he married, in 1788, Elisabeth, Countess of Thun, one of the 'three Graces,' elder sister of the Princess Carl Lichnowsky (see LICHNOWSKY); and on Mar. 25, 1792, had his audience from the Emperor of Austria as Russian ambassador, a post which he held with short intervals for more than twenty years. He was a thorough musician, an excellent player of Haydn's quartets, in which he took second violin, not improbably studying them under Haydn himself. That, with his connexion with Lichnowsky, he must have known Beethoven is obvious; but no direct trace of the acquaintance is found until May 26, 1806 (six weeks after the withdrawal of 'Fidelio'), which Beethoven—in his usual polyglot—has marked on the first page of the quartet in F of op. 59, as the date on which he began it—'Quartetto angefangen am 26ten May 1806.'

In 1808 the Count formed his famous quartet party—Schuppanzigh, first violin; Weiss,

¹ Rasoumowsky and Rasoumofsky are forms used by Beethoven in various dedications.

viola; Lincke, violoncello; and he himself second violin—which for many years met in the evenings and performed, among other compositions, Beethoven's pieces, 'hot from the fire,' under his own immediate instructions.

In Apr. 1809 appeared the C minor and 'Pastoral' symphonies (Nos. 5 and 6), with a dedication (on the parts) to Prince Lobkowitz and 'son excellence Monsieur le Comte de Rasumoffsky' (Breitkopf & Härtel). These dedications doubtless imply that Beethoven was largely the recipient of the Count's bounty, but there is no direct evidence of it, and there is a strange absence of reference to the Count in Beethoven's letters. His name is mentioned only once—July 24, 1813—and there is a distant allusion in a letter of a much later date (Nohl, *Briefe B.*, 1865, No. 354). In the autumn of 1814 came the Vienna Congress (Nov. 1, 1814–June 9, 1815), and as the Empress of Russia was in Vienna at the time, the Ambassador's Palace was naturally the scene of special festivities. It was not, however, there that Beethoven was presented to the Empress, but at the Archduke Rodolph's.¹ The Count's hospitalities were immense, and, vast as was his palace, a separate wooden annexe had to be constructed capable of dining 700 persons.

On June 3, 1815, six days before the signature of the final Act of the Congress, the Count was made Prince (Fürst), and on the 31st of the following December the dining-hall just mentioned was burnt down. The Emperor of Russia gave 400,000 silver roubles (£40,000) towards the rebuilding, but the misfortune appears to have been too much for the Prince; he soon after sold the property, pensioned his quartet, and disappears from musical history. The quartet kept together for many years after this date, Sina playing second violin. Beethoven mentions them apropos of the Galitzin quartets in the letter to his nephew already referred to, about 1825.

A. W. T.

RATAPLAN, like Rub-a-dub, is an imitative word for the sound of the drum, as Tan-ta-ra is for that of the trumpet, and Tootle-tootle for the flute.² It is hardly necessary to mention its introduction by Donizetti in the 'Fille du régiment,' or by Meyerbeer in the 'Huguenots'; and every Londoner is familiar with it in Sergeant Buncer's part in Sullivan's 'Cox and Box.' 'Rataplan, der kleine Tambour' is the title of a Singspiel by Pillwitz, which was produced at Bremen in 1831, and had a considerable run both in north and south Germany between that year and 1836.

G.

RATTI, (1) BARTOLOMEO (called 'il Moro') (b. Padua, 1593), second (afterwards first) maestro di cappella of S. Antoniana, Padua. He composed church motets and psalms, and

¹ Schindler, I. 223 (quoted by Thayer, II. 321).

² Other forms are Pataplatan, Palialalan, Bumberumbumbum. See 'Le Dictionnaire encyclopédique de Sachs & Villetta.'

3 books of secular madrigals and canzonets. (2) LORENZO, of Perugia, maestro di cappella at the German College, Rome, 1628; S. Loretto, 1630. He composed motets and other church music between 1615 and 1632 (Q.-L.; *Fétis*).

RAUGEL, FÉLIX (b. Saint-Quentin, Nov. 27, 1881), conductor and musician. He was a pupil of Henri Libert in Paris, and, at the Schola Cantorum, of Albert Roussel, Decaux and Vincent d'Indy. He founded in 1908 La Société G. F. Haendel, which he directed from 1908–14. He has been maître de chapelle at the church of St. Eustache since 1911 and conductor of the Chorale Française, founded in 1922. His chief publications are:

Les Orgues de l'Abbaye de Saint-Mihiel (1919, Hârtel); *Recherches sur quelques maîtres de l'ancienne facture française (Héracle)*; *Les Organistes* (1923, L'aurore); *Les Grandes Orgues des églises de Paris*; *Les Anciennes Orgues de Saint-et-Oise (Finckbacher)*; *Handel Encyclopédie Delagrave*; *Palatrana (Laurin)*.

RAUPACH, (1) CHRISTOPH (b. Toudern, Silesia, July 5, 1686), an excellent organist and writer on music at Hamburg in 1701. From May 1, 1703, he was organist of St. Nicolas, Stralsund. (2) HERMANN FRIEDRICH (b. Stralsund, c. 1726), son and pupil of Christoph, went to Russia, c. 1756, as conductor of the Imperial Opera, and produced several operas of his composition. He settled afterwards at Paris, where he brought out 6 sonatas for pianoforte with violin, c. 1776.

R. v. d. s.

RAUZZINI, (1) VENANZIO (b. Rome, 1747; d. Bath, Apr. 8, 1810), made his début at Rome in 1765, captivating his audience by his fine voice, clever acting and prepossessing appearance. In 1766 or 1767 he was at Munich, where Burney heard him in 1772, and where four of his operas were performed. He sang at various places during this period. In London he made his first appearance in 1774, in Corri's 'Alessandro nell' Indie.' His appearance in a pasticcio of 'Armida' in the same year has resulted in the attribution to him of an opera of that name dated 1778.³ He distinguished himself as an excellent teacher of singing, Miss Storace, Braham, Miss Poole (afterwards Mrs. Dickens) and Inledon being among his pupils. In 1778 and 1779 he gave subscription concerts with the violinist Lamotte, when they were assisted by such eminent artists as Miss Harrop, Signor Rovedino, Fischer, Cervetto, Stamitz, Decamp and Clementi. He also gave brilliant concerts in the new Assembly Rooms (built 1771) at Bath, where he took up his abode on leaving London. Here he invited Haydn and Dr. Burney to visit him in 1794. On this occasion Haydn wrote a four-part canon (or more strictly a round) to an epitaph on a favourite dog buried in Rauzzini's garden (see HAYDN). Rauzzini's operas performed in London were 'Piramo e Tisbe' (Mar. 16, 1775, and afterwards in Vienna), 'Le ali d' Amore'

³ The error was copied into many dictionaries from the first edition of this work.

(Feb. 27, 1776); 'Creusa in Delfo' (1783); 'La regina di Golconda' (1784); and 'La Vestale' (1787). 'L'eroe cinese,' originally given at Munich in 1771, was performed in London in 1782.¹ He composed string quartets, sonatas for P.F., Italian arias and duets, and English songs; also a Requiem produced at the little Haymarket Theatre in 1801, by Dr. Arnold and Salomon. A miniature by J. Hutchinson (monochrome) is in the Victoria Museum at Bath. His brother,

(2) MATTEO (b. Rome, 1754; d. 1791) made his first appearance at Munich in 1772, followed his brother to England, and settled in Dublin, where he produced an opera, 'Il rè pastore,' in 1784. He had written 'Le finite gemelli' for Munich in 1772 and 'L'opera nuova' for Venice in 1781. He employed himself in teaching singing.

c. F. P., with addngs.

RAVAL, SEBASTIAN (fl. 1580-1603), Spanish madrigalist who lived in Italy and set Italian words instead of Spanish. He was a knight of the order of St. John of Jerusalem, and served various patrons: firstly, Marcantonio Colonna, the victor of Lepanto (1573) and Viceroy of Sicily, 1577-82. Then, after some years with Cardinal Ascanio Colonna, he went to Urbino, where he is described as being among the *magnifici virtuosi* at the ducal court of Francesco Maria II. At the end of 1592 he was in Rome, under the protection of Cardinal Alessandro Peretti (Jan. 15, 1593) and (May 10, 1593) of Marcantonio Colonna, nephew and namesake of his former patron. In the palace of this Roman patrician he extemporised counterpoints before a number of musicians, among whom was MARENZIO; and encouraged by their praises he published in one year three sets of madrigals. However, his boasting led to the intervention of Giov. Maria NANINO and Francesco SORIANO, who challenged him to a contest and ignominiously routed him. In the next year (1594) he appropriately published a set of Lamentations; but remained in Rome till after 1598, when, through the Duke of Maqueda (a Spaniard like himself), he obtained the post of maestro at Palermo. Here (in 1600) his boastfulness had the same consequences as in Rome. He was challenged by a Calabrian musician, Achille Falcone, of Cosenza; but came off victorious. Nanino and Soriano were appealed to, but before the rival compositions could be submitted to them Falcone was dead (Nov. 9, 1600), v. G. Radi-ciotti, *Sammelbd.* I.M.G. xiv. 185 ff. (1912).

Raval published the following works:

- Motectorum, 8 v. Rome, 1598. (Barcelona; Radabon; Verona.)
- Il primo libro di Canzonette a 4 v. Venice, G. Vincenti, 1593. (Bologna.)
- Il primo libro de' Madrigali a 5 v. Venice, G. Vincenti, 1593. (Bologna.)
- Lamentationes Hieremie Prophetæ, 5 v. Rome, 1594. (Rome; St. Cecilia.)

Madrigali a 3 v. . . . con 2 Madrigali a 5 v. a un a 6 v. Rome, 1595. (Bologna.)

Libro de' Motetti a 3 . . . 8 v. Palermo, 1601. (Radabon, incomplete.)

Six madrigals by Raval are included in the Madrigali a 5 di Achille Falcone. Venice, G. Vincenti, 1603.

J. B. T.

RAVEL, MAURICE (b. Ciboure, near St. Jean de Luz, Basses-Pyrénées, France, Mar. 7, 1875). His mother's lineage was Basque; his father's partly French-Swiss. At the age of 12 he was taken to Paris, where his first teachers were H. Ghis (piano) and Charles René (theory). In 1889 he entered, at the Paris Conservatoire, Anthiome's preparatory piano class. In 1891 he passed into de Bériot's class (where among his companions was Ricardo Viñes, who was to be the first to make his works known). He studied harmony with Pessard, and, from 1897 onwards, counterpoint with Gédalge and composition with Fauré. His interest in contemporary production led him to study the music of Chabrier, of Satie, of Liszt, and of various Russians, which influenced him considerably. His own creative outlook, however, was definite and individual from the very outset. We have it from his early master Charles René (quoted by R. Manuel, *vide infra*) that his first attempts at composition, a set of variations and a sonata movement, showed the conception of music by which he was guided later to have been altogether instinctive, and well outlined from the first. And his earliest known compositions, 'Menuet antique,' 1895, 'Sites auriculaires,' 1895, 'Sainte,' 1896 (published 1907 only) and 'Deux Épigrammes de Clément Marot,' 1896, show his individuality already unmistakable, and mature or very nearly.

The first public performances of his music ('Sites auriculaires,' 1898, overture 'Shéhérazade,' 1899) was unfavourably noticed by the few critics who noticed it at all, and contributed to create the legend that Ravel was a dangerous revolutionist—a legend which spread quickly among official musical circles, and proved detrimental to the young composer; for, after being awarded the second Grand Prix de Rome in 1901, he was refused the higher reward in 1902 and 1903, and in 1905 declared ineligible on the strength of the results of the usual preliminary competition. At that time not only his 'Jeux d'eau' and 'Pavane' for piano, but his string quartet had been performed and published—so that there could be no doubt that his technical ability reached the required standard. The jury's decision provoked an outburst of indignation even among the critics who had been, and long afterwards continued to be, hostile to Ravel's music.

From that time onwards, the only landmarks in his biography are the dates of composition and performance of his works.

During the first period, that is, up to 1914, his line of evolution remained remarkably un-

¹ These dates are from the *Public Advertiser*.

swerving. From the time of the 'Jeux d'eau' (1901) onwards, his harmonic idiom and style of writing for the piano, both highly original and effective, are further developed in 'Miroirs' (1905) and 'Gaspard de la nuit' (1908). The less exuberantly picturesque vein of the 'Menuet' and 'Pavane' is further exemplified in the 'Sonatina,' the first movement of which was written towards the end of 1903 (for a competition opened by a periodical, and eventually cancelled) and the remainder in 1905 and in the delightful 'Ma Mère l'Oye' (first written as a piano duet with one very easy part in 1908; arranged into ballet form and orchestrated, 1912).

Many of Ravel's best songs were written during the years 1903-06: the set 'Shéhérazade,' first published with piano accompaniment and shortly afterwards orchestrated; the 'Noël des jouets'; and the 'Histoires naturelles.'

Accidental circumstances turned his attention, with admirable results, to the harmonisation of folk-songs. The first was a request to provide accompaniments for Greek folk-songs selected to illustrate a lecture ('Cinq Chansons populaires grecques,' 1905); the second was a competition opened by the Moscow 'Maison du Lied' at which four of his settings were awarded the first prize.

From the first example of Ravel's orchestral music, the 'Shéhérazade' Overture, to the works of his full maturity, the line is equally direct. A curious fact is that although he is a born orchestrator, and his command of the orchestral medium is unsurpassed, he wrote comparatively little for the orchestra; and of that little a large proportion consists of re-arrangements of piano versions. These are: 'Barque sur l'Océan' (1907) and 'Alborada del gracioso' (1912), both from the set 'Miroirs'; 'Pavane pour une infante défunte' (1908); the 'Shéhérazade' song-set, and 'Ma Mère l'Oye,' already mentioned. In 1912 Ravel likewise orchestrated and turned into a ballet, under the title 'Le Langage des fleurs,' his piano 'Valse nobles et sentimentales,' published the previous year (and first performed at a concert of the Société Musicale Indépendante at which the authorship of all the new works on the programme was kept secret). The only concert works of his which first appeared in orchestral form are the 'Rhapsodie espagnole' (1907)—one movement, however, the 'Habanera,' is an orchestral version of one of the 'Sites auriculaires' of 1895—and 'La Valse' (1920). But Ravel's skill proves so thorough, his sense of fitness so unerring, that in all these instances none of the shortcomings usually inseparable from adaptations are to be noticed, either from the æsthetic point of view or from the technical: both available versions possess all the characteristics of versions originally conceived in view of the very medium in which they are

carried out. The clearest case in point is perhaps, the 'Alborada del gracioso' from the earlier version of which there is as much to be learnt on the art of writing for the piano as there is on the art of writing for the orchestra from the later version.

The number of works first written by him for stage purposes is equally small. For a long time he intended to set to music A. Ferdinand Hérold's French translation of Hauptmann's *Versunkene Glocke*; and the preliminary work was far advanced when he finally relinquished the idea. In 1907 a little farce by Franco-Nobain, which had been performed at the Odéon without attracting much attention, took his fancy and he set it to music. This was 'L'Heure espagnole' (first performed in 1911), one of the most brilliantly successful of his achievements in a light vein. In 1909 he was commissioned to write the ballet 'Daphnis et Chloé' for Diaghilev's Russian Company. This work (first performed in 1912) constitutes so far the high-water mark in his orchestral production. Since then his only original work for the stage is 'L'Enfant et les sortilèges' (text by Messrs. Colette. Monte Carlo, 1925).

The 'Trois Poèmes de Mallarmé,' for voice and 8 instruments (1913), may be taken as standing on the boundary between the first and second period. They are one of Ravel's most subtle and recondite achievements, and exemplify his growing tendency towards abstraction and simplification. Henceforth he devotes his attention more and more to line (never neglected in his earlier work) and less to colour. This may be due, partly, to the influence of Saint-Saëns's music, which at that time he used to study with ever-increasing interest. Roland Manuel¹ rightly calls attention to analogies between Ravel's trio (1915) and Saint-Saëns's first trio and third symphony. And there may be something that recalls Saint-Saëns as well as Chabrier in the quality and treatment of the orchestral 'La Valse' (1920). 'Le Tombeau de Couperin,' a piano suite (1914-17, four parts were orchestrated in 1918), and the sonata for violin and violoncello (1920-22), are the other signal works of the later period. The sonata especially is a remarkably fine achievement, in which simplification is carried to the utmost, and extraordinary resourcefulness is shown in the accomplishment of the difficult task of achieving variety and fullness within a scheme almost entirely restricted to lines.

In all his works Ravel stands revealed as a typical product of French culture, essentially intelligent, versatile, although he deliberately restricts his field, purposeful, and uniformly keen in investigating the possibilities of music. He is, first and last, a pure musician, whose sensitive ear and alert sense of proportion lead him always to judge, and to be guided, by the

¹ *Revue musicale*, Apr. 1925.

properties of musical substance, never by any other consideration. He is more interested in problems of quality than in problems of pure form; but his sense of form is unerring. He sets great store by restraint; but the genuine emotion which permeates, for instance, the beginning of 'Asie', 'L'Indifférent', 'Le Martin-pêcheur' (in the 'Histoires naturelles'), 'Le Gibet' (in 'Gaspard de la nuit'), 'Oiseaux tristes', the 'Forlane' in 'Le Tombeau de Couperin' and the slow movement of the quartet is never lacking even in works of his which, on the surface, may convey an impression of detachment. In his musical humour the sympathetic quality is as striking as the wit.

His style is characterised by sharp definition of contours, by finish, point and piquancy down to the utmost detail. One critic¹ has described him as always interested in achieving the seemingly impossible. From the technical point of view the remark is true enough. But it is always an artistic end, not a merely technical, that he has in view.

His preference for working on a small scale has given occasion to much adverse criticism. That he is quite capable of dealing with broader schemes is shown by 'Daphnis et Chloé', and in a large measure by 'Gaspard de la nuit.' If he has not done so more often, it is by virtue of a deliberate, carefully thought out aesthetic choice, or of what his adverse critics (who are almost as numerous as his fervent admirers) usually describe as 'a sense of his own limitations.' But there can be no doubt that few composers have succeeded in achieving more thoroughly exactly what they aimed at achieving. In his native country he speedily won recognition in spite of relentless opposition. And he is now acknowledged everywhere as one of France's most representative composers.

He is an excellent teacher, but only a few private pupils have received lessons from him. He has written a small number of critical articles, which are very characteristic of him. Most of these are to be found in the files of two French periodicals, *S.F.M.* and *Comœdia Illustré*, for the years 1912-14.

LIST OF WORKS

M. D. C.

RAVENS CROFT, JOHN (d. circa 1745), one of the Tower Hamlets waits and violinist at Goodman's Fields Theatre, was noted for his skill in the composition of hornpipes, a collection of which he published. Two of them are printed in Hawkins's *History*, and another in vol. iii. of 'The Dancing Master.' A set of sonatas for two violins and violone or archlute were printed at Rome in 1695.

W. H. H.

RAVENS CROFT, THOMAS, B.Mus. (b. circa 1590; d. circa 1633?), English composer and

¹ A Thomas Ravenscroft (d. 1630) is buried at Barnet. W. H. H.

editor of various musical publications. In one of the prefaces to his *Brief Discourse* (1614) his age is given as 22, but this would make him only 15 when he became B.Mus. at Cambridge in 1607, and 17 when he published 'Pammelia' and 'Deuteromelia.' He was a chorister at St. Paul's under Edward Pearce, and from 1618-22 was music-master at Christ's Hospital.

His publications are:

1609. 'Pammelia. Musick's Miscellanie, or, Mixed Varietie of Pleasant Roundelays, and delightful Catches of 3, 4, 5, 6, 7, 8, 9, 10 Parts in one. None so ordinarie as musically, none so musically, as not to all, very pleasing and acceptable.' (Reprinted 1618.)
1609. 'Deuteromelia: or the Second part of Musick's Melodie, or melodious Musickes of Pleasant Roundelays; K H. Mirth, or Freemens Songs and such delightful 'atches.' 'Qui canere potest, canat.' Catch that catch can. 'Ut Melos, sic Cor melos afficit et retinet.' (See CATCH.)
1611. 'Melismata. Musicall Phantasies. Pitting the Court, Citie and Country Humours. To 3, 4 and 5 Voyces.'
1614. 'A Brief Discourse of the true (but neglected) use of Charactering the Degrees, by their Perfection, Imperfection and Diminution in Measurable Musick, against the Common Practise and Customs of those Times. Examples whereof are exprest in the Harmony of 4 Voyces, concerning the Pleasure of 6 usual Recreations. 1. Hunting. 2. Hawking. 3. Dancing. 4. Drinking. 5. Enamouring.'
1621. 'The Whole Booke of Psalmes. With the Hymnes Evangelicall and Spirituall. Composed into four parts by Sundry Authors with severall Tunes as have been and are usually sung in England, Scotland, Wales, Germany, Italy, France and the Netherlands.' (2nd edition, 1638. See PSALTER, THE ENGLISH METRICAL.)

'Pammelia' is of some importance as the earliest English printed collection of this kind of music. It contains 100 rounds and catches,¹ some with sacred words, either Latin or English texts of the metrical psalm type, but the majority are settings of stanzas or fragments of a traditional or popular character (such as the famous canon, 'Robin, lend me thy bowe,' which is included). 'Deuteromelia' is a collection of 31 pieces, 7 of which are 'Freemen's Songs' for 3 voices. Seven others are 'Freemen's Songs' for 4 voices; the remainder are rounds for 3 and 4 voices. 'Three blind mice' here appears among the rounds, perhaps for the first time in print, as well as the catch, 'Hold thy peace, knave,' sung in Shakespeare's *Twelfth Night*. The 'Freemen's Songs' again are settings of poems (often with verse and chorus) chiefly of a popular, humorous or broad character; one of them, 'Wee be Souldiers three,' is printed in Hawkins's *History*. 'Melismata' is a similar collection of 23 settings indexed as follows: 6 Court Varieties, 4 Citie Rounds, 4 Citie Conceits, 5 Country Rounds and 4 Country Pastimes. With the exception of the 9 'Citie' and Country Rounds, these are all short madrigals which, both in their words and music, express the 'humour' they are intended to illustrate. An excellent setting of the well-known 'Three Ravens' ballad appears under 'Country Pastimes.'

A Briefe Discourse, dedicated to the senators and guardians of Gresham College, begins with an 'apologie' which deprecates the breaking of rules (chiefly with respect to time and 'prolations') by contemporary musicians and minstrels, and is followed by the 'Discourse' proper which seeks to define the 'Divisions of Moode, Time and Prolation in Measurable Music' by quotations from such authorities as Glareanus, Ornithoparcus, Sebalduus, Heydon, Dunstable and Morley. Whereas in his 1609 and 1611 publications there is no evidence to show that Ravenscroft composed any of the music himself, many of the 'examples' appended to the *Briefe Discourse* are by him. The most notable among these is really a song-cycle in 4 parts, and is possibly the first thing of its kind to appear in this country (but see NICHOLSON, Richard). The poem is in dialect, 'Hodge Trillindle to his Zweet hort Malkyn'; the first part is Hodge's declaration, the second Malkyn's answer, the third their 'Gonglusion' and the last 'their Wedlocke.' The last named is set by John Bennet.² Other numbers were contributed by his master, Edward Pearce, and by John Bennet. Another 'Treatise of Musick' by Ravenscroft is in B.M. Add. MSS. 19,578/19. This, besides giving the substance of *A Briefe Discourse*, divides music into 'Practive and Speculative,' describes the gamut and gives an account of the intervals.

A study of these four publications of Ravenscroft establishes him in a peculiar position among Elizabethan composers. A learned and serious musician (if not a pedant in some respects), he was nevertheless determined to satisfy all tastes by his 'Court, City and Country' humours. While demonstrably capable of writing madrigals and anthems in the usual style, his tavern songs and catches, his hunting and hawking songs and his 'Hodge and Malkyn' are an indication of his broad sympathies and of his ability to express them in music. All four books are in the British Museum (K. 1, e 8-11); separate numbers are in B.M. Add. MSS. 31,420, 33,933, 5336, 29,386, 29,291; also in R.C.M. 722, 814, 821.

Ravenscroft is, however, best known by his 1621 publication, usually referred to as 'Ravenscroft's Psalter,' fully described under PSALTER. This contains 100 harmonisings, of which 48 are his own, but most of them which are still in use are only 'sadly garbled' versions of the originals. The remaining settings are by Richard Allison, Edward Blancke, John Bennet, Michael Cavendish, William Cranford, John Dowland, Giles Farnaby, John Farmer, William Harrison, Edmund Hooper, George Kirby, John Milton, Thomas Morley, Robert Palmer, William Parsons, Martin Pearson,

¹ The expression 'K H. Mirth' in this title has been thought by some to stand for 'King Henry's Mirth,' but it has been suggested (E. H. Fellowes, *Eng. Madrigal Composers*) that it is meant for 'King's Head,' and as such would stand either for a tavern of the name in Cheapside, or for a house in Greenwich known later to Pepys as 'the great musick house.'

² For quotations see article on Thomas Ravenscroft by the writer, *Mus. T.*, Oct. 1924, p. 881.

Simon Stubbe, Thomas Tallis, John Tomkins and Thomas Tomkins.

ANTHEMS

- ¹ Ah helpless wretch, a 5. B.M. Add. MSS. 29,372-7 and 29,427/25. Altus part only.
- ¹ All laud and praise, a 5 B.M. Add. MSS. 29,372-7 and 29,427/25. Altus part only.
- In Thee, O Lord. Verse anthem, a 5. Ch. Ch. 56-60. Bass part wanting.
- ¹ O Jesu meek, a 5. B.M. Add. MSS. 29,372-7.
- ¹ O Jesu sweet. B.M. Add. MSS. 29,427/25. Altus part only.
- ¹ O let me hear Verse anthem, a 5. Durh.; B.M. Add. MSS. 50,478-9. Tenor cantoria part only, Ch. Ch. 56-60. Bass part wanting.
- O Lord, In Thee is all my trust, a 5. B.M. Add. MSS. 29,427/25. Altus part only.
- O wofull ruines, a 5. Ch. Ch. 56-60. Bass part wanting.
- This is the day. Verse anthem, a 5. Ch. Ch. 56-60. Bass part wanting.

J. Mth.

RAVINA, JEAN HENRI (b. Bordeaux, May 20, 1818; d. Paris, Sept. 30, 1906), pianoforte composer. His mother was a prominent musician at Bordeaux. At the instance of Rode and Zimmermann the lad was admitted to the Conservatoire of Paris in 1831. His progress was rapid—second prize for PF. in 1832; first prize for the same in 1834; first for harmony and accompaniment in 1835; a joint professorship of PF., Nov. 1835. In Feb. 1837 he left the Conservatoire and embarked on the world as a virtuoso and teacher. He resided exclusively at Paris, with the exception of a journey to Russia in 1853, and Spain in 1871. He received the Legion of Honour in 1861. His compositions are almost all salon pieces. He also published a 4-hand arrangement of Beethoven's nine symphonies. (See Pougin's supplement to *Félic.*) G.

RAWLINGS (RAWLINS), (1) THOMAS (b. circa 1703; d. 1767), was a pupil of Dr. Pepusch, and a member of Handel's orchestra at both opera and oratorio performances. On Mar. 14, 1753, he was appointed organist of Chelsea Hospital.

His son, (2) **ROBERT** (b. 1742; d. 1814), was a pupil of his father, and afterwards of Barsanti. At 17 he was appointed musical page to the Duke of York, with whom he travelled on the Continent until the Duke's death. In 1767 he returned to England and became a violinist in the King's band and Queen's private band.

His son, (3) **THOMAS A.** (b. 1775; d. mid-19th cent.), studied music under his father and Dittenhofer. He composed some instrumental music performed at the Professional Concerts, became a violinist at the Opera and the best concerts, and a teacher of the pianoforte, violin and thorough-bass. He composed and arranged many pieces for the pianoforte, and some songs. W. H. H.

RAYMAN, JACOB, see VIOLIN FAMILY, subsection ENGLISH MAKERS.

RE, the second note of the major scale in the nomenclature of France and Italy: See D; HEXACHORD; SOLMISATION.

REA, WILLIAM (b. London, Mar. 25, 1827; d. Newcastle, Mar. 8, 1903), when about 10

years old learnt the pianoforte and organ from Josiah Pittman, for whom he acted as deputy for several years. In or about 1843 he was appointed organist to Christchurch, Watney Street, St. George's-in-the-East, and at the same time studied the pianoforte, composition and instrumentation under Sterndale Bennett, appearing as a pianist at the concerts of the Society of British Musicians in 1845. On leaving Christchurch he was appointed organist to St. Andrew Undershaft. In 1849 he went to Leipzig, where his masters were Moscheles and Richter; he subsequently studied under Dreyschock at Prague. On his return to England, Rea gave chamber concerts at the Beethoven Rooms, and became (1853) organist to the Harmonic Union. In 1856 he founded the London Polyhymnian Choir, to the training of which he devoted much time, and with excellent results; at the same time he conducted an amateur orchestral society. In 1858 he was appointed organist at St. Michael's, Stockwell, and in 1860 was chosen by competition organist to the corporation of Newcastle-on-Tyne, where he also successively filled the same post at three churches in succession, and at the Elswick Road Chapel. At Newcastle Rea, besides weekly organ and pianoforte recitals, formed a choir of eighty voices, which in 1862 was amalgamated with the existing Sacred Harmonic Society of Newcastle. In 1867 he began a series of excellent orchestral concerts which were carried on every season for nine years, when he was compelled to discontinue them, owing to the pecuniary loss which they entailed. In 1876 he gave two performances of 'Antigone' at the Theatre Royal, and devoted much of his time to training his choir (200 voices), the Newcastle Amateur Vocal Society, and other Societies on the Tyne and in Sunderland, besides giving concerts at which the best artists performed. His published works comprise four songs, three organ pieces and some anthems. At the close of 1880 he was appointed organist of St. Hilda's, S. Shields; in 1888 he resigned the corporation appointment. He was an honorary Fellow of the R.C.O., and in 1886 received the honorary degree of Mus.D. from the University of Durham. He composed a 'Jubilee Ode' for the Newcastle Exhibition of 1887. An account of his life and works is in *Mus. T.*, Apr. 1903. His wife, **EMMA MARY** (née Woolhouse) (d. May 6, 1893), was an accomplished musician, actively connected with the musical life of Newcastle. W. B. S.; addns. r. k.

READ, FREDERICK JOHN (b. Faversham, Dec. 1857²; d. Chichester, Jan. 28, 1925), was organist of Chichester Cathedral during two periods, 1886-1902 and 1921-25. His first important post was at Christ Church, Reading, where he made his mark as a choral conductor

¹ These 3 anthems were contributed to Thomas Myrtil's collection, 'Tristitiae remedium' (1616), which also contains a note, 'Ne laetitia inimica mea, a 5, by Ravenscroft.

as well as a church organist. Similarly at Chichester during his first period he introduced many important works as conductor of the Chichester Musical Society. At that time he was also a teacher of harmony and counterpoint at the R.C.M.; he was an examiner for the Associated Board of the R.A.M. and R.C.M., and for the R.C.O. Among many compositions, mostly for church use, his madrigal 'Love wakes and weeps' deserves mention, since it won the prize of the MADRIGAL SOCIETY (*q.v.*). For an appreciation of Read by Sir Hugh P. Allen (formerly his pupil) see *Mus. T.*, Mar. 1925. c.

READE, CHARLES (b. June 8, 1814; d. Apr. 11, 1884), English dramatist and novelist, claims a notice in his capacity of expert connoisseur, and one of the earliest collectors of old violins. He devoted much time to the study of violin construction, and—as his sons put it—acquired 'as keen a scent for the habitat of a rare violin as the truffle dog for fungus beneath the roots of the trees.' He gathered much of this accurate knowledge from one Henri, a player and a maker to boot, resident in Soho, with whom he engaged in experiments in varnish, and in the business of importing fiddles from abroad for the English dealers. Frequent visits to Paris, in the latter connexion, resulted sometimes in profit and at other times in financial catastrophe; but they succeeded in bringing to England some of the finest specimens of Cremona instruments that are known to-day. They were in Paris buying a stock of thirty fiddles when the Revolution of 1848 broke out, and Henri threw aside fiddle-dealing and joined the revolutionists. He was shot before his friend's eyes at the first barricade, and Charles Reade escaped with difficulty, leaving the fiddles behind. These were found stored away in a cellar after the Revolution, and eventually reached Reade, who records that he sold one of them for more than he paid for the whole lot. At the time of the Special Loan Exhibition of Musical Instruments held at the South Kensington Museum in 1872, Reade wrote a series of letters on Cremona fiddles in the *Pall Mall Gazette*, in which he propounded the theory that the 'Lost Cremona Varnish' was a spirit varnish laid over an oil varnish. Coming as it did from so noted a connoisseur, there were many who accepted the theory as the solution of the question. These letters were privately reprinted by G. H. M. Muntz, under the title *A Lost Art Revived: Cremona Violins and Varnish* (Gloucester, 1873), and again in the volume entitled *Readiana* (Chatto & Windus, 1882). In later life Charles Reade abandoned fiddles and fiddle-trading, but we find traces of his infatuation in his writings. The adventurous career of John Frederick Lott, the violin-maker, is told by him, somewhat romantically,

in his novel *Jack of all Trades*; whilst interesting matter concerning the violin comes into *Christie Johnstone* and his collection of tales entitled *Cream*.

E. H. A.

READING, JOHN. There were three musicians of this name, all organists.

(1) JOHN (d. 1692), appointed Junior Vicar-Choral of Lincoln Cathedral, Oct. 10, 1667, Poor Vicar, Nov. 28, 1667, and master of the choristers, June 7, 1670. He succeeded Randolph Jewett as organist of Winchester Cathedral in 1675, and retained the office until 1681, when he was appointed organist of Winchester College. He was the composer of the Latin Graces sung before and after meat at the annual College election times, and the well-known Winchester School song, 'Dulce Domum'; all printed in Dr. Philip Hayes's 'Harmonia Wiccamica.'

(2) JOHN, organist of Chichester Cathedral, 1674–1720. Several songs included in collections published between 1681 and 1688 are probably by one or other of these two Readings.

(3) JOHN (b. 1677; d. Sept. 2, 1764) was a chorister of the Chapel Royal under Dr. Blow. In 1696–98 he was organist of Dulwich College.¹ He was appointed Junior Vicar and Poor Clerk of Lincoln Cathedral, Nov. 21, 1702, master of the choristers, Oct. 5, 1703, and instructor of the choristers in vocal music, Sept. 28, 1704. He appears to have resigned these posts in 1707, and to have returned to London, where he became organist of St. John, Hackney (in 1708), St. Dunstan in the West, St. Mary Woolchurchhaw, Lombard Street, and St. Mary Woolnoth. He published 'A Book of New Songs (after the Italian manner) with Symphonies and a Thorough Bass fitted to the Harpsichord, etc.,' and (about 1709) 'A Book of New Anthems.'

There was another person named Reading who was a singer at Drury Lane in the latter part of the 17th century. In June 1695 he and Paté, another singer at the theatre, were removed from their places and fined 20 marks each for being engaged in a riot at the Dog Tavern, Drury Lane, but were soon after reinstated.

A Rev. John Reading, D.D., Prebendary of Canterbury Cathedral, preached there a sermon in defence of church music, and published it in 1663.

W. H. H.

REAL FUGUE, see FUGUE.

REAY, SAMUEL (b. Hexham, Mar. 17, 1822; d. Newark, July 21 or 22, 1905), was noted for his fine voice and careful singing as a chorister at Durham Cathedral. After leaving the choir he had organ lessons from Stimpson of Birmingham, and then became successively

organist at St. Andrew's, Newcastle (1845); St. Peter's, Tiverton (1847); St. John's Parish Church, Hampstead (1854); St. Saviour's, Warwick Road (1856); St. Stephen's, Paddington; Radley College (1859, succeeding Dr. E. G. Monk); Bury, Lancashire (1861); and in 1864 was appointed 'Song-schoolmaster and organist' of the parish church, Newark, retiring from the latter post in 1901, but retaining that of Song-schoolmaster on the Magnus foundation until his death. In 1879 he distinguished himself by producing at the Bow and Bromley Institute, London, two comic cantatas of J. S. Bach ('Caffee-Cantate' and 'Bauern-Cantate'), which were performed there—certainly for the first time in England—on Oct. 27, under his direction, to English words of his own adaptation. Reay published a Morning and Evening Service in F, several anthems and two madrigals (all Novello); but was best known as a writer of part-songs, some of which ('The clouds that wrap,' 'The dawn of day,' written for the Tiverton Vocal Society) were deservedly popular.

G.

REBAB (REBABA), a bowed instrument in popular use in Egypt and northern Africa: it has a rectangular body and one or two strings of twisted horsehair. (PLATE LXXXVII. No. 1; see VIOL FAMILY.)

F. W. G.

REBEC (Ital. *ribeca*, *ribeba*; Span. *rabé*, *rabel*), the French name (said to be of Arabic origin) of that primitive stringed instrument which was in use throughout western Europe in the Middle Ages, and was the parent of the viol and violin, and is identical with the German 'Geige' and the English 'fiddle'; in outline something like the mandoline, of which it was probably the parent. It was shaped like the half of a pear, and was everywhere solid except at the two extremities, the upper of which was formed into a peg-box identical with that still in use, and surmounted by a carved human head. The lower half was considerably cut down in level, thus leaving the upper solid part of the instrument to form a natural finger-board. The portion thus cut down was scooped out, and over the cavity thus formed was glued a short pine table, pierced with two trefoil-shaped sound-holes, and fitted with a bridge and sound-post (see PLATE LXXXVII. No. 3). The player either rested the curved end of the instrument lightly against the breast, or else held it like the violin, between the chin and the collar-bone, and bowed it like the violin. It had three stout gut strings, tuned like the lower strings of the violin (A, D, G). Its tone was loud and harsh, emulating the female voice, according to a French poem of the 13th century.

'Quidam rebecam arcuabant,
Mullebrem vocem confingentes.'

¹ D'Aymeric de Peyrat; see Du Cange's *Glossarium*, v. v. Bandora.

An old Spanish poem speaks of 'el rabé gritador,'² or the 'squalling rebec.' This powerful tone made it useful in the mediæval orchestra; and Henry the Eighth employed the rebec in his state band. It was chiefly used, however, to accompany dancing; and Shakespeare's musicians in *Romeo and Juliet*, Hugh Rebeck, Simon Catling (Catgut) and James Soundpost were undoubtedly rebeck-players. After the invention of instruments of the viol and violin type it was banished to the streets of towns and to rustic festivities, whence the epithet 'jocund' applied to it in Milton's *L' Allegro*. It was usually accompanied by the drum or tambourine. It was in vulgar use in France in the 18th century, as is proved by an ordinance issued by Guignon in his official capacity as 'Roi des Violons' in 1742, in which street-fiddlers are prohibited from using anything else:

'Il leur sera permis d'y jouer d'une espèce d'instrument à trois cordes seulement, et connu sous le nom de rebec, sans qu'ils puissent se servir d'un violon à quatre cordes sous quelque prétexte que ce soit.'

A similar order is extant, dated 1628, in which it is forbidden to play the treble or bass violin 'dans les cabarets et les mauvais lieux,' but only the rebec. The rebec was extinct in England earlier than in France. It is now totally disused, and no specimen was known until, at the Exhibition of Musical Instruments at Milan in 1881, six genuine specimens were shown. Representations of it in sculpture, painting, manuscripts, etc., are abundant.

The custom of playing songs in unison with the voice, which came into vogue in the 15th century, resulted in the classification of rebecs into definite 'sets' answering in pitch to the treble, alto, tenor and bass voices. Martin Agricola, in his *Musica instrumentalis*, 1528, gives woodcuts of a 'set' of rebecs which he calls discant, altus, tenor and bassus.

E. J. P.; addn. E. H. A.

REBEL, (1) JEAN-FÉRY (B. Paris, Apr. 1666; d. there, Jan. 2, 1747), the son of JEAN, a singer in the service of the French court from 1661 to his death in 1692. He was a pupil of Lully, and probably entered the Académie Royale de Musique as violinist in 1700. After a precocious childhood he entered the Opéra as a violinist. In 1703 he produced 'Ulysse,' opera in five acts with prologue, containing a *pas seul* for François Prévôt to an air called 'Le Caprice,' for violin solo. The opera failed, but the caprice remained for years the test-piece of the ballerine at the Opéra. After this success Rebel composed violin solos for various other ballets, such as 'La Boutade,' 'Les Caractères de la danse' (1715), 'Terpsichore' (1720), 'La Fantaisie' (1727), 'Les Plaisirs champêtres' and 'Les Éléments.' Several of these were engraved, as were his sonatas for the violin.

² Don Ant. Rod. de Hita; see Vidal, *Les Instruments à archet*.

In 1713 he was accompanist at the Opéra, and in 1717 was one of the '24 violons,' and by 1720 'compositeur de la chambre' to the king. This latter office he resigned in 1727 in favour of his son François, and later passed on to him the duties of conductor of the Opéra, which he had fulfilled for many years. He was buried on Jan. 3, 1747.

His sister, (2) ANNE-RENÉE (b. 1662; d. 1722), became one of the best singers of the court, and from the age of 11 years appeared in the ballet, etc. She was married in 1684 to Michel Richard de LALANDE (q.v.).

Jean-Féry's son, (3) FRANÇOIS (b. Paris, June 19, 1701; d. there, Nov. 7, 1775), at 13 played the violin in the Opéra orchestra. It seems to have been at Prague, during the festivities at the coronation of Charles VI. In 1723, that he became intimate with François Francœur; the two composed conjointly, and produced at the Opéra, the following operas: 'Pyrame et Thisbé' (1726); 'Tarsis et Zélie' (1728); 'Scanderbeg' (1735); Ballet de la paix' (1738); 'Les Augustales' and 'Le Retour du roi' (1744); 'Zélinde', 'Le Trophée' (in honour of Fontenoy, 1745); 'Ismène' (1750); 'Les Génies tutélaires' (1751); and 'Le Prince de Noisy' (1760), most of which were composed for court fêtes or public rejoicings. Rebel seems to have been the sole author of a 'Pastorale héroïque' (1730).

From 1733-44 Rebel and Francœur were joint leaders of the Opéra orchestra, and in 1753 were appointed managers. They soon, however, retired in disgust at the petty vexations they were called upon to endure. Louis XV. made them surintendants of his music, with the Order of St. Michel. In Mar. 1757 these inseparable friends obtained the privilege of the Opéra, and directed it for ten years on their own account with great administrative ability.

Rebel composed some cantatas, a Te Deum and a De Profundis, performed at the Concert Spirituel, but all his music is now forgotten, excepting a lively air in the first finale of 'Pyrame et Thisbé' which was adapted to a much-admired *pas seul* of Mlle. de Camargo, thence became a popular contredanse—the first instance of such adaptation—and in this form is preserved in the 'Clé du caveau,' under the title of 'La Camargo.' A very interesting account of the family, with detailed notices of the music of J. F. Rebel, appeared in the *Sammelbände* of the Int. Mus. Ges. vol. vii. p. 253, by M. L. de La Laurencie. This work established the high importance, in the history of French instrumental music, of the works which he has there catalogued:

1. *Vin. pieces* with basso continuo, divided into a series of tunes. (1705.)
2. *Caprios.* (1711.)
3. *Boutade.* (1712.)
4. Collection of 12 sonatas, for 2 and 3 parts, with basso continuo. (1712-13.) (Original date, 1695.)

5. *Vin. sonatas*, together with many pieces for the *vin*. (1712.)
6. 'Caractères de la danse.' (1715.)
7. 'La Terpsichore,' sonata. (1720.)
8. 'Fantaisie.' (1720.)
9. 'Les Plaisirs champêtres.' (1734.)
10. 'Les Éléments, symphonie nouvelle.' (1737.)

REBEL.—L. de LA LAURENCIE, *L'École française de violon de Lully à Vieux*, I. (1922), pp. 71-102. Portrait.

G. C.; addns. M. P.

REBELLO, JOÃO SOARES (or JOÃO LOURENÇO) (b. Arcos, or Caminhos, 1610; d. near Lisbon, Nov. 16, 1661), Portuguese composer, fellow-student of King John IV. At 14 he entered the choir of the ducal chapel at Villa Viçosa, and was not forgotten when John IV. ascended the throne. He was choirmaster, received titles and honours, and it was to him that the king dedicated his *Defence of Modern Music*. The works of 'Rebello' were printed, in accordance with a clause in the King's will.

'*Psalmi tum vesperarum tum completarum. Item Magnificat, lamentationes et Miserere*.' Rome, 1657. (Bibl. Nat., Lisbon; partbooks of 2nd choir, only.)

Other works in MS. for 4 to 17 v. are mentioned, but are apparently lost. J. B. T.

REBER, NAPOLÉON-HENRI (b. Mülhausen, Oct. 21, 1807; d. Paris, Nov. 24, 1880), entered at 20 the Paris Conservatoire, studying counterpoint and fugue under Seuriot and Jézensperger, and composition under Lesueur. Circumstances led him to compose chamber music, after the success of which he attempted opera. His music to the second act of the charming ballet 'Le Diable amoureux' (Sept. 23, 1840) was followed at the Opéra-Comique by 'La Nuit de Noël,' three acts (Feb. 9, 1848), 'Le Père Gaillard,' three acts (Sept. 7, 1852), 'Les Papillotes de M. Benoît,' one act (Dec. 28, 1853) and 'Les Dames capitaines,' three acts (June 3, 1857). In these works he strove to counteract the tendency towards noise and bombast then so prevalent both in French and Italian opera, and to show how much may be made out of the simple natural materials of the old French opéra-comique by the judicious use of modern orchestration.

In 1851 he was appointed professor of harmony at the Conservatoire, and in 1853 the well-merited success of 'Le Père Gaillard' procured his election to the Institut as Onslow's successor. Soon after this he renounced the theatre and returned to chamber music. He also began to write on music, and his well-known *Traité d'harmonie* (1862) went through many editions.

In 1862 Reber succeeded Halévy as professor of composition at the Conservatoire; since 1871 he was also inspector of the *succursales* or branches of the Conservatoire. He died after a short illness and was succeeded as member of the Institut by Saint-Saëns. He was made chevalier of the Légion d'Honneur in 1855, and *officier* in 1870.

His compositions comprise four symphonies, a quintet and three quartets for strings, one PF. ditto, seven trios, duets for PF. and violin, and

PF. pieces for two and four hands. Portions of his ballet 'Le Diable amoureux' have been published for orchestra, and performed at concerts. In 1875 he produced a cantata called 'Roland,' but 'Le Ménétrier à la cour,' opéra-comique, and 'Naïm,' grand opera in five acts, were never performed, though the overtures are engraved. G. C.; addns. M. L. P.

REBHUHN (REFHUN), PAUL, an early 16th-century (? Saxon) poet-composer. He wrote dramas to which he composed the music (introduction, songs, choruses). A modern edition was published by the Litterarische Verein, Stuttgart, 1859 (vol. 49; other ed. in Q.-L.). His 'Susanna,' first published at

secco was played on a harpsichord and piano-forte from a figured bass; during the earlier half of the 19th century the practice arose, more especially in England, of using double-bass and violoncello, the former playing the *basso continuo*, the latter the harmonies *arpeggiando* (see DRAGONETTI and LINDLEY). It is recorded that Lindley often embellished his share by the introduction of figures and ornamental passages; but, however ingenious this may have been, it was entirely at variance with the effect intended by the composer, which was simply to give support to the vocal line and to conjoin the modulations of the music:

Musical score for three voices: DON GIOVANNI, LEPORELLO, and DON GIOVANNI. The lyrics are: Per la mano essa al-lo-ra me prende An-co-ra maglio M'oca - res-sa, mi abbraccia etc.

Zwickau in 1536, is a good example of his attempt to bring order into the rhythmical construction of his rhymes on classical lines, and in this he was a precursor of Opitz (A. Koberstein, *Gesch. der deutschen National-literatur*: Q.-L.).

RECITA (Ital.), 'performance.'

RECITAL, a term which has come into use in England to signify a performance of solo music by one performer. It was probably first used by Liszt at his performance at the Hanover Square Rooms, June 9, 1840, though as applying to the separate pieces and not to the whole performance. The advertisement of the concert says that 'M. Liszt will give Recitals on the Pianoforte of the following pieces.' The name was afterwards adopted by HALLÉ (*q.v.*) and others, and is in the present day often applied to concerts when two or more soloists take part. G.

RECITATIVE (Fr. *récitatif*; Ger. *Recitativ*; Ital. *recitativo*; from the Latin *recitare*) is the name given to the declamatory portions of an opera, oratorio or cantata as opposed to the lyrical. *Recitativo secco* denotes the type of recitative where the rhythm is free to follow the verbal accentuation, the interest thus lying in the vocal part, the accompaniment being reduced to the merest frame; *recitativo stromentato*, on the other hand, has a more elaborate instrumental part, the music necessarily becoming of a more rhythmical pattern (see OPERA). Recitative in one form or another must always be a part of the opera structure; it is here that the necessary explanations and formal dialogue are dealt with, and there is no difference in essentials between such passages in latter-day works and those of Peri and Monteverdi. For a long time the *recitativo*

For a discussion of the English recitative see under PURCELL: CHARACTERISTICS OF PURCELL'S ART, subsection LANGUAGE IN SONG.

BINI.—CHARLOTTE SPITZ, *Die Entwicklung des "Stille Recitativo."* A.M., Apr. 1921, pp. 237-44. N. C. G.

RECITING-NOTE (Lat. *repercussio*, *nota dominans*), a name sometimes given to that important note in a Gregorian tone on which the greater portion of every verse of a psalm or canticle is continuously recited. As this particular note invariably corresponds with the dominant of the mode in which the psalm tone is written, the terms dominant and reciting-note are frequently treated as interchangeable. (See MODES; PSALMODY.)

W. S. R.

The term is similarly applied to the corresponding notes of the Anglican chant. (See CHANT and CHANTING.)

RECORDER, see PIPPLE FLUTE (1).

RECTE ET RETRO, PER (Lat. *imitatio cancrizans*, *imitatio per motum retrogradum*, *imitatio recurrens*; Ital. *imitazione al rovescio*, *o alla inversa*; Eng. *retrograde imitation*). A peculiar kind of imitation, so constructed that the melody may be sung backwards as well as forwards; as shown in the following two-part canon, which must be sung by the first voice from left to right, and by the second from right to left, both beginning together, but at opposite ends of the music.

Musical score for two voices in a two-part canon. The first voice starts on the left and moves right, while the second voice starts on the right and moves left. The music is written on two staves.

The earliest known instances of Retrograde Imitation are to be found among the works of

the Flemish composers of the 15th century, who delighted in exercising their ingenuity, not only upon the device itself, but also upon the inscriptions prefixed to the canons in which it was employed. The Netherlands were not, however, the only musicians who indulged successfully in this learned species of recreation. Probably the most astonishing example of it on record is the motet,¹ 'Diliges Dominum,' written by William Byrd for four voices—treble, alto, tenor and bass—and transmutated into an eight-part composition, by adding a second treble, alto, tenor and bass, formed by singing the four first parts backwards. It is scarcely possible to study this complication attentively, without feeling one's brain turn giddy; yet, strange to say, the effect produced is less curious than beautiful.

There is little doubt that the idea of singing music from right to left was first suggested by

reversed, as well as the sequence of the notes, is called 'Retrograde Inverse Imitation' (Lat. *imitatio cancrizans motu contrario*; Ital. *imitazione al contrario riverso*). It might have been thought that this would have contented even Flemish ingenuity. But it did not. The partbooks had not yet been turned upside-down! In the subjoined example we have endeavoured to show, in a humble way, the manner in which this most desirable feat may also be accomplished. The two singers, standing face to face, hold the book between them; one looking at it from the ordinary point of view, the other, upside-down, and both reading from left to right—that is to say, beginning at opposite ends. The result, if not strikingly beautiful, is, at least, not inconsistent with the laws of counterpoint. (For other examples see INSCRIPTION.)

Retrograde Imitation has survived in more

those strange oracular verses² which may be read either backwards or forwards, without injury to words or metre; such as the well-known pentameter—

'Roma tibi subito motibus ibit amor,'

or the cry of the Evil Spirits—

'In girum imus noctu ecce ut consumimur igni.'

The canons were frequently constructed in exact accordance with the method observed in these curious lines; and innumerable quaint conceits were invented, for the purpose of giving the singers some intimation of the manner in which they were to be read. 'Canit more Hebraeorum' was a very common motto. 'Misericordia et veritas obviaverunt sibi' indicated that the singers were to begin at opposite ends, and meet in the middle. In the second Agnus Dei of his 'Missa Graecorum,' Hobrecht wrote, 'Aries vertatur in Pisces'—Aries being the first sign of the Zodiac, and Pisces the last. In another part of the same Mass he has given a far more mysterious direction—

'Tu furcis cancriza et per antifrasin canta,
Cum tunc in capite antifrasiszando repe-te.'

This introduces us to a new complication; the secret of the motto being, that the tenor is not only to sing backwards, but to invert the intervals ('per antifrasin canta'), until he reaches the 'horns'—that is to say, the two cusps of the semicircular time-signature—after which he is to sing from left to right, though still continuing to invert the intervals. This new device, in which the intervals themselves are

than one very popular form. In the year 1791 Haydn wrote for his Doctor's degree, at the University of Oxford, a 'Canon cancrizans, a tre' ('Thy Voice, O Harmony'), which will be found in Vol. II. p. 574, and he has also used the same device in the minuet of one of his symphonies. (Cf. ROVESCIO, AL.) But perhaps it has never yet appeared in a more popular form than that of the well-known double chant by Dr. Crotch:

Sir John Stainer wrote a hymn-tune 'Per Recte et Retro' in 1898 for the Church Hymnary (No. 381); it is also No. 81 of Novello's edition of the composer's hymns. It reads backwards in all the parts. W. S. R.

REDFORD, JOHN (b. circa 1485; d. circa 1545), English organist, composer and dramatist. He is said³ to have received his early training in the choir school of St. Paul's Cathedral, and later to have been appointed a vicar-choral there. He subsequently became organist, almoner and master of the choristers, although there is no record of him in any such capacity before 1530. Thomas Tusser was taken into St. Paul's choir school about 1535, and was thus a pupil of Redford. In the former's *One Hundred Points of Husbandry* (1557), an autobiographical poem, which describes how he was 'impressed' as a choir-boy from Wallingford and ultimately

¹ Reprinted by Hawkins, *History*, ch. 96.

² Versus recurrentes, said to have been first invented by the Greek poet, Solonides, during the reign of Ptolemy Philadelphus. The examples we have quoted are, however, of much later date; the oldest of them being certainly not earlier than the 7th century.

³ W. H. Gratian Flood, *Early Tudor Composers*, p. 96.

got into St. Paul's choir, he gives the following eulogy of Redford :

'But mark the chance, myself to vance,
By friendship's lot to Paul's I got.
So found I grace a certain space,
Still to remaine.
With Redford there the like nowhere
For cunning such and vertue much,
By whom some part of music's art
So did I gaine.'

Redford was fortunate in being at St. Paul's while Pace and Sampson were there. Pace succeeded Colet as dean, 1519, and Sampson succeeded Pace, 1536. Pace was an excellent musician (see FYGOTT), while SAMPSON (*q.v.*) was himself a composer. Redford no doubt received some encouragement from them, not only, perhaps, in his church composition, but also in the preparation of choir-boy plays (usually with music), which was one of his duties as choirmaster. The children of the Chapel Royal and of St. George's Chapel, Windsor, were similarly employed, and besides Redford, such men as Gilbert Banastir, Cornyshe, Heywood, Richard Edwardes and William Hunnis, in their capacities as masters of the children, set up a standard of excellence in these plays which soon came to threaten the interests of adult professional actors, and finally resulted in the famous 'boys and players' controversy of Shakespeare's time. Grattan Flood, quoting from the *Calendar of Letters and Papers of Henry VIII.*, refers to an occasion on Nov. 10, 1527, when 'the children of Paules' presented at Greenwich a Latin-French play for the entertainment of the French nobles. Redford was no doubt in charge of this, but more definite evidence as to his activities in this direction is provided by his Morality play 'Wyt and Science,'¹ (B.M. Add. MSS. 15,233). This was printed by Halliwell for the Shakespeare Society in 1848, and, besides its 1000 or so lines of dialogue contains the words of three songs ('Gyve place to honest recreation,' 'Welcum myne owne' and 'Exceedyng mesure'), which Redford no doubt set himself. That other music was also provided is shown by a note at the end :

"Heere cumth in fowre wyth viols and sing "remembrance," and at the last quere (verse) all make curtyseye and so goe forth syngyng."

The play itself is made up of the usual rather dreary didactic dialogue, but it was adapted in more than one Elizabethan interlude (see J. Seifert, *Wit and Science Moralityten*, 1892). The last page of another Morality by Redford is also in the MS.; at the end is the note, 'Here the(y) syng "Hey nony, nonye," and so go furth syngyng.'

Redford's name is included in the list of 'Practicioners' in music given in Morley's *Plaine and Easie Introduction*, 1597. His

¹ Grattan Flood gives the date of its performance as 1538-39, but Brand dates the play between 1541 (when the 'galliard,' which is mentioned, was first danced in England), and the death of Katherine Parr in 1548. (See E. K. Chambers, *Medieval Stage*, vol. II, p. 454.)

anthem, 'Rejoice in the Lord alway,' is still known and sung; it was first printed in the appendix to Hawkins's *History*; later by the Motet Society; and in 1894 by Novello (edited by Sir G. C. Martin). A 4-part motet by 'Redfurde,' 'Christus resurgens,' is in the British Museum (Add. MSS. 17,802-5), and another '[Lumbi] vestri precincti,' a 6, at Oxford (Ch. Ch. 979-83, tenor part wanting). But the great bulk of what remains to us of Redford's music is in the form of what is usually described in library catalogues as organ 'solos' or 'voluntaries.' Seeing that these pieces usually have Latin titles, it is much more probable that they were reductions in score of what were originally motets for voices. The reduction is not necessarily a complete one (particularly in the 'full,' as opposed to the 'verse' parts), and was no doubt used chiefly to support the voices. B.M. Add. MSS. 30,513 is in the hand of Thomas Mulliner, a later choirmaster at St. Paul's, and contains twenty or so of these motet arrangements by Redford, on two staves of from 5 to 8 lines each, or on a single staff of from 11 to 13 lines. These are enumerated below :

* 'Aurora luxit,' 'Christe qui lux' (2), * 'Eterne rerum conditor,' 'Pierne Rex altissime,' * 'Exultet celum laudibus,' 'Glorificamus,' * 'Iste Confessor' (2), * 'Lucem tuam' (2), * 'Miserere,' 'O Lux' (on the 'fourborden'), * 'O Lux,' * 'Salvator' (2), * 'Te per orbem terrarum,' 'Veni Redemptor,' * 'Verbum superius,' * 'Sine nomine' and 'A mensura.'
B.M. Add. MSS. 15,233, besides the 'Eterne Rerum' of above, also contains five others by Redford as below :

'Primo dierum,' 'Ad cenam Agni providi,' 'T.D.' 'Alme sidarum conditor,' and 'Tui sunt celi.'
B.M. Add. MSS. 29,996 is a similar collection of some 91 pieces. Nos. 1-50 appear to be in Redford's hand. He is probably author of all the anonymous pieces among these, but only the following (apart from motets already enumerated) bear his name :

'A solis ortu cardine,' 'Christe Redemptor,' 'Deus Creator omnium,' 'Felix nomenque' (2), 'Justus est palma,' 'Lucis creator,' 'Precatus est Moyse.'
Besides these, Ch. Ch. (1084) contains an isolated 'organ voluntary' (probably a motet 'sine nomine'), and organ scores of the following (Ch. Ch. 371) :

Agnus, 'Angelare [sic] fundamentum,' 'Miserere' (2) and 'Veni Redemptor.'
N.B.—Roy MSS. 31-35 is a 16th-century collection of 33 motets for 4, 5, 6, 7 and 8 v., possibly all by Derick GERARD (q.v.). vol. III. contains the following note: 'finis qd. master Redford' Redford, a contemporary of Gerard, may thus be the composer of some of these, but none of them is in his hand (cf. B.M. Add. MSS. 29,996).
J. M. F.

REDHEAD, RICHARD (b. Harrow, Mar. 1, 1820; d. Halingley, Sussex, Apr. 27, 1901), was a chorister at Magdalen College, Oxford, 1829-36, having received his musical education there from Walter Vicary, the organist. He was organist at Old Margaret Chapel (now All Saints' Church), Margaret Street, in 1839-1864, and from the latter date at St. Mary Magdalene, Paddington, a post he held till his death. His works are almost exclusively written or compiled for use in the Church of England, viz. 'Church Music,' etc., 1840, 'Laudes Diurnae, the Psalter and Canticles in the Morning and Evening Service,' 1843, Music for the Office of the Holy Communion, 1853; 'O My people,' anthem for Good Friday; 'Church Melodies, a collection of short pieces and Six Sacred Songs,' 1858; 'The Cele

* Described as being 'with a means.'

brant's Office Book,' 1863; 'Ancient Hymn Melodies, Book of Common Prayer with Ritual music, Canticles at Matins and Evensong, pointed as they are to be sung in churches and adapted to the Ancient Psalm Chants, and Parish Tune Book and Appendix,' 1865; 'The Universal Organist, a Collection of Short Classical and Modern Pieces,' 1866-81; 'Litany with latter part of Communion Service, Music to the Divine Liturgy during the Gradual, Offertorium and Communion, arranged for use throughout the year,' 1874; 'Festival Hymns for All Saints and St. Mary Magdalene Days, Hymns for Holy Seasons, Anthems, etc.' A. C.

REDI, TOMASO (b. Siena, 2nd half of 17th cent.; d. circa 1735), maestro di cappella of S. Casa di Loreto, Rome, at the time of his death, which position he had filled for about forty years. He composed masses and other church music of excellence. His controversy with Padre Martini about the resolution of a canon by Animuccia has been reported in various places. (See *Q.-L.* and *Fétis*.)

REDOUTE, public assemblies at which the guests appeared with or without masks at pleasure. The word is French, and is explained by Voltaire and Littré as being derived from the Italian *ridotto*—perhaps with some analogy to the word 'resort.'

Such assemblies soon made their way to Germany and England. They are frequently mentioned by Horace Walpole under the name 'Ridotto,' and were one of the attractions at Vauxhall and Ranelagh in the middle of the 18th century. In Germany and France the French version of the name was adopted. The building used for the purpose in Vienna, erected in 1748, and rebuilt in stone in 1754, forms part of the Burg or Imperial Palace, the side of the oblong facing the Josephs-Platz. There was a *grosse* and a *kleine* Redoutensaal. In the latter Beethoven played a concerto of his own at a concert of Haydn, Dec. 18, 1795. The rooms were used for concerts till about 1870. The masked balls were held there during the Carnival, from Twelfth Night to Shrove Tuesday, and occasionally in the weeks preceding Advent; some being public, i.e. open to all on payment of an entrance fee, and others private. Special nights were reserved for the court and the nobility. The 'Redoutentänze'—Minuets, Allemandes, Contredances, Schottisches, Anglaises and Ländler—were composed for full orchestra, and published (mostly by Artaria) for pianoforte. Mozart,¹ Haydn, Beethoven,² Hummel, Woelfl, Gyrowetz and others, have left dances written for this purpose. C. F. F.

REDOWA, a Bohemian dance which was introduced into Paris in 1845, and quickly

attained for a short time great popularity, both there and in London, although it is now never danced. In Bohemia there are two variations of the dance, the Rejdováč, in 3-4 or 3-8 time, which is more like a waltz, and the Rejdovacka, in 2-4 time, which is something like a polka. The ordinary Redowa is written in 3-4 time (M.M. = 160). The dance is something like a Mazurka, with the rhythm less strongly marked. The following example is part of a Rejdováč which is given in Köhler's 'Volkstänze aller Nationen'—

W. B. S.

REED (Fr. *anche*; Ger. *Blatt, Rohr*; Ital. *ancia*). The speaking part of many instruments, both ancient and modern; the name being derived from the material of which it has been immemorially constructed. The plant used for it is a tall grass or reed, the *Arundo donax* or *saliva*, growing in the south of Europe. The substance in its rough state is commonly called 'cane,' though differing from real cane in many respects. The chief supply is now obtained from Fréjus on the Mediterranean coast. Many other materials, such as lance-wood, ivory, silver and 'ebonite,' or hardened india-rubber, have been experimentally substituted for the material first named; but hitherto without success. Organ reeds were formerly made of hard wood, more recently of brass, German silver and steel. The name Reed is, however, applied by organ-builders to the metal tube or channel against which the vibrating tongue beats, rather than to the vibrator itself.

Reeds are divided into the 'Free' and the 'Beating'; the latter again into the 'Single' and the 'Double' forms. The free reed is used in the harmonium and concertina, its union with beating reeds in the organ not having proved successful. The vibrator, as its name implies, passes freely through the long slotted brass plate to which it is adapted; the first impulse of the wind tending to push it within the slot and thus close the aperture. In 'percussion' harmoniums the vibrator is set suddenly in motion by a blow from a hammer connected with the keyboard (see HARMONIUM). The beating reed in its single form is that of the

¹ See Koehel's Catalogue, No. 599, etc.
² See Nottebohm's Thematic Catalogue, Section II. pp. 135-7.

organ and the clarinet. In this the edges of the vibrator overlap the slot leading into the resonating pipe or tube, and so close it periodically during vibration. The reed, which is a thin blade or lamina, has roughly the form of a long parallelogram, and it is firmly secured for a portion of its length to the bed or table of the tube or mouthpiece in which the slot is cut. In the organ reed the necessary opening for the entrance of the wind at the free end is obtained by giving a slight curvature to the blade or reed; the pressure of the wind tends to close this opening, and vibration is thus set up. In the clarinet the same result is obtained by giving a slight curvature to the bed of the mouthpiece towards its tip, the under side of the reed itself being left perfectly flat (see CLARINET).

The double reed, as used in the oboe and the bassoon, is constructed of two segments united in a tubular form at one end, and splayed out and flattened at the other so as to leave a slight opening in shape like the section of a double-convex lens. The bassoon reed is placed directly upon the 'crook' of the instrument, but the oboe reed is built up upon a small tube or 'staple.' The exact appearance of both single and double reeds will be gathered better from the drawings than from a more detailed description.

Single Reed: 1. Clarinet reed, as held to the mouthpiece by a metal ligature.
Double Reeds: 2. Bassoon reed. 3. Bassoon reed, foreshortened to show the opening between the two blades. 4. Oboe reed.

The single reed is used also on the saxophone, and the double reed for the chaunter of the Highland bagpipe, but the drones of the bagpipe are sounded by single reeds of a most rudimentary character. It is possible to replace the double reed of the oboe and bassoon by a single reed of the clarinet type fitted to a small mouthpiece. The old *dolcino*, *alto-fagotto* or *tenoroon* (see *BASSOON*, 3) was so played in the band of the Coldstream Guards by Henry Lazarus when a boy. The idea has been revived of late years as a novelty, but neither the oboe nor the bassoon is capable of improvement in this way, although the saxophone, also a

conical tube, is well adapted to the single reed, being an instrument of wider calibre. (See *MOUTHPIECE*.) W. H. S.; addns. D. J. B.

REED, THOMAS GERMAN (b. Bristol, June 27, 1817; d. Upper East Sheen, Surrey, Mar. 21, 1888). His father was a musician, and the son first appeared, at the age of 10, at the Bath concerts as a PF. player with John Loder and Lindley, and also sang at the concerts and at the Bath Theatre. Shortly after, he appeared at the Haymarket Theatre, London, where his father was conductor, as PF. player, singer and actor of juvenile parts. In 1832 the family moved to London, and the father became leader of the band at the Garrick Theatre. His son was his deputy, and also organist to the Roman Catholic Chapel, Sloane Street. German Reed was an early member of the Society of British Musicians, he studied hard at harmony, counterpoint and PF. playing, composed much, gave many lessons, and took part in all the good music he met with. His work at the theatre consisted in great measure of scoring and adapting, and getting up new operas, such as 'Fra Diavolo' in 1837. In 1838 he became musical director of the Haymarket Theatre, a post which he retained till 1861. In 1838 he also succeeded Tom Cooke as Kapellmeister at the Royal Bavarian Chapel. Beethoven's Mass in C was produced there for the first time in England, and the principal Italian singers habitually took part in the Sunday services. At the Haymarket, for the Shakespearean performances of Macready, the Keans, the Cushman, etc., he made many excellent innovations, by introducing, as overtures and entr'actes, good pieces, original or scored by himself, instead of the rubbish usually played at that date. During the temporary closing of the theatre, Reed produced Pacini's opera of 'Sappho' at Drury Lane (Apr. 1, 1843). In 1844 he married Miss Priscilla Horton, and during the next few years directed the production of English opera at the Surrey, managed Sadler's Wells during a season of English opera, with his wife, Miss Louisa Pyne, Harrison, etc., conducted the music at the Olympic under Wigan's management, and made prolonged provincial tours.

In 1855 he started a new class of performance which, under the name of 'Mr. and Mrs. German Reed's Entertainment,'¹ made his name widely known in England. Its object was to provide good dramatic amusement for a large class of society who, on various grounds, objected to the theatres. It was opened at St. Martin's Hall, Apr. 2, 1855, as 'Miss P. Horton's Illustrative Gatherings,' with two pieces called 'Holly Lodge' and 'The Enraged Musician' (after Hogarth), written by W. Brough, and presented by Mrs. Reed, with the aid of her

¹ Detailed lists of these entertainments were given in previous editions of this Dictionary.

husband only, as accompanist and occasional actor. In Feb. 1856 they removed to the Gallery of Illustration, Regent Street. They then engaged John Parry, and later were joined by Miss Fanny Holland and Arthur Cecil, and soon after by Corney Grain and Alfred Reed. The repertory during this later period included various operettas and 'Opere di camera' of Offenbach, Sullivan ('Cox and Box,' and others with texts written by Gilbert). While the entertainment still remained at the Gallery of Illustration, Reed became lessee of St. George's Hall for the production of comic opera. He engaged an orchestra of forty and a strong chorus, and 'The Contrabandista' (Burnand and Sullivan), 'L'Ambassadrice' (Auber) and the 'Beggars' Opera' were produced, but without the necessary success. Reed then gave his sole attention to the Gallery of Illustration, in which he was uniformly successful, owing to the fact that he carried out his entertainments with talent, tact and judgment, and constant variety.

When the lease of the Gallery of Illustration expired, the entertainment was transferred to St. George's Hall, and there many more entertainments were produced both under Reed and under Corney Grain and Alfred Reed.

The librettists included F. C. Burnand, W. S. Gilbert, G. Grossmith, Gilbert & Beckett, A. Law, Comyns Carr and Walter Frith; and the composers German Reed, Molloy, King Hall, Corney Grain, Cotsford Dick, Eaton Fanning, A. J. Caldicott, E. Solomon and Walter Slaughter. A. C.

The accompaniments were played on a pianoforte and harmonium. For many years the 'Musical Sketches' of Corney Grain were a principal attraction of the entertainment. German Reed died in 1888, and in 1895 the entertainments came to an end with the deaths of Alfred German Reed, Mar. 10, and Corney Grain, Mar. 16. An attempt was made to revive the enterprise, but without effect.

MRS. GERMAN REED, née PRISCILLA HORTON (b. Birmingham, Jan. 1, 1818; d. Bexley Heath, Mar. 18, 1895), showed from a very early age unmistakable qualifications for a theatrical career, in a fine strong voice, great musical ability and extraordinary power of mimicry. She made her first appearance at the age of 10 at the Surrey Theatre, under Elliston's management, as the Gipsy Girl in 'Guy Mannering.' After this she was constantly engaged at the principal metropolitan theatres in a very wide range of parts. Her rare combination of great ability as a singer, with conspicuous gifts as an actress, and most attractive appearance, led to an engagement in 1837 with Macready for his famous performances at Covent Garden and Drury Lane, in which she acted Ariel, Ophelia, the Fool¹ in

'Lear,' the Attendant Spirit in 'Comus, Philidel in 'King Arthur' and Acis in 'Acis and Galatea.' Miss Horton then became the leading spirit in Planché's graceful burlesques at the Haymarket Theatre. On Jan. 20, 1844, she married German Reed, and the rest of her career has been related under his name. She died a few days after her son and Corney Grain. G.

REED, WILLIAM HENRY (b. Frome, July 29, 1876), violinist, has been a member of the London Symphony Orchestra from its formation (1904), and its leader since 1912.

Reed studied under Sauret at the R.A.M., where he also worked at composition and theoretic studies with Corder and Prout. He is accomplished both as a solo and chamber music player, and took part in the first performances of Elgar's chamber works (see ELGAR). He is a teacher at the R.C.M., and has done much work as a conductor. Reed is a skillful composer for the orchestra, and his tone poems 'The Lincoln Imp' (Hereford, 1921) and 'Æsop's Fables' (Hereford, 1924) are full of ingenious quips of humorous instrumentation. His works further include a set of variations for strings (Worcester, 1911), 'Will o' the Wisp' (orch.) (Gloucester, 1913), 'Two Somerset Idylls' for small orchestra (Worcester, 1926), a violin concerto in A minor, a Rhapsody for violin and orchestra and chamber music. C.

REED-STOP. When the pipes of an organ, controlled by a draw-stop, produce their tone by means of a vibrating tongue striking the face of a reed, the stop is called a reed-stop. (See REED; and ORGAN, Vocabulary of Stops.)

REEL (Anglo-Saxon *hreol*, connected with the Suio-Gothic *rulla*, 'to whirl'), an ancient dance the origin of which is enveloped in much obscurity. The fact of its resemblance to the Norwegian *Halling*, as well as its popularity in Scotland, and its occurrence in Denmark, the north of England and Ireland, has led most writers to attribute to it a Scandinavian origin, although its rapid movements and lively character are opposed to the oldest Scandinavian dance rhythms. The probability is that the reel is of Celtic origin, perhaps indigenous to Britain, and from there introduced into Scandinavia. In Scotland the reel is usually danced by two couples; in England—where it is now almost only found in connexion with the Sword Dance, as performed in the North Riding of Yorkshire—it is danced by three couples. The figures of the reel differ slightly according to the locality; their chief feature is their circular character, the dancers standing face to face and describing a series of figures of eight. The music consists of 8-bar phrases, generally in common time, but occasionally in 6-4. The Irish reel is played much faster than the Scottish; in Yorkshire an ordinary hornpipe tune is used. The following example, 'Lady

¹ See Macready's *Reminiscences*, by Sir F. Pollock, II. 97.

Nelson's Reel,' is from a MS. collection of dances in the possession of the present writer :

An example of the Danish reel will be found in Engel's 'National Music' (London, 1866).

One of the most characteristic Scottish reels is the Reel of Tulloch (Thulichan) :

Others, equally good, are 'Colonel M'Bean's Reel,' 'Ye're welcome, Charlie Stuart,' 'The Cameronian Rant,' 'Johnnie's friends are ne'er pleased' and 'Flora Macdonald.'

For the slow reel, see STRATHSPEY.

W. B. S.

In *News from Scotland* (1591) it is stated that 'Giles Duncan did go before them playing a *reill* or dance upon a small trump.' The Irish reel, which is apparently alluded to here, is in 2-4, or common time, and is always danced singly : the first eight bars, danced in steps, are followed by a round for the next eight bars, when the original steps are resumed, but reversed.

W. H. G. F.

REEVE, WILLIAM (b. 1757; d. June 22, 1815), after quitting school, was placed with a law stationer in Chancery Lane, where his fellow-writer was Joseph Munden, afterwards the celebrated comedian. Determined, however, upon making music his profession, he became a pupil of Richardson, organist of St. James's, Westminster. In 1781 he was appointed organist of Totnes, Devonshire, where he remained till about 1783, when he was engaged as composer at Astley's. He was next for some time an actor at the regular theatres. In 1791, being then a chorus singer at Covent Garden, he was applied to, to complete the composition of the music for the ballet pantomime of 'Oscar and Malvina,' left unfinished by Shield, who, upon some differences with the manager, had resigned his appointment. Reeve thereupon produced an overture and some vocal music, which were much admired, and led to his being appointed composer to the theatre. In 1792 he was elected organist of St. Martin,

Ludgate. In 1802 he became part proprietor of Sadler's Wells Theatre. His principal dramatic compositions were :

'Oscar and Malvina' and 'Tippoo Saib,' 1791; 'Orpheus and Eurydice,' partly adapted from Gluck, 1792; 'The Apparition,' 'British Fortitude,' 'Hercules and Omphale' and 'The Purse,' 1794; 'Merry Sherwood' (containing Reeve's best-known song, 'I am a Friar of orders grey'), 1798; 'Harlequin and Oberon,' 1799; 'Bantry Bay,' 'The Round Tower' and 'Harlequin Quilote,' 1797; 'Joan of Arc' and 'Ranah Droog' (with Mazzinghi), 1798; 'The Turquoise Girdle' (with Mazzinghi), 'The Embarkation' and 'Thomas and Susan,' 1799; 'Paul and Virginia' (with Mazzinghi) and 'Jamie and Anna,' 1800; 'Harlequin's Almanack' and 'The Blind Girl' (with Mazzinghi), 1801; 'The Cabinet' (with Braham, Davy and Moorehead), 1802; 'The Caravan,' 1803; 'The Dash' and 'Thirty Thousand' (with Davy and Braham), 1804; 'Out of Place' (with Braham) and 'The Corsair,' 1805; 'The White Plume,' 'Rokeby Castle' and 'An Bratach,' 1806; 'Kais' (with Braham), 1808; 'Tricks upon Travelers' (part), 1810; and 'The Outside Passenger' (with Whitaker and D. Corri), 1811.

He wrote music for some pantomimes at Sadler's Wells; amongst them 'Bang up,' by C. Dibdin, jun., containing the favourite Clown's song, 'Tippitywichtet,' for Grimaldi. He was also author of *The Juvenile Preceptor*, or *Entertaining Instructor*, etc. W. H. H.

REEVES, JOHN SIMS (b. Woolwich, Sept. 26,¹ 1818; d. Worthing, Oct. 25, 1900), tenor singer, son of a musician in the Royal Artillery, received his early musical instruction from his father, and at 14 obtained the post of organist at North Cray Church, Kent.

Upon gaining his mature voice he determined on becoming a singer, and, after a year spent in studying for the medical profession, in 1838 made his first appearance at the Newcastle-upon-Tyne Theatre as the Gipsy Boy in 'Guy Mannering,' and subsequently performed Dandini in 'La Cenerentola,' and other baritone parts. The true quality of his voice, however, having asserted itself, he placed himself under J. W. Hobbs and T. Cooke, and in the seasons of 1841-42 and 1842-43 was a member of Macready's company at Drury Lane, as one of the second tenors, performing such parts as the First Warrior in Purcell's 'King Arthur,' Ottocar in 'Der Freischütz,' and the like. He then went, to prosecute his studies, first to Paris under Bordogni, and subsequently to Milan under Mazzucato; he appeared at La Scala as Edgardo in Donizetti's 'Lucia di Lammermoor' with marked success. Returning to England he appeared at Vincent Wallace's benefit concert (Drury Lane, May 17, 1847) and other concerts, and was engaged by Julien for the stage of Drury Lane, where he made his first appearance on Monday, Dec. 6, 1847, as Edgar in 'The Bride of Lammermoor,' and at once took position as an actor and singer of the first rank. A fortnight later he performed his first original part, L'yonnel in Balfe's 'Maid of Honour.' Berlioz, who conducted the performance, engaged him for the performance of two parts of 'La Damnation de Faust' at Drury Lane, Feb. 7, 1848. In 1848 he was engaged at Her Majesty's Theatre, and

¹ *Memoirs of the Royal Artillery Band*, by H. G. Farmer (1904), 74 ff. He entered his name in a birthday book, however, as born on Oct. 31.

came out as Carlo in Donizetti's 'Linda di Chamounix,' appearing also as Florestan in 'Fidelio.' His operatic career was more or less overshadowed by the great place he made for himself in oratorio; he sang the part of Faust when Gounod's opera was given for the first time in English, at Her Majesty's Theatre, and for a few performances he sang Braham's old part of Sir Huon in 'Oberon.' Captain Macheath, in 'The Beggar's Opera,' was one of the last operatic parts in which he appeared.

In the autumn of 1848 he was engaged at the Norwich Musical Festival, where he showed his ability as an oratorio singer by an extraordinarily fine delivery of 'The enemy said' in 'Israel in Egypt.' On Nov. 24 following he made his first appearance at the Sacred Harmonic Society in Handel's 'Messiah.' The rapid strides which he was then making towards perfection in oratorio were shown—to take a few instances only—by his performances in 'Judas Maccabaeus' and 'Samson,' 'Elijah,' 'St. Paul' and 'Lobgesang,' and 'Eli' and 'Naaman' (both composed expressly for him). But his greatest triumph was achieved at the Handel Festival at the Crystal Palace in 1857, when, after singing in 'Messiah' and 'Judas Maccabaeus' with increased reputation, he gave 'The enemy said' in 'Israel in Egypt' with such remarkable power, fire and volume of voice, breadth of style and evenness of vocalisation, as completely electrified his hearers. He repeated this wonderful performance at several succeeding festivals, and in the Handelian repertory nothing was more striking than his delivery of 'Total Eclipse' from 'Samson.' He sang in Bach's 'St. Matthew Passion' under Sterndale Bennett in 1862.¹ His farewell concert took place at the Albert Hall on May 11, 1891, but he sang afterwards at Covent Garden and at music halls. In the quarter of a century during which his voice was at its best, he sang with Jenny Lind, Clara Novello, Tietjens, Adelina Patti and Christine Nilsson, and held his own with them all. No one could with greater certainty find the exact tone to fit the most varied emotions. It was a comprehensive talent indeed that could range at will from the levity of Captain Macheath's songs to the poignant pathos of Handel's 'Deeper and deeper still,' the emotional warmth of Beethoven's 'Adelaide' or the cycle 'An die ferne Geliebte.'

Sims Reeves married, Nov. 2, 1850, Miss EMMA LUCOMBE (d. Upper Norwood, June 10, 1895), soprano singer, who had been a pupil of Mrs. Blane Hunt, and appeared at the Sacred Harmonic Society's concert of June 19, 1839, and sang there and at other concerts until 1845, when she went to Italy. She returned in 1848, and appeared in opera as well as at concerts.

¹ This was the fourth performance of the work in London. See *Life of Sterndale Bennett*, by his son, p. 219, and Appendix A.

She retired from public life and occupied herself as a teacher of singing, for which she had a deservedly high reputation. After her death in 1895 Reeves married his pupil, Miss Maud Rene, with whom he went on a successful concert tour in South Africa in 1896. His son HERBERT, after a careful education under his father and at Milan, made his successful début at one of Ganz's concerts (June 12, 1880), and met with considerable favour from the public.

REFORMATION SYMPHONY, THE, Mendelssohn's symphony in D minor, op. 107, No. 36 of the posthumous works; completed in 1830. Produced Berlin, Nov. 1832, under his own direction; Crystal Palace, Nov. 30, 1867.

REFRAIN (Fr. *refrain*; Ger. *Reimkehr*). This word is used in music to denote what in poetry is called a 'burden,' i.e. a short sentence or phrase which recurs in every verse or stanza. It was probably first employed in music in order to give roundness and unity to the melody, and was then transferred to the poetry which was written especially for music. Such collections as the 'Echos du temps passé' give an abundance of examples in French music, where songs with refrains are most frequently to be found. 'Lilliburlero' may be cited as one English instance out of many. Schubert's four Refrain-Lieder were published as op. 95.

M.

REGAL, a small portable organ furnished in its earlier form with reed-pipes only. It was probably invented about the year 1460, when Henry Traxdorf of Nuremberg constructed an organ of which the sound 'resembled that of the shawm.' The reeds are of the 'beating' or clarinet type and not 'free' reeds of the harmonium type (see REED). The origin of the name has little, if anything, to do with royalty; in English orthography of the 16th century it is spelt Rigol or Regol, and this suggests that it is a contraction of the Latin *regula*, and that the instrument was employed in the first instance to 'rule' or 'regulate' the chanting of the monks in choir (compare such derivatives from the Latin *regula* as the Old German *Rigol* and *Regul*, or the Italian *rigola* and *regolo*). Some, however, consider that the word is a contraction of *rigabello*, a name given to an instrument used in Italian churches before the introduction of the organ, but of which no particular information is forthcoming (cf. CHENG or SHENG).

Such was the popularity of the new instruments that, under the name regal, its reed pipes were soon added to the flue pipes of the large organs and became the first 'reed stop' of which we have any definite record. In the first part of the 16th century the instrument itself was enlarged by the addition of flue pipes; for instance, Henry VIII. possessed a single

1. BIBLE REGAL (c. 1700). 2. PORTATIVE ORGAN (as used c. 1500).
3. POSITIVE ORGAN OR REGAL (J. Loosemore, 1650).

1, 2. Galpin Collection. 3. Blair Atholl Castle.

regal having 'one stoppe pipe of tinne, one Regall of tinne and a cimball'; another regal had 'one stoppe of pipes of wood with a cimball of tinne and the Regall of papire.' The tin, the wood and the paper were of course for the body of the pipes; the 'cimball' was a small 'mixture.' A fine example of a large English regal bearing the initials I.L. (John Loosemore of Exeter) and the date 1650 is preserved at the castle, Blair Atholl; it has five stops: Stopt Diapason, Principal, Twelfth, Fifteenth and Trumpet, the last the old regal stop (*PLATE LXV.* No. 3). Mace's table organ, as described in his *Musick's Monument* (1676), had a regal stop, which with the 'Hoboy' stop, worked by a foot pedal, produced the 'Voice Humaine.'

A specimen of the regal with reed pipes only, once the property of the late A. J. Hipkins, is in the collection of the R.C.M.; its compass is 4 octaves (short octave in bass), and the date 1629. Towards the end of the 16th century George Volf of Nuremberg rendered the instrument yet more portable, for he made the bellows in the shape of a book, the keyboard and pipes being enclosed therein after performance: this form became known as the 'Bible' or 'Book Regal,' and specimens are very rare and valuable. There are at the present time (1926) three examples in England: one at the R.C.M. and lately the property of Mrs. Pagden and Miss Ferrari; another is in the possession of Mr. Spencer Portal at Bere Hill, Whitchurch, Hants; and the third is in the writer's own collection (see *Old English Instruments of Music*, Methuen): they are all of late 17th century or early 18th century date (*PLATE LXV.* No. 1).

The regal was not only employed in the churches but was in general use for entertainments and dramatic performances. In Edward's 'Damon and Pythias' (1565) there is a stage direction, 'here the regales play a mourning song' as Pythias is borne off to prison. In 1562 at the feast of the Guild of Parish Clerks there was after dinner 'a goodlie playe of the children of Westminster with waits and regales and singinge'; whilst in the mystery and morality plays it figures largely, being carefully distinguished in the accounts from the organ. In the 16th century William Tresorer held the court appointment of regal-maker at the annual salary of £10, and as late as 1684 we find Henry Purcell enjoying a similar office as 'keeper, maker, repairer and tuner of the King's Regalls, Virginals and Organs.' In 1696 it was divided between Dr. John Blow and Bernard (Father) Smith, 'and the longer liver to enjoy the whole place.' In 1779 the tuner of the regalls 'received £56 per annum, though it is commonly stated that Bernard Gates, who died in 1773, was the last to hold this historic post.

In the inventory of the musical instruments belonging to King Henry VIII. we find double regals as well as single regals mentioned, and also combined instruments such as 'an instrument with a single Virginal and a single Regal,' and another, 'with a Double Virginal and a Double Regal.' Many explanations have been given of the meaning of the words 'single' and 'double' in this particular association. Some would refer it to the number of bellows, but the virginal required no bellows at all, and the terms are as frequently applied to that and other keyboard stringed instruments. Dr. Rimbault (*The Organ*, 1870) considered that it referred in part to the rows or ranks of pipes, single regals having but one rank, double regals more than that number: but in the inventory above mentioned there are single regals with 2, 3 and even 4 stops requiring 2, 3 or 4 ranks of pipes. Sir George Grove and A. J. Hipkins held that it referred wholly to the number of keyboards, the single regal or virginal having one manual or keyboard, the double two keyboards; but whilst it is true that a two-manual virginal or clavicymbal appears at the end of the 16th century, introduced for the first time by Hans Ruckers, there is no example on record at all of a two-manual regal: moreover, two of King Henry's double regals had only 2 stops, and what need of just 2 stops for a two-manual instrument?

Surely the terms 'single' and 'double' as used in the 16th century relate to the compass of the instrument, whether regal or virginal? Playford (*Introduction to the Skill of Music*, 1661) states that notes 'below the gamut in the Basses [i.e. Bass G] are called double notes,' and adds, 'I have therefore expressed them with double letters.' A single regal or virginal therefore descended to single C (tenor C) or to G (Gamut), and a double regal or virginal an octave lower to double C or to double G. Specimens of instruments made in the first half of the 16th century having such a compass are still in existence. Moreover, we have an interesting confirmation of the writer's view given us by Praetorius (1618), for he tells us that in England the fagotto (bassoon) descending to single G (Gamut) was called the 'single courtal,' and that reaching double C the 'double courtal.'

In the 17th and later centuries, when two-manual organs and harpsichords were in common use, the terms single and double were then transferred to the number of keyboards.

REGAN, ANNA, soprano singer. (See SCHIMON.)

REGENT'S BUGLE, see BUGLE.

REGER, MAX (b. Brand, Bavaria, Mar. 19, 1873; d. Leipzig, May 11, 1916), was the son of a teacher at Brand. A year after his birth the father was transferred to Weiden, where

F. W. G.

subsequently the boy's musical education was begun, first in piano-playing by his mother, and later by a young teacher, Adalbert Lindner. His rapid progress—from 1886–89 he was organist at the Weiden Catholic church—led the parents to consult Hugo Riemann, then living at Sondershausen, and in 1890 young Reger went to him as pupil, following him the next year to Wiesbaden and soon becoming a teacher in the same conservatoire as his master. His studies (which hitherto had been chiefly of pianoforte music from Beethoven to Liszt, while a hearing of 'Die Meistersinger' and 'Parsifal' at Bayreuth had made a lasting impression) were directed by Riemann to the works of Brahms and Bach, and his leaning towards strict and definite musical forms was thereby specially accentuated. In 1896 Reger performed his military service in Wiesbaden, in the course of which he suffered a serious illness which occasioned his discharge. Moreover, the mode of life there had obviously assumed a character which threatened to lead to spiritual and physical ruin. He was brought home by his sister and again received by his parents in Weiden, where he stayed from 1898–1901. Here his creative output experienced an enormous increase, especially of works for organ, chamber music and songs. In 1901, wishing to support himself by his work, he went to Munich, where he began to encounter serious strife with the whole of the German musical world. Having already renounced the influence of Riemann, he now intended to wage war under the banner of 'progress,' and was then attacked from every camp. The conquests which, however, he soon made among the public he owed chiefly to his pianoforte-playing, which attracted great attention on account of its extremely delicate musical qualities.

Reger appeared before the public less as a soloist (and then as a rule with the piano works of Bach and Mozart) than as an accompanist or performer of chamber music. Thus, through his recitals, his songs and chamber music became more and more known, although at first they seemed abnormal and strange, and their great beauty was but gradually recognised. He found the most opposition amongst the critics, who attacked him with extreme obstinacy, and in many cases to the end of his life. Soon, however, more and more voices spoke in his behalf, and his concert tours brought him ever wider appreciation throughout Germany, as well as in Prague and Vienna. He could no longer be overlooked, as, owing largely to the support of the great organist, Karl STRAUBE (q.v.), he had now for long enjoyed the reputation which was due to him in his own domain, composition for the organ. Reger swiftly paralleled for the organ the magnificent development which orchestral music had undergone in the 19th century. He was a Roman Catholic by up-

bringing, but his great fantasias on Protestant hymns, and on his deeply venerated B-A-C-H with their mighty closing fugues, and the great fantasia inspired by Dante's *Inferno*, together with the 'Variations on an Original Theme,' show that he had imbibed other traditions and created a prominent landmark in the development of organ music.

Soon after his arrival in Munich, Reger married Elsa von Bagensky, whom he had first met in Wiesbaden. His financial position was by no means secured, though his compositions, after a long period of neglect by the publishers, again began to appear. Neither they nor the concerts, however, brought him much money at first, so that he was forced to take up teaching work, in the course of which he steadily laid stress on the old masters, on clear and sure moulding, and thorough command of technique. He sharply reproved any laxities of harmony, his own theory of harmony being, as a result of Riemann's teaching, strictly logical.

With ever-increasing confidence Reger now took his place in the musical world, his keen sense of humour enabling him to overcome many difficulties, and the tone of the concluding fugues which so frequently crown his work became increasingly sure. His sonata in C major for violin and piano, in which, as in some earlier work, he once more expresses his despair and defiance, was the cause of renewed hostility, but it also attracted widespread attention. Some piano works of monumental structure, the 'Variations on a Theme from Bach,' for two hands, then the beautiful 'Variations on a Theme from Beethoven,' and the titanic 'Passacaglia and Fugue' for four hands on two pianos, and later the triumphant violin sonata in F sharp minor, already met with wide admiration.

Musical circles awaited his first orchestral work with great eagerness. It was his opus 90, though it must be remembered that a large number of his youthful works, being unpublished, are not counted, and that in a majority of cases an opus number includes a whole series of works, often on a large scale. This, Reger's first orchestral work, 'Sinfonietta,' appeared in 1906, when he was 33 years of age. He did not wish to begin with a big heroic symphony, and while in the accompaniment to a chorus, 'The Song of the Glorious,' he had, like Strauss, made the greatest possible use of wind-instruments, in the 'Sinfonietta' he employed a smaller orchestra with but one trombone. But he wove a wonderful texture of music with all the voices, determined to get the maximum of sound and melody, so that the result had nothing at all in common with modern 'orchestral effects.' Reger held two appointments in Munich—the Akademie der Tonkunst (Academy of Music) had appointed him its teacher in composition, theory and organ, and pupils

came streaming to him; the Porges Choral Society entrusted him with the direction of its concerts. But in neither of these posts could he find a satisfactory permanent occupation. He was still the object of too much jealousy and hostility, and he never in his life acquired the ability to face the world with the cool diplomacy which is necessary in posts of the kind.

In 1907 he was appointed Musical Director at the University of Leipzig, but soon relinquished the post, finding the duties connected with it uncongenial. But the teaching post at the Leipzig Conservatory, which he undertook at the same time, he retained to the end of his life. Even on the day of his death he gave instruction at this institution. Strangely enough, he composed no organ music during the Leipzig period, but several choral pieces, partly with and partly without orchestral accompaniment. Amongst them were 'Die Nonnen' (The Nuns), 'Der römische Triumphgesang' (Roman Hymn of Triumph), 'Die Weihe der Nacht' (Sacredness of Night), his wonderful motets, written for the Thomaner-Chor, and the prodigious 'Psalm 100' for choir and orchestra, with its gigantic concluding fugue. For orchestra alone he had already written in Munich, besides 'Sinfonietta,' the light but thoughtful 'Serenade,' and the majestic and humorous 'Variations on a Theme from Hiller'; to these he added in Leipzig the violin concerto and piano concerto, with the 'Symphonic Prologue to a Tragedy,' the deepest and most powerful of his orchestral compositions, and the 'Comedy Overture,' short and sprightly, like a filigree. He resumed the composition of chamber music, piano-pieces and ballads. At Munich Reger had already begun to compose, besides his larger and more difficult works, small pieces which were less likely to prove a strain on performers and audiences. He continued the long series of 'Schlichte Weisen,' sonatinas, and the piano-pieces 'Aus meinem Tagebuch' (From my Diary). Some of the 'Schlichte Weisen' soon found their way abroad and made a name for Reger with the wider public. At this time, too, he turned to a form of music which he had cultivated in Weiden, and wrote a number of notable sonatas for the violin alone—a type of composition which had not been successfully attempted since Bach.

In 1911 Reger was invited by the aged Duke George to be director of the court orchestra at Meiningen. He was faced with the task of reviving the fame of the Meiningen orchestra, which it had owed chiefly to Hans von Bülow and Fritz Steinbach. In the preceding years Reger had achieved great results as a conductor in various cities, both with his own works and those of other composers, above all through the subtlety of his interpretation and his ability to establish in the orchestra

complete understanding of his own musical feeling. In Meiningen he was now able further to develop his method of direction, by constant work with an absolutely first-rate orchestra. He also engaged in minute study which considerably influenced his own orchestral compositions. He continually strove to attain greater 'transparency.' His ideal for orchestral music became in an ever-increasing degree the perfect clearness of Mozart. But he did not scorn to attempt also the modern sound-experiments of a Debussy. He composed in Meiningen a series of orchestral works which record the various phases of his work—'Das Konzert im alten Stil' (Concerto in the old style), the 'Romantische Suite,' 'Böcklin Suite,' the 'Ballet Suite,' and later 'Variations on a Theme from Mozart.' In these works he betook himself for a time to the field of descriptive 'programme' music, in order to test in every way the resources of the orchestra. Reger's concert tours with the Meiningen orchestra became triumphal progresses. He now cultivated the greatest simplicity as a conductor, the main effects being achieved by elaboration in the rehearsals, and the performances made a profound impression. It was always the music, and the music alone, that the conductor threw into relief, and not himself or the artistry of his orchestra. The result was that works often heard before now appeared as a new revelation.

Reger's activities at Meiningen came to an end after only two years. The death of Duke George brought to a close this brilliant epoch in the artistic life of the city. Reger went to reside at the university town of Jena, where, far from the madding crowd of the great cities, and yet in a centre of intellectual stimulus, he wished to devote himself to composition, enjoying the society of gifted men, as he had earlier done at Leipzig. He wished to give only occasional concerts in the large musical centres. In Jena he wrote a whole series of works, including chamber music, pieces for choir and orchestra, for the piano and for the organ, hymns and unaccompanied choral songs, besides 'Kinderlieder' and other songs with piano accompaniment. The composer was turning over in his mind plans for a great oratorio and for a symphony. What he had already accomplished he conceived only as a preparation for the great works he had planned. Before he could attempt these he was cut off suddenly in 1916 at the age of 43. He succumbed to a heart attack in his bed at Leipzig, whither he used to travel every week to teach at the Conservatoire.

His life had been laborious and full of strife, but in his later years full of success also. The outward honours which fell to him—he was Generalmusikdirektor, Hofrat, Professor and Honorary Doctor of two universities—had but

little charm for him. That his works, owing as they did so little to outward sensation and so much to inward concentration, brought him comparatively wide recognition in his own lifetime, no doubt meant far more to him. To him, his life was an uninterrupted period of study and labour, and the only merit he saw in his successes was that due to unremitting toil. To the great masters of the past he looked up with the deepest veneration. Whether he would ever be counted of their number, he left calmly to the test of time. He loved his native country as a matter of course, and declined the most attractive offers of permanent posts abroad. Concert tours in Holland and Russia brought him great success, but failed to induce him to undertake such journeys frequently or for extended periods. He visited England in 1909, and took part in chamber concerts in London, which introduced many of his works of the kind to a public which had previously known him chiefly through his organ music played by Walter Parratt and other English organists. To everybody who was not hostile to him, he was kind and affectionate, while with persons of rank or influence he was open and unconstrained. A human side to his nature was a strong, pithy sense of humour, with regard to which a large number of anecdotes were current in Germany. Everything which was not perfectly honest and straightforward was repugnant to him. Reverence for all things divine was one of his chief characteristics, and shines forth clearly in his music. If this trait in his music could help to awaken an echo in the whole world, he would have attained the greatest and most beautiful of all human purposes.

K. H. (transl. Cecil Lewis).

- Op.
 1. Sonata No. 1 for vin. and PF. in D min.
 2. Trio for PF., vin. and vla., B min.
 3. Sonata No. 2 for vin. and PF., in D.
 4. Six Songs.
 5. Sonata No. 1 for v'cl. and PF., in F min.
 6. Songs for 4 voices with PF.
 7. Three Organ pieces.
 8. Five Songs.
 9. 'Walter Kapricien' (PF. pieces for 4 hands).
 10. 'Deutsche Tänze' (PF. pieces for 4 hands).
 11. Seven Waltzes for PF. solo
 12. Five Songs.
 13. 'Lied Blätter,' PF. solo.
 14. Five Duets for soprano and alto, with PF.
 15. Ten Songs.
 16. Suite in E min., for organ.
 17. 'Aus der Jugendzeit,' twenty pieces for PF. solo.
 18. 'Improvisation,' PF. solo.
 19. Two Sacred Songs, with organ.
 20. Five Humoresken for organ.
 21. 'Hymn,' 'An der Gasse,' male chorus and orch.
 22. Six Waltzes for PF., C min. (MS.).
 23. Four Songs, with vin. and PF.
 24. Six Pieces for PF. solo.
 25. Aquasellen for PF. solo.
 26. Seven Fantasienstücke for PF. solo.
 27. Fantasia for organ on 'Rin' feste Burg.'
 28. Sonata No. 2 for PF. v'cl. and in G min.
 29. Fantasia and Fugue, C min., for organ.
 30. Fantasia for organ on 'Freu' dich sehr, o meine Seele.'
 31. Six Songs.
 32. Seven Characteristic Pieces for PF. solo.
 33. Sonata for Organ, F sharp min.
 34. 'Pièces pittoresques' for PF. (4 hands).
 35. Six Songs.
 36. 'Bunte Blätter,' nine small pieces for PF. solo
 37. Five Songs.

1 *Blumens;* other authorities give quartet.

- Op.
 (Two volumes of Folk-songs for male chorus (a 5-9).
 38. Two volumes of Folk-songs for mixed chorus (a 6-8).
 39. Sacred German Folk-songs (a 7-13).
 40. Seven Choruses for male voices.
 41. Three Six-part Choruses for mixed voices.
 42. Fantasia on 'Wie schon leuchtet uns der Morgenstern.'
 43. II. Dittio on 'Stral' mich nicht in deinem Zorn' (both for organ).
 44. Sonata No. 3 in A for vin. and PF.
 45. Four Sonatas for vin. alone in D min., A, B min. and G min.
 46. Eight Songs.
 47. Ten Pieces for PF.
 48. Six Intermezzi for PF.
 49. Phantasia and Fugue on B A C H for organ.
 50. Six Trios for organ.
 51. Seven Songs.
 52. Two Sonatas for clar. and PF. (A flat maj. and F sharp min.).
 53. Two Romances in G and D, vin. and orch.
 54. Organ Fantasia on 'Alle Menschen müssen sterben.'
 55. Dittio, 'Wachet auf, ruft uns die Stimme.'
 56. Dittio, 'Halleluja, Gott zu loben.'
 57. Seven 'Silhouetten' for PF.
 58. Two String Quartets in G min. and A.
 59. Fifteen Songs.
 60. Five easy Preludes and Fugues for organ.
 61. Symphonic Fantasia and Fugue for organ.
 62. Six Burlesken for PF. (4 hands).
 63. Twelve Pieces for organ.
 64. Sonata for organ in D min.
 65. 'Palmensonntagsmorgen' (5 voices a cappella).
 66. Die evangelische Kirchenchor' (for 4 voices), forty Easy Compositions for church performance.
 67. Sixteen Songs.
 68. Twelve Monologues for the organ.
 69. Quintet in C min., PF. and strings.
 70. Twelve Pieces for organ.
 71. Twelve Songs.
 72. Fifty-three Easy 'choral Vorspiele.'
 73. Six Songs.
 74. Ten Organ Pieces.
 75. Seventeen Songs.
 76. 'Gesang der Verkörten' (for 5-voiced choir and orch.)
 77. Sonata No. 4 for PF. and vin., 'ma'.
 78. Variations and Fugue on an original theme for organ.
 79. String Quartet No. 3 in D min.
 80. Eighteen Songs.
 81. Pilsen 'Schlichte Weisen' for PF. and voice.
 82. (a) Serenade in D for flute, vin. and vla.
 83. (b) Trio in A min. for vin., vla. and v'cl.
 84. Sonata No. 3 for v'cl. and PF. in F.
 85. Fourteen volumes of Pieces for PF. for organ, for PF. and vin. for PF. and v'cl. and songs.
 86. Five Easy Preludes and Fugues, Bach's Two-part Inventions arranged as organ trios (with K. Straube) and Twelve Pieces for organ.
 87. Variations and Fugue on a theme of J. A. Bach, for PF. solo.
 88. Twelve small pieces for PF. solo, 'Aus meinem Tagebuch.'
 89. Songs for male chorus.
 90. Sonata No. 5 for PF. and vin. in F sharp min.
 91. Four Preludes for the organ.
 92. Variations and Fugue on a theme by Beethoven for two PFs.
 93. Two Compositions for vin. and PF.
 94. Four Songs.
 95. Two Sonatas (E min. and D) for PF. solo.
 96. Sinfonietta for orch.
 97. Seven Sonatas for vin. alone
 98. Suite in G min. for organ.
 99. Two Suites for PF. and vin., F maj. (in old style).
 100. Six Pieces for PF.
 101. Serenade, G maj., orch.
 102. Introduction, Passacaglia and Fugue, two PFs.
 103. Four Songs.
 104. Five Songs.
 105. Six Preludes and Fugues for PF.
 106. Variations on a theme of J. A. Hiller, orch.
 107. Vin. Concerto, A maj.
 108. Trio, PF., vin. and v'cl.
 109. (a) Suite for PF. and vin., A min.
 110. (b) Two Sonatinas, vin. and PF.
 111. Six Songs.
 112. Sacred Songs, with organ.
 113. Psalm 100, choir, orch. and organ.
 114. Sonata No. 3, clar. and PF., B flat maj.
 115. Symphonic Prologue to a Tragedy.
 116. String Quartet No. 4, E flat.
 117. Sacred Songs, with organ.
 118. (a) Duets, soprano and alto, with PF.
 119. (b) and (c) Choruses for women's voices.
 120. 'Die Nonne,' choral and orch.
 121. PF. Quartet, D min.
 122. Concerto, PF. and orch., F min.
 123. 'Episodes,' PF.
 124. Sonata No. 4, v'cl., A min.
 125. Preludes and Fugues, vin. alone.
 126. Sextet for strings, F maj.
 127. 'Die Weihe der Nacht,' alto solo, male chorus and orch.
 128. Comedy Overture, orch.
 129. String Quartet No. 5, F sharp min.
 130. Sonata No. 6, PF. and vin.
 131. Concerto in the olden style.
 132. 'An die Hoffnung,' alto solo and orch.
 133. Romantic Suite.
 134. 'Römischer Triumphzug,' male chorus and orch.
 135. Introduction, Passacaglia and Fugue, organ.
 136. Four Tone-poems after Böcklin, orch.
 137. Nine Pieces for organ.
 138. Ballet-suite, orch.
 139. Preludes and Fugues, vin. alone; Duets, Canons and Fugues for vin.; Three Suites, v'cl. alone. Three Suites, vla. alone.
 140. Variations on a theme of Mozart, orch.

- Op.
 129. FF. Quartet, A min.
 124. Variations on a theme of Telemann, for PP.
 128. Choral Preludes and Fantasia and Fugue in D min. for organ.
 136. 'Hymn der Liebe', bassline solo and orch.
 137. Twelve Sacred Songs.
 138. Eight Sacred Songs for mixed choir.
 139. Sonata No. 7, FF, and vln., C min.
 140. 'Vaterländisch', Overture, orch.
 141. (a) Serenade, string trio, G min.; (b) string trio, D min.
 142. Five Nursery Rhymes for soprano.
 143. Twelve Pieces for PP.
 144. 'Requiem' and 'Der Einsiedler', songs for mixed chorus and orch.
 145. Seven Pieces for organ. (Reger's last composition)
 146. Quintet, clar. and strings, A maj.
 147. Andante and Rondo Capriccioso, vln. and orch., unfinished.

Without opus numbers are:—

- Four 'Heitere Lieder'.
 Four Sacred Songs.
 Piano Transcriptions of songs by Hugo Wolf, Jensen, Brahms and Richard Strauss.
 Piano Transcription (4 hands) of Bach's Orchestral Suites and Brandenburg (4 parts), Wolf's 'Penthesilea' and 'Italian Serenade', etc.
 Cantatas, 'O wie selig' for mixed choir and congregation, with accompaniment of strings and organ; for Good Friday, 'O Haupt voll Blut und Wunden', for alto and tenor (or soprano) soli, mixed choir, vln. solo, oboe solo and organ; 'Von Himmel hoch'; 'Meinen Jesum Christ nicht'.
 For male chorus:
 Nine Volkslieder.
 Five Volkslieder.
 Twelve Madrigals.
 For mixed choir:
 Eight Volkslieder.
 Six Volkslieder.
 Twelve German Sacred Songs (in three books).
 'Komm, heiliger Geist'.
 'Es sei ein Than', for 5-part choir.
 'Vom Himmel hoch', for 4-part chorus, two solo vlns., choir and congregation, with organ or harmonium.
 For organ—Schule des Triospiels (arrangements of Bach's 2-part inventions, with K. Straube)
 Variations on 'Heil unserm König, Heil', and 'Heil dir im Siegerkranz'.
 Prelude and Fugue, G sharp min.
 Romanze (also for harmonium).
 Songs with organ or piano.
 Arrangements of fifteen of Bach's clavier works for organ.
 Arrangements of songs for harmonium.
 Prelude and Fugue, vln. alone.
 FF. and vln.—Petite Caprice, Romanze (G maj.) and Wiegengel.
 For PP and vcl.—Caprice.
 For voice and vcl.—Sixteen Songs.
 FF. solo—Perpetuum mobile, Elegie, Humoreske, Romanze, Moment musical, Scherzino, Albumblatt, Frühlingsspiel, Mélodie, two Humoresken, Nachstück.
 Canons in all maj and min. keys—Book I. in two parts, Book II. in three parts.
 Four special studies for left hand alone:—Scherzo, Humoreske, Romanze and Prelude and Fugue.
 Five FF. studies (arrangements of Chopin's works).
 Regiment-Marsch der ehemaligen Hannoverschen Armee (arrangement).
 Literary work—Beiträge zur Modulationslehre (Contribution to the Rules of Modulation).

REGGIO, PIETRO (b. Genoa, first quarter of 17th cent.; d. London, July 23, 1685¹), was private musician (lutenist and singer) to Queen Christina of Sweden after her abdication. After her final departure from Rome, Reggio came to England and settled at Oxford, where, in 1677, he published *A Treatise to sing well any Song whatsoever*. Evelyn heard him sing in Sept. 1680 and July 1684, and says that he had set some of Abraham Cowley's poems to music. In 1680 he issued a book of songs dedicated to the king, and containing the earliest setting of 'Arise, ye subterranean

winds,' from Shadwell's 'Tempest,' afterwards set by Purcell. (See *Sammelbände* of the Int. Mus. Ges. v. 553.) Seven Italian songs are in the British Museum in MS., two duets in the Fitzwilliam Museum at Cambridge, and a three-part motet at Ch. Ch., Oxford. Reggio was buried in St. Giles's in the Fields. M.

REGINO (d. Treves, 915), abbot of the Benedictine Monastery of Prüm, Eiffel, in 892, and of St. Maximin at Treves, c. 899. He wrote a treatise, *De harmonica institutione*; also *Tonarius sive octo toni cum suis differentiis*. (For republications see Q.-L.; biogr. in *Fétis*.)

REGIS, JEAN, a Flemish musician of the latter part of the 15th century, usually reckoned along with Busnois, Caron, Obrecht and Okeghem as belonging to the transitional school of composers between Dufay and Binchois on the one hand, and Josquin des Prés on the other. Tinctoris mentions him with special distinction. He was for a time master of the choir-boys in Antwerp Cathedral, and is also supposed to have been in personal relation with Dufay. Though he does not appear, like Dufay, to have ever been a member of the Papal Choir, two of his masses were copied into the great choir-books of the Sistine Chapel, which are so far interesting as showing the curious custom of the time in combining different liturgical texts. Thus in one of them, while the two upper voices sing the usual words of the Mass, the tenor sings the 'Ecce ancilla Domini' and the bass 'Ne timeas Maria,' which would seem to show that this Mass was specially composed for the festival of the Annunciation. In the other the alto and tenor sing 'Dum sacrum mysterium cerneret Joannes,' which would imply the work to be intended for the festival of St. John the Evangelist. Regis is also the author of a Mass, 'L'homme arme,' in the archives of Cambrai, and of a few other pieces in the collections of Petrucci. The setting of a popular song, 'S'il vous plaisait,' a 4, transcribed by Kiesewetter in his *Schicksale und Beschaffenheit des weltlichen Gesanges*, serves to show the skill of Regis as a contrapuntal harmonist of the time in a very favourable light.

J. R. M.

REGISTER, (1) of an organ. Literally a set of pipes as recorded or described by the name written on the draw-stop; hence, in general, an organ-stop. The word 'register' is, however, not quite synonymous with 'stop,' for we do not say 'pull out, or put in, a register,' but 'a stop,' although we can say indifferently 'a large number of registers' or 'of stops.' The word is also used as a verb; for example, the expression 'skill in registering' or 'registration' means skill in selecting various combinations of stops for use. The word 'stop' is, however, never used as a verb in this sense. (See ORGAN; ORGAN-PLAYING; REGISTRATION.)

J. S.

¹ Hawkins.

(2) Of the voice; a classification of parts of the voice according to method of production, as 'head register,' 'chest register.' (See SINGING, pp. 768, 769.)

(3) The term is also used, though not very satisfactorily, of parts of the scale according with the general pitch of voices, e.g. 'soprano register,' 'tenor register.'

REGISTRATION. The art of combining and contrasting the tones produced from the several stops (registers) of the organ.

There is no doubt whatever that as soon as organs contained any considerable number of stops or registers, the practice of contrasting, combining and blending them became recognised as one of the most valuable elements in the organist's art. The specifications of the Italian organs of the 16th and 17th centuries show us that very little could have been done on them in the direction of tone-colour, and the works of Frescobaldi (1583-1643), organist of St. Peter's, Rome, bear out this assumption. They are for the most part vivacious toccatas and slow canzoni which would be played on the flue-work of one manual for a whole movement, possibly followed by a movement on the other manual. There is ample evidence that in both France and Germany, for nearly a century before Bach's time, the effective use of the stops was regarded as something both of an art and a science. Before Buxtehude's time, the pedal was being used in an extraordinarily free way for the 'giving-out' of the melody and also for 2-part work (double pedal). The latter, when used for a chorale prelude, as in the partita, 'Jesus Christus unser Heiland,' of Tunder (1614-67), who preceded Buxtehude at Lübeck, always indicates the use of 8-foot stops on the pedal.

The Lübeck organ in Buxtehude's time was a magnificent instrument with 3 manuals and a pedal-organ, which contained 2 stops of 32 ft., 2 of 16 ft., an 8-ft., 2 of 4 ft., a *Decembass*, 2 mixtures and 4 reeds; and although there are no details of his registration, there is every reason to believe that Bach's method was founded to a large extent on Buxtehude's. At any rate, the rapid changes of manuals in Bach's music are in the same style as Buxtehude's. Bach always kept his mind very alert with regard to French music; for Paris had a school of organists whose art was by no means immature; and their organs were well supplied with varied stops. Couperin's organ at St. Gervais, Paris, still exists. It has five manuals (2 short ones) and a pedal-organ. Its best stops are the Cromhorne (clarinet), the Bassoon-hautbois, the Cornet (a soft 8-ft. with delicious mixtures on the récit.), the Flute and the Trumpet on the echo. The Viole, referred to so frequently in Couperin's music, is now missing. Records of the music of the period show that the practice of 'echoing' was a

frequent device. A 'Qui tollis' by Nicolas Gigault (b. circa 1645) exists, in which an elaborately figured melody is given to an 8-ft. trumpet on the pedals, accompanied by 4-part counterpoint on the *Plein Jeu*. Nicolas de Grigny (c. 1671-1703), organist of Rheims cathedral (one of the composers whose works the young Bach copied out for study), in his 'Livre d'orgue' (published 1701), marked many passages for Trompette or Cromorne 'en taille' in the bass, with the Tierce or Cornet in the right hand. We notice at once that this was a combination very similar to that frequently used by Bach. In his specification for the restoration of the organ at Mühlhausen, Bach particularly wished a Tierce added to the Quint, so as to make a beautiful Sesquialtera, which 'will be useful for the execution of all kinds of inventions.'¹ He asked for extra wind-pressure in order to make the new 32 Untersatz (Sub-bass) speak properly. This stop, he says, must have a special wind-chest. The Bombarde is to be given a rounder tone. He replaces the Trumpet on the great-organ by a 16-foot Fagotto of delicate scale, again 'to serve for all kinds of new inventions, as well as pour la musique' (in French; i.e. for playing the *basso continuo* with the orchestra). He replaces the Gemshorn with an 8-foot Viol di Gamba, a favourite stop with him, and he asks for the tremulant stop to be made regular in its vibration.

Authentic details of Bach's own registration are sparse, but those that exist are very significant. They point to a highly original method of tone-colouring, one scarcely known to us at the present day. From his pupil Walther's copy, brought away from Bach's opening recital on the restored organ at Mühlhausen, it is easy to reconstruct Bach's registration of the Choral-prelude 'Ein feste Burg' (Peters VI., No. 22). The piece is wholly in the spirit of the virtuoso which Bach undoubtedly was. He opened with the left hand on a combination including a delicate 16-foot Fagotto; the right hand entered in bar 3 (or 4) on another manual with a combination which included the Sesquialtera. Bars 20 to 24 were played with both hands on the 2nd manual with soft pedal stops (including the new 32-ft. Sub-bass). He would go back to the duet arrangement in bar 24, letting the pedal proclaim the chorale in the bass. At bar 35, he would go to the 3rd manual, the right hand returning to the first for the chorale in bar 41; and the full Great would be used for both hands from bar 48 to the end. It is a most stimulating thing to play through this wonderful piece with the Mühlhausen specification on the organ-desk. The set of chorale-preludes published by Schübler afford other significant examples. The two, 'Kommst

¹ The organ at St. Thomas's, Leipzig, possessed three sesquialters stops, the one on the Positiv being added between 1720-31 by Schübe.

zu nun, Jesu' (Peters VII. p. 16) and 'Wer nur den lieben Gott lässt walten' (Peters VII. p. 76) are both marked 'Ped. 4 Fuss,' doubtless a 4-foot pedal-reed, probably Schalmey. The 'Wo soll ich fliehen hin' (Peters VII. p. 84) is marked 1 'Clav. 8 Fuss; 2 Clav. 16 Fuss'; and 'Ped. 4 Fuss.' The 3 canonic preludes in the Little Organ Book are marked as follows: 'Gottes Sohn ist kommen' (canon at 8ve) for 2 manuals and pedals. R.H. 'Principal 8 F., Ped. Tromp. 8 F.' The Christmas Hymn, 'In dulci jubilo' (canon 4 in 2 at 8ve) has an 8-foot reed indicated for the pedals; but if the pedal-board does not rise to the high F-sharp, then a 4-foot reed must be used and the part played an octave lower. For 'O Lamm Gottes unschuldig' (canon at 5th) the pedal is also marked 8-foot reed, and the remarkable phrasing is Bach's own marking. The rapid changes of manual which Bach marked in the dorian toccata and in the chorale prelude 'Christ lag in Todesbanden,' etc., were the continuation of an old tradition. Such contrasts occur frequently in Buxtehude's works and were even more elaborate with the early French organists.

The most important record of Bach's registration is to be found in the organ concerto in D minor composed by his eldest son, Wilhelm Friedemann. This work exists in a copy actually made by his father, who also added the directions for the stops. There we find the organ used in a most surprising way. The first movement, which starts in a low register, is marked R.H. on Oberwerk, Octava 4 F. L.H. on Brustpositiv Octava 4 F. and Pedal Principal 8 F. At bar 21, the Sub-bass 32 F. is added to the pedal, and an 8 ft. Principal to the Oberwerk. The *Grave* movement (and apparently the fugue) is marked *Pleno*; the *Largo* is directed to be played with the *spiccato* touch and the series of effective manual changes is most artistically arranged in the finale.

The term *Organo pleno* which occurs at the head of some of Bach's work and in the course of others, is used in two senses. At the head of a work, it merely indicates that the piece is laid out for an organ of 3 manuals and a pedal of full compass. In the course of a piece, it means the same as the French term *Plein-Jeu*, a combination of all the great and pedal flues, mutation stops and mixtures, with 16 and 32-ft. reeds (no. 8 or 4) on the pedals only.

After Bach's time, organ-playing declined; little progress was made and instruments were neglected. The works of Merkel and Rheinberger as regards registration were affected by their own meagre instruments. Only Mendelssohn sought to revive the true Bach spirit; but little progress in registration was made with REGER. The organ works of Liszt, so full of colour, were little known; but the coming of KARG-ELERT covered all the lost

ground and more. No one, perhaps, has done more to elevate the art of organ-registration, which is surely quite as important to organ music as is the art of instrumentation to orchestral work.

It is time to come to the work of the English organists. Even so late as the 17th century, the chief English organs were small 2-manual instruments without compound, flute or reed stops. After the Restoration, the advent of these stops and the addition of an 'Echo' organ in the work of Bernhard Schmidt created a stir; but it was not until Renatus Harris's 4-manual organ in Salisbury cathedral was built (in 1710) that we find any wide range of tone. Even so, no very great advantage could be taken of it, so long as there was no pedal organ. It is not until 1790 that we find the first pedal organ installed at St. James, Clerkenwell (by G. P. England). Even then it had no pipes of its own, but merely drew down the manual notes. When proper pipes for an octave of pedals were installed, progress was hampered by the use of a GGG compass. But the English organs could never be seriously regarded as *solo* instruments, until about 1834, when Hill introduced a 2-octave CC pedal-board in the York Minster organ.

Amongst the chief English players of the last century were the two WESLEYS, W. T. BEST and Walter PARRATT. Of these, Best did the most for the advance of registration. His numberless arrangements afford an accurate knowledge of his system on the St. George's Hall organ at Liverpool. E. H. LEMARE carried on Best's custom of transcribing orchestral works. By transferring Wagner's music to the organ, he discovered many new combinations and invented a new style of organ treatment, which had far-reaching results when absorbed into the American cinema playing. The English organists, on the whole, still suffer from the fact that the pedal organ did not arrive here until the harmonic period had set in; in consequence they have never regarded the pedals exactly as a separate manual. On the other hand, their pedal-boards have always been the most practical in form. The exhibition of French organs in London in 1856 awakened English interest in the beauty of harmonic flutes, gambas and reeds on different pressures, and English organ-builders soon rivalled the Continental builders in the beauty of their instruments. The English pedal organ still remains behind in completeness of registers, but such specifications as those at Liverpool Cathedral and Albert Hall, London (both 1924; the first by Willis, the second by Harrison) are significant as harbingers of a new state of things. The English treatment of the four manuals, too, having its roots in accompanimental methods, has not reached that true democratising of the manuals which is

the chief feature in the playing of the finest French and American recitalists.¹

Progress in organ-registration can only be brought about by collaboration between players and artist-builders. The reason that France was for a long period in the forefront, was due to the long collaboration between the builder CAVAILLE-COLL and the organists, WIDOR and GUILMANT. The latter was to the modern harmonic school what Bach was to the contrapuntal. Joseph BONNET carried his master's ideas still further, especially as regards poetic treatment of the pedal; and Marcel DUPRÉ's application of the full resources of the technique of modern composition to his wonderful extemporised playing seems to have almost exhausted the possibilities of the French organ.

The modifying conditions are too numerous to enable one to lay down any hard and fast rules regarding the application of tone-colours; but a rather more scientific treatment of the subject would make for progress. The art of registration does not depend entirely on the number of stops at the player's command; for often a real artist will secure very fine results from quite a small instrument. Regard should be paid to the various classes of organ-tone: diapason, flute, gedackt, gamba, organ reed-tone, whose qualities and properties must be thoroughly understood before blending, shading and balancing can be obtained. The gedackt and flute classes are pleasing to the ear in themselves, and will blend easily with other classes; but diapason-tone is always better when pure. Gamba-tone has had a stigma placed on it during the last half-century; but in its more delicate forms it is not wearing to the ear; and Bach was extremely fond of it. There are many colours which are variations of the main classes, such as dulciana, dolcan, dolce, horn-diapasons, etc. (all diapason family); grossflöte, clarabella, hohflöte, wald-flute, philomena, flauto d' amore (all flute family); bourdon, doppelflöte, lieblich gedackt, quintaten, etc., all of which make shading, colouring and mixing easier. (See ORGAN: Vocabulary of Stops.) On small instruments much can be done by playing an octave (or two) higher on 16-ft. stops, or an 8ve (or two) lower on 4-ft. (or 2-ft.), and by the frequent use, when possible, of a pedal 8-ft. to take the lowest part of manual work. The large and ever-growing families of orchestral flutes, strings, reeds and brass, and even percussion stops, are used chiefly along the lines of orchestration.

With regard to the handling of the tone-colouring, a curious anomaly is that the stops in French instruments are arranged in the least convenient manner of all—in long terraces,

and not in columns: and the jamba, too, are so long, that assistants are always necessary. The English system with short jamba and slanting stop-frames is vastly superior; though these are now surpassed by the more compact system of 'stop-keys.'

The early organists indicated their stops by name, until the time when certain combinations became taken for granted. Mendelssohn, Merkel and Rheinberger satisfied themselves with indicating the manuals to be used and the use of the ordinary terms *ppp* to *fff*. When a move forward became imperative, the stops were again indicated by name (see Widor's organ symphonies, etc.), but the dangers of such a method are only too apparent in the numerous arrangements of W. T. Best, where the stops mentioned, from his own organ at Liverpool, are hardly ever suitable on other organs. A similar criticism may be levelled at the very elaborately marked Bach volume (II.) in Peters edition, by Karl Straube, of Leipzig. Karg-Elert's system of marking 16, 8, 4 (2 ft.; if very soft), etc., has been productive of good results; but the soundest system of indication is along the broader lines of indicating merely the power, class and quality of the stops needed, such as string-tone, flute-tone, etc., modified by the marks *ppp* to *fff*, and even by such descriptions as lugubrious, bright, ringing, etc.

For new ideas we must cross to America. The enormous wealth of colour and other devices at the player's disposal in such organs as those at the Eastman Theatre, Rochester, U.S.A., and at the Wanamaker Building, Philadelphia, U.S.A., opens up endless new territories. The Rochester organ contains great, swell, choir, solo, orchestral, echo and special string organs, besides a pedal of 47 stops. The total number of stops is 180, to which may be added 83 couplers and other contrivances. On these two organs all the manuals (with the exception of part of the Great) are boxed, and special solo-stops are found on all. The orchestral organ, too, can be played from all manuals. Notable additions to the large concert and cinema organs are the pianoforte, harpsichord and harp, celeste and carillon effects on several of the manuals. These additions give an altogether new character to the softer side of organ-playing. High pressure stops are no longer confined to the solo manual, nor low-pressures to choir and swell. The whole of the stops on one manual may often be transferred to another, and the way forward seems to lie in the abandonment of the old-fashioned prerogatives of the different manuals, and the true democratising of all the manuals and pedals. (See ORGAN-PLAYING.)

¹ But compare with this the statement of the English way as put forward by Dr. F. C. Back in the article ORGAN-PLAYING.

A. E.-H.

REGNART, surname of a family of Flemish musicians who flourished towards the end of the 16th century. There were five brothers, one of whom, AUGUSTIN (not August, as given by Eitner, which would correspond to Augustus in Latin but not to Augustinus), was a canon of the Church of St. Peter, Lille (not Douai, as Eitner suggests in *Q.-L.*, forgetting the words of the dedication partly quoted by himself in his *Bibliographie*, p. 216).¹

In 1590 Regnart edited and published at Douai a Collection of thirty-nine Motets, a 4-6, composed by his four brothers FRANCIS, JACOB, PASCHASIUS and CHARLES REGNART. The work appropriately bears on its title-page the motto, 'Ecce quam bonum et quam jucundum fratres habitare in unum,' Psal. 132. The full title is:

** Novae Cantiones Sacrae, 4, 5 et 6 vocum tum Instrumentorum pueri generi tum virae voci aptissimae, auctoribus Francisco, Jacobo, Paschasio, Carolo Regnart, fratribus germanis. **

Of the four brothers only two attained any real position or eminence as composers, Francis and Jacob. The other two are only represented by three motets apiece in this Collection, and of their careers nothing is known with any certainty.

Of FRANCIS, Augustin tells us that he had pursued his studies at the University of Douai and the Cathedral of Tournai. Besides the twenty-four motets in the Collection above mentioned, Francis Regnart is chiefly known by a book of fifty chansons a 4-5, 'Poésies de Ronsard et autres,' originally published at Douai by Jean Bogaerd in 1575, and afterwards at Paris by Le Roy and Ballard in 1579. These chansons have now been republished in modern score by H. Expert in his collection 'Les Maîtres musiciens de la renaissance française.' Fétis mentions a book of Missae tres a 4-5, by Francis Regnart, published by Plantin in 1582, but there is no trace of such a publication in Goovaert's *Bibliographie*, and Eitner knows nothing of it.

Of the life and works of JACOB (d. Prague, 1600) we have fuller information. He was early received as an Alumnus of the Imperial Chapel at Vienna and Prague. In 1564 he is designated as tenor singer in the chapel, and as a member of the chapel accompanied the Emperor to the Augsburg Diet of 1566. In 1573 he is mentioned as musical preceptor to

the boys of the choir, and before 1579 became the vice-Kapellmeister. In 1580 he was offered by the Elector of Saxony the post of Kapellmeister at Dresden vacant by the death of Scandelli, but declined. In 1582, however, he left the imperial service to enter that of the Archduke Ferdinand at Innsbruck, where he remained as Kapellmeister till 1595. He then returned to Prague, where he died. Shortly before his death, in the dedication of a book of masses to the Emperor, Rudolf II., which, however, was not published till afterwards, he recommended to the care of the Emperor his wife and six children. The widow, a daughter of Hans Vischer, the famous bass singer in the Electoral Chapel at Munich under Orlando Lassus, returned to Munich, where she occupied herself in preparing for publication in 1602-03 three volumes of her husband's masses, containing altogether 29 a 5, 6, 8 and 10, also a book of 'Sacrae cantiones,' a 4-12, 35 Nos. The other sacred works of Regnart which appeared during his lifetime were a book of 'Sacrae cantiones,' a 5-6, 1575, and one a 4, 1577; also one entitled *Mariale*, 1588, Marian motets composed by way of thanksgiving for recovery from severe illness.

He was, however, even more widely known by his secular works, which consist of (1) two books of 'Canzone italiane,' a 5 (1574-81), (2) two books entitled 'Threni Amorum,' German secular songs, a 5 (1595), and (3) several collections, a 3, 4, 5, entitled 'Kurtzweilige teutsche Lieder nach Art der Neapolitanen oder welschen Villanellen' (1576-91). Of the latter, the collection of 67 a 3 was republished by Eitner in modern score in 1895. They are written in the simple melodious Italian canzonet style, without any artificiality of counterpoint. In some introductory lines of verse the composer apologises for his frequent intentional employment of consecutive fifths in the harmony as being in accordance with the simple popular character he wished to give these songs. The melody of one of them, 'Venus du und dein Kind,' has become, with a slight alteration in the first line, the Choral tune well-known later, 'Auf meinen lieben Gott.' Two of Regnart's other songs, a 5, which have something more of imitative counterpoint, have been reprinted in Commer's selection of 'Geistliche und weltliche Lieder aus der xvi-xvii Jahrh.' None of his Latin motets have been reprinted, with the exception of one which found admission into the *Evangelical Gotha Cantional* of 1655, whence it has been reproduced in Schöberlein's *Schatz*. His masses, several of them based on the themes of German popular songs, must have been popular in their day, judging from the MS. copies of them enumerated in Eitner as surviving in various church archives. A Passion according to St. Matthew, a 8, by Regnart survives only in MS., of which some

¹ See also Goovaert's *Bibliographie*, p. 268; but he contradicts himself by elsewhere (p. 62) describing Augustin Regnart as Canon of St. Peter's, Louvain.

² Another incidental mistake of Eitner is that of taking the word 'germanis' as indicative of nationality, and explaining it on the ground that Flanders was then part of Germany, while all that the word really implies is that the brothers were full brothers.

account is given in Kade, *Die allere Passionsmusikanten*, pp. 60-62. J. R. M.

REGONDI, GIULIO (b. Geneva, 1822; d. May 6, 1872). His father took him to every court of Europe, excepting Madrid, before he was 9 years old. They arrived in England in June 1831; and Giulio seems never to have left the United Kingdom again except for two concert tours in Germany, one with Ladel, the violoncellist, in 1841, the other with Mme. Dulcken in 1846. On the former of these tours he played both the guitar and the melophone, and evoked enthusiastic praises from the correspondents of the *A.M.Z.* in Prague and Vienna for his extraordinary execution on both instruments. The *CONCERTINA* (*q.v.*) was patented by Sir Charles Wheatstone in 1829, but did not come into use till Regondi took it up. He wrote two concertos for it, and a very large number of arrangements and original compositions. He also taught it largely, and at one time his name was to be seen in almost all concert programmes. He was a great friend of Molique, who wrote for him a concerto for the concertina (in G) which he played with great success at the concert of the Musical Society of London, Apr. 20, 1864. When he went abroad for his second tour, his performance and the effect which he got out of so unpromising an instrument astonished the German critics. (See *A.M.Z.*, 1846, p. 853.) G.

REHEARSAL (Fr. *répétition*, Ger. *Probe*), the occasions in which music, particularly ensemble music, is studied previous to the performance. The continental practice of admitting the public to full rehearsals (Fr. *répétition générale*, Ger. *Haupt-probe* or *General-probe*) is little followed in England except at certain of the older festivals, notably the Three Choirs and Handel Festivals. C.

REICHA, ANTON (b. Prague, Feb. 27, 1770; d. May 28, 1836), lost his father before he was a year old; his mother not providing properly for his education, he left home, and took refuge with his grandfather at Glatow, in Bohemia. The means of instruction in this small town being too limited, he went on to his uncle JOSEPH REICHA (b. Prague, 1746; d. Bonn, 1795), a violoncellist, conductor and composer, who lived at Wallenstein in Bavaria. His wife (a native of Lorraine speaking nothing but French) had no children, so they adopted the nephew, who thus learned to speak French and German besides his native Bohemian. He now began to study the violin, pianoforte and flute in earnest. On his uncle's appointment, in 1788, as musical director to the Elector of Cologne, he followed him to Bonn, and entered

the band of Maximilian of Austria as second flute. The daily intercourse with good music roused the desire to compose, and to become something more than an ordinary musician, but his uncle refused to teach him harmony. He managed, however, to study the works of Kirnberger and Marpurg in secret, gained much practical knowledge by hearing the works of Handel, Mozart and Haydn, and must have learned much from his constant intercourse with Beethoven, who played the viola in the same band with himself and was much attached to him. At length his perseverance and his success in composition conquered his uncle's dislike. He composed without restraint, and his symphonies and other works were played by his uncle's orchestra.¹

On the dispersion of the Elector's court in 1794, Reicha went to Hamburg, where he remained till 1799. There the subject of instruction in composition began to occupy him, and there he composed his first operas, 'Godefroid de Montfort,' and 'Oubaldi, ou les Français en Égypte' (two acts). Though not performed, some numbers of the latter were well received, and on the advice of a French émigré, he started for Paris towards the close of 1799, in the hope of producing it at the Théâtre Feydeau. In this he failed, but two of his symphonies, an overture and some 'Scènes Italiennes,' were played at concerts. After the successive closing of the Théâtre Feydeau and the Salle Favart, he went to Vienna, and passed six years (1802-08) in renewed intimacy with Beethoven, and making friends with Haydn, Albrechtsberger, Salieri and others. The patronage of the Empress Maria Theresa was of great service to him, and at her request he composed an Italian opera, 'Argina, regina di Granata.' During this happy period of his life he published symphonies, oratorios, a Requiem, six string quintets, and many solos for P.F. and other instruments. He himself attached great importance to his '36 Fugues pour le piano,' dedicated to Haydn, but they are not the innovations which he believed them to be; in placing the answers on any and every note of the scale he merely reverted to the ricercari of the 17th century, and the only effect of this abandonment of the classic laws of 'real fugue' was to banish tonality.

The prospect of another war induced Reicha to leave Vienna, and he settled finally in Paris in 1808. He now realised the dream of his youth, producing first 'Cagliostro' (Nov. 27, 1810), an opéra-comique composed with Dourlen; and at the Opéra, 'Natalie' (three acts, July 30, 1816), and 'Sappho' (Dec. 16, 1822). Each of these works contains music worthy of respect, but they had not sufficient dramatic effect to take with the public.

Reicha's reputation rests on his chamber

¹ See an interesting notice by Kastner quoted by Thayer *Beethoven*, ii, 138.

music, and on his theoretical works. Of the former the following deserve mention: a duetto for five strings and five wind instruments; an octet for four strings and four wind instruments; twenty-four quintets for flute, oboe, clarinet, horn and bassoon; six quintets and twenty quartets for strings; one quintet for clarinet and strings; one quartet for PF., flute, violoncello and bassoon; one do. for four flutes; six do. for flute, violin, tenor and violoncello; six string trios; one trio for three violoncellos; twenty-four do. for three horns; six duets for two violins; twenty-two do. for two flutes; twelve sonatas for PF. and violin, and a number of sonatas and pieces for PF. solo. He also composed symphonies and overtures. These works are more remarkable for novelty of combination and striking harmonies than for abundance and charm of ideas. Reicha's faculty for solving musical problems brought him into notice among musicians when he first settled in Paris, and in 1818 he was offered the professorship of counterpoint and fugue at the Conservatoire. Among his pupils there were Boilly, Jeleusperger, Bienenmé, Millaut, Lefebvre, Elwart, Pollet, Lecapentier and Dancha.

His didactic works, all published in Paris, are: *Traité de mélodie*, etc. (4to. 1814); *Cours de composition musicale*, etc. (1818); *Traité de haute composition musicale* (first part 1824, second 1826), a sequel to the other two; and *Art du compositeur dramatique*, etc. (4to. 1833).

Czerny published a German translation of the *Traité de haute composition* (Vienna, 1834, four vols. folio), and in his *Art d'improviser* obviously made use of Reicha's *Art de varier*—fifty-seven variations on an original theme.

Reicha married a Parisian, was naturalised in 1829, and received the Legion of Honour in 1831. He presented himself several times for election to the Institut before his nomination as Boieldieu's successor in 1835. He only enjoyed his honours a short time, dying of inflammation of the lungs in 1836. A life-like portrait, somewhat spoiled by excessive laudation, is contained in the *Notice sur Reicha* (Paris, 1837, 8vo), by his pupil Delaire. G. C.

REICHARDT, ALEXANDER (b. Packs, Hungary, Apr. 17, 1825; d. Boulogne, 1860), tenor singer, made his first appearance at the age of 18 at the Lemberg theatre as Rodrigo in Rossini's 'Otello.' His success there led him to Vienna, where he was engaged at the court Opera, and completed his education under Gentiluomo, Catalani, etc. At this time he was much renowned for his singing of the Lieder of Beethoven and Schubert, and was in request at all the soirées; Prince Esterhazy made him his Kammer-sänger. In 1846 he made a tour through Berlin, Hanover, etc., to Paris, returning to Vienna. In 1851 he made his first

appearance in England, singing at the Musical Union, May 6, at the Philharmonic, May 12, at many other concerts, and before Queen Victoria. In the following season he returned and sang in Berlioz's 'Romeo and Juliet,' at the new Philharmonic Concert of Apr. 14, also in the Choral Symphony, Berlioz's 'Faust' and the 'Walpurgisnacht,' and enjoyed a very great popularity. From this time until 1857 he passed each season in England, singing at concerts, and at the Royal Opera, Drury Lane, and Her Majesty's Theatre, where he filled the parts of the Count in 'The Barber of Seville,' Raoul in 'The Huguenots,' Belmont in the 'Seraglio,' Don Ottavio in 'Don Juan,' and Florestan in 'Fidelio.' He also appeared with much success in oratorio. In 1857 he gave his first concert in Paris, in the Salle Erard, and the following sentence from Berlioz's report of the performance will give an idea of his style and voice. 'M. Reichardt is a tenor of the first water—sweet, tender, sympathetic and charming. Almost all his pieces were re-demanded, and he sang them again without a sign of fatigue.' In 1860 he settled in Boulogne. After he retired from the active exercise of his profession he organised a Philharmonic Society at Boulogne; he was president of the Académie Communale de Musique, and his occasional concerts for the benefit of the hospital—where one ward is entitled 'Fondation Reichardt'—were among the chief musical events of the town. Reichardt was a composer as well as a singer. Several of his songs were very popular in their day. G.

REICHARDT, (1) JOHANN FRIEDRICH (b. Königsberg, Prussia, Nov. 25, 1752; d. Giebichenstein, near Halle, June 17, 1814), composer and writer on music; son of a musician.

His education was more various than precise, music he learnt by practice rather than by any real study. His best instrument was the violin, on which he attained considerable proficiency under Veichtner, a pupil of Benda; but he was also a good pianist. Theory he learned from the organist Richter. On leaving the University of Königsberg he started on a long tour, ostensibly to see the world before choosing a profession, though he had virtually resolved on becoming a musician. Between 1771 and 1774 he visited Berlin, Leipzig, Dresden, Vienna, Prague, Brunswick and Hamburg, made the acquaintance of the chief notabilities—musical, literary and political—in each place, and became himself in some sort a celebrity, after the publication of his impressions in a series of *Vertraute Briefen eines aufmerksamen Reisenden*, in two parts (1774 and 1776). On his return to Königsberg he went into a government office, but hearing of the death of Agricola of Berlin, he applied in person to Frederick the Great for the vacant

post of Kapellmeister and court composer, sending him his opera 'Le feste galanti,' and though barely 24 obtained it in 1776. He at once began to introduce reforms, both in the Italian opera and the court orchestra, and excited much opposition from those who were more conservative than himself. While thus occupied he was indefatigable as a composer, writer and conductor. In 1783 he founded the Concerts Spirituels for the performance of unknown works, vocal and instrumental, which speedily gained a high reputation. He published collections of little-known music, with critical observations, edited newspapers, wrote articles and critiques in other periodicals, and produced independent works. But enemies, who were many, contrived to annoy him so much in the exercise of his duties, that in 1785 he obtained a long leave of absence, during which he visited London and Paris, and heard Handel's oratorios and Gluck's operas, both of which he heartily admired. In both places he met with great success as composer and conductor, and was popular for his social qualities; but neither of his two French operas 'Tamerlan' and 'Pantheé,' composed for the Opéra, was performed. On the death of Frederick the Great (1786) his successor confirmed Reichardt in his office, and he produced several new operas, but his position became more and more disagreeable. His vanity was of a peculiarly offensive kind, and his enemies found a weapon ready to their hand in his avowed sympathy with the doctrines of the French Revolution. The attraction of these views for a buoyant, liberal mind like Reichardt's, always in pursuit of high ideals, and eager for novelty, is obvious enough; but such ideas are dangerous at court, and after further absence (from 1791) which he spent in Italy, Hamburg, Paris and elsewhere, he received his dismissal from the Kapellmeistership in 1794.¹ He retired to his estate, Giebichenstein, near Halle, and occupied himself with literature and composition, and occasional tours. In 1796 he became inspector of the salt works at Halle. After the death of Frederick William II. he produced a few more operas in Berlin, but made a greater mark with his Singspiele, which are of real importance in the history of German opera. In 1808 he accepted the post of Kapellmeister at Cassel to Jerome Bonaparte, refused by Beethoven, but did not occupy it long, as in the same year we find him making a long visit to Vienna. On his return to Giebichenstein he gathered round him a pleasant and cultivated society, and there, in the midst of his friends, he died.

Reichardt has been, as a rule, harshly judged; he was not a mere musician but rather

a combination of musician, littérateur and man of the world. His overweening personality led him into many difficulties, but as a compensation he was endued with great intelligence, and with an ardent and genuine desire for progress in everything—music, literature and politics. As a composer his works show cultivation, thought and honesty: but have not lived, because they want the necessary originality. This is specially true of his instrumental music, which is entirely forgotten. His vocal music, however, is more important, and a good deal of it might well be revived, especially his Singspiele and his Lieder. Mendelssohn was no indulgent critic, but on more than one occasion he speaks of Reichardt with a warmth which he seldom manifests even towards the greatest masters. He never rested until he had arranged for the performance of Reichardt's Morning Hymn, after Milton, at the Düsseldorf Festival of 1835; and his enthusiasm for the composer, and his wrath at those who criticised him, are delightful to read.² Years afterwards, when his mind had lost the ardour of youth, and much experience had sobered him, he still retained his fondness for this composer, and few things are more charming than the genial appreciation with which he tells Reichardt's daughter of the effect which her father's songs had had, even when placed in such a dangerous position as between works of Haydn and Mozart, at the Historical Concert at the Gewandhaus in Feb. 1847. It is the simplicity, the naïveté, the national feeling of this true German music that he praises, and the applause with which it was received shows that he was not alone in his appreciation. Amongst Reichardt's numerous works are eight operas; eight Singspiele, including four to Goethe's poems, 'Jery und Bätely' (1789), 'Erwin und Elmire,' 'Claudine von Villabella' and 'Lilla'; five large vocal works, including Milton's 'Morning Hymn,' translated by Herder, his most important work, in 1835; a large number of songs, many of which have passed through several editions, and been published in various collections.

Reichardt's writings show critical acumen, observation and judgment. Besides the letters previously mentioned, he published—*Das Kunstmagazin*, eight numbers in two vols. (Berlin, 1782 and 1791); *Studien für Tonkünstler und Musikfreunde*, a critical and historical periodical with thirty-nine examples (1792); *Vertraute Briefe aus Paris*, three parts (1804); *Vertraute Briefe auf einer Reise nach Wien*, etc. (1810)³; fragments of autobiography in various newspapers; and innumerable articles, critiques, etc. The *Briefe* are specially interesting from the copious details they give, not only on the music, but on the politics, literature and society of the various

¹ There was apparently some dissatisfaction with Reichardt's efficiency as a musician as well as with his political opinions, for Mozart's remark that 'the King's hand contains great virtue, but the effect would be better if the gentlemen played together,' certainly implied a reflection on the conductor. Neither does Reichardt seem to have appreciated Mozart (*Jahn's Mozart*, II. 410).

(2) LOUISE (b. Berlin, 1780; d. Hamburg, Nov. 17 1826), daughter and pupil of Johann Friedrich, made her début as a singer in 1794 in Berlin. She accompanied her father in his wanderings, and after his death, in 1814, settled at Hamburg and opened a vocal academy with Clasing. The loss of her fiancé shortly before the wedding, and the loss of her voice, cast a shadow over her life. She wrote a considerable number of songs, of which some are still popular favourites. (*Q.-L.*; *Mendel.*)

REICHER-KINDERMANN, HEDWIG (b. Munich, July 15, 1853; d. Trieste, June 2, 1883), the daughter of the celebrated baritone, KINDERMANN (*q.v.*). She was taught the piano first by her mother, and at the School of Music, but abandoned the same in favour of singing, on the advice of Franz Wüllner. She received her vocal instruction from her father, and made her début at the Munich Opera as one of the boys in the 'Meistersinger,' and next played small parts in the opera, drama and ballet, besides singing in the chorus, in order to gain experience. She sang the alto part in Franz Lachner's Requiem at Leipzig in 1871 with such success that she became engaged at Carlsruhe. She played 'as guest' at Berlin as Pamina, June 5, and Agathe, June 9, 1874; she then returned to Munich, and sang Daniel in Handel's 'Belshazzar,' Apr. 14, 1875. Soon after she married Emanuel Reicher, an actor at the Gärtnerplatz Theatre, and for a time sang there in opera bouffe, but returned to opera and played Grimmerde in the 1st Cycle, and Erda in the 2nd Cycle, at Bayreuth in 1876. She next played at Hamburg, Vienna (where she appeared as Leah on the production of Rubinstein's 'Macabees'), and again at Munich. Having received instruction for the purpose from Faure and Jules Cohen at Paris, she sang in French at Monte Carlo in 1880 with such success that she received an offer to sing at La Scala, Milan, but declined it in favour of an engagement under Neumann at Leipzig, where she made her début as Fidelio, May 12, 1880. She became a great favourite, and remained there until 1882. She played in Neumann's company in the 'Ring' at Berlin and other German towns, in London, and lastly at Trieste. (See Neumann's *Erinnerungen*, etc., 1907.) She made a great impression at Her Majesty's Theatre as Fricka on the production of 'Rheingold,' May 5, and of 'Walküre,'

May 6, 1882, and still more as Brünnhilde in the 2nd Cycle.

A. C.

REICHMANN, THEODOR (b. Rostock, Mar. 15, 1849; d. Marbach, Lake of Constance, May 22, 1903), was taught to sing at first by Mantius, and subsequently by Lamperti in Milan. He made his début as a baritone at Magdeburg in 1869, and sang at Berlin, Rotterdam, Strassburg (1872), Hamburg (1873), Munich (1875), and was a member of the Court Opera at Vienna in 1882-89. In 1882 he sang the part of Amfortas at Bayreuth for the first time, and was identified with it for some ten years, after which differences with the authorities resulted in his non-appearance there until 1902. In the seasons between 1889 and 1891 he sang in New York, and in the latter year returned to Vienna, becoming once more a member of the Opera company in 1893. In that year he sang the part of Creon in 'Medea' at an operatic festival at Gotha. He appeared in London at Covent Garden in 1884, and at Drury Lane and Covent Garden in 1892, singing the parts of Wotan, Hans Sachs, Flying Dutchman, Pizarro, and the Trompeter von Sakkingen. He was far more popular in Germany than in England, where he had to stand comparisons with voices of far more beautiful quality than his.

M.

REID, GENERAL JOHN (b. Feb. 13, 1721; d. London, Feb. 6, 1807), the son of Alexander Robertson of Straloch, Perthshire, was educated at Edinburgh University, and entered Lord Loudoun's regiment of Highlanders in 1745. He subsequently adopted the surname by which he is known. After the quelling of the Jacobite rebellion, he saw active service in Flanders, Martinique, Havana and North America. He was in the 42nd Highlanders in 1751-70, was promoted colonel in 1777 and major-general in 1781. In 1794 he became colonel of the 88th foot, and general in 1798, dying possessed of a fortune of £50,000. By his will, made in 1803, he directed his trustees, in the event of his daughter dying without issue, to found a professorship of music in the University of Edinburgh.

'For the purpose also, after completing such endowment as hereinafter is mentioned, of making additions to the library of the said University, or otherwise promoting the general interest and advantage of the University in such . . . manner as the Principal and Professors . . . shall . . . think most fit and proper.'

In a codicil, dated 1806, he adds:

'After the decease of my daughter . . . I have left all my property . . . to the College of Edinburgh where I had my education . . . and as I leave all my music books to the Professor of Music in that College, it is my wish that in every year after his appointment he will cause a concert of music to be performed on the 13th of February, being my birthday.'

He also directed that at this annual 'Reid Concert' some pieces of his own composition should be performed 'by a select band.'

When by the death of General Reid's

daughter in 1838 some £70,000 became available, it seems to have been handed over to the University authorities without sufficient attention to the italicised portion of the following instruction in the will:

'That . . . my said Trustees . . . shall and do, by such instrument or instruments as may be required by the law of Scotland make over the residue of my . . . personal estate to the Principal and Professors of the said University.'

And as no particular sum was specified for foundation and maintenance of the Chair of Music, considerable latitude being allowed to the discretion of the University authorities, the secondary object of the bequest received far greater care and attention than the primary one, and for years the Chair was starved. In 1851, anticipating Professor Donaldson's intention of petitioning Parliament, the Edinburgh Town Council, as 'Patrons' of the University, raised an action against the Principal and Professors for alleged mismanagement and misappropriation of the Reid Fund. A long litigation followed, and by decree of the Court of Session in 1855 the University authorities were ordered to devote certain sums to the purchase of a site and the erection of a building for the class of music. The class-room and its organ were built in 1861, and the professor's salary—which had been fixed at the very lowest sum suggested by the founder, viz. £300—as well as the grant for the concert, were slightly raised, and a sum set apart, by order of the Court, for expenses of class-room, assistants, instruments, etc. See EDINBURGH AND PROFESSOR.

REID CONCERTS, see EDINBURGH.

REIMANN, (1) IGNAZ (b. Albersdorf, district of Glatz, Dec. 27, 1820; d. June 17, 1885), became principal teacher and choirmaster at Rengersdorf in Silesia, having been a pupil of the Breslau Seminary. He was an excessively diligent and fluent composer of church music, and wrote no fewer than 74 masses, of which only 18 were published. His son,

(2) HEINRICH (b. Rengersdorf, Mar. 14, 1850; d. Charlottenburg, May 24, 1906), received musical instruction from his father. He passed the Gymnasium at Glatz, and studied philology at Breslau from 1870-74, graduated the following year, and taught at the gymnasia of Strehlen, Wohlau, Berlin, Ratibor and Glatz, for a year in each place successively, till in 1885 he became director of that at Gleiwitz, in Upper Silesia. There he quarrelled with the authorities, threw up his post, became a Protestant, and thenceforth devoted himself entirely to music. He became known during 1879 and 1880 as musical reporter to the *Schlesischer Zeitung*, and by other literary works (*Nomos*, 1882; *Prosodies*, 1885-1886). After he took definitely to music, he published some vocal and organ compositions (sonatas, studies, etc.), and a biography of Schumann, which was published by Peters in

1887, and in that year he moved to Berlin to act as musical critic for the *Allgemeine Musikalische Zeitung*. For a time he was occupied at the Royal Library, besides being teacher of organ-playing and theory at the Scharwenka-Klindworth Conservatorium till 1894, and organist of the Philharmonic till 1895, in which year the Kaiser appointed him to the great church in the Augusta-Victoriaplatz, erected to the memory of the Emperor William I., where he enjoyed a great reputation as an organ virtuoso, and directed some impressive performances of oratorios, masses, and church music generally. In 1897 he received the title of Professor, and in 1898 founded a Bach Society.

His compositions include duets for female voices; love scenes in waltz form for four voices; a chorus for four male voices; an album of children's songs for solo voice; toccata for organ in E minor (op. 23); piano duets; two wedding songs for bass voice; arrangements of twenty-five German songs, 'Das deutsche Lied,' of the 14th to the 19th centuries, also for bass voice; a prelude and triple fugue in D minor for the organ; and ciaccona for organ in F minor. His writings include a contribution on the theory and history of Byzantine music (1889); two volumes of musical retrospects, *Wagneriana-Lisztiana*; an opening volume to his own collection of lives of celebrated musicians, being the biography of Schumann already mentioned, to which he added those of Bulow and J. S. Bach.

H. V. H.

REIMANN, MATTHIEU (Matthias Reymannus) (b. Löwenberg, 1544; d. Prague, Oct. 21, 1597), a Doctor of Law and Imperial Councillor under Rudolf II.; wrote two works for the lute; the one entitled 'Noctes musicae' appeared in 1598, and the other, 'Cithara sacra psalmodiae Davidis ad usum testudinis,' in 1603.

H. V. H.

REINA, FRA SISTO, of Saronno, Lombardy, Franciscan monk, from 1648 organist at Beata Vergine dei Miracoli del Borgo, Saronno; in 1660 maestro di cappella of S. Francis, Piacenza; in 1662 organist and maestro di cappella of S. Bartolomeo, Modena; in 1664 mentioned only as organist of that church. He wrote masses and other church music. His 'La danza delle voci' (Psalms, Te Deum, etc.), op. 9, published in 1664, contains 2 sonatas for 4 violins (Q.-J.).

REINACH, THÉODORE (b. St. Germain en Laye, July 13, 1860), barrister from 1881 '86, professor at the Collège de France, archæologist and historian, member of the French *Parlement* (1906-14) and of the Institut, is an authority in the domain of Hellenism and of Greek music. In the *Revue des études grecques* (editor since 1888) he has published, 1892-1901, *Notes sur les problèmes musicaux d'Aristote* (with

3'Eichthal), 1894; *La Guitare dans l'art grec* (1396), etc.; *La Musique des sphères* (1901). He has contributed to the *Dictionnaire des antiquités grecques et romaines* (Lyra, Musica, Tibia, etc.); *L'Ami des monuments: Note sur l'hymne à Apollon* (1894); *Bulletin de Correspondance hellénique: La Musique des hymnes de Delphes, Un nouvel hymne delphique* (1893, 1894); to the *Revue critique* (1887), *Revue archéologique* (1919), *Revue musicale* (1904, 1922), *Revue de Paris*, *Revue bleue*, *Revue de musicologie*, etc. He has published with H. Weil: *Plutarque: De la musique* (trans.) (Paris, 1900, Leroux), and a book, *La Musique grecque* (Paris, Payot, 1926). He is the author of 'Salamine,' lyric drama (after Aeschylus's 'Persae'), music by M. Emmanuel, not yet performed, and of 'La Naissance de la lyre' (after Sophocles), music by A. Roussel, performed at the Opéra (1925). M. L. P.

REINAGLE, (s.) JOSEPH (b. near Vienna ?), said to have served in the Hungarian army. In 1762 he was at Portsmouth, where his sons were born. By the influence of the Earl of Kelly, he was appointed in 1762 trumpeter to the King, presumably in Scotland, as he appears to have at that time removed to Edinburgh. (See SCHETKY.)

(2) ALEXANDER (b. Portsmouth, 1756; d. Maryland, Baltimore, U.S.A., Sept. 21, 1809) was probably his eldest son. He accompanied his younger brother, Hugh (4), to Lisbon, and after his death went to America about 1786. His name is attached to

* A Collection of the most Favourite Scots tunes with Variations for the Harpsichord by A. Reinagle, London, printed for and sold by the author, Jollo.

This scarce and rudely printed volume is advertised in Aird's 'Selection,' vol. ii. 1782, and though bearing 'London' as an imprint was most likely issued from Glasgow. In Philadelphia, where the greater part of his American life was spent, he became a musician of importance. In 1793 he formed a company with Thomas Wignell, built the New Theatre in Chestnut Street, and was pianist in the orchestra. Both plays and operas were produced there for which in some cases he wrote music. Some sonatas by him are in the Library of Congress at Washington.

BRILL—BONWICK, *Early Concert Life, Early Opera*, pp. 113, 118; *Sammels Int. Mus. Ges.* vi. 465, 466-7.

The second son, (3) JOSEPH (b. Portsmouth, 1762; d. Oxford, Nov. 12, 1825), was first intended for the navy, and next apprenticed to a working jeweller in Edinburgh. He took up music as a profession, and studied the French horn and the trumpet under his father and subsequently the violoncello under J. G. C. SCHETKY (q.v.), who had married his sister. He became a noted player at the Edinburgh concerts, but abandoned the instrument as a consequence of his brother's superior skill on it, resuming it after Hugh's death. He became

violin and viola player and leader of the orchestra at St. Cecilia's Hall, Edinburgh. He came to London, and was one of the second violins at the Handel Commemoration in 1784. In the following year he became associated with Haydn and Salomon and played at their concerts. Early in the 19th century he removed to Oxford, and died there. His published works include 'Twenty-four progressive lessons for the pianoforte' (1796), 'Duets for the Violoncello,' quartets for strings, besides an *Introduction to the Art of Playing the Violoncello*, which ran through several editions. In Gow's 'Fifth Collection of Strathspey Reels' are some airs by Joseph Reinagle; one, 'Dumfries Races,' became well known.

The third son, (4) HUGH (d. Lisbon, Mar. 19, 1785), became a proficient violoncellist, went to Lisbon for the benefit of his health in 1784, and died there of consumption.
